Distribution: Lower Central America and NW South America. Eastern Panama (Cocle, Los Santos), N Colombia (Antioquia, Atlántico, Bolívar, Cundinamarca, La Guajira, Magdalena, Norte de Santander, Santander, Sucre, Tolima, Vallee) and Venezuela (Amazonas, Anzoátegui, Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Nueva Esparta, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy, Vargas, Zulia, Margarita and Testigos Is.), 230–1970 m.

Sources: Valdivieso & Tamsitt, 1963, Roze, 1966a, Lancini, 1986, Pérez-Santos & Moreno, 1988, Hernández & Rada de M., 1992, Esqueda & La Marca, 1999, Mijares-Urrutia & Arends, 2000, Navarrete et al., 2009, Ugueto & Rivas, 2010 and Montingelli & Zaher, 2011.

Remarks: Type locality restriction of Hoge & Lancini (1960a: 61) does not select a lectotype in absence of a museum or catalogue number.

13. *Mastigodryas pulchriceps* (Cope, 1868b). Proc. Acad. Nat. Sci. Philadelphia 20(2): 105. (*Masticophis pulchriceps*)

Synonyms: *Herpetodryas reissii* W.C.H. Peters, 1868 and *Coluber fasciatus* Rosén, 1905.

Type: Holotype, ANSP 5710 (formerly USNM 6704), a 533 mm specimen (J. Orton, autumn 1867–winter 1868), lost *fide* L.C. Stuart (1941: 50).

Type locality: "the plateau valley of Quito" [Ecuador] (in error *fide* J.A. Peters, 1955: 347).

Distribution: Southwestern Colombia (Tolima) and W Ecuador (El Oro, Esmeraldas, Guayas, Pichincha), 750–1285 m.

Sources: Pérez-Santos & Moreno, 1988, 1991, Agostini et al., 2003 and Ortega-Andrade, 2010.

MEDIOHYDROPHIS Kharin, 2004b (Elapidae)

Type species: *Hydrophis klossi* Boulenger, 1912c.

Distribution: Marine waters of Indo-Australia, including Bay of Pattani, Bight of Bangkok, Brunei Bay, Coral Sea, Gulf of Thailand, Orie Bay, Strait of Madura and Strait of Malacca.

Source: Kharin, 2004b.

1. *Mediohydrophis klossi* (Boulenger, 1912c). Vert. Fauna Malay Penin., Rept. Batr.: 190. (*Hydrophis klossi*)

Type: Holotype, BMNH 1946.1.10.8 (formerly SM & BMNH 1920.6.3.7), a 900 mm female.

Type locality: "Thuala, Selangor, Malay Peninsula" (in error). Corrected to Kuala Selangor [= Kuala Selangor Distr., Selangor State, W West Malaysia, 3°20'N, 101°15'E, elevation NSL] *fide* Stuebing (1991: 355).

Distribution: Malay Peninsula and Greater Sundas. Southern Thailand (Chanthaburi, Pattani, Phuket, Singgora, Songkhla, Trang), West Malaysia (Perak, Selangor), Singapore, East Malaysia (Sabah) and W Indonesia (Sumatra).

Sources: E.H. Taylor, 1965 and Tweedie, 1983.

2. *Mediohydrophis melanosoma* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 367–368, pl. 25, fig. e. (*Hydrophis melanosoma*)

Synonyms: *Hydrophis floweri* Boulenger, 1898g, *Distira wrayi* Boulenger, 1900a, *Hydrophis flower* – Phisalix, 1922 *(nomen incorrectum), Hydrophis melanosorana* – Tu, 1974 *(nomen incorrectum),* and *Distira melanaosoma* – Culotta & Pickwell, 1993 *(nomen incorrectum).*
Type: Holotype, BMNH 1946.1.10.6 (formerly RCSM & BMNH 1896.1.25.1), a 1245 mm female.
Type locality: Unknown.
Distribution: Indo-Australia. West Malaysia (Johore, Perak), Singapore, East Malaysia (Sabah), Indonesia (Java, Sulawesi: South; Sumatra), Papua New Guinea (Milne Bay) and N Australia (Queensland, Western Australia, Great Barrier Reef).
Sources: O'Shea, 1996, Stuebing & Inger, 1999 and Cogger, 2000.

MEGATYPHLOPS Broadley & Wallach, 2009 (Typhlopidae)

Type species: *Onychocephalus mucruso* W.C.H. Peters, 1854.
Distribution: East and S Africa.
Source: Broadley & Wallach, 2009.

1. *Megatyphlops anomalus* (Bocage, 1873b). J. Sci. Math. Phys. Nat., Lisboa 4(15): 248–249, pl. 1, fig. 3. (*Onychocephalus anomalus*)

Synonyms: *Typhlops anchietae* Bocage, 1886 and *Typhlops anchiate* – Rose, 1950 *(nomen incorrectum).*
Type: Syntypes (4), MBL 1177-D, longest syntype 188 mm specimen, destroyed by fire 18 March 1978.
Type locality: "Huilla, dans l'intérieur de Mossamedes" [= Huíla, Huíla Province, Angola, 15º04'S, 13º33'E, elevation 1695 m].
Distribution: Southwestern Angola (Benguela, Bié, Cuanza Sul, Huambo, Huíla, Namibe), 910–1735 m.

2. *Megatyphlops brevis* (Scortecci, 1929). Atti Soc. Ital. Sci. Nat. Mus. Civ. Stor. Nat. Milano 68(3–4): 267–269, 3 figs. (*Typhlops brevis*)

Type: Holotype, MSNM 2033, a 182 mm female (L. Luppi, 25 Jan. 1926).
Type locality: "Chisimajo" [= Kismayu, Jubbada Hoose Region, S Somalia, 00º23'S, 42º28'E, elevation NSL].
Distribution: Northeastern Africa. Southeastern South Sudan (Eastern Equatoria), N Uganda (Northern), Somalia (Bari, Jubbada Hoose, Shabeellaha Hoose, Shabeellaha Dhexe, Togdheer), S Ethiopia (Bale, Hararge, Kefa, Sidamo, Wollo) and SW Kenya (Coast, Eastern, Nyanza, Rift Valley, Western), NSL–2000 m.
Sources: Lanza, 1983a, 1990b, Spawls et al., 2002, Wallach & Lanza, 2004 and Largen & Spawls, 2010.

3. *Megatyphlops mucruso* (W.C.H. Peters, 1854). Verhandl. Königl.-Preuss. Akad. Wiss. Berlin 1854(11): 621. (*Onychocephalus mucruso*)

Synonyms: *Onychocephalus dinga* W.C.H. Peters, 1854, *Onychocephalus varius* W.C.H. Peters, 1860a, *Typhlops riparius* W.C.H. Peters, 1881a, *Typhlops mandensis* Stejneger, 1894a, *Typhlops latirostris* Sternfeld, 1910c, *Typhlops viridiflavus* Peracca, 1912a, *Typhlops excentricus* Procter, 1922, and *Typhlops schlegeli mucroso* H.W. Parker, 1936d *(nomen emendatum).*
Type: Lectotype, ZMB 3963, a 245–395 mm specimen (W.C.H. Peters, Jan.–June, 1845), designated by Loveridge (1933: 216).
Type locality: "Macanga" [= Makanga, Tete Prov., Mozambique, 15º27'S, 33º31'E, elevation 450 m] via type locality restriction of Loveridge (1933: 216).
Distribution: Eastern Africa. Northeastern Angola (Lunda Norte), S Democratic Republic of the Congo (Bas-Congo, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa), SE Kenya (Coast), Tanzania (Arusha, Dar es Salaam, Dodoma, Iringa, Lindi, Mbeya, Morogoro, Mtwara, Mwanza, Pwani, Rukwa, Tabora, Tanga, Manda and Zanzibar Is.), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), N Mozambique (Manica, Nampula, Sofala, Tete, Zambesia), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands) and ext. E Botswana (North East), NSL–1740 m.
Sources: Spawls et al., 2002, Branch, 2005 and Broadley & Blaylock, 2013.
Remarks: Complex history of types discussed by McDiarmid et al. (1999: 86).

4. *Megatyphlops schlegelii* (Bianconi, 1849a). Nouvi Ann. Sci. Nat., Bologna (2) 10: 106–107. (*Typhlops schlegelii*)

Synonyms: *Onychocephalus petersii* Bocage, 1873b, *Typhlops humbo* Bocage, 1886, and *Typhlops hottentotus* Bocage, 1893c.
Type: Holotype, IBI, a 522 mm specimen (C. Fornasini, 1842–1847).
Type locality: "Mozambico" [= Mozambique]. Restricted to Inhambane, Mozambique *fide* Roux-Estève (1974a: 165).
Distribution: Southern Africa. Southern Mozambique (Gaza, Inhambane, Maputo), S Zimbabwe (S Masvingo), SW Angola (Benguela, Cuando Cubango, Cunene), N Namibia (Caprivi, Khomas, Kunene, Ohangwena, Okavango, Omaheke, Omusati, Oshikoto, Otjozondjupa), Botswana (Central, Gaborone, Kgatleng,

North-East, North-West), Swaziland and South Africa (Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga), NSL–1775 m.

Sources: Mertens, 1955, 1971, FitzSimons, 1974, Broadley & Cock, 1975, Largen, 1978, Broadley, 1983, Pienaar et al., 1983, Auerbach, 1987, Largen & Rasmussen, 1993, Branch, 1998, 2001, M. Griffin, 2003, J.C. Murphy & Schlager, 2003 and Broadley & Blaylock, 2013.

Remarks: Original description reprinted in Bianconi (1850: 183–184, pl. 6, figs. 2, 2a–d & 1850–1870: 13–14, pl. 3, figs. 2, 2a–d.).

MEHELYA Csiki, 1903 (*nomen substitutum*) (Lamprophiidae)

Synonyms: *Heterolepis* A. Smith, 1847 *in* 1838–1849 *(nomen praeoccupatum), Simocephalus* Gray *in* A.C.L.G. Günther, 1858 (*nomen oblitum*), *Grobbenia* Poche, 1903 *(nomen praeoccupatum), Siebenrockia* Poche, 1904 *(nomen substitutum), Simocaphalus* – F.W. FitzSimons, 1912 *(nomen incorrectum), Symocephalus* – Calabresi, 1927 *(nomen incorrectum), Mehelia* – Scortecci, 1929 *(nomen incorrectum), Mehelys* – Laurent, 1956b *(nomen incorrectum), Mehely* – Stucki-Stirn, 1979 *(nomen incorrectum),* and *Mehylya* – W.W. Tanner & Avery, 1982 *(nomen incorrectum).*

Type species: *Heterolepis capensis* A. Smith, 1847 *in* 1838–1849.

Distribution: Subsaharan Africa.

Sources: Mocquard, 1887a, Boulenger, 1891d, 1893a, Csiki, 1904, Sternfeld, 1908b, Angel, 1933b, Loveridge, 1939, 1957a, McDowell, 1961, 1986, Doucet, 1963, Dunger, 1971a, Villiers, 1975, Kelly et al., 2003, Villiers & Condamin, 2005 and Vidal et al., 2008.

Remarks: A valid genus *fide* Zaher et al., 2012. In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Mehelya* Csiki is designated a *nomen protectum* and *Simocephalus* Gray a *nomen oblitum*.

1. *Mehelya capensis* (A. Smith, 1847 *in* 1838–1849). Illust. Zool. So. Africa, Rept.: pl. 55, 2 pp. (*Heterolepis capensis*)

Synonyms: *Heterolepis gueinzii* W.C.H. Peters, 1874b, and *Mehelya grayi* Petzold, 1975.

Type: Neotype, BMNH 1891.9.15.9 (formerly SAM), a male [head and anterior extremity of body and tail], designated by Lanza & Broadley, 1913.

Type locality: "Delagoa Bay" [= Maputo Bay, Maputo Prov., S Mozambique, ca. 26°S, 32.5°E, elevation NSL] via neotype selection.

Distribution: Eastern Africa. Southeastern Democratic Republic of the Congo (Katanga), E Angola (Cabinda, Cuando Cubango, Huambo, Moxica, Namibe), E Tanzania (Dar es Salaam, Lindi, Ruvuma, Tanga, Zanzabar Is.), SE Kenya (Coast, Eastern), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), Mozambique (Gaza, Inhambane, Manica, Maputo, Sofala), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Matabeleland North, Matebeleland South, Midlands), E Botswana (Gaborone, Kgatleng, Kweneng, North West), Swaziland and E South Africa (Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga), NSL–1000 m.

Sources: Witte, 1953, 1962, 1966, 1975, Laurent, 1956a, 1960, Vesey-FitzGerald, 1958, Sweeney, 1961, Pitman, 1974, Derleyn, 1978b, Spawls, 1978, Haacke, 1981, Trape, 1981, Hoevers & Johnson, 1982, Broadley, 1983, Derleyn et al., 1983, Lanza, 1983a, Pienaar et al., 1983, Auerbach, 1987, Patterson, 1987, Branch, 1988, Joger, 1990, Branch & McCartney, 1993, Largen & Rasmussen, 1993, Shine et al., 1996, Spawls et al., 2002, Broadley et al., 2003, J.C. Murphy & Schlager, 2003, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Chirio, 2009, Broadley & Blaylock, 2013 and Lanza & Broadley, 2013.

Remarks: Holotype lost *fide* V.F.M. FitzSimons (1937: 262). Records from Cameroon (Chirio & LeBreton, 2007), and Centrale African Republic and Gabon (Chippaux, 2006) need confirmation.

2. *Mehelya chanleri* (Stejneger, 1894b). Proc. U.S. Natl. Mus. (1893) 16(970): 726–727. (*Simocephalus chanleri*)

Synonyms: *Simocephalus unicolor* Boulenger, 1910b, *Mehelya somaliensis* Lönnberg & Andersson, 1913b, and *Mehelia fiechteri* Scortecci, 1929.

Type: Holotype, USNM 20126, a mm specimen (G. Denhardt via. W.A. Chanler, 1892).

Type locality: "Wange, Island Manda, north of Lamu, East Africa," (partly in error). Corrected to Wange (not Manda Is.), Kenya [= Wange, Lamu Prov., E Kenya, 1°30'S, 40°37'E, elevation 60 m] *fide* Lanza & Broadley, 1913.

Distribution: East Africa. Eastern Democratic Republic of the Congo (Sud-Kivu), Rwanda (Biuma, Butare, Byumba, Eastern, Northern), Burundi (Bubanza, Bujumbura, Bururi, Ruyigi), NW Tanzania (Arusha, Kigoma, Rukwa, Tanga), ext. SW Uganda (S Western), Kenya (Central, Coast, Eastern, Lamu and Manda Is.) Somalia (Hiraan, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Shabeellaha Hoose, Woqooyi Galbeed, Alessandra Is.), E Ethiopia (Hararge) and Eritrea, NSL–2200 m.

Sources: Scortecci, 1929, Loverdige, 1939, Lanza, 1983a, 1990b, Broadley & Howell, 1991, Largen, 1997 and Lanza & Broadley, 2013.

Remarks: A valid species *fide* Largen & Spawls, 2010 and Lanza & Broadley, 2013.

3. *Mehelya crossii* (Boulenger, 1895c). Ann. Mag. Nat. Hist. (6) 16(91): 33. (*Simocephalus crossii*)

Synonym: *Simocephalus riggenbachi* Sternfeld, 1910b.
Type: Holotype, BMNH 1946.1.14.49, a 410 mm female (W.H. Crosse, 1890–1895).
Type locality: "near Asaba, about 150 miles up the Niger" [= vicinity of Asaba, Niger River, SE Bendel State, Nigeria].
Distribution: West Africa. Senegal (Dakar, Ziguinchor/Kolda), Guinea, S Mali (Kayes, Koulikoro, Ségou, Sikasso), Ivory Coast, W Burkina Faso (Centre, Est, Hauts-Bassins, Sud-Ouest, Volta-Noire), Ghana (Eastern), Togo (Centrale, Kara, Maritime, Plateaux, Savanes), Benin (Alibori, Atakora, Zou), S Chad, SW Niger (Dosso), Nigeria (Anambra, Bendel, Benue, Borno, Cross River, Delta, Imo, Kaduna, Lagos, Plateau, Rivers), N Cameroon (Extreme-Nord, Nord), and S Central African Republic (Ombella-Mpoko, Haut-Mbomou, Haut-Sangha), 220–1175 m.
Sources: Doucet, 1963, Villiers, 1963, 1975, Leston & Hughes, 1968, Hughes & Barry, 1969, Papenfuss, 1969, Roman, 1969, 1980, Hulsemans & Verheyen, 1970, Dunger, 1971a, Courtois & Chippaux, 1977, Roman, 1980, Hughes, 1983, 2013, J.A. Butler & Reid, 1986, Joger, 1990, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & Ineich, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, Chirio, 2009 and Segniagbeto et al., 2011.

4. *Mehelya egbensis* Dunger, 1966. Amer. Mus. Novit. (2268): 2–7, figs. 1–4.

Type: Holotype, AMNH 96100, a 235 mm male (D. Warren, Oct. 1964).
Type locality: "Egbe, Nigeria (latitude 8°14'N., longitude 5°31'E.)" [= Egbe, W Kogi State, SW Nigeria, 8°13'N, 5°31'W, 350 m].
Distribution: Southwestern Nigeria (Oyo, Kogi), 350 m.
Sources: Dunger, 1971a and Chippaux, 2006.

5. *Mehelya gabouensis* (J.-F. Trape & Mané, 2005). Bull. Soc. Herp. France (115): 24–30, figs. 1–2.

Type: Holotype, MNHN 2004.493 (formerly IRD S-3425), a 364–370 mm male (native, Nov. 1998).
Type locality: "Haute-Casamance (lieu de provenance exact incertain, probablement environs de Vélingara, 13°09'N-14°06'W), Sénégal" [= vicinity of Vélingara (13°09'N, 14°06'W, elevation 50 m), E Kolda Prov., SE Senegal].
Distribution: Southeastern Senegal (Kolda), 30–50 m.
Source: Trape & Mané, 2006b.
Remarks: Color photographs of holotype in J.-F. Trape & Mané (2006: 131).

6. *Mehelya guirali* (Mocquard, 1887a). Bull. Soc. Philom. Paris (1886–1887) (7) 11(1): 23–27, pl. 2, figs. 3, 3a–3c. (*Heterolepis guirali*)

Synonym: *Simocephalus baumanni* Sternfeld, 1908a.
Types: Syntypes (2), MNHN 1885.580, an 1130 mm (svl) specimen (A. Lanchier, Dec. 1880–March 1883) [Niger] and MNHN, a 1060 mm specimen (L. Guiral, Dec. 1880–March 1883) [San-Benito].
Type locality: "Niger" and "San-Benito, l'Ouest africain" [= Niger and Rio de São Benito or Mbini, Gabon].
Distribution: West Africa. Southeastern Guinea (Macenta, Nzérékoré), Sierra Leone (Eastern, Southern), S Liberia (Nimba), S Ivory Coast (Abidjan, Lagunes), S Togo (Plateaux), Benin (Cotonou, Zou), S Nigeria (Cross River, Delta, Lagos, Ogun, Rivers), SW Chad (Chari-Baguirmi), SW Cameroon (Littoral, Nord-Ouest, Sud, Sud-Ouest), Gabon (Moyen-Ogooué, Ogooué-Maritime), W Gabon (Moyen-Ogooué, Ogooué-Maritime), S Congo (Kouilou, Pool) and W Democratic Republic of the Congo (Bandundu), NSL–1200 m.
Sources: Villiers, 1956b, 1975, Doucet, 1963, Menzies, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, Roux-Estève, 1969a, Dunger, 1971a, Hughes, 1983, 2013, J.A. Butler & Reid, 1986, J.B. Rasmussen, 1991, D. Lawson, 1993, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008, W. Böhme et al., 2011 and Segniagbeto et al., 2011.
Remarks: Figure 3 in original plate 2 mislabelled as Fig. 1. Type locality may be Benito Point, Bendel State, S Nigeria, 5°26'N, 5°25'E.

7. *Mehelya laurenti* Witte, 1959. Rev. Zool. Bot. Afr. 60 (3–4): 348–349.

Type: Holotype, MRAC 21033, a 465 mm male (R.P. Lootens, 1957).
Type locality: "d'Ikela (Territ. d'Ikela), Congo belge" [= Ikela, SE Equateur Region, NW Democratic Republic of the Congo, 00°37'S, 20°01'E, elevation 350 m].
Distribution: Central Democratic Republic of the Congo (SE Equateur), 350 m. Known only from holotype.
Remarks: Possible synonym of *M. stenophthalmus* (Mocquard) *fide* Thys van den Audenaerde (1965: 373).

8. *Mehelya nyassae* (A.C.L.G. Günther, 1888c). Ann. Mag. Nat. Hist. (6) 1(3): 328. (*Simocephalus nyassae*)

Synonym: *Gonionotophis degrijsi* F. Werner, 1906.
Type: Holotype, BMNH 1946.1.14.52, a 432 mm specimen.
Type locality: "Lake Nyassa, Tropical Africa" [= Lake Malawi, E Malawi, SW Tanzania or NW Mozambique].
Distribution: Eastern Africa. Southern Somalia (Jubbada Dhexe), E Kenya (Coast, North-Eastern), E Tanzania (Lindi, Mtwara, Ruvuma, Tanga, Zanzibar Is.), Rwanda, Burundi, SE Democratic Republic of the Congo (Katanga, Sud-Kivu), Zambia (Central, Copperbelt,

Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), Mozambique (Inhambane, Maputa, Nampula), Zimbabwe (Manicaland, Mashonaland Central, Mashonaland West, Masvingo, Matebeleland North), Botswana (Central, Gaborone, Kgalagadi, North West), N Namibia (Caprivi, Khomas), NE Swaziland and E South Africa (Gauteng, E KwaZulu-Natal, Limpopo, Mpumalanga), NSL–1200 m.

Sources: Loveridge, 1936b, 1955b, 1957a, Witte, 1953, Sweeney, 1961, Broadley, 1971d, 1983, Spawls, 1978, Haacke, 1981, Lanza, 1983a, 1990b, Pienaar et al., 1983, Auerbach, 1987, Branch, 1988, Shine et al., 1996, Spawls et al., 2002, Broadley et al., 2003, Marais, 2004, Broadley & Blaylock, 2013 and Lanza & Broadley, 2013.

9. *Mehelya poensis* (A. Smith, 1847 *in* 1838–1849). Illust. Zool. So. Africa, Rept.: p. 2 of text to pl. 55. (*Heterolepis poensis*)

Synonyms: *Heterolepis bicarinatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a and ? *Heterolepis mabilli* Rochebrune, 1886.

Type: Holotype, BMNH 1946.1.14.20, a 1041 mm specimen (T. Vogel & J. Ansell [Niger Exped.], 1841–1842).

Type locality: "Bioko" [= Bioko Is., Equatorial Guinea, 3°13–3°48'N, 8°25–8°58'E].

Distribution: West and cen. Africa. Guinea-Bissau, SE Guinea (Macenta, Nzérékoré), Sierra Leone (Northern, Southern), Liberia (Montserrado, Margibi, Nimba), S Ivory Coast (Abengourou, Abidjan, Agnebi, Daloa, Guiglo, Lagunes, Moyen-Comoe, Tabou), S Ghana (Eastern), S Togo (Plateaux), Benin (Cotonou), S Nigeria (Benue, Cross River, Lagos, Oyo, Rivers), S Cameroon (Centre, Est, Littoral, Nord-Ouest, Ouest, Sud, Sud-Ouest), Equatorial Guinea (Bioko Is.), Gabon (Estuaire, Ogooué-Ivindo, Ogooué-Maritime), S Central African Republic (Haute-Sangha, Lobaye, Mbomou, Ombella-Mpoko, Sangha), Congo (Brazzaville, Kouilou, Plateau, Pool), N Angola (Cabinda, Cuanza Norte, Lunda), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Orientale, Sud-Kivu), SW South Sudan (Western Equatoria), S Uganda (Central, Eastern, Western), N Rwanda and Burundi (Bujumbura), NSL–2195 m.

Trape & Roux-Estève, 1995, Spawls et al., 2002, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008, Segniagbeto et al., 2011 and Auliya et al., 2012.

10. *Mehelya savorgnani* (Mocquard, 1887a). Bull. Soc. Philom. Paris (1886–1887) (7) 11(1): 27–31, pl. 2, figs. 4, 4a–b. (*Heterolepis savorgnani*)

Synonyms: *Simocephalus phyllopholis* F. Werner, 1901d, *Simocephalus butleri* Boulenger, 1907c, and *Mehelya lamani* Lönnberg, 1910.

Type: Holotype, MNHN 1886.227, a 1130 mm specimen (P.P.F.C. Savorgnan de Brazza [Brazza Mission Scientifique du Congo], Dec. 1879–June 1882).

Type locality: "Ogôoué, l'Ouest africain" [= vicinity of Ogooué River, Ogooué-Maritime, Moyen-Ogooué, Ogooué-Ivindo, Ogooué-Lolo or Haut-Ogooué Prov., W, cen. or E Gabon].

Distribution: Central Africa. Southern Cameroon (Adamaoua, Centre, Est, Nord-Ouest, Sud, Sud-Ouest), Central African Republic (Bamingui-Bangoran, Basse-Kotto, Kemo-Gribingui, Lobaye, Mbomou, Ombella-Mpoko, Ouaka, Ouham), Gabon (Haut-Ogooué, Moyen-Ogooué), Congo (Brazzaville, Kouilou, Pool, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), N Angola, S Sudan (Al-Qadariff), South Sudan (Bahr Al Ghazal, Eastern Equatoria), W Ethiopia (Ilubabar), Uganda (Central, Eastern, W Northern, Western) and SW Kenya (Nyanza, S Rift Valley, Western), NSL–1530 m.

Sources: J.-F. Trape & Roux-Estève, 1995, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Pauwels & Van de Weghe, 2008 and Lanza & Broadley, 2013.

Remarks: Figure 4 in original plate 2 mislabelled as fig. 2. A valid species *fide* Chirio & LeBreton (2007: 484), Largen & Spawls (2010: 486) and Broadly *(in litt.)*.

11. *Mehelya stenophthalmus* (Mocquard, 1887a). Bull. Soc. Philom. Paris (1886–1887) (7) 11(1): 16–19, pl. 1, figs. 1, 1a–b. (*Heterolepis stenophthalmus*)

Synonym: *Gonionotophis microps* Boulenger, 1911b.

Types: Syntypes (3), MNHN 1885.615–1b (M.A. Chaper, 1882–1884) [Assinie] and MNHN 1885.715 (Boisguilleaume) [Lopez], longest syntype 700 mm.

Type locality: "Assinie, l'Ouest africain" [= Assini, Aboisso Dept., ext. SE Ghana, 5°07'N, 3°17'W] and "cap Lopez, l'Ouest africain" [= Cape Lopez, N Ogooué-Maritime Prov., W Gabon, 0°38'S, 8°42'E, elevation NSL].

Distribution: West and cen. Africa. Guinea–Bissau, SE Guinea (Macenta, Nzérékoré), Ivory Coast, Ghana (Western), S Togo (Centrale, Plateaux), S Benin (Atlantique), Nigeria (Lagos, Oyo), Cameroon (Centre, Est, Littoral, Nord-Ouest, Sud, Sud-Ouest), Gabon (Ogooué-Ivindo, Ogooué-Maritime), S Central African Republic (Bamingui-Bangoran, Haute-Sangha,

Haut-Kotto, Kemo-Gribingui, Lobaye, Mbomou, Ombella-Mpoko, Ouham), S Congo (Brazzaville, Cuvette, Pool, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Katanga, Kinshasa, Sud-Kivu) and SW Uganda (Western), NSL–2600 m.

Sources: Villiers, 1954a, Laurent, 1956a, Roux-Estève, 1965, Knoepffler, 1966, Dunger, 1971a, Pitman, 1974, Witte, 1975, Courtois & Chippaux, 1977, D. Lawson, 1993, J.-F. Trape & Roux-Estève, 1995, Spawls et al., 2002, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008, Segniagbeto et al., 2011 and Hughes, 2013.

12. *Mehelya vernayi* Bogert, 1940. Bull. Amer. Mus. Nat. Hist. 77(1): 28–30, figs. 1a–e, 2.

Type: Holotype, AMNH 51795, a 1035 mm female (A.S. Vernay, H. Lang & R. Boulton, 13–19 May 1925).

Type locality: "Hanha, Angola" [= Hanha do Norte, Benguela Distr., Angola, 12°16'S, 13°42'E, elevation 35 m].

Distribution: Southwestern Angola (Benguela) and NW Namibia (Erongo, Kunene, Oshikoto, Otjozondjupa), 35–100 m.

Sources: Mertens, 1955, 1971, Elzen, 1980, Haacke, 1981, Broadley, 1983 and Branch, 1988.

MEIZODON J.G. Fischer, 1856b (Colubridae)

Synonym: *Mizodon* W.C.H. Peters, 1861a *(nomen emendatum).*

Type species: *Meizodon regularis* J.G. Fischer, 1856b.

Distribution: Subsaharan Africa.

Sources: Loveridge, 1957a, Roux-Estève, 1969b, Schätti, 1985a and Spawls et al., 2002.

1. *Meizodon coronatus* (Schlegel, 1837). Essai Phys. Serp. 1: 133–134, 2: 46–47. (*Calamaria coronata*)

Synonyms: *Coryphodon margaritiferus* A.C.L.G. Günther, 1858 and *Coronella bitorquata* A.C.L.G. Günther, 1860h.

Type: Lectotype, RMNH 90, a 186 mm female (D.F. Eschricht, 1830–1837), designated by Hughes & Barry (1969: 1018).

Type locality: "Gold Coast" [= presumably Ghana *fide* Hughes & Barry, 1969: 1018] via lectotype selection.

Distribution: West Africa. Southern Senegal (Dakar, Fatick, Kaolack, Kédougou, Tambacounda), Guinea (Dalaba, Koundara, Kouroussa, Macenta, Nzérékoré, Télimélé), SW Mali (Kayes, Koulikoro, Mopti, Sikasso), Sierra Leone, Liberia, Ivory Coast (Bouaké, Toumodi), S Burkina Faso (Centre, Centre-Ouest, Est, Hauts-Bassins, Sud-Ouest, Volta-Noire), Ghana, Togo (Plateaux), N Benin (Atakora, Borgou), S Nigeria (Akwa Ibom, Anambra, Cross River, Edo, Rivers), SW Chad (Mayo-Kebbi), SW Niger (Dosso), Cameroon (Adamaoua, Centre, Nord, Nord-Ouest, Ouest) and Central African Republic (Bamingui-Bangoran, Haut-Mbomou) and N Democratic Republic of the Congo (Equateur, Hait-Zaire), NSL–1300 m.

Sources: A.C.L.G. Günther, 1861a, Witte, 1962, Doucet, 1963, Roman, 1980, J.A. Butler & Reid, 1986, Joger, 1990, Luiselli et al., 2001, J.-F. Trape & Mané, 2004, Chippaux, 2006, Chirio & Ineich, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, W. Böhme et al., 2011, Segniagbeto et al., 2011, Chirio, 2013 and Hughes, 2013.

2. *Meizodon krameri* Schätti, 1985a. Monit. Zool. Ital. (2) 20(8): 155–157, figs. 2a–b.

Type: Holotype, MCZ 40323, a 494–497 mm female (A. Loveridge, 5 June 1934).

Type locality: "Kau, Tana River, Kenya" [= Tana River delta, E Coast Prov., SE Kenya, 2°29'S, 40°28'E].

Distribution: Extreme SE Kenya (Coast). Known only from type locality.

3. *Meizodon plumbiceps* (Boettger, 1893b). Zool. Anz. 16(416): 117–118. (*Coronella plumbiceps*)

Synonyms: *Coronella somalica* Scortecci, 1932 and *Meizodon loveridgei* Bogert, 1940.

Type: Holotype, SMF 62453 (formerly ZMUZ), a 576 mm male (C. Keller [Ruspoli Exped.], 1892).

Type locality: "Ogadeen, Somaliland" [= Ogaden, Somali Prov., E Ethiopia, 6°58'N, 44°02'E, elevation 790 m].

Distribution: Northeast Africa. Eastern Ethiopia (Bale, Hararge, Sidamo), S Somalia (Bay, Jubbada Dhexe, Jubbada Hoose, Shabeellaha Dhexe, Shabeellaha Hoose) and ext. NE Kenya (N North-Eastern), 20–1500 m.

Sources: Hoevers & Johnson, 1982, Lanza, 1983a, 1990b, Largen & Rasmussen, 1993 and Largen & Spawls, 2010.

Remarks: Yemen record (Scortecci, 1932) erroneous, originating from Somalia *fide* Schätti (1985a: 165).

4. *Meizodon regularis* J.G. Fischer, 1856b. Abh. Ges. Naturwiss. Verh. Hamburg 3: 112–114, pl. 3, figs. 3a–c.

Synonyms: *Coronella elegans* Jan, 1863a, *Coronella regularis praeornata* Angel, 1933b, and *Meizodon coronata camerunensis* Monard, 1951.

Type: Holotype, ZMH 2638 (formerly ZMH 77), a 706 mm male (L. Wolf, Nov. 1847–Jan. 1851).

Type locality: "Peki" [= Peki, S Volta Region, SE Ghana, 6°32'N, 0°15'E, elevation 400 m].

Distribution: West and cen. Africa. Guinea (Beyla, Dalaba, Dubréka, Kérouané, Labé, Macenta,

Nzérékoré), Liberia (Nimba), Ivory Coast (Bouaké, Toumodi), Ghana, Togo (Kara, Plateaux), S Benin (Atlantique), Benin, S Chad (Moyen-Chari), cen. Cameroon (Adamaoua, Centre, Est, Nord, Nord-Ouest, Ouest), Central African Republic (Bamingui-Bangoran, Ouaka, Ouham, Ouham-Pende), Democratic Republic of the Congo (Orientale), S Sudan, SE South Sudan (Eastern Equatoria), Ethiopia (Gojjam, Gondar, Hararge, Illubabor), N Uganda, (N Eastern, Northern Western) and SW Kenya (Nyanza), 150–2000 m.

Sources: A.C.L.G. Günther, 1861a, Pitman, 1974, Largen & Rasmussen, 1993, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Largen & Spawls, 2010, Ullenburch et al., 2010, Segniagbeto et al., 2011 and Hughes, 2013.

5. *Meizodon semiornatus* (W.C.H. Peters, 1854). Mber. Königl. Akad. Wiss. Berlin 1854(11): 622. (*Coronella semiornata*)

Synonyms: *Zamenis fischeri* W.C.H. Peters, 1879, *Coronella inornata* Fischer, 1884a, *Coronella scheffleri* Sternfeld, 1908a, *Zamenis citernii* Boulenger, 1912a, *Zamenis tchadensis* Chabanaud, 1918a, and *Coronella semiornata mossambicae* Cott, 1935.

Types: Syntypes (3), ZMB 4804 and ZMB 4805a–b, a 530 mm, 440 mm and 260 mm specimen (W.C.H. Peters, Dec. 1844–Sept. 1845).

Type locality: "Tette" [= Tete, Tete Prov., W Mozambique, 16°10'S, 33°36'E, elevation 125 m].

Distribution: North and E Africa. Southwestern Chad (Chari-Baguirmi), N Cameroon (Extreme-Nord), SE Sudan (Al Jazirah, Nahr An Nil), SE South Sudan (Eastern Equatoria), ext. S Ethiopia (SW Bale, Sidamo), S Somalia (Gedo, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Shabeellaha Hoose), Kenya (Coast, Eastern, Nairobi, Rift Valley), E Tanzania (Arusha, Dar es Salaam, Lindi, Mtwara, Mwanza, Rukwa, Ruvuma, Singida, Tanga), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), S Malawi (Southern), S Mozambique (Gaza, Maputo, Sofala, Tete), Zimbabwe (Mashonaland Central, Mashonaland West, Masvingo, Matabeleland North, Midlands), ext. N Botswana (N North West), E Swaziland and ext. NE South Africa (ext. N KwaZulu-Natal), NSL–2200 m.

Sources: Broadley, 1971d, 1983, Pitman, 1974, Broadley & Cock, 1975, Lanza, 1983a, 1990b, Auerbach, 1987, Branch, 1988, Gasperetti, 1988, Largen & Rasmussen, 1993, Spawls et al., 2002, Broadley et al., 2003, Chippaux, 2006, Chirio & LeBreton, 2007, Largen & Spawls, 2010 and Broadley & Blaylock, 2013.

Remarks: Original description reprinted in W.C.H. Peters (1855: 51–52). Possibly occurs in Namibia *fide M.* Griffin (2003: 129).

M

MELANOPHIDIUM A.C.L.G. Günther, 1864a (Uropeltidae)

Synonyms: *Mellanophidium* – Higgins, 1873 *(nomen incorrectum), Melanophium* – Cardew, 1897 *(nomen incorrectum),* and *Melanophidim* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type species: *Plectrurus wynaudensis* Beddome, 1863a.

Distribution: Southern India.

Sources: M.A. Smith, 1943, Gans, 1966, Murthy, 1973, 1981c, 1982b, McDiarmid et al., 1999 and Gower et al., 2005.

1. *Melanophidium bilineatum* Beddome, 1870. Madras Month. J. Med. Sci. (2) 2: 169.

Types: Syntypes (2), BMNH 1946.1.15.75 (formerly BMNH 1872.1.2.5) and MNHN 1895.111, longest syntype 370 mm (R.H. Beddome, 1857–1882).

Type locality: "near the summit of the Peria peak in the Wynaad, elevation 5,000 feet, and also at a similar elevation on the Tirrhioot peak, Madras Presidency." Emended to west of Manantoddy [= NE Kerala State, SW India, 11°48'N, 76°01'E, elevation 1525 m] *fide* M.A. Smith (1943: 67).

Distribution: Southwestern India (Western Ghats of W Karnataka, NE Kerala), 1200–1525 m.

Source: A.C.L.G. Günther, 1875.

2. *Melanophidium punctatum* Beddome, 1871. Madras Month. J. Med. Sci. (2) 4: 401–402.

Types: Syntypes (4), BMNH 1946.1.4.73 (formerly BMNH 1872.1.2.6), BMNH 1946.1.15.48–49 (formerly BMNH 1874.4.29.121–22), and MNHN 1895.116, longest syntype 457 mm (R.H. Beddome, 1857–1882).

Type locality: "Travancore... in the Muti-kuli vayal, a little valley on the Asamboo Distribution (4,500 feet elevation)" and "Peermede, Madras Presidency" [= Ashambu Hills, elevation 1370 m, and Azhutha, elevation 915 m, Kerala State, SW India].

Distribution: Southwestern India (Western Ghats of Goa, W Karnataka, E Kerala, W Maharashtra, SW Tamil Nadu), 1200–1500 m.

Sources: A.C.L.G. Günther, 1875, Wall, 1923i, Rajendran, 1985, Ghate & Yazdani, 1991, Whitaker & Captain, 2004 and N. Khaire, 2006.

Remarks: Beddome mentioned only 3 specimens but Gans (1966a: 10) listed the MNHN specimen as a type. Possible lectotype designated by Welch (1988: 16) by restriction (? inadvertently) of type locality to Muti-Kuli Vayal.

3. *Melanophidium wynaudense* (Beddome, 1863a). Madras Month. J. Med. Sci. 6: 48, pl. 2, fig. 9. (*Plectrurus wynaudensis*)

Synonyms: *Melanophidium wynandense* A.C.L.G. Günther, 1863 *(nomen emendatum), Plectrurus wynadensis* Beddome, 1867 *(nomen emendatum), Melanophidium wynaadense* Theobald, 1876 *(nomen emendatum), Plectrurus wynaadensis* Theobald, 1876 *(nomen emendatum),* and *Melanophidium wynadense* Boulenger, 1893a *(nomen emendatum).*

Types: Syntypes (4), BMNH 1946.1.15.46 (formerly BMNH 1864.29.84), BMNH 1946.1.15.74 (formerly BMNH 1864.3.9.6), and MNHN 1895.108–09 (R.H. Beddome, 1857–1882).

Type locality: "Cherambady in the Wynaud, Madras Presidency." Emended to Wynand, elevation 3500 feet, Southern India [= Cherambadi, N Kerala State, SW India, 11°32'N, 76°17'E, elevation 1065 m] *fide* Beddome (1863b: 228), M.A. Smith (1943: 67) and Constable (1949: 115).

Distribution: Southwestern India (Western Ghats of W Karnataka, NE Kerala, NW Tamil Nadu), 585–2120 m.

Sources: Wall, 1923i and Ganesh et al., 2012b.

Remarks: Original description reprinted in Beddome (1863b: 228). Discussion of specific epithet in McDiarmid et al. (1999: 131).

†*MENARANA* LaDuke, Krause, Scanlon & Kley, 2010 (†Madtsoiidae)

Type species: †*Menarana nosymena* LaDuke, Krause, Scanlon & Kley, 2010.

Distribution: Upper Cretaceous of Madagascar and Spain.

Sources: Rage, 1996, 1999 and LaDuke et al., 2010.

1. †*Menarana laurasiae* (Rage, 1996). C.R. Acad. Sci. Paris (2) 322: 605–606, fig. 1. (†*Madtsoia laurasiae*)

Type: Holotype, MCNA 5337, one middle trunk vertebra.

Type locality: "Crétacé supérieur de Laño (Pays Basque espagnol)" [= upper Cretaceous of Laño, Condado de Treviño Prov., Basque Country, N Spain, 42°40'N, 2°37'W]. Clarified as a sand quarry near the village of Laño, about 20 km SE of the city of Vitoria, Basque Country, Spain; Upper Cretaceous (Early Maastrichian) *fide* Astibia et al. (1990: 462).

Distribution: Upper Cretaceous (Maastrichian: 65.5–72.1 mya) of Spain. Known only from type locality.

Source: Rage, 1999.

2. †*Menarana nosymena* LaDuke, Krause, Scanlon & Kley, 2010. J. Vert. Paleont. 30(1): 119–125, figs. 5–9.

Type: Holotype, UA 9684.1–6, numerous vertebrae, fragmentary ribs and a partial braincase (Mahajanga Basin Project field crew, 1993–2007).

Type locality: "MAD93–14, Berivotra Study Area, Mahajanga Basin, northwestern Madagascar; Upper Cretaceous (Maastrichtian) Maevarano Formation."

Distribution: Upper Cretaceous (Maastrichtian: 65.5–72.1 mya) of Madagascar.

†*MESSELOPHIS* Baszio, 2004 (Tropidophiidae)

Type species: †*Messelophis variatus* Baszio, 2004.

Distribution: Middle Eocene of Germany.

Sources: Szyndlar et al., 2008 and Rage, 2011.

Remarks: An "enigmatic booid" *fide* Rage (2011: 41).

1. †*Messelophis ermannorum* Schaal & Baszio, 2004. Cour. Forsch.-Inst. Senck. (252): 68–74, figs. 1a–d.

Type: Holotype, SMF ME 1812, one trunk vertebra.

Type locality: "UNESCO Weltnaturerbe Fossilienfundstätte Grube Messel bei Darmstadt, Hessen, Deutschland; Mittlere Messel-Formation (Ölschiefer), Mittel-Eozän, Unteres Lutetium, MP 11, Fossilienfundstätte Grube Messel."

Distribution: Middle Eocene (Lutetian, MP 11: 48.6 mya) of Germany.

2. †*Messelophis variatus* Baszio, 2004. Cour. Forsch.-Inst. Senck. (252): 49–60, figs. 1, 3, 5–6, 8–9.

Type: Holotype, SMF ME 1828, one nearly complete articulated skeleton and four isolated vertebrae from same specimen.

Type locality: "World Natural Heritage Messel Pit Fossil Site near Darmstadt; Middle Eocene (MP 10/11), Messel formation."

Distribution: Lower-middle Eocene (Lutetian, MP 10–11: 48.6–55.8 mya) of Germany.

†*MICHAUXOPHIS* Bailon, 1988 (Aniliidae)

Type species: †*Michauxophis occitanus* Bailon, 1988.

Distribution: Upper Pliocene of France.

Sources: Bailon, 1988, 1989 and Gómez et al., 2008.

1. †*Michauxophis occitanus* Bailon, 1988. C.R. Acad. Sci. Paris (2) 306: 1256–1258, figs. a–e.

Type: Holotype, USTL BAC II 911, one trunk vertebra.

Type locality: "Balaruc II, Hérault, France, Pliocène supérieur (Villanyien), zone 16."

Distribution: Upper Pliocene (Villanyian, MN 16: 2.6–3.2 mya) of France. Known only from type locality.

MICRELAPS Boettger, 1880b (Atractaspididae)

Synonyms: *Elaposchema* Mocquard, 1888 and *Miculaps* – Briceño-Rossi, 1934 *(nomen incorrectum).*
Type species: *Micrelaps muelleri* Boettger, 1880b.
Distribution: East Africa and ext. SW Asia.
Sources: Witte & Laurent, 1947, Pitman, 1974, Underwood & Kochva, 1993, Vidal et al., 2008, Kelly et al., 2009 and Zaher et al., 2009.
Remarks: Vidal et al., 2008, studies do not support allocation to the Atractaspidinae (or Atractaspididae) *contra* Kelly et al., 2009 and Zaher et al., 2009.

1. *Micrelaps bicoloratus* Sternfeld, 1908a. Sitz. Ges. Natur. Freunde Berlin 1908(4): 93.

Synonym: *Micrelaps bicoloratus moyeri* J.B. Rasmussen, 2002.
Type: Holotype, ZMB 20725, a 240 mm female (G. Scheffler, 1906–1908).
Type locality: "Kibwezi (Brit. Ostafrika)" [= Kibwezi, S Eastern Prov., S Kenya, 2°25'S, 37°58'E, elevation 900 m].
Distribution: Southeastern Kenya (Central, Coast, Eastern, Nairobi, Rift Valley, Lamu Is.) and NE Tanzania (Arusha, Kilimanjaro, Manyara), NSL–2000 m.
Sources: J.B. Rasmussen, 2002 and Spawls et al., 2002.
Remarks: A valid species *fide* Spawls et al. (2002: 435).

M

2. *Micrelaps muelleri* Boettger, 1880b. Ber. Senck. Naturf. Ges. (1879–1880): 137–138, pl. 3, figs. 2a–d. (*nomen corrigendum*)

Synonyms: *Micrelaps mülleri* Boettger, 1880b *(nomen incorrigendum)* and *Micrelaps muelleri* Y.L. Werner, 1965 *(nomen corrigendum).*
Type: Lectotype, SMF 20349 (formerly SMF-B 9249, a) (H. Simon, 1879), designated by Mertens (1922: 181), longest syntype 335 mm.
Type locality: "Jerusalem" [= Jerusalem, E Jerusalem Distr., cen. Israel, 31°46'N, 35°13'E, elevation 775 m] via lectotype selection.
Distribution: Middle East. Syria (Lattakia), NW Lebanon (Liban-Nord), Israel (Central, Golan Heights, Haifa, Jerusalem, Northern, Tel Aviv, West Bank) and NW Jordan (Balqa, Irbid, Jarash), BSL–1800 m.
Sources: Lortet, 1883, G. Haas, 1951, 1952b, Battersby, 1953, Hoofien, 1972, Hraoui-Bloquet, 1981, Bischoff & Schmidtler, 1997, Bouskila & Amitai, 2001, Disi et al., 2001, Hraoui-Bloquet et al., 2002, Y.L. Werner et al., 2006, Amr & Disi, 2011 and Bar & Haimovitch, 2011.
Remarks: Boettger (1898: 111) list collection date of types as 1879–1884. Lectotype erroneously listed as SMF 4249a *fide* Y.L. Werner et al. (2006:36).

3. *Micrelaps tchernovi* Y.L. Werner, Babocsay, Carmely & Thuna, 2006. Zool. Middle East 38: 40–42, figs. 2b, 5c, 6, 9c, 10–11.

Type: Holotype, HUJ 16864, a 558 mm female (E. Tchernov, 5 July 1988).
Type locality: "Ubeidiyya Site, Jordan Valley, Israel [IG 20292328]."
Distribution: Northeastern Israel (SE Northern, NE West Bank) and W Jordan (Balqa, Irbid), 300 m BSL–80 m.
Sources: Amr & Disi, 2011 and Bar & Haimovitch, 2011.

4. *Micrelaps vaillanti* (Mocquard, 1888). Mém. Cent. Soc. Philom. Paris 1888: 123–124, pl. 12, figs. 1a–c. (*Elaposchema vaillanti*)

Synonyms: *Micrelaps boettgeri* Boulenger, 1896g, *Micrelaps nigriceps* Sternfeld, 1910c, and *Rhinocalamus meleagris* Sternfeld, 1908e.
Type: Holotype, MNHN 1884.696, a 282 mm male (G.E.J. Révoil, 1877–1888).
Type locality: "pays Çomalis" [= Somalia].
Distribution: Northeast Africa. Southeastern Sudan (An Nil Al Abyad, Janub Kurdufan), SE South Sudan (Eastern Equatoria), SE Ethiopia (Bale, Hararge, Shoa, Sidamo), Somalia (Gedo, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Togdheer, Woqooyi Galbeed), Kenya (Coast, Eastern, E Nairobi, North-Eastern, S Rift Valley), N Uganda (E Northern) and NE Tanzania (Arusha, Kilimanjaro [MCZ 20948]), NSL–1830 m.
Sources: Pitman, 1974, Spawls, 1978, Largen & Rasmussen, 1993, J.B. Rasmussen, 2002, Spawls et al., 2002 and Largen & Spawls, 2010.

MICROCEPHALOPHIS Lesson, 1832 *in* Bélanger, 1831–1834 (Elapidae)

Synonyms: *Microcephalus* Schlegel, 1837 *(nomen praeoccupatum), Liopala* Gray, 1840, *Liopola* – Gray, 1842d *(nomen incorrectum), Microcephalolepis* – Hoffmann, 1890 *(nomen incorrectum), Microicephaloides* – Barrett, 1950 *(nomen incorrectum), Michocephalophis* – Haile, 1959 *(nomen incorrectum), Microcephalopis* – Sharma, 1982 *(nomen incorrectum),* and *Michocephalaphis* – Culotta & Pickwell, 1993 *(nomen incorrectum).*
Type species: *Hydrus gracilis* G. Shaw, 1802.
Distribution: Marine waters of Indo-Australia, including Arabian Sea, Bay of Bengal, Coromandel Coast, Coral Sea, Great Barrier Reef, Gulf of Carpenteria, Gulf of Mandura, Gulf of Oman, Gulf of Papua, Gulf of Thailand, Malabar Coast, Palk Strait, Persian Gulf, Strait of Hormuz, Strait of Hainan, Strait of Malacca and Torres Strait.
Sources: Wall, 1921g, 1926b, M.A. Smith, 1926a, 1943, Bourret, 1936b, E.H. Taylor, 1950b, Klemmer, 1963,

Minton, 1966, Halstead, 1970, McDowell, 1972a, Voris, 1977, Joger, 1984, Murthy, 1985, M.A.R. Khan, 1988, David & Ineich, 1999, M.S. Khan, 2002 and Wells, 2007.

Remarks: Considered a synonym of *Hydrophis* (or as a subgenus) by Golay et al., 1993 as well as others.

1. *Microcephalophis cantoris* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 374–375, pl. 25, fig. u. (*Hydrophis cantoris*)

Synonyms: *Distira gillespiae* Boulenger, 1899d and *Microcephalophis cantori* – M.W. Lin, 1975 *(nomen incorrectum).*

Type: Holotype, BMNH 1946.1.18.30 (formerly BMNH 1860.3.19.1302), a 1067–1099 mm male (T.H. Cantor, 1834–1847, via British East India Comp.).

Type locality: "Pinang" [= Penang Is., Pinang Prov., NW Malay Peninsula, 5°22'N, 100°14'E] (possibly in error *fide* Minton, 1966: 151).

Distribution: Southern Asia. Pakastan (Sindh), E India (Andaman & Nicobars: Andaman Is., Andhra Pradesh, Gujarat, Karnataka, N Kerala, Maharashtra, Orissa, Tamil Nadu, West Bengal), Bangladesh (Chittagong, Khulna, Patuakhali), Myanmar and W West Malaysia (Pinang, Penang Is.).

Source: I. Das & Chandra, 1994.

Remarks: A.C.L.G. Günther, 1864a mentioned an adult and juvenile specimen but based description on Cantor's adult holotype.

2. *Microcephalophis gracilis* (G. Shaw, 1802). Gen. Zool., Amph. 3(2): 560–561. (*Hydrus gracilis*)

Synonyms: *Hydrophis kadell-nagam* F. Boie, 1827 *(nomen incorrigendum), Hydrus gracilus* F. Mason, 1852 *(nomen emendatum), Thalassophis microcephala* P. Schmidt, 1852, *Hydrophis leprogaster* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Hydrophis leprogaster* A.-M.-C. Duméril & Bibron *in* J.G. Fischer, 1856a, *Hydrophis guentheri* Theobald, 1868b, *Hydrophis guntherii* Murray, 1884 *(nomen emendatum), Hydrophis rostralis* M.A. Smith, 1917c, *Microcephaloides gracilis* – Barrett, 1950 *(nomen incorrectum), Distevia gracilis* – Okada, 1953 *(nomen incorrectum), Microcephalus graculis* – Saint-Girons, 1967 *(nomen incorrectum), Hydrophis spiralis spiralis* Leviton & Aldich, 1984 *(lapsus calami), Microcephalophus gracilis* – Vitt, 1987 *(nomen incorrectum), Microcephalophis gracilis microcepalophis* – Culotta & Pickwell, 1993 *(nomen incorrectum),* and *Microcephalopis gracilis* – Culotta & Pickwell, 1993 *(nomen incorrectum).*

Type: Holotype, BMNH 1946.1.17.37 (formerly BMNH III.4.1.a), a 610 mm male.

Type locality: Unknown.

Distribution: Indo-Australia. Southeastern Iraq (Al Basrah), Iran (Bushehr, Hormozghan, Khuzestan, Sistan va Baluchestan), N Oman (Muscat), Pakistan (Sindh), India (Andhra Pradesh, Gujarat, Karnataka, Maharashtra, Tamil Nadu), N Sri Lanka (N Eastern, Northern), Bangladesh, Myanmar (Mergui Arch., Tanintharyi), Thailand (Pattani, Phuket, Singgora, Songkhla), Vietnam, S China (Fujian, Guangdong, Guangxi, Hainan, Hong Kong), Macao, West Malaysia (Perak, Pinang, Selanger), Singapore, East Malaysia (Sarawak), W Indonesia (Bangka, N Java, Madura, Sumatra), S Papua New Guinea (Gulf) and N Australia (Queensland).

Lim, 1982, Whitaker et al., 1982, Cogger et al., 1983a, Tweedie, 1983, Voris & Voris, 1983, Tian et al., 1986, Dowling & Jenner, 1988, Gasperetti, 1988, Gow, 1989, K.K.P. Lim & Chou, 1990, M.J, Cox, 1991b, Stuebing, 1991, Leviton et al., 1992, V.S. Nguyen et al., 2009 and A. Silva et al., 2011.

†*MICRONATRIX* Parmley & Hunter, 2010 (Natricidae)

Type species: †*Micronatrix juliescottae* Parmley & Hunter, 2010.

Distribution: Upper Miocene of USA.

Source: Parmley & Hunter, 2010.

M

1. †*Micronatrix juliescottae* Parmley & Hunter, 2010. J. Herp. 44(4): 534–536, fig. 5.

Type: Holotype, USNM 100260, one anterior trunk vertebra.

Type locality: Pratt Slide fossil locality: University of Nebraska State Museum locality Bw123; 6.5 km north of Johnstown, Brown County, north-central Nebraska; NE1/4, SW1/4 section 30. T. 3/N, R.23W; Merrit Dam Member of the Ash Hollow Formation; Age is late Clarendonian North American Land Mammal Age (late Miocene)."

Distribution: Upper Miocene (Clarendonian: 10.3–13.6 mya) of USA (Nebraska).

MICROPECHIS Boulenger, 1896a (Elapidae)

Synonyms: *Elaposoma* Fitzinger, 1843, *Mikropechis* – Maass-Berlin, 1933 *(nomen incorrectum)* and *Microphechis* – Bulmer, Menzies & Parker, 1975 *(nomen incorrectum).*

Type species: *Coluber ikaheca* Lesson, 1829 *in* Duperrey, 1826–1832.

Distribution: New Guinea.

Sources: Loveridge, 1948, Klemmer, 1963, McDowell, 1970, 1984, Talukdar & Dattagupta, 1980, F. Parker, 1982, Golay et al., 1993, O'Shea, 1996, Greer, 1997, Keogh, 1998, David & Ineich, 1999, Sanders et al., 2008, Zaher et al., 2009 and Hoser, 2012e.

1. *Micropechis ikaheca* (Lesson, 1829 *in* Duperrey, 1826–1832). Voy. Coquille (Zool.), Atlas: pl. 5. (*Coluber ikaheca*)

Synonyms: *Naja elaps* Schlegel, 1837, *Trimeresurus ophiophagus* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(partim), Trimeresurus ikaheca* Jan, 1863b *(nomen emendatum), Coluber ikaheka* W.C.H. Peters & Doria, 1878 *(nomen emendatum),* and *Ophiophagus ikaheka fasciatus* J.G. Fischer, 1884c.

Type: Holotype, MNHN 7669, a 1422–1448 mm specimen (R.-P. Lesson & P. Garnot [Coquille Voy.], 1824).

Type locality: "Nouvelle-Guinée, dans les forêts épaisses qui bordent le havre de Doréry" [= Manokwari, NW West Papua Prov., E Indonesia, 0°52'S, 134°05'E, elevation 70 m].

Distribution: New Guinea. Eastern Indonesia (Papua, West Papua, Aru Arch., Batanta, Misool, Num, Sarera Bay Is., Yapen) and Papua New Guinea (Eastern Highlands, East Sepik, Morobe, Milne Bay, Western, Daru and Karkar Is.), NSL–1200 m.

Remarks: Supplemental original description in Lesson (1830 *in* Duperrey, 1826–1832: 54–55). Original orthography of species in plate (1829), text (1830) and index (1831) was *Coluber ikaheca*.

M

MICROPISTHODON Mocquard, 1894b (Pseudoxyrhophiidae)

Type species: *Micropisthodon ochraceus* Mocquard, 1894b.

Distribution: Madagascar.

Sources: Guibé, 1958, Domergue, 1969, Brygoo, 1983, 1987, Glaw & Vences, 1994, Nagy et al., 2003, Kelly et al., 2009 and Zaher et al., 2009.

1. *Micropisthodon ochraceus* Mocquard, 1894b. C.R. Somm. Séances Soc. Philom. Paris (17): 8.

Type: Holotype, MNHN 1886.173, a 687 mm female (H. Deyrolle).

Type locality: "Nossi-Bé, Madagascar" [= Nosy Be Is., W Antsiranana Prov., ext. NW Madagascar, bet. 13°12'–25'S and 48°10'–22'E, elevation < 225 m].

Distribution: Northeastern Madagascar (Antsiranana, Toamasina, Nosy Be Is.), 25–800 m.

MICRUROIDES K.P. Schmidt, 1928c (Elapidae)

Synonyms: *Micruvides* – Hess, 1980 *(nomen incorrectum)* and *Micruriroides* – J.D. Williams, 1983 *(nomen incorrectum).*

Type species: *Elaps euryxanthus* Kennicott, 1860.

Distribution: Southwestern USA and NW Mexico.

Sources: Ditmars, 1939, K.P. Schmidt & Davis, 1941, Bogert & Oliver, 1945, H.M. Smith & Taylor, 1945, Zweifel & Norris, 1955, Fowlie, 1965, Roze, 1967, 1974, 1983, 1996, Hoge & Romano-Hoge, 1971c, Cadle & Sarich, 1981, Cadle, 1983, McCarthy, 1985, J.A. Campbell & Lamar, 1989, 2004, Slowinski, 1991, 1995, Golay et al., 1993, Degenhardt et al., 1996, Goldberg, 1997, Keogh, 1998, David & Ineich, 1999, R.D. Bartlett & Tennant, 2000, Slowinski & Keogh, 2000, Grismer, 2002, Lemos-Espinal et al., 2004, Castoe et al., 2007, Guardado & Gatica-Colima, 2009, Zaher et al., 2009 and Ernst & Ernst, 2011.

1. *Micruroides euryxanthus* (Kennicott, 1860). Proc. Acad. Nat. Sci. Philadelphia 12(8): 337–338. (*Elaps euryxanthus*)

Synonyms: *Micruroides euryxanthus australis* Zweifel & Norris, 1955, *Micruroides euryxanthus neglectus* Roze, 1967, *Micruroides euryxanthinus* – Gans & Maderson, 1970 *(nomen incorrectum), Micruroides euryzathes* – Simonb, 1979 *(nomen incorrectum), Micruroides euroxanthus* – J.T. Henderson & Bieber, 1986 *(nomen incorrectum),* and *Micruroides euryzanthus* – Lombard, Marx & Rabb, 1986 *(nomen incorrectum).*

Type: Holotype, USNM 1122, a 441 mm male (T.H. Webb).

Type locality: "North America." Emended to Sonora, Mexico *fide* Yarrow (1882: 82).

Distribution: Extreme SW USA (S Arizona, SW New Mexico) and NW Mexico (ext. W Chihuahua, S Sinaloa, Sonora, Tiburón Is.), NSL–1800 m.

Remarks: Type locality restriction of Guaymas, Sonora, Mexico *fide* K.P. Schmidt (1953a: 222) rejected by Roze (1974: 163.3). West Texas (El Paso) record [MCZ 22645] requires confirmation *fide* Roze (1974: 163.3).

MICRURUS Wagler *in* Spix, 1824 (Elapidae)

Synonyms: *Elaps* J.G. Schneider, 1801 *(nomen suppressum), Elops* – Bleeker, 1857b *(nomen incorrectum), Elapsus* A.L. Herrera, 1899 *(nomen emendatum), Leptomicrurus* K.P. Schmidt, 1937, *Michurus* – Barrett, 1950 *(nomen incorrectum), Micruris* – Wacha & Christiansen, 1974 *(nomen incorrectum), Micurus* – J.W. Simpson, 1975 *(nomen incorrectum), Micrupus* – Federsoni, 1981 *(nomen incorrectum),*

Erythrokomophis Slowinski *in* Roze, 1994 *(nomen nudum), Monadophis* Slowinski *in* Roze, 1994 *(nomen nudum), Binghamus* Hoser, 2012f *(nomen illegitimum), Hoserelapidea* Hoser, 2012f *(nomen illegitimum),* and *Troianous* Hoser, 2012f *(nomen illegitimum).*

Type species: *Micrurus spixii* Wagler *in* Spix, 1824.

Distribution: Southeastern USA and Latin America.

Fossil records: Lower to middle Miocene of W Europe and middle Miocene to upper Pleistocene of SE USA. Fossils unassigned to species include middle Miocene (Barstovian) of USA (Nebraska) and upper Miocene (Hemphillian) of USA (Florida).

Sources: K.P. Schmidt, 1937, Klemmer, 1963, Hoge & Romano-Hoge, 1966, 1971, 1972, Roze, 1967, 1983, 1994, 1996, J.A. Peters & Orejas-Miranda, 1970, Hoge & Romano-Hoge, 1971, Cadle & Sarich, 1981, McCarthy, 1985, Sandner-Montilla, 1985, Roze & Bernal-Carlo, 1988, J.A. Campbell & Lamar, 1989, 2004, Grantsou, 1991, Slowinski, 1991, 1994, 1995, Savage & Slowinski, 1992, Scrocchi, 1992a, Golay et al., 1993, Ulber, 1995, Keogh, 1998, David & Ineich, 1999, N.J. Silva & Sites, 1999, 2001, Slowinski & Keogh, 2000, Lamar, 2003, Rage & Bailon, 2005, Castoe et al., 2007a, Zaher et al., 2009, Ivanov & Böhme, 2011, Hoser, 2012e, f and Marques et al., 2013.

Remarks: Official Generic Name no. 2144 *fide* Opinion 1201 (ICZN, 1982a). *Leptomicrurus* a valid genus *fide* J.A. Campbell & Lamar, 2004.

1. *Micrurus albicinctus* Amaral, 1925b. Comm. Lin. Telegr. Matto Grosso Amazonas (84): 26–27, pl., figs. 7–10.

Synonym: *Micrurus waehnerorum* Meise, 1938.

Type: Holotype, MNRJ 376 (formerly MNRJ 88), a 492 mm female (C.M. da Silva Rondon [Comiaaão Rondon], 1908–1914).

Type locality: “regiões central e septentrional de Matto Grosso, Brasil” [= cen. or N Mato Grosso state, cen. Brazil].

Distribution: Southeastern Colombia (Amazonas) and W Brazil (Acre, Amazonas, Mato Grosso, Rondônia), 100–250 m.

Sources: Cunha & Nascimento, 1991 and N.J. Silva, 1993.

Remarks: Probably occurs in Bolivia *fide* Campbell & Lamar (1989: 123).

2. *Micrurus alleni* K.P. Schmidt, 1936c. Field Mus. Nat. Hist. (Zool.) 20(20): 209–211, fig. 25. (*Micrurus nigrocinctus alleni*)

Synonyms: *Micrurus nigrocinctus yatesi* Dunn, 1942, *Micrurus alleni richardi* E.H. Taylor, 1951, and *Micrurus alleni vatesi* – Hoge & Romano-Hoge, 1971 *(nomen incorrectum).*

Type: Holotype, UMMZ 79794 (formerly UMMZ 307), a 1068 mm female (M.J. Allen, 13 July 1935).

Type locality: “Rio Mico, seven miles above Rama, Siquia District, Nicaragua,” (partially in error). Corrected to 16.1 km above Recero [*sic* = El Recreo, 12°10’N, 84°21’W, elevation 30 m], Río Mico, Siquía District, Atlántico Sur Dept., SE Nicaragua *fide* Kluge (1984: 65).

Distribution: Lower Central America. Eastern Honduras (Gracias a Dios), Nicaragua (Atlántico Norte, Atlántico Sur, Granada, Matagalpa, Río San Juan), Costa Rica (Alajuela, Cartago, Heredia, Limón, Puntarenas, San José) and Panama (Bocas del Toro, Chiriquí, Darién), NSL–1400 (2000) m.

Sources: E.H. Taylor, 1951, 1954, Savage & Vial, 1974, R.T. Taylor et al., 1974, N.J. Scott et al., 1983, Villa, 1984, Villa et al., 1988, McCranie, 1993b, G. Köhler, 1999b, Savage, 2002 and McCranie, 2011a.

Remarks: Cadle (2012: 234) listed type locality as 12°10’N, 84°19’W, elevation 50 m. Granada, Nicaragua record doubtful *fide* Villa (1984: 9). The allopatric Pacific population of *M. alleni* possibly a distinct species *fide* J.A. Campbell & Lamar (2004: 147–148).

3. *Micrurus altirostris* (Cope, 1860b). Proc. Acad. Nat. Sci. Philadelphia (1859) 11(12): 345. (*Elaps altirostris*)

Synonyms: *Elaps heterochilus* Mocquard, 1877b, and *Micrurus lemniscatus multicinctus* Amaral, 1944k.

Type: Holotype, ANSP 6857, a 674–749 mm male.

Type locality: “South America.”

Distribution: Southeastern South America. Southern Brazil (Paraná, Rio Grande do Sul, Santa Catalina, ext. S São Paulo), Uruguay (Artigas, Canelones, Cerro Largo, Colonia, Durazno, Flores, Florida, Maldonado, Paysandú, Rivera, Rio Negro, Salto, San José, Soriano, Tacuarembó, Treinta y Tres), SE Paraguay (Alto Paraná, Itapuá, Misiones) and Argentina (Corrientes, Entre Ríos, Misiones), NSL–400 m.

Sources: Devincenzi, 1925, Abalos & Mischis, 1975, Achával, 1976, Achával et al., 1976, 1978, N.J. Silva & Sites, 1999, 2001, Giraudo & Scrocchi, 2002, Carreira-Vidal et al., 2005, Machado et al., 2005, Di-Bernardo et al., 2007 and Cacciali, 2008.

Remarks: Illustrations of the holotype in N.J. Silva & Sites (1999: fig. 8). Previously a synonym of *M. frontalis.*

4. *Micrurus ancoralis* (Jan, 1872 *in* Jan & Sordelli, 1870–1881). Icon. Gén. Ophid. 3(42): 5, pl. 4, figs. 2, 2a–b, d–e, g, n, p, r, v. (*Elaps marcgravii ancoralis*)

Synonyms: *Elaps marcgravi ancoralis* Jan, 1863b (*nomen nudum*), *Elaps rosenbergi* Boulenger, 1898h, and *Micrurus ancoralis jani* K.P. Schmidt, 1936b.

Type: Holotype, ZSM 210/0, a 780 mm male (F.J.C.M. Wagner, 1857–1860), destroyed 24–25 April 1944 during World War II.

Type locality: “Ecuadore” [= Ecuador].

Distribution: Panama and ext. NW South America. Eastern Panama (Darién), W Colombia (Antioquia, Cauca, Chocó, ? Meta, Nariño, Risaralda, Valle) and NW Ecuador (Esmeraldas, El Oro, Guayas, Pichincha), NSL–1500 (2300) m.
Sources: Boulenger, 1896a, K.P. Schmidt, 1936b, H.M. Smith, 1958, Miyata, 1980, Pérez-Santos, 1986 and Almendáriz, 1991.

5. *Micrurus annellatus* (W.C.H. Peters, 1871a). Mber. Königl. Akad. Wiss. Berlin 1871(8): 402. (*Elaps annellatus*)

Synonyms: *Elaps balzani* Boulenger, 1898b, *Elaps regularis* Boulenger, 1902d, *Micrurus annellatus montanus* K.P. Schmidt, 1954, and *Micrurus annellatus bolivianus* Roze, 1967.
Type: Holotype, ZMB 7185, a female (R. Abendroth, 1870–1871).
Type locality: "Pozuzu, in dem Hochlande vom Peru." [= Pozuzo, Pasco Dept., cen. Perú, 10°04'S, 75°33'W, elevation 745 m].
Distribution: Northwestern South America. Southern Ecuador, E Peru (Cusco, Huánuco, Junín, Loreto, Madre de Dios, Puno), W Brazil (Acre, Amazonas) and Bolivia (Beni, Chuquisaca, Cochabamba, La Paz, Pando), 200–2000 m.
Sources: K.P. Schmidt, 1954, Hoge & Romano-Hoge, 1969b, 1973, 1981b, Duellman & Salas, 1991, Harvey et al., 2003 and Duellman, 2005.
Remarks: Colombian record doubtful *fide* J.A. Campbell & Lamar (2004: 149).

M

6. *Micrurus averyi* K.P. Schmidt, 1939a. Field Mus. Nat. Hist. (Zool.) 24(6): 45–47, fig. 5.

Type: Holotype, FMNH 30956, a 670 mm female (E.R. Blake [Sewell Avery Exped.], 22 Sept. 1938).
Type locality: "Boundary Commission's 'Boundary Camp', at about 2,000 feet above sea level, at head of Itabu Creek. This creek enters the New River, an affluent of the Courantyne, at New River Depot, Courantyne District, near the Brazilian border, at Latitude 1°40' N. and Longitude 58° W., British Guiana" [= ext. S East Berbice-Corentyne Region, ext. S Guyana, 1°34'N, 58°17'W, elevation 600 m].
Distribution: Northern South America. Southern Guyana (S East Berbice-Corentyne), S Suriname (Nickerie) and N Brazil (NE Amazonas, Mato Grosso, Pará), 100–700 m.
Sources: Vanzolini, 1985, Velloso-Calleffo, 1997, Passos, 2003 and C.J. Cole et al., 2013.
Remarks: Occurence in Suriname *fide* Brongersma (1967: 73) due to type locality being claimed by The Netherlands at that time *fide* Hoogmoed *in* Vanzolini (1985: 77).

7. *Micrurus baliocoryphus* (Cope, 1860b). Proc. Acad. Nat. Sci. Philadelphia (1859) 11(12): 346. (*Elaps baliocoryphus*)

Synonym: *Micrurus frontalis mesopotamicus* Barrio & Miranda-Ribeiro, 1967.
Type: Holotype, ANSP 6842, a 457 mm male (Kennedy).
Type locality: "Buenos Ayres" [= Buenos Aires, Argentina]. Corrected and restricted to Villa Federal, Entre Ríos, Argentina *fide* Roze (1983: 324).
Distribution: Southern South America. Southern Brazil (Mato Grosso do Sul, Paraná), Paraguay (Amambay, Boquerón, Caaguazú, Central, Neembucú, Presidente Hayes) and N Argentina (Chaco, Corrientes, Entre Ríos, Formosa, S Misiones), NSL–200 m.
Sources: Abalos & Mischis, 1975, N.J. Silva & Sites, 1999, 2001, Di-Bernardo et al., 2007 and Cacciali, 2008.
Remarks: Illustrations of the holotype in N.J. Silva & Sites (1999: fig. 15). Previously a subspecies of *M. frontalis*.

8. *Micrurus bernadi* (Cope, 1887c). Bull. U.S. Natl. Mus. (32): 87. (*Elaps bernadi*)

Synonym: *Elaps bernadi* Cope *in* Ferrari-Pérez, 1886 (*nomen nudum*).
Type: Holotype, ANSP 14767, an 807 mm female (S. Bernad, 1885–1887).
Type locality: "Zacualtipan, Hidalgo, Mexico" [= Zacualtipan, NE Hidalgo State, E Mexico, 20°39'N, 98°39'W, elevation 1990 m].
Distribution: Mexico (E Hidalgo, N Puebla, N Veracruz), (50) 1400–2000 m.
Sources: K.P. Schmidt, 1933c, 1958, Roze, 1983, 1996 and J.A. Campbell, 2000.

9. *Micrurus bocourti* (Jan, 1872 *in* Jan & Sordelli, 1870–1881). Icon. Gén. Ophid. 3(42): 5, pl. 6, figs. 2, 2a–b, d, g, n, p, r, v, y. (*Elaps bocourti*)

Synonym: *Micrurus ecuadorianus* K.P. Schmidt, 1936b.
Type: Holotype, MNHN 869, a 283 mm male (E.T. Liautaud [Danaïde Exped.], 1843).
Type locality: Unknown. "Indes Occidentales" [= West Indies] *fide* MNHN catalogue (in error). Corrected and restricted to Río Daule, Guayas Province, SW Ecuador *fide* Roze (1967: 8).
Distribution: Western Ecuador (Guayas, Loja, Los Rios, Pichincha, Zamore-Chinchipe) and ext. NW Peru (? Tumbes), NSL–1455 m.
Source: Roze, 1989.
Remarks: MNHN 869 is a syntype of *Elaps circinalis*.

10. *Micrurus bogerti* Roze, 1967. Amer. Mus. Novit. (2287): 9–11, fig. 3.

Type: Holotype, AMNH 96952, a 344 mm male (W. Beebe, 1937).

Type locality: "Tangola-Tangola (Tangolunda), east of Puerto Angel, Oaxaca, Mexico" [= Tangolunda, S Oaxaca, S Mexico, 15°46'N, 96°06'W, elevation 10 m].
Distribution: Southeastern Mexico (ext. SE Oaxaca, probably ext. SW Chiapas), NSL–400 m.
Sources: Villa et al., 1988 and J.D. Johnson, 1989.

11. *Micrurus brasiliensis* Roze, 1967. Amer. Mus. Novit. (2287): 25–26, fig. 9. (*Micrurus frontalis brasiliensis*)

Type: Holotype, UMMZ 108880, a 865–885 mm male (J.R. Bailey, 1942).
Type locality: "Barreiras, Bahia, Brazil" [= Barreiras, W Bahia State, Brazil, 12°09'S, 45°00'W, elevation 575 m].
Distribution: Central Brazil (Bahia, Goiás, Minas Gerais, Tocantins), NSL–600 m.
Sources: Cordeiro & Hoge, 1974, Freitas, 1999 and N.J. Silva & Sites, 1999, 2001.
Remarks: Illustrations of the holotype in N.J. Silva & Sites (1999: fig. 20).

12. *Micrurus browni* K.P. Schmidt & Smith, 1943. Field Mus. Nat. Hist. (Zool.) 29(2): 29–30.

Synonyms: *Micrurus nuchalis taylori* K.P. Schmidt & Smith, 1943 and *Micrurus browni importunus* Roze, 1967.
Type: Holotype, FMNH 38494, a 689 mm male (W.W. Brown, 1932–1943).
Type locality: "Chilpancingo, Guerrero, Mexico" [= Chilpancingo de los Bravos, cen. Guerrero State, SW Mexico, 17°33'N, 99°30'W, elevation 1270 m].
Distribution: Southern Mexico (Sierra Madre del Sur of Chiapas, Guerrero, México, Michoacán, Oaxaca, S Puebla), W Guatemala (Sacatepéquez, Santa Rosa) and Honduras (Itibucá, La Paz, Ocotepeque), NSL–2000 m.
Sources: Blaney & Blaney, 1978, Casas-Andreu & López-Forment, 1978, Camarillo & Smith, 1992, J.A. Campbell, 2000, Suárez-Velázquez & Luna-Reyes, 2009, McCranie, 2011a and Reyes-Velasco et al., 2012.
Remarks: J.A. Campbell & Lamar (2004: 154) list erroneous records of this species.

13. *Micrurus camilae* Renjifo & Lundberg, 2003. Rev. Acad. Colomb. Cien. Exact. Fis. Nat. 27(102): 142–144, fig. la.

Type: Holotype, ICNMNH 8506, a 265 mm male (M. Lundberg, 9 Nov. 1999).
Type locality: "Columbia, departamento de Córdoba, municipio de Tierra Alta, campamento de Funcionarios, represa Hidroeléctrica de Urrá (8°1'3.4"N, 76°11'8.1"W) a 90 metros sobre el nivel del mar."
Distribution: Northwestern Colombia (Córdoba), 90 m. Known only from type locality.

14. *Micrurus carvalhoi* Roze, 1967. Amer. Mus. Novit. (2287): 33–34, fig. 11. (*Micrurus lemniscatus carvalhoi*)

Type; Holotype, USNM 76341, a 923 mm male.
Type locality: "Catanduva, São Paulo, Brazil" [= Catanduva, N São Paulo State, SE Brazil, 21°08'S, 48°58'W, elevation 500 m].
Distribution: Southeastwern Brazil (Bahia, Distrito Federal, Goias, Mato Grosso, Mato Grosso do Sur, Minas Gerais, Paraná, Pernambuco, Rio de Janeiro, Rio Grande do Norte, São Paulo) and N Argentina (N Corrientes, Misiones), 500 m.
Sources: N.J. Silva & Sites, 2001 and Giraudo & Scrocchi, 2002.
Remarks: Probably occurs in Paraguay *fide* Roze (1996: 190).

15. *Micrurus catamayensis* Roze, 1989. Amer. Mus. Novit. (2932): 3–4, fig. 1

Type: Holotype, BMNH 1935.11.3.103, a 495 mm male (C. Carrión-Mora, 1935).
Type locality: "2 km west of Loja, Catamayo Valley, Ecuador, 1568 m" [= E Loja Prov., S Ecuador, 3°59'S, 79°13'W].
Distribution: Ecuador (Loja), 1000–1800 [2360] m.

16. *Micrurus circinalis* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpet. Gén. 7(2): 1210–1211. (*Elaps circinalis*)

Synonym: *Elaps riisei* Jan, 1858b & 1859e.
Type: Lectotype, MNHN 3912, a 280 mm female (Mus. Geoffroy), designated by Roze (1989: 14).
Type locality: Unknown. Designated as Martinique (in error) *fide* Roze (1955: 472). Restricted to Trinidad, Trinidad & Tobago, West Indies *fide* Roze (1989: 14).
Distribution: Northeastern Venezuela (Anzoátegui, Monagas, Sucre) and Trinidad and Tabago (Trinidad), NSL–400 m.
Sources: Roze, 1989, 1994, J.C. Murphy, 1997, Mijares-Urrutia & Arends, 2000 and Navarrete et al., 2009.
Remarks: Possibly a synonym of *M. psyches.*

17. *Micrurus clarki* K.P. Schmidt, 1936c. Field Mus. Nat. Hist. (Zool.) 20(20): 211–212.

Type: Holotype, MCZ 38390, a 267–274 mm male (H.C. Clark, 1934).
Type locality: "Yavisa, Darien, Panama" [= Yaviza, cen. Darién Prov., ext. E Panama, 8°09'N, 77°42'W, elevation 15 m].
Distribution: Lower Central America and Colombia. Southeastern Costa Rica (Puntarenas), SW Panama (Chiriquí, Coclé, Colón, Darién. San Blas) and NW Colombia (Chocó), NSL–900 m.
Sources: E.H. Taylor, 1951, H.M. Smith, 1958, Savage & Vial, 1974, Solórzano & Cerdas, 1985, Pérez-Santos,

1986, Savage & Villa, 1986, Villa et al., 1988, Ryan, 2002 and Savage, 2002.

18. *Micrurus collaris* (Schlegel, 1837). Essai Phys. Serp. 1: 181, 2: 448–449. (*Elaps collaris*)

Synonyms: *Elaps collaris* H. Boie *in* Schlegel, 1826a *(nomen nudum), Elaps collaris* Schlegel, 1826b *(nomen nudum), Elaps collaris* Gray, 1831 *(nomen nudum), Elaps gastrodelus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Elaps gastrodelus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, and *Leptomicrurus collaris breviventris* Roze & Bernal-Carlo, 1988.

Type: Lectotype, RMNH 1444, a 404 mm male (S.J. Brugmans, 1815–1819), designated by Brongersma (1966: 250).

Type locality: Unknown. Designated as the Guianas *fide* Hoge & Romano-Hoge (1966: 4).

Distribution: Northern South America. Southeastern Venezuela (Bolívar), Guyana (Cuyuni-Mazaruni, East Berbice-Corentyne, Potaro-Siparuni), Suriname (Brokopondo, Marswijne), French Guiana (N Cayenne) and ext. NE Brazil (Pará), NSL–700 m.

Sources: J.C. Thompson, 1913a, K.P. Schmidt, 1937, Brongersma, 1966, Roze, 1958e, 1966a, 1967, Lancini, 1979, Abuys, 1987a, Chippaux, 1987, Starace, 1998, Navarrete et al., 2009 and C.J. Cole et al., 2013.

Remarks: Original description based on H. Boie's MS (1823–1825).

M

19. *Micrurus corallinus* (Merrem, 1820). Tent. Syst. Amph.: 144–145. (*Elaps corallinus*)

Synonyms: *Elaps corallinus* Wied-Neuwied, 1820b *(nomen praeoccupatum)* and *Coluber corallinus* Raddi, 1820 *(nomen praeoccupatrum).*

Type: Lectotype, MNHN 3911, a 279 mm female (A.P.M. zu Wied-Neuwied, Sept. 1815–May 1817), designated by Roze (1966b: 370).

Type locality: "Rio de Janeiro, Cabo Frio, Campos de Coaytacases, Parahyba, Brazil" [= all in vicinity of Rio de Janeiro (22°54'S, 43°13'W, elevation 15 m), Rio de Janeiro State, SE Brazil] via lectotype selection.

Distribution: Southeastern South America. Southeastern Brazil (Bahia, Espírito Santo, ? Goiás, Mato Grosso do Sul, Minas Gerais, Paraíba, Paraná, Rio de Janeiro, Rio Grande do Norte, Rio Grande do Sul, Santa Catarina, São Paulo, Alcatrazes, Anchieta, Barnabé, Búzios, Cananéia, Cardoso, Comprida, Grande, Porchat, Santo Amaro, São Sebatião and São Vicente Is.), E Paraguay (Alto Paraná, Itapúa), ext. NE Argentina (Misiones) and ext. NE Uruguay, NSL–600 m.

Sources: Wied-Neuwied, 1820b, 1825c, Bertoni, 1915, Serie, 1915b, 1921, 1936, Amaral, 1925a, 1926?, Vaz-Ferreira & Sierra de Soriano, 1960, Azevedo, 1963, Roze, 1966b, Lema & Fabián-Beurmann, 1977, Lema, 1987, J.D. Williams & Francini, 1991, Cei, 1994, Casais e Silva Nunes, 1996, Marques, 1996a, Freitas, 1999, Freire, 2001, N.J. Silva & Sites, 2001, Giraudo & Scrocchi, 2002, Duarte-Rocha & Van Sluys, 2006 and Cacciali, 2008.

Remarks: Tucumán, Argentina record needs confirmation.

20. *Micrurus decoratus* (Jan, 1858b). Rev. Mag. Zool. (2) 10: 518, 525–526. (*Elaps decoratus*)

Synonyms: *Elaps decoratus* A.C.L.G. Günther, 1859 (*nomen praeoccupatum*), *Elaps fischeri* Amaral, 1921a, and *Elaps ezequieli* Lutz & Mello, 1922 & 1923.

Types: Syntypes (3), formerly MSNM, a 450 mm specimen, destroyed in 1943 during World War II, MZUT, a 420 mm specimen, lost *fide* Elter (1981: 67), and ZFMK, a 390 mm specimen, lost *fide* W. Böhme (2010: 106).

Type locality: "Mexique" [= Mexico] (in error *fide* Roze 1967: 14). Corrected and restricted to Serra da Bocaina, São Paulo, Brazil, [ca. 23°00'S, 46°33'W] *fide* Hoge & Romano (1973: 122).

Distribution: Southeastern Brazil (ext. S Minas Gerais, Paraná, Rio de Janeiro, NE Rio Grande do Sul, Santa Catarina, São Paulo), NSL–1500 m.

Sources: Jan, 1872 *in* Jan & Sordelli, 1870–1881, Amaral, 1922a, 1977, Barth, 1957, Lema & Azevedo, 1969, Lema, 1987, N.J. Silva & Sites, 2001, Marques, 2002 and Marques et al., 2002.

Remarks: Supplemental original description in Jan (1859e: pl. b, fig. no. 5). Jan (1858: 526) described three syntypes with the Milan specimen first, but did not designate a holotype, and Jan & Sordelli [1872 *in* 1870–1881, 3(livr. 42): pl. 6, fig. 4] illustrated the type from MSNM. A.C.L.G. Günther (1859: 85) inadvertently designated a lectotype by describing Jan's Milan specimen and Roze's (1996: 151) designation of the Milan specimen as the holotype is a lectotype designation, and that specimen is lost.

21. *Micrurus diana* Roze, 1983. Mem. Inst. Butantan (1982) 46: 324–325. (*Micrurus frontalis diana*)

Type: Holotype, FMNH 159889, a 998–1009 mm male (R.F. Steinbach, 7–20 April 1973).

Type locality: "vicinity of Santiago, Provincia Chiquiticos, Departamento Santa Cruz, Bolivia, 700 meters" [= Serranía de Santiago, Santa Cruz Dept., Bolivia (18°16'S, 60°00'W, elevation 400 m) *fide* N.J. Silva & Sites (199: 170).

Distribution: Eastern Bolivia (Santa Cruz), 400–700 m.

Sources: Roze, 1994, N.J. Silva & Sites, 1999 and Harvey et al., 2003.

Remarks: Illustrations of the holotype in N.J. Silva & Sites (1999: fig. 24).

22. *Micrurus diastema* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1222. (*Elaps diastema*)

Synonyms: *Elaps epistema* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Elaps affinis* Jan, 1858b & 1859e, *Elaps apiatus* Jan, 1858b & 1859, *Elaps aglaeope* Cope, 1860b, *Elaps corallinus crebripunctatus* W.C.H. Peters, 1870a, *Elaps alienus* F. Werner, 1903b, *Elaps fulvius sapperi* F. Werner, 1903a, *Elaps guatemalensis* Ahl, 1927, *Micrurus affinis mayensis* K.P. Schmidt, 1933c, *Micrurus affinis stantoni* K.P. Schmidt, 1933c, and *Micrurus diastema macdougalli* Roze, 1967.

Type: Lectotype, MNHN 7657, a 607 mm female (Ducommun, 1838), designated by Roux-Estève (1983: 82).

Type locality: "Mexique" [= Mexico]. Restricted to Potrero Viejo, Veracruz, Mexico [18°53'N, 96°51'W, elevation 620 m] *fide* Roze (1983: 318).

Distribution: Mesoamerica. Southeastern Mexico (Campeche, N Chiapas, Hidalgo, Oaxaca, Puebla, Quintana Roo, Tabasco, Veracruz, Yucatán), Belize (Belize, Cayo, Corozal, Orange Walk, Stann Creek), N Guatemala (Alta Verapaz, Huehuetenango, Izabal, Petén) and NW Honduras (Comayagua, Copán, Cortés, Santa Bárbara), NSL–1680 m.

Sources: K.P. Schmidt, 1933c, L.C. Stuart, 1948, Zweifel, 1959a, Fraser, 1970, 1973, R.W. Henderson & Hoevers, 1975, Blaney & Blaney, 1979a, J.C. Lee, 1980, 1996, 2000, Roux-Estève, 1983, L.D. Wilson & Meyer, 1985, Villa et al., 1988, Pérez-Higareda & Smith, 1990, 1991, Benitez-Gálvez, 1997, J.A. Campbell, 1998b, 2000, Stafford, 2000a and McCranie, 2011a.

Remarks: Type locality restriction of Colima, Mexico *fide* K.P. Schmidt (1933c: 39) invalid as Roux-Estève (1983: 82) has shown that MNHN 4620 (now = MNHN 7656) was not a syntype, having been collected in 1859.

23. *Micrurus dissoleucus* (Cope, 1860b). Proc. Acad. Nat. Sci. Philadelphia (1859) 11(12): 345. (*Elaps dissoleucus*)

Synonyms: *Elaps gravenhorstii* Jan, 1858b & 1859e *(nomen oblitum), Elaps melanogenys* Cope, 1860c, *Elaps hollandi* L.E. Griffin, 1916, *Micrurus dunni* T. Barbour, 1923, and *Micrurus dissoleucus nigrirostris* K.P. Schmidt, 1955a.

Type: Holotype, ANSP 6781, a 571 mm female (C.D. Meigs, 1850–1859).

Type locality: "Venezuela." Restricted to Maracaibo, Zulia, Venezuela [= 10°39'N, 71°38'W, elevation 25 m] *fide* Roze (1955: 479).

Distribution: Eastern Panama (Canal Zone, Coclé), N Colombia (Antioquia, Atlántico, Bolívar, Cesar, ? Chocó, La Guajira, Magdalena, Norte de Santander, Valle) and N Venezuela (Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Mérida, Miranda, Portuguesa, Sucre, Trujillo, Zulia), NSL–550 (1000) m.

Sources: Amaral, 1931b, K.P. Schmidt, 1936b, Evans, 1947, Roze, 1955, 1966a, H.M. Smith, 1958, Pérez-Santos, 1986, Villa et al., 1988, Gorzula & Señaris, 1998 and Navarrete et al., 2009.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Elaps dissoleucus* Cope is designated a *nomen protectum* and *Elaps marcgravi gravenhorstii* Jan a *nomen oblitum*.

24. *Micrurus distans* (Kennicott, 1860). Proc. Acad. Nat. Sci. Philadelphia 12(8): 338. (*Elaps distans*)

Synonyms: *Elaps fulvius hypostema* Jan, 1863b (*nomen nudum*), *Elaps diastema michoacanensis* Dugès, 1891, *Micrurus distans oliveri* Roze, 1967, and *Micrurus distans zweifeli* Roze, 1967.

Type: Holotype, USNM 1144, a 537 mm male (J. Potts).

Type locality: "Batosegachie, Chihuahua" [= Batosegachi, Guazapares, SW Chihuahua, NW Mexico, 27°24'N, 108°19'W, elevation 1430 m].

Distribution: Western Mexico (Aguascalientes, ext. SW Chihuahua, Colima, NW Guerrero, Jalisco, S Michoacán, Nayarit, Sinaloa, S Sonora, Zacatecas), NSL–1525 m.

Sources: K.P. Schmidt & Smith, 1943, Zweifel, 1959b, J.A. Campbell, 2000, Quintero-Diaz et al., 2000, Ernst & Ernst, 2011 and Ahumada-Carrillo & Vázquez-Huizar, 2012a.

Remarks: Collector listed as J. Potts *fide* USNM catalogue and original description but listed as A. Schott on data tags with specimen *fide* Cochran (1961: 177): one data tag lists Chihuahua, another tag Batosegachie, Chihuahua.

25. *Micrurus dumerilii* (Jan, 1858b). Rev. Mag. Zool. (2) 10: 517, 522–523. (*Elaps dumerilii*)

Synonyms: *Elaps marcgravii* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen praeoccupatum), Elaps colombianus* L.E. Griffin, 1916, *Micrurus antioquiensis* K.P. Schmidt, 1936b, *Micrurus carinicauda* K.P. Schmidt, 1936b, *Micrurus transandinus* K.P. Schmidt, 1936b, *Micrurus dumerilii venezuelensis* Roze, 1989, and *Micrurus c. dumarilii* – Khole, 1991 *(nomen incorrectum),*

Type: Holotype, MNHN 3923, a 660 mm male (Barot).

Type locality: "Colombie" [= Colombia]. Emended to Carthagène, Colombie [= Cartagena, ext. N Bolívar Dept., Colombia, 10°25'N, 75°32'W, elevation 10 m] *fide* Jan (1859c: 509).

Distribution: Panama and NW South America. Eastern Panama (Darién), W Colombia (Antioquia, Atlántico, Bolívar, Boyaca, Cauca, Chocó, Cundinamarca, Magdalena, Nariño, Norte de Santander, Risaralda, Santander, Valle, Tolima), Venezuela (Apure, Aragua, Barinas, Carabobo, Distrito Federal, Falcón, Lara, Mérida, Miranda, Táchira, Trujillo, Yaracuy, Zulia) and NW Ecuador (Esmeraldas, Pichincha), NSL– 2135 m.

Sources: Jan & Sordelli, 1872 *in* 1870–1881, Roze, 1955, 1966a, 1989, Miyata, 1980, Roux-Estève, 1983, Pérez-Santos, 1986, Barrio-Amorgós, 2001 and Navarrete et al., 2009.

Remarks: Supplemental original description in Jan (1859e: pl. a, fig. no. 15).

26. *Micrurus elegans* (Jan, 1858b). Rev. Mag. Zool. (2)10: 517, 524. (*Elaps elegans*)

Synonyms: *Micrurus elegans verae-pacis* K.P. Schmidt, 1933c *(nomen incorrigendum)* and *Micrurus elegans veraepacis* – L.C. Stuart, 1950 *(nomen corrigendum).*

Type: Lectotype, formerly MSNM, a 470 mm female described and illustrated by Jan (1858: 524 & 1859a: pl. B, no. 1) and Jan & Sordelli (1872 *in* 1870–1881, 3(42): 5, pl. 5, fig. 2), designated by K.P. Schmidt (1958: 208), destroyed in 1943 during World War II.

Type locality: "Mexique" [= Mexico]. Restricted to Jalapa, Veracruz, Mexico *fide* H.M. Smith & Taylor (1950a: 348).

Distribution: Southeastern Mexico (N Chiapas, NE Oaxaca, S Tabasco, S Veracruz) and cen. Guatemala (Alta Verapaz, Huehuetenango), 800–1830 m.

Sources: L.C. Stuart, 1948, 1963, H.M. Smith & Smith, 1976, Alvarez del Toro, 1982, Villa et al., 1988 and Pérez-Higareda & Smith, 1991.

Remarks: Supplemental original description in Jan (1859e: pl. b, fig. no. 1). All 3 syntypes (MZUT, a 495 mm male, ZFMK, a 490 mm female, and MSNM, a 470 mm female) are lost or were destroyed in 1943 during World War II *fide* Elter (1981: 67), Golay et al. (1996: 165) and W. Böhme (2010: 106). Lectotype illustrations reproduced in K.P. Schmidt (1958: fig. 34), Roze (1996: fig. 56) and J.A. Campbell & Lamar (2004: fig. 54).

27. *Micrurus ephippifer* (Cope, 1886b). Proc. Amer. Philos. Soc. (1885) 23(122): 281. (*Elaps ephippifer*)

Synonym: *Micrurus ephippifer zapotecus* Roze, 1989.

Type: Holotype, USNM 3085, a female (A.-L.-J.-F. Sumichrast, 1855–1869).

Type locality: "Pacific side of the Isthmus of Tehuantepec" [= SE Oaxaca State, S Mexico].

Distribution: Southern Mexico (E Oaxaca), NSL–2300 m.

Sources: Roze, 1989, Camarillo, 1995 and J.A. Campbell, 2000.

28. *Micrurus filiformis* (A.C.L.G. Günther, 1859b). Proc. Zool. Soc. London 27(1): 86–87, pl. 18, figs. b–b′. (*Elaps filiformis*)

Synonym: *Micrurus filiformis subtilis* Roze, 1967.

Type: Holotype, BMNH 1946.1.20.13, a 390–432 mm male (H.H. Higgins, 1856–1859).

Type locality: "Para, Tropical America" [=Pará State, N Brazil]. Probably vicinity of Belém [= ca. 1°27'S, 48°30'W] *fide* Cunha & Nascimento (1973: 282).

Distribution: Amazonian South America. Southeastern and E Colombia (Amazonas, Caqueta, Casanare, Cundinamarca, Meta, Putumayo, Vaupés), E Ecuador, NE Peru (Loreto) and N Brazil (Amazonas, Maranhão, Pará), NSL–500 m.

Sources: Hoge & Romano-Hoge, 1971, Cunha & Nascimento, 1973, 1978, 1993, Dixon & Soini, 1986, Pérez-Santos, 1986, Alméndariz, 1991, Henle & Ehrl, 1991, Silva Haad, 1994 and Feitosa et al., 2007.

Remarks: Holotype redescribed by Feitosa et al. (2007: 152). J.A. Campbell & Lamar (2004: 215) indicated probably in S Venezuela and also S Guyana and French Guiana.

29. *Micrurus frontalis* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1223–1224. (*Elaps frontalis*)

Type: Lectotype, MNHN 854, a 501–529 mm male (P. Claussen, 1844), designated by Roze (1996: 172).

Type locality: "Brazil" via lectotype selection. Restricted to Lagoa Santa, Minas Gerais, Brazil *fide* Vanzolini *in* N.J. Silva & Sites (1999: 149).

Distribution: Southeastern Brazil (Distrito Federal, Espírito Santo, Goiás, Mato Grosso, Mato Grosso do Sul, Minas Gerais, Rio de Janeiro, São Paulo, Bananal Is.), Bolivia (Santa Cruz) and Paraguay (Amambay, Central, Concepción, Cordillera, Paraguarí, San Pedro), NSL–700 m.

Sources: Serié, 1915b, 1936, Amaral, 1944k, Shreve, 1953, Vaz-Ferreira & Sierra de Soriano, 1960, Abalos & Nader, 1962, Abalos et al., 1964, Lema & Fabián-Beurmann, 1977, Hoge & Romano-Hoge, 1981b, Roux-Estève, 1983, Fugler & Riva, 1990, Scrocchi, 1990b, Cei, 1994, Lema, 1994, D.R. Norman, 1994, Roze, 1994, N.J. Silva & Sites, 1999, 2001, Di-Bernardo et al., 2007, Cacciali, 2008 and Jansen, 2008.

Remarks: Illustrations of the lectotype in N.J. Silva & Sites (1999: fig. 3). Type locality restriction of Corrientes and Misiones, Argentina *fide* J.A. Peters & Orejas-Miranda (1970: 208) invalid. Shreve (1953: 4) suggested, but did not designate, Lagoa Santa, Minas Gerais, Brazil as the type locality.

30. *Micrurus frontifasciatus* (F. Werner, 1927). Sitz. Akad. Wiss. Wien, Math.-Natur. Kl. (1926) 135(7–8): 250–251. (*Elaps frontifasciatus*)

Type: Holotype, NMW 18298, a 1040 mm male (O. Staudinger, 28 May 1898).

Type locality: "Bolivia."

Distribution: Southeastern Peru (Madre de Dios) N Bolivia (Beni, Chuquisaca, Cochabamba, La Paz, Pando, Santa Cruz) and N Brazil (Pará), NSL–2500 m.

Sources: Fugler & Riva, 1990 and Guimarâes-Guedes, 2000.

31. *Micrurus fulvius* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 381. (*Coluber fulvius*)

Synonyms: *Coluber nigrorufus* Lacépède, 1789 (*nomen rejiciendum*), *Vipera fulvia* – Harlan, 1827, *Elaps flavius* – Gray, *in* Griffith & Pidgeon, 1831 *(nomen incorrectum), Micrurus fulvius barbouri* K.P. Schmidt, 1928c, *Micrulus fulvius* – Boquet, 1964 *(nomen incorrectum), Mucrurus fulvins* – Garza, 1984 *(nomen incorrectum), Micrurus fluvius* – Dart, O'Brien & McNally, 1990 *(nomen incorrectum),* and *Micrurus fulvis* – Savage & Slowinski, 1990 *(nomen incorrectum).*

Type: Holotype, a female (A. Garden, 1760–1761), lost *fide* Roze & Tilger (1983: 316.1).

Type locality: "Carolina" [USA]. Restricted to vicinity of Charleston, South Carolina, USA *fide* Klauber (1948: 6).

Distribution: Southeastern USA (S Alabama, Florida, S Georgia, ext. SE Louisiana, S Mississippi, SE North Carolina, E South Carolina), NSL–400 m.

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Florida).

Sources: A.H. Wright & Wright, 1957, Graham, 1977, Jackson & Franz, 1981, Roze & Tilger, 1983, Ashton & Ashton, 1988, Ernst & Barbour, 1989, Conant & Collins, 1991, Palmer & Braswell, 1995, Tennant, 1997, Holman, 2000a and Ernst & Ernst, 2011.

32. †*Micrurus gallicus* Rage & Holman, 1984. Géobios 17(1): 97–98, figs. 6a–e.

Type: Holotype, UCBL 285013, one trunk vertebra.

Type locality: "La-Grive-Saint-Alban (Isère), France; zone MN 7, Astaracien, Miocène français."

Distribution: Lower Miocene (Orleanian, MN 4–5: 13.7–16.9 mya) of France and Germany, and middle Miocene (Astaracian, MN 6: 12.8–13.7 mya) of France.

Sources: Szyndlar & Schleich, 1993, Augé & Rage, 2000, Ivanov, 2000, Rage & Bailon, 2005 and Ivanov & Böhme, 2011.

33. *Micrurus hemprichii* (Jan, 1858b). Rev. Mag. Zool. (2)10: 517, 523. (*Elaps hemprichii*)

Synonyms: *Micrurus hemprichi ortoni* K.P. Schmidt, 1953b and *Micrurus rondonianus* Roze & Silva, 1990.

Types: Syntypes (2), NMW, a 350 mm specimen, and formerly MSNM, a 450 mm specimen, destroyed in 1943 during World War II.

Type locality: "Colombie" [= Colombia].

Distribution: Northern South America. Southeastern Colombia (Amazonas, Caquetá), S Venezuela (Amazonas, Bolívar), Guyana (Barima-Waini, Cuyuni-Mazaruni, East Berbice-Corentyne, Potaro-Siparuni), N Suriname (Brokopondo, Marowijne, Nickarie, Para, Suriname), N French Guiana (Cayenne, Saint-Laurent-du-Maroni), E Ecuador (Morona Santiago, Napo), E Peru (Amazonas, Loreto, Madre de Dios), NW Brazil (N Amazonas, Maranhao, Pará, Rondônia, Marajo Is.) and Bolivia (Beni, Cochabamba, La Paz), NSL–1200 m.

Sources: K.P. Schmidt, 1953b, J.A. Peters, 1960a, Roze, 1966a, 1994, Hoge & Romano-Hoge, 1972, Cunha & Nascimento, 1978, 1993, Miyata, 1982, Dixon & Soini, 1986, Pérez-Santos, 1986, Abuys, 1987a, Pérez-Santos & Moreno, 1988, 1991, N. Jorge de Silva, 1993, Silva Haad, 1994, Gorzula & Señaris, 1998, Starace, 1998, N.J. Silva & Sites, 2001, Harvey et al., 2003 and Navarrete et al., 2009.

Remarks: Supplemental original description in Jan (1859e: pl. a, fig. no. 7). Type locality restrictions to vicinity of Bartica, Guyana *fide* K.P. Schmidt (1953b: 166) and Venezuela *fide* Hoge & Lancini (1962: 12) invalid. Roze (1996: 181) and J.A. Campbell & Lamar (2004: 217) listed the MSNM specimen as holotype.

34. *Micrurus hippocrepis* (W.C.H. Peters, 1861e). Mber. Königl. Akad. Wiss. Berlin 1861(10): 925. (*Elaps hippocrepis*)

Type: Holotype, ZMB 4065, a 680 mm female (J. Sivers & Schaum), lost *fide* R. Günther (*in litt.*).

Type locality: "Santo Tomas de Guatemala" [= Puerto Matías de Galvez, Guatemala *fide* L.C. Stuart (1963: 126) or Puerto Matías de Castilla, E Izabal Dept., E Guatemala, 15°42'N, 88°37'W, elevation NSL].

Distribution: Central Belize (Cayo, Stann Creek, Toledo) and NE Guatemala (Izabal), NSL–1000 m.

Sources: R.W. Henderson & Hoevers, 1975, Villa et al., 1988, Lee, 1996, J.A. Campbell, 1998b, Stafford, 2000a and Stafford & Meyer, 2000.

Remarks: Possibly a color morph of *M. diastema fide* J.A. Campbell & Lamar (2004:172).

35. *Micrurus ibiboboca* (Merrem, 1820). Tent. Syst. Amph.: 142–143. (*Elaps ibiboboca*)

Synonyms: *Elaps marcgravii* Wied-Neuwied, 1820b, *Elaps ibibiboca* – Boulenger, 1896a *(nomen incorrectum),* and *Micrurus ibiboca* – Klemmer, 1963 *(nomen incorrectum).*

Type: Holotype, AMNH 3937, a 318 mm male (A.P.M. zu Wied-Neuwied, 25 July–17 Aug. 1816).

Type locality: "Brasilia" [= Brazil]. Emended to mouth of Río Belmonte, Bahia Prov., Brazil *fide* Wied-Neuwied (1825c: 420). Restricted to E Brazil, south of the Amazon *fide* MacCulloch & Lathrop (2004a: 143).

Distribution: Eastern Brazil (Alagoas, Bahia, Ceará, Espírito Santo, Maranhão, Paraíba, Pernambuco, Piauí, Rio de Janeiro, Rio Grande do Norte, Sergipe), NSL–1200 m.

Sources: Roze, 1966b, Vanzolini et al., 1980, Freitas, 1999 and N.J. Silva & Sites, 2001.

Remarks: Guyana, Suriname and French Guiana populations are *M. lemniscatus fide* J.A. Campbell & Lamar (1989: 121) and MacCulloch & Lathrop (2004a: 143).

36. *Micrurus isozonus* (Cope, 1860c). Proc. Acad. Nat. Sci. Philadelphia 12(2): 73. (*Elaps isozonus*)

Synonym: *Elaps omissus* Boulenger, 1920b.
Types: Syntypes (2), ANSP 6804–05, a male and female (Wilson).
Type locality: "South America." Restricted to Caracas, Venezuela [= Caracas, Distrito Federal State, N Venezuela, 10°29'N, 66°54'W, elevation 925 m] *fide* Roze (1955: 486).
Distribution: Northeastern Colombia (Arauca, Casanare, Meta), Venezuela (Amazonas, Anzoátegui, Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Miranda, Monagas, Nueva Esparta, Portuguesa, Sucre, Trujillo, Yaracuy, Vargas, Zulia, Margarita Is.), S Guyana (Upper Takutu-Upper Essequibo) and N Brazil (Roraima), NSL–1400 m.
Sources: K.P. Schmidt, 1936b, Roze, 1966a, Medem, 1969, Gorzula & Señaris, 1998, Markezich, 2002, Navarrete et al., 2009, Ugueto & Rivas, 2010 and C.J. Cole et al., 2013.
Remarks: ANSP 6836 is possibly a third syntype.

M

37. *Micrurus langsdorffi* (Wagler *in* Spix, 1824). Serp. Brasil. Sp. Nov.: 10–12, pl. 2, fig. 1. (*Elaps langsdorffi*)

Synonyms: *Elaps langsdorfii* – Jan, 1858b *(nomen incorrectum), Elaps batesii* A.C.L.G. Günther, 1868, *Elaps imperator* Cope, 1868b, and *Micrurus mimosus* Amaral, 1935c.
Type: Lectotype, ZSM 2250/0, a 713 mm female (K.F.P. von Martius, Dec. 1819–Feb. 1820), designated by Hoogmoed & Gruber (1983: 326).
Type locality: "Río Japurá, Brazil" [= bet. mouth of Río Japurá, Brazil (3°08'S, 64°66'W) and Araracuara, Colombia (0°24'S, 72°17'W) *fide* Vanzolini, 1981: xxvi] via lectotype selection.
Distribution: Western Amazonia. Southern Colombia (Amazonas, Caquetá, Putumayo, Vaupés), NW Brazil (Amazonas), E Ecuador (Napo) and NE Peru (Loreto), 80–450 m.
Sources: Soini, 1974, Cunha & Nascimento, 1982c, Silva Haad, 1994, Lamar, 1997 and Franzen & Glaw, 2007.
Remarks: Figure in original description listed as fig. 2 in text. Possibly occurs in S Venezuela *fide* J.A. Campbell & Lamar (1989: 123). Discussion of taxonomic problems found in J.A. Campbell & Lamar (2004: 174).

38. *Micrurus laticollaris* (W.C.H. Peters, 1870a). Mber. Königl. Akad. Wiss. Berlin 1869(12): 877–878. (*Elaps marcgravii laticollaris*)

Synonym: *Micrurus laticollaris maculirostris* Roze, 1967.
Type: Lectotype, ZMB 6659, a male (Berkenbusch), designated by K.P. Schmidt (1958: 211).
Type locality: "Puebla (probably Matamoros), Mexico" via lectotype selection. Restricted to Izúcar de Matamoros, Puebla, Mexico *fide* H.M. Smith & Taylor (1950a: 341).
Distribution: Southwestern Mexico (Colima, N Guerrero, Jalisco, Michoacán, Morelos, NW Oaxaca, Puebla), 300–1915 m.
Sources: K.P. Schmidt, 1936b, Roze, 1989, Benitez-Gálvez, 1997 and Castro-Franco & Bustos Zagal, 2004.

39. *Micrurus latifasciatus* K.P. Schmidt, 1933c. Field Mus. Nat. Hist. (Zool.) 20(324): 35.

Synonym: *Micrurus nuchalis* K.P. Schmidt, 1933c.
Type: Holotype, MCZ 22135, an 887 mm female (A.W. Anthony, 1925).
Type locality: "Finca El Cipres, Volcan Zunil, Suchetepequez, Guatemala."
Distribution: Extreme SE Mexico (S Chiapas, SE Oaxaca) and SW Guatemala (Sachitepequez), NSL–1350 m.
Sources: K.P. Schmidt & Smith, 1943 and Villa et al., 1988.

40. *Micrurus lemniscatus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 224. (*Coluber lemniscatus*)

Synonyms: *Coluber javanus* Laurenti, 1768, *Natrix lemniscata* – Laurenti, 1768, *Micrurus helleri* K.P. Schmidt & Schmidt, 1925, *Micrurus lemniscatus diutius* Burger, 1955, and *Micrulus lemniscatus* – Boquet, 1964 *(nomen incorrectum).*
Type: Lectotype, NHR Lin-93 (formerly MAFR), a 675–680 mm male (Mus. Drottn.), designated by Roze (1989: 14).
Type locality: "Asia," (in error *fide* Roze, 1967: 32) via lectotype selection.
Distribution: South America. Colombia (Amazonas, Caqueta, Meta, Putumayo), E Venezuela (Amazonas, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Monagas), Trinidad and Tobago (Trinidad), Guyana (Barima-Waini, Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Mahaica-Berbice, Potaro-Siparuni, Upper Takutu-Upper Essequibo), Suriname (Para, Paramaribo, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), N Brazil (Acre, Amapá, Amazonas, Ceará, Goiás, Maranhão, Mato Grosso, Pará, Rio Grande do Norte, Rondônia, Roraima), E Ecuador (Morona-Santiago, Napo, Pastaza), E Peru (Amazonas, Huánuco, Junin, Loreto, Madre de Dios), N Bolivia (Beni, Cochabamba, La Paz, Pando, Santa Cruz) and Paraguay, NSL–445 m.
Sources: Amaral, 1944k, Beebe, 1946, Emsley, 1977, Cunha & Nascimento, 1978, 1982a, 1993, Pérez-Santos,

1986, Abuys, 1987a, Chippaux, 1987, N.J. Silva, 1993, 1996, Casais e Silva, 1996, Starace, 1998, Di-Bernardo et al., 2001, N.J. Silva & Sites, 2001, Guimarães Guedes, 2003, Harvey et al., 2003, Duellman, 2005, Natera-Mumaw et al., 2007, Navarrete et al., 2009 and C.J. Cole et al., 2013.

Remarks: Official Specific Name no. 2779 *fide* Opinion 1201 (ICZN, 1982a). Roze (1989: 14) confused the NHR Linnean catalogue numbers: smaller specimen (500 mm) is Lin-93, larger specimen (680 mm) is Lin-95. Roze intended to designate the larger specimen (Lin-95) as the lectotype but instead selected the smaller one (Lin-93). Type locality restriction of Belém, Pará, Brazil *fide* K.P. Schmidt & Walker (1943a: 294) invalid *fide* Roze (1967: 32).

41. *Micrurus limbatus* Fraser, 1964. Copeia 1964. (3): 570–571, fig. 1 (middle).

Synonym: *Micrurus limbatus spilosomus* Pérez-Higareda & Smith, 1990.

Type: Holotype, UMMZ 123858, a 585 mm female (D.C. Robinson, 11 July 1959).

Type locality: "on the southern slope of Vocán San Martin, 7 airline miles north of San Andrés Tuxtla, Veracruz, Mexico, at 1,050 m" [= Volcán San Martín Sierra Tuxtlas, S Veracruz State, S Mexico, 18°32'N, 95°12'W, elevation 1050 m].

Distribution: Southern Mexico (Sierra de Los Tuxtlas of S Veracruz), 10–1500 m.

Sources: Pérez-Higareda & Smith, 1990, 1991 and B. Greene et al., 1998.

42. *Micrurus margaritiferus* Roze, 1967. Amer. Mus. Novit. (2287): 35–36, fig. 12.

Type: Holotype, AMNH 53362, a 580 mm female (H. Bassler, Aug. 1929).

Type locality: "Boca Río Santiago-Río Marañón, Peru."

Distribution: Northern Peru (Amazonas), 150–600 m. Possibly E Ecuador *fide* J.A. Campbell & Lamar (1989: 130).

43. *Micrurus medemi* Roze, 1967. Amer. Mus. Novit. (2287): 41–42, fig. 14. (*Micrurus psyches medemi*)

Type: Holotype, AMNH 96998, a 639 mm male (H. Nicéforo-María, 1950).

Type locality: "Villavicencio, Meta, Colombia" [= Villavicencio, Meta Dept., cen. Colombia, 4°09'N, 73°38'W, elevation 535 m].

Distribution: Central Colombia (Meta), 250–600 m. Known only from vicinity of the type locality.

Source: Roze, 1994.

44. *Micrurus meridensis* Roze, 1989. Amer. Mus. Novit. (2932): 5–7, figs. 2–3. (*Micrurus dissoleucus meridensis*)

Type: Holotype, USNM 217256, a 390 mm male (native, 27 March 1966).

Type locality: "1 km NE of Lagunilla, Mérida, Venezuela, 915 m."

Distribution: Western Venezuela (Mérida), 915 m.

Sources: Roze, 1994 and Navarrete et al., 2009.

45. *Micrurus mertensi* K.P. Schmidt, 1936b. Field Mus. Nat. Hist. (Zool.) 20(19): 192–193.

Type: Holotype, SMF 20714 (formerly SMF-B 9420 a), an 880 mm male (M. Bamberger, 1887).

Type locality: "Pacasmayo, Peru" [= Pacasmayo, NW La Libertad Dept., NW Peru, 7°24'S, 79°33'W, elevation 25 m].

Distribution: Extreme S Ecuador (Loja) and NW Peru (Ancash, La Libertad, Lambayeque, Piura), NSL–1700 m.

Remarks: Holotype listed as SMF-B 9420b *fide* Mertens (1967: 100) but Boettger (1898: 125) recorded it as SMF 9420 a, and it was erroneously listed as SMF 94206 *fide* K.P. Schmidt (1936b: 192). Taxonomic problems discussed by J.A. Campbell & Lamar (2004: 177).

M

46. *Micrurus mipartitus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1220–1221. (*Elaps mipartitus*)

Synonyms: *Elaps decussatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Elaps semipartitus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Elaps multifasciatus* Jan, 1858b, *Elaps anomalus* Boulenger, 1896a, *Elaps fraseri* Boulenger, 1896a, *Elaps hertwigii* F. Werner, 1896c, *Elaps mentalis* Boulenger, 1896a, *Elaps calamus* Boulenger, 1902a, *Elaps aequicinctus* F. Werner, 1903b, *Elaps microps* Boulenger, 1913d, *Elaps decipiens* F. Werner, 1927, *Micrurus mipartitus popayanensis* Ayerbe, Tidwell & Tidwell, 1990, and *Micrurus mipartitus rozei* Golay, Chiszar, Smith & van Breukelen, 1999.

Type: Holotype, MNHN 3915, a 762 mm female (J.P. Goudot, 1822–1825 or 1837–1842), lost *fide* J.A. Peters (1960a: 531).

Type locality: "probablement de la Nouvelle Grenada" [probably Colombia]. Restricted to Rio Sucio, Colombia [= Ríosucio, Chocó Dept., NW Colombia, 7°27'N, 77°07'W, elevation 30 m] *fide* Klemmer (1963: 314) and Pérez-Santos (1986: 779).

Distribution: Lower Central America and NW South America. Southern Nicaragua (Chontales, Matagalpa, Rio San Juan, Zelaya Sur), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas), Panama (Bocas del Rio, Canal Zone: Barro Colorado Is.; Darién, Panamá, Veraguas), Colombia (Antioquia, Atlántico, Boyacá, Caldas, Casanare, Cauca, Chocó,

Cundinamaraca, Huila, La Guajira, Magdalena, Meta, Nariño, Norte de Santander, Putumayo, Quindío, Risaralda, Santander, Tolima, Valle, Gorgona Is.), NW Venezuela (Aragua, Barinas, Carabobo, Distrito Federal, Falcón, Mérida, Lara, Mérida, Miranda, Portuguesa, Táchira, Trujillo, Yaracuy, Zulia) and W Ecuador (Esmeraldas, Guayas, Loja, Manabi, Pichincha), NSL–2750 m.

Sources: Dunn, 1944, E.H. Taylor, 1951, Roze, 1966a, Test et al., 1966, Savage & Vial, 1974, Miyata, 1980, Roux-Estève, 1983, Villa, 1984, Mijares-Urrutia & Arends, 1993, Villa et al., 1988, N.J. Silva, 1993, Lamar, 1997, Markezich, 2002, Savage, 2002, Navarrete et al., 2009 and Rojas-Morales, 2012b.

Remarks: Supplemental original description in Jan (1859: pl. a, fig. no. 1). Confusion exists about the type locality. The type was collected by Goudot, who lived in Bogotá, Colombia. David & Ineich (1996: 146) listed the type locality as Río Sucio (or Río Senio), Chocó Dept., Colombia. In discussing the coloration of the type, Duméril et al. (1854b: 1221) used the terms "*rio-sucio ou senio,*" which appear to refer to the snake's morphology. *Micrurus multifasciatus* a valid species *fide* Roze, 1996, David & Ineich, 1996, and J.A. Campbell & Lamar, 2004 but a synonym *fide* Savage (2002: 713).

M

47. *Micrurus multiscutatus* Rendahl & Vestergren, 1940. Arkiv Zool. 33A(1): 9, figs. 3b, 4.

Type: Holotype, NHR 3131A, an 842 mm female (K. von Sneidern, 1937).

Type locality: "Colombia, Cauca, El Tambo. A village situated 20 km west of Popayan on the eastern slopes of the western Cordilleras at an altitude of 1745 m and on the watershed between the Rio Cauca and the Rio Patia" [= 2°27'N, 76°48'W].

Distribution: Western Colombia (Cordillera Occidental of Cauca), 150–1745 m.

Remarks: A synonym of *M. mipartitus fide* Savage (2002: 713).

48. *Micrurus narduccii* (Jan, 1863a). Arch. Zool. Anat. Fis. 2(2): 222. (*Elaps narduccii*)

Synonym: *Elaps melanotus* W.C.H. Peters, 1881a.

Type: Holotype, formerly MSNM, a 440 mm male, destroyed in 1943 during World War II.

Type locality: "Bolivia." Restricted to vicinity of Buenavista, Santa Cruz Prov., Bolivia *fide* Roze & Bernal-Carlo (1988: 590).

Distribution: Northwestern South America. Southeastern Colombia (Putumayo), E Ecuador (Morona-Santiago, Napo, Pastaza), NE Peru (Amazonas, Loreto, Madre de Dios, San Martín), E Bolivia (Cochabamba, Santa Cruz) and NW Brazil (Acre, ? Amazonas), 130–1300 m.

Sources: Duellman, 1978, Fugler & Riva, 1990 and Visinoni, 1996.

Remarks: Jan (1863b) erroneously cited as original description *fide* Roze & Bernal-Carlo (1988: 590, 607). Colombian records discussed by Campbell & Lamar (1989: 134).

49. *Micrurus nattereri* K.P. Schmidt, 1952. Fieldiana: Zool. 34(4): 27–29. (*Micrurus surinamensis nattereri*)

Type: Holotype, SMF 20708, a 460 mm female (G. Hübner, 1895).

Type locality: "between Guaramoca and San Fernando, Venezuela" (in error). Corrected to between Guaramaco and San Fernando de Atabapo in upper Orinoco River, Amazonas Terr. and Bolívar State, Venezuela *fide* Hoge & Lancini (1962: 12) [latter locality = W Amazonas Terr., S Venezuela, 4°03'N, 67°42'W, elevation 90 m].

Distribution: Western Amazonia. Eastern Colombia (Cundinamarca), SW Venezuela (Amazonas, Apure, Bolívar) and NW Brazil (Amapá, Maranhão), 50–250 m.

Sources: Hoge & Lancini, 1960b, Passos & Fernandes, 2005 and Navarrete et al., 2009.

Remarks: Previously a subspecies of *M. surinamensis.*

50. *Micrurus nebularis* Roze, 1989. Amer. Mus. Novit. (2932): 9–10, fig. 5.

Type: Holotype, AMNH 103118, a 557 mm male (B. Hallberg, 13 July 1968).

Type locality: "Vivero Rancho Teja, 3 km east of Ixtlán de Juárez, Oaxaca, Mexico, 2370 m," (partially in error). Corrected to elevation of 2255 m *fide* Roze (1996: 201).

Distribution: Southern Mexico (Sierra de Juárez in cen. Oaxaca), 1585–2255 m.

Sources: J.A. Campbell, 2000 and Canseco-Márquez & Campbell, 2003.

51. *Micrurus nigrocinctus* (Girard, 1854). Proc. Acad. Nat. Sci. Philadelphia (1854–1855) 7(6): 226. (*Elaps nigrocinctus*)

Synonyms: *Elaps divaricatus* Hallowell, 1854a, *Elaps melanocephalus* Hallowell, 1861 *(nomen praeoccupatum), Micrurus nigrocinctus zunilensis* K.P. Schmidt, 1932a, *Micrurus nigrocinctus mosquitensis* K.P. Schmidt, 1933c, *Micrurus nigrocinctus coibensis* K.P. Schmidt, 1936c, *Micrurus nigrocinctus wagneri* Mertens, 1941b, *Micrurus nigrocinctus ovandoensis* K.P. Schmidt & Smith, 1943, *Micrurus pachecoi* E.H. Taylor, 1951, *Micrurus nigrocinctus ovadoensis* – Alvarez del Toro, 1960 *(nomen incorrectum),* and *Micrurus nigrocinctus babaspul* Roze, 1967.

Type: Lectotype, USNM 7347, a 737 mm female (J.M. Gilliss, 1842–1853), designated by Roze (1996: 202).

Type locality: "Taboga Island, Panama" [= Taboga Is., Bay of Panama, Panama Prov., Panama, bet. 8°47–48'N,

79°32–34'W] via lectotype selection. Emended to Taboga, on the bay of Panama, Central America *fide* Girard (1855: 211),

Distribution: Southeastern Mexico, Central America and ext. NW South America. Southeastern Mexico (S Chiapas, ext. SE Oaxaca), S Belize (Belize, Cayo, Orange Walk, Stann Creek), S and cen. Guatemala (Escuintla, Jutiapa, Retalhuleu, San Marcos, Santa Rosa, Suchitepequez), Honduras (Atlántida, Choluteca, Colón, Comayagua, Copán, Cortés, El Paraíso, Francisco Morazán, Gracias a Dios, Olancho, Valle, Yoro), S El Salvador (Ahuachapán, Cabañas, Cuscatlán, La Libertad, Morazán, Santa Ana, San Salvador, Sonsonate), Nicaragua (Atlántico Norte, Atlántico Sur, Boaco, Chinandega, Chontales, Granada, Jinotega, León, Managua, Masaya, Matagalpa, Nuevo Segovia, Río San Juan, Rivas, Zelaya, Corn, Great Corn and Ometepe Is.), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, San José, Puntarenas), Panama (Bocas del Toro, Canal Zone, Chiriquí, Coclé, Colón, Darién, Herrera, Panamá, San Jose, Veraguas, Barro Colorado, Coiba, Gigante, San Miguel and Taboga Is.) and ext. NW Colombia (Antioquia, Magdalena), NSL–1600 (2000) m.

Sources: Girard, 1855, K.P. Schmidt, 1936c, E.H. Taylor, 1951, 1954, Landy et al., 1966, R.W. Henderson & Hoevers, 1975, Villa, 1984, L.D. Wilson & Meyer, 1985, Villa et al., 1988, Lee, 1998, 2000, J.A. Campbell, 1998b, G. Köhler, 1999b, Stafford, 2000a, Savage, 2002, G. Köhler et al., 2005, McCranie et al., 2006 and McCranie, 2011a.

Remarks: Supplemental description and original illustration in Girard (1855: 210–211, pl. 25, figs. 1–6). Colombian records of Providencia Is. (Dunn, 1945: 365) and Chocó Dept. (Pérez-Santos, 1986: 783) doubtful *fide* J.A. Campbell & Lamar (1989: 135).

52. *Micrurus obscurus* (Jan, 1872 *in* Jan & Sordelli, 1870–1881). Icon. Gén. Ophid. 3(41): 5, pl. 6, figs. 3, 3a–b, d–e, g, n, p, r, v. (*Elaps corallinus obscura*)

Synonyms: *Elaps heterozonus* W.C.H. Peters, 1881 and *Elaps princeps* Boulenger, 1905b.

Type: Holotype, formerly MSNM, destroyed in 1943 during World War II.

Type locality: "Lima" [Peru] (in error). Corrected to E Peru *fide* K.P. Schmidt & Walker (1943a: 294). Restricted to Iquitos, Peru [= E Loreto Dept., NE Peru, 3°45'S, 73°15'W, elevation 90 m] *fide* KP. Schmidt (1953c: 175).

Distribution: Southeastern Colombia (Amazonas, Caquetá, Meta, Putumayo, Vaupés, Vichada), Ecuador (Morona-Santiago, Napo, Pastaza), E Peru (Huanuco, Loreto, Madre de Dios, Pasco), NE Brazil (Amazonas) and Bolivia (Beni, La Paz, Pando, Santa Cruz), 100–600 m.

Sources: Silva Haad, 1994, Harvey et al., 2003 and Duellman, 2005.

53. *Micrurus oligoanellatus* Ayerbe-González & López-López, 2005. Noved. Colomb. 8(1), 42–43, fig. 1.

Synonym: *Micrurus oligoanellatus* Ayerbe & López, 2002 *(nomen ineditum).*

Type: Holotype, MHNUC HE-357-Se (formerly CSA 349), a 625 mm female (C.E. González-Orozco, 6 Oct. 2000).

Type locality: "la trocha entre El Cocal y la Reserva Natural Tambito, Municipio de El Tambo, Departamento del Cauca, Colombia a 1300 metros de altura sobre el nivel del mar en el costado Oeste de la Cordillera Occidental, 2° 35' N; 77° 03' W" [Colombia].

Distribution: Northwestern Colombia (Cauca), 1000–1500 m. Known only from type locality.

Remarks: Original description in Ayerbe & López, 2002. Mem. II Symp. Ivest. Cien. Biol., Dept. Biol., Univ. Cauca, Asoc. Colombia Cien. Biol., Capitulo Popayán (12): 2 pp., 1 fig.

54. *Micrurus ornatissimus* (Jan, 1858b). Rev. Mag. Zool. (2)10: 516, 521–522. (*Elaps ornatissimus*)

Synonym: *Elaps buckleyi* Boulenger, 1896a.

Type: Holotype, formerly MSNM, a 550 mm male, destroyed in 1943 during World War II.

Type locality: "Amérique centrale" [= Central America] (in error). Emended to ? Mexico *fide* Jan & Sordelli (1872 *in* 1870–1881: 5) (also in error *fide* K.P. Schmidt, 1936b: 191). Restricted to Amazon Basin *fide* K.P. Schmidt (1936b: 191), Río Putumayo, Colombia *fide* K.P. Schmidt (1955a: 345) and Ecuador or Peru *fide* Cunha & Nascimento (1982c: 8).

Distribution: Northwestern Amazonia. Southeastern Colombia (Amazonas, Vaupés), E Ecuador (Morona-Santiago, Napo, Pastaza, Zamora-Chinchipe) and N Peru (Loreto, ? Madre de Dios), 500–1200 m.

Sources: K.P. Schmidt, 1955a, J.A. Peters, 1960a, Dixon & Soini, 1978, 1986, Fugler & Walls, 1978, Cunha & Nascimento, 1982c and Silva Haad, 1994.

Remarks: Supplemental original description in Jan (1859e: pl. a, fig. no. 3). A subspecies of *M. langsdorffi* Wagler *fide* Roze (1983: 328), J.A. Campbell & Lamar (1989: 125) and Golay et al. (1993: 172).

55. *Micrurus pacaraimae* Carvalho, 2002. Pap. Avul. Zool. 42(8): 184–185, figs. 1–4.

Type: Holotype, MZUSP 8565, a 355 mm male (C.M. Carvalho, 10 Jan. 1985).

Type locality: "Brasil: Vila Pacaraima: Rodovia BR-174 na fronteira com a Venezuela (04°31'N, 61°09'W)."

Distribution: Northwestern Brazil (Roraima), 30–40 m.

56. *Micrurus pachecogili* J.A. Campbell, 2000. Proc. Biol. Soc. Washington 113(1): 292–293, figs. 1–2.

Type: Holotype, UTA 12546 (formerly JAC 9752), a 639 mm male (E. Pacheco-Gil, Nov. 1983).
Type locality: "5.6 km SSW Zapotitlán, Salinas, 1494 m, Puebla, Mexico" [= 18°18'N, 97°31'W].
Distribution: Southern Mexico (N Oaxaca and SE Puebla), 620–1540 m.
Source: Canseco-Marquez & Campbell, 2003.

57. *Micrurus paraensis* Cunha & Nascimento, 1973. Publ. Avul. Mus. Para. Emílio Goeldi 20: 276–278, fig. 1. (*Micrurus psyches paraensis*) (*nomen corrigendum*)

Synonyms: *Micrurus psiches paraensis* Cunha & Nascimento, 1973 (*nomen incorrigendum*) *Micrurus donosoi* Hoge, Cordeiro & Romano-Hoge, 1979 and *Micrurus paraensis debruini* Abuys, 1987b.
Type: Holotype, MPEG 851, a 460 mm male (O.R. da Cunha & F.P. do Nascimento, 1971).
Type locality: "Icoaraci, Belém, Pará, Amazonia" [= Icorací, Belém, Pará State, N Brazil, 1°18'S, 48°28'W, elevation 15 m].
Distribution: Northern Brazil (W Maranhão, SW Mato Grosso, Pará, Rondônia) and S Suriname (Nickerie), NSL–400 m.
Sources: Hoge et al., 1978c, Hoge & Romano-Hoge, 1981b, Cunha & Nascimento, 1982, 1993, Nascimento et al., 1987, 1988, N.J. Silva, 1993, Roze, 1994, Strussmann & André de Carvalho, 1998 and Feitosa et al., 2007.

M

58. *Micrurus peruvianus* K.P. Schmidt, 1936b. Field Mus. Nat. Hist. (Zool.) 20(19): 193.

Type: Holotype, MCZ 17385, a 412–415 mm male (G.K. Noble [Harvard peru. Exped.], 22 Aug.–16 Sept. 1916).
Type locality: "Perico, Department of Cajamarca, Peru" [= Perico, Cajamarca Department, NW Peru, 05º20'S, 78º47'W, elevation 500 m].
Distribution: Northern Peru (Amazonas, Cajamarca) and S Ecuador, 450–1500 m.
Sources: Duellman, 1979 and Kuch et al., 2002.

59. *Micrurus petersi* Roze, 1967. Amer. Mus. Novit. (2287): 45–46, fig. 16. (*Micrurus steindachneri petersi*)

Type: Holotype, USNM 158295, a 667 mm female (J.A. Peters, 1 Aug. 1962).
Type locality: "One mile south of Plan de Milagro on the trail to Pan de Azúcar, Morona-Santiago, Province, Ecuador, 5600 feet."
Distribution: Andes of SE Ecuador (Morona-Santiago), 1000–1705 (2800) m.
Remarks: Possibly occurs in Colombia and Peru *fide* J.A. Campbell & Lamar (2004: 187).

60. *Micrurus proximans* H.M. Smith & Chrapliwy, 1958. Herpetologica 13(4): 270–271. (*Micrurus diastema proximans*)

Type: Holotype, UIMNH 40369, a 420 mm female (W.H. Davis, W.Z. Lidicker & J.R. Winklemann, 16 July 1956).
Type locality: "4 mi. NE San Blas, Nayarit, Mexico."
Distribution: Western Mexico (Colima, Nayarit), NSL–1900 m.
Sources: Zweifel, 1959b, Nordgren & Villa, 2011 and Reyes-Velasco et al., 2012.

61. *Micrurus psyches* (Daudin, 1803e). Hist. Nat. Rept. 8: 320–321, pl. 100, fig. 1. (*Vipera psyches*)

Type: Holotype, not designated, a 244 mm male (F. Levaillant, 1765–1780, via Dufresne coll.), location unknown.
Type locality: "intérieur de la colonie de Suriname" [interior of Suriname].
Distribution: Northern South America. Eastern Venezuela (Bolívar, Monagas, Sucre), Trinidad and Tobago (Trinidad: Gaspar Grande Is.), Guyana (Essequibo Islands-West Demerara, Potaro-Siparuni), Suriname (Brokopondo, Marowijne, Nickerre, Para, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni) and N Brazil (Amapá), NSL–500 m. Probably Roraima, Brazil *fide* J.A. Campbell & Lamar (1989: 139).
Sources: Beebe, 1946, Roze, 1966a, 1994, Emsley, 1977, Boos, 1983a–b, Roux-Estève, 1983, Pérez-Santos, 1986, Abuys, 1987c, Chippaux, 1987, Starace, 1998, C. Molina et al., 2002, Navarrete et al., 2009 and C.J. Cole et al., 2013.
Remarks: MNHN 7654, a 490 mm female, long considered the type, is not Daudin's specimen *fide* Roux-Estève (1983: 91–92); MNHN file card has "type" crossed out and notation "seen by Duméril, not Daudin's type."

62. *Micrurus putumayensis* Lancini, 1962b. Publ. Ocas. Mus. Cien. Nat. Caracas (Zool.) (3): 1. (*nomen substitutum*)

Synonym: *Micrurus schmidti* Lancini, 1962a (*nomen praeoccupatum*).
Type: Holotype, AMNH 110058 (formerly MCNC 1117), a 624 mm female (J. Cáceres, March 1959).
Type locality: "Puerto Socorro (a 270 Km. NE. de Iquitos), Rio Putumayo, Departamento de Loreto, República del Perú."
Distribution: Northwestern Amazonia. Southeastern Colombia (S Amazonas, Putumayo), NE Peru (N Loreto) and NW Brazil (W Amazonas), NSL–300 m.
Sources: Lancini, 1962a, Lema, 1972 and Dixon & Soini, 1986.
Remarks: Original description in Lancini (1962a: 1–3, 1 fig.). Photograph of holotype in Roze (1996: fig. 60). Roze (1983: 334) cited date as 1963. Roze (1996: 210)

and J.A. Campbell & Lamar (2004: 190) erroneously listed holotype as AMNH 1100058.

63. *Micrurus pyrrhocryptus* (Cope, 1862d). Proc. Acad. Nat. Sci. Philadelphia 14(5): 347. (*Elaps pyrrhocryptus*)

Synonyms: *Elaps simonsii* Boulenger, 1902c and *Micrurus tricolor* Hoge, 1957.

Type: Holotype, ANSP 5395 (T.J. Page [Paraguay Exped.], 1853–1856), lost *fide* N.J. Silva & Sites (1999: 174).

Type locality: "Parana, Paraguay, Vermejo and Uruguay Rivers, Paraguay." Restricted to Vermejo River, Argentine Chaco *fide* K.P. Schmidt (1936b: 199). Emended to Río Bermejo *fide* Scrocchi (1990b: 358).

Distribution: Southern South America. Southeastern Brazil (Mato Grosso), Bolivia (Chuquisaca, Santa Cruz, Tarija), N Paraguay (Alto Paraguay, Boquerón) and Argentina (Catamarca, Chaco, Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, La Pampa, La Rioja, Mendoza, Neuquén, Rio Negro, Salta, San Juan, San Luis, Santa Fé, Santiago del Estero, Tucumán), 100–600 m.

Sources: Page, 1859, Scrocchi, 1990b, Cei, 1994, Roze,1994, N.J. Silva & Sites, 1999, 2001, Leynaud & Bucher, 1999, Giraudo & Scrocchi, 2002, Di-Bernardo et al., 2007 and Cacciali, 2008.

Remarks: Illustrations of the holotype of *M. tricolor* in N.J. Silva & Sites (1999: fig. 31). *Micrurus tricolor* a synonym *fide* Harvey et al. (2003: 28).

64. *Micrurus remotus* Roze, 1987. Rev. Fr. Aquar. 14(3): 110, fig. 1. (*Micrurus psyches remotus*)

Type: Holotype, USNM 266100, a 491 mm male (R.W. McDiarmid, 6 Feb. 1985).

Type locality: "Base Camp of Cerro de la Neblina, Territorio Federal Amazonas, Venezuela, 0°55'N, 66°10'W, 90 m."

Distribution: Western Amazonia. Eastern Colombia (Guaínia, Vaupés), S Venezuela (Amazonas) and N Brazil (N Amazonas), 90–1700 m.

Sources: Roze, 1994 and Navarrete et al., 2009.

65. *Micrurus renjifoi* (Lamar, 2003). Rev. Biol. Trop. 51(3–4): 806–808, 2 col. figs. (*Leptomicrurus renjifoi*)

Type: Holotype, UTA 3490, a 427 mm gravid female (F. Barney, Aug. 1969).

Type locality: "the south side of the Río Tomo, near its juncture with the Río Orinoco, 97 km SSW of Puerto Carreño, Commisaría del Vichada, Colombia, 115 m."

Distribution: Colombia (Vichada), 115 m. Known only from vicinity of type locality.

66. *Micrurus ruatanus* (A.C.L.G. Günther, 1895 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 185, pl. 57, fig. b. (*Elaps ruatanus*)

Type: Lectotype, BMNH 1946.1.21.20 (G.F. Gaumer, 1886, via O. Salvin & F.D. Godman), designated by Roze (1996: 213).

Type locality: "Roatán Island, Honduras" [16°23'N, 86°30'W] via lectotype selection.

Distribution: Northern Honduras (Islas de la Bahía: Roatán Is.).

Sources: L.D. Wilson & Hahn, 1973, L.D. Wilson, 1984, Luykx et al., 1992, L.D. Wilson et al., 1992, McCranie et al., 2005 and McCranie, 2011a.

67. *Micrurus sangilensis* Nicéforo-María, 1942. Rev. Acad. Colomb. Cien. Exact. Fis. Nat. 5(17): 98–99, pl. 3, fig. 10. (*Micrurus ecuadorianus sangilensis*)

Type: Holotype, MCG 2A, a 545 mm male (R.H. Silvano-Jorge, Aug. 1937).

Type locality: "San Gil, Departamento de Santander, Colombia."

Distribution: Northeast Colombia (Boyacá, Cundinamarca, Santander), 1020–1735 m.

Sources: K.P. Schmidt, 1955a, Pérez-Santos, 1986 and Pérez-Santos & Moreno, 1988.

68. *Micrurus scutiventris* (Cope, 1870). Proc. Amer. Philos. Soc. (1869–1870) 11(81): 156–157. (*Elaps scutiventris*)

Synonyms: *Leptomicrus schmidti* Hoge & Romano-Hoge, 1966 *(nomen incorrigendum), Leptomicrurus schmidti* Hoge & Romano-Hoge, 1966 *(nomen praeoccupatum),* and *Micrurus karlschmidti* Romano-Hoge, 1972 (*nomen substitutum*).

Type: Holotype, ANSP 6801, a 445 female (J. Orton, 1867–1870).

Type locality: "Pebas on the Amazon in Equador" [= Pebas, Loreto Dept., NE Peru, 3°19'S, 71°52'W, elevation 100s m].

Distribution: Northwestern South America. Southeastern Colombia (Amazonas, Vaupés, Vichada), E Ecuador (Pastaza), NE Peru (Amazonas, Loreto) and NW Brazil (Amazonas), 80–1200 m.

Source: Roze & Bernal-Carlo, 1988.

69. *Micrurus serranus* Harvey, Aparicio & Gonzalez, 2003. Ann. Carnegie Mus. 72(1): 34–41, figs. 6a, 6c, 13.

Type: Holotype, UTA 34561 (formerly MBH 1960), a 514 mm male (M.B. Harvey, 14 Feb. 1992).

Type locality: "3 km N of Samaipata on the road to Mairana, Florida Province, Santa Cruz, Bolivia."

Distribution: Bolivia (Chuquisaca, Cochabamba, Potosí, Santa Cruz, Tarija), 1200–2750 m.

Source: Muñoz-Saravia et al., 2009.

70. *Micrurus silviae* Di-Bernardo, Borges-Martins & Silva, 2007. Zootaxa (1447): 1–17, figs. 1–2, 7.

Type: Holotype, CRUPF 1488, a 1113 mm male (V.L. Mello de Paulo, 21 March 2005).
Type locality: "Passo Fundo Municipality, Miranda Stream (within the drainage basin of the Companhia Riograndense de Saneamento—CORSAN dam), in the W-NW of Rio Grande do Sul, southern Brazil."
Distribution: Southern Brazil (Rio Grande do Sul) and Paraguay (Itapúa), 120–740 m.
Source: Cacciali et al., 2011.

71. *Micrurus spixii* Wagler in Spix, 1824. Serp. Brasil. Sp. Nov.: 48–49, pl. 18.

Synonyms: *Elaps ehrhardti* L. Müller, 1926 and *Micrurus spixii martiusi* K.P. Schmidt, 1953c.
Type: Holotype, ZSM 209/0, an 1142 mm male (J.B. von Spix, Nov. 1819–Feb. 1820).
Type locality: "ad flumen Solimöens" [= Río Solimões or upper Amazon River, bet. mouth of Río Negro and Peruvian border, Amazonas State, NW Brazil].
Distribution: Amazonia. Southern Venezuela (Amazonas), Brazil (Amazonas, Bahia, N Goiás, W Maranhão, Mato Grosso, Pará, Rondônia, Marajo Is.), cen. Bolivia (Beni, Santa Cruz) and N Paraguay, 50–1200 m.
Sources: J.C. Thompson, 1913c, Roze, 1966a, Cunha & Nascimento, 1978, 1993, Hoogmoed & Gruber, 1983, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, Fugler & Riva, 1990, Henle & Ehrl, 1991, N.J. Silva, 1993, Morales & McDiarmid, 1996, N.J. Silva & Sites, 2001, Lehr, 2001 and Navarrete et al., 2009.
Remarks: Official Specific Name no. 2780 *fide* Opinion 1201 (ICZN, 1982a). Photograph of the type of *Elaps ehrhardti* in Franzen & Glaw (2007: fig. 21). Possibly occurs in W Guyana, S Suriname, SE French Guiana and Acre, Brazil *fide* J.A. Campbell & Lamar (2004: 228).

72. *Micrurus spurrelli* (Boulenger, 1914b). Proc. Zool. Soc. London 82 (2): 817, pl. 2, figs. 3–3a. (*Elaps spurrelli*)

Synonyms: *Micrurus nicefori* K.P. Schmidt, 1955a, and *Elaps spurelli* – Rize, 1983 *(nomen incorrectum).*
Type: Holotype, BMNH 1946.1.17.19, a 230 mm female (H.G.F. Spurrell, 1913–1914).
Type locality: "at or near Peña Lisa, Condoto, Choco, Colombia" [= Peña Lisa, Río Condoto, S Chocó, W Colombia, ca. 5°06'N, 76°42'W, elevation 100 m].
Distribution: Extreme W Colombia (S Chocó), NSL–400 m. Known only from vicinity of type locality.
Source: Pérez-Santos & Moreno, 1988.

73. *Micrurus steindachneri* (F. Werner, 1901a). Verh. Zool.-Bot. Ges. Wien 51: 599. (*Elaps steindachneri*)

Synonyms: *Elaps fasslii* Steindachner *in* F. Werner, 1927 and *Micrurus steindachneri orcesi* Roze, 1967.
Type: Holotype, NMW 15750, an 800 mm male (R. Haensch, 1899–1900).
Type locality: "Ecuador."
Distribution: Central Ecuador (W Morona-Santiago, W Napo, W Pastaza, Tungurahua) and Peru (Amazonas), 600–2000 m.
Sources: Roze, 1970, 1983, Duellman, 1979 and Tiedemann & Häupl, 1980.

74. *Micrurus stewarti* T. Barbour & Amaral, 1928. Bull. Antivenin Inst. Amer. 1(4): 100.

Synonym: *Micrurus schmidti* Dunn, 1940.
Type: Holotype, MCZ 24924, a 380–382 mm male (T.H. Stewart, Jr., 1926).
Type locality: "inland from Nombre de Dios, Serrania de la Bruja, Republic of Panama, approximate altitude 1200 meters" [= S of Nombre de Díos (9°34'N, 79°28'W, elevation 20 m)in the Serrania de la Bruja (which rises to 800 m), E Colón Province, cen. Panama].
Distribution: Central Panama (Boca del Toro, ext. E Coclé, E Colón. ext. W Panamá), 100–1200 m.
Source: Villa et al., 1988.
Remarks: Holotype erroneously reported as a female *fide* Barbour & Amaral (1928: 100).

75. *Micrurus stuarti* Roze, 1967. Amer. Mus. Novit. (2287): 47–48, fig. 17.

Type: Holotype, UMMZ 106708, a 593 mm male (L.C. Stuart, 15 May–30 June 1952).
Type locality: "Finca La Paz, San Marcos, Guatemala, 1345 meters."
Distribution: Southwestern Guatemala (San Marcos, Suchitepéquez), 800–1600 m.
Sources: Villa et al., 1988 and J.A. Campbell & Vannini, 1989.
Remarks: Possibly occurs in Mexico (Chiapas) and Guatemala (Escuintla) *fide* J.A. Campbell & Lamar (1989: 150).

76. *Micrurus surinamensis* (Cuvier, 1817). Règne Anim. 2: 84. (*Elaps surinamensis*)

Synonyms: *Coluber cinctus* Lacépède, 1789 (*nomen rejiciendum*), *Coluber melaleucus* Gravenhorst, 1807 (*nomen oblitum*), *Vipera anguiformis* Kuhl, 1820, *Elaps grandis* Wagler, 1825 (*nomen ineditum*), *Elaps scutelliger* Wagler, 1825 (*nomen ineditum*), and *Elaps zenega* Wagler, 1825 (*nomen ineditum*).
Type: Lectotype, MNHN 3926, an 862 mm male (F. Levaillant, 1765–1780), designated by K.P. Schmidt (1952: 26).
Type locality: "Suriname," via lectotype selection.

Distribution: Northern South America. Southeastern Colombia (Amazonas, Caquetá, Meta, Putumayo, Vaupés), Guyana (Cuyuni-Mazaruni, Portaro-Siparuni, Upper Demerara-Berbice, Upper Demerara-Upper Essequibo), Suriname (Marowijne, Para, Paramaribo, Saramacca), French Guiana (Caquita, Cayenne, Putumayo, St. Laurent du Moroni), NW Brazil (Acre, Amazonas, Goias, Mato Grosso, Pará, Rondônia, Roraima), E Ecuador (Morona-Santiago, Napo, Pastaza), E Peru (Amazonas, Loreto, Madre de Dios, Pasco) and N Bolivia (Beni, Cochabamba, Pando, Santa Cruz), 30–575 m.

Sources: K.P. Schmidt, 1952, Roze, 1955, Hoge, 1958d, Cunha & Nascimento, 1978, Parent, 1982, Roux-Estève, 1983, Dixon & Soini, 1986, Pérez-Santos, 1986, Abuys, 1987a, Chippaux, 1987, Pérez-Santos & Moreno, 1988, 1991, Fugler & Riva, 1990, Rodriguez & Cadle, 1990, N.J. Silva, 1993, Silva Haad, 1994, Starace, 1998, N.J. Silva & Sites, 2001, Harvey et al., 2003, Duellman, 2005, Passos & Fernandes, 2005, Morata et al., 2011 and C.J. Cole et al., 2013.

Remarks: Original description based on Seba (1735: 91, pl. 86, fig. 1). In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Elaps surinamensis* Cuvier is designated a *nomen protectum* and *Coluber melaleucus* Gravenhorst a *nomen oblitum*. A record from Chacó, Colombia requires confirmation.

77. *Micrurus tamaulipensis* Lavin-Murcio & Dixon, 2004. Phyllomedusa 3(1): 4–5, fig. 1.

Type: Holotype, ITT 751, a 602–632 mm male (P.A. Lavin-Murcio, April 2002).

Type locality: "Sierra de Tamaulipas, Rancho La Sauceda, ca. 50 km N Gonzales, 750–1000 m elevation, (23°06'47"N, 98°20'19"W), Tamaulipas, Mexico."

Distribution: Northeastern Mexico (Tamaulipas), 750–1000 m.

78. *Micrurus tener* (Baird & Girard, 1853). Cat. No. Amer. Rept., Serp. 1: 22–23. (*Elaps tenere*)

Synonyms: *Elaps tristis* Baird & Girard, 1853, *Elaps fitzingeri* Jan, 1858b & 1859, *Micrurus fitzingeri microgalbineus* B.C. Brown & Smith, 1942, *Micrurus fulvius maculatus* Roze, 1967, *Micrurus fulvius microgalbineos* – Possani, Varela-Julía, Alagon, Julía-Zertuche & Fletcher, 1978 *(nomen incorrectum),* and *Micrurus fulvius macrogalbineus* – Harding & Welch, 1980 *(nomen incorrectum).*

Type: Lectotype, USNM 1119, an adult female (J.H. Clark [U.S. Mex. Bound. Surv.], 1850–1852 via J.D. Graham), designated by Roze & Tilger (1983: 316.2).

Type locality: "San Pedro of Rio Grande" [= San Pedro on Rio Grande River, Cameron Co., ext. S Texas, S USA] via lectotype selection.

Distribution: Southern USA (SW Arkansas, W Louisiana, E Texas) and Mexico (NE Coahuila, Colima, N Guanajuato, Hidalgo, Morelos, NE Nuevo León, Pueblo, Querétaro, San Luis Potosí, Tamaulipas), NSL–2000 m.

Fossil records: Middle/upper Pleistocene (Irvingtonian II) of USA (Texas), and upper Pleistocene (Rancholabrean II) of USA (Texas).

Sources: Tennant, 1984, 1895, Benitez-Gálvez, 1997, Conant & Collins, 1998, Holman, 2000a, Werler & Dixon, 2000, Reyes-Velasco et al., 2009, Ramírez-Bautista et al., 2010 and Ernst & Ernst, 2011.

Remarks: Type locality restriction to New Braunfels, Comal County, Texas, USA *fide* H.M. Smith & Taylor (1950a: 361) invalid. Possibly occurs in N Veracruz *fide* Pérez-Higareda & Smith (1991: 74). Records from Distrito Federal, México and Michoacán, Mexico are in error *fide* J.A. Campbell & Lamar (2004: 196).

79. *Micrurus tschudii* (Jan, 1858b). Rev. Mag. Zool. (2)10: 517, 524–525. (*Elaps tschudii*)

Synonym: *Micrurus olssoni* K.P. Schmidt & Schmidt, 1925.

Type: Holotype, NMW 18284, a 310 mm specimen (I. Pfeiffer, 1856).

Type locality: "Pérou" [= Peru]. Restricted to the Rimac Valley, Department of Lima, Peru *fide* K.P. Schmidt & Walker (1943: 320).

Distribution: Extreme SW Ecuador (Loja) and ext. W Peru (Ancash, Apurimac, Cajamarca, La Libertad, Lambeyeque, Lima, Piura, Tumbes), NSL–1455 m.

Sources: K.P. Schmidt, 1925c, 1936b and Pérez-Santos & Moreno, 1991.

Remarks: Supplemental original description in Jan (1859e: pl. b, fig. no. 2). Possibly occurs in NW Bolivia *fide* J.A. Campbell & Lamar (1989: 153). Roze (1996: 224) and Campbell & Lamar (2004: 232) erroneously reported the type to be unknown and apparently lost.

MIMOPHIS A.C.L.G. Günther, 1868 (Psammophiidae)

Synonym: *Mimorphis* – Maass-Berlin, 1933 *(nomen incorrectum).*

Type species: *Psammophis mahfalensis* Grandidier, 1867.

Distribution: Madagascar.

Sources: A.C.L.G. Günther, 1868, Boulenger, 1896a, Jourdran, 1904, Mocquard, 1909, Guibé, 1958, Brygoo, 1983, Glaw & Vences, 1994, Brandstätter, 1995, Henkel & Schmidt, 2000, Vidal & Hedges, 2002, Aprea et al., 2003, Nagy et al., 2003, Vidal et al., 2008, Kelly et al., 2009 and Zaher et al., 2009.

1. *Mimophis mahfalensis* (Grandidier, 1867). Rev. Mag. Zool. (2)19: 234. (*Psammophis mahfalensis*)

Synonyms: *Mimophis madagascariensis* A.C.L.G. Günther, 1868 and *Mimophis mahafalensis albiceps* Jourdran, 1904.
Types: Syntypes (2), MNHN 1459 and MNHN 1716 (A. Grandidier, 1866).
Type locality: "Machikova et Anhoulabé, la côte sud-ouest de Madagascar" [= Machikova and Anhoulabé, Toliara Prov., SW coast of Madagascar].
Distribution: Madagascar (Antsiranana, Atananarivo, Fianarantsoa, Mahajanga, Toamasina, Toliara), NSL–600 m.

†*MIOCOLUBER* Parmley, 1988 (Colubridae)

Type species: †*Miocoluber dalquesti* Parmley, 1988.
Distribution: Upper Miocene of USA.
Sources: Parmley, 1988 and Holman, 2000a.

1. †*Miocoluber dalquesti* Parmley, 1988. J. Vert. Paleont. 8(3): 324–325, figs. 3a–e.

Type: Holotype, MSUVP 1209, one trunk vertebra (W.W. DalOuest).
Type locality: "Higgins Quarry B, locality 24-B of Reed and Longnecker (1932); center, S1/2, SE1/4, Sec. 176, Bld. 43 of Houston and Texas Central Railroad Survey; approximately 3 km south and 1.6 km east of Higgins, Lipscomb County, Texas."
Distribution: Upper Miocene (Hemphillian: 4.9–10.3 mya) of USA (Texas). Known only from type locality.

†*MIONATRIX* Sun, 1961 (Natricidae)

Type species: †*Mionatrix diatomus* Sun, 1961.
Distribution: Middle Miocene of China.
Source: Rage, 1984b.
Remarks: Similar to *Natrix fide* Rage, 1884b.

1. †*Mionatrix diatomus* Sun, 1961. Vert. Palasiat. 1961(4): 309, 312, figs. 1–2, pls. 1–2.

Types: Syntypes (2), IVPP V.993, a 650–700 mm imprint of a complete skeleton, and IVPP V.994, a 1000 mm imprint of axial skeleton.
Type locality: "Miocene diatomaceous beds of Shanwang, Shantung, China."
Distribution: Middle Miocene (16.0–18.0 mya) of China. Known only from type specimens.

MITOPHIS Hedges, Adalsteinsson & Branch *in* Adalsteinsson, Branch, Trape, Vitte & Hedges, 2009 (Leptotyphlopidae)

Type species: *Leptotyphlops pyrites* R. Thomas, 1965a.
Distribution: Hispaniola.
Sources: Hahn, 1980a, A. Schwartz & R.W. Henderson, 1991, Wallach, 1998b, McDiarmid et al., 1999 and R.W. Henderson & Powell, 2009.

1. *Mitophis asbolepis* (R. Thomas, McDiarmid & Thompson, 1985). Proc. Biol. Soc. Washington 98(1): 209–210, fig. 4. (*Leptotyphlops asbolepis*)

Type: Holotype, UF 54802, a 156 mm female (F.G. Thompson, 29 Jan. 1976).
Type locality: "west slope of Loma del Aguacate, up the mountainside from La Salina (Puerto Alejandro) on the east side of the Bahia de Neiba, 350 m, Sierra Martín García, Provincia de Barahona, Dominican Republic."
Distribution: Southwestern Dominican Republic (SW Barahona), 350–400 m. Known only from vicinity of type locality.

2. *Mitophis calypso* (R. Thomas, McDiarmid & Thompson, 1985). Proc. Biol. Soc. Washington 98(1): 206–209, figs. 2a, 3 (*Leptotyphlops calypso*)

Type: Holotype, USNM 236659, a 166 mm male (R.W. McDiarmid, 22 Feb. 1975).
Type locality: "6.5 km S Las Galeras, Provincia de Samaná, Dominican Republic" [= ca. 19°15'N, 69°12'W, elevation 65 m].
Distribution: Northeastern Dominican Republic (Samaná), 25–65 m. Known only from vicinity of type locality.

3 *Mitophis leptepileptus* (R. Thomas, McDiarmid & Thompson, 1985). Proc. Biol. Soc. Washington 98(1): 211–213, figs. 2b, 5. (*Leptotyphlops leptepileptus*)

Type: Holotype, USNM 236661, a 184 mm female (R. Thomas, 19 July 1978).
Type locality: "valley of the Rivière Soliette, on the north slopes of the Massif de la Selle, 5 km airline NW Fond Verettes, 366 m, Département de l'Ouest, Haiti."
Distribution: Southern Haiti (E Ouest), 365 m. Known only from vicinity of type locality.

4 *Mitophis pyrites* (R. Thomas, 1965a). Breviora (222): 2–4, figs. 1, 2a. (*Leptotyphlops pyrites*)

Type: Holotype, MCZ 77239, a 133 mm specimen (R. Thomas, 3 July 1964).
Type locality: "southern outskirts of the town of Pedernales, approx. 1 km from the center of town,

M

Pedernales Province, Dominican Republic, West Indies" [= 18°02'N, 71°44'W, elevation 10 m].

Distribution: Hispaniola. Southeastern Haiti (SE Sud-Est) and SW Dominican Republic (Independencia, Pedemales), 10–185 m.

Source: R. Thomas et al., 1985.

MIXCOATLUS Jadin, Smith & Campbell, 2011 (Viperidae)

Type species: *Agkistrodon browni* Shreve, 1938.

Distribution: Southern Mexico.

Sources: J.A. Campbell & Lamar, 2004 and Jadin et al., 2011, 2012.

Remarks: Previously in the genera *Cerrophidion* and *Ophryacus*.

1. *Mixcoatlus barbouri* (Dunn, 1919). Proc. Biol. Soc. Washington 32: 213–214. (*Lachesis barbouri*)

Type: Holotype, USNM 46347, a 370 mm specimen (E.W. Nelson & E.A. Goldman, 20 May 1903).

Type locality: "Omilteme, Guerrero, Mexico" [= Omilteme, cen. Guerrero, S Mexico, 17°30'N, 99° 40'W, elevation 2135 m].

Distribution: Southwestern Mexico (Sierra Madre del Sur of cen. Guerrero), 2135–3295 m.

Sources: Shreve, 1938, H.M. Smith, 1941i and J.A. Campbell, 1977, 1988b.

2. *Mixcoatlus browni* (Shreve, 1938). Copeia 1938(1): 9. (*Agkistrodon browni*)

Type: Holotype, MCZ 42678, a 445 mm male (W.W. Brown, 1936).

Type locality: "Omilteme, Guerrero, Mexico" [= Omilteme, cen. Guerrero, S Mexico, 17°30'N, 99° 40'W, elevation 2135 m].

Distribution: Southwestern Mexico (Guerrero), 2135 m.

3. *Mixcoatlus melanurus* (L. Müller, 1924). Mitt. Zool. Mus. Berlin 11(1): 92–93. (*Trimeresurus melanurus*)

Synonyms: *Bothrops melanura* – Amaral, 1930f, *Trimeresurus garciai* H.M. Smith, 1940, *Trimeresurus garciae* – E.H. Taylor, 1944a *(nomen incorrectum),* and *Porthidium melanurum* – J.A. Campbell & Lamar, 1989.

Type: Holotype, ZMB 26403, a 423 mm female (C.A. Purpus, 1897–1923).

Type locality: "Mexico." Restricted to Cacaloapam [= Cacaloapan], Puebla, Mexico *fide* H.M. Smith & Taylor (1950a: 341).

Distribution: Southern Mexico (NW Oaxaca, SE Puebla), 1600–2400 m.

Sources: Casas-Andreu et al., 1996 and Gutberlet, 1998.

MONTASPIS Bourquin, 1991 (Lamprophiidae)

Type species: *Montaspis gilvomaculata* Bourquin, 1991.

Distribution: Southern Africa.

Sources: Bourquin, 1991, Marais, 1992, Branch et al., 1993, Lambiris, 1997, Kelly et al., 2009 and Zaher et al., 2009.

1. *Montaspis gilvomaculata* Bourquin, 1991. Ann. Transvaal Mus. 35(12): 200–202, figs. 1a–c, 2–4.

Type: Holotype, TMP 68088, a 395–412 mm female (D. Tomlinson, Jan. 1980).

Type locality: "Organ Pipes Pass, near the 'The Camel', Cathedral Peak Forest Reserve, Natal, South Africa, 28°00'35" S, 29°11'11" E; at *c.* 2860 m above sea level."

Distribution: Eastern South Africa (Drakensberg of SW KwaZulu-Natal), 1870–2865 m.

MONTATHERIS Broadley, 1996b (Viperidae)

Synonym: *Hindius* A.F.T. Reuss, 1939a (*nomen nudum*).

Type species: *Vipera hindii* Boulenger, 1910b.

Distribution: Kenya.

Sources: Kramer, 1961a, Pitman, 1965, Broadley, 1996b, Herrmann & Joger, 1995, Spawls & Branch, 1995, David & Ineich, 1999, Herrmann et al., 1999, McDiarmid et al., 1999, Spawls et al., 2002, Mallow et al., 2003, Dobiey & Vogel, 2007, Krecsák, 2007 and Phelps, 2010.

1. *Montatheris hindii* (Boulenger, 1910b). Ann. Mag. Nat. Hist. (8) 5(30): 513. (*Vipera hindii*)

Synonym: *Hindius hindii* A.F.T. Reuss, 1939a *(nomen nudum).*

Type: Holotype, BMNH 1946.1.18.10 (formerly BMNH 1908.9.17.7), a 300 mm male (S.L. Hinde, 1902–1908).

Type locality: "Fort Hall, Kenya District, 4000 ft" [= Muranga, Central Prov., cen. Kenya, 0°43'S, 37°10'E, elevation 1285 m] (in error). Corrected to Aberdare Mtns., N Central Prov., cen. Kenya, bet. 0°10–50'S, 36°30–50'E, elevation 2200–3700 m *fide* Loveridge, 1936b: 44].

Distribution: Central Kenya (Central, cen. Eastern), 2700–3800 m.

Remarks: Holotype probably sent from Fort Hall by Hinde when stationed there *fide* Loveridge (1957: 301) and collected elsewhere.

MONTIVIPERA Nilson, Tuniyev, Andrén, Orlov, Joger & Herrmann, 1999a (Viperidae)

Type species: *Daboia xanthina* Gray, 1849a.
Distribution: Middle East.
Fossil records: Lower Miocene and upper Pliocene of Europe. Fossils unassigned to species include upper Pliocene (Villanyian, MN 16–17: 1.8–3.2) of France and Spain. *Montivipera* is included with a group, which as unassigned fossil material, are referred to as the "Oriental vipers", and may include any of the following records: lower Miocene (Orleanian, MN 4–5: 13.7–16.9 mya) of France, Germany, Portugal and Russia, middle Miocene (Astaracian, MN 6-8: 11.1–13.7 mya) of France and Germany, upper Miocene (Vallesian, MN 9–10: 8.7–11.1 mya) of Hungary, Turkey and Ukraine, upper Miocene (Turolian, MN 13: 4.9–7.3 mya) of Greece, Hungary, Italy and Ukraine, lower Pliocene (Ruscinian, MN 14: 4.2–4.9 mya) of Spain and Ukraine, upper Pliocene (Villanyian, MN 16: 2.6–3.2 mya) of Greece, upper Pliocene lower/Pleistocene of Morocco, and middle Pleistocene (Ionian: 0.13–0.78 mya) of Greece.
Sources: Golay et al., 1993, Nilson et al., 1999, Lenk et al., 2001b, Szyndlar & Rage, 2002, Mallow et al., 2003, Krecsák, 2007, Stümpel & Joger, 2009 and Phelps, 2010.

M

1. *Montivipera albicornuta (*Nilson & Andrén, 1985a). Amphibia-Reptilia 6(2): 207–210, fig. 1. (*Vipera albicornuta*)

Type: Holotype, RSI 3098, a 573 mm male (M. Latifi, 1971).
Type locality: "Abhar in the Zanjan valley, between Tabriz and Teheran, NW Iran" [= Abhar, Zanjan Prov., N Iran, 36°08'N, 49°13'E, elevation 1545 m].
Distribution: North-central Iran (Zanjan), 1545 m.
Sources: Tuniyev et al., 2009 and Rajabizadeh et al., 2011.
Remarks: Possibly conspecific with *M. raddei*.

2. *Montivipera albizona* (Nilson, Andrén & Flärdh, 1990). Amphibia-Reptilia 11(3): 287–289, figs. 1–3. (*Vipera albizona*)

Type: Holotype, GNM 5022, a 266 mm female (G. Nilson, 2 June 1989).
Type locality: "from the regions of the Kulmac Daglari mountain Distribution, central Turkey, close to the Anatolian 'Diagonal'."
Distribution: Central Turkey.
Sources: Schätti et al., 1991 and Mulder, 1994.

3. *Montivipera bornmuelleri* (F. Werner, 1898a). Zool. Anz. 21(555): 218–220. (*Vipera bornmuelleri*) (*nomen corrigendum*)

Synonym: *Lachesis libanotica* Hemprich, 1827 (*nomen nudum*), *Vipera bornmülleri* F. Werner, 1898a *(nomen incorrigendum), Vipera bornmuelleri* – Mertens, 1967 *(nomen corrigendum),* and *Vipera bonnmulleri* – Khole, 1991 *(nomen incorrectum).*
Type: Lectotype, ZSM 1653, (J.B. Bornmüller), designated by F. Werner (1922: 210, fig. 2a), destroyed 24–25 April 1944 during World War II.
Type locality: "Libanon, 1800 m" [= Lebanon, 1800 m] via lectotype selection. Restricted to Bcherré, Lebanon *fide* Mertens (1967b: 154).
Distribution: Middle East. Southern Lebanon (Mont-Liban), SW Syria (Ma'an) and ext. N Israel (N Golan Heights), 450–2500 m.
Sources: Mertens, 1967b, Hraoui-Bloquet, 1981, Nilson & Andrén, 1985b, Ilani, 1983a, Gruber, 1989, Nilson et al., 1990, Herrmann & Joger, 1997, Hraoui-Bloquet et al., 2002 and Bar & Haimovitch, 2011.
Remarks: Type locality restriction of Kar Boghaz, Cilicischer Taurus, Kleinasien *fide* Mertens & Müller (1928: 52) invalid. A valid species *fide* David & Ineich (1999: 334). Previously a synonym or subspecies of *V. xanthina*.

4. *Montivipera bulgardaghica* (Nilson & Andren, 1985b). J. Herp. 19(2): 277–280, fig. 1. (*Vipera bulgardaghica*)

Type: Holotype, GNM 1618, a 481 mm male (M. Holtz, 1897).
Type locality: "Cilician Taurus (Kar Boghaz, Bulgar Dagh, 2500m), Province Nigde (= Karbogaz, Bo lkar dagi Ulukisla), south central Anatolia, Turkey."
Distribution: South-central Turkey (Bolkar Daghlari Mts. of Anatolia), 2500 m.
Sources: Nilson & Andrén, 1985b, Gruber, 1989, Nilson et al., 1990 and Mulder, 1994
Remarks: Holotype is also a paratype of *V. bornmuelleri*. A valid species *fide* David & Ineich (1999: 334). A synonym of *M. albizona fide* Mulder (1994: 82).

5. *Montivipera kuhrangica* Rajabizadeh, Nilson & Kami, 2011. Russ. J. Herp. 18(3): 235–238, figs. 1–2.

Type: Holotype, ZMGU 2203, a 667 mm male (M. Sadeghi, May 2008).
Type locality: "Tulip valley (Darreye Lake or Dashte Lake) (32°36' N 50°11' E), 8 km north east of Chelgerd village, Kuhrang region, Chaharmahal and Bakhtiari province (the province is located in highest part of central Zagros mountains), Iran. Altitude 2490 m."
Distribution: Iran (Zagros Mts. of Bakhtiari, Chaharmahal), 2490 m.

6. *Montivipera latifi* (Mertens, Darevsky & Klemmer, 1967). Senck. Biol. 48(3): 161–166, figs. 1–5. (*Vipera latifi*)

Type: Holotype, SMF 62585, a 542 mm male (M. Latifi, 2 Oct. 1966).
Type locality: "Hochtal von Lar (2180–2900 m Höhe), süwestlich des Demavend-Gipfels in Elburs-Gebirge, nordöstlich von Teheran, Iran" [= SW Damavand Mtn. summit, upper Lar Valley, Elburz Mtns., S Mazandaran Prov., N Iran, ca. 35°54'N, 52°01'E, 2180–2900 m].
Distribution: Northern Iran (S Mazandran), 2180–2900 m.
Sources: Nilson & Andrén, 1985a–b, Schätti et al., 1991 and Rajabizadeh et al., 2011.
Remarks: Probably a synonym of *M. raddei fide* Schätti et al., 1991.

7. †*Montivipera platyspondyla* (Szyndlar, 1987). J. Vert. Paleont. 7(1): 67–68, figs. 10c–g. (†*Vipera platyspondyla*)

Type: Holotype, CUP 940, one trunk vertebra.
Type locality: "Lower Miocene (MN 4) locality of Dolnice near to the town of Cheb in westernmost Bohemia (Czechoslovakia)."
Distribution: Lower Miocene (Orleanian, MN 4: 16.0–16.9 mya) of Czech Republic and Germany.
Sources: Szyndlar & Schleich, 1993, Nilson & Andrén, 1997 and Szyndlar & Rage, 2002.

8. *Montivipera raddei* (Boettger, 1890a). Zool. Anz. 13(327): 62–63. (*Vipera raddei*)

Synonyms: *Vipera raddii* Boulenger, 1896a *(nomen emendatum)* and *Vipera raddei kurdistancia* Nilson & Andrén, 1986.
Types: Syntypes (2), ZMT (Christoph), lost *fide* Nilson & Andrén (1986: 5).
Type locality: "Kasikoperan in Armenien" [= Kozkoparan, Tuzluca Distr., Igdir Prov., NE Turkey, 40°01'N, 43°26'E, elevation 1810 m].
Distribution: Southwestern Asia. Eastern Turkey (Kars), S Armenia, NW Iran (West Azerbaijan) and possibly ext. NE Iraq, (200) 1100–3000 m.
Sources: Groombridge, 1980, Nilson & Andrén, 1988a, Schätti et al., 1991, Leviton et al., 1992, Herrmann & Joger, 1997, Tuniyev et al., 2009 and Rajabizadeh et al., 2011.
Remarks: BMNH 6.7.96 is a topotype *fide* Golay et al. (1993: 288). A valid species *fide* Groombridge (1980: 69). Previously a subspecies of *V. xanthina* (Gray).

9. *Montivipera wagneri* (Nilson & Andrén, 1984a). Bonn. Zool. Beitr. 35(1–3): 178–181, figs. 1–3. (*Vipera wagneri*)

Type: Holotype, ZFMK 23495, a 291 mm female (F.J.C.M. Wagner, 1846).
Type locality: "vicinity of lake Urmia ("Armenisch-Persische Grenze"), province Azarbaijan, N.W. Iran," (probably in error *fide* Nilson & Andrén (1984: 181).
Distribution: Mountains of NE Turkey (Kars) and adjacent NW Iran (West Azerbaijan), 1600–1900 m.
Sources: Joger et al., 1988, Nilson et al., 1990, Mulder, 1994, Herrmann & Joger, 1997 and Tuniyev et al., 2009.
Remarks: Holotype is erroneously labeled ZFMK 32495 in Nilson & Andrén (1984: fig. 1). Photographs of holotype in P. Wagner et al. (2012: fig. 4). Status uncertain; possibly a synonym of *V. xanthina*.

10. *Montivipera xanthina* (Gray, 1849a). Cat. Snakes Coll. Brit. Mus.: 24. (*Daboia xanthina*)

Synonym: *Vipera xanthina santhina* – González, 1991 *(nomen incorrectum)*.
Type: Lectotype, BMNH 1946.1.18.11, adult female (C. Fellows, April 1838), designated by Nilson & Andrén (1986: 63).
Type locality: "Xanthus (Kinik), province Mugla, S. W. Turkish Anatolia" via lectotype selection.
Distribution: Northeastern Greece (Macedonia, Leros, Lesvos, Chios, Oinousses, Thrace) and W Turkey (W Anatolia), NSL–2700 m.
Sources: Eiselt & Baran, 1970, Bannikov et al., 1977, Gärdenfors, 1980, Nilson & Andrén, 1985a, 1985b, 1986, 1992, van Wingerde, 1986, Dimitropoulos, 1987, 1990, Schätti & Baran, 1988, Schätti et al., 1991, Mulder, 1994, Herrmann & Joger, 1997, Nilson et al., 1999, Szyndlar & Rage, 1999, Smedt, 2006, Valakos et al., 2004, 2008 and Trapp, 2007.
Remarks: Schatti et al. (1991: 305) included *M. albizona*, *M. bornmuelleri*, and *M. bulgardaghica* as synonyms.

MORELIA Gray, 1842a (Pythonidae)

Synonyms: *Spilotos* Lacépède, 1804 *(nomen oblitum), Simalia* Gray, 1849a, *Aspidopython* A.B. Meyer, 1874, *Chondropython* A.B. Meyer, 1874, *Condropython* – Sauvage, 1879a *(nomen incorrectum), Hypaspistes* Ogilby, 1891 *(nomen praeoccupatum), Australiasis* Wells & Wellington, 1984, *Chondrophython* – M.J. Smith & Plane, 1985 *(nomen incorrectum), Montypythonoides* M.J. Smith & Plane, 1985, *Nyctophilopython* Wells & Wellington, 1985, *Lenhoserus* Hoser, 2000b, and *Jackypython* Hoser, 2009a & 2012b *(nomen illegitimum)*.
Type species: *Coluber spilotus* Lacépède, 1804.
Distribution: Australasia.
Fossil Records: Upper Oligocene and middle-upper Miocene of Australia.
Sources: Rooij, 1917, C. Haas, 1950, Stimson, 1969, Matz & Matz, 1971, McDowell, 1975a, Matz, 1980, M.J. Smith, 1981a, 1985, Cogger et al., 1983a, S.K. Wilson & Knowles, 1988, Gow, 1989, Hoser, 1989, 2009b,

2012b, Underwood & Stimson, 1990, Kluge, 1993b, D.G. Barker & Barker, 1994, McDiarmid et al., 1999, Cogger, 2000, Kortlang & Green, 2001, Mense, 2006, Swan, 2007, Rawlings et al., 2008, Flagle & Stoops, 2009, and Schleip & O'Shea, 2010.

1. *Morelia amethistina* (J.G. Schneider, 1801). Hist. Amph. 2: 254–259. (*Boa amethistina*)

Synonyms: *Coluber flavocaeruleus* Lacépède, 1789 (*nomen rejiciendum*), *Python amethystinus* Daudin, 1803 *(nomen emendatum), Natrix oularjawa* Wagler, 1825 (*nomen ineditum*), *Boa amethystina* – Gray *in* Griffith & Pidgeon, 1831, *Aspidopython jakati* A.B. Meyer, 1874, *Liasis duceboracensis* A.C.L.G. Günther, 1879b, *Hypaspistes dipsadides* Ogilby, 1891, *Liasis clarki* T. Barbour, 1914e, *Australiasis funki* Hoser, 2012b *(nomen illegitimum),* and *Morelia wellsi* Hoser, 2012b *(nomen illegitimum).*

Type: Lectotype, ZMB 1485 (M.E. Bloch), designated by Stimson (1969: 23), lost *fide* Kluge (1993b: 5).

Type locality: Unknown.

Distribution: Austro-Papua. Eastern Indonesia (Papua, Aru, Biak, Gag, Kai, Misool, Salawati, Yapen), Papua New Guinea (Central, Chimbu, Milne Bay, Eastern Highlands, East Sepik, Gulf, Madang, Morobe, New Ireland, Northern, Western, Western Highlands, West Sepik, Daru, Duke of York, Fergusson, Normanby; Rossel, Trobriand and Umboi Is.) and N Australia (N Queensland, Cornwallis and Murray Is.), NSL–1600 m.

Sources: Whitaker et al., 1982, F. Parker, 1982, O'Shea, 1996, B. Oliver, 1998, Harvey et al., 2000, Hoser, 2000b, Torr, 2000 and Kraus & Allison, 2004.

Remarks: Records for the Philippines (Mindanao), Solomons, Timor and Samao erroneous *fide* McDowell (1975a: 60).

2. *Morelia azurea* (A.B. Meyer, 1874). Mber. Königl. Akad. Wiss. Berlin 1874(2): 134. (*Chondropython azureus*)

Synonym: *Chondropython pulcher* Sauvage, 1878.

Types: Syntypes (3), MTKD 638–39 (A.B. Meyer, 1873), destroyed 13 Feb. 1945 during World War II, and ZMB 8832, a male (A.B. Meyer, 1873), lost *fide* Stimson (1969: 9).

Type locality: "Mysore" [= Biak Is., Schouten Arch., N West Papua Prov., E Indonesia]. Emended to Kodor, Mysore *fide* Obst (1977: 179).

Distribution: New Guinea. Eastern Indonesia (N Papua, West Papua, Biak, Salawati, Sorong, Yapen) and N Papua New Guinea (East Sepik, Madang, Morobe, Northern, West Sepik), NSL–1900 m.

Sources: Rawings & Donnellan, 2003, Maxwell, 2005 and Schleip & O'Shea, 2010.

Remarks: Schleip & O'Shea (2010: 45) urged the designation of a neotype.

3. *Morelia boeleni* (Brongersma, 1953). Proc. Kon. Ned. Akad. Weten. 56C(3): 317–318, pl. 1, figs. 1–5. (*Liasis boeleni*)

Synonym: *Liasis taronga* Worrell, 1958.

Type: Holotype, RMNH 9651, a 2190 mm female (K.W.J. Boelen, 25 Dec. 1952).

Type locality: "Dimija (3° 56' S, 136° 18' E), Wissel Lakes, Dutch New Guinea, about 1750 m (5700 feet) above sea level" [= W Papua Prov., E Indonesia].

Distribution: New Guinea. Eastern Indonesia (W Papua) and Papua New Guinea (Central, Eastern Highlands, Morobe, Western, Western Highlands), 1000–2000 m.

Sources: Brongersma, 1956b, 1969, F. Parker, 1982, Whitaker et al., 1982, O'Shea, 1996 and Flagle & Stoops, 2009.

4. *Morelia bredli* (Gow, 1981). Aust. J. Herp. 1(1): 29–30, pl. 1, fig. 4a. (*Python bredli*)

Type: Holotype, NTM 4535, a 2049 mm male (K. Roth, 12 Jan. 1977).

Type locality: "Pitchie Ritchie Park, Alice Springs, Northern Territory, central Australia (23°42', 133°51')."

Distribution: Central Australia (S Northern Territory), 430–775 m.

Sources: Barker & Barker, 1994, Fyfe, 1994, Cogger, 2000 and Mense, 2006.

5. *Morelia carinata* (L.A. Smith, 1981a). Rec. West. Aust. Mus. 9(2): 220–222, figs. 5–6. (*Python carinatus*)

Type: Holotype, WAM 45352, a 1975 mm specimen (L.A. Smith, R.E. Johnstone & J.A. Smith, 14 Jan. 1973).

Type locality: "Mitchell River Falls, Admiralty Gulf on north-west coast of Kimberley, Western Australia, Australia (14°50'S, 125°42'E)."

Distribution: Northwestern Australia (ext. N Western Australia), 10–205 m.

Sources: Weigel & Russell, 1993, Torr, 2000, Mense, 2006 and Hoser, 2009a.

6. *Morelia clastolepis* Harvey, Barker, Ammerman & Chippindale, 2000. Herpetol. Monogr. (14): 158–161, figs. 2a, 3c–d.

Type: Holotype, UTA 44486 (formerly VPI 68), a 1476–1588 mm female (natives, 1993).

Type locality: "island of Ambon, Maluku, Indonesia."

Distribution: Indonesia (S Maluku: Ambon, Seram).

Remarks: Probably occurs on Haruku and Saparua *fide* Harvey et al. (2000: 161).

7. *Morelia kinghorni* (Stull, 1933). Occ. Pap. Mus. Zool., Univ. Michigan (267): 3–4. (*Liasis amethistinus kinghorni*)

Type: Holotype, MCZ 35022, a male (W.E. Schevill, 1931–1932).
Type locality: “Lake Barrine, Queensland, Australia.”
Distribution: Extreme NE Australia (ext. NE Queensland), NSL–755 m.
Remarks: Resurrected *fide* Wells & Wellington (1985: 41).

8. *Morelia nauta* Harvey, Barker, Ammerman & Chippindale, 2000. Herpetol. Monogr. (14): 163–166, figs. 1a, 3a–b, 9.

Type: Holotype, UTA 44482 (formerly VPI 62), an 1816 mm female (natives, 1996).
Type locality: “Yamdena Island of the Tanimbar group, Maluku, Indonesia.”
Distribution: Eastern Indonesia (Tanimbars: Yamdena).

9. *Morelia oenpelliensis* (Gow, 1977a). Aust. Zool. 19(2): 133–136, figs. 1–3. (*Python oenpelliensis*)

Type: Holotype, NTM 840, a 3560 mm male (B. Jukes, 17 June 1975).
Type locality: “6.5 km S. W. of Oenpelli, Northern Territory, Australia (12°21’S., 133°01’E.).”
Distribution: Extreme N Australia (ext. N Northern Territory), NSL–290 m.
Sources: Begg & Martin, 1980, Sadlier, 1990 and Torr, 2000.

10. †*Morelia riversleighensis* (L.A. Smith & Plane, 1985). BMR J. Aust. Geol. Geophy. 9: 191–192, fig. 2. (†*Montypythonoides riversleighensis*)

Synonym: †*Morelia antiquus* M.J. Smith & Plane, 1985.
Type: Holotype, QMF 12926, one right maxilla fragment with 9 teeth.
Type locality: “Henk’s Hollow, approximately 3.6 km southwest of Tedford’s (1967) Site B, Riversleigh, Queensland, Australia; Riversleigh local fauna, middle Miocene.”
Distribution: Middle Miocene (10.4–16.3 mya) of Australia.
Source: Scanlon & Mackness, 2001.

11. *Morelia spilota* (Lacépède, 1804). Ann. Mus. Hist. Nat. 4: 209. (*Coluber spilotus*)

Synonyms: *Python punctatus* Merrem, 1820, *Vipera spilotes* Merrem, 1820 *(nomen emendatum), Python peronii* Wagler, 1828a, *Morelia punctata* Gray, 1842a, *Morelia variegata* Gray, 1842a, *Morelia argus* A.-M.-C. Duméril & Bibron, 1844, *Morelia spilotes* Gray, 1849 *(nomen emendatum), Morelia argus fasciolata* Jan, 1863b (*nomen nudum*), *Morelia argus fasciolata* Jan & Sordelli 1864 *in* 1860–1866, *Python spilotes macrospila* F. Werner, 1909e, *Python spilotus imbricatus* L.A. Smith, 1981a, *Morelia cheynei* Wells & Wellington, 1984, *Morelia mcdowelli* Wells & Wellington, 1984, *Morelia metcalfei* Wells & Wellington, 1985, *Morelia harrisonii* Hoser, 2000b, *Morelia macburniei* Hoser, 2003a, and *Morelia mippughae* Hoser, 2003a *(nomen dubium).*
Type: Holotype, MNHN 3272, a 2000+ mm specimen (Boudin), lost *fide* Stimson (1969: 28).
Type locality: “Nouvelle-Hollande” [= Australia].
Distribution: Austro-Papua. Eastern Indonesia (E Papua), S Papua New Guinea (Western, Central, Yule Is.) and Australia (N and SW Western Australia, N Northern Territory, Queensland, New South Wales, N Victoria, S South Australia, Abrolhos, Bathurst, Garden, Groote Eylandt, Melville, Milingimbi, Mondrain, St. Francis, Thursday and West Wallabi Is.), NSL–1125 m.
Sources: J. White, 1790, F. McCoy, 1878g, Mackay, 1950, Storr, 1965, G. Swan, 1990, Covacevich & Couper, 1991, Bush et al., 1995, Slip & Shine, 1998a–e, Shea & Sadlier, 1999, Torr, 2000, Mense, 2006, Schleip & O’Shea, 2010 and Mutton & Julander, 2011.

12 *Morelia tracyae* Harvey, Barker, Ammerman & Chippindale, 2000. Herpetol. Monogr. (14): 166–169, figs. 1b, 3e–f.

Type: Holotype, UTA 44473, a 2934 mm male (skin dealer, Feb. 1995).
Type locality: “near Tobelo, Halmahera Island, Maluku, Indonesia” [= Tobelo, NE Halmahera Is., Maluku, Indionesia, 1°44’N, 128°00’E, elevation 30 m].
Distribution: Central Indonesia (Batjan, NW Halmahera), 30 m.
Source: J.C. Murphy & Schlager, 2003.

13 *Morelia viridis* (Schlegel, 1872). De Dierentuin Nat. Artis Mag., Rept. (4): 54. (*Python viridis*)

Synonyms: *Chondropython viridis shireenae* Hoser, 2003b and *Chondropython viridis adelynhoserae* 2009a & 2012b.
Type: Lectotype, RMNH 4672 (formerly Amsterdam Zoo) (Rosenberg, 1866), designated by Stimson (1969: 8).
Type locality: “Aru Islands” [E Indonesia] via lectotype selection.
Distribution: Austro-Papua. Eastern Indonesia (Papua, Aru Arch.), S Papua New Guinea (Central, Chimbu, Eastern Highlands, Enga, Gulf, Milne Bay, Northern, Western, Western Highlands, Normanby Is.) and ext. NE Australia (ext. N Queensland), NSL–2000 m.
Sources: McDowell, 1975a, O’Shea, 1996, Weier & Vitt, 1999, Hoser, 2000b, 2003a, Torr, 2000, J.C. Murphy & Schlager, 2003, Rawlings & Donnellan, 2003, Kivit & Wiseman, 2005, Maxwell, 2005 and Arth & Baus, 2006.
Remarks: Solomons records rejected *fide* McDowell (1975a: 72).

MUSSURANA Zaher, Grazziotin, Cadle, Murphy, Moura-Leite & Bonatto, 2009 (Xenodontidae)

Type species: *Oxyrhopus bicolor* Peracca, 1904b.
Distribution: Southern South America.
Source: Zaher et al., 2009.

1. *Mussurana bicolor* (Peracca, 1904b). Rev. Suisse Zool. 12(3–4): 667–668. (*Oxyrhopus bicolor*)

Type: Holotype, MHNG 677.47, a 657 mm male (Dupuis, 1903).
Type locality: "Nord de Santa Fé, Argentine" [= N of Santa Fe (31°38'S, 60°42'W, elevation 20 m), Santa Fe Prov., NE Argentina].
Distribution: Southern South America. Southeastern Brazil (S Mato Grosso, Mato Grosso do Sul, Paraná, Rio Grande do Sul, São Paulo), Peru (Huánuco, Loreto), Bolivia (Beni, Santa Cruz), Paraguay (Alto Paraguay, Asunción, Central, Cordillera, Itapúa, Neembucú, Presidente Hayes) and N Argentina (Chaco, Corrientes, Formosa, Jujuy, La Rioja, Misiones, San Luis, Santa Fe, Tucumán), 125–465 m.
Sources: Vanzolini, 1986a, Cei, 1994, Aquino et al., 1996, Couturier & Faivovich, 1996, Cacivio, 1999, Leynaud & Bucher, 1999, N.J. Scott et al., 2006, Cacciali, 2008 and Jansen, 2008.

M

2. *Mussurana montana* (Franco, Marques & Puorto, 1997). J. Herp. 31(4): 486–487, fig. 2. (*Clelia montana*)

Type: Holotype, IB 22505, a 946 mm male (J. Morteira, 27 Nov. 1962), destroyed by fire 15 May 2010.
Type locality: "city of Guaratinguetá (22°49'S; 45°93'W), Sodré mill, state of São Paulo, Brazil."
Distribution: Southeastern Brazil (São Paulo).

3. *Mussurana quimi* (Franco, Marques & Puorto, 1997). J. Herp. 31(4): 484–485, fig. 3. (*Clelia quimi*)

Type: Holotype, IB 53743, a 1090 mm male (L.M. Gelpe, 27 March 1990), destroyed by fire 15 May 2010.
Type locality: "Santo António farm, city of Itu (23°16'S 47°19'W), state of São Paulo (SP), Brazil."
Distribution: Southern South America. Brazil (Bahia, Espírito Santo, Federal District, Goiás, Minas Gerais, Paraná, Santa Catarina, São Paulo), Paraguay (Itapúa) and N Argentina (Misiones), 180 m.
Sources: Giraudo, 1999, Lima-Silveira & Agostini-Cotta, 2006 and N.J. Scott et al., 2006.

MYERSOPHIS E.H. Taylor, 1963 (Colubridae)

Type species: *Myersophis alpestris* E.H. Taylor, 1963.
Distribution: Philippines.
Sources: E.H. Taylor, 1963 and Leviton, 1983.

1. *Myersophis alpestris* E.H. Taylor, 1963. Copeia 1963(2): 430–431.

Type: Holotype, EHT-HMS 3109 (formerly EHT-CC 4820), a 664 mm female (E.H. Taylor, 23 May 1961), lost *fide* Leviton (1983: 212).
Type locality: "elevation circa 1,980 m in mountains near Banaue, Mountain Province, Luzon, Philippines."
Distribution: Northern Philippines (Luzon), 1980 m. Known only from type locality.
Remarks: The paratype, KU 203013, a 176 mm male (E.H. Taylor, 23 May 1961) is extant.

MYRIOPHOLIS Hedges, Adalsteinsson & Branch *in* Adalsteinsson, Branch, Trape, Vitt & Hedges, 2009 (Leptotyphlopidae)

Synonyms: *Ramphostoma* Jan & Sordelli, 1860 *in* 1860–1866 *(nomen praeoccupatum), Bobbottomus* Hoser, 2012am *(nomen illegitimum), Longinidis* Hoser, 2012am *(nomen illegitimum),* and *Scanlonus* Hoser, 2012am *(nomen illegitimum).*
Type species: *Stenostoma longicaudum* W.C.H. Peters, 1854.
Distribution: Africa, Arabia and SW Asia.
Sources: Hahn, 1980a, Wallach, 1998b, McDiarmid et al., 1999 and Hedges et al., 2009.

1. *Myriopholis adleri* (Hahn & Wallach, 1998). Hamadryad 23(1): 51, fig. 1. (*Leptotyphlops adleri*)

Type: Holotype, MNHN 1978.1910, a 135 mm male (Evard, 1974).
Type locality: "Bongor (10°17'N, 15°22'E), Mayo Kebbi Prefecture, Chad" [elevation 330 m].
Distribution: West Africa. Southern Senegal (Kolda, Tambacounda), W Burkina Faso (Volta-Noire), SW Niger (Dosso), N Benin (Alibori), SW Chad (Mayo Kebbi), N Cameroon (Extrême-Nord) and N Central African Republic (Vakaga), 110–900 m.
Sources: J.F Trape, 2002, 2005, J.-F. Trape & Mané, 2004, 2006b, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Chirio, 2009 and Hughes, 2013.

2. *Myriopholis albiventer* (Hallermann & Rödel, 1995). Stuttgart. Beitr. Naturk. A (532): 3–5, figs. 1a–c, 2a–b. (*Leptotyphlops albiventer*)

Type: Holotype, SMNS 8454.5, a 148 mm specimen (M.O. Rödel, 4 Sept. 1994).

Type locality: "Ivory Coast, Comoé National Park, 8°45'N, 3°47'W" [= Bouna Dept., NE Ivory Coast, elevation 250 m].

Distribution: West Africa. Guinea Bissau, S Mali (Sikasso), and N Ivory Coast (Bouna, Ferkéssédougou), 250–360 m.

Source: J.-F. Trape & Mané, 2006b.

3. *Myriopholis algeriensis* (Jacquet, 1898). Bibliogr. Anat. 4(2): 79–81, figs. 1–7. (*Glauconia algeriensis*)

Synonym: *Glauconia natatrix* Andersson, 1937.

Type: Holotype, not designated, ? INCDS, a 280 mm specimen (native, March 1894).

Type locality: "environs du Hammam Salahin, bain situé à six kilometers au nord de Biskra, Algérie" [= Hammam Salhin, 6 km. N Biskra, Biskra, NE Algeria, ca. 34°54'N, 05°45'E, elevation 165 m].

Distribution: Northwestern Africa. Southern Morocco (Agadir, Kaar es Souk, Ouarzazate), Algeria (Béchar, Biskr, Illizi, Tindouf), SW Libya (Awbari), S. Tunisia (Tataouine), NE Western Sahara (Saguia El Hamra), NW Mauritania (Adrar, Tagant), N Mali (Gao, Tombouctou), N Burkina Faso (Volta-Noire), N Niger (Agadez), and NW Nigeria (Bauchi, Sokoto), 10–1300 m.

4. *Myriopholis blanfordii* (Boulenger, 1890a). Fauna Brit. India, Rept. Batr.: 243, figs. 72a–b. (*Glauconia blanfordii*)

Synonyms: *Glauconia laticeps* Nikolsky, 1907 and *Glauconia carltoni* T. Barbour, 1908.

Type: Lectotype, BMNH 1946.1.16.85 (orig. BMNH 1869.8.28.58), a 237 mm specimen (A. Leith-Adams, 1861–1868), designated by Hahn (1978: 485).

Type locality: "Sindh" [= Sindh Prov., SE Pakistan].

Distribution: Southwestern Asia. Southern Iran (Bushehr, Fars, Lorestan, Sistan va Baluchestan), E Afghanistan (Nangarhar, Nimruz), Pakistan (Balochistan, Khyber Pakhtunkhwa, Punjab, Sindh) and NW India (Gujarat, Haryana, Punjab, Rajasthan), 20–1525 m.

Sources: Alcock & Finn, 1897, Wall, 1923c, M.A. Smith, 1943, R.J. Clark, 1990, M.S. Khan, 2002, R. Sharma, 2003, 2007 and Broadley & Wallach, 2007a.

Remarks: Head of lectotype illustrated by Hahn (1978: 486, fig. 7).

5. *Myriopholis boueti* (Chabanaud, 1917c). Bull. Mus. Hist. Nat., Paris 23(1): 9–10, figs. 1–3. (*Glauconia boueti*)

Synonym: *Glauconia debilis* Chabanaud, 1918b.

Type: Holotype, MNHN 1917.24, a 166 mm specimen (G. Bouet, 1911).

Type locality: "Soudan: Djenné" [= Djenné, Mopti Region, S Mali, 13°54'N, 04°33'W, elevation 275 m].

Distribution: West Africa. Southern Mauritania (Brakna, Hodh El Gharbi), Senegal (Dakar, Fatick, Saint-Louis, Tambacounda, Goré Is.), Gambia, Guinea–Bissau, S Mali (Koulikoro, Mopti), Burkina Faso (Centre, Centre-Ouest, Est, Sud-Ouest, Volta-Noire), SW Niger (Dosso) and S Chad (Chari-Baguirmi, Guéra), NSL–350 m.

Source: Boulenger, 1920c, Villiers, 1950a–b, 1951b, 1953, 1954a, 1955, 1956a, Roman, 1980, 1984, Hahn & Wallach, 1998, J.-F. Trape & Mané, 2000, 2006b, J.-F. Trape, 2005, Villiers & Condamin, 2005 and Chirio, 2009.

Remarks: A subspecies of *Leptotyphlops narirostris fide* Villiers (1950: 58). Type locality listed as Sudan (error for French Sudan = Mali) *fide* Chabanaud (1917: 10). Possibly occurs in N Benin *fide* Hughes (2013: 153).

6. *Myriopholis braccianii* (Scortecci, 1928). Atti. Soc. Ital. Sci. Nat. Mus. Civ. Stor. Nat. Milano 67(3–4): 294–295, fig. 3. (*Glauconia braccianii*)

Synonyms: *Glauconia variabilis* Scortecci, 1928 and *Glauconia fiechteri* Scortecci, 1929.

Type: Holotype, MSNM 3351 (formerly MSNM 1917), a 116–119 mm specimen (G.F. Turati).

Type locality: "Adi Ugri, Eritrea" [= Mendefera, Southern Red Sea Prov., Eritrea, 14°53'N, 38°49'E, elevation 1900 m].

Distribution: Northeastern Africa. Western Sudan (Janub Darfur, Shamal Darfur), South Sudan (Bahr-el-Ghazel, Western Equatoria), Eritrea (Anseba, Gash-Barka, Southern), S Ethiopia (Illubabor, Sidamo), Somalia (Bari, Hiraan, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Shabeellaha Hoose) and NE Kenya (N Coast), 100–1900 m.

Sources: Loveridge, 1957a, Lanza, 1983a, 1990b, Largen & Rasmussen, 1993, Wallach & Lanza, 2004, Broadley & Wallach, 2007a and Largen & Spawls, 2010.

7. *Myriopholis burii* (Boulenger, 1905e). Ann. Mag. Nat. Hist. (7) 16(92): 178. (*Glauconia burii*)

Type: Holotype, BMNH 1946.1.16.56 (formerly BMNH 1903.3.6.48), a 210 mm specimen (G.W. Bury, 1900–1903).

Type locality: "El Kubar, Upper Hushabi, near Yemen frontier, South Arabia" [= Khawbar, upper Haushabi, SW Yemen, 13°48'N, 44°45'E, elevation 1350 m].

Distribution: Southwestern Yemen (Lahij), 1350–1500 m.

Sources: Corkill & Cochrane, 1966, Hahn, 1978, Gasperetti, 1988, Hahn & Wallach, 1998, Broadley & Wallach, 2007a and Egan, 2007.

8. *Myriolepis cairi* (A.-M.-C. Duméril & Bibron, 1844). Erpét. Gén. 6: 323–325. (*Stenostoma cairi*)

Synonyms: *Stenostoma fitzingeri* Jan, 1861b, *Glauconia variabilis* Scortecci, 1928, and *Leptotyphlops macrorhynchus bilmaensis* Angel, 1936b.

Type: Holotype, MNHN 3231, a 235–241 mm specimen (Birr).

Type locality: "environs du Caire" [= vicinity of Cairo, Cairo Govern, NE Egypt, 30°03'N, 31°15'E, elevation 200 m].

Distribution: Northeastern Africa. Eastern Niger (E Agadez), N Chad (Borkou), E Egypt (Assiut, Beheira, Beni Suef, Cairo, Gharbia, Giza, Menufia, Minya, New Valley, Qalyubia, Qena, Sohag, South Sinai, Suez; Elephantine, Kitchener & Rhodes Is.), cen. Sudan (An Ni Al Abyadl, Al Khartum, Senner, Shamal Kurdufan), E Eritrea (Northern Red Sea: Dahlak and Entedebir Is.) and W Somalia (Jubbada Dhexe, ? Sanaag, Woqooyi Galbeed), NSL–1300 m.

Sources: Boulenger, 1893a, 1915d, 1920d, Anderson, 1898, Parker, 1932, Flower, 1933, Kramer & Schnurrenberger, 1963, Marx, 1968, Pitman, 1974, Lanza, 1983a, 1990b, Abdeen et al., 1991a–b, Largen & Rasmussen, 1993, Hallermann & Rödel, 1995, Largen, 1997, Hahn & Wallach, 1998, Le Berre, 1999, J.-F. Trape, 2002, Baha El Din, 2006, J.-F. Trape & Mané, 2006b and Broadley & Wallach, 2007a.

Remarks: A record for Mauritania needs confirmation *fide* McDiarmid et al. (1999: 25).

9. *Myriopholis erythraeus* (Scortecci, 1928). Atti. Soc. Ital. Sci. Nat. 67(3–4): 293–294, fig. 2. (*Glauconia erythraea*)

Type: Holotype, MSNM 3349 (formerly MSNM 1916), a 157–158 mm specimen (F. Fatigati).

Type locality: "Massaua" [= Massawa, Northern Red Sea Prov., Eritrea, 15°37'N, 39°28'E, elevation NSL].

Distribution: Northeastern Africa. Eastern Eritrea (Anseba, Northern Red Sea, Southern, Southern Red Sea, Entedebir Is.), Ethiopia (Illubabor, Shoa) and N Somalia (Bari, Sanaag), NSL–1970 m.

Sources: H.W. Parker, 1949, Leviton, 1986, Wallach & Lanza, 2004, Broadley & Wallach, 2007a and Largen & Spawls, 2010.

10. *Myriopholis filiformis* (Boulenger, 1899a). Bull. Liverpool Mus. 2: 7–8, pl. 9, figs. 2, 2a–b. (*Glauconia filiformis*)

Type: Lectotype, BMNH 1946.1.11.1 (orig. BMNH 1899.12.15.109), a 153–155 mm specimen (H.O. Forbes & W.R. Ogilvie-Grant, 30 Dec. 1898–16 Jan. 1899), designated by Hahn (1978: 480–481).

Type locality: "Sokotra (Jenna-agahan, 1200–2500 feet)" [= Jenna-agahan, E Sokotra Is., Yemen, 365–760 m] via lectotype selection.

Distribution: Yemen (Socotra Is.), 100–775 m.

Sources: Boulenger, 1903g, 1915d, Corkill & Cochrane, 1966, Hahn, 1978, Schätti & Desvoignes, 1999, Rösler &Wranik, 2004, 2006 and Razzetti et al., 2011.

11. *Myriopholis hamulirostris* (Nikolsky, 1907). Ann. Mus. Zool. Acad. Imp. Sci. St.- Pétersbourg 10(3–4): 286–288, figs. 4–5. (*Leptotyphlops hamulirostris*)

Type: Lectotype, MHNG 1326.72 (formerly ZIL 10299-305 & EK 3986), a 257 mm specimen (N.A. Zarudny, 28 March 1904), designated by Kramer & Schnurrenberger (1963: 478, fig. 2).

Type locality: "Aguljaschker in Arabistano" [= Aguliaschxer, Khuzestan Prov., SW Iran, 31º40'N, 49º40'E, elevation 835 m] via lectotype selection.

Distribution: Arabia and SW Asia. Saudi Arabia (Makkah, Najran, Riyadh), Oman (Dhofar, Muscat), United Arab Emirates (Abu Dhabi, Sharjah), Iraq (Baghdad), Iran (Busher, Fars, Ilam, S Kerman, Khuzestan, Sistan va Baluchestan), Afghanistan, Pakistan (Balochistan, Punjab, Sindh) and W India (Rajasthan), 230–1550 m.

Sources: Wettstein, 1951, Kramer & Schnurrenberger, 1963, Corkill & Cochrane, 1966, Hahn, 1978, Gallagher & Arnold, 1988, Gasperetti, 1988, Latifi, 1991, Schätti & Gasperetti, 1994, McDiarmid et al., 1999, Egan, 2007 and R. Sharma, 2007.

12. *Myriopholis ionidesi* (Broadley & Wallach, 2007a). Zootaxa (1408): 27–28, pl. 8, fig. 3. (*Leptotyphlops ionidesi*)

Type: Holotype, MCZ 57440 (formerly MCZ X-8333), a 145 mm female (C.J.P. Ionides, 27 April 1958).

Type locality: "Liwale, Southern Province, Tanzania (09°47'S, 38°00'E, elevation 600 m)" [= Liwale, Lindi, SE Tanzania, 09°48'S, 37°56'E, elevation 520 m].

Distribution: Southeastern Tanzania (Dar es Salaam, Lindi, Mtwara), N Malawi (Northern) and N Mozambique (Nampula), NSL–700 m.

13. *Myriopholis longicauda* (W.C.H. Peters, 1854). Verh. Preuss. Akad. Wiss. Berlin 1854(11): 621. (*Stenostoma longicaudum*)

Synonyms: *Glauconia brevirostralis* V.F.M. FitzSimons, 1930 and *Leptotyphlops longicaudus* – Broadley & Watson, 1976.

Type: Holotype, ZMB 4827, a 208 mm specimen (W.C.H. Peters, May, 1845).

Type locality: "Tette" [= Tete, Zambezi River, Tete Prov., W Mozambique, 16°10'S, 33°36'E, elevation 130 m].

Emended to Tette on the Zambezi River *fide* W.C.H. Peters (1882d: 103).

Distribution: Southeastern Africa. Southeastern Zambia (Central, Southern), Malawi (Northern, Southern), Mozambique (Gaza, Inhambane, Manica, Nampula, Sofala, Tete, Mozambique Is.), E Botswana (E Central, E North West), Zimbabwe (Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matebeleland North, Matebeleland South), Swaziland and NE South Africa (Gauteng, Limpopo, Mpumalanga), NSL–1550 m.

Sources: W.C.H. Peters, 1882d, Boulenger, 1893a, 1915c, Loveridge, 1957a, Broadley, 1959, Sweeney, 1961, V.F.M. FitzSimons, 1962a, 1974, Broadley & Watson, 1976, Broadley, 1983, 1988, Lanza, 1983a, 1990b, Pienaar et al., 1983, Auerbach, 1987, Branch, 1988, Hallermann & Rödel, 1995, Broadley & Wallach, 1996, 1997b, Branch, 1998, 2001, 2005, Spawls et al., 2002, Broadley et al., 2003, Marais, 2004 and Broadley & Blaylock, 2013.

Remarks: Original description reprinted in Peters (1855: 50–51). Probably occurs in Namibia *fide* M. Griffin (2003: 128).

14. *Myriopholis macrorhyncha* (Jan, 1860 *in* Jan & Sordelli, 1860–1866). Icon. Gén. Ophid. 1(1): pl. 5, fig. 12, pl. 6, figs. 12, 12a–b, e, g, n, p, r, v, x. (*Stenostoma macrorhynchum*)

Synonyms: *Glauconia macrorhynchus* Boulenger, 1890d and *Glauconia fiechteri* Scortecci, 1928.

Type: Holotype, formerly MSNM, a 230 mm specimen, destroyed in 1943 during World War II.

Type locality: “Sennaar” [= Sennar, Sennar Prov., SE Sudan, 13°34’N, 33°34’E, elevation 430 m].

Distribution: Northeastern Africa. Northern Egypt (Cairo, Faiyum, Giza, Matrouh, South Sinai), SE Sudan (Sennar), S Ethiopia (Illubabor), NE Somalia (NW Bari, NE Sanaag) and N Kenya (N Eastern, North-Eastern, Rift Valley), NSL–900 m.

Sources: Jan, 1861b, 1864d, Boulenger, 1893a, 1915d, 1920d, Villiers, 1952a, Kramer & Schnurrenberger, 1965, Marx, 1968, Hahn, 1978, Lanza, 1983a, 1990b, Le Berre, 1989, Largen & Rasmussen, 1993, Schleich et al., 1996, Saleh, 1997, Hahn & Wallach, 1998, Spawls et al., 2002, Wallach, 2003, Baha El Din, 2006, Broadley & Wallach, 2007a, Yildiz et al., 2009, 2010, Largen & Spawls, 2010 and Masroor, 2012.

Remarks: In need of revision as *M. macrorhyncha* probably occurs only in NE Africa. M.A. Smith (1943: 60) mentioned that the Asian populations called “*macrorhynchus”* may not be true *M. macrorhyncha*. Hahn (1978: 483) suggested that “several distinct subspecies” could be recognized. Recently the Distribution was believed to include West Africa (from Senegal to Nigeria), North Africa (from Morocco and Mauritania to Egypt), Turkey, the Middle East (Syria to Israel), Arabian Peninsula and SW Asia (from Iraq to W India), a highly unlikely scenario considering the size, dispersal ability and gene flow possibilities in these tiny snakes. A similar case involves *Leptotyphlops nigricans (sensu lato),* which was thought to extend from Ethiopia to the Cape of South Africa but which in fact is a series of isolated populations including, from north to south, *L. aethiopicus* (Ethiopia), *L. keniensis* (Kenya), *L. howelli* (Kenya-Tanzania), *L. macrops* (Kenya-Tanzania), *L. pembae* (Tanzania), *L. mbanjensis* (Tanzania), *L. emini* (Sudan-Tanzania), *L. monticolus* (DRC-Rwanda), *L. kafubi* (DRC-Zambia), *L. jacobseni* (NE South Africa) and *L. nigricans* (SW South Africa) (Broadley & Wallach, 2007a).

15. *Myriopholis macrura* (Boulenger, 1903g). Bull. Liverpool Mus. 2: 89, pl. 11, figs. 3, 3a–b. (*Glauconia macrura*)

Synonym: *Glauconia longicauda* Boulenger, 1899a *(nomen praeoccupatum).*

Type: Lectotype, BMNH 1946.1.11.75 (formerly BMNH 1899.12.5.111), a 165–170 mm specimen (H.O. Forbes & W.R. Ogilvie-Grant, 30 Dec. 1898–16 Jan. 1899), designated by Hahn (1978: 480).

Type locality: “Sokotra (Jena-agahan, 1200–2500 feet)” [= Jenna-agahan, E Sokotra Is., Yemen, 365–760 m] via lectotype selection.

Distribution: Yemen (Socotra Is.), NSL–995 m.

Sources: Boulenger, 1903g, 1915d, Parker, 1949, Corkill & Cochrane, 1966, Hahn, 1978, Schätti & Desvoignes, 1999, Rösler &Wranik, 2004, 2006 and Razzetti et al., 2011.

16. *Myriopholis narirostris* (W.C.H. Peters, 1867d). Mber. Königl. Akad. Wiss. Berlin 1867(11): 708, pl., figs. 2, 2a–c. (*Stenostoma narirostre*)

Type: Holotype, ZMB 5915 (Mus. Godeffroy).

Type locality: “Lagos (West-afrika)” [= Lagos, Lagos State, SW Nigeria, 06°27’N, 03°24’E, elevation NSL].

Distribution: West Africa. Guinea-Bissau (Biombo, Bissau), W Guinea (Télimélé), Ivory Coast (Ferkéssédougou), Ghana (Accra, Eastern, Upper West), Burkina Faso (Centre, Est, Sud-Ouest, Volta-Noire), S Togo (Plateaux), Nigeria (Lagos, Plateau), S Cameroon (Ouest, Sud) and Central African Republic (Bamingui-Bangoran), NSL–1250 m.

Sources: Boulenger, 1893a, 1920c, Villiers, 1950d, 1951a, 1952b, 1953, Monard, 1951, Perret, 1961, Doucet, 1963, Hughes & Barry, 1969, W. Böhme, 1978, Stucki-Stirn, 1979, Roman, 1980, Hughes, 1983, 1988, Roman, 1984, Hallermann & Rödel, 1995, Wallach & Hahn, 1997, Hahn & Wallach, 1998, LeBreton, 1999, Chirio & LeBreton, 2007, Chirio, 2012, Segniagbeto et al., 2011, Auliya et al., 2012 and Chirio, 2013.

Remarks: Possibly occurs in Benin *fide* Hughes (2013: 152).

17. *Myriopholis parkeri* (Broadley, 1999a). Arnoldia, Zimbabwe 10(14): 142–143, fig. 1. (*Leptotyphlops parkeri*)

Type: Holotype, BMNH 1949.2.3.47, a 160 mm female (R.H.R. Taylor; 1932–1933).
Type locality: "Degeh Bar, Harerge Region, Ethiopia (8°13'N: 43°30'E) at 1067m" [= Degeh Bur, Hararge Region, SE Ethiopia, 08°13'N, 43°34'E, elevation 1065 m].
Distribution: Southeastern Ethiopia (Hararge), 1065 m. Known only from type locality.
Sources: Parker, 1949, Largen & Rasmussen, 1993, Broadley & Wallach, 2007a, Largen & Spawls, 2010 and Boundy, 2013.

18. *Myriopholis perreti* (Roux-Estève, 1979a). Rev. Suisse Zool. 86(2): 464–466, fig. 1. (*Leptotyphlops perreti*)

Type: Holotype, MHNG 1453.11, a 233 mm male (J.-L. Perret, 1967).
Type locality: "Ebolowa, Cameroun" [= Ebolowa, W Sud Province, SW Cameroon, 02°55'N, 11°09'E, elevation 600 m].
Distribution: Southeastern Cameroon (Est, Sud) and SE Gabon (Haut-Ogooué), 410–585 m.
Sources: Hallermann & Rödel, 1995, LeBreton, 1999, Chirio & LeBreton, 2007, Pauwels & David, 2008b and Pauwels & Vande weghe, 2008.
Remarks: Elevation of Ebolowa 800 m *fide* Chirio & LeBreton (2007: 358).

19. *Myriopholis phillipsi* (T. Barbour, 1914). Proc. New England Zool. Club 5: 87–88, 2 figs. (*Leptotyphlops phillipsi*)

Type: Holotype, MCZ 9650, a 243 mm female (J.C. Phillips & W.M. Mann, 1914).
Type locality: "Petra, Arabia" [= Petra, Ma'an Govern., SW Jordan, 30°20'N, 35°27'E, elevation 915 m].
Distribution: Southeastern Turkey (Adiyaman, Gaziantep, Hatay, Mardin, Sanliurfa, Siirt, Urfa), Syria, Israel (Jerusalem, Southern, West Bank) and Jordan (Aqabah, Balqa, Maan, Madaba, Mafraq), 475–1000 m.
Sources: Corkill & Cochrane, 1966, Werner & Drook, 1967, Hoofien, 1972, Baran, 1976, 1978, 1982, Hahn, 1978, Y.L. Werner, 1987, 1995, Bouskila & Amitai, 2001, Disi et al., 2001, Ugurtas et al., 2006, Yildiz et al., 2009, Amr & Disi, 2011 and Bar & Haimovitch, 2011.

20. *Myriopholis rouxestevae* (J.-F. Trape & Mané, 2004). Bull. Soc. Herp. France (109): 8–9, fig. 3. (*Leptotyphlops rouxestevae*)

Type: Holotype, MNHN 2000.2515 (formerly ORSTOM S-5673), a 133 mm specimen.
Type locality: "Ndébou, Tambacounda (12°31'N–12°27'W)" [= Ndébou, Kédougou Dept., SE Senegal, 12°31'N, 12°20'W, elevation 165 m].
Distribution: Southern Senegal (Kédougou, Kolda) and SW Mali (Koulikoro), 145–165 m.
Source: J.-F. Trape & Mané, 2006b.

21. *Myriopholis wilsoni* (Hahn, 1978). J. Herp. 12(4): 478–479, fig. 1. (*Leptotyphlops wilsoni*)

Type: Holotype, BMNH 1957.1.10.28, a 100 mm specimen (H.D. Gwynne, 1956).
Type locality: "Kirschon, Socotra Island; elevation 634 meters" [= Wadi Qishn, Socotra Is., Al Hudaydah Govern., Yemen, 12°34'N, 54°02'E, elevation 1000 m].
Distribution: Yemen (Socotra Is.), 170–1065 m.
Sources: Corkill & Cochrane, 1966, Hahn, 1978, Hallermann & Rödel, 1995, Schätti & Desvoignes, 1999, Rösler &Wranik, 2004, 2006 and Razzetti et al., 2011.
Remarks: Type locality spelled "Kischen" *fide* Corkill & Cochrane (1966: 496).

22. *Myriopholis yemenica* (Scortecci, 1933). Atti. Soc. Ital. Sci. Nat. Mus. Civ. Stor. Nat. Milano 72(2): 165–166, 3 figs. (*Leptotyphlops yemenicus*)

Type: Holotype, MSNM 3354, a 91–92 mm specimen (G. Franchini, 1933).
Type locality: "Yemen."
Distribution: Yemen. Known only from type locality.
Source: Wallach & Lanza, 2004.

MYRON Gray, 1849a (Homalopsidae)

Synonym: *Neospades* De Vis, 1889.
Type species: *Myron richardsonii* Gray, 1849a.
Distribution: Tidal rivers and coastal marine waters of Australasia.
Sources: Gyi, 1970, Whitaker et al., 1982, Cogger et al., 1983a, F. Parker, 1982, Storr et al., 1986, S.K. Wilson & Knowles, 1988, Gow, 1989, O'Shea, 1996, Cogger, 2000, J.C. Murphy, 2007b, 2011, Alfaro et al., 2008 and Zaher et al., 2009.

1. *Myron karnsi* J.C. Murphy, 2011. Raffles Bull. Zool. 59(2): 231–232, figs. 2a–d.

Type: Holotype, SMF 19569, a 397 mm female.
Type locality: Indonesia Aru, Kobroor, Selrutti (about 5°46'S and 134°31'E)."
Distribution: Eastern Indonesia (Aru Arch.). Known only from type locality.

M

2. *Myron resetari* J.C. Murphy, 2011. Raffles Bull. Zool. 59(2): 232, figs. 3a–d (paratype).

Type: Holotype, QM J52861, a 395 mm male..
Type locality: Broome, Western Australia (about 17°58'S and 122°14'E)."
Distribution: Australia (Western Australia), 10 m. Known only from type locality.

3. *Myron richardsonii* Gray, 1849a. Cat. Snakes Brit. Mus.: 70.

Synonym: *Neospades kentii* De Vis, 1889.
Type: Holotype, BMNH 1946.1.2.43, a female without skull (J. Richardson).
Type locality: "N.-West Australia." Restricted to Buffalo Creek, Northern Territory, Australia, ca. 12°40'S, 131°29'E *fide* J.C. Murphy (2011: 232).
Distribution: Southern Papua New Guinea (Western, Gulf, Daru Is.) and N Australia (ext. N Western Australia, ext. N Northern Territory, ext. N Queensland), NSL–40 m.

MYRROPHIS A.B. Kumar, Sanders, George & Murphy, 2012 (Homalopsidae)

Type species: *Hypsirhina chinensis* Gray, 1842d.
Distribution: Tidal rivers and coastal marine waters of Eastern Asia.
Sources: Gyi, 1970, I. Das, 2010, 2012 and A.B. Kumar et al., 2012.
Remarks: A valid genus *fide* A.B. Kumar et al. (2012: 484). Previously a synonym of *Enhydris*.

1. *Myrrophis bennettii* (Gray, 1842d). Zool. Misc. 2(May): 67. (*Hypsirhina bennettii*)

Synonym: *Hypsirhina maculata* A.-M.-C. Duméril, Bibron & Duméril, 1854b.
Type: Holotype, BMNH 1946.1.2.49, male (G. Bennett).
Type locality: "China."
Distribution: Southeastern Asia. Southeastern China (Fujian, Guangdong, Guangxi, Hainan, Hong Kong), Macau and Vietnam (Quang Ninh).
Sources: Stejneger, 1907a, C.H. Pope, 1935, Romer, 1979a, Karsen et al., 1986, Tian et al., 1986, Iskandar, 1987, Easton & Leung-Va, 1993, Zhao & Adler, 1993, Zhao, 2006, V.S. Nguyen et al., 2009 and A.B. Kumar et al., 2012.
Remarks: Java record in error *fide* J.C. Murphy (2007b: 91).

2. *Myrrophis chinensis* (Gray, 1842d). Zool. Misc. 2(May): 66. (*Hypsirhina chinensis*)

Synonym: *Hypsirhina sinensis* Stanley, 1915 *(nomen emendatum).*
Type: Holotype, BMNH 1946.1.2.42, a 419 mm male (J.R. Reeves).
Type locality: "China."
Distribution: Southeastern Asia. Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Hainan, Hong Kong, Hubei, Jiangsu, Jiangxi, Zhejiang), Taiwan and N Vietnam (Bac Giang, Dak Lak, Da Nong, Hai Duong, Hanoi, Ha Tinh, Hoa Binh, Nghe An, Son La, Thai Nguyen, Thanh Hoa, Vinh Phuc), NSL–200 (1100) m.
Sources: Maki, 1931, C.H. Pope, 1935, Romer, 1979a, Karsen et al., 1986, Zhao & Adler, 1993, Orlov et al., 2000, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010 and A.B. Kumar et al., 2012.

N

NAJA Laurenti, 1768 (Elapidae)

Synonyms: *Naia* Merrem, 1820 *(nomen emendatum), Aspis* Wagler, 1830 *(nomen praeoccupatum), Tomyris* Eichwald, 1831, *Najia* – Owen, 1841a *(nomen incorrectum), Naje* – C.C. Vogt, 1851 *(nomen incorrectum), Naya* – Kelaart, 1853 *(nomen incorrectum), Haja* – Higgins, 1873 *(nomen incorrectum), Naga* Nicholson, 1874 *(nomen emendatum),* and *Noja* – Oshima, 1944 *(nomen incorrectum).*

Type species: *Coluber naja* Linnaeus, 1758.

Distribution: Asia and East Indies.

Sources: F. Werner, 1923b, Bogert, 1943, Klemmer, 1968, Minton et al., 1970, Golay, 1985, Szyndlar & Rage, 1990, Jintakune & Chanhome, 1995, Ulber, 1995, Golay et al., 1993, Keogh, 1998, David & Ineich, 1999, Slowinski & Keogh, 2000, Dobiey & Vogel, 2007, Wüster et al., 2007, Hoser, 2009c, 2012a, e, Wallach et al., 2009, I. Das, 2010, 2012, Groen, 2010a–b and Zaher et al., 2009, 2012.

Remarks: *Boulengerina* (*B. annulata* and *B. christyi*) and *Paranaja* (*P. multifasciata*) congeneric with *Naja fide* Wüster et al. (2007: 445). Wallach et al., 2009 allocated cobras (*Naja*) to four subgenera, here considered genera based on Wüster et al., 2007 and Zaher et al., 2012: *Afronaja (ashei, katiensis, mossambica, nigricollis, nigricincta, nubiae, pallida), Boulengerina* (*annulata, christyi, melanoleuca, multifasciata*), *Naja (atra, kaouthia, mandalayensis, naja, oxiana, philippinensis,*†*N. romani, sagittifera, samarensis, siamensis, sputatrix, sumatrana),* and *Uraeus (anchietae, annulifera, arabica, haje, nivea, senegalensis*). Five extinct species (†*N. antiqua,* †*N. depereti,* †*N. iberica*, †*N. robusta,* †*N. romani*) are placed in *Afronaja* based on dentition *fide* Bogert, 1943 and Szyndlar & Rage, 1990.

1. *Naja atra* Cantor, 1842a. Zool. Chusan: pl. 10.

Synonyms: *Naja tripudians nigra* Gray, 1834, *Naja tripudians scopinucha* Cope, 1860b, *Naja lutescens larvata* Steindachner, 1867 *(nomen praeoccupatum), Naga tripudians monocellata* Nicholson, 1874, *Naja tripudians unicolor* W.C.H. Peters *in* Martens, 1876 *(nomen substitutum),* and *Naja naja atrox* Sarkar & Devi, 1968 *(lapsus calami).*

Type: Holotype, not designated (T.E. Cantor, July 1840–March 1841), lost *fide* Golay et al. (1993: 185).

Type locality: "island of Chusan, or Great Chusan, is situated on the East Coast of China, between the 30° and 31° of North latitude and the 122° and 123° of East longitude; separated from the nearest mainland, Keeto Point, by an arm of the sea, about ten miles across" [= Zhoushan Is., Zhoushan Arch., Zhejiang Prov., E China].

Distribution: Southeastern Asia. Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hong Kong, Hubei, Hunan, Macau, Sichuan, Yunnan, Zhejiang, Hainan, Lammock and Zhoushan Is.), Taiwan (T'ai-pei, T'ai-nan), N Laos (Bolikhamsai), and Vietnam (Bac Giang, Bac Kan, Cao Bang, Hai Duong, Hai Phong, Hanoi, Ha Tay, Ha Tinh, Hoa Binh, Hoang Lien Son, Lang Son, Lao Cai, Nghe An, Ninh Binh, Phu Tho, Quang Binh, Quang Ninh, Quang Tri, Son La, Thai Binh, Thai Nguyen, Thanh Hoa, Thua Thien-Hue, Tuyen Quang, Vinh Phu, Cu Lao Ba Mun Is.), NSL–1600 m.

Sources: Stejneger, 1907a, Stanley, 1915, Maki, 1931, Bourret, 1934f, 1936a–b, 1939?, C.H. Pope, 1935, Herklots, 1938, Kuntz, 1963, Mao, 1963, E.H. Taylor, 1965, Deuve, 1970, Romer, 1972, 1979a, Tian et al., 1986, Lue, 1987, 1990, M.J. Cox, 1991b, Wüster & Thorpe, 1992b, Easton & Leung-Va, 1993, Zhao & Adler, 1993, Wüster et al., 1995, Wüster, 1996, Xie et al., 1998, Darevsky, 1999, Orlov et al., 2000, Slowinski & Wüster, 2000, Leviton et al., 2003, V.S. Nguyen et al., 2009 and Xiang & Li, 2009.

Remarks: Supplemental original description in Cantor (1842b: 482–483).

2. *Naja kaouthia* Lesson, 1831. Bull. Sci. Nat. Géol., Paris 25(4): 122.

Synonyms: *Naja tripudians fasciata* Gray, 1834, *Naja larvata* Cantor, 1839a, *Naja tripudians viridis* Wall, 1913b, *Naja kaothia* – Wall, 1913i *(nomen incorrectum), Naja naja kauothia* – Kabara & Fischer, 1972 *(nomen incorrectum), Naja kaouthia suphanensis* Nutaphand, 1986b, *Naja kauthia* – Khole, 1991 *(nomen incorrectum),* and *Naja naja combodia* Khole, 1991 *(lapsus calami).*

Type: Holotype, formerly MNHN, a 2475 mm specimen illustrated in Lesson, 1832 *in* Bélanger (1831–1834: pl. 2) (R.-P. Lesson [Astrolabe Voy.], 1826–1829), lost *fide* Kramer (1977: 752).

Type locality: "Inde continentale" [= continental India]. Restricted to Bengale [= NE India or Bangladesh] *fide* Lesson (1834: 313).

Distribution: Southeastern Asia. India (Arunachal Pradesh, Assam, Bihar, Delhi, Haryana, Manipur, Meghalaya, Mizoram, Nagaland, Orissa, Sikkim,

Uttar Pradesh, West Bengal), Nepal (Darchula, Jhapa, Kanchanpur, Nawalparasi, Rupandehi, Solukhumbu, Saptari, Siraha, Sunsari), Bhutan, Bangladesh, Myanmar (Ayeyarwady, Bago, Chin, Kachin, Magway, Mandalay, Rakhnie, Sagaing, Shan, Yangon), SW China (Xizang, Yunnan), Thailand (Ang Thong, Chachoengsao, Chanthaburi, Chiang Mai, Chon Buri, Kanchanaburi, Krabi, Krung Thep Mahanakhon, Loei, Lop Buri, Mae Hong Son, Nakhon Ratchasima, Nakhon Sawan, Nan, Nakhon Pathom, Nakhon Si Thammarat, Narathiwat, Nonthaburi, Pathum Thani, Pattani, Phang Nga, Phra Nakhon Si Ayutthaya, Phatthalung, Phitsanulok, Phuket, Samut Prakan, Saraburi, Satun, Sing Buri, Songkhla, Suphan Buri, Tak, Trang), West Malaysia (Kedah, Kelantan, Perak, Perlis, Pinang), Cambodia (Chhnang, Kampong, Kampot, Siem Reap), S Laos (Balikhansai) and S Vietnam (Dak Lak, Ho Chi Minh City, Kien Giang, Lam Dong, Quang Tri), NSL–3200 m.

Ahmed et al., 2009, V.S. Nguyen et al., 2009 and S.K. Sharma et al., 2013.

Remarks: Supplemental original description in Lesson, 1832, *in* Bélanger (1831–1834: 312–314, pl. 2).

N

3. *Naja mandalayensis* Slowinski & Wüster, 2000. Herpetologica 56(2): 260–264, fig. 1.

Type: Holotype, CAS 207097, an 828 mm male (J.B. Slowinski, 6 May 1998).

Type locality: "near Monywa (N 22°13'; E 95°20'), Sagaing Division, Myanmar."

Distribution: Central Myanmar (Magwe, Mandalay, Sagaing, Shan), 70–90 m.

Source: Leviton et al., 2003.

Remarks: Probably occurs in NE India (Bihar) *fide* Slowinski & Wüster (2000: 264).

4. *Naja naja* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 221. (*Coluber naja*)

Synonyms: *Naja brasiliensis* Laurenti, 1768, *Naja fasciata* Laurenti, 1768, *Naja lutescens* Laurenti, 1768, *Naja maculata* Laurenti, 1768, *Naja non naja* Laurenti, 1768, *Coluber brasiliae* Lacépède, 1789 (*nomen rejiciendum*), *Coluber caecus* Gmelin, 1789, *Coluber rufus* Gmelin, 1789, *Coluber non naja* Lacépède, 1789 (*nomen rejiciendum*), *Coluber peruvii* Lacépède, 1789 (*nomen rejiciendum*), *Vipera pileata* Lacépède, 1789 (*nomen rejiciendum* and *nomen nudum*), *Coluber naja brasiliensis* Bonnaterre, 1790, *Coluber naja peruvianus* Bonnaterre, 1790, *Coluber rufoalbus* Suckow, 1797, *Naja tripudians* Merrem, 1820 *(nomen substitutum), Naja nigra* Gray, 1830 *in* Gray & Hardwicke, 1830–1835, *Naja goerou* Lesson, 1832 *in* Bélanger, 1831–1834, *Naga tripudians binocellata* Nicholson, 1874, *Naia naia polyocellata* Deraniyagala, 1939, *Naja naja gangetica* Deraniyagala, 1945, *Naja naja madrasiensis* Deraniyagala, 1945, *Naja naja indusi* Deraniyagala, 1960b, *Naja naja bombaya* Deraniyagala, 1961b, *Naja naja karachiensis* Deraniyagala, 1961b, *Naja maja* – F. Miranda, Rochat & Lissitzky, 1964 *(nomen incorrectum), Notechis tripudians* Chapman, 1968 *(lapsus calami), Naja naja ceylonicus* Chatnam & Dimari, 1974, and *Naja naja Indian* – Ménez, 1985 *(nomen incorrectum),* and *Naja tripudis* – Khole, 1991 *(nomen incorrectum).*

Type: Lectotype, NHR Lin-90 (formerly MAFR), an 1140 mm male (Mus. Drottn.), designated herein.

Type locality: "India orientali" [= eastern India, including Sri Lanka] via lectotype selection. Restricted to India *fide* M.A. Smith (1943: 427).

Distribution: Southern Asia. Pakistan (Balochistan, F.A.T.A., Jammu & Kashmir, Khyber Pakhtunkhwa, Punjab, Sindh), Nepal (Banke, Bardiya, Chitwan, Dadeldhura, Dang, Jhapa, Kailali, Kanchanpur, Kathmandu, Makwanpur, Parsa, Rupandehi, Sankhuwasabha, Sunsari, Saptari, Sindhuli, Surkhet, Tehrathum), Bhutan (Sarpang), India (Andhra Pradesh, Bihar, Delhi, Goa, Gujarat, Haryana, Himachal Pradesh, Jammu and Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, West Bengal), W Bangladesh and Sri Lanka (Central, N Eastern, North-Central, Northern, North-Western, Sabaragamuwa, Uva, Western), NSL–2000 m.

Silva, 1980a, Tiwari & Sharma, 1970, R. Sharma, 1971, 1976a, Kramer, 1977, Singh, 1972, Fleming & Fleming, 1973, M.A.R. Khan, 1988, M.S. Khan, 1983, 2002, Joger, 1984, Wüster & Thorpe, 1987, 1989, 1992a–b, A. Silva, 1990a–b, 2001, 2009, Jintakune & Chanhome, 1995, Wüster, 1996, 1998a, Das & Palden, 2000, Slowinski & Wüster, 2000, Tiwari & Shah, 2004, Whitaker & Captain, 2004, N. Khaire, 2006, Castoe et al., 2007, Einfalt, 2012, Masroor, 2012, Wangyal, 2012 and S.K. Sharma et al., 2013.

Remarks: Original description based on Seba (1734: 71, pl. 44, fig. 1; 1735: 90–91, pl. 85, fig. 1; 1735: 95, pl. 89, figs. 1–4; 1735: 96, pl. 90, figs. 1–2; 1735: 99, pl. 94, fig. 1; 1735: 102–103, pl. 97, figs. 1–4). Original color sketches of holotype of *Naja tripudians* by Hardwicke

(1756–1823) (1: figs. 169–170) in BMNH. Type locality restriction to Sri Lanka *fide* Deraniyagala (1945: 108) invalid. Holotype listed in ZMUU *fide* Deraniyagala (1955: 74). Neotype designation of Sri Lanka specimen in BMNH *fide* Deraniyagala (1949: 109) invalid, based on *Naja naja polyocellata* Deraniyagala (1939: 235, pl. 211, figs. a–d). One syntype (460 mm specimen described and figured in Linnaeus 1754: 30, pl. 21, fig. 3) is lost *fide* Deraniyagala (1960b: 61), Wallin (1992: 226) and Golay et al. (1993: 189). Another syntype exists in NHR *fide* Andersson (1899: 17) and Deraniyagala (1960: 49). Possibly occurs in E Afghanistan *fide* Wüster & Thorpe (1992: 75).

5. *Naja oxiana* (Eichwald, 1831). Zool. Spec. Rossiae 3: 171. (*Tomyris oxiana*)

Synonym: *Naja noxiana* Munjal & Elliott, 1972 *(nomen incorrectum).*

Type: Holotype, ZISP 8728, a 762 mm specimen (K.E.I. Eichwald, 1825–1826), lost *fide* Golay et al. (1993: 190).

Type locality: "caspii maris littore orientali, prope Oxum amnem ad pristinum hujus ostium in sinu balchanensi" [= eastern shore of Caspian Sea near the former mouth of the Amu Darya (= Oxus) River, NW Turkmenistan or SW Kazakhstan].

Distribution: Southwestern Asia. Southwestern Tadzhikistan, Turkmenistan, Uzbekistan, NE Iran (Mazandaran, Razavi Khorasan, Semnan), N and E Afghanistan (Kabul, Nangarhar), N Pakistan (N Balochistan, F.A.T.A., Gilgit-Baltistan, Khyber Pakhtunkhwa, Punjab) and ext. NW India (Himachal Pradesh, Jammu and Kashmir, Khyber Pakhtunkhwa, N Punjab), 245–2100 m.

Sources: Strauch, 1873, Nikolsky, 1899b, 1905, 1916, M.A. Smith, 1943, Minton, 1966, S.C. Anderson & Leviton, 1969, Leviton & Anderson, 1970a, R. Sharma, 1974, Mahajan & Agrawal, 1976, M.S. Khan, 1983, 2002, Sahi & Duda, 1986, Latifi, 1991, Kudrjavtsev & Mamet, 1989a, Wüster & Thorpe, 1991, 1992a–b, Szczerbak, 1994, Wüster, 1996, 1998a, Slowinski & Wüster, 2000, Ananjeva et al., 2004, Whitaker & Captain, 2004 and Masroor, 2012.

Remarks: Supplemental original description in Eichwald (1841–1842: 104–105, pl. 20, figs. 1–2). Amu Darya River currently enters the Aral Sea in N Uzbekistan but in the past has also entered the Caspian Sea (and at times both seas).

6. *Naja philippinensis* E.H. Taylor, 1922a. Snakes Phil. Is.: 265–268. (*Naja naja philippinensis*)

Synonyms: *Naja philippinesis* – Hati, Mandal & Hati, 1990 *(nomen incorrectum)* and *Naja philippeninsis* – Khole, 1991 *(nomen incorrectum).*

Type: Holotype, BSM 7, a 1000 mm female (C. Canonizado), destroyed in January 1945 during World War II.

Type locality: "Manila, Philippine Islands" [= Manila, Manila Prov., SW Luzon Is., N Philippines, 14°36'N, 120°59'E, elevation 10 m].

Distribution: Northern Philippines (Luzon, Mindoro, Marinduque, Masbate).

Sources: Leviton, 1965b, Wüster & Thorpe, 1990, 1992b, Gaulke & Altenbach, 1994, R.M. Brown et al., 1996, Wüster, 1996 and Slowinski & Wüster, 2000.

Remarks: Probably occurs on Polillo and Catanduanes Is., Philippines *fide* Wüster & Thorpe (1990: 341).

7. *Naja sagittifera* Wall, 1913b. J. Bombay Nat. Hist. Soc. (1913–1914) 22(2): 247–248. (*Naja tripudians sagittifera*)

Type: Holotype, ZSI 4011 (formerly IMC) (N. Annandale, 1900–1913).

Type locality: "the Andamans" [= Andaman & Nicobars, E India, Bay of Bengal].

Distribution: Eastern India (Andaman & Nicobars: South Andaman Is.).

Sources: Biswas & Sanyal, 1980, Wüster & Thorpe, 1994, Wüster et al., 1995, Wüster, 1996 and Slowinski & Wüster, 2000.

Remarks: Resurrected as a valid species *fide* Wüster et al. (1995: 504).

8. *Naja samarensis* W.C.H. Peters, 1861c. Mber. Königl. Akad. Wiss. Berlin 1861(4): 690. (*Naja tripudians samarensis*)

Synonyms: *Naja naja saramensis* – Bourret, 1936 *(nomen incorrectum)* and *Naja naja samarenis* – Trethewie, 1971 *(nomen incorrectum).*

Type: Holotype, ZMB 3955 (F. Jagor, July 1860).

Type locality: "Loquilocun, Insel Samar" [= Loquilocon, Paranas Pueblo, W Samar, cen. Philippines, 11°48'N, 125°06'E].

Distribution: Southeastern Philippines (Bohol, Camiguin [Sur], Dinagat, Leyte, Mindanao, Samar), NSL–1000 m.

Sources: E.H. Taylor, 1922a, Leviton, 1965b, Wüster & Thorpe, 1990, 1992b, Ross & Lazell, 1991, B.E. Smith, 1993, Wüster, 1996, 1998a and Slowinski & Wüster, 2000.

Remarks: Probably occurs on Siargao and Basilan Is., Philippines *fide* Wüster & Thorpe (1990: 341).

9. *Naja siamensis* Laurenti, 1768. Synop. Rept.: 91.

Synonyms: *Naja naja siamenesis* – Kamel, 1974 *(nomen incorrectum)* and *Naja naja isanensis* Nutaphand *in* Nutaphand & Tumvipart, 1982.

Type: Neotype, BMNH 1987.678, a 936 mm female, designated by Wüster et al. (1997: 776).

Type locality: "Ban Phai district hospital" [= Bao Phai Distr., Khon Kaen Prov., NE Thailand] via neotype selection.

Distribution: Southeast Asia. Thailand (Buriram, Chainat, Chanthaburi, Chilang Mai, Chiang Saen, Chon Buri, Kamphaeng Phet, Kanchanaburi, Khon Kaen, Lampang, Mae Hong Son, Nakhon Phanom, Nakhon Ratchasima, Nakhon Sawan, Phetchabun, Phitsanulok, Phrae, Sing Buri, Si Saket, Suphan Buri, Trat, Udon Thani, Uthai Thani, Uttaradit, Yasothon), Cambodia (Trapeang Chan), Laos (Champasak, Savannakhet) and S Vietnam (Binh Phuoc, Dong Nai, Gia Lai, Ho Chi Minh City, Kien Giang, Kon Tum, Tay Ninh), NSL–260 m.

Sources: Viravan et al., 1991, Wüster & Thorpe, 1994, Jintakune & Chanhome, 1995, Wüster et al., 1995, M.J. Cox et al., 1998, Chan-ard et al., 1999, 2000, Slowinski & Wüster, 2000, Teyné & David, 2007 and V.S. Nguyen et al., 2009.

Remarks: Type specimen(s) lost *fide* Wüster et al. (1997: 772). Probably occurs in Myanmar adjacent to Thailand *fide* Wüster et al. (1995: 503).

10. *Naja sputatrix* F. Boie, 1827. Isis von Oken 20(6): 557.

Synonyms: *Naja sputatrix* H. Boie *in* Schlegel, 1826a *(nomen nudum), Naja sputatrix* Schlegel, 1826b *(nomen nudum),* Coluber *castaneus* Oppel *in* F. Boie, 1827 *(nomen nudum), Elaps fuscus* Merrem, 1820, *Naja leptocoryphaea* Berthold, 1842, and *Naja tripudians sondaica* Schlegel, 1844 *in* 1837–1844 & Schlegel *in* S. Müller & Schlegel, 1844b *(partim).*

N

Types: Syntypes (2), RMNH (C.G.C. Reinwardt, 1816–1821), and specimen described and illustrated in P. Russell (1801: 41, pl. 36).

Type locality: "Java" [SW Indonesia]

Distribution: Lesser Sundas of S Indonesia (Alor, Bali, Flores, Java, Komodo, Lomblen, Lombok, Rinca, Sumbawa), NSL–700 m.

Sources: Rooij, 1917, Dunn, 1927, Mertens, 1930, Bergman, 1962a, Capoccacia, 1976, Auffenberg, 1980, Wüster & Thorpe, 1989, 1990, Wüster, 1996, McKay, 2006 and Lang, 2011.

Remarks: Original description based on H. Boie's MS (1823–1825) and P. Russell (1801: 41, pl. 36). Sulawesi record doubtful *fide* Lang & Vogel (2005: 260) and Timor record requires confirmation *fide* I. Das (2010: 317).

11. *Naja sumatrana* F. Müller, 1887. Verh. Naturf. Ges. Basel 8(2): 277–278. (*Naja tripudians sumatrana*)

Synonyms: *Naja tripudians sondaica* Schlegel, 1844 *in* 1837–1844 & Schlegel *in* S. Müller & Schlegel, 1844b *(partim), Naia tripudians leucodira* Boulenger, 1896a, *Naia tripudians miolepis* Boulenger, 1896a, *Naja tripudians paucisquamis* Peracca, 1899, *Naja sputatrix malayae* Deraniyagala, 1960b, and *Naja naja moilepis* – Trethewie, 1971 *(nomen incorrectum).*

Type: Holotype, NMBA 2244, a female (S. Müller, Dec. 1825–Sept. 1837).

Type locality: "Solok (Sumatra)" [= Solok, W Sumatra, W Indonesia, 00°48'S, 100°39'E, elevation 400 m].

Distribution: Malay Peninsula and East Indies. Southern Thailand (Nakhon Si Thammarat, Narathiwat, Pattani, Phang Nga, Phatthalung, Surat Thani, Trang), West Malaysia (Johor, Kedah, Melaka, Negeri Sembilon, Perak, Perlis, Pinang, Selangor), Singapore, East Malaysia (Sabah, Sarawak), Brunei, Indonesia (Bangka, Belitung, Bintan, Bulan, Galang, Kalimantan, Karimun, Lingga Arch., Penuba, Riau Arch., Sumatra) and ext. SW Philippines (Culion, Palawan), NSL–1370 m.

Sources: E.H. Taylor, 1922a, C. Haas, 1950, Leviton, 1965b, 1968b, Wüster, 1988, 1996, Wüster & Thorpe, 1989, 1990, 1992b, M.J. Cox, 1991b, Stuebing, 1991, David & Vogel, 1996, M.J. Cox et al., 1998, Slowinski & Wüster, 2000, Malkmus et al., 2002 and I. Das, 2007b.

Remarks: Probably occurs on Balabac and Calamianes Is., Philippines *fide* Wüster & Thorpe (1990: 341).

†*NAJASH* Apesteguía & Zaher, 2006 (†Najashidae)

Type species: †*Najash rionegrina* Apesteguía & Zaher, 2006.

Distribution: Upper Cretaceous of Argentina.

Sources: Apesteguía & Zaher, 2006, J. Gauthier et al., 2012 and Palci et al., 2013.

Remarks: Palci et al. (2013: 132, 136) listed the holotype as MPCA 389, MPCA 391–397 and MPCA 400 and showed the "type locality" to be sites from 5–30 km distant from one another.

1. †*Najash rionegrina* Apesteguía & Zaher, 2006. Nature 440(7087): 1037–1039, figs. 1–2.

Type: Holotype, MPCA 390–98 and MPCA 400, one dentary, one splenial, 122 vertebrae, and a pelvis with two femurs, one fibula, and a right tibia.

Type locality: "Upper section of the Candeleros Formation (Cenomanian-Turonian) at 'La Buitrera', Rio Negro Province, north Patagonia, Argentina." Emended to 'La Buitrera' fossil locality between the villages of El Chocón and Cerro Policía, about 80 km SW Cipolletti close to the S shore of Lake Ezequiel Ramos-Mexía *fide* Makovicky et al. (2005: 1007).

Distribution: Middle Cretaceous (Cenomanian: 97.0–100.5 mya) of Argentina. Known only from type locality.

NAMIBIANA Hedges, Adalsteinsson & Branch *in* Adalsteinsson, Branch, Trape, Vitt & Hedges, 2009 (Leptotyphlopidae)

Type species: *Leptotyphlops occidentalis* V.F.M. FitzSimons, 1962b.
Distribution: Southwestern Africa.
Sources: Hahn, 1980a, Wallach, 1998b, Broadley & Broadley, 1999 and McDiarmid et al., 1999.

1 *Namibiana gracilior* (Boulenger, 1910a). Ann. So. Afr. Mus. 5(9): 524. (*Glauconia gracilior*)

Types: Syntypes (11), BMNH 1946.1.16.51 (formerly BMNH 1910.8.5.2), BMNH 1946.1.16.93 (formerly BMNH 1910.8.5.3), SAM 2398, SAM 2418–19, SAM 3359, SAM 9182, SAM 9184, SAM 8068, SAM 43241 and SAM 43542, longest syntype 240 mm.
Type locality: "Cape Colony, South Africa. Van Rynsdorp (A.W. Rogers); Matjesfontein (Purcell); Clanwilliam (Leipoldt)" [= Vanrhynsdorp, N Western Cape, South Africa, 31°36'S, 18°44'E, elevation 120 m; Matjesfontein, S Eastern Cape, South Africa, 33°33'S, 26°20'E, elevation 150 m; Clanwilliam, N Western Cape, South Africa, 32°11'S, 18°53'E, elevation 100 m].
Distribution: Southern Namibia (Lüderitz, Rehoboth) and SW South Africa (S Eastern Cape, W Northern Cape, Western Cape), 100–190 m.
Sources: V.F.M. FitzSimons, 1962a, 1974, Elzen, 1980, Broadley, 1983, Branch, 1988, 1998, Marais, 1992, 2004, Branch & Bauer, 1995, Broadley & Wallach, 1997a and Broadley & Broadley, 1999.
Remarks: Broadley & Broadley (1999: 13) erroneously list Robertson (SAM 1858) as a type locality.

2. *Namibiana labialis* (Sternfeld, 1908a). Sitz. Ges. Naturf. Freunde Berlin 1908(4): 92. (*Glauconia labialis*)

Type: Holotype, ZMB 21691, a 170 mm male (O. Dempwolff, 1899–1901).
Type locality: "Outgo (D. S. W. Africa)" [= Outjo, Outjo Prov., Namibia, 20°07'S, 16°09'E, elevation 1265 m].
Distribution: Southwestern Angola (Cunene) and NW Namibia (Erongo, Khomas, Kunene, Oshikoto, Otjozondjupa), 240–2220 m.
Sources: Mertens, 1955, 1971, V.F.M. FitzSimons, 1962a, 1974, Broadley & Watson, 1976, Broadley, 1983, Branch, 1988, 1998, Bauer et al., 1993, Broadley & Broadley, 1999, Bauer et al., 2002 and Marais, 2004.

3. *Namibiana latifrons* (Sternfeld, 1908a). Sitzber. Ges. Naturf. Freunde Berlin 1908(4): 94–95. (*Glauconia latifrons*)

Synonyms: *Stenostoma scutatum* Peters, 1865 and *Glauconia lepezi* Boulenger, 1901a.
Type: Lectotype, BMNH 1864.6.14.5, a 175 mm specimen (J.J. Monteiro, 1861–1864), designated by Broadley & Watson (1976: 483).
Type locality: "Benguela, Angola" [= Benguela, Benguela Prov., SW Angola, 12°35'S, 13°24'E, elevation 10 m] via lectotype selection.
Distribution: Southwestern Democratic Republic of the Congo (Bas-Congo) and W Angola (W Benguela, Cuanza Sul), NSL–30 m.
Sources: Broadley & Watson, 1976 and Broadley & Broadley, 1999.

4. *Namibiana occidentalis* (V.F.M. FitzSimons, 1962b). Ann. Transvaal Mus. 24(2–3): 239–240, fig. 1. (*Leptotyphlops occidentalis*)

Type: Holotype, TMP 5017, a 206 mm specimen (G. van Kerkhoff, 31 March 1912).
Type locality: "Keetmanshoop, Great Namaqualand, South-West Africa" [= Keetmanshoop, Keetmanshoop Prov., S Namibia, 26°34'S, 18°08'E, elevation 1000 m].
Distribution: Namibia (Erongo, Gobabis, Hardap, Karas, Khomas, Kunene, Omaheke) and W South Africa (Northern Cape), 20–1425 m.
Sources: V.F.M. FitzSimons, 1962a, 1974, Broadley & Watson, 1976, Broadley, 1983, Branch, 1988, 1998, 2001 Marais, 1992, 2004, Bauer et al., 1993, Broadley & Broadley, 1999 and Bauer & Branch, 2001.

N

5. *Namibiana rostrata* (Bocage, 1886). J. Sci. Math. Phys. Nat., Lisboa 11(43): 173–174. (*Stenostoma rostratum*)

Synonym: *Leptotyphlops rostratus* Hahn, 1980a.
Type: Holotype, MBL, a 192 mm specimen (J.A. d'Anchieta, 1861–1866), destroyed by fire 18 March 1978.
Type locality: "Humbe, sur les bords du Cunene" [= Humbe, border of Cunene River, Cunene Prov., SW Angola, 16°41'S, 14°54'E, elevation 1100 m].
Distribution: Western Angola (Cunene, Luanda, Malanje, Namibe), 1060–1325 m.
Sources: Boulenger, 1893a, Bocage, 1895, Hahn, 1980 and Broadley & Broadley, 1999.
Remarks: The Kibwezi, Kenya records (ZMB) cited by Wallach *in* McDiarmid et al. (1999: 41) are *Leptotyphlops scutifrons merkeri*.

†*NANOWANA* Scanlon, 1997 (†Madtsoiidae)

Type species: †*Nanowana godthelpi* Scanlon, 1997.
Distribution: Lower Miocene of Australia.
Source: Scanlon, 1997.

1. †*Nanowana godthelpi* Scanlon, 1997. Mem. Queensland Mus. 41(2): 396–399, figs. 1a–f, 2a–i.

Type: Holotype, QMF 31379, partial to complete two maxillae, two palatines and two pterygoids of single individual.
Type locality: "early Miocene (System B) Camel Sputum Site, Godthelp Hill, Riversleigh, NW Queensland, Australia."
Distribution: Lower Miocene (16.3–24.0 mya) of Australia. Known only from type locality.

2. †*Nanowana schrenki* Scanlon, 1997. Mem. Queensland Mus. 41(2): 403–407, figs. 9a–d.

Type: Holotype, QMF 31395, one right palatine.
Type locality: "early Miocene Upper Site, Godthelp Hill, Riversleigh, NW Queensland, Australia."
Distribution: Lower Miocene (16.3–24.0 mya) of Australia. Known only from type locality.

NATRICITERES Loveridge, 1953 (Natricidae)

Synonyms: *Neusterophis* W.C.H. Peters, 1877c, *Natriceteres* – Barbault, 1971 *(nomen incorrectum),* and *Natriceres* – Wallach, 1980 *(nomen incorrectum).*
Type species: *Coronella olivacea* W.C.H. Peters, 1854.
Distribution: Subsaharan Africa.
Sources: Sternfeld, 1908b–c, Aylmer, 1922, Loveridge, 1953, 1958, Broadley, 1966b, Hughes & Barry, 1969, Dunger, 1972, Villiers, 1975, D. Lawson, 1993, Akani & Luiselli, 2001a, Villiers & Condamin, 2005, Chippaux, 2006 and Zaher et al., 2009.

N

1. *Natriciteres bipostocularis* Broadley, 1962b. Occ. Pap. Natl. Mus. So. Rhodesia 3B(26): 785–786. (*Natriciteres olivacea bipostocularis*)

Type: Holotype, NMSR/M 3524, a 282 mm female (L.D.E.F. Vesey-FitzGerald, 1 Oct. 1959).
Type locality: "Chisansa, Abercorn, Northern Rhodesia at 5300 ft." [= Mbala, N Northern Prov., NE Zambia, 8°51'S, 31°22'E, elevation 1615 m].
Distribution: Southern Africa. Southeastern Democratic Republic of the Congo (Katanga), Zambia (Northern, North-Western) and Angola (Huíla, Malanje), 1320–1615 m.
Sources: Broadley & Pitman, 1960, Broadley et al., 2003 and Broadley & Cotterill, 2004.

2. *Natriciteres fuliginoides* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 39. (*Coronella fuliginoides*)

Synonym: *Mizodon longicauda* A.C.L.G. Günther, 1863.
Types: Syntypes (3), BMNH 1946.1.12.77, an adult male (Haslar Mus.), BMNH 1956.2.23.51, juvenile male (Rich coll.) [both West Africa], and juvenile male (W. Logan) [Old Calabar].
Type locality: "West Africa" and "Old Calabar" [= Nigeria].
Distribution: West and cen. Africa. Eastern Guinea (Beyla), Sierra Leone, Ivory Coast, Ghana, SW Burkina Faso (SW Centre-Ouest, Hauts-Bassins), S Togo (Plateaux), S Nigeria (Anambra, Bayelsa, Benue, Cross River, Delta, Lagos, Rivers), S Cameroon (Centre, Est, Littoral, Nord-Ouest, Sud, Sud-Ouest), Equatorial Guinea (Bioko Is.), Gabon (Estuaire, Haut-Ogooué, Moyen-Ogooué, Ngounié, Nyanga, Ogooué-Ivindo, Ogooué-Lolo, Ogooué-Maritime, Woleu-Ntem), S Central African Republic (Lobaye, Mbomou, Ombella-Mpoko, Sangha), Congo (Cuvette, Kouilou, Lekoumou, Niari, Plateau) and Democratic Republic of the Congo (Bas-Congo, Bandundu, Equateur, Katanga, Kinshasa, Maniema, Nord-Kivu, Orientale, Sud-Kivu), NSL–800 m.
Sources: Angel, 1933b, Bogert, 1940, Monard, 1951, Witte, 1953, 1962, Capocaccia, 1961b, Mertens, 1965c, Roux-Estève, 1965, Knoepffler, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, Dunger, 1972, Roman, 1980, Hughes, 1983, J.A. Butler & Reid, 1986, Joger, 1990, J.-F. Trape & Roux-Estève, 1995, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008 and Segniagbeto et al., 2011.
Remarks: Original description listed three syntypes but Boulenger (1893a: 217) and Hughes & Barry (1969: 1011) only cite Günther's first two specimens from West Africa as types. Possibly occurs in Benin *fide* Hughes (2013: 152) but occurs in Benin and Ivory Coast *fide* Chirio & LeBreton (2007: 494).

3. *Natriciteres olivacea* (W.C.H. Peters, 1854). Mber. Königl. Akad. Wiss. Berlin 1854(11): 622–623. (*Coronella olivacea*)

Synonyms: *Coronella dumerilii* A.C.L.G. Günther, 1860b, *Enicognathus punctatostriatus* Jan, 1863a, *Neusterophis atratus* W.C.H. Peters, 1877c, and *Grayia giardi* Dollo, 1886.
Type: Holotype, ZMB 4803, a 385 mm specimen (W.C.H. Peters, June 1843–Aug. 1847).
Type locality: "Tette" [= Tete, Tete Prov., W Mozambique, 16°10'S, 33°36'E, elevation 125 m].
Distribution: Subsaharan Africa. Southwestern Senegal (Fatick/Kaolack), Guinea-Bissau, Guinea (Beyla), Sierra Leone, Liberia, S Mali (Gao, Sikasso, Tombouctou), Ivory Coast (Bouaflé, Toumodi), S Burkina Faso (Centre-Ouest), S Ghana (Volta), S Togo (Centrale, Kara, Plateaux), S Benin (Atlantique, Collines), Nigeria (Benue, Borno, Cross River, Kaduna, Kwara, Lagos, Oyo, Plateau, Sokoto), Cameroon (Adamaoua, Centre, Nord, Nord-Ouest, Sud-Ouest), Central African

Republic (Bamingui-Bangoran, Haut-Mbomou, Kemo-Gribingui, Nana Mambere, Ombella-Mpoko, Ouham), Gabon (Haut-Ogooué, Moyen-Ogooué, Ogooué-Maritime), Congo (Brazzaville, Kouilou, Likouala, Pool), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Kinshasa, Katanga, Nord-Kivu, Orientale, Sud-Kivu), Sudan (Al Khartum, An Nil Al Abyad), South Sudan (Bahr al Ghazal, Eastern Equatoria), W Ethiopia (Gemu Gofa, Gojjam, Illubabor, Shoa, Sidamo), S Somalia (Mogadishu), S Kenya (Coast, Nyanza, S Rift Valley, Western), Uganda (Central, Eastern, Northern, Western, Buvuma, Damba, Kome and Sese Is.), Rwanda (Butare, Byumba, Cyangugu, Gisenyi, Kibungo, Kigali, Ruhengeri), Burundi (Bubanza, Bururi, Gitega, Ruyigi), Tanzania (Arusha, Dar es Salaam, Kigoma, Kilimanjaro, Morogoro, Mugharibi, Mwanza, Rukwa, Tanga, Kagera, Mafia, Ukerewe and Zanzibar Is.), Mozambique (Faza, Maputo, Nampula, Niassa, Tete, Zambézia), Malawi (Central, Northern, Southern), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Matabeleland North, Matebeleland South, Midlands), N Botswana (North West), N Angola (Cabinda, Cuanza Norte, Cuanza Sul, Luanda, Lunda Norte, Malanje) and NE Namibia (Caprivi), NSL–2300 m.

Sources: K.P. Schmidt, 1923, T. Barbour & Loveridge, 1928, Loveridge, 1929, 1936b, Bogert, 1940, Witte, 1941, 1953, 1962, 1966, 1975, Villiers, 1950a, 1966, Monard, 1951, Laurent, 1954a, 1956a, 1960, Vesey-FitzGerald, 1958, Broadley, 1959, 1983, Sweeney, 1961, Doucet, 1963, Blackwell, 1967, Papenfuss, 1969, Roux-Estève, 1969a, Dunger, 1972, Pitman, 1974, Broadley & Cock, 1975, Girardin, 1978, Spawls, 1978, J.B. Remarks: Original description reprinted in W.C.H. Peters (1855: 52).

4. *Natriciteres pembana* (Loveridge, 1935). Bull. Mus. Comp. Zool 79(1): 8. (*Natrix olivacea pembana*)

Type: Holotype, MCZ 19112, a 288 mm female (S. bin Asmani, 6 Oct. 1923).

Type locality: "Chake Lake, Pemba Island, Tanganyika Territory" [= Chake Lake, Chake, Pemba Is., Tanga Prov., NE Tanzania, 5°15'S, 39°46'E, elevation NSL].

Distribution: Northeastern Tanzania (Pemba Is.), NSL.

Sources: Loveridge, 1925, Broadley, 1966 and Spawls et al., 2002.

5. *Natriciteres sylvatica* Broadley, 1966b. Arnoldia, Rhodesia 2(35): 5–7. (*Natriciteres variegata sylvatica*)

Type: Holotype, NMZB-UM 8354 (formerly UM 8354), a 332 mm male (H.C. Garbett, March 1965)

Type locality: "Inyangani Tea Estates, Inyangani District, Rhodesia, at 2,500 feet."

Distribution: Southeastern Africa. Southern Tanzania (Iringa, Lindi, Mbeya, Morogoro, Ruvuma), Mozambique (Gaza, Maputo, Niassa, Sofala, Zambézia), Malawi (Central, Northern, Southern), E Zimbabwe (Manicaland) and ext. NE South Africa (KwaZulu-Natal), NSL–2000 m.

Sources: Spawls et al., 2002, Branch et al., 2005 and Broadley & Blaylock, 2013.

6. *Natriciteres variegata* (W.C.H. Peters, 1861a). Mber. Königl. Akad. Wiss. Berlin 61(3): 358. (*Mizodon variegatus*)

Synonyms: *Natrix olivacea uluguruensis* Loveridge, 1935.

Type: Holotype, ZMB 2057, a 328 mm male (H.S. Pel, 1840–1855), lost *fide* Hughes & Barry (1969: 1011).

Type locality: "Goldküste, Westafrika" [= Ghana *fide* Hughes & Barry, 1969: 1011].

Distribution: West and cen. Africa. Guinea (Beyla, Boffa, Kérouané, Kouroussa, Macenta, Nzérékoré, Télimélé), Sierra Leone (S Northern, Southern, Western), Liberia (Grand Cape Mount, Margibi, Montserrado), S Ivory Coast (Abidjan, Danané, Dix-Huit Montagnes, Guiglo, Lagunes, San Pédro, Tabou, Toumodi), S Ghana (Accra, Ashanti, Eastern, S Volta, Western), S Togo (Plateaux), S Benin (Atlantique, Cotonou, Maritime), Burkina Faso (Est, Hauts-Bassins), S Nigeria (Akwa Ibom, Bayelsa, Bendel, Benue, Cross River, Delta, Edo, Lagos, Oyo, Rivers), Cameroon (Centre, Est, Littoral, Nord, Nord-Ouest, Ouest, Sud, Sud-Ouest), Central African Republic (Haute-Sangha, Ouaka, Ouham), Tanzania (Iringa, Lindi, Mbeya, Ruvuma, Tanga: Pemba Is.), S Malawi (Southern), Mozambique and E Zimbabwe (E Manicaland), 45–1830 m.

Sources: Monard, 1937, Bogert, 1940, Loveridge, 1941a, Pakenham, 1947, Villiers, 1950a, 1954a, Condamin, 1958, 1959, E.H. N

1. †*Natrix borealis* (Szyndlar, 1981). Acta Geol. Polon. 31(1–2): 89–90, fig. 12. (†*Palaeomalpolon borealis*)

Type: Holotype, ZZSD RF/290/80, one parabasisphenoid (M. Mlynarski, 1974).

Type locality: "Kozi Grzbiet Hill near Checiny in the Holy Cross Mts, Central Poland, Early Pleistocene (Cromerian)."

Distribution: Lower Pleistocene (Cromerian: 0.465–0.85 mya) of Poland.

Remarks: Rage (1984b: 50) corrected the holotype name from basisphenoid to parabasisphenoid. A species of *Natrix fide* Szyndlar *in* Rage (1984b: 50) but *Palaeomalpolon* possibly a valid genus.

2. †*Natrix longivertebrata* Szyndlar, 1984a. Acta Zool. Cracov. 28(1): 71–73, figs. 29.6–10.

Type: Holotype, ZZSD RK I-10000, one middle trunk vertebra.

Type locality: "Rebielice Królewskie I (RK I) near Klobuck, Kraków-Wielun Upland, central Southern Poland, Upper Pliocene (MN 16)."

Distribution: Lower Miocene (Orleanian, MN 4: 16.0–16.9 mya) of France, middle Miocene (Astaracian, MN 6–8, 11.1–13.7 mya) of France, upper Miocene (Vallesian-Turolian, MN 9–13: 4.9–11.1 mya) of Austria, Hungary and Ukraine, lower Pliocene (Ruscinian, MN 14: 4.2–4.9 mya) of Hungary, middle Pliocene (Ruscinian, MN 15: 3.2–4.2 mya) of Moldavia and Poland, and upper Pliocene (Villanyian, MN 16: 2.6–3.2 mya) of Moldavia and Poland.

Sources: Bachmayer & Szyndlar, 1985, 1987, Mlynarski et al., 1985, Szyndlar, 1991b, 2012, Szyndlar & Zerova, 1992, Venczel, 1994, 1998, 2001, Augé & Rage, 2000, Redkozubov, 2003 and Szyndler & Rage, 2005.

3. *Natrix maura* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 219. (*Coluber maurus*)

Synonyms: *Coluber viperinus* Latreille *in* Sonnini & Latreille, 1801b, *Coluber natricula* Hermann, 1804, *Coluber pseudoechidna* Hermann, 1804, *Vipera vissena* Rafinesque-Schmaltz, 1814, *Natrix cherseoides* Wagler *in* Spix, 1824, *Natrix ocellata* Wagler *in* Spix, 1824, ? *Coluber guttatus* Risso, 1826, ? *Coluber palustris* Risso, 1826, *Tropidonotus oppelii* Duméril *in* F. Boie, 1827, *Coluber viperinus aurolineatus* Gervais, 1836, *Natrix viperina vittata* Gené, 1839, *Natrix viperina bilineata* Bonaparte, 1840 *(nomen nudum), Natrix viperina nigrotorquata* Bonaparte, 1840 *(nomen nudum), Coluber terstriatus* Duméril *in* Bonaparte, 1840, *Natrix viperina bilineata* Bonaparte, 1840, *Tropidonotus bonnellii* Fitzinger, 1853 (*nomen nudum*), *Tropidonotus chersoïdes* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen illegitimum), Tropidonotus viperinus bilineata* Jan, 1865c (*nomen substitutum*), *Coluber viperinus ichthyocharis* Gistel,

1868, *Tropidonotus viperinus incerta* Fatio, 1872, and *Tropidonotus viperinus nigra* Mosauer & Wallis, 1927.

Type: Lectotype, NHR Lin-214 (formerly MAFR) (Ulriksdals Castle via Mus. Drottn.), designated herein.

Type locality: "Algiriae" [= Algeria] via lectotype selection.

Distribution: Southwestern Europe and ext. N Africa. France (Ain, Allier, Alpes-Maritimes, Ardèche, Ariège, Aude, Aveyron, Basses-Alpes, Basses-Pyrénées, Bouchés-du-Rhône, Cantal, Cher, Charente, Charente-Maritime, Corrèze, Corsica, Côte-d'Or, Creuse, Deux-Sèvres, Dordogne, Drôme, Essonne, Eure-et-Loir, Gard, Gers, Gironde, Haut-Rhin, Haute-Garonne, Haute-Loire, Haute-Savoie, Haute-Vienne, Hautes-Alpes, Hautes-Pyrénées, Hérault, Ille-et-Vilaine, Indre, Indre-et-Loire, Isère, Jura, Landes, Loire, Loire-Atlantique, Loiret, Loir-et-Cher, Lot, Lot-et-Garonne, Lozère, Maine-et-Loire, Mayenne, Nièvre, Puy-de-Dôme, Pyrénées-Orientales, Rhône, Saöne-et-Loire, Sarthe, Savoie, Seine-et-Marne, Tarn, Tarn-et-Garonne, Val-d'Oise, Var, Vaucluse, Vendée, Vienne, Yonne, Yvelines, Hyères Is.), ext. SW Switzerland (Genève, Valais, Vaud), W Italy (W Emilia-Romagna, Liguria, Lombardia, Piemonte, Asinara, Caprera, Maddalena, San Pietro, Sardinia and Sant'Antioco Is.), Spain (Alava, Albacete, Alicante, S Almería, Avilo, Badajoz, Barcelona, Burgos, Caceres, Cádiz, S Castellón, Ciudad Real, Cordoba, Gerona, Granada, Guadelajara, Guipúzcoa, Huelva, Huesca, SE Jaén, La Coruña, Lérida, Lugo, Madrid, Majorca, Málaga, Minorca, Murcia, Navarra, Orense, Oviedo, Palencia, Pontevedra, Salamanca, Santander, Segovia, W Seville, Soria, Tarragona, SW Teruel, Toledo, Valencia, Valladolid, Vizcaya, W Zamora, E Zaragoza, Baleares Is.), Portugal (Aveiro, Beja, Braga, Bragança, Castelo Branco, Coimbra, Evora, Faro, Guarda, Leiria, Lisboa, Portalegre, Porto, Santarém, Setubal, Viana de Castelo, Vila Real, Viseu), Morocco (Agadir, Beni Mellal, Casablanca, Al Jadida, Fès, Kenitra, Kaar es Souk, Marrakech, Meknès, Nador, Ouarzazate, Oujda, Rabat, Safi, Settat, Tangier, Taza, Tetonan), Algeria (Béchar, Biskra), N Tunisia (Gabès, Gafsa, Medenine, Nabeul, Sousse, Tozeur, Tunis, Djerba and Galita Is.) and N Libya (Az Zawiyah, Misratah, Tarabulus), NSL–2600 m.

Fossil records: Middle Pliocene (Ruscinian, MN 15: 3.2–4.2 mya) of France and upper Pleistocene (Tarantian: 0.01–0.13 mya) of France.

Sources: Chpakowsky & Chnéour, 1954, Kramer & Schnurrenberger, 1963, Bons, 1967, Salvador, 1974, 1985, Schätti, 1982, Bruno, 1984, Le Berre, 1989, Fons et al., 1991, Duguy & Saint-Girons, 1993, Bons & Geniez, 1996, Schleich et al., 1996, Holman, 1998a, F.P. Pérez, 2001, Sindaco et al., 2006, Kreiner, 2007, Feriche et al., 2008, Klesius, 2009 and Szyndlar, 2012.

Remarks: Records from Turkey (Maras) and Italy (Sicily) need confirmation. This species composed of 4 lineages *fide* Guicking et al. (2006: 135).

4. *Natrix megalocephala* Orlov & Tuniyev, 1986a. Proc. Zool. Inst., USSR Acad. Sci. 158: 117, figs. 1–2, 3 (left), 5 (left), 6 (upper).

Type: Holotype, ZISP 11846, a 940 mm female (K. Satunin, 1909).

Type locality: "Pitsunda, West Caucasus, Georgia, USSR" [= ext. NW Georgia, 43°09'N, 40°21'E]. Emended to Pitsunda, Abkhazia, Georgia, W Caucasus *fide* Orlov & Tuniyev (1992: 44).

Distribution: Northwestern Azerbaijan, W Georgia, ext. SW Russia and NE Turkey, NSL–1500 m.

Sources: Gruber, 1989, Orlov & Tuniyev, 1992, Ilgaz et al., 2005 and Tuniyev et al., 2009.

5. †*Natrix merkurensis* Ivanov, 2002. Acta Palaeont. Polon. 47(3): 525–526, figs. 8d (1–2).

Type: Holotype, SGDB Ah-315, one fragmentary right compound bone.

Type locality: "Merkur-North locality, in the opencast brown coal mine near Tusimice, in the area of the former village Ahníkov, close to Chomutov (northwestern Bohemia), Czech Republic. Orleanian (MN 3a). Early Miocene."

Distribution: Lower Miocene (Orleanian, MN 3–4: 16.0–20.0 mya) of Czech Republic and France.

Sources: Ivanov, 2002, Rage & Bailon, 2005 and Szyndlar, 2012.

N

6. †*Natrix mlynarskii* Rage, 1988a. Acta Zool. Cracov. 31(13): 464, fig. 1.1.

Type: Holotype, MNHN QU 17181, one middle trunk vertebra.

Type locality: "Phosphorites du Quercy, France; probably the Oligocene of Mas-de-Got."

Distribution: Lower Oligocene (MP 22: 28.4–33.9 mya) of France. Known only from type specimens.

Source: Szyndlar, 2012.

7. †*Natrix natricoides* (Augé & Rage *in* Ginsburg, 2000). Mém. Mus. Natl. Hist. Nat. 183: 293–294, fig. 24. (†*Neonatrix natricoides*)

Type: Holotype, MNHN Sa 23683, one trunk vertebra.

Type locality: "Sansan, Gers, Southwestern France; Astaracien (MN 6), Miocène moyen."

Distribution: Lower to middle Miocene (Orleanian-Astaracian, MN 4–6: 12.8–13.7 mya) of France.

Sources: Rage & Bailon, 2005 and Szyndlar, 2012.

Remarks: Transferred to *Natrix fide* Szyndlar (2005: 41).

8. *Natrix natrix* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 220. (*Coluber natrix*)

2006, Ivanov, 2007, Renner & Vitzthum, 2007, Trapp, 2007, Baier et al., 2009, Creemers & Delft, 2009, Tuniyev et al., 2009, Vacher & Geniez, 2010, Stojanov et al., 2011, Jablonski et al., 2012 and Szyndlar, 2012.

Remarks: This species composed of five lineages *fide* Guicking et al., (2006: 136).

9 †*Natrix parva* Szyndlar, 1984a. Acta Zool. Cracov. 28(1): 47–49, fig. 17.

Type: Holotype, ZPW IZ-6/R/4, one trunk vertebra.

Type locality: "Mala Cave (MA) at Zelce Hill near Dzialoszyn (Northern Kraków-Wielun Upland in central Southern Poland), Upper Miocene (Turolian/Pontian), layer 7+8."

Distribution: Upper Miocene (MN 7–8) of Poland. Known only from type locality.

Source: Szyndlar, 1991b.

Remarks: Doubt about species validity based upon type locality to actually be upper Pleistocene; if so, would be a synonym of *Natrix natrix fide* Szyndlar (1991b: 241).

10. †*Natrix rudabanyaensis* Szyndlar, 2005. Paleontogr. Ital. (2004) 90: 38–40, fig. 5c.

Type: Holotrype, GIH V.22174, one trunk vertebra.

Type locality: "locality 2, Rudabánya, NE Hungary; Late Miocene, early Vallesian (biozone MN 9)."

Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of Romania and upper Miocene (Vallesian, MN 9: 9.7–11.1 mya) of Hungary.

Sources: Venczel & Stiuca, 2008 and Szyndlar, 2012.

N

11. †*Natrix sansaniensis* (Lartet, 1851). Notice Colline Sansan: 40. (†*Coluber sansaniensis*)

Type: Lectotype, MNHN SA 9873, one trunk vertebra, designated by Rage (1981: 538).

Type locality: "Sansan, Gers, France" via lectotype selection.

Distribution: Lower Miocene (Orleanian, MN 3–5: 13.7–20.0 mya) of Czech Republic, France and Germany, and middle Miocene (Astaracien, MN 6–8: 11.1–13.7 mya) of France and Hungary.

Sources: Rochebrune, 1880, Szyndlar, 1984a, Rage, 1981, Szyndlar & Schleich, 1993, Augé & Rage, 2000, Ivanov, 2000, 2002, Redkozubov, 2003 and Szyndlar, 2005, 2012.

12. *Natrix tessellata* (Laurenti, 1768). Synop. Rept.: 87. (*Coronella tessellata*)

Synonyms: *Coluber hydrus* Pallas, 1771, *Tropidonotus bipes* Gmelin, 1789, *Coluber hydrophilus* Lindaker, 1791, ? *Coluber ponticus* Güldenstaedt, 1791, *Coluber caspius* Latreille, 1801b *(nomen praeoccupatum), Coluber ponticus* Georgi, 1801, *Hydrus caspius* G. Shaw, 1802, *Coluber pseudoechidna* Hermann, 1804, *Enhydris caspia* Oken, 1816, ? *Pelamis fuscatus* Rafinesque-Schmaltz, 1817, *Coluber gabinus* Metaxá, 1823, *Coluber palustris* Risso, 1826, *Tropidonotus gracilis* Eichwald, 1831, *Tropidonotus tantalus* Eichwald, 1831, *Coluber gabina* Bonaparte, 1832 *in* 1832–1841, *Coluber griseus* Dwigubsky, 1832, *Coluber muravievii* Dwigubsky, 1832, *Coluber reticulatus* Ménétriés, 1832, *Natrix tessellata albo-lineolata* Bonaparte, 1834 *in* 1832–1841 *(nomen incorrigendum), Coluber elaphoides* Brandt, 1838, *Natrix hydrus immaculata* Fitzinger *in* Bonaparte, 1840 *in* 1832–1841, *Natrix tessellata flavescens* Massalongo, 1854, *Tropidonotus tessellatus concolor* Jan, 1863b (*nomen nudum*), *Tropidonotus tessellates concolor* Jan, 1865c, *Tropidonotus tessellatus decipiens* Betta, 1865, *Coluber tessellatus nigerrima* Gistel, 1868 *(nomen nudum), Tropidonotus tessellatus laurenti* Bedriaga, 1881, *Trepidonotus tesselatus* – Lortet, 1883 *(nomen incorrectum), Coluber sabinus* – Camerano, 1891 *(nomen incorrectum), Tropidonotus elephoides* – Camerano, 1891 *(nomen incorrectum), Tropidonotus tessellatus albolineata* – Camerano, 1891 (*nomen corrigendum*), *Tropidonotus tessellatus flavescens* F. Remarks: Holotype not in MRSN or NMW. Leviton et al. (1992: 101) cited the type locality as an alpine meadow probably in Italy. Record for Italy (Sicily) needs confirmation. Relict population on Cyprus probably or nearly extinct *fide* Baier et al. (2009: 260). This species composed of three lineages *fide* Guicking et al., (2006: 135).

†*NEBRASKOPHIS* Holman, 1973a (Colubridae)

Type species: †*Nebraskophis skinneri* Holman, 1973a.

Distribution: Upper Eocene to lower Oligocene and middle to upper Miocene of USA. Fossils unassigned to species include upper Eocene (Chadronian) of USA (Georgia).

Sources: Holman, 1973a, 1977e, 1979a, 1982a, 2000a, Rage, 1984b, Parmley & Holman, 1995 and Parmley & Holman, 2003.

1. †*Nebraskophis oligocenicus* Holman, 1999. Acta Zool. Cracov. 42(3): 452–454, fig. 3.

Type: Holotype, UF 190833, one trunk vertebra (UF field crews, 1966–1967).

Type locality: "I-75 Local Fauna (Florida Natural History Museum Locality AL018), 1.5 km WSW Gainesville, on the W side of I-75; Micanopy Quadrangle, NE1/4, Sec. 4, T10S, R19E, Alachua County, Florida; Early Oligocene (Whitneyan)."

Distribution: Lower Oligocene (Whitneyan: 30.8–33.3 mya) of USA (Florida). Known only from type locality.

2. †*Nebraskophis skinneri* Holman, 1973a. Contr. Mus. Paleont., Univ. Michigan 24(12): 131–132, figs. 4a–b.

Type: Holotype, MSUVP 708, one trunk vertebra (M.F. Skinner, C.W. Hibbard, J.A. Holman & MSU field crews, 1967–1971).

Type locality: "one mile north of the Niobrara River on the Ranch of Franklin H. Egelhoff in the SE corner of the NE1/4 SW1/4 sec. 29, T 33 N, R 23 W, Keya Paha County, Nebraska. Upper Miocene, lower Valentine Formation, Egelhoff local fauna, [= middle Miocene].

Distribution: Middle Miocene (Barstovian 13.6–16.3 mya) of USA (Nebraska) and upper Miocene (Hemphillian: 4.8–9.0 mya) of USA (Nebraska).

Remarks: Original description modified in Holman (2000a: 175–176, fig. 111).

†*NEONATRIX* Holman, 1973a (Natricidae)

Type species: †*Neonatrix elongata* Holman, 1973a.

Distribution: Fossils unassigned to species include lower Miocene (Orleanian, MN 4–5: 13.7–16.9 mya) of Austria and Germany, middle Miocene (Astaracian, MN 6–8: 11.1–13.7 mya) of Slovakia, upper Miocene (Vallesian, MN 9: 9.7–11.1 mya) of Hungary, and lower Pliocene (Ruscinian, MN 14: 4.2–4.9 mya) of Hungary.

Sources: Holman, 1973a, 1979a, 1982a, Rage, 1984b, 2000a, Szyndlar, 1987, 1991a and Szyndlar & Schleich, 1993.

Remarks: †*Neonatrix* should be restricted to North American species with European species in a different genus *fide* Szyndlar & Schleich (1993: 23).

1. †*Neonatrix crassa* Rage & Holman, 1984. Géobios 17(1): 96–97, figs. 5a–e.

Type: Holotype, UCBL FSL 285 012, one middle trunk vertebra.

Type locality: "la fissure M de La-Grive-Saint-Alban (Isère), France; zone MN 7, Astaracien, le Miocène français."

Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of France. Known only from type series.

Source: Szyndlar, 2012.

N

2. †*Neonatrix elongata* Holman, 1973a. Contr. Mus. Paleont., Univ. Michigan 24(12): 130–131, figs. 3a–b.

Type: Holotype, MSUVP 710, one posterior trunk vertebra (M.F. Skinner, C.W. Hibbard, J.A. Holman & MSU field crews, 1967–1971).

Type locality: "one mile north of the Niobrara River on the Ranch of Franklin H. Egelhoff in the SE corner of the NE 1/4 SW1/4 sec. 29, T 33 N, R 23 W, Keya Paha County, Nebraska. Upper Miocene, lower Valentine formation, Egelhoff local fauna."

Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (South Dakota, Texas), middle Miocene (Barstovian: 13.6–16.3 mya) of USA (Nebraska, South Dakota, Texas), and upper Miocene (Hemphillian: 4.8–9.0 mya) of USA (Nebraska).

Sources: Holman, 1976a, 1977b, 1977e, 1978, 1979a, 1996a, 2000a and Parmley & Holman, 1995.

Remarks: Original description modified by Holman (2000: 196–197, fig. 125).

3. †*Neonatrix europaea* Rage & Holman, 1984. Géobios 17(1): 94–96, figs. 4a–h.

Type: Holotype, UCBL 285 008, one middle trunk vertebra.

Type locality: "la fissure M de La-Grive-Saint-Alban (Isère), France; zone MN 7, Astaracien, le Miocène français."

Distribution: Lower-middle Miocene (Orleanian-Astaracian, MN 4–8: 11.1–16.9 mya) of France.

Sources: Augé & Rage, 2000, Ivanov, 2000, Rage & Bailon, 2005 and Szyndlar, 2005, 2012.

4. †*Neonatrix infera* Holman, 1996a. Tertiary Res. 17(1–2): 7–8, figs. 1a–e.

Type: Holotype, MSUVP 1423, one trunk vertebra (J.A. Holman, R.D. Weigel, D. Gillette, B.H. Slaughter & MSU field crew, 1967).

Type locality: "Trinity River Local Fauna, at longitude 95 degrees 03', latitude 30 degrees 41', 11.3 km northeast of Coldspring, San Jacinto County, Texas, USA; Flemming Formation, Early Miocene, Barstovian Land Mammal Age."

Distribution: Middle Miocene (Barstovian: 13.6–16.3 mya) of USA (Texas). Known only from type locality.

Remarks: Original description modified by Holman (2000a: 198, fig. 126). Possible record from upper Miocene of Nebraska *fide* Parmley & Hunter (2010: 538).

5. †*Neonatrix magna* Holman, 1982a. Trans. Nebraska Acad. Sci. 10: 35–36, figs. 6a–d.

Type: Holotype, MSUVP 943, one trunk vertebra (A. Griggs, J.A. Holman, M. Podell & C. Wellstead, July 1976).

Type locality: "Norden Bridge Quarry, near the Norden-Johnstown Road, about 274 m south of the Norden Bridge across the Niobrara River, at an elevation of 661 m in SE 1/4 SW 1/4 Sec. 33, T. 33 N., R. 23 W., Brown County, Nebraska; lowermost part of Valentine Formation, (Miocene: Late Barstovian)."

Distribution: Middle Miocene (Barstovian: 13.6–16.3 mya) of USA (Nebraska). Known only from type locality.

Remarks: Original description modified by Holman (1987a: 116 and 2000a: 199–200, fig. 127).

6. †*Neonatrix nova* Szyndlar, 1987. J. Vert. Paleont. 7(1): 61–62, figs. 6b–f.

Type: Holotype, CUP 5197, one trunk vertebra.

Type locality: "Dolnice near to the town of Cheb in westernmost Bohemia (Czechoslovakia); Lower Miocene (Early Orleanian or Ottnangian; European Land Mammalian Biozone MN 4 = Upper Hemingfordian in North America)."

Distribution: Lower Miocene (Orleanian, MN 4: 16.0–16.9 mya) of Czech Republic. Known only from type locality.

NERODIA Baird & Girard, 1853 (Natricidae)

Synonym: *Funkus* Hoser, 2012h *(nomen illegitimum).*
Type species: *Coluber sipedon* Linnaeus, 1758.
Distribution: North America and Cuba.
Fossil records: Middle/upper Miocene to upper Pleistocene of USA. Fossils unassigned to species include lower Pliocene (Hemphillian) of USA (Kansas), lower/middle Pleistocene (Irvingtonian I) of USA (Arizona), middle/upper Pleistocene (Irvingtonian II) of USA (Kansas, Pennsylvania), and upper Pleistocene (Rancholabrean I) of USA (Oklahoma).
Sources: Clay, 1938b, Cliburn, 1960, McDowell, 1961, Conant, 1975, Rossman & Eberle, 1977, N.J. Rossman et al., 1982, R. Lawson, 1985, 1987, Dundee & Rossman, 1989, Ernst & Barbour, 1989, Chiasson & Lowe, 1989, Conant & Collins, 1991, Holman, 1995a, 2000a, Dwyer & Kaiser, 1997, Wallach, 1998, Alfaro & Arnold, 2001, Gibbons & Dorcas, 2004, Zaher et al., 2008 and Cadle, 2011.

1. *Nerodia clarkii* (Baird & Girard, 1853). Cat. No. Amer. Rept., Serp. 1: 48. (*Regina clarkii*)

Synonyms: *Tropidonotus medusa* A.C.L.G. Günther, 1858, *Nerodia compressicauda* Kennicott, 1860, *Tropidonotus ustus* Cope, 1860b, *Tropidonotus compsolaemus* Cope, 1861a, *Tropidonotus cubanus* Gundlach *in* W.C.H. Peters, 1861f, *Tropidonotus ornatus* Jan, 1863b (*nomen nudum*), *Tropidonotus ornatus* Jan, 1865c, *Tropidonotus compressicaudus walkeri* Yarrow, 1883a, *Natrix compressicauda bivittata* Cope, 1889a, *Natrix compressicauda obscura* Lönnberg, 1894, and *Natrix compressicauda taeniata* Cope, 1895b.
Type: Holotype, USNM 2264, an 806 mm specimen (J.H. Clark [U.S.-Mex. Bound. Surv.], 1850–1852, via J.D. Graham).
Type locality: "Indianola, Texas" [USA].
Distribution: Coastal marshes of SE USA (Alabama, Florida, Florida Keys, Louisiana, Mississippi, Texas) and Cuba (Camagüey, Lattebana, Villa Clara), NSL–25 m.
Sources: Stejneger, 1940, Carr, 1940, F. Cook, 1962, Mount, 1975, Dunson, 1979, Linzey, 1979, Ashton & Ashton, 1981, Myer, 1988, R. Lawson et al., 1991, Rodrígues-Robles & Greene, 1996, Tennant, 1997 and Werler & Dixon, 2000.

2. *Nerodia cyclopion* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 576–577. (*Tropidonotus cyclopion*)

Types: Syntypes (2), MNHN 3481a–b, longest syntype 1130 mm.
Type locality: "Nouvelle-Orléans" [= New Orleans, Louisiana, USA] and not stated. Restricted to New Orleans, Louisiana, USA *fide* Stejneger & Barbour (1917: 95).
Distribution: South-central USA (ext. SW Alabama, E and S Arkansas, ext. NW Florida, ext. SW Illinois, ext. W Kentucky, Louisiana, W and S Mississippi, ext. SE Missouri, ext. W Tennessee, SE Texas), NSL–150 m.
Fossil records: Middle Pliocene (Blancan II) of USA (Kansas).
Sources: P. Smith, 1961, Garton et al., 1970, R.W. Barbour, 1971, Mount, 1975, Sanderson, 1983, 1993, T.R. Johnson, 1987, Meade, 1991, Tennant, 1997 and Werler & Dixon, 2000.

3. *Nerodia erythrogaster* (Forster *in* Bossu, 1771). Travels Louisiana 1: 364. (*Coluber erythrogaster*)

Synonyms: *Tropidonotus transversus* Hallowell, 1852a, *Nerodia woodhousii* Baird & Girard, 1853, *Nerodia couchii* Kennicott, 1860, *Tropidonotus bisectus* Cope, 1887d, *Tropidonotus roulei* Chabanaud, 1917d, *Natrix erythrogaster flavigaster* Conant, 1949, *Natrix erythrogaster neglecta* Conant, 1949, *Natrix erythrogaster bogerti* Conant, 1953, and *Natrix erythrogaster alta* Conant, 1963c.
Type: Neotype, USNM 126890, a 1318 mm female (T.M. Beckett via E.B. Chamberlain, 19 March 1948), designated by Conant (1949: 10).
Type locality: "near Parker's Ferry, Edisto River Swamp, Charleston County, South Carolina" [USA] via neotype selection.
Distribution: Southern USA (Alabama, Arkansas, S Delaware, N Florida, Georgia, Illinois, Indiana, ext. SE Iowa, SE and S Kansas, W Kentucky, Louisiana, SE Maryland, S Michigan, Mississippi, Missouri, ext. SE New Mexico, E North Carolina, W Ohio, Oklahoma, South Carolina, W Tennessee, Texas, ext. SE Virginia, ext. S Wisconsin) and NE Mexico (N Coahuila, NE Durango, Nuevo León, ext. NW Tamaulipas, cen. Zacatecas), NSL–2040 m.
Fossil records: Upper Miocene/lower Pliocene (Hemphillian) of USA (Indiana), middle Pliocene (Blancan III) of USA (Texas), lower Pleistocene (Irvingtonian I) of USA (Florida), lower/middle Pleistocene (Irvingtonian I) of USA (Texas), and upper Pleistocene (Rancholabrean I, II) of USA (Florida, Indiana, Texas, Virginia).
Sources: Conant, 1949, 1951, 1969, Webb, 1970, Minton, 1972, Martof et al., 1980, T.R. Johnson, 1987, McCranie, 1990, Meade, 1991, Palmer & Braswell, 1995, Degenhardt et al., 1996, Harding, 1997, Tennant, 1997, Werler & Dixon, 2000, Christiansen & Leclere, 2002 and Makowsky et al., 2010.
Remarks: Original description based on Catesby (1843: 46, pl. 46). Holotype presumed lost *fide* Conant (1949: 10). Holotype of *Tropidonotus roulei* examined and found to be *Nerodia erythogaster fide* P. David (pers. comm.).

N

4. *Nerodia fasciata* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 378. (*Coluber fasciatus*)

Synonyms: *Coluber vampum* Lacépède, 1789 (*nomen rejiciendum*), *Coluber porcatus* Latreille, 1801b, *Natrix fasciata pictiventris* Cope, 1895b, *Natrix fasciata confluens* Blanchard, 1923a, and *Natrix sipedon engelsi* T. Barbour, 1943.

Type: Holotype, not designated (A. Garden, 1760–1761), location unknown.

Type locality: "Carolina" [USA]. Restricted to vicinity of Charleston, South Carolina, USA *fide* Klauber (1948: 6).

Distribution: Southeastern USA (S Alabama, Arkansas, Florida, S Georgia, ext. S Illinois, ext. W Kentucky, Louisiana, W and S Mississippi, ext. SE Missouri, E North Carolina, Shackleford Banks, SE Oklahoma, E South Carolina, ext. W Tennessee, E Texas), NSL–200 m.

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Florida, Georgia).

Sources: Conant, 1963a, Schwaner & Mount, 1976, Blaney & Blaney, 1979b, Myer, 1988, R. Lawson et al., 1991, Palmer & Braswell, 1995, Tennant, 1997, Werler & Dixon, 2000, D. Schmidt, 2004b and Mebert, 2008.

5. *Nerodia floridana* (Goff, 1936). Occ. Pap. Mus. Zool., Univ. Michigan (327): 1–3. (*Natrix cyclopion floridana*)

N

Type: Holotype, UMMZ 77229, a 1054 mm female (E.R. Allen, March 1935).

Type locality: "near Leesburg, Florida, at the Alsa–brook Prairie between Lake Griffin and Lake Yale" [USA].

Distribution: Southeastern USA (ext. S Alabama, Florida, S Georgia, S South Carolina), NSL–100 m.

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida) and upper Pleistocene (Rancholabrean II) of USA (Florida).

Sources: Betz, 1963, Sanderson, 1983, 1993, Tennant, 1997 and J.S. Thompson & Crother, 1998.

6. *Nerodia harteri* (Trapido, 1941). Amer. Midl. Nat. 25(3): 673–675, fig. 1. (*Natrix harteri*)

Type: Holotype, USNM 110927 (formerly HT 1302), a 694 mm male (P. Harter, early April 1940).

Type locality: "rocky stretches along the Brazos River north of Palo Pinto, Palo Pinto County, Texas, 830 to 840 feet in altitude."

Distribution: South-central USA (Brazos River of cen. Texas), 250–550 m.

Sources: Mecham, 1983, F. Rose & Selcer, 1989, N.J. Scott et al., 1989, Densmore et al., 1992 and Werler & Dixon, 2000.

7. †*Nerodia hibbardi* (Holman, 1968). Copeia 1968(1): 153–154, fig. 1. (†*Natrix hibbardi*)

Type: Holotype, UMMP V53444, one left mandible with coalesced articular, surangular and prearticular from a 900 mm specimen.

Type locality: "Hagerman Quadrangle, NE 1/4, Sec. 17, T 7 S, R 13 E, outcrop on the Snake River from the town of Hagerman downstream to Homedale, Twin Falls County, Idaho; Glenns Ferry Formation, upper Pliocene."

Distribution: Middle-upper Pliocene (Blancan: 1.9–3.6 mya) of USA (Idaho and Texas).

Sources: K.L. Rogers, 1976 and Holman, 1979a, 2000.

8. †*Nerodia hillmani* (R.L. Wilson, 1968). Contr. Mus. Paleont., Univ. Michigan 2(2): 100–102, figs. 10a–c. (†*Natrix hillmani*)

Type: Holotype, UMMP V55701, one trunk vertebra (UMMP field crews, 1941–1966).

Type locality: "WaKeeney local fauna site, University of Michigan locality UM-K6-59, northeast of Ogallala, on the Lowell Hillman Ranch, 2350-2550 feet south and 75 feet east of the NW corner Sec. 22, R22W, T11S, Trego County, Kansas. Elevation is 2555 feet; Ogallala Formation, Lower Pliocene."

Distribution: Upper Miocene (Clarendonian: 10.3–13.6 mya) of USA (Kansas, Nebraska).

Sources: Rage, 1984b, Holman, 2000 and Parmley & Hunter, 2010.

9. *Nerodia paucimaculata* (Tinkle & Conant, 1961). SW Nat. 6(1): 34–36, figs. 1–2. (*Natrix harteri paucimaculata*)

Type: Holotype, AMNH 85542, a 652 mm male (D.W. Tinkle & D. L. McGregor, 8 Oct. 1960).

Type locality: "The Colorado River south of the city limits of Robert Lee, Coke County, Texas" [USA].

Distribution: South-central USA (Colorado and Concho Rivers of cen. Texas), 300–350 m.

Sources: Mecham, 1983, Rose & Selcer, 1989, N.J. Scott et al., 1989 and Densmore et al., 1992

10. *Nerodia rhombifer* (Hallowell, 1852a). Proc. Acad. Nat. Sci. Philadelphia 6(5): 177. (*Tropidonotus rhombifer*)

Synonyms: *Nerodia holbrookii* Baird & Girard, 1853, *Tropidonotus pogonias* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Natrix rhombifera blanchardi* Clay, 1938a, and *Natrix rhombifera werleri* Conant, 1953.

Type: Lectotype, ANSP 5047, a 734–813 mm male (S.W. Woodhouse, 1849–1850), designated by Conant (1969: 55).

Type locality: "Arkansas River between Keystone and Tulsa, Tulsa Co., Oklahoma" [USA] via lectotype selection.

Distribution: Central and SE USA (cen. Alabama, Arkansas, ext. W Florida, W Illinois, ext. SW Indiana, ext. SE Iowa, SE and S Kansas, ext. W Kentucky, Louisiana, Mississippi, Missouri, Oklahoma, W Tennessee, Texas) and E Mexico (ext. SW Campeche, N Chiapas, Coahuila, N Hidalgo, Nuevo León, Puebla, E San Luis Potosí, Tabasco, Tamaulipas, Veracruz), NSL–2235 m.

Fossil records: Upper Pliocene (Blancan V) of USA (Nebraska).

Sources: Conant, 1969, McAllister, 1985, Villa et al., 1988, Lee, 1996, Werler & Dixon, 2000, Pérez-Higareda et al., 2002, Brandley et al., 2010 and Meza-Parral et al., 2010.

Remarks: Type locality restriction of Fort Smith, Arkansas, USA *fide* K.P. Schmidt (1953a: 161) in error. A genetic difference exists between populations in the USA east and west of the Mississippi River *fide* Brandley et al. (2010: 558).

11. *Nerodia sipedon* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 219. (*Coluber sipedon*)

Synonyms: ? *Coluber ichthyoplaga* Rafinesque-Schmaltz, 1818a (*nomen dubium*), *Coluber fulviventer* Rafinesque-Schmaltz, 1820, *Coluber atrifuscus* Harlan, 1827 *(nomen praeoccupatum), Coluber caudaschistosus* Harlan, 1827 *(nomen incorrigendum), Coluber poecilogaster* Wied-Neuwied, 1839 *in* 1838–1841, *Coluber sipeolon* – Holbrook, 1840 *(nomen incorrectum), Tropidonotus niger* Holbrook, 1842b, *Nerodia gassizii* Baird & Girard, 1853, *Tropidonotus obliquus* Hallowell, 1856c, *Natrix fasciata pleuralis* Cope, 1892a, *Natrix sipedon insularum* Conant & Clay, 1937, and *Natrix sipedon williamengelsi* Conant & Lazell, 1973.

Type: Holotype, not designated (P. Kalm, Sept. 1748–Feb. 1751), location unknown.

Type locality: "America septentrionali" [= North America]. Restricted to vicinity of New York City, New York, USA *fide* K.P. Schmidt (1953a: 161).

Distribution: Extreme SE Canada (ext. SE Ontario, ext. S Quebec, Pelée Is.) and cen. and E USA (Alabama, Arkansas, E Colorado, Connecticut, Delaware, W Florida, N Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, E Louisiana, S Maine, Maryland, Massachusetts, Michigan, SE Minnesota, Mississippi, Missouri, Nebraska, S New Hampshire, New Jersey, New York, North Carolina, Outer Banks; Ohio, Put-in-Bay Arch.; E Oklahoma, Pennsylvania, Rhode Island, W South Carolina, ext. SE South Dakota, Tennessee, ext. NE Texas, Vermont, Virginia, West Virginia, Wisconsin), NSL–1675 m.

Fossil records: Middle Pliocene (Blancan II, III) of USA (Kansas, Nebraska), upper Pliocene (Blancan V) of USA (Kansas), lower Pleistocene (Irvingtonian I) of USA (Pennsylvania, South Dakota), lower/middle Pleistocene (Irvingtonian I) of USA (Kansas), middle Pleistocene (Irvingtonian II) of USA (Nebraska), middle/upper Pleistocene (Irvingtonian II) of USA (West Virginia), and upper Pleistocene (Rancholabrean I, II) of USA (Alabama, Georgia, Kansas, Missouri, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia).

Sources: Conant, 1963a, Conant & Clay, 1963, Conant & Lazell, 1973, Schwaner & Mount, 1976, Blaney & Blaney, 1979b, Frost & Collins, 1989, Palmer & Braswell, 1995, Hardy, 1997, Tennant, 1997, Weatherford et al., 1998, Fitch, 1999, Hammerson, 1999, Werler & Dixon, 2000, Mebert, 2008 and Walley et al., 2012.

Remarks: Probably occurs in S New Brunswick, Canada *fide* Gorham (1970b: 16).

12. *Nerodia taxispilota* (Holbrook, 1838). No. Amer. Herp. 2: 113–114, pl. 25. (*Coluber taxispilotus*)

Synonym: *Tropidonotus taxispilotus brocki* Heilprin, 1887.

Types: Syntypes (2), MCZ 16, a 50 mm head, and MCZ 21, a 635 mm specimen (J.E. Holbrook, 1822–1836).

Type locality: "sea-board of South Carolina" and "neighbourhood of the Altamaha river in Georgia, United States."

Distribution: Southeastern USA (E Alabama, Florida, Georgia, E North Carolina, South Carolina, SE Virginia), NSL–300 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Florida).

Sources: Mount & Schwaner, 1970, McCranie, 1983b, Palmer & Braswell, 1995 and Tennant, 1997.

Remarks: Original description reprinted in Holbrook (1842b: 35–36, pl. 8). T. Barbour & Loveridge (1929a: 353) suggested MCZ 16 and/or MCZ 21 were the types, given to L. Agassiz by Holbrook and catalogued from Charleston, SC. Longest syntype 889 mm *fide* Holbrook (1838: 114).

†*NIGEROPHIS* Rage, 1975b (†Nigerophiidae)

Synonyms: *Nigerophoides* – Barrie, 1990 *(nomen incorrectum)* and *Nigrophis* – Nietzke & Kornacker, 2002 *(nomen incorrectum).*

Type species: †*Nigerophis mirus* Rage, 1975b.

Distribution: Lower Paleocene of Mali or Niger and upper Paleocene of Kazakhstan.

Sources: Rage, 1975b, 1983b, 1984b, 1987, Kordikova, 1998 and LaDuke et al., 2010.

1. †*Nigerophis mirus* Rage, 1975b. C.R. Acad. Sci. Paris 281D(9): 515–516, figs. 1a–e.

Type: Holotype, USTL SES 100, one trunk vertebra.

Type locality: "Krebb de Sessao, 'Terme V'; République du Niger. Paléocène" [= Kahal Séssao, ext. E Gao

Region, E Mali, 16°55'N, 4°12'E, or ext. W Tahoua Dept., W Niger].

Distribution: Lower Paleocene (55.8–65.5 mya) of Mali or Niger. Known only from type locality.

Remarks: The Sessao Mesa is just west of the Mali-Niger border.

NINIA Baird & Girard, 1853 (Dipsadidae)

Synonyms: *Streptophorus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Sterptophorus* – Chenu & Desmarest, 1857 *(nomen incorrectum),* and *Streptophurus* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type species: *Ninia diademata* Baird & Girard, 1853.

Distribution: Latin America.

Sources: Dunn, 1935, E.H. Taylor, 1951, Burger & Werler, 1954, J.A. Peters & Orejas-Miranda, 1970, Cadle, 1984b, Villa et al.,1988, Savage & Lahanas, 1991, G. Köhler et al., 2005 and Zaher et al., 2009.

1. *Ninia atrata* (Hallowell, 1845a). Proc. Acad. Nat. Sci. Philadelphia (1844–1845) 2(9): 245–246. (*Coluber atratus*)

Synonyms: *Coluber atratus* Gmelin, 1789 *(nomen suppressum),* ? *Coluber subatrata* Daudin, 1803d *(nomen oblitum), Streptophorus drozii* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Streptophorus lansbergi* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Streptophorus langsbergii* A.-M.-C. Duméril, Bibron & Duméril, 1854c *(nomen emendatum), Streptophorus sebae schmidti* Jan, 1862b, *Ninia spilogaster* W.C.H. Peters, 1881a, and *Streptophurus atractus* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Types: Syntypes (3), ANSP 3410–12, 318–356 mm specimens (S. Ashmead, 1835–1845).

Type locality: "Republic of Columbia, within two hundred miles of Caraccas" (in error). Corrected to Venezuela *fide* Roze (1958d: 2) [= within 320 km of Caracas, Venezuela].

Distribution: Panama and N South America. Panama (Canal Zone: Barro Colorado Is.; Darién, Panamá), W Colombia (Amazonas, Antioquia, Boyacá, Caldas, Cauca, Chocó, Cundinamarca, Guaviare, Magdalena, Meta, Norte de Santander, Santander, Tolima, Valle, Vaupés), Venezuela (Aragua, Barinas, Bolívar, Carabobo, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy), Trinidad & Tobago (Tobago, Trinidad) and N Ecuador (Carchi, Esmeraldas, Pastaza, Pichincha), NSL–1900 m.

Sources: E.H. Taylor, 1951, 1954, Roze, 1966a, J.R. Meyer & Wilson, 1971, Emsley, 1977, Miyata, 1980, Hidalgo, 1981b, L.D. Wilson & Meyer, 1985, Lancini, 1986, Pérez-Santos, 1986, Savage & Villa, 1986, Pérez-Santos & Moreno, 1988, 1991, McCranie & Wilson, 1995, J.C. Murphy, 1997, Markezich, 2002, La Marca et al., 2004, Angarita-Sierra, 2009 and Navarrete et al., 2009.

Remarks: Official Specific Name no. 1859 *fide* Opinion 644 (ICZN, 1963). Hallowell mentioned four syntypes but only three are extant (Burger & Werler, 1954: 649, Roze, 1958d: 3 and Malnate, 1971: 363). The type locality is essentially Venezuela as all states except Táchira are within 320 air-miles of Caracas. In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Coluber atratus* Hallowell is designated a *nomen protectum* and *Coluber subatrata* Daudin a *nomen oblitum.*

2. *Ninia celata* McCranie & Wilson, 1995. J. Herp. 29(2): 225–228, fig. 1a (paratype).

Type: Holotype, KU 31971, 241 mm female (E.H. Taylor, 19 July 1952).

Type locality: "Cinchona (Isla Bonita), Atlantic side of Volcán Poás, 1200 m elevation (see Savage, 1974: 79), Provincia de Alajuela, Costa Rica."

Distribution: Central Costa Rica (Alajuela, W Cartago, S Heredia, Limón, N San José) and W Panama (Boca del Toro), 650–1360 m.

Sources: Savage, 2002 and Solórzano, 2004.

3. *Ninia diademata* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 49–50.

Synonyms: *Streptophorus bifasciatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Streptophorus labiosus* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Ninia diademata plorator* H.M. Smith, 1942f, and *Ninia diademata nietoi* Burger & Werler, 1954.

Type: Holotype, USNM 12122, a 219 mm specimen (J. Fairie).

Type locality: "Orizaba, Mex." [= Orizaba, Veracruz State, Mexico; 18°51'N, 97°06'E, elevation 1240 m].

Distribution: Southeastern Mexico and upper Central America. Southeastern Mexico (Chiapas, Hidalgo, Oaxaca, Puebla, Querétaro, E San Luis Potosí, Tabasco, Veracruz), S Belize (Toledo), Guatemala (Alta Verapaz, Chimatenango, Petén, San Marcos, Sololá, Suchitepequez) and NW Honduras (Atlántida, Comayagua, Copán, Cortés, Ocotepeque, Santa Bárbara, Yoro), NSL–1830 m.

Sources: L.C. Stuart, 1948, R.W. Henderson & Hoevers, 1975, J.C. Lee, 1980, 1996, L.D. Wilson & Meyer, 1985, Pérez-Higareda & Smith, 1991, Benitez-Gálvez, 1997, J.A. Campbell, 1998b and McCranie, 2011a.

Remarks: F. Sumichrast listed collector as *fide* Cochran (1961: 201).

4. *Ninia espinali* McCranie & Wilson, 1995. J. Herp. 29(2): 228–230, fig. 1b (paratype).

Type: Holotype, USNM 333030, a 377 mm male (J.R. McCranie, K.L. Williams & L.D. Wilson, 9 Aug. 1987).

Type locality: "El Portillo de Ocotepeque (14°28'N, 89°04'W), 1910 m elevation, Departamento de Ocotepeque, Honduras."

Distribution: Northern El Salvador (Chalatenango, Comayagua, Copán, Cortés, La Paz, Lempira, Ocotepeque, Santa Bárbara) and W Honduras (Comayagua, Cortés, Ocotepeque), 1040–2240 m.

Sources: Greenbaum et al., 2002, Luque-Montes & Townsend, 2009 and McCranie, 2011a.

5. *Ninia hudsoni* H.W. Parker, 1940. Ann. Mag. Nat. Hist. (11) 5(27): 270–271.

Type: Holotype, BMNH 1946.1.15.38 (formerly BMNH 1939.1.1.9), a 436 mm male (C.A. Hudson, 1938–1939).

Type locality: "New River, British Guiana" [= New River, S East Berbice-Corentyne District, SE Guyana, elevation 230 m]. Emended to S British Guiana, altitude of 750 feet *fide* Burger & Werler (1954: 649).

Distribution: Northern and NW South America. Southern Guyana (S East Berbice-Corentyne), W Brazil (Acre, Rondônia), E Ecuador (Napo, Pastaza) and Peru (Madre de Dios, Pasco), 230–1500 m.

Sources: Pérez-Santos & Moreno, 1991, N.J. Silva, 1993, Lehr & Fernandez, 2000a and C.J. Cole et al., 2013.

Remarks: Probably occurs in S Colombia (Putamayo) *fide* Pérez-Santos (1986: 564).

6. *Ninia maculata* (W.C.H. Peters, 1861e). Mber. Königl. Akad. Wiss. Berlin 1861(10): 924–925. (*Streptophorus maculatus*)

Synonyms: *Ninia sebae tessellatus* Cope, 1875a and *Streptophorus subtessellatus* F. Werner, 1909b.

Types: Syntypes (5), ZMB 1872, ZMB 1873a–b, and ZMB 1874a–b, longest syntype 335 mm female (K. Hoffmann & von Frantzius, 1853–1859).

Type locality: "Costa Rica."

Distribution: Central America. Honduras (Colón, Olancho), E Nicaragua (Atlántico Norte, Atlántico Sur, Chontales, Jinotega, Zelaya), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José) and Panama (Bocas del Toro, Canal Zone, Chiriquí, Darién, Barro Colorado Is.), NSL–1800 m.

Sources: L.C. Stuart, 1948, E.H. Taylor, 1954, Savage & Villa, 1986, B.E. Smith & Campbell, 1996, G. Köhler, 1999b, McCranie et al., 2001, 2006, Savage, 2002 and McCranie, 2011a.

Remarks: Possibly occurs in W Colombia (Chocó) *fide* Pérez-Santos (1986: 564).

7. *Ninia pavimentata* (Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909). Miss. Sci. Mex. Amér. Cen., Rept. 3(9): 549–550, pl. 32, figs. 8, 8a–d, pl. 33, fig. 2. (*Streptophorus maculatus pavimentatus*)

Types: Syntypes (4), MNHN 1152a–d, one male and 3 females, longest syntype 179 mm (Comm. Sci. Mexico Cen. Amer., 1865–1867).

Type locality: "Haute Vera Paz (République du Guatemala)" [= Alta Verapaz Dept., N Guatemala].

Distribution: Guatemala (Alta Verapaz, Baja Verapaz, Huehuetenango, Izabal, San Marcos) and Honduras (Cortés, Yoro), 1120–1825 m.

Sources: B.E. Smith & Campbell, 1996, Townsend et al., 2005a, 2008 and McCranie, 2011a.

8. *Ninia psephota* (Cope, 1875a). J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 146. (*Catostoma psephotum*)

Synonyms: *Streptophorus oxynotus* F. Werner, 1909b and *Ninia cerroensis* E.H. Taylor, 1954.

Type: Holotype, USNM 61971, a 480 mm specimen (W.M. Gabb, 1873–1875).

Type locality: "higher points on the Pico Blanco, chiefly in the rainy zone, at from 5000 to 7000 feet, southern Costa Rica" [= Cerro Pico Blanco, Limón Prov., E Costa Rica, 9°17'N, 83°02'W, elevation 1500–2100 m].

Distribution: Costa Rica (Alajuela, Cartago, Heredia, Limón, Puntarenas, San José) and W Panama (Chiriquí), 1090–2285 m.

Source: Savage, 2002.

Remarks: Probably occurs in Guanacaste, Costa Rica *fide* Savage & Lahanas (1991: 53).

N

9. *Ninia sebae* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 515–517. (*Streptophorus sebae*)

Synonyms: *Elapoidis fasciatus* Hallowell, 1855c, *Streptophorus sebae collaris* Jan, 1862b, *Streptophorus sebae dorsalis* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Streptophorus sebae punctulatus* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Ninia sebae morleyi* K.P. Schmidt & Andrews, 1936, and *Ninia sebae immaculata* K.P. Schmidt & Rand, 1957.

Type: Lectotype, MNHN 3443, a 309 mm specimen, designated herein.

Type locality: "Mexico" via lectotype selection. Restricted to Veracruz State, Mexico *fide* K.P. Schmidt & Andrews (1936: 171). Further restricted to Veracruz, Veracruz State, Mexico *fide* H.M. Smith & Taylor (1950a: 351).

Distribution: Mesoamerica. Southern Mexico (Campeche, Chiapas, Oaxaca, Puebla, Quintana Roo, Veracruz, Yucatán), Belize (Belize, Cayo, Corozal, Orange Walk, Stann Creek, Toledo), Guatemala (Chimaltenango, Petén, Quezaltenango, San Marcos, Sololá,

Suchitepéquez), El Salvador (Ahuachapán, Cabañas, Chalatenango, Cuscatlán, La Libertad, Morazán, San Salvador, San Vicente, Usulután), Honduras (Atlántida, Choluteca, Colón, Comayagua, Copán, Cortés, El Paraíso, Francisco Morazán, Gracias a Dios, Intibucá, Ocotepeque, Olancho, Santa Bárbara), Nicaragua (Atlántico Norte, Atlántico Sur, Chontales, Granada, Jinotega, Managua, Matagalpa, Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José) and Panama (Bocas del Toro, ? Chiriquí), NSL–2000 m.

Sources: K.P. Schmidt, 1941, E.H. Taylor, 1951, 1954, Burger & Werler, 1954, Mertens, 1952a, K.P. Schmidt & Rand, 1957, Duellman, 1963, R.W. Henderson & Hoevers, 1975, J.C. Lee, 1980, 1996, 2000, L.D. Wilson & Meyer, 1985, Savage & Villa, 1986, Pérez-Higareda & Smith, 1991, Benitez-Gálvez, 1997, J.A. Campbell, 1998b, G. Köhler, 1999b, Stafford & Meyer, 2000, Savage, 2002, Solórzano, 2004, Kohler et al., 2005, N. Herrera et al., 2007, Ponce A. et al., 2008 and McCranie, 2011a.

Remarks: Lectotype designation of MNHN 3778 *fide* Burger & Werler (1954: 655) invalid (MNHN 3778 = *Pseudoboa neuwiedi fide* P. David, *in litt.).* Lectotype designation of MNHN 7303 *fide* L.D. Wilson & Meyer (1982: 81 & 1985: 73) also invalid as the specimen is lost (seen by A. Hoge in 1978 so possibly lost in Butantan fire of 2010) *fide* P. David *(in litt.).* MNHN 3443 represents only extant syntype.

N

NOTECHIS Boulenger, 1896a (Elapidae)

Synonym: *Oplocephalus* Gray *in* Griffith & Pidgeon, 1831 *(nomen oblitum), Ophicephalus* – Swainson, 1839 *(nomen incorrectum), Hoplocephalus* Agassiz, 1844 *(nomen emendatum),* and *Nothechis* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type species: *Naja scutata* W.C.H. Peters, 1861c.

Distribution: Southern Australia.

Fossil record: Pleistocene of Australia.

Sources: F. McCoy, 1878c, F. Werner, 1923b, Kinghorn, 1956, Worrell, 1963, Kinghorn, 1964, Rawlinson, 1974, 1991, Shine, 1977a–b, 1987c, Storr, 1982, 1985, Schwaner et al., 1985, Longmore, 1986, Storr et al., 1986, S.K. Wilson & Knowles, 1988, Hoser, 1989, 2012e, Hutchinson, 1990, Schwaner & Sarre, 1990, Ehmann, 1992, Golay et al., 1993, Greer, 1997, Keogh et al., 1998, 2005, Cogger, 2000, Scanlon & Lee, 2004 and Sanders et al., 2008.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Notechis* Boulenger is designated a *nomen protectum* and *Oplocephalus* Gray a *nomen oblitum.*

1. *Notechis ater* (Krefft, 1866). Proc. Zool. Soc. London 34(1): 370. (*Hoplocephalus ater*)

Synonyms: *Notechis scutatus niger* Kinghorn, 1921, *Notechis scutatus occidentalis* Glauert, 1948, *Notechis ater humphreysi* Worrell, 1963b, *Notechis ater serventyi* Worrell, 1963b, *Notechis nigra* – Trethewie, 1971, *Notechis ater humphrysi* – Mengden, 1985a *(nomen incorrectum), Notechis atra niger* – DuBourdieu, Kawaguchi & Shier, 1987 *(nomen incorrectum),* and *Notechis ater kangaroo* – Mollier, Chwetzoff, Frachon & Ménez, 1989 *(lapsus calami).*

Type: Holotype, AMS 131696 (formerly AMS 6577) (G. Masters, 1860–1866).

Type locality: "Flinder's Distribution, South Australia," (in error). Corrected to Pt. Lincoln, [= Port Lincoln, S South Australia, S Australia, 34°40'S, 135°53'E, elevation NSL] *fide* AMS catalogue, Cogger (1979: 205) and Shea & Sadlier (1999: 50).

Distribution: Southern Australia (S South Australia, Tasmania, SW Western Australia, Babel, Cat, Chappell, Christmas, East Franklin, Flinders, Forsyth, Goat, Grindal, Hopkins, Kangaroo, King, Louth, Lusby, Marum, New Year, Partney, Reevesby, Roxby, Spilsby, St. Francis, St. Peter, West Franklin and Williams Is.), NSL–1195 m.

Sources: Rawlinson, 1967, 1991, Fearn, 1993, Shea & Sadlier, 1999 and Means, 2004b.

2. *Notechis scutatus* (W.C.H. Peters, 1861c). Mber. Königl. Akad. Wiss. Berlin 1861(4): 690. (*Naja scutata*)

Synonyms: ? *Boa laevis* Lacépède, 1804 *(nomen oblitum), Oplocephalus cuvieri* Gray *in* Griffith & Pidgeon, 1831 *(nomen oblitum), Alecto fasciolata* Jan, 1863b (*nomen nudum*), *Hoplocephalus fuscus* Steindachner, 1867a, *Alecto fasciolata* Jan, 1873 *in* Jan & Sordelli, 1870–1881, *Notechis scutatis* – Trethewie & Khaled, 1973 *(nomen incorrectum), Notechis edwardsi* Wells & Wellington, 1985, *Notechis longmorei* Wells & Wellington, 1985, and *Notechis schwaneri* Wells & Wellington, 1985.

Type: Neotype, NMV D47618, a 1018 mm male (P.A. Rawlinson, A.J. Coventry & P.B. Mather, 27 Jan. 1976), designated by Rawlinson (1991: 130).

Type locality: "'The Brothers', 10 km NE of Benambra, Victoria (36° 56' S, 147° 45' E), Australia" via neotype selection.

Distribution: Southeastern Australia (Australian Capital Territory, New South Wales, ext. SE Queensland, ext. SE South Australia, Victoria, Badger, Blyth, Carnac, East Franklin, Flinders, Garden, Goat, Gundal, Hareby, Hopkins, King, Lusby, Reevesby, Roxby, St. Francis, St. Peter, West Franklin, Williams and Winceby Is.), NSL–1470 m.

Sources: Kellaway & Thomson, 1932, Worrell, 1963b, Rawlinson, 1967, M.J. Smith, 1975, Jenkins & Bartell, 1980, Gow, 1983, Schwaner, 1985b, 1989, G.

Swan, 1990, Covacevich & Couper, 1991, Mirtschin & Davis, 1992a–b, Bush et al., 1995, & Shea & Sadlier, 1999, Cogger, 2000, Storr et al., 2002, J.C. Murphy & Schlager, 2003, Swan et al., 2004 and Swanson, 2008.

Remarks: Holotype (ZMB 2815) lost *fide* Cogger et al. (1983: 229) and Rawlinson (1991: 129). In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Naja scutata* W.C.H. Peters is designated a *nomen protectum* and *Boa laevis* Lacépède and *Oplocephalus cuvieri* Gray a *nomina oblita*.

NOTHOPSIS Cope, 1871b (Dipsadidae)

Synonyms: *Notopsis* – Hoffmann, 1890 *(nomen incorrectum),* and *Nothopis* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type species: *Nothopsis rugosus* Cope, 1871b.

Distribution: Central America and NW South America.

Sources: Dunn & Dowling, 1957, J.A. Peters & Orejas-Miranda, 1970, Miyata, 1980, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, 1991, Villa et al., 1988, G. Köhler, 1999b, Savage, 2002, Solórzano, 2004, McCranie et al., 2006, Zaher et al., 2009 and McCranie, 2011a.

1. *Nothopsis rugosus* Cope, 1871b. Proc. Acad. Nat. Sci. Philadelphia 23(2): 201–203, pl. 17, figs. 1–7.

Synonyms: *Nothopsis affinis* Boulenger, 1905b and *Nothopsis torresi* E.H. Taylor, 1951.

Type: Holotype, USNM 12427, a 381 mm female (T.O. Selfridge, 1869–1871).

Type locality: “Isthmus of Darien” [Panama]. Emended to Caribbean Coast of the Isthmus of Darién, Panama *fide* Dunn & Dowling (1957: 255).

Distribution: Central America and NW South America. Honduras (Colòn, Gracias a Dios), Ext. S Nicaragua (Río San Juan), Costa Rica (Alajuela, Heredia, Limón, Puntarenas, San José), Panama (Bocas del Toro, Chiriquí, Darién, Colón, Panamá, Veraguas), W Colombia (Chocó, Valle) and NW Ecuador (Esmeraldas, Pichincha), NSL–1000 m.

†*NUBIANOPHIS* Rage & Werner, 1999 (†Nigerophiidae)

Type species: †*Nubianophis afaahus* Rage & Werner, 1999.

Distribution: Middle Cretaceous of Sudan.

Sources: Rage & Werner, 1999 and LaDuke et al., 2010.

1. †*Nubianophis afaahus* Rage & Werner, 1999. Palaeont. Afr. 35: 97–100, figs. 13–14.

Type: Holotype, TUB-SFB69 Vb-1041, one middle trunk vertebra.

Type locality: “Wadi Abu Hashim, Sudan. Wadi Abu Hashim Member of Wadi Milk Formation; Cenomanian.”

Distribution: Middle Cretaceous (Cenomanian: 93.9–100.5 mya) of Sudan. Known only from type locality.

O

OCYOPHIS Cope, 1886c (Xenodontidae)

Synonym: *Plesius* Jan, 1857 *(nomen nudum).*
Type species: *Natrix atra* Gosse, 1851.
Distribution: Jamaica.
Sources: Hedges et al., 2009, R.W. Henderson & Powell, 2009 and Zaher et al., 2009.
Remarks: A valid genus *fide* Grazziotin et al. (2012: 22).

1. *Ocyophis ater* (Gosse, 1851). Nat. Jamaica: 228–232. (*Natrix atra*)

Synonyms: *Natrix capistrata* Gosse, 1851, *Plesius inconstans* Jan, 1857 (*nomen nudum*), *Dromicus ater inconstans* Jan, 1863b (*nomen nudum*), *Dromicus ater transversus* Jan, 1863b (*nomen nudum*), and *Dromicus ater transverses* Jan, 1867 *in* Jan & Sordelli, 1866–1870.
Types: Syntypes (5), BMNH 1946.1.4.65 (formerly BMNH 1845.8.17.8) and BMNH 1946.1.5.6 (formerly BMNH 1845.8.17.45), BMNH 1946.1.4.94 and BMNH 1946.1.23.81–82, two females (P.H. Gosse, 6 Dec. 1844–11 July 1846).
Type locality: "Jamaica." Emended to Bluefields, Jamaica [= Westmoreland Parish, W Jamaica, 18°10'N, 78°02'W, elevation 35 m] *fide* A.C.L.G. Günther (1858: 127).
Distribution: Jamaica (Kingston & St. Andrews, St. Ann, Trelawny, Westmoreland), very rare *fide* Grant (1940c: 123) or extinct *fide* A. Schwartz & Thomas (1975: 170) and R.W. Henderson & Powell (2009: 365).
Sources: Grant, 1940b and R.W. Henderson & Powell, 1996a.
Remarks: Gosse (1851: 228) listed a single specimen with 180 V + 137 SC. A.C.L.G. Günther (1858: 127) stated that "Var. A. no. e" from Bluefields is the holotype (half-grown specimen, Gosse coll.). Boulenger (1894a: 122) listed two female syntypes from Jamaica with Var. A. no. a–b (175 V + 160 SC and 181 V + ? SC). Boulenger's only Bluefields specimen is a male "Var. A. no. d" (178 V +? SC), without collector listed. Günther's designation of a type may have precedence over Boulenger's.

2. *Ocyophis melanichnus* (Cope, 1862b). Proc. Acad. Nat. Sci. Philadelphia 14(1): 76–77. (*Alsophis melanichnus*)

Type: Holotype, MCZ 1522, a 914 mm specimen (D.F. Weinland, 1859), lost *fide* A. Schwartz & Henderson (1988: 205).
Type locality: "Hayti, near Jeremie" [= vicinity of Jérémie (18°39'N, 74°07'W, elevation 15 m), Grand'Anse Dept., SW Haiti].
Distribution: Hispaniola. Haiti (Grand'Anse) and Dominican Republic (La Vega), 15–100 m.
Source: Powell & R.W. Henderson, 1998b.
Remarks: Very rare *fide* A. Schwartz & Thomas (1975: 172) and A. Schwartz (1980; 97) or extinct *fide* A. Schwartz & Henderson (1991: 572).

OGMODON W.C.H. Peters, 1864a (Elapidae)

Synonyms: *Labionaris* Brocchi, 1876 and *Agmodon* – Boquet, 1948 *(nomen incorrectum).*
Type species: *Ogmodon vitianus* W.C.H. Peters, 1864a.
Distribution: Fiji Islands.
Sources: McDowell, 1969a, 1970, Gorham, 1970a, Golay et al., 1993, Zug & Ineich, 1993, Keogh, 1998, Scanlon & Lee, 2004, Zaher et al., 2009 and Hoser, 2012e.

1. *Ogmodon vitianus* W.C.H. Peters, 1864a. Mber. Königl. Akad. Wiss. Berlin 1864(4): 275–276, pl., figs. 4, 4a–4f.

Synonym: *Labionaris filholii* Brocchi, 1876.
Type: Lectotype, ZMB 5118, a 355–359 mm specimen (Gräffe & Godeffroy), designated by Zug & Ineich (1993: 18).
Type locality: "Viti-Levu, Fiji Islands" [bet. 17°20'–18°17'S and 177°15'–178°40'E] via lectotype selection.
Distribution: Fiji Islands (SE Viti Levu), 10–150 m.
Remarks: Original description reprinted in W. Peters (1864d: 8). McDowell (1970: 179) erroneously cited publication date as 1865.

†*OGMOPHIS* Cope, 1884b (Boidae)

Synonym: †*Ogmophus* – Douglass, 1903 *(nomen incorrectum).*
Type species: †*Ogmophis oregonensis* Cope, 1884b.
Distribution: Middle Eocene of USA, upper Eocene of Canada, lower and middle Oligocene of USA, Oligocene of USA, lower, middle and upper Miocene of USA, upper Miocene of Poland, and Pliocene of USA.
Sources: Gilmore, 1938, Holman, 1979b, 2000a and Rage, 1984b.

1. †*Ogmophis arenarum* Douglass, 1903. Ann. Carnegie Mus. (1903–1904) 2(2): 171. (*nomen corrigendum*)

Synonym: *Ogmophus arenarum* Douglass, 1903 *(nomen incorrigendum),* and *Ogmophis arenarum* – Lambe, 1908 *(nomen corrigendum).*

Type: Lectotype, CM 744, the vertebra illustrated in Gilmore (1938: figs. 12a–d), one trunk vertebra (E. Douglass, 1899), designated herein.

Type locality: "Flint creek beds, within two or three miles of the village of New Chicago in Granite County, western Montana; Miocene."

Distribution: Middle Miocene (Barstovian: 13.6–16.3 mya) of USA (Montana). Known only from the type series.

2. †*Ogmophis compactus* Lambe, 1908. Contr. Canad. Paleont. 3(4): 20–21, pl. 1, figs. 26–30.

Type: Lectotype, NMC 6237, one trunk vertebra (L.M. Lambe, 1904), designated by Gilmore (1938: 39).

Type locality: "4 miles above east end of Post Office, Cypress Hills, Saskatchewan Canada; Oligocene."

Distribution: Upper Eocene (Chadronian: 33.9–38.0 mya) of Canada (Saskatchewan) and lower Oligocene (Orellan: 33.3–33.9 mya) of USA (Nebraska).

Sources: Holman, 1972, 2000a.

O

3. †*Ogmophis europaeus* Szyndlar *in* Mlynarski, Szyndlar, Estes & Sanchez, 1982. Estud. Geol. 38: 112–113, fig. 9.

Type: Holotype, ZPW OP 86/2, one trunk vertebra (Ryziewicz, 1950–1958).

Type locality: "Opole, Silesia. Southern Poland. Late Miocene (Sarmatian, MN 7)." Emended to a suburb of the town of Opole, in its district called Nowa Wies Królewska, Opole Voivodship, SW Poland *fide* Mlynarski (1984: 130).

Distribution: Upper Miocene (Sarmatian, MN 7: 11.1–12.8 mya) of Poland. Known only from type series.

Source: Mlynarski, 1984.

4. †*Ogmophis miocompactus* Holman, 1976a. Herpetologica 32(1): 41–42, fig. 1.

Type: Holotype, SDSM 8372, one trunk vertebra.

Type locality: "Black Bear Quarry II, designated SDSM locality V673, of Bennett County, South Dakota, USA; early Rosebud Formation, Hemingfordian (middle Miocene)."

Distribution: Lower Miocene (Arikareean: 20.6–30.8 mya) of USA (Nebraska, Wyoming), middle Miocene (Hemingfordian: 16.3–20.6 mya) of USA (South Dakota), and middle Miocene (Barstovian: 13.6–16.3 mya) of USA (South Dakota, Texas).

Sources: Holman, 1976c, 1977b, 1978, 1981b, 1996a, 2000a.

Remarks: Type locality is lower Miocene *fide* Holman (2000a: 84).

5. †*Ogmophis oregonensis* Cope, 1884b. Vert. Tertiary Form. West 3(2): 783, pl. 58a, figs. 10, 11–11b, 12–12a.

Types: Syntypes (5), AMNH, four middle trunk and one anterior trunk vertebrae (J.L. Wortman), lost *fide* Gilmore (1938: 36).

Type locality: "the John Day beds near the John Day River, Oregon; John Day epoch, upper Oligocene."

Distribution: Upper Oligocene (Arikareean: 20.6–30.8 mya) of USA (Oregon). Known only from type series.

6. †*Ogmophis pliocompactus* Holman, 1975. Univ. Michigan Paps. Paleont. (12): 61–62, fig. 2g.

Type: Holotype, MSUVP 784, one trunk vertebra (J.A. Holman, 1969–1973).

Type locality: "locality UM-K6-59 on the Lowell Hillman Ranch 2350-2550 ft S and 75 ft E of the NW corner, Sec. 22, R. 22 W, T. 11 S, elevation 2255 ft., Trego County, Kansas; lower Pliocene (Clarendonian), Ogallala Formation."

Distribution: Upper Miocene (Clarendonian: 10.3–13.6 mya) of USA (Kansas, Texas).

Remarks: Holotype erroneously listed as MSUVP 772 *fide* Rage (1984b: 27).

7. †*Ogmophis voorhiesi* Holman, 1977a. J. Herp. 11(2): 144, figs. 3a–b.

Type: Holotype, UGVP 47, one trunk vertebra (M. Voorhies).

Type locality: "an abandoned Kaolin (Clay) Pit (Pit No. 22, J.M. Huber Corporation) from approximately 9 mi SSE of Macon and 4 mi ENE of Huber, Twiggs County, Georgia; Upper Eocene of the Twiggs clay, Duchesnean."

Distribution: Middle Eocene (Duchesnean: 38.0–42.0 mya) of USA (Georgia, Wyoming).

OLIGODON H. Boie *in* Fitzinger, 1826a (Colubridae)

Synonyms: *Calamaria* Fitzinger, 1826a *(nomen nudum), Calamaria* F. Boie, 1826 *(nomen nudum), Simotes* A.-M.-C. Duméril, 1853 *(nomen praeoccupatum),* ? *Conorhina* Bibron *in* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Limotes* – Lohmeyer, 1882 *(nomen incorrectum), Tripeltis* Cope, 1886c, *Holarchus* Cope, 1886c, *Oligodurus* – Kingsley, 1888 *(nomen

incorrectum), Simodes – Palacky, 1898 *(nomen incorrectum), Dicraulax* Cope, 1893a, *Sinotes* – Angel, 1929 *(nomen incorrectum), Tripelis* – Maki, 1933 *(nomen incorrectum), Oligodom* – Terent'ev & Chernov, 1949 *(nomen incorrectum), Oligidon* – G. Haas, 1952b *(nomen incorrectum), Simoctes* – Deraniyagala, 1955 *(nomen incorrectum), Simoetes* – Deraniyagala, 1955 *(nomen incorrectum), Oligondon* – Cochran, 1961 *(nomen incorrectum), Oligodan* – Acharji & Mukherjee, 1966 *(nomen incorrectum), Cligodon* – B.L. Lim & Sharef bin Kanarudin, 1975 *(nomen incorrectum), Cottonkukri* Hoser, 2012af *(nomen illegitimum), Crottykukrius* Hoser, 2012af *(nomen illegitimum), Dannyelfakharikukri* Hoser, 2012af *(nomen illegitimum), Daviekukri* Hoser, 2012af *(nomen illegitimum), Funkikukri* Hoser, 2012af *(nomen illegitimum), Geddykukrius* Hoser, 2012af *(nomen illegitimum), Harrigankukriae* Hoser, 2012af *(nomen illegitimum), Hoserkukriae* Hoser, 2012af *(nomen illegitimum), Hugheskukri* Hoser, 2012af *(nomen illegitimum), Moseselfakharikukri* Hoser, 2012af *(nomen illegitimum), Ninkukri* Hoser, 2012af *(nomen illegitimum), Oxykukrius* Hoser, 2012af *(nomen illegitimum), Sammykukriae* Hoser, 2012af *(nomen illegitimum),* and *Smythkukri* Hoser, 2012af *(nomen illegitimum).*

Type species: *Coluber bitorquatus* F. Boie, 1827.

Distribution: Asia and East Indies.

Sources: Boulenger, 1894a, Rooij, 1917, E.H. Taylor, 1922c, Wall, 1923g, Bourret, 1936b, M.A. Smith, 1943, C. Haas, 1950, Leviton, 1963a, Pauwels et al., 2002, Tillack, 2008, Tillack & Günther, 2009, I. Das, 2010, 2012, Green, 2010, Green et al., 2010, David & Vogel, 2012a and David et al., 2012.

1. *Oligodon affinis* A.C.L.G. Günther, 1862a. Ann. Mag. Nat. Hist. (3) 9(50): 58.

Type: Holotype, BMNH 1946.1.5.52, a 267 mm female (R.H. Beddome, 1857–1861).

Type locality: "Anamallay Hills" [= Anamalai Hills, S Western Ghats, E Kerala /W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E].

Distribution: Southwestern India (Kerala, Tamil Nadu), 100–1200 m.

Sources: Inger et al., 1984 and Whitaker & Captain, 2004.

Remarks: Probably occurs in S Karnataka.

2. *Oligodon albocinctus* (Cantor, 1839b). Proc. Zool. Soc. London 7(1): 50. (*Coronella albocincta*)

Synonyms: *Coronella puncticulatus* Gray, 1853 and *Simotes amabilis* A.C.L.G. Günther, 1868.

Type: Lectotype, specimen illustrated in colored sketch of T.E. Cantor (1834–1837) in RSL, designated by M.A. Smith (1943: 211).

Type locality: "Cherrapungi, Assam" [= Cherrapunji, East Khasi Hills, Meghalaya State, NE India, 25°18'N, 91°42'E, elevation 1485 m] via lectotype selection.

Distribution: Southern Asia. Nepal (Ilam, Kathmandu, Makwanpur), NE India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, Sikkim, E Uttar Pradesh, N West Bengal), Bhutan, SW China (Yunnan, Xizang), Bangladesh (Rangpur, Chittagong Hills), N Vietnam (Vinh Phuc) and NW Myanmar (Chin, Kachin, Mandalay, Rakhine), 60–1980 m.

Sources: A.C.L.G. Günther, 1868, Venning, 1910, Wall, 1911e, 1914a, 1923g, 1925d , Acharji & Kripalani, 1951, Kramer, 1977, Zhao & Adler, 1993, Orlov et al., 2000, Tiwari & Shah, 2004, Whitaker & Captain, 2004, M.F. Ahmed et al., 2009, V.S. Nguyen et al., 2009 and Wangyal, 2011.

Remarks: Holotype lost *fide* Iskandar & Colijn (2001: 70). Wagner (1975: 65) synonymized *O. juglandifer* (Wall) with *O. albocinctus.*

3. *Oligodon ancorus* (Girard, 1858a). Proc. Acad. Nat. Sci. Philadelphia (1857) 9(6): 182. (*Xenodon ancorus*)

Synonyms: *Simotes aphanospilus* Cope, 1860e, *Simotes phaenochalinus* Cope, 1860e, *Simotes ancoralis* Jan, 1863a, *Holarchus burksi* E.H. Taylor, 1918b, and *Oligodon rhombifer* F. Werner, 1924a .

Type: Holotype, USNM 5521 (formerly USNM 20) (C. Wilkes [U.S. Explor. Exped.], 12–21 Jan. 1842).

Type locality: "exotic to North America." Emended to Manilla (*sic*) *fide* Girard (1858b: 168), [= Manila, Manila Prov., SW Luzon Is., N Philippines, 14°36'N, 120°59'E, elevation 10 m].

Distribution: Northern Philippines (Luzon, Mindoro), 10–275 m.

Sources: E.H. Taylor, 1922a, Leviton, 1959b, 1963a, Tillack, 2008 and Tillack & Günther, 2009.

Remarks: Supplemental original description in Girard (1858b: 167–168). Philippine (Samar Is.) record needs confirmation.

O

4. *Oligodon annamensis* Leviton, 1953a. J. Washington Acad. Sci. 43(12): 423–424, fig. 1.

Type: Holotype, USNM 90408, a 249 mm female (E. Poilane, 11 March 1933).

Type locality: "Blao, Haut Donai, Annam, French Indo-China" [= Bao Loc, Lam Dong Prov., S Vietnam, 11°32'N, 107°48'E, elevation 800 m].

Distribution: Southern Vietnam (Lam Dong), 800 m. Known only from vicinity of type locality.

Sources: Leviton, 1960, Campden-Main, 1970a and V.S. Nguyen et al., 2009.

5. *Oligodon annulifer* (Boulenger, 1893d). Proc. Zool. Soc. London 61(1): 524. (*Simotes annulifer*)

Type: Holotype, BMNH 1946.1.3.34, a 160 mm specimen (A.H. Everett, 1869–1885).

Type locality: "North Borneo" [= Sabah, East Malaysia].

Distribution: Borneo. East Malaysia (Sabah), Brunei and Indonesia (W Kalimantan), NSL–480 m.

Sources: Stuebing, 1991, David & Vogel, 1996, Stuebing & Inger, 1999, Iskandar, 2004 and Tillack & Günther, 2009.

Remarks: Holotype illustrated in Tillack & Günther (2009: figs. 8a–d). Kalimantan record doubtful.

6. *Oligodon arnensis* (G. Shaw, 1802). Gen. Zool., Amph. 3(2): 526. (*Coluber arnensis*)

Synonyms: *Coluber russelius* Daudin, 1803c, *Coluber monticolus* Cantor, 1839b, *Simotes albiventer* A.C.L.G. Günther, 1864a, and *Simotes russellii ceylonensis* F. Müller, 1887.

Type: Lectotype, a 457 mm specimen described and illustrated by P. Russell (1796: 43–44, pl. 38) (Bonniveaux, Oct. 1788), designated herein.

Type locality: "Arnee in the East Indies" [= Arni, N Tamil Nadu State, SE India, 12°40'N, 79°17'E, elevation 150 m] via lectotype selection.

Distribution: Southern Asia. Eastern Afghanistan (Nangarhar), Pakistan (Balochistan, Khyber Pakhtunkhwa, Sindh), cen. Nepal (Bara, Chitwan, Dolakha, Kaski, Kathmandu, Parsa, Sindhupalchok), India (Andhra Pradesh, Bihar, Goa, Himachal Pradesh, Jammu and Kashmir, Karnataka, Kerala, Manipur, Maharashtra, Orissa, Tamil Nadu, Uttar Pradesh, West Bengal), Sri Lanka (Central, Eastern, Northern, North-Western, Southern, Western) and Bangladesh (Rangpur), 100–2000 m.

Sources: Wall, 1914a, 1921g, Deraniyagala, 1936, 1955, Acharji, 1946, E.H. Taylor, 1950b, A. Bhatnagar, 1959, L. Swan & Leviton, 1962, Acharji & Mukherjee, 1966, Minton, 1966, Král, 1969, P. Silva, 1969, Tiwari & Sharma, 1971, Murthy, 1972a, 1986, Mahajan & Agrawal, 1976, R.C. Sharma, 1976a, Kramer, 1977, Murthy et al., 1979, M.S. Khan, 1982a–b, 2002, Daniel, 1983, M.A.R. Khan, 1988, A. Silva, 1990b, 2009, Sanyal et al., 1993, Tiwari & Shah, 2004, Whitaker & Captain, 2004 and N. Khaire, 2006.

Remarks: Original description based on P. Russell (1796: 43–44, pl. 38).

7. *Oligodon barroni* (M.A, Smith, 1916). J. Nat. Hist. Soc. Siam 2(1): 46–47, pl., figs. 4–4a. (*Simotes barroni*)

Synonym: *Holarchus taeniatus caudaensis* Bourret, 1934c.

Types: Syntypes (3), BMNH 1946.1.3.21–22 and BMNH 1946.1.3.26 (formerly BMNH 1917.5.14.16a–c), three males, longest syntype 380 mm (P.A.R. Barron).

Type locality: "Hup Bon, E. of Sriracha, S. E. Siam" [= Hup Bon, Si Racha, Chon Buri Prov., SE Thailand, ca. 13°06'N, 101°06'E, elevation 135 m].

Distribution: Southeast Asia. Southern Thailand (Bangkok, Champasak, Chanthaburi, Chon Buri, Phra Nakhon Si Ayutthaya, Rayong, Saraburi, Koh Lam Is.), Cambodia (Kaoh Kong, Pursat), S Laos (Champasak) and S Vietnam (Binh Duong, Cao Bang, Dong Nai, Gia Lai, Hai Duong, Khanh Hoa, Thua Thien-Hue), 60–780 m.

Sources: Bourret, 1934c, E.H. Taylor, 1965, Campden-Main, 1970a, Deuve, 1970, Saint-Girons, 1972a, M.J. Cox et al., 1998, Teynié & David, 2007, David et al., 2008b and V.S. Nguyen et al., 2009.

Remarks: Two topotypes incorrectly listed in BMNH catalogue as syntypes *fide* David et al. (2008: 36).

8. *Oligodon bitorquatus* (F. Boie, 1827). Isis von Oken 20(6): 519. (*Coluber bitorquatus*)

Synonyms: *Oligodon bitorquatus* H. Boie *in* Schlegel, 1826a *(nomen nudum),* Calamaria *oligodon* Schlegel, 1837, *Oligodon subquadratum* A.-M.-C. Duméril, Bibron & Duméril, 1854a, and *Rhabdosoma amboinense* Bleeker, 1860e.

Type: Lectotype, RMNH 10429 (formerly RMNH 53) (S. Müller, 1825–1827), designated herein by R.F. Inger.

Type locality: Unknown. Corrected to Java *fide* H. Boie (1826a: 236), Fitzinger (1826a: 56) and RMNH catalogue.

Distribution: Southern Indonesia (Java, Sumbawa, Timor), 330–1525 m.

Sources: Mertens, 1930, Kopstein, 1938, Tillack & Günther, 2009 and Lang, 2011.

Remarks: Original description based on H. Boie's MS (1823–1825). Records from Sumatra, Ambon and Kalimantan doubtful *fide* T. Barbour (1912b: 24), Mertens (1930: 308), C. Haas (1950: 555) and (Lang, 2011: 111).

9. *Oligodon booliati* Leong & Grismer, 2004. Asiatic Herpetol. Res. 10: 12–14, figs. 1–3.

Type: Holotype, ZRC 2.5153, a 510 mm female (T.M. Leong & K.M. Crane, 16 July 2001).

Type locality: "primary forest along the Tekek-Juara trail, ca. 150 m asl., Pulau Tioman (Pahang, Malay Peninsula)."

Distribution: West Malaysia (Pahang: Tioman Is.), 150–300 m.

Sources: Grismer & Khang Aun, 2008 and Grismer, 2011.

Remarks: Probably a "colour pattern class" and not a valid species *fide* Green (2010: 93).

10. *Oligodon brevicaudus* A.C.L.G. Günther, 1862a. Ann. Mag. Nat. Hist. (3) 9(50): 58. (*Oligodon brevicauda*)

Type: Holotype, BMNH 1946.1.3.35, a 381 mm female (R.H. Beddome, 1857–1861).

Type locality: "Anamallay Hills" [= Anamalai Hills, S Western Ghats, E Kerala /W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E].

Distribution: Southwestern India (Western Ghats of Kerala, Tamil Nadu), 915–1005 m.

Sources: A.C.L.G. Günther, 1864a, Cope, 1886c, Campden-Main, 1970b and Pauwels et al., 2002.

Remarks: Possibly occurs in SW Karnataka and W Tamil Nadu, India.

11. *Oligodon calamarius* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 216. (*Coluber calamarius*)

Synonym: *Oligodon templetoni* A.C.L.G. Günther, 1862a.

Types: Syntypes (2), NHR Lin-62 (formerly MAFR), a 210 mm specimen, and ZMUU 143 (formerly JA).

Type locality: "America" (in error). Corrected to Sri Lanka *fide* M.A. Smith (1943: 229).

Distribution: Southwestern Sri Lanka (Central, Sabaragamuwa, Southern, Western), 300–1280 m.

Sources: A.C.L.G. Günther, 1864a, Wall, 1921g, Deraniyagala, 1955, Brongersma et al., 1966, P. Silva, 1969, 1980a and A. Silva, 1990.

Remarks: M.A. Smith (1943: 228) restricted the type to Stockholm but without specific number..

12. *Oligodon catenatus* (Blyth, 1854a). J. Asiat. Soc. Bengal 23(3): 287. (*Calamaria catenata*)

Synonym: *Oligodon herberti* Boulenger, 1905f.

Type: Holotype, not designated, IMC, a 432 mm specimen (Robinson), lost *fide* Sclater (1891a: 231).

Type locality: "Asám from the Khásya hills, or other upland territory" [= vicinity of Khasi Hills, E Meghalaya State, NE India, 25°35'N, 91°38'E, elevation 1370–1675 m].

Distribution: Southeastern Asia. Northeastern India (Meghalaya), S China (Fujian, Guangdong, Guangxi), N Myanmar (Kachin, Sagaing, N Shan) and N Laos (Phongsali, Xiangkhouang), 400–1825 m.

Sources: Wall, 1925b, C.H. Pope, 1935, Bourret, 1939a–d, M.A. Smith, 1940c, Deuve, 1970, B.Q. Hu et al., 1980, Tian et al., 1986, Pauwels et al., 2002, Zhao, 2006 and V.S. Nguyen et al., 2009.

Remarks: Cambodia record doubtful *fide* Saint-Girons (1972a: 61).

13. *Oligodon chinensis* (A.C.L.G. Günther, 1888b). Ann. Mag. Nat. Hist. (6) 1(3): 169–170. (*Simotes chinensis*)

Type: Holotype, BMNH 1946.1.3.28, a 470 mm female (A.E. Pratt, 1887–1890).

Type locality: "mountains north of Kiu Kiang, on the Yantsze river, China," (in error). Corrected to Wu-suih, about three days' journey or 9 mi. S of the American Central China Mission in Kiu-kiang *fide* Pratt (1892: 3–5), [= Wusüeh, SE Hubei Prov., cen. China, 29°50'N, 115°41'E *fide* C.H. Pope (1935: 502].

Distribution: Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Guizhow, Hainan, Henan, Hunan, Jiangsu, Jiangxi, Sichuan, Yunnan, Zhejiang) and Vietnam (Bac Kan, Cao Bang, Gai Lai, Hai Duong, Hai Phong, Ha Tinh, Lang Son, Lao Cai, Nghe An, Quang Binh, Quang Ninh, Vinh Phuc), 400–1830 m.

Sources: K.P. Schmidt, 1927a, C.H. Pope, 1929, 1935, Chang & Fang, 1931, Bourret, 1939d, Zhao & Adler, 1993, Orlov et al., 2000, Zhao, 2006, David et al., 2008a, V.S. Nguyen et al., 2009 and David et al., 2012.

Remarks: Original description reprinted in A.C.L.G. Günther (1892b: 239). M.A. Smith (1943: 206) listed the type locality as Lushan (= Mt. Lu Shan, 29°30'N, 115°55'E), which is south of Jiujiang on the Yangtze; Günther possibly misstated the direction of the type locality from Jiujiang as there are no mountains to the north of the Yangtze River.

14. *Oligodon cinereus* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 215. (*Simotes cinereus*)

Synonyms: *Simotes swinhonis* Swinhoe, 1863 (*nomen nudum*), *Simotes swinhonis* A.C.L.G. Günther, 1864a, *Simotes multifasciatus* Jan, 1865 *in* Jan & Sordelli,1860–1866, *Simotes semifasciatus* J. Anderson, 1871b, *Holarchus dolleyanus* Cope, 1895a, *Simotes violaceus fasciatus* Wall & Evans, 1901, *Simotes violaceus pallidocinctus* Bourret, 1934b, *Holarchus violaceus tamdaoensis* Bourret, 1935c, *Holarchus lightfooti* Rendahl, 1937, *Holarchus violaceus poilani* Bourret, 1939c, and *Holarchus violaceus plurimaculatus* Bourret, 1941b.

Type: Holotype, BMNH 1946.1.1.25 (formerly BMNH 1861.8.12.8), a 432 mm (svl) male (M. Mouhot, 1858–1860).

Type locality: "Gamboja" [= Cambodia].

Distribution: Southeast Asia. Northeastern India (Arunachal Pradesh, Assam, Bihar, Meghalaya, Nagaland, Uttar Pradesh), Bangladesh (Chittagong Hills), Bhutan, S China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hunan, Yunnan), Taiwan, Myanmar (Bago, Kachin, Kayah, Mandalay, Rakhire, Sagaing, Shan, Tanintharyi, Yangon), Thailand (Chiang Mai, Chiang Rai, Kanchanaburi, Lampang, Loei, Nakhon Ratchasima, Phetchabun, Phet Buri, Phitsanulok, Phrae, Prachuap Khiri Khan, Surat Thani, Udon Thani, Ko Chang and Ko Tao Is.), Cambodia (Kampong Chhnang, Mondolkiri), Laos (Attapu, Champasak, Louangphrabang, Phongsali, Xekong, Xiangkhouang) and Vietnam (Bac Kan, Binh Thuan, Gai Lai, Hai Duong, Hai Phong, Ha Tinh, Lang Son, Lao Cai, Nghe An, Quang Binh, Quang Ninh, Vinh Phac), 100–2450 m.

Sources: E.H. Taylor & Elbel, 1958, E.H. Taylor, 1965, Campden-Main, 1970a, Deuve, 1970, Saint-Girons, 1972a, Wagner, 1975, Romer, 1979a, B.Q. Hu et al., 1980, Karsen et al., 1986, Tian et al., 1986, M.A.R. Khan, 1988, Stuebing, 1991, Zhao & Adler, 1993, B.L. Stuart et al., 2006, Zhao, 2006, Teynié & David, 2007,

V.S. Nguyen et al., 2009, Agarwal et al., 2010, David et al., 2011b, Geissler et al., 2011, Wangyal, 2011 and David et al., 2012.

Remarks: Occurs in Sabah, East Malaysia *fide* Stuebing (1991: 334).

15. *Oligodon cruentatus* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 417. (*Simotes cruentatus*)

Types: Syntypes (5), BMNH 1946.1.4.15–19, four males, longest syntypes 381 mm and 330 mm gravid female (W. Theobald, Jr., 1862–1873).

Type locality: "Pegu" [= Bago, S Bago Div., S Myanmar, 17°20'N, 96°30'E, elevation 15 m].

Distribution: Northern India [MCZ 2279] and Myanmar (Bago, Kachin, Mandalay, Yangon), 15 m.

16. *Oligodon cyclurus* (Cantor, 1839b). Proc. Zool. Soc. London 7(1): 50. (*Coronella cyclura*)

Synonyms: *Coronella violacea* Cantor, 1839b and *Simotes bicatenatus* A.C.L.G. Günther, 1864a.

Type: Neotype, BMNH 1940.3.4.41, a 578 mm male, designated by David et al. (2011: 2).

Type locality: "Subdistrict of Kaligunj, Lalmonirhat District, near Rangpur, Bangladesh" via neotype selection.

Distribution: Northeastern India (Assam, Arunachal Pradesh, Bihar, Himachal Pradesh, Nagaland, Meghalaya, Uttar Pradesh, West Bengal), Bangladesh (Dinajpur, Rangpur, Sylhet) and NW Myanmar (Ayeyarwady, Bago, Kachin, Yangon), 30–1525 m.

Sources: J. Anderson, 1871a, Wall, 1925d, Wagner, 1975, Zhao & Adler, 1993, Chan-ard et al., 1999, Orlov et al., 2000, Schleich & Kästle, 2002, Das, 2004a, David et al., 2008a, 2011b, 2012 and Rahman, 2012c.

Remarks: Colored sketch of T.E. Cantor (1834–1837: no. 15) in RSL designated lectotype *fide* M.A. Smith (1943: 202). Holotype lost *fide* E.H. Taylor (1965: 765). Neotype designations of Campden-Main (1970b: 764, USNM 72067 from Bangkok, Thailand) and Wagner (1975: 62, BMNH 1940.3.4.41 from Kalinganz, Bangladesh) invalid *fide* David et al. (2011: 3–4).

17. *Oligodon deuvei* David, Vogel & Rooijen, 2008. Zootaxa (1965): 28–35, figs. 19–22.

Type: Holotype, MNHN 1974.1366, a 289 mm male (S. Poilane, 1932).

Type locality: "'Arboretum de Trang Bôm', now Arboretum of Bien Hoa, Dong Nai Province, Vietnam."

Distribution: Southeast Asia. Laos (Vientiane), Cambodia (Pursat) and S Vietnam (Dong Nai, Ho Chi Minh City), 25–175 m.

Remarks: This species has been confused with *O. mouhoti* and probably occurs in NE Thailand *fide* David et al. (2008: 35). Photograph of this species as *Oligodon* sp. in Grismer et al. (2008: fig. 19).

18. *Oligodon dorsalis* (Gray, 1835 *in* Gray & Hardwicke, 1830–1835). Illust. Indian Zool. 2(19–20): pl. 85, fig. 1. (*Elaps dorsalis*)

Type: Holotype, BMNH 1946.1.1.60, a 406 mm male (T. Hardwicke, 1756–1823).

Type locality: Unknown. Designated as Chittagong [= Chittagong Hills, SE Bangladesh] *fide* M.A. Smith (1943: 530).

Distribution: Southeastern Asia. Northeastern India (Assam, Manipur, Meghalaya, Mizoram, Nagaland, West Bengal), Bangladesh (Chittagong), Bhutan, NW Myanmar (Chin, Kachin, Sagaing) and N Thailand (Loei), 1300–1980 m.

Sources: J. Anderson, 1871a, Venning, 1910, M.A. Smith, 1940c, M.A.R. Khan, 1988, M.J. Cox et al., 1998, Das & Palden, 2000 and Ao et al., 2004.

Remarks: M.A. Smith (1943: 530) designated pl. 123 in T. Hardwicke's collection a lectotype. A.C.L.G. Günther (1864a: 211) erroneously suggested the type locality as probably Afghanistan. Probably occurs in Laos *fide* M.J. Cox (1991b: 227).

19. *Oligodon durheimi* Baumann, 1913. Zool. Jb. (Syst., Ökol. Geog.) (1912–1913) 34(3): 269–270, fig. C [= 3], figs. a–e.

Type: Holotype, NMBE, a 368 mm specimen (E. Durheim, 1907).

Type locality: "Battak Gebirge von West-Sumatra zum Geschenke, die alle aus einer Höhe von 800–1000 m" [= Toba Massif, Battak Highlands, near Tapanuli (2°51'N, 98°16'E), W Sumatra, elevation 800–1000 m].

Distribution: Western Indonesia (W Sumatra), 800–10000 m. Known only from holotype.

Sources: David & Vogel, 1996 and I Das, 2010.

20. *Oligodon eberhardti* Pellegrin, 1910. Bull. Soc. Zool. France 35(2): 30–32. (*Oligodon herberti eberhardti*)

Synonym: *Macrocalamus wongii* Fan, 1931.

Type: Holotype, MNHN 1908.13, a 438 mm specimen (P.A. Eberhardt, 1906–1910).

Type locality: "Tam Dao, au nord-ouest de Hanoï (Tonkin)" [= Tam Dao, Vinh Phuc Prov., N Vietnam, 21°27'N, 105°39'E, elevation 910 m].

Distribution: Vietnam (Cao Bang, Dac Kan, Ha Tay, Lai Chau, Lao Cai, Son La, Tuyen Quang, Vinh Phuc) and S China (Guangxi), 515–1200 m.

Sources: Boulenger, 1905f, Zhao & Adler, 1993, Orlov et al., 2000, V.S. Nguyen et al., 2009 and I. Das, 2010.

Remarks: This species confused with *O. catenatus* Blyth and also occurs in Myanmar, Laos and Cambodia *fide* V.S. Nguyen et al. (2009: 326).

21. *Oligodon erythrogaster* Boulenger, 1907d. Rec. Ind. Mus. 1(3): 216.

Type: Holotype, ZSI 15850 (formerly IMC 15850), a 510 mm specimen (J.M. Smith).
Type locality: "Nagarkote, Nepal, altitude 6,000 feet" [= Nagarkot, Kabhre Distr., Bagmati Zone, cen. Nepal, 27°42'N, 85°31'E, elevation 2000 m].
Distribution: Himalayas of Nepal (Bhaktapur, Dolpa, Gorkha, Kalikot, Kaski, Lalitpur, Rasuwa) and NE India (Sikkim, N West Bengal), 850–2600 m.
Sources: Wall, 1910f, 1913h, 1923g, G.E. Shaw & Shebbeare, 1929d, G.E. Shaw et al., 1940b, M.A. Smith, 1951, M.A. Smith & Battersby, 1953, L. Swan & Leviton, 1962, Fleming & Fleming, 1973, Kramer, 1977 and Tiwari & Shah, 2004.
Remarks: Holotype listed as IMC 16108 *fide* Wall (1923g: 321). I. Das et al. (1998: 149) referred to ZSI 15850 as a syntype.

22. *Oligodon erythrorhachis* Wall, 1910e. J. Bombay Nat. Hist. Soc. (1909–1910) 19(4): 923–924, pl., 8 figs.

Type: Holotype, BMNH 1946.1.5.51, a 375 mm female (S.G.C. Gore, 1899–1910).
Type locality: "Namsang, Jaipur, Assam." Emended to Namsang near Jaipur, at the foot of the Naga Hills *fide* Wall (1923b: 309), [= NE Assam Prov., NE India, 27°15'N, 95°23'E, elevation 150 m].
Distribution: Northeastern India (NE Assam), 150 m. Known only from holotype.

23. *Oligodon everetti* Boulenger, 1893d. Proc. Zool. Soc. London 61(1): 524.

Type: Holotype, BMNH 1946.1.3.14, a 370 mm female (A.H. Everett, 1869–1885).
Type locality: "Mt. Kina Balu, Borneo" [= Mt. Kinabalu, N Sabah, East Malaysia, 6°05'N, 116°33'E].
Distribution: Borneo. East Malaysia (Sabah) and Indonesia (S Kalimantan), 600–1000 m.
Sources: Stuebing, 1991 and Malkmus et al., 2002.

24. *Oligodon fasciolatus* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 218–219, pl. 20, fig. b. (*Simotes fasciolatus*)

Synonyms: *Simotes cochinchinensis* A.C.L.G. Günther, 1864a, *Simotes albocinctus dorsolateralis* Wall, 1910d, *Simotes smithi* F. Werner, 1925, and *Oligodon cyclurus superfluens* E.H. Taylor, 1965.
Types: Syntypes (2), BMNH 1946.1.4.6–7 (H. Mouhot, 1858–1860), longest syntype 483 mm.
Type locality: "Pachebone" [= Petchabun or, Phetchabun Prov. Thailand, 16°25'N, 101°10'E, elevation 165 m].
Distribution: Southeast Asia. Northeastern India, E Myanmar (Kachin, Kayah, Mon, Shan), Thailand (Bangkok, Chaiyaphum, Chanthaburi, Chiang Mai, Chiang Rai, Chon Buri, Chuchoengsao, Chumphon, Kanchanaburi, Krung Thep Mahanakhon, Loei, Mae Hong Son, Nakhon Phanom, Nakhom Ratchasima, Nakhon Si Thammarat, Phetchabun, Phetchaburi, Phichit, Phrae, Prachuap Khiri Khan, Ratchaburi, Ranong, Rayong, Sakon Nakhon, Samut Prakan, Saraburi, Sisaket, Tak, Trang, Ubon Ratchathani, Uthai Thani, Ko Chang Is.), ext. S China (Yunnan), N Laos (Louangphrabang, Phongsali, Savannakhet, Xiangkhouang), Cambodia (Kampot, Koh Kong, SW Pursat, Siem Riep) and S Vietnam (An Giang, Bac Ria-Vung-Tau, Ca Mau, Cao Bang, Dak Lak, Da Nang, Dong Nai, Gia Lai, Hai Duong, Ha Tay, Ha Tinh, Ho Chi Minh City, Kien Giang, Lai Chou, Lam Dong, Nghe An, Phu Khanh, Quang Tri, Son La, Vinh Phuc, Con Son Is.), NSL–900 m.
Sources: M.A. Smith, 1928b, Bourret, 1936b, E.H. Taylor, 1965, Campden-Main, 1970a, Deuve, 1970, Saint-Girons, 1972a, M.J. Cox et al., 1998, B.L. Stuart & Emmett, 2006, David et al., 2008a, V.S. Nguyen et al., 2009, I. Das, 2010 and Green, 2010.
Remarks: E.H. Taylor (1965: 765) suggested type locality possibly Phet Buri, SW Thailand. Con Son Is., Vietnam specimens problematical *fide* Wagner (1975: 69).

25. *Oligodon forbesi* (Boulenger, 1883). Proc. Zool. Soc. London 51(1): 387–388, pl. 42. (*Simotes forbesi*)

Types: Syntypes (2), BMNH 1946.1.3.98–99, two females (H.O. Forbes), longest syntype 305 mm.
Type locality: "Timor Laut Islands" [= Pulau Yamdena, Tanimbar Islands, SE Maluku, SE Indonesia, 7°36'S, 131°25'E].
Distribution: Eastern Indonesia (SE Maluku: Babar, Damar, Yamdena).
Sources: Rooij, 1917 and Brongersma, 1933g.

26. *Oligodon formosanus* (A.C.L.G. Günther, 1872b). Ann. Mag. Nat. Hist. (4) 9(49): 20. (*Simotes formosanus*)

Synonyms: *Simotes swinhonis* Swinhoe, 1863 *(nomen nudum),* Simotes *bicatenatus* F. Müller, 1878b, *Simotes hainanensis* Boettger, 1894, *Holarchus nesiotis* T. Barbour, 1908, *Holarchus formosanus brunnea* Mell, 1930, and *Holarchus formosanus violaceoides* Mell, 1930.
Type: Holotype, BMNH 1946.1.4.42, a 559 mm male (R. Swinhoe, June–July 1858).
Type locality: "Takou, Formosa" [= Kaohsiung, Kaohsiung Prov. S Taiwan, 23°01'N, 120°40'E, elevation 325 m].
Distribution: Southeastern East Asia. Southern China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hunan, Jiangsu, Jiangxi, Macau, Yunnan, Zhejiang, Lanyu and Nan Ao Is.), Taiwan (Kaohsiung, Lanyu, Miaoli, Pingtung, Tainan, Taipei, Lutao and Botel-Tobago Is.) and N Vietnam (Cao Bang, Ha Giang, Hanoi, Thanh Hoa, Vinh Phuc), 100–900 m.

Sources: Stejneger, 1907a, Oshima, 1910, K.P. Schmidt, 1927a, Mell, 1930, Takahashi, 1930, Fan, 1931, Maki, 1931, Bourret, 1934c, 1934f, C.H. Pope, 1935, Herklots, 1935, Wang & Wang, 1956, B.Q. Hu et al., 1959, 1980, Wang, 1962, Kuntz, 1963, Tian et al., 1986, Lue, 1987, 1990, Lue et al., 1989, Huang et al., 1990, Ota, 1991, Easton & Leung-Va, 1993, Zou & Chen, 1998, Lazell, 1999, Orlov et al., 2000, David et al., 2008a, 2012, V.S. Nguyen et al., 2009 and Xiang & Li, 2009.

27. *Oligodon hamptoni* Boulenger, 1918. Proc. Zool. Soc. London 89(1): 9–10, fig. 1.

Type: Holotype, BMNH 1946.1.1.71, a 540 male (H. Hampton, 1898–1905).
Type locality: "Mogok, Upper Burma" [= Mogok, N Mandalay Div., N Myanmar, 22°55'N, 96°30'E, elevation 300 m].
Distribution: Northern Myanmar (Kachin, Mandalay), 300–1500 m.
Sources: Wall, 1925d, Wallach & Bauer, 1996 and I. Das, 2010.

28. *Oligodon inornatus* (Boulenger, 1914e). J. Nat. Hist. Soc. Siam 1(2): 68–70, pl., 3 figs (upper). (*Simotes inornatus*)

Type: Holotype, BMNH 1946.1.4.25, a 580 mm male (P.A.R. Barron).
Type locality: "Nong Kai Ploi, E. of Sriracha, Siam" [= Nong Kai Ploi, east of Si Racha (13°10'N, 100°56'E, elevation 40 m), Chon Buri Prov., S Thailand].
Distribution: Central Thailand (Chiang Mai, Chon Buri, Lampang, Lamphun, Loei, Tak, Trat, Uthai Thani, Ko Kut Is.), NW Cambodia (Kampot, Koh Kong) and Laos (Champasak), 50–400 m.
Sources: M.A. Smith & Kloss, 1915, Bourret, 1936b, E.H. Taylor, 1965, Saint-Girons, 1972a, M.J. Cox, 1991b, M.J. Cox et al., 1998, B.L. Stuart & Emmett, 2006, Teynié & David, 2007 and David et al., 2012.

29. *Oligodon jintakunei* Pauwels, Wallach, David & Chanhome, 2002. Nat. Hist. J. Chulalongkorn Univ. 2(2): 8–11, figs. 1–5.

Type: Holotype, QSMI 385, a 448 mm male (P. Jintakune, 1990).
Type locality: "Krabi Province, Thailand."
Distribution: Southern Thailand (Krabi). Known only from holotype.

30. *Oligodon joynsoni* (M.A. Smith, 1917b). J. Nat. Hist. Soc. Siam 2(4): 276–277. (*Simotes longicauda joynsoni*)

Synonym: *Simotes longicauda* Boulenger, 1903b.
Type: Holotype, BMNH 1946.1.4.23 (formerly MAS 1116), a 760 mm male (H.W. Joynson, June 1917).
Type locality: "valley of the Maa Yome, Muang Ngow, N. Siam" [= Maa Yome Valley, Muang Ngow, Lampang Prov., N Thailand, 18°47'N, 99°58'E, elevation 300 m].
Distribution: Southeastern Asia. Northwestern Thailand (Chiang Mai, Kamphaeng, Lampang, Loei, Nakhon Ratchasima), S China (S Yunnan) and Laos, 300–850 m.
Sources: M.A. Smith, 1922a, E.H. Taylor, 1965, Wagner, 1975, M.J. Cox, 1991b, M.J.Cox et al., 1998, Zhao, 2006, David et al., 2011b and Jiang et al., 2012.
Remarks: Occurs in Vietnam *fide* M.J. Cox et al. (1998: 58). Guangxi, China record identified as *O. nagao fide* Jiang et al. (2012: 319).

31. *Oligodon juglandifer* (Wall, 1909d). J. Bombay Nat. Hist. Soc. (1909–1910) 19(2): 349. (*Simotes albocinctus juglandifer*)

Type: Holotype, BNHS 210, a 717 mm specimen (A.W. Wright).
Type locality: "neighbourhood of Darjeeling, about the Railway between the foot hills and Tindharia, *i.e.*, at an altitude between about 500 and 2,800 feet" [= Tindharia, Darjeeling Distr., ext. N West Bengal State, NE India, 26°51'N, 88°20'E, elevation 150–850 m].
Distribution: Northeastern India (Sikkim, West Bengal), 850 m.
Sources: M. Smith, 1943, Mahendra, 1984 and Green, 2010.
Remarks: M.A. Smith (1943: 207) erroneously reported the type (which he believed was in BMNH) lost. Wall (1923d: 630) listed Nepal. A valid species *fide* Green (2010: 112).

32. *Oligodon kampucheaensis* Neang, Grismer & Daltry, 2012. Zootaxa (3388): 44–45, figs. 2–3, 4a–d.

Type: Holotype, CBC 1464, a 428 mm male (T. Neang, S. Hun & M. Meang, 27 Jan. 2011).
Type locality: "Chruk Prul stream at N 12°11'55.1", E 103°03'35.3", 330 m above sea level in the Phnom Samkos Wildlife Sanctuary, Cardamom Mountains, Pursat Province, southwest Cambodia."
Distribution: Southwestern Cambodia (W Pursat), 330 m.

33. *Oligodon kheriensis* Acharji & Ray, 1936. Rec. Ind. Mus. 38(4): 519–520.

Type: Holotype, ZSI 20391, an adult female.
Type locality: "North Kheri Division, Eastern Circle, Kheri-Lakimpur, in the United Provinces" [= vicinity of Kheri (27°54'N, 80º48'E, elevation 150 m), Uttar Pradesh State, N India].
Distribution: Northern India (Uttar Pradesh) and SW Nepal (Kanchanpur), 195 m.
Sources: Schleich & Kästle, 2002, Tiwari & Shah, 2004 and David et al., 2011b.
Remarks: Previously a synonym of *O. cyclurus*.

34. *Oligodon kunmingensis* Kou & Wu, 1993. Acta Zootax. Sinica 18(3): 379–381, figs. 1–4.

Type: Holotype, YU 906452, a 309 mm male (native, 22 June 1990).

Type locality: "western hill of Kunming city (25.0°N, 102.7°E), Yunnan, altitude 1900m" [= hills to the W of Kunming, Yunnan Prov., SW China, 25°02'N, 102°43'E, elevation 1900 m].

Distribution: Southwestern China (Yunnan), 1900 m. Known only from type locality.

35. *Oligodon lacroixi* Angel & Bourret, 1933. Bull. Soc. Zool. France 58(3–4): 138–139.

Type: Lectotype, MNHN 1772.2 (formerly MNHN 1933.1), a 574 mm specimen (R.L. Bourret, 1930–1931), designated by Orlov et al. (2010b: 310).

Type locality: "Chapa, Tong-king" [= Sa Pa, Sa Pa Distr., W Lao Cai Prov., ext. N Vietnam, 22°20'N, 103°51'E, elevation 1500 m] via lectotype selection.

Distribution: Southern China (Sichuan, Yunnan) and N Vietnam (Lao Cai), 500–1600 m.

Sources: Bourret, 1934a, 1935b, 1936a–b, 1939d, Tian et al., 1986, Zhao & Adler, 1993, Pauwels et al., 2002, V.S. Nguyen et al., 2009 and Orlov et al., 2010b.

Remarks: Photograph of the lectotype in Orlov et al. (2010b: fig. 2).

36. *Oligodon lungshenensis* Zheng & Huang, 1978 *in* Huang, Zheng & Fang. J. Fujian Normal Univ. (Nat. Sci.) 1978(2): 92–93, fig. 2.

Synonym: *Oligodon guizhouensis* Li *in* Wu, Li, Xu, Dong & Liu, 1979.

Type: Holotype, ? FNU 64099, a 185–233 mm male (native, 1994).

Type locality: "Longsheng Co., Guangxi Zhuang Autonomous Region, China."

Distribution: Southern China (Guangxi, Guizhou), 1210 m.

Sources: Tian et al., 1986, D.J. Li, 1989 and Zhao & Adler, 1993.

37. *Oligodon macrurus* (Angel, 1927). Bull. Mus. Hist. Nat., Paris 33(6): 497–498. (*Simotes violaceus macrurus*)

Type: Holotype, MNHN, a 447 mm specimen (P. Chevy, 17 May 1926), lost *fide* V.S. Nguyen et al. (2009: 328).

Type locality: "Annam: Pointe Lagan (sur les dunes)" [= Cape Lagan or mui LaGan, NE Binh Thuan Prov., S Vietnam, 11°10'N, 108°42'E, elevation NSL].

Distribution: Southern Vietnam (Binh Thuan, Ho Chi Minh City, Khanh Hoa, Ninh Thuan), NSL.

Sources: Geissler et al., 2011a and David et al., 2012.

Remarks: Holotype apparently not in MNHN. Type locality listed within Ninh Thuan Prov., Vietnam *fide* Geissler et al. (2011a: 321).

38. *Oligodon maculatus* (E.H. Taylor, 1918b). Philippine J. Sci. 13D(6): 364–365, pl. 1. (*Holarchus maculatus*)

Type: Holotype, CM 2571 (formerly EHT 40), a 299 mm specimen (E.H. Taylor, Aug. 1912).

Type locality: "Bunawan, Agusan, P.I." [= Bunawan, Agusan del Sur Prov., NE Mindanao Is., SE Philippines, 8°10'N, 126°01'E, elevation 30 m].

Distribution: Southern Philippines (N Mindanao), 30–850 m.

Sources: E.H. Taylor, 1925 and Leviton, 1963a.

39. *Oligodon mcdougalli* Wall, 1905b. J. Bombay Nat. Hist. Soc. (1904–1905) 16(2): 251–252, 3 figs.

Type: Holotype, BNHS 963, a 337–349 mm male (E. McDougall).

Type locality: "Sandarang, Burma" (in error). Corrected to Sandoway [= Thandwe, S Rakhine State, SW Myanmar, ca.18°28'N, 94°22'E, elevation NSL] *fide* Wall (1923d: 626).

Distribution: Southwestern Myanmar (S Rakhine), NSL. Known only from the holotype.

Source: Dowling & Jenner, 1988.

40. *Oligodon melaneus* Wall, 1909d. J. Bombay Nat. Hist. Soc. (1909–1910) 19(2): 349–350, 3 text figs., pl., figs. 4–6.

Types: Syntypes (2), BMNH 1946.1.3.11 and BNHS 958, a 330 mm male and 300–333 mm gravid female (A.W. Wright, July 1908).

Type locality: "neighbourhood of Darjeeling, about the Railway between the foot hills and Tindharia, *i.e.,* at an altitude between about 500 and 2,800 feet." Emended to Sukna, Darjiling District, 540 feet *fide* Wall (1923g: 316), [= Sukna, Darjeeling Distr., ext. N West Bengal State, NE India, *ca.* 26°47'N, 88°22'E, elevation 165 m].

Distribution: Northeastern India (N West Bengal), 165 m.

Remarks: Wall (1909d: 350) reported the length of the female to be 333 mm, but M.A. Smith (1943: 229) listed the male to be 330 mm and the female 300 mm.

41. *Oligodon melanozonatus* Wall, 1922d. Rec. Ind. Mus. 24(1): 29–30, figs. 1a–d.

Synonym: *Ologodon melazonotus* M.A. Smith, 1943 *(nomen emendatum).*

Types: Syntypes (2), BMNH 1946.1.5.48 (formerly IMC 16798) and ZSI 16799, a 510–520 mm and 300 mm female (M. de Courey & 32nd Sikh Pioneers, Dec. 1911).

Type locality: "Upper Rotung Valley, Abor Hills, Assam frontier, at about 2000 feet elevation" [= upper Rotung Valley, Abor Hills, NE Arunachal Pradesh Terr., NE India, 28°08'N, 95°12'E, elevation ca. 600 m.

Distribution: Northeastern India (Arunachal Pradesh) and SW China (Xizang), 600–610 m.
Sources: Annandale, 1912 and Zhao & Adler, 1993.

42. *Oligodon meyerinkii* (Steindachner, 1891). Sitz. Akad. Wiss. Wien, Math.-Natur. Kl. 100(1): 292–293. (*Simotes meyerinkii*)

Types: Syntypes (2), NMW 25828a–b.
Type locality: "Sulu-Inseln" [= Sulu Arch., ext. S Philippines].
Distribution: East Malaysia (Sabah) and ext. S Philippines (Sulu Arch.: Bongao, Jolo, Papahang, Sibutu, Tawitawi).
Sources: T. Barbour, 1912b, E.H. Taylor, 1918b, 1922a, Leviton, 1963a and Gaulke, 1993b, 1994b.

43. *Oligodon modestus* A.C.L.G. Günther, 1864a. Rept. British India: 210.

Type: Holotype, BMNH 1946.1.5.54, a 330 mm male (H. Cuming, 1836–1840).
Type locality: "Philippine Islands." Restricted to Negros Oriental Prov., Negros Island, Philippines *fide* Leviton (1963a: 474).
Distribution: Southern Philippines (Cebu, Negros, Panay, Romblon, Tablas), NSL–950 m.
Sources: A.C.L.G. Günther, 1879a, E.H.Taylor, 1922a, Leviton, 1963a and Sison & Gonzales, 1995.
Remarks: Records from Luzon and Mindanao doubtful *fide* Leviton (1963a: 474).

O

44. *Oligodon moricei* David, Vogel & Rooijen, 2008. Zootaxa (1965): 40–45, figs. 29–34.

Type: Holotype, MNHN 1919.137, a 1443 mm female (M. Krempf).
Type locality: "'Nha-Trang', now Nha Trang, Khanh Hoa Province, Vietnam" [= Nha Trang, E Khanh Hoa Prov., S Vietnam, 12°14'N, 109°12'E, elevation 10 m].
Distribution: Vietnam (Khanh Hoa), 10 m. Known only from the holotype.

45. *Oligodon mouhoti* (Boulenger, 1914e). J. Nat. Hist. Soc. Siam 1(2): 70. (*Simotes taeniatus mouhoti*)

Synonym: *Simotes taeniatus* A.C.L.G. Günther, 1861g (*partim*).
Type: Holotype, BMNH 1946.1.3.32, a male (H. Mouhot, 1858–1860).
Type locality: "Gamboja" [= Cambodia].
Distribution: Southern Thailand (Bangkok, Krung Thep Mahanakhon, Nakhon Ratchasima, Nakhon Sawan, Phetchaburi, Phra Nakhon Si Ayutthaya, Prachuap Khiri Khan, Trat, Uthai Thanis) and Cambodia, NSL–10 m.
Sources: A.C.L.G. Günther, 1864a, Cochran, 1930, Bourret, 1936a, Deuve, 1963e, 1970, E.H. Taylor, 1965, Campden-Main, 1969b, 1970a, Saint-Girons, 1972a, M.J. Cox, 1991b, M.J. Cox et al., 1998, David et al., 2008b and V.S. Nguyen et al., 2009.
Remarks: Records from Vietnam (Binh Duong, Dak Nang) doubtful *fide* David et al. (2008b: 28).

46. *Oligodon multizonatum* Zhao & Jiang, 1981. Acta Herp. Sinica 5(7): 54, figs. 1.1–1.3, 2, col. pl.

Synonym: *Oligodon multizonatus* – Zhao & Adler, 1993.
Type: Holotype, CIB 80-II-289, a 530 mm male (native, 17 Aug. 1980).
Type locality: "Luding, Sichuan, alt. 1,400 m., China" [= Luding, cen. Sichuan Prov., S China, 29°54'N, 102°15'E, elevation 1400 m].
Distribution: Central China (Gansu, Sichuan), 1350–1400 m.
Sources: Yao & Cheng, 1981, Tian et al., 1986 and Zhao & Adler, 1993.

47. *Oligodon nagao* David, Nguyen, Nguyen, Jiang, Chen, Teynié & Ziegler, 2012. Zootaxa (3498): 47–51, figs. 1a–b.

Type: Holotype, VNMN A.2012.1, a 653 mm male (T.T. Nguyen, 30 June 2009).
Type locality: "Huu Lien forest, Huu Lung District, Lang Son Province, Vietnam, at elevation of about 300 m a.s.l."
Distribution: Indo-China. Southern China (Guangxi), N Vietnam (Cao Bang, Lang Son) and cen. Laos (Khammouane), 170–475 m.
Source: Jiang et al., 2012.

48. *Oligodon nikhili* Whitaker & Dattatri, 1982. J. Bombay Nat. Hist. Soc. 79(3): 630–631, pl. 1.

Type: Holotype, BMNH 1982.1358 (formerly MSP), a 423 mm male (R. Whitaker, Z. Whitaker & S. Dattatri, 20 Sept. 1981).
Type locality: "Tiger shola, 1500 mts., a few kilometers below Shembaganur on the Kodaikanal ghat road, Palni Hills, Tamilnadu, South India."
Distribution: Extreme S India (SW Tamil Nadu), 1500 m. Known only from type locality.
Sources: Whitaker, 1982 and Whitaker & Captain, 2004.

49. *Oligodon ningshaanensis* Yuan, 1983b. Acta Herp. Sinica (2) 2(2): 65–67, 4 figs.

Type: Holotype, NCF 810218, a 620 mm male (native, 30 July 1982).
Type locality: "Huoditang, Ningshan County, Shaanxi, China, alt. 1650 m" [= Huoditang, Ningshan Co., S Shaanxi Prov., cen. China, 33°29'N, 108°27'E, elevation 1650 m].
Distribution: Central China (S Shaanxi), 1650 m. Known only from vicinity of type locality.
Sources: Tian et al., 1986 and Zhao & Adler, 1993.

50. *Oligodon notospilus* A.C.L.G. Günther, 1873b. Proc. Zool. Soc. London 41(1): 169, pl. 18, fig. a.

Synonyms: *Oligodon schadenbergi* Boettger, 1895d and *Oligodon iwahigensis* L.E. Griffin, 1909b.
Type: Holotype, BMNH 1946.1.3.23, a 267 mm specimen (A.B. Meyer, 1870–1873).
Type locality: "Mindanao" [= Mindanao Is., S Philippines].
Distribution: Southern Philippines (Balabac, Busuanga, Calamian, Mindanao, Palawan).
Sources: E.H. Taylor, 1922a, Leviton, 1963a, Gaulke, 1999 and David et al., 2012.
Remarks: Previously a subspecies of *O. vertebralis.*

51. *Oligodon ocellatus* (Morice, 1875a). Faune Cochin. Franç.: 57. (*Simotes ocellatus*)

Synonyms: *Simotes brevicauda* Steindachner, 1867a *(nomen praeoccupatum)* and *Oligodon analepticos* Campden-Main, 1970b (*nomen substitutum).*
Types: Syntypes (4), MMC 42000354a–b (formerly MHNL 1569a–b), a male and female, MHNL 42000347 (formerly MHNL 1571), a male, and MHNL 42000359 (formerly MHNL 1572), a male, syntypes 539–663 mm (A. Morice).
Type locality: "Tay-ninh, Cochinchine Française" [= Tay Ninh, Tay Ninh Prov., S Vietnam, 11°18'N, 106°06'E, elevation 10 m].
Distribution: Indo-China. Eastern Cambodia (Kampong Cham, Ratanakiri), Laos (Champasak) and S Vietnam (Binh Dinh, Dac Lac, Dong Nai, Lam Dong, Quang Nam, Quang Ngai, Tay Ninh), NSL–800 m.
Sources: Campden-Main, 1970a, Saint-Girons, 1972a, Wagner, 1975, Teynié & David, 2007, David et al., 2008a, 2012 and V.S. Nguyen et al., 2009.
Remarks: Photographs of type of *Simotes brevicauda* in David et al. (2008a: figs. 12–14).

52. *Oligodon octolineatus* (J.G. Schneider, 1801). Hist. Amph. 2: 299. (*Elaps octolineatus*)

Type: Neotype, ZMB 2099, a 412 mm male, designated by Tillack & Günther (2009: 269, figs. 1a–d).
Type locality: "Java" [W Indonesia] via neotype selection.
Distribution: Malaysia and Greater Sundas. West Malaysia, Singapore, East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Bali, Bangka, Belitung, Bintan, Java, Kalimantan, Mentawai Arch., Nias, Riau Arch., Sumatra), NSL–1000 m.
Sources: T. Barbour, 1912b, Dammerman, 1926, Westermann, 1942, Mertens, 1969c, Tweedie, 1983, K.F.L. Lim & Lee, 1989, K.K.P. Lim & Chou, 1990, Stuebing, 1991, David & Vogel, 1996, Malkmus et al., 2002, Lang & Vogel, 2005, McKay, 2006 and Tillack & Günther, 2009.
Remarks: Holotype (ZMB 2094) lost *fide* Tillack & Günther (2009: 268–269). Mertens (1969c: 340) demonstrated that ZMB 10612 could not be Schneider's type. Stuebing (1991: 334) erroneously listed the type locality as Borneo via lectotype designation. Sulawesi and Philippine records doubtful *fide* Lang & Vogel (2005: 250) and Tillack & Günther (2009: 267–268).

53. *Oligodon ornatus* Van Denburgh, 1909. Proc. California Acad. Sci. (4) 3(3): 53–54.

Synonyms: *Holarchus torquatus konishii* Oshima, 1910, and *Simotes musyi* Roux, 1919a.
Type: Holotype, CAS 18005, a 343 mm male (V. Kühne, 7 March 1909).
Type locality: "Shinchiku, Formosa" [= Hsinchu, Hsinchu Co., NW Taiwan, 24°48'N, 120°58'E, elevation 25 m].
Distribution: Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Hunan, Jiangxi, Sichuan, Zhejiang) and Taiwan (Chiayi, Hsinchu, Keelung, Nantou, New Taipei, Taipei).
Sources: C.H. Pope, 1929, 1935, Takahashi, 1930, Maki, 1931, Wang & Wang, 1956, Kuntz, 1963, Lue, 1987, 1990, Lue et al., 1989, Zhao & Adler, 1993, Zhao, 2006 and Xiang & Li, 2009.

54. *Oligodon perkinsi* (E.H. Taylor, 1925). Philippine J. Sci. 26D(1): 108–109. (*Holarchus perkinsi*)

Type: Holotype, MCZ 25725 (formerly EHT 1164), a 672 mm female (G.A. Perkins, Sept. 1923).
Type locality: "Culion, Culion Island" [Calamianes Group, Palawan Prov., W Philippines, bet. 11°46–59'N and 119°52'–120°05'E].
Distribution: West-central Philippines (Palawan: Culion Is.).
Source: Leviton, 1963a.

55. *Oligodon petronellae* Roux *in* Rooij, 1917. Rept. Indo-Aust. Arch. 2: 131.

Synonyms: *Oligodon ornatus* Roux, 1914 *(nomen praeoccupatum), Oligodon rouxi* Ruthven, 1921 *(nomen substitutum),* and *Oligodon annulifer confluens* F. Werner, 1924a.
Type: Holotype, MHNG 767.2, a 470+ mm male.
Type locality: "Sumatra" [W Indonesia].
Distribution: Western Indonesia (Sumatra), NSL.
Sources: Roux, 1914, David & Vogel, 1996 and Tillack & Günther, 2009
Remarks: Holotype redescribed and illustrated in Tillack & Günther (2009: 271, figs. 2a–d)

56. *Oligodon planiceps* (Boulenger, 1888h). Ann. Mus. Civ. Stor. Nat. Genova (2) 6: 597–598, pl. 5, fig. 2. (*Simotes planiceps*)

Type: Holotype, MSNG CE 30257, a 130 mm specimen (G.B. Comotto via L. Fea, 1887).
Type locality: "Minhlà, Burma, North of Tenasserim" [= Minhlà, Thayet Distr., S Magwe Div., cen. Myanmar, 19°58'N, 95°01'E, elevation 70 m].

Distribution: Southwestern Myanmar (Bago, Irrawaddy, S Magwe, Yangon), NSL–150 m.

Sources: Wall, 1923g and C.H. Pope, 1935.

Remarks: Northern Myanmar or S China record doubtful *fide* Wall (1923g: 308).

57. *Oligodon praefrontalis* F. Werner, 1913. Mitt. Naturhist. Mus. Hamburg (1912) 30: 25.

Type: Holotype, ZMH, a 241 mm specimen (W. Schwinghammer, 17 May 1910), lost *fide* Hallermann *in* Tillack & Günther (2009: 284).

Type locality: "Sabang auf Pulo Weh an der Nordwestküste von Sumatra" [= Sabang, E Weh Is., off NW coast of N Sumatra, Aceh Prov., ext. NW Indonesia, 5°53'N, 95°19'E, elevation NSL].

Distribution: Extreme NW Indonesia (Aceh: Weh). Known only from holotype.

Sources: Pauwels et al., 2002 and Tillack & Günther, 2009.

Remarks: Holotype not in NMW *fide* H. Grillitsch & D. Siderits *in* Tillack & Günther (2009: 285). *Incertae sedis fide* Tillack & Günther (2009: 265).

58. *Oligodon propinquus* Jan, 1862a. Arch. Zool. Anat. Fis. 2(1): 38.

Type: Holotype, ZMH 4432 (formerly ZMH 132 or 192), a 285 mm specimen.

Type locality: "Giava" [= Java, W Indonesia].

Distribution: Western Indonesia (Java). Known only from the holotype.

Source: Jan & Sordelli, 1876 *in* 1870–1881.

Remarks: Holotype illustrated in Jan (1862b: pl. e, no. 4) and Jan & Sordelli (1876 *in* 1870–1881 [48]: pl. 1, fig. 1).

59. *Oligodon pseudotaeniatus* David, Vogel & Rooijen, 2008. Zootaxa (1965): 18–23, figs. 10–13.

Type: Holotype, BMNH 1938.8.7.37, a 297 mm male (M.A. Smith, 1916).

Type locality: "'Khorat', Khorat Plateau, Nakhon Ratchasima Province, Thailand" [= ca. 14°55'N, 101°58E, elevation 210–225 m].

Distribution: Southern Thailand (Bangkok, Nakhon Ratchasima, Phra Nakhon Si Ayutthaya, Saraburi), NSL–210 m.

60. *Oligodon pulcherrimus* F. Werner, 1909b. Mitt. Naturhist. Mus. Hamburg 26: 227, fig. 4.

Synonym: *Simotes annulifer bipartita* Despax, 1912.

Type: Neotype, ZMB 70756, a 275 mm male (A. Michalczyk, 18 Feb. 1995, via P.e.V. Leipzig), designated by Tillack & Günther (2009: 274, figs. 3a–d).

Type locality: "settlement Balinka, approx. 7 km southwest of Bukittinggi, West Sumatra, Indonesia, ca. 1200m a.s.l. [ca. 0°21' S, 100°19' E]" via neotype selection.

Distribution: Western Indonesia (Sumatra), 800–1000 m.

Sources: David & Vogel, 1996, Pauwels et al., 2002 and Tillack & Günther, 2009.

Remarks: Holotype in ZMH destroyed during World War II *fide* Hallermann (1998: 214).

61. *Oligodon purpurascens* (Schlegel, 1837). Essai Phys. Serp. 1: 139, 2: 90–91, pl. 3, figs. 13–14. (*Xenodon purpurascens*)

Synonyms: *Simotes albocinctus* A.-M.-C. Duméril, 1853 (*nomen nudum*). *Simotes albocinctus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen praeoccupatum), Simotes tri-notatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen incorrigendum), Simotes labuanensis* A.C.L.G. Günther, 1864a, *Simotes trinotatus* – A.C.L.G. Günther, 1864a *(nomen corrigendum), Simotes crassus* Theobald, 1868b, *Simotes obscurus* Theobald, 1868b, *Simotes catenifer* Stoliczka, 1873, *Simotes dennysi* Blanford, 1881, *Simotes affinis* J.G. Fischer, 1885b, and *Oligodon purpurascens kangeanicus* Mertens, 1959a.

Types: Syntypes (4), RMNH 242a–c (H. Boie & H.C. Macklot, Dec. 1820–Sept. 1823), and UU (Klinkenberg), longest syntype 640 mm.

Type locality: "au pied du mont Parang à l'île de Java" [= at base of Mt. Parang, Jawa Barat Prov., W Java, SW Indonesia, ca. 7°32'S, 108°20'E].

Distribution: Malay Peninsula and Indonesia. Southern Thailand (Nakhon Si Thammarat, Pattani, Phang Nga, Surat Thani), West Malaysia (Johor, Kelantan, Pahang, Perak, Perlis, Pinang, Selangor, Terengganu, Perhentian Is.), Singapore, East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Bangka, Galang, Java, Kalimantan, Kangean, Karimata, Mentawai, Nias, Riau, Serutu, Sipura, Sumatra, Timur, Weh), NSL–1840 m.

Sources: M.A. Smith, 1930a, Deuve, 1963a–b, E.H. Taylor, 1965, Tweedie, 1983, K.F.L. Lim & Lee, 1989, M.J. Cox, 1991b, Stuebing, 1991, David & Vogel, 1996, M.J. Cox et al., 1998, Chan-ard et al., 1999, Malkmus et al., 2002, Pauwels et al., 2002, I. Das, 2007b, Tillack & Günther, 2009, Grismer, 2011, Rooijen et al., 2011 and David et al., 2012.

62. *Oligodon saintgironsi* David, Vogel & Pauwels, 2008. Zootaxa (1939): 21–27, figs. 1–7.

Type: Holotype, MNHN 1974.1264, a 538 mm male (Poilane, 1930–1940).

Type locality: "'Arboretum de Trang Bôm', now Arboretum of Bien Hao, Dong Nai Province, southern Vietnam."

Distribution: Southern Cambodia and S Vietnam (Dong Nai, Ho Chi Minh City), NSL–10 m.

63. *Oligodon signatus* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 215, pl. 20, figs. f–f'. (*Simotes signatus*)

Synonyms: *Simotes subcarinatus* A.C.L.G. Günther, 1872a and *Simotes annulifer annulata* Lidth de Jeude, 1922.

Type: Lectotype, BMNH 1946.1.3.20, a 533 mm female illustrated by Hardwicke (1756–1823, 2: fig. 52) (T. Hardwicke, 1756–1823), designated by M.A. Smith (1943: 529).

Type locality: "Singapore" [= Singapore Island *fide* David & Vogel, 1996: 103] via lectotype selection.

Distribution: Southern West Malaysia (Melaka), Singapore, East Malaysia (Sabah, Sarawak) and W Indonesia (Sumatra), NSL–350 m.

Sources: Tweedie, 1983, David & Vogel, 1996 and Tillack & Günther, 2009.

Remarks: Java record needs confirmation *fide* C. Haas (1950: 557). *Simotes subcarinatus* Günther a valid species *fide* I. Das (2010: 293).

64. *Oligodon splendidus* (A.C.L.G. Günther, 1875). Proc. Zool. Soc. London 43(1): 231, pl. 33. (*Simotes splendidus*)

Type: Holotype, BMNH 1946.1.4.8, a 508 mm female (R.H. Beddome, 1857–1875).

Type locality: "the Wynad" [S India] (in error). Corrected to Myanmar *fide* Wall (1908g: 782 & 1923d: 631).

Distribution: Northern Myanmar (Magwe, Mandalay, Sagaing, Shan, Yangon), 100–300 m.

Sources: Evans, 1905, Wall, 1908g, 1908l, 1923g, 1925d, Venning, 1914 and Zug et al., 1998.

65. *Oligodon sublineatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a. Erpét. Gén. 7(1): 57–58. (*Oligodon sublineatum*)

Type: Holotype, MNHN 3239, a 180 mm specimen (Leschenault).

Type locality: "Ceylan" [= Sri Lanka].

Distribution: Southwestern Sri Lanka (Central, Sabaragamuwa, Southern, Western), NSL–1220 m.

Sources: Wall, 1921g, 1923d, 1923g, E.H. Taylor, 1950b, Deraniyagala, 1955, P. Silva, 1969, 1980a, A. Silva, 1990b, 2001, 2009 and Somaweera, 2006.

Remarks: Nicobar Is. record rejected *fide* Wall (1923d: 627 & 1923g: 315).

66. *Oligodon taeniatus* (A.C.L.G. Günther, 1861g). Proc. Zool. Soc. London 29(1): 189. (*Simotes taeniatus*)

Synonym: *Simotes quadrilineatus* Jan, 1865 *in* Jan & Sordelli, 1860–1866.

Type: Lectotype, BMNH 1946.1.3.27, a male (H. Mouhot, 1858–1860), designated by David et al. (2008b: 8, 10).

Type locality: "Cambodia" via lectotype selection.

Distribution: Southeast Asia. Southern China (? Yunnan), Thailand (Bangkok, Chaiyaphum, Chon Buri, Khan Kaen, Krung Thep Mahanakhon, Nakhon Ratchasima, Nakhon Si Thammarat, Nonthaburi, Pattani, Petchaburi, Prachin Buri, Prachuap Khiri Khan, Saraburi, Songkhla), Cambodia (Battambang, Kandal, Koh Kong, Kampong Chhnang, Phnom Penh, Preah Vihear, Siem Reap), Laos (Champasak) and S Vietnam (Bai Ria-Vung Tau, Cao Bang, Dong Nai, Ha Giang, Hai Duong, Ho Chi Minh City, Khanh Hoa, Kien Giang, Lam Dong, Nghe An, Ninh Binh, Quang Binh, Soc Trang, Tay Ninh, Thai Nguyen, Tien Giang, Vinh Phuc), 50–1800 m.

Sources: Cochran, 1930, E.H. Taylor & Elbel, 1958, Deuve, 1963a, E.H. Taylor, 1965, Campden-Main, 1969b, 1970a, Saint-Girons, 1972a, Zhao & Adler, 1993, M.J. Cox et al., 1998, Zug et al., 1998, Orlov et al., 2000, Teynié & David, 2007, David et al., 2008b, V.S. Nguyen et al., 2009 and T. Hartmann et al., 2013.

Remarks: *Simotes quadrilineatus* Jan a valid species *fide* I. Das, 2010.

67. *Oligodon taeniolatus* (Jerdon, 1854). J. Asiat. Soc. Bengal (1853) 22(6): 528. (*Coronella taeniolata*)

Synonyms: *Coluber taeniolatus* Daudin, 1803b *(nomen oblitum), Natrix scalaris* Wagler, 1825 (*nomen ineditum*), *Xenodon dubium* Jerdon, 1854, *Oligodon subgriseum* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen incorrigendum), Oligodon subgriseus* – Gray, 1858 *(nomen corrigendum), Oligodon elliotti* A.C.L.G. Günther, 1864a, *Oligodon fasciatus* A.C.L.G. Günther, 1864a, *Oligodon spilonotus* A.C.L.G. Günther, 1864a, *Oligodon subgriseus alternans* Bethencourt-Ferreira, 1897a, and *Oligodon taeniolatus ceylonicus* Wall, 1921g.

Type: Holotype, not designated (T.C. Jerdon, 1836–1852), location unknown.

Type locality: "Madras, India" [= Chennai, NE Tamil Nadu State, SE India, 13°04'N, 80°15'E, elevation 10 m].

Distribution: Southern Turkmenistan, ext. NE Iran (Mazandaran), Afghanistan (Herat), Pakistan (E Balochistan, Khyber Pakhtunkhwa, Punjab, Sindh), India (Andhra Pradesh, Bihar, Goa, Karnataka, Kerala, Maharashtra, Orissa, Tamil Nadu, Uttar Pradesh), Bangladesh and Sri Lanka (Eastern, North Central, North-Western, Western), 520–610 m.

Sources: Wall, 1921g, 1923g, E.H. Taylor, 1950b, Deraniyagala, 1955, Minton, 1966, Brück, 1968, Sharma, 1971, 1976a, K. Tiwari & Sharma, 1971, M.S. Khan, 1977, 1982a–b, 2002, 2006, P. Silva, 1980a, Daniel, 1983, M.A.R. Khan, 1988, Dutta & Acharjyo, 1990, A. Silva, 1990b, 2009, Latifi, 1991, Szczerbak, 1994, Whitaker & Captain, 2004 and N. Khaire, 2006.

Remarks: Original description based on P. Russell (1796: 24–25, pl. 19). *Coluber taeniolatus* Daudin requires conservation.

68. *Oligodon theobaldi* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 417. (*Simotes theobaldi*)

Synonym: *Simotes beddomii* Boulenger, 1890a.
Type: Holotype, BMNH 1946.1.4.9, a 406 mm female (W. Theobald, Jr., 1862–1873).
Type locality: "Pegu" [= Bago, S Bago Div., S Myanmar, 17°20'N, 96°30'E, elevation 15 m].
Distribution: Northeastern India (W Meghalaya, Nagaland) and Myanmar (Bago, Kachin, Magwe, Mandalay, Shan, Tanintharyi, Yangon), 15–250 m.
Sources: Wall, 1925d and Ao et al., 2004.

69. *Oligodon torquatus* (Boulenger, 1888h). Ann. Mus. Civ. Stor. Nat. Genova (2) 6: 597, pl. 5, figs. 1–1a. (*Simotes torquatus*)

Types: Syntypes (8), BMNH 1946.1.4.21–22, a female and juvenile, and MSNG CE 30258a–f, longest syntype 290 mm (L. Fea, 1887).
Type locality: "Bhamò, Burma" [= Bhamò, S Kachin State, NE Myanmar, 24°15'N, 97°14'E, elevation 115 m].
Distribution: Northern Myanmar (Ayeyarwady, S Kachin), 115–140 m.
Source: Wall, 1923g.
Remarks: Lectotype restrictions of M.A. Smith (1943: 219, for BMNH) and Iskandar & Colijn (2001: 76, for MSNG 30258) invalid.

O

70. *Oligodon travancoricus* Beddome, 1877b. Proc. Zool. Soc. London 45(1): 685. (*Oligodon travancoricum*)

Type: Holotype, BMNH 1946.1.5.53, a juvenile male (R.H. Beddome, 1857–1877).
Type locality: "South-Travancore mountains, Madras Presidency, 3000 feet elevation" [= S India]. Emended to Tinnevelly hills [= ext. S Tamil Nadu, S India] *fide* Boulenger (1894a: 236).
Distribution: Southern India (Western Ghats of Andhra Pradesh, S Kerala, S Tamil Nadu), 815–985 m.
Sources: Ferguson, 1895, Sanyal et al., 1993, Ganesh et al., 2009 and Chandramouli & Ganesh, 2010.

71. *Oligodon trilineatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 636–637. (*Simotes trilineatus*)

Synonym: *Simotes trilineatus* A.-M.-C. Duméril, 1853 (*nomen nudum*).
Type: Holotype, MNHN 3541 (P.-M. Diard, 1829–1848).
Type locality: "grandes Indes" [= Greater Sundas, W Indonesia].
Distribution: Western Indonesia (Mentawai Arch., Nako, Nias, Sumatra), NSL–500 m.
Sources: J.G. Fischer, 1885b, Lidth de Jeude, 1890, David & Vogel, 1996 and Tillack & Günther, 2009.
Remarks: Photograph of the holotype in Tillack & Günther (2009: fig. 7).

72. *Oligodon unicolor* (Kopstein, 1926). Zool. Meded. 9(2–3): 107. (*Simotes unicolor*)

Type: Holotype, RMNH, a 300 mm specimen, (F. Kopstein, May 1924).
Type locality: "Samlakki, Süd-Tenimber" [= Yamdena, Tanimbar Islands, SE Indonesia, 7°36'S, 131°25'E].
Distribution: Southeastern Indonesia (Tanimbars: Yamdena).

73. *Oligodon venustus* (Jerdon, 1854). J. Asiat. Soc. Bengal (1853) 22(6): 528. (*Xenodon venustum*)

Synonyms: *Simotes binotatus* A.-M.-C. Duméril, 1853 (*nomen nudum*) and *Simotes binotatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a.
Type: Holotype, not designated, a 305 mm specimen, lost *fide* M.A. Smith (1943: 222).
Type locality: "West Coast of S India." Restricted to North Canara district [= Uttara Kannada Distr., coastal Karnataka State, SW India] *fide* M.A. Smith (1943: 222).
Distribution: Southern India (Anaimalai Hills of Karnataka, Kerala, S Tamil Nadu), 610–2135 m.
Sources: Malhotra & Davis, 1991 and Hutton & David, 2009.

74. *Oligodon vertebralis* (A.C.L.G. Günther, 1865). Ann. Mag. Nat. Hist. (3) 15(86): 91–92. (*Simotes vertebralis*)

Type: Holotype, BMNH 1946.1.3.33, a 345–356 mm male (L.L. Dillwyn, 1855–1865).
Type locality: "Bandjermassing" [= Banjarmasin, SW Kalimantan Selantan, S Kalimantan, Indonesia, 3°20'S, 114°35'E, elevation NSL].
Distribution: Borneo and S Philippines. East Malaysia (N Sabah), cen. Indonesia (Kalimantan), NSL–70 m.
Sources: Stuebing, 1991 and Malkmus et al., 2002.

75. *Oligodon waandersi* (Bleeker, 1860f). Nat. Tijds. Nederl. Indië (5) 22(2): 83. (*Rabdion waandersi*)

Synonym: *Rabdion cruciatum* Bleeker, 1860e.
Type: Holotype, BMNH 1946.1.2.52, a 209 mm male (H.L. van Bloemen-Waanders, 1841–1845).
Type locality: "Boni" [= N Sulawesi, cen. Indonesia, 0°27'S, 121°48'E].
Distribution: Central Indonesia (Buton, Sula, Sulawesi), NSL–1200 m.
Sources: A.C.L.G. Günther, 1865, M.A. Smith, 1927, Bosch, 1985, Lang & Vogel, 2005 and Koch, 2012.

76. *Oligodon wagneri* David & Vogel, 2012a. Zootaxa (3201): 59–62, figs. 1–3.

Synonym: *Oligodon pseudocolor* F. Wagner, 1976. *(nomen ineditum)*
Type: Holotype, MNHN 1891.233, a 235 mm male (J. Claine, 23 July 1891).
Type locality: "'Poulo Nias', *i.e.* Pulau Nias (Nias Island), Nias Archipelago, Sumatera Utara Province, off the northern part of the west coast of Sumatra, Indonesia."
Distribution: Western Indonesia (Nias). Known only from the holotype.

77. *Oligodon woodmasoni* (Sclater, 1891a). J. Asiat. Soc. Bengal 60(3): 235–236, pl. 6, fig. 2. (*Simotes woodmasoni*) (nomen corrigendum)

Synonyms: *Simotes wood-masoni* Sclater, 1891a *(nomen incorrigendum)* and *Simotes woodmasoni* – Sclateri, 1891 *(nomen corrigendum).*
Types: Syntypes (2), ZSI 8459 (formerly IMC 8459) (J. Wood-Mason, 1872) [Andaman] and ZSI 12547 (formerly IMC 12547) (F.A. de Roepstorff) [Nicobar].
Type locality: "Andamans" and "Nicobars" [= Anadaman & Nicobars, E India, Bay of Bengal].
Distribution: Eastern India (Andaman & Nicobars).
Sources: Biswas & Sanyal, 1980, Tikader & I. Das, 1985 and Vijayakunar & David, 2006.

OMOADIPHAS G. Köhler, Wilson & McCranie, 2001 (Colubridae)

Type species: *Omoadiphas aurula* G. Köhler, Wilson & McCranie, 2001.
Distribution: Honduras.
Sources: G. Köhler et al., 2001 and McCranie & Cruz-Díaz, 2010.

1. *Omoadiphas aurula* G. Köhler, Wilson & McCranie, 2001. Senck. Biol. 81(1–2): 271–273, figs. 1–3.

Type: Holotype, SMF 78865, a 210 mm female (Fund. Hector Rodrigo Pastor Fasquelle).
Type locality: "a coffee finca near Buenos Aires, 1250 elevation, Depto. Cortés, Honduras. This locality lies on the southern slopes of the Sierra de Omoa at about 15°30.03' N, 88°11.13' W."
Distribution: Northwestern Honduras (Cortés), 1250–1900 m.
Sources: Townsend, 2006, Townsend et al., 2006 and McCranie, 2011a.

2. *Omoadiphas cannula* McCranie & Cruz-Díaz. 2010. Zootaxa (2690): 54–57, figs. 1–2.

Type: Holotype, UNAH 1740, a 326 mm male (G.A. Cruz, 13 Sept. 1989).
Type locality: "Montaña de Peña Blanca, Sierra de Agalta, 4 km N of Catacamas, 14º53'26"N, 85º53'46"W, 1250 m elev., departamento de Olancho, Honduras."
Distribution: Eastern Honduras (Olancho), 1250 m. Known only from type locality.
Source: McCranie, 2011a.

3. *Omoadiphas texiguatensis* McCranie & Castañeda, 2004b. Proc. Biol. Soc. Washington 117(3): 312–315, figs. 1–3.

Type: Holotype, USNM 559599, a 169 mm female (F.E. Castaneda & J.R. McCranie, 3 Sept. 2003).
Type locality: "approximately 2.5 airline km NNE of La Fortuna, 15°25'49"N, 87°18'32"W 1690 m elev., Cerro Texíguat Wildlife Refuge, Departamento de Yoro, Honduras."
Distribution: Northwestern Honduras (Yoro), 1690 m.
Source: McCranie, 2011a.

OOCATOCHUS Helfenberger, 2001 (Colubridae)

Type species: *Tropidonotus rufodorsatus* Cantor, 1842a.
Distribution: Eastern Asia.
Sources: Stejneger, 1907a, Emelianov, 1929, Shannon, 1956, Stewart, 1970, Bannikov et al., 1977, Sura, 1981a, Wen, 1983, Schulz, 1985a, 1988e, 1996, H.-F. Li et al., 1986, Szyndlar & Hung, 1987, Steehouder, 1992a, Zhao & Adler, 1993, Adnagulov et al., 2000, Helfenberger, 2001, Xu, 2001, Utiger et al., 2002, 2005, Ratnikov, 2004, Burbrink & Lawson, 2007 and San & Lee, 2007.
Remarks: A synonym of *Coronella fide* Zaher et al., 2012.

1. *Oocatochus rufodorsatus* (Cantor, 1842a). Zool. Chusan: pl. 13. (*Tropidonotus rufodorsatus*)

Synonyms: *Ablabes sex-lineatus* H.M.C. Duméril, Bibron & Duméril, 1854a *(nomen incorrigendum), Coronella sexlineata* Jan, 1863a *(nomen corrigendum), Simotes conradi* W.C.H. Peters, 1874c, *Simotes herzi* Boettger, 1886b, and *Elaphe rufodorsata coreensis* G.D. Stewart, 1970 *(nomen nudum).*
Types: Syntypes (2), BMNH 1946.1.7.32–33 (formerly BMNH 1843.7.21.34), two adult females (T.E. Cantor, July 1840–March 1841, via British East India Comp.).
Type locality: "island of Chusan, or Great Chusan, is situated on the East Coast of China, between the 30° and 31° of North latitude and the 122° and 123° of East longitude; separated from the nearest mainland, Keeto Point, by an arm of the sea, about ten miles across"

[= Zhoushan Is., Zhoushan Arch., Zhejiang Prov., E China].

Distribution: Eastern Asia. Extreme E Russia, E China (Anhui, Beijing, Fujian, Guangxi, Guangdong, Heilongjiang, Hainan, Hebei, Henan, Hubei, Hunan, Nei Monggol, Jiangsu, Jiangxi, Jilin, Liaoning, Shandong, Shanxi, Tianjin, Zhejiang), ext. SE Russia, North Korea (Kangwon, North Hamgyong, North Pyongan, Pyongyang, South Pyongan) and South Korea (Kyonggi, Seoul), 75–215 m.

Remarks: Supplemental original description reprinted in Cantor (1842b: 483). Record from Taiwan unconfirmed.

OPHEODRYS Fitzinger, 1843 (Colubridae)

Synonyms: *Opheodris* A.-M.-C. Duméril & Bibron, 1844 *(nomen emendatum), Cyclophis* A.C.L.G. Günther, 1858, *Cyclophes* – Higgins, 1873 *(nomen incorrectum), Opheadrys* – W.H. Smith, 1882 *(nomen incorrectum), Phyllophilophis* S.W. Garman, 1884, *Tropidodryas* Cope, 1885a, *Phylophilophis* – O.P. Hay, 1887 *(nomen incorrectum), Cyclophide* – Boettger, 1888d *(nomen incorrectum), Philophyllophis* S.W. Garman, 1892 *(nomen emendatum), Cylophis* – Boulenger, 1896a *(nomen incorrectum), Cyclophys* – K.P. Schmidt & Necker, 1936 *(nomen incorrectum), Ophodryos* – J.A. Burton, 1991 *(nomen incorrectum),* and *Liochlorophis* Oldham & Smith, 1991.

Type species: *Coluber aestivus* Linnaeus, 1758.

Distribution: Southern Canada, E USA and ext. N Mexico.

Fossil records: Pleistocene of SE Canada and USA. Fossils unassigned to species include upper Miocene (Clarendonian) of USA (Nebraska), and upper Pleistocene (Rancholabrean II) of USA (Nebraska, Tennessee).

Sources: Cundall, 1981, 1986, Plummer, 1981, 1984, Morris, 1982, Ernst & Barbour, 1989, Conant & Collins, 1991, Holman, 1995a, Palmer & Braswell, 1995, and Tennant, 1997, Holman, 2000a, T. Schmidt, 2002, Ernst & Ernst, 2003 and Parmley & Hunter, 2010.

1. *Opheodrys aestivus* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 387. (*Coluber aestivus*)

Synonyms: *Coluber subviridis* Lacépède, 1789 (*nomen rejiciendum*), *Leptophis majalis* Baird & Girard, 1853, *Opheodrys aestivus carinatus* Grobman, 1984, and *Opheodrys aestivus conanti* Grobman, 1984.

Type: Neotype, USNM 92473, a male (C.W. Burn, 19 July 1933), designated by Grobman (1984: 161).

Type locality: "one mile west of Parksville, McCormick Co., SC" [South Carolina, USA] via neotype selection.

Distribution: Eastern USA (Alabama, Arkansas, Delaware, Florida, Georgia, S Illinois, S Indiana, SE Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, SE Nebraska, S New Jersey, North Carolina, ext. S Ohio, E Oklahoma, ext. S Pennsylvania, South Carolina, Tennessee, E Texas, Virginia: Assateague, Parramore, Revel and Smith Is., W West Virginia) and NE Mexico (ext. N Coahuila, E Nuevo León, Tamaulipas), NSL–1525 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Alabama, Florida, Georgia, Pennsylvania, Texas, Virginia).

Sources: Burger, 1947, Christman, 1980, Cundall, 1981, 1986, Plummer, 1981, 1984, Morris, 1982, Grobman, 1984, Ernst & Barbour, 1989, Conant & Collins, 1991, Holman, 1995a, Palmer & Braswell, 1995, Tennant, 1997, Walley & Plummer, 2000, Walley & Janis, 2002 and Klesius & Klesius, 2010.

Remarks: Holotype presumed lost *fide* Grobman (1984: 161). Type locality restriction to Charleston, South Carolina, USA *fide* Schmidt (1953: 191) invalid due to neotype selection.

2. *Opheodrys vernalis* (Harlan, 1827). J. Acad. Nat. Sci. Philadelphia (1826–1827) 5(2): 361. (*Coluber vernalis*)

Synonyms: *Coluber viridis* Bonnaterre, 1790 (*nomen oblitum*), *Coluber cyaneus* G. Shaw, 1802 (*nomen oblitum*), *Coluber viridicaeruleus* Oken, 1836, *Opheodrys vernalis blanchardi* Grobman, 1941, and *Opheodrys vernalis borealis* Grobman, 1992.

Type: Holotype, none designated, ANSP, lost *fide* Grobman (1941: 10).

Type locality: "Pennsylvania and New Jersey" [USA]. Restricted to vicinity of Philadelphia, Pennsylvania, USA *fide* K.P. Schmidt (1953a: 191).

Distribution: Southern Canada (S Manitoba, New Brunswick, Nova Scotia, SE Ontario, Prince Edward Island, ext. S Quebec, ext. SE Saskatchewan, Cape Breton Is.), cen. and NE USA (Colorado, Connecticut, ext. SE Idaho, Illinois, NW Indiana, Iowa, Maine: Applecore and Orr's Is.; W Maryland, Massachusetts, Michigan, Minnesota, N Missouri, possibly ext. E Montana, Nebraska, New Hampshire, N New Jersey, New Mexico, New York, North Dakota, Ohio, Pennsylvania, Rhode Island: Dutch Is.; ext. NE, SE and ext. SW South Dakota, ext. SE Texas, E Utah, Vermont, W Virginia, West Virginia, Wisconsin, E Wyoming) and ext. N Mexico (NW Chihuahua), NSL–2745 m.

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida, Pennsylvania), middle/upper Pleistocene (Irvingtonian II) of USA (Maryland), and upper Pleistocene (Rancholabrean II) of Canada (Ontario) and USA (Indiana, Ohio, Virginia, West Virginia).

Sources: Blanchard, 1933, Grobman, 1941, 1991, 1992, Logier & Toner, 1961, Cook, 1964, 1967, 1977a, Van Devender & Lowe, 1977, Holman, 1981c, Stebbins,

1985, Oldman & Smith, 1991, H.M. Smith et al., 1991, Harding, 1997, Degenhardt et al., 1996, Werler & Dixon, 2000, Hammerson, 1999 and Walley, 2003.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Coluber vernalis* Harlan is designated a *nomen protectum* and *Coluber viridis* Bonnaterre and *Coluber cyaneus* G. Shaw a *nomina oblita*.

OPHIOPHAGUS A.C.L.G. Günther, 1864a (Elapidae)

Synonyms: *Hamadryas* Cantor, 1836a *(nomen praeoccupatum), Dendraspis* Fitzinger, 1843 *(nomen rejiciendum), Hamadryus* – Higgins, 1873 *(nomen incorrectum), Ophiofagus* – Canton, 1895 *(nomen incorrectum), Ophiphagus* – Noguchi, 1909 *(nomen incorrectum), Ophiophagous* – Wall, 1925a *(nomen incorrectum),* and *Ophiophaqus* – Murthy, 1986 *(nomen incorrectum).*

Type species: *Hamadryas hannah* Cantor, 1836a.

Distribution: Southern and SE Asia and East Indies.

Sources: Cantor, 1838, Müller & Schlegel, 1844b, Hasselt, 1857, Fayrer, 1872, Beddard, 1904, Rooij, 1917, E.H. Taylor, 1922a, 1965, Wall, 1924c, 1925a, C.H. Das, 2010, 2012, Hoser, 2012e, Koch, 2012, Subba-Rao, 2012 and S.K. Sharma et al., 2013.

Remarks: Official Generic Name no. 1599 *fide* Opinion 709 (ICZN, 1964b).

1. *Ophiophagus hannah* (Cantor, 1836a). Asiatic Res. 19(1): 87–91, pl. 10, figs. a–b, pl. 11, figs. a–d, pl. 12, figs. a–f. (*Hamadryas hannah*)

Synonyms: *Naja bungaroides* H. Boie *in* Schlegel, 1828 *(nomen oblitum), Hamadryas elaps* Lesson, 1830 *in* Duperrey, 1826–1832, *Naja bungarus* Schlegel, 1837, *Hamadryas ophiophagus* Cantor, 1838, *Naja vittata* Elliott, 1840, *Dimeresurus boiei* Bleeker, 1857b (*nomen nudum*), *Naja fasciata* W.C.H. Peters, 1861c, *Naja ingens* Hassett, 1882b, *Naja hamadryad* Purananda, 1956 (*in* Buckley & Porges), *Dendraspis hannah borneensis* Deraniyagala, 1960b, *Dendraspis hannah sinensis* Deraniyagala, 1960b, *Dendraspis hannah brunnea* Deraniyagala, 1961b, *Dendraspis hannah nordicus* Deraniyagala, 1961b, *Ophiophagus hanna* – R.L. Irwin, Oliver, Mohamed & Haast, 1970 *(nomen incorrectum), Ophiaphagus hannah* – J. White, 1981 *(nomen incorrectum), Ophiophagua hannah* – Jadhav & Kapre, 1991 *(nomen incorrectum),* and *Ophiphagus hannah* – Khole, 1991 *(nomen incorrectum).*

Type: Holotype, BMNH 1996.451 (formerly RSL), a 2433–2990 mm dry specimen (? skin) (T.E. Cantor, 1834–1836, via British East India Comp.).

Type locality: "in the Sunderbuns" and "not far from Calcutta" [= Sundarbans, Ganges River delta, SW Bangladesh and SE West Bengal State, NE India, bet. 21.5–23°N and 88–91.5°E and Kolkata, S West Bengal State, NE India, 22°34'N, 88°22'E, elevation 10 m]. Emended to Bengal *fide* Cantor (1838: 73).

Distribution: Northern Pakistan (NE Punjab), India (Andaman & Nicobars: Andaman Is., Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Gujarat, Karnataka, Kerala, Maharasktra, Manipur, Meghalaya, Mizoram, Nagaland, Orissa, Sikkim, Tamil Nadu, Uttarakhand, Uttar Pradesh, West Bengal), Nepal (Bardiya, Chitwan, Dolakha, Jhapa, Kaski, Kathmandu, Lamjung, Morang, Parsa, Rautahat, Saptari, Sunsari,), E Bhutan, Bangladesh, Myanmar (Ayeyarwady, Bago, Chin, Kachin, Karen, Magwe, Mandalay, Mon, Sagaing, Shan, Tanintharyi, Yangon), S China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hunan, Jiangxi, Sichuan, SE Xizang, Yunnan, Zhejiang), Vietnam (most of the country), Laos (Champasak, Khammouan, Salavan, Vientiane, Xiangkhouang), Cambodia (Kampong Cham, Siem Reap), Thailand (Bangkok, Chachoengsao, Chaiyaphum, Chanthaburi, Chiang Mai, Chon Buri, Kanchanaburi, Krung Thep Mahanakhon, Loei, Lop Buri, Nakhon Phathom, Nakhon Ratchasima, Nakhon Si Thammarat, Nartahiwat, Phang Nga, Phatthalung, Phetchabun, Prachuab Khiri Khan, Puttani, Ratchaburi, Rayong, Samut Prakan, Samut Sakhon, Saraburi, Songkhla, Surin, Tak, Trang, Ubon Ratchasima, Uthai Thani, Yala, Koh Lak Is.), West Malaysia (Johor, Kedah, Kelantan, Melaka, Negeri Sembilan, Perak, Perlis, Pinang, Tioman Is.), Singapore, Brunei, East Malaysia (Sabah, Sarawak), Indonesia (Bali, Bangka, Belitung, Galang, Java, Kalimantan, Nias, Peleng, Simeulue, Sulawesi, Sumatra) and Philippines (Balabac, Dinagat, Jolo, Luzon, Lubang, Mindanao, Mindoro, Negros, Palawan), NSL–2180 m.

Remarks: Official Specific Name no. 990 *fide* Opinion 709 (ICZN, 1964). Original description reprinted in Cantor (1838: 73–75). Holotype, colored sketches and MS of Cantor sent to RSL in 1839. In accordance with

Art. 23.9.2 of the Code (ICZN, 1999), *Hamadryas hannah* Cantor is designated a *nomen protectum* and *Naja bungaroides* H. Boie a *nomen oblitum*.

OPHRYACUS Cope, 1887c (Viperidae)

Synonym: *Atropus* A.C.L.G. Günther, 1895 *in* 1885–1902 *(nomen emendatum).*
Type species: *Trigonocephalus undulatus* Jan, 1859b.
Distribution: Southern Mexico.
Sources: Ferrari-Pérez, 1886, A.C.L.G. Günther, 1895 *in* 1885–1902, Mocquard, 1909, Martin del Campo, 1935, H.M. Smith, 1941i, H.M. Smith & Taylor, 1945, Burger, 1971, J.A. Campbell & Lamar, 1989, 2004, Pérez-Higareda & Smith, 1991, Werman, 1992, Crother et al., 1992, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Taggart et al., 2001, Castoe & Parkinson, 2006 and Hoser, 2012d.

1. *Ophryacus undulatus* (Jan, 1859b). Rev. Mag. Zool. (2) 11: 155, 157. (*Trigonocephalus* [*Atropos*] *undulatus*)

Synonyms: *Bothrops undulata* – Amaral, 1930f and *Bothrops sphenophrys* H.M. Smith, 1960.
Types: Syntypes (2), formerly MSNM, longest syntype 560 mm, destroyed in 1943 during World War II.
Type locality: “Mexique” [= Mexico]. Restricted (by inference) to Orizaba, Veracruz, Mexico *fide* H.M. Smith & Taylor (1950a: 350).
Distribution: Southern Mexico (cen. Guerrero, Hidalgo, Oaxaca, Puebla, W Veracruz), 1490–2800 m.
Sources: Canseco-Marquez et al., 2000 and Mendoza-Paz et al., 2006.
Remarks: Supplemental original description in Jan (1859e: pl. e, fig. no. 6).

O

OPISTHOTROPIS A.C.L.G. Günther, 1872b (Natricidae)

Synonyms: *Opisthotropos* – E. Bartlett, 1875 *(nomen incorrectum), Calamohydrus* Boulenger, 1888c, *Helicopsoides* Mocquard, 1890a–b, *Lepidognathus* Lidth de Jeude, 1891, *Trimerodytes* Cope, 1895a, *Opithotropis* – Palacky, 1898 *(nomen incorrectum), Tapinophis* Boulenger, 1899b, *Liparophis* Peracca, 1904b, *Cantonophis* F. Werner, 1909d, *Opisthotrophis* – Bellairs, 1969 *(nomen incorrectum),* and *Opistotrophis* – Engelmann & Obst, 1981 *(nomen incorrectum).*
Type species: *Opisthotropis ater* A.C.L.G. Günther, 1872b.
Distribution: Eastern and SE Asia and East Indies.
Sources: Boulenger, 1891b, C.H. Pope, 1935, Bourret, 1936a–b, M.A. Smith, 1943, C. Haas, 1950, W.C. Brown & Leviton, 1961, E.H. Taylor, 1965, B.Q. Hu et al., 1980, Tian et al., 1986, Ji, 1992, Zhao & Adler, 1993, Orlov et al., 1998, Zhao, 2006, J.C. Murphy et al., 2008, Ziegler et al., 2008, Zaher et al., 2009, David et al., 2011a and Yang et al., 2011.
Remarks: J.C. Murphy et al. (2008: 177) transferred *O. praemaxillaris* back to *Paratapinophis*.

1. *Opisthotropis alcalai* W.C. Brown & Leviton, 1961. Occ. Pap. Nat. Hist. Mus. Stanford Univ. (8): 2–4, fig. 1.

Type: Holotype, CAS-SU 22250 (formerly SU 22250), a 532 mm male (A.C. Alcala & field crew, 28 April 1959).
Type locality: “Cugat Creek, on the west side of Dapitan Peak, Mt. Malindang, Zamboanga del Norte Province, Mindanao Island, at an altitude of 2500 feet, in the Philippine Islands” [= ext. N Zambonga del Norte Province, W Mindanao, SE Philippines, 8°13’N, 123°38’E].
Distribution: Southern Philippines (W Mindanao), 760 m. Known only from type locality.
Source: Alcala, 1986.

2. *Opisthotropis andersonii* (Boulenger, 1888c). Ann. Mag. Nat. Hist. (6) 2(7): 44. (*Calamohydrus andersonii*)

Type: Holotype, BMNH 1946.1.5.26, a 240–245 mm male (C. Ford).
Type locality: “Hongkong” [China].
Distribution: China (Hong Kong) and Vietnam (Hai Phong, Quang Ninh, Baitsilong Arch.: Cu Lao Ba Mun Is.), NSL–300 m.
Sources: Boulenger, 1893a, Wall, 1903, Romer, 1952, 1979a, Karsen et al., 1986, Darevsky, 1999, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

3. *Opisthotropis atra* A.C.L.G. Günther, 1872b. Ann. Mag. Nat. Hist. (4) 9(49): 16, pl. 3, fig. b. (*Opisthotropis ater*)

Type: Holotype, BMNH 1946.1.15.33, a 339–340 mm male (H.H. Higgins, 1856–1872).
Type locality: “West Africa,” (in error *fide* Boulenger, 1914c: 483, and C.H. Pope, 1935: 164).
Distribution: Unknown. Known only from holotype.
Source: Boulenger, 1893a.

4. *Opisthotropis balteata* (Cope, 1895a). Proc. Acad. Nat. Sci. Philadelphia (1894) 46: 426, pl. 10, figs. 2a–d, 2f. (*Trimerodytes balteatus*)

Synonyms: *Liparophis bedoti* Peracca, 1904b and *Opisthotropis multicinctata* Fan, 1931.
Type: Holotype, ANSP 11435, a 377 mm male (F.P. Gilman, 1886–1894).
Type locality: “Hainan” [= Hainan Is., Hainan Prov., ext. SE China].

Distribution: Southern China (Guangdong, Guangxi, Hainan, Hong Kong) and N Vietnam (Hai Phong), NSL–350 m.

Sources: Peracca, 1904b, Steindachner, 1906, K.P. Schmidt, 1927a, Fan, 1931, Romer, 1979a, Karsen et al., 1986, 1998, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

Remarks: Malnate (1971: 363) listed the collector of type as F. Gillman and original plate as pl. 10, fig. 1. M.A. Smith (1943: 331) and W.C. Brown & Leviton (1961: 4) erroneously listed the type in MCZ. Cambodia record rejected *fide* Saint-Girons (1972a: 73).

5. *Opisthotropis cheni* Zhao, 1999. Sichuan J. Zool. 18(3): 96.

Type: Holotype, CIB 80029 (formerly MFB 9339), a 455 mm male (Y.-H. Chen, July 1993).

Type locality: "near Workers and Staffs Hospital, Mt. Mang, Yizhang Co., Hunan Province, China; 480 meters" [= 25º00'N, 112º50'E].

Distribution: Southern China (N Guangdong, S Hunan), 480–1300 m.

Sources: Zhao, 2004, 2006 and Li et al., 2010.

Remarks: Supplemental original description in Zhao (2004: 342).

6. *Opisthotropis cucae* David, Pham, Nguyen & Ziegler, 2011. Zootaxa (2758): 44–47, figs. 1–2, 3a–d.

Type: Holotype, IEBR A.924, a 464 mm female (T.C. Ho & T.C. Pham, 22 May 2009).

Type locality: "Chu Mom Ray National Park, Sa Thay District, Kon Tum Province (14º26.227' N, 107º43.268'E), 740 m asl, Vietnam."

Distribution: Central Vietnam (Kon Tum), 740 m. Known only from type locality.

7. *Opisthotropis daovantieni* Orlov, Darevsky & Murphy, 1998. Russ. J. Herp. 5(1): 61–62, figs. 1–2.

Type: Holotype, FMNH 252009, a 510 mm female (I.S. Darevsky & N.L. Orlov, 25 June 1995).

Type locality: "Buoenloy, Ankhe District, Gia Lai Province, southern Vietnam (14°20'N, 108°36'E), 750m."

Distribution: Southern Vietnam (Gia Lai, Kon Tum), 750 m.

Sources: V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

8. *Opisthotropis guangxiensis* Zhao, Jiang & Huang, 1978. Mater. Herpetol. Res. 4: 21.

Synonym: *Opisthotropis yaoshanensis* Huang & Zheng *in* Huang, Zheng, & Fang, 1978.

Type: Holotype, CIB 602488, a 455 mm male (native, 19 June 1960).

Type locality: "Mt. Yao, Guangxi Zhuang Autonomous Region, China."

Distribution: Southern China (Guangxi, Hunan), 950–1220 m.

Sources: Zhao et al., 1979, P. Guo et al., 1999b and Zhao, 2006.

Remarks: Supplemental original description in Zhao et al. (1979: 313, fig. 1).

9. *Opisthotropis jacobi* Angel & Bourret, 1933. Bull. Soc. Zool. France 58(3–4): 130–131.

Types: Syntypes (2), MNHN 1933.10, a 475 mm male (R.L. Bourret, 1930–1931), location of other syntype unknown.

Type locality: "Chapa, station de villégiature située au Tonkin, dans la province de Lao Kay, près de la frontière du Yunnan, à une altitude moyenne de 1.500 mètres" [= Sa Pa, Sa Pa Distr., W Lao Cai Prov., ext. N Vietnam, 22°20'N, 103°51'E, elevation 1500 m].

Distribution: Southern China (Yunnan) and N Vietnam (Cao Bang, Bac Kan, Ha Tay, Lang So, Lao Cai, Tuyen Quang, Vinh Phu), 900–1600 m.

Sources: Tian et al., 1986, V.S. Nguyen et al., 2009 and I. Das, 2010.

10. *Opisthotropis kikuzatoi* (Okada & Takara, 1958). Bull. Biogeogr. Soc. Japan 20(3): 1–3, figs. 1a–c. (*Liopeltis kikuzatoi*)

Type: Holotype, URJ 1, a 533 mm male (K. Kikuzato, 15 Sept. 1956).

Type locality: "Kume-jima of Okinawa-group, Ryukyu Islands" [Japan]. Emended to the upper reaches of Shirasegawa River, at a point 1,000 meters from the summit of Mt. Uegusuku-dake (309 m), Kume-jima Island, Ryukyu Archipelago *fide* Toyama (1983: 34).

Distribution: Extreme S Japan (Ryukyus: Kumejima Is.), 10–1000 m.

Sources: Takara, 1962, Toyama, 1983, M. Mori, 1984, Ota & Mori, 1985b and Ota, 1993.

11. *Opisthotropis kuatunensis* C.H. Pope, 1928a. Amer. Mus. Novit. (320): 5.

Type: Holotype, AMNH 34437, a 666 mm female (C.H. Pope [Third AMNH Asiat. Exped.], April–Sept. 1926).

Type locality: "Kuatun, a village in the mountains of Ch'ungan Hsien, northwest Fukien Province, China" [= Guadun, in Wuyishan Mtns., ext. N Fujian Prov., SE China, 27°45'N, 117°50'E, elevation 900–1200 m].

Distribution: Southeastern China (Fujian, Guangxi, Hong Kong, Jiangxi, Zhejiang), 200–1200 m.

Sources: C.H. Pope, 1929, Reitinger & Lee, 1978, Romer, 1978, 1979a, Wen, 1983, Zhong, 1984, Karsen et al., 1986, Tian et al., 1986 and Zhao, 2006 .

Remarks: Supplemental original description in C.H. Pope (1929: 423–425, fig. 10).

12. *Opisthotropis lateralis* Boulenger, 1903b. Ann. Mag. Nat. Hist. (7) 12(69): 350–351.

Synonym: *Tapinophis shini* Mell, 1930.
Type: Holotype, BMNH 1946.1.13.21, a 360 mm male (H. Fruhstorfer, June 1990–April 1903).
Type locality: "the Man-Son Mountains, Tonkin, altitude 3000 to 4000 feet" [= Mau Son Mtns., SE Lang Son Prov., ext. NE Vietnam, 21°51'N, 106°58'E, elevation 900–1200 m].
Distribution: Southern China (Guangxi, Guizhou, Hong Kong, Hunan) and N Vietnam (Bac Giang, Cao Bang, Hoa Binh, Lang Son, Quang Ninh, Vinh Phuc), 100–1200 m.
Sources: Bourret, 1939d, Reitinger et al., 1978, Romer, 1979a, Karsen et al., 1986, Zhao, 2006, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

13. *Opisthotropis latouchii* (Boulenger, 1899b). Proc. Zool. Soc. London 67(1): 164, pl. 18, figs. 1, 1a–1c. (*Tapinophis latouchii*)

Synonym: *Cantonophis praefrontalis* F. Werner, 1909g.
Type: Holotype, BMNH 1946.1.15.37, a 455 mm female (J.D. La Touche, spring 1896 or 1898).
Type locality: "Kuatun, a village about 270 miles from Foochow, in the mountains at the North-west of the Province of Fokien, at an altitude of 3000 to 4000 feet or more, China" [= Guadun, ext. N Fujian, SE China, 27°45'N, 117°50'E, elevation 900–1200 m].
Distribution: Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hunan, Jiangxi, Sichuan, Zhejiang), 100–1425 m.
Sources: F. Werner, 1909d, C.H. Pope, 1929, Gressitt, 1941a, Tian et al., 1986 and B.H. Li, 1987.

O

14. *Opisthotropis maculosa* B.L. Stuart & Chuaynkern, 2007. Curr. Herp. 26(1): 37–39, figs. 3–5. (*Opisthotropis maculosus*)

Type: Holotype, THNHM 5343 (formerly FMNH 265798), a 520 mm male (Y. Chuaynkern, C. Chuechat, S. Makchai & B.L. Stuart, 7 Sept. 2004).
Type locality: "Thailand, Nong Khai Province, Boong Klar District, Phu Wua Wildlife Sanctuary, at marker 027 on footpath to Lad Phleuy Waterfall, 18°14'31.0"N 103°57'44.5"E, 190 m asl."
Distribution: Northeastern Thailand (Nong Khai) and ext. S China (Guangdong, Guangxi), 190–1150 m.
Sources: I. Das, 2010, 2012 and Yang et al., 2011.
Remarks: Probably occurs in N Laos and N Vietnam *fide* Yang et al. (2011: 67).

15. *Opisthotropis maxwelli* Boulenger, 1914c. Ann. Mag. Nat. Hist. (8) 14(84): 483.

Type: Holotype, BMNH 1946.1.13.22, a 305 mm female (J.P. Maxwell, 1899–1914).
Type locality: "South Fokien, China" [= S Fujian Prov., SE China].
Distribution: Southeastern China (Fujian, Guangdong, Guangxi, Jiangxi), 550–900 m.
Sources: Gressitt, 1941a and Y. Zhang & Tang, 1990.

16. *Opisthotropis rugosa* (Lidth de Jeude, 1890). Zool. Ergebn. Nieder. Ost-Indien 1(2): 187–192, pl. 16, figs. 1–5. (*Lepidognathus rugosus*)

Type: Holotype, RMNH 4330, a 473 mm specimen (M. Weber, Mar.–Nov. 1888).
Type locality: "Sumatra: Kaju tanam" [= Kayu Tanam, Sumatra, W Indonesia, 0°32'S, 100°20'E, elevation 200 m].
Distribution: Western Indonesia (Sumatra), 200 m. Known only from the holotype.
Sources: Rooij, 1917, C. Haas, 1950 and David & Vogel, 1996.

17. *Opisthotropis spenceri* M.A. Smith, 1918. J. Nat. Hist. Soc. Siam 3(1): 13, pl. 2.

Type: Holotype, BMNH 1946.1.15.31 (formerly MAS 1178), a 600 mm female (F.A. Spencer, Sept. 1917).
Type locality: "Muang Ngow, in a hill stream at about 300 metres elevation, N. Siam" [= Muang Ngao, Lampang Prov., NW Thailand, 18°46'N, 99°59'E, elevation 300 m].
Distribution: Northwestern Thailand (Lampang), 300 m. Known only from type locality.
Source: E.H. Taylor, 1965.

18. *Opisthotropis tamdaoensis* Ziegler, David & Vu, 2008. Zoosyst. Evol. 84(2): 198–203, figs. 1a–d, 2.

Type: Holotype, VNUH 10606, a 555 mm male (native, June 2006).
Type locality: "Bac (Silver) stream, Tam Dao, Vinh Phuc Province, northern Vietnam, ca. 750 m above sea level."
Distribution: Northern Vietnam (Vinh Phuc), 750 m. Known only from type locality.

19. *Opisthotropis typica* (Mocquard, 1890a). Naturaliste (2) 12(80): 154. (*Helicopsoides typicus*)

Type: Holotype, MNHN 1889.216, a 390 mm female (J. Whitehead, 1885).
Type locality: "Kina Balu, Bornéo." Emended to North Borneo, Mt. Kina Balu, between 1,000 and 4,000 or even 6,000 feet *fide* Mocquard (1890b: 118), [= Mt. Kinabalu, N Sabah, NE East Malaysia, 6°05'N, 116°30'E, elevation 300–1800 m].
Distribution: Northeastern East Malaysia (N Sabah, Sarawak), Brunei and ext. SW Philippines (Palawan), 75–900 m.

Sources: Mocquard, 1890b, Alcala, 1986, Stuebing, 1991, Mori, 1993, Stuebing & Inger, 1998, Malkmus et al., 2002 and I. Das, 2007b, 2010, 2012.
Remarks: Supplemental original description in Mocquard (1890b: 141–142, pl. 9, figs. 3, 3a–3c).

OREOCALAMUS Boulenger, 1899 (Calamariidae)

Type species: *Oreocalamus hanitschi* Boulenger, 1899c.
Distribution: Malaysia.
Sources: M.A. Smith, 1931b, C. Haas, 1950, Tweedie, 1983, Stuebing, 1991 and Malkmus et al., 200f2.

1. *Oreocalamus hanitschi* Boulenger, 1899c. Ann. Mag. Nat. Hist. (7) 4(24): 453.

Type: Holotype, BMNH 1946.1.7.8 (formerly RM), a 375 mm male (R. Hanitsch, March 1899).
Type locality: "Mount Kina Balu, North Borneo, 4200 feet" [= Mt. Kinabalu, N Sabah, NE East Malaysia, 6°05'N, 116°30'E, 1280 m].
Distribution: Central West Malaysia (NW Pahang) and East Malaysia (Sabah, Sarawak), 1000–1800 m.
Remarks: Original description repeated in Boulenger *in* Hanitsch (1900: 73).

OREOCRYPTOPHIS Utiger, Schätti, & Helfenberger, 2005 (Colubridae)

Synonym: *Oreophis* Utiger, Helfenberger, Schätti, Schmidt, Ruf & Ziswiler, 2002 (*nomen praeoccupatum*)
Type species: *Coluber porphyraceus* Cantor, 1839b.
Distribution: Southeast Asia and ext. W Indonesia.
Sources: Hubrecht, 1886, K.P. Schmidt, 1927, Rendahl, 1937, Kuntz, 1963, E.H. Taylor, 1965, Deuve, 1970, Tweedie, 1983, Mahendra, 1984, Schulz, 1989c, 1996, Zhao & Adler, 1993, David & Vogel, 1996, M.J. Cox et al., 1998, Schulz & Helfenberger, 1998, Chan-ard et al., 1999, Orlov et al., 2000, Lenk et al., 2001a, Utiger et al., 2002, 2005, Tiwari & Shah, 2004, Whitaker & Captain, 2004, Zhao, 2006, Burbrink & Lawson, 2007, Teynié & David, 2007, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010, 2012, Wangyal, 2011 and Yao, 2012.

1. *Oreocryptophis porphyraceus* (Cantor, 1839b). Proc. Zool. Soc. London 7(1): 51. (*Coluber porphyraceus*)

Synonyms: *Psammophis nigrofasciatus* Cantor, 1839b, *Coronella callicephalus* Gray, 1853, *Simotes vaillanti* Sauvage, 1877, *Liopeltis kawakamii* Oshima, 1910, *Elaphe porphyracea pulchra* K.P. Schmidt, 1925b, *Elaphe porphyracea hainana* Mell, 1931a, *Elaphe porphyracea sikiangensis* Mell, 1931a, *Elaphe porphyracea longilineata* Bourret, 1934f, *Elaphe porphyracea coxi* Schulz & Helfenberger, 1998, and *Elaphe porphyracea laticincta* Schulz & Helfenberger, 1998.
Type: Holotype, BMNH 1946.1.6.22 (T.E. Cantor, 1834–1839, via Brit. East India Comp.).
Type locality: "Míshmee Hills, Asám" [= Mishmi Hills, NE Arunachal Pradesh Prov., NE India, ca. 28°22'N, 95°48'E].
Distribution: Southeastern Asia. Northeastern India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, Sikkim, N West Bengal), Nepal (Ilam, Kaski), Bhutan, China (Anhui, Fujian, S Gansu, Guangdong, Guangxi, Guizhou, Hainan, Henan, Hong Kong, Hubei, Hunan, Jiangsu, Jiangxi, Shaanxi, Sichuan, Xizang, Yunnan, Zhejiang), Taiwan, N Myanmar (Chin, Kachin, Karem, Mandalay, Sagaing, Shan), NW Thailand (Chang Mai, Chiang Rai, Loei, Mae Hong Son), N Laos (Bolikhamsai, Champasak, Houaphan, Xiangkhouang), N Vietnam (Bac Kan, Cao Bang, Lang Son, Lao Cai, Quang Binh, Son La, Thai Nguyen, Vinh Phú), West Malaysia (Pahang, Perak), Singapore and ext. W Indonesia (Sumatra), 115–2600 m
Remarks: BMNH 1946.1.14.69 from Singapore listed as a type on website. Record from the Andaman Islands doubtful *fide* Schulz (1996: 190).

ORIENTOCOLUBER Kharin, 2011 (Colubridae)

Synonym: *Yeomansus* Hoser, 2012ak *(nomen illegitimum).*
Type species: *Masticophis spinalis* W.C.H. Peters, 1866a.
Distribution: Eastern Asia.
Sources: Stejneger, 1907, Emelianov, 1929, C.H. Pope, 1929, 1935, Maki, 1931, Shannon, 1956, Bannikov et al., 1977, Szyndlar & Hung, 1987, Kudrjavtsev & Mamet ,1989a, Borkin et al., 1990a–b, Zhao & Adler, 1993, Zou & Chen, 1998, Xu, 2001, Zhao, 2006, San & Lee, 200,7 Kharin, 2011 and Yao, 2012.

1. *Orientocoluber spinalis* (W.C.H. Peters, 1866a). Mber. Königl. Akad. Wiss. Berlin 1866(2): 91–92. (*Masticophis spinalis*)

Synonyms: *Zamenis bocourti* Jan, 1866 *in* Jan & Sordelli, 1860–1866, and *Zamenis cataphoronotus* Jan, 1867 *in* Jan & Sordelli, 1866–1870.
Type: Holotype, ZMB 5367, an 835 mm specimen (Wessel).
Type locality: "Mexico" (in error). Corrected to eastern Asia *fide* Stejneger (1907: 351).
Distribution: Eastern Asia. Eastern Kazakhstan, S Mongolia (Bayanhongor, S Dornogaovi, Dundgovi, S Govi-Altay, Omnogovi, Ovorhangay), N China (Anhui, Gansu, Hebei, Heilongjiang, Henan, Nei

O

Monggol, Ningxia, Jiangsu, Jilin, Liaoning, Shaanxi, Shandong, Shanxi, Xinjiang), North Korea (Kangwon, North Hamgyong, North Hwanghae, Pyongyang, South Hwanghae) and South Korea (Seoul, South Chungchong, Cheju Is.), 1245–1900 m.

Remarks: Photograph of holotype in Kharin (2011: fig. 2).

ORTHRIOPHIS Utiger, Helfenberger, Schätti, Schmidt, Ruf & Ziswiler, 2002 (Colubridae)

Synonym: *Martinekea* Hoser, 2012m *(nomen illegitimum)*.

Type species: *Elaphe taeniurus* Cope, 1861c.

Distribution: Southeastern Asia and Greater Sundas.

Sources: Zhao & Adler, 1993, Schulz, 1996, Utiger et al., 2002, 2005 and Burbrink & Lawson, 2007.

1. *Orthriophis cantoris* (Boulenger, 1894a). Cat. Snakes Brit. Mus. 2: 35. (*Coluber cantoris*)

Synonym: *Coluber reticularis* Cantor, 1839b.

Type: Lectotype, a 1200 mm specimen illustrated in colored sketch of T.E. Cantor (1834–1837) in RSL, designated by M.A. Smith (1943: 152).

Type locality: "Chirra Púnji, India" [= Cherrapunji, East Khasi Hills, Meghalaya State, NE India, 25°18'N, 91°42'E, elevation 1485 m] via lectotype selection.

Distribution: Southern Asia. Northeastern India (Arunachal Pradesh, Meghalaya, Nagaland, Sikkim, N West Bengal), E Nepal (Ilam), Bhutan and N Myanmar (Kachin), 700–2450 m.

Sources: A.C.L.G. Günther, 1864a, M.A. Smith, 1943, L. Swan & Leviton,1962, Schulz, 1990b, Helfenberger et al., 2000, Schleich & Kästle, 2002, Tiwari & Shah, 2004, Whitaker & Captain, 2004, Agarwal et al., 2010, I. Das, 2010, 2012 and Wangyal, 2011.

2. *Orthriophis hodgsonii* (A.C.L.G. Günther, 1860c). Proc. Zool. Soc. London 28(1): 156, pl. 27. (*Spilotes hodgsonii*)

Type: Lectotype, BMNH 1946.1.6.15, a 1295 mm female (H.R.A. von Schlagintweit, A. von Schlagintweit, & R. von Schlagintweit, 1854–1858), designated by Kramer (1977: 739).

Type locality: "Tsomoriri, Ladak, Tibet" [= Lake Moriri, Ladak, ext. NW India, 32°53'N, 78°21'E, elevation 4635 m] via lectotype selection.

Distribution: Southern Asia. Southwestern China (Sichuan, Xizang), ext. N India (N Bihar, Himachal Pradesh, Jammu Kashmir, Meghalaya, N Punjab, Sikkim, Uttaranchal, N Uttar Pradesh, N West Bengal) and Nepal (Baitadi, Bajhang, Dadeldhura, Dolakha, Dolpa, Jhapa, Ilam, Kaski, Kathmandu, Makwanpur, Palpa, Panchthar, Rasuwa, Solukhumbu), 1000–5000 m.

Sources: M.A. Smith & Battersby, 1953, L. Swan & Leviton, 1962, Kramer, 1977, S.Q. Li, 1983, Zhao & Li, 1985, Schulz, 1986c, 1988j, Nanhoe & Ouboter, 1987, Zhao & Adler, 1993, Schleich & Kästle, 2002, Tiwari & Shah, 2004, Whitaker & Captain, 2004 and S.K. Sharma et al., 2013.

Remarks: Type locality restricted to Nepal *fide* M.A. Smith (1943: 152) but lectotype designation via type locality restriction invalid because two syntypes exist.

3. *Orthriophis moellendorffi* (Boettger, 1886b). Zool. Anz. 9(231): 520–521. (*Cynophis moellendorffi*)

Synonyms: *Elaphis rhombifer* Jan, 1863b and *Elaphe moellendorffii tonkinensis* Bourret, 1934f.

Type: Lectotype, SMF 18476 (formerly SMF-B 8056, 1a), a 1655 mm male (O. Herz, 1886), designated by Mertens (1922: 180).

Type locality: "Nan-ning am Ju-tshang, Prov. Guanghsi" [= Jutshang River near Nanning, S Guangxi Prov., SW China, 22°49'N, 108°22'E, elevation 85 m] via lectotype selection.

Distribution: Southern China (Guangxi, Guangdong, Hainan) and N Vietnam (Bac Kan, Ha Tinh, Hoa Binh, Lang Son, Nghe An, Ninh Binh, Quang Binh, Quang Tai, Son La, Thai Nguyen, Tuyen Quang, Vinh Phuc), 50–500 m.

Sources: Boettger, 1886b, Mell, 1922, 1931a, Bourret, 1936b, Romer, 1953a, Schulz, 1988b, 1989e, Zhao & Adler, 1993, Orlov et al., 2000, Gumprecht, 2004a, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

Remarks: Supplemental original description in Boettger (1888c: 72–74, pl. 1, figs. 1a–e).

4. *Orthriophis taeniurus* (Cope, 1861c). Proc. Acad. Nat. Sci. Philadelphia (1860) 12(12): 565–566. (*Elaphe taeniurus*)

Synonyms: *Coluber nuthalli* Theobald, 1868b, *Elaphis yunnanensis* J. Anderson, 1879, *Elaphis grabowskyi* J.G. Fischer, 1885a, *Coluber schmackeri* Boettger, 1895c, *Coluber taeniurus ridleyi* A. Butler, 1899b, *Coluber vaillanti* Mocquard, 1905a, *Coluber friesi* F. Werner, 1926, *Coluber taeniurus anderssoni* Rendahl, 1937, *Coluber taeniurus pallidus* Rendahl, 1937, *Elaphe formosa* Bellairs, 1969 (*nomen nudum*), and *Elaphe taeniura mocquardi* Schulz, 1996.

Type: Lectotype, ANSP 3840, a 1626 mm male (D.B. McCartee, 1844–1860), designated by Stejneger (1907a: 319).

Type locality: "Ningpo, China" [= Ningbo, NE Zhejiang, E China, 29°52'N, 121°32'E, elevation NSL] via lectotype selection.

Distribution: Eastern Asia and Indonesia. Extreme SE Russia, China (Anhui, Beijing, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hainan, Hebei, Henan, Hubei, Hunan, Jiangsu, Jiangxi, Liaoning, Shaanxi, Shanxi, Sichuan, Tianjin, Yunnan, Xizang,

Zhejiang), ext. S Japan (Ryukyus: Haterumajima, Ikemajima, Irabujima, Ishigakijima, Iriomotejima, Kohamajima, Kurimajima, Kuroshima, Miyakojima, Nakanogamijima, Shimojishima, Taketomijima, Taramajima and Yonagunijima Is.), NE India (Arunachal Pradesh, Sikkim, West Bengal), Bhutan, Myanmar (Chin, Kachin, Tanintharyi), Thailand (Chanthaburi, Chiang Mai, Loei, Pattani, Phetchaburi, Prachin Buri, Prachuap Khiri Khan, Ranong, Trang, Yala), N Laos, N Vietnam (Bac Kan, Cao Bang, Gia Lai, Hai Duong, Ha Tinh, Kon Tum, Lao Cai, Quang Binh, Son La, Thai Nguyen, Thua Thien-Hue, Vinh Phuc), West Malaysia (Johor, Kedah, Pahang, Perak, Perlis, Selangor, Seribuat Arch.: Palau Tioman), Singapore, East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Kalimantan, Sumatra), NSL–3100 m.

Sources: A. Butler, 1899a–b, Mocquard, 1905d, Stejneger, 1907a, Kuntz, 1963, E.H. Taylor, 1965, Bannikov et al., 1977, Tweedie, 1983, M. Mori, 1984, Schulz, 1987a, 1988L–m, Szyndlar & Hung, 1987, Oxtoby, 1988, Stuebing 1991, R. Wang et al., 1991, Zhao & Adler, 1993, David & Vogel, 1996, M.J. Cox et al., 1998, T. Smith, 1998, Chan-ard et al., 1999, Orlov et al., 2000, Ratnikov, 2000, Malkmus et al., 2002, Gumprecht, 2004d, Pauwels et al., 2004, Ratnikov, 2004, Whitaker & Captain, 2004, I. Remarks: Angel (1929: 79) reported two specimens from Laos but they are not mentioned by Saint-Girons, 1972a. Korean and Hong Kong records doubtful *fide* C.H. Pope (1935: 275), Szyndlar & Hung (1987: 38) and Karsen et al*.*, 1998.

OVOPHIS Burger *in* Hoge & Romano-Hoge, 1981a (Viperidae)

Synonyms: *Ovophis* Burger, 1971 (*nomen nudum*), *Oxyus* Hoser, 2012j *(nomen illegitimum), Oviophis* – Yao, 2012 *(nomen incorrectum),* and *Ovophs* – Yao, 2012 *(nomen incorrectum).*

Type species: *Trimeresurus monticola* A.C.L.G. Günther, 1864a.

Distribution: Southeastern Asia.

Sources: Maslin, 1942, C. Haas, 1950, Burger, 1971, Hoge & Romano-Hoge, 1981a, H.M. Smith & Chiszar, 1988, Maes, 1989, Stuebing, 1991, Kraus et al., 1996, David & Ineich, 1999, McDiarmid et al., 1999, Toda et al*.*, 1999, Malhotra & Thorpe, 2000, 2004c, Ziegler et al., 2001, Gumprecht et al., 2004, Castoe & Parkinson, 2006 and Malhotra et al*.*, 2011a.

1. *Ovophis convictus* (Stoliczka, 1870a). Proc. Asiatic Soc. Bengal 1870(2): 108. (*Trimeresurus convictus*)

Type: Holotype, ZSI 3082 (F. Stoliczka, 1866–1870).

Type locality: “Penang” [Malaysia]. Emended to top of Western hill on Pennang, at an elevation of about 2400 feet [= Western Hill, Penang Is., Pinang State, NW West Malaysia, 5°26’N, 100°15’E, elevation 730 m] *fide* Stoliczka (1870d: 225).

Distribution: West Malaysia (Pahang, Pinang, Perak, Penang Is.) and Singapore, 610–1735 m.

Sources: J. Anderson, 1871b, Tweedie, 1941b–c, 1983, E.H. Taylor, 1965, B.L. Lim, 1967, 1991, K.K.P. Lim & Chou, 1990 and I. Das, 1999a, 2010, 2012.

Remarks: Original description reprinted in Stoliczka (1870b: 108) and supplemental original description in Stoliczka (1870d: 224–226, pl. 12, figs. 1–1b). Previously a synonym of *O. monticola*.

2. *Ovophis gracilis* (Ôshima, 1920). Ann. Rep. Inst. Sci. Govern. Formosa 8(2): 10–11, 78–79, pl. 12, figs. 5–6. (*Trimeresurus gracilis*)

Type: Holotype, ISM, a 478 mm specimen (Y. Kikuchi, Oct. 1918), destroyed 31 May 1945 during World War II.

Type locality: “Mt. Noko, Nanto, Central Formosa” [= Nenggao Mt., Nantou Prov., cen. Taiwan, 24°00’N, 121°16’E, elevation 3220 m].

Distribution: Central Taiwan (Chiayi, Nantou), 2000–3535 m.

Sources: Maki, 1931, C. Wang & Wang, 1956, Keegan & Matsui, 1964, Zhao & Adler, 1993, Zhao, 2006, Malhotra et al., 2009 and Xiang & Li, 2009.

Remarks: Generic status uncertain but related to *Ovophis okinavensis fide* Malhotra & Thorpe, 2000, P. Guo et al*.*, 2009b and Malhotra et al., 2009.

3. *Ovophis makazayazaya* (Takahashi, 1922). Jap. Venom. Snakes: [11], pl. 4, 4 figs. (*Trimeresurus makazayazaya*)

Synonyms: *Trimeresurus monticola formosensis* Mell, 1931a and *Trimeresurus orientalis* K.P. Schmidt, 1925b.

Type: Holotype, not designated, a 724 mm female (S. Takahashi, 15 June 1922), location unknown.

Type locality: “Makazayazaya, Formosa” [= vicinity of Beiyè village, Pingtung Co., S Taiwan, 22°43’N, 120°467’E, elevation 1500 m].

Distribution: Eastern Asia. Southeastern China (Anhui, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hong Kong, Hunan, Shaanxi, Sichuan, SE Xizang, Yunnan, Zhejiang), Taiwan and N Vietnam, 500–2200 m.

Sources: Takahashi, 1930, C.H. Pope, 1929, 1935, Maki, 1931, Hu et al., 1980, Lue et al., 1989, Zhang & Zhao, 1990, Zhao, 1995, 2006, Xiang & Li, 2009 and Malhotra et al*.*, 2011a.

Remarks: A valid species *fide* Malhotra et al*.*, 2011a.

4. *Ovophis monticola* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 388, pl. 24, fig. b. (*Trimeresurus monticola*)

Synonyms: *Parias maculata* Gray, 1853 and *Trimeresurus monticola meridionalis* Bourret, 1935d.

Type: Lectotype, BMNH 1946.1.19.91, a 250 mm female (J.D. Hooker, May–Dec. 1849), designated by Iskandar & Colijn (2001: 155).

Type locality: "Sikkim, India" [= Sikkim State, NE India] via lectotype selection.

Distribution: Southeastern Asia and Sumatra. Northeastern India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, North Bengal, Sikkim, Uttaranchal), W China (Gansu, Sichuan, Yunnan), Nepal (Bajhang, Bajura, Bhaktapur, Bhojpur, Dadeldhura, Dolakha, Doti, Ilam, Jumla, Kaski, Kavre, Khotang, Lalitpur, Lamjung, Makwanpur, Manang, Mugu, Mustang, Nuwakot, Panchthar, Rasuwa, Sankhuwasabha, Sindhupalchok, Surkhet, Udayapur), Bhutan, Myanmar (Bago, Chin, Kachin, Sagaing, Shan, Tanintharyi), N Thailand (Chumporn), S Laos (Champasak, Xe Kong), ext. NE or SW Cambodia, Vietnam (Binh Tri Thien, Hoang Lien Son, Lam Dong, Quang Nam-Da Nang, Vinh Phu), 500–3000 m.

Sources: Stoliczka, 1871, Steindachner, 1906, Wall, 1911k, 1925a, 1926b, 1928, Bourret, 1936b, Tweedie, 1941b–c, 1983, M.A. Smith, 1943, E.H. Taylor, 1965, Campden-Main, 1970a, Deuve, 1970, Saint-Girons, 1972a, Fleming & Fleming, 1978, Kramer, 1977, B.Q. Feng, 1986, Iskandar, 1986, Tien et al., 1986, Lue, 1987, 1990, Nanhoe & Ouboter, 1987, Inger et al., 1990, Zhang & Tang, 1990, M.J. Cox, 1991b, Lim & Chou, 1990, David & Vogel, 1996, David & Tong, 1997, Chan-ard et al., 1999, Leviton et al., 2003, Ao et al., 2004, Tiwari & Shah, 2004, Whitaker & Captain, 2004, P. Guo et al., 2006a, B.L. Stuart & Heatwole, 2008, M.F. Ahmed et al., 2009, I. Das, 2010, 2012, Malhotra et al., 2011a, Yao, 2012 and S.K. Sharma et al., 2013.

Remarks: Original description based on Gray (1853: 392). Type locality restriction of Nepal *fide* M.A. Smith (1943: 508) invalid, as well as Kramer's (1977: 757) designation of BMNH 1946.1.18.76 (a 533 mm female from Nepal) as syntype *fide* McDiarmid et al. (1999: 318).

5. *Ovophis okinavensis* (Boulenger, 1892b). Ann. Mag. Nat. Hist. (6) 10(58): 302. (*Trimeresurus okinavensis*)

Types: Syntypes (2), BMNH 1946.1.18.69–70 (formerly BMNH 1892.9.3.17–18), two females, longest syntype 350 mm (P.A. Holst, 1889–1892).

Type locality: "Okinawa or Great Loo Choo, the Loo Choo Islands" [= Okinawashima, Ryukyu Islands, S Japan].

Distribution: Extreme S Japan (Ryukyus: Akajima, Amamioshima, Amurojima, Fukajijima, Gishifujima, Gushikawajima, Gusukujima, Hatejima, Iejima, Iheyajima, Izenajima, Kakeromajima, Kerumajima, Kubajima, Kumejima, Kuroshima, Maejima, Nakajima, Nohojima, Okinawajima, Takashikijima, Tonakijima, Tokunoshima, Ukejima, Yakabijima, Yaguchijima, Yanahajima, Yorojima and Zamamijima Is.).

Sources: Wall, 1905f, Stejneger, 1907, Takahashi, 1922, 1930, Maki, 1931, Keegan, 1958, Koba, 1958, 960, 1961, 1963, 1968, Nakamura & Uéno, 1962, Takara, 1962, Koba et al., 1970, Koba & Tanaka, 1973, M. Moriu, 1982 and Malhotra et al., 2009, 2011a.

Remarks: Taxonomic status uncertain *fide* Malhotra et al. (2009: 117, 118). New genus description for this species and *Trimeresurus gracilis* in progress *fide* Malhotra et al., 2010.

6. *Ovophis tonkinensis* (Bourret, 1934a). Bull. Gen. Inst. Pub. Hanoi 13(7): 138. (*Trimeresurus tonkinensis*)

Type: Holotype, M.261, a 183 mm specimen (R. Bourret, 1930–1931).

Type locality: "Chapa., province de Laokay (Tonkin), l'Indochine française, à l'altitude moyenne de 1.600m" [= Sa Pa, Sa Pa Distr., W Lao Cai Prov., ext. N Vietnam, 22°20'N, 103°51'E, elevation 1600 m].

Distribution: Southern China (Guangdong, Guangxi, Hainan) and N Vietnam (Lao Cai, Gia Lai), 900–1600 m.

Sources: David, 1995, Orlov, 1997, Orlov et al., 2000, Gumprecht et al., 2004 and I. Das, 2010, 2012.

Remarks: Supplemental original description in Bourret (1934b: 154–155, fig. 2). A valid species *fide* Hoge & Romano-Hoge, 1981a, Golay et al., 1993 and Gumprecht et al., 2004. A synonym of *O. monticola* *fide* McDiarmid et al. (1999: 319) and a subspecies of *O. monticola* *fide* Orlov (1997: 69). Hoge & Romano-Hoge (1981: 264) restricted type locality to Chapa, Tonkin.

7. *Ovophis zayuensis* (Jiang *in* Zhao & Jiang, 1977). Acta Zool. Sinica 23(1): 67, 69, 71, figs. 1–3. (*Trimeresurus monticola zayüensis*)

Synonyms: *Ovophis monticola zhaokentangi* Zhao, 1995 and *Trimeresurus zaynensis* – Orlov & Helfenberger, 1997 *(nomen incorrectum).*

Type: Holotype, CIB 73-I-5024 (formerly SBRI), adult male (Sichuan Biol. Res. Inst., 22 July 1973).

Type locality: "Zayü Xian, Xizang Autonomous Region, China, 1,800 m."

Distribution: Northeastern India, Myanmar and SW China (Xizang, Yunnan), 1400–2070 m.

Sources: Zhao, 1995 and P. Guo et al., 2006a.

Remarks: A valid species *fide* Zhao (1995: 37) and Malhotra et al., 2011a.

OXYBELIS Wagler, 1830 (Colubridae)

Synonyms: *Dryinus* Wagler *in* Spix, 1824, *Oxibelis* A.-M.-C. Duméril & Bibron, 1844 *(nomen emendatum), Plastor* Gistel, 1848 *(nomen substitutum), Oxibelis* – Velasco, 1890a *(nomen incorrectum), Oxibilis* – Velasco, 1892b *(nomen incorrectum), Oxybelus* A.L. Herrera, 1899 *(nomen emendatum), Oxybaelis* – Nopcsa, 1923 *(nomen incorrectum), Oxybelius* – Kempff-Mercado, 1975 *(nomen incorrectum), Oxybellis* – J.D. Johnson, Ely & Webb, 1976 *(nomen incorrectum),* and *Oxibelys* – Medem, 1979 *(nomen incorrectum).*

Type species: *Dryinus aeneus* Wagler *in* Spix, 1824.

Distribution: Extreme SW USA and Latin America.

Sources: E.H. Taylor, 1951, 1954, Keiser *in* J.A. Peters & Orejas-Miranda, 1970, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, 1991, Keiser, 1991 and Vidal et al., 2000.

1. *Oxybelis aeneus* (Wagler *in* Spix, 1824). Serp. Brasil. Sp. Nov.: 12–14, pl. 3. (*Dryinus aeneus*)

Synonyms: *Coluber acuminatus* Wied-Neuwied, 1824b, *Dryinus auratus* T. Bell, 1825, *Dryophis vittatus* Girard, 1854, *Oxybelis microphthalmus* T. Barbour & Amaral, 1926, and *Oxybelis potosiensis* E.H. Taylor, 1942a.

Type: Lectotype, ZSM 2645/0, a 1214 mm female (J.B. von Spix, Nov.–Dec. 1819), designated by Hoogmoed & Gruber (1983: 326).

Type locality: "sylvis adjacentibus flumini Solimöens, prope Ega" [= forest bordering the Solimöens or Río Amazonas near Tefé (3°19'S, 64°43'W, elevation 50 m), cen. Amazonas State, NW Brazil].

Distribution: Latin America. Extreme SW USA (ext. S Arizona), Mexico (Aguascalientes, Campeche, Chiapas, SW Chihuahua, Colima, W Durango, Guerrero, Hidalgo, Jalisco, México, Michoacán, Morelos, Nayarit, S Nuevo León, Oaxaca, Puebla, Querétaro, Quintana Roo, SE San Luis Potosí, Sinaloa, Sonora, Tabasco, S Tamaulipas, Veracruz, Yucatán, S Zacatecas, Blanca, María Cleofas, María Madre and María Magdalena Is.), Belize (Belize, Cayo, Orange Walk, Stann Creek, Toledo), Guatemala (Alta Verapaz, Petén), Honduras (Atlántida, Choluteca. Colón, Comayagua, Copán, Cortés, El Paraíso, Francisco Morazán, Gracios a Dios, Intibucá, Islas de la Bahía, Lempira, Olancho, Santa Bárbara, Valle, Yoro, Barbareta, Elena, Guanaja, Roatán and Utila Is.), El Salvador (Ahuachapán, Chalatenango, Cuscatlán, La Libertad, La Paz, Morazán, San Salvador, Usulután, Los Blancos Is.), Nicaragua (Atlántico Sur, Boaco, Chinandega, Grenada, Managua, Matagalpa, Río San Juan, Rivas, Zelaya, Corn, Great Corn and Ometepe Is.), Costa Rica (Alajueta, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Canal Zone, Coclé, Colón, Darién, Herrera, Los Santos; Panamá, Barro Colorado, Pedro González, Naranjas, Saboga, San Miguel and Taboga Is.), Colombia (Antioquia, Atlántico, Bolívar, Boyacá, Cauca, Cesar, Chocó, Cundinamarca, La Guajira, Magdalena, Risaralda, Santander, Tolima, Valle, Vaupés, Gorgona Is.), Venezuela (Amazonas, Anzoátegui, Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Nueva Esparta, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy, Vargas, Zulia, Margarita and Los Testigos Is.), Trinidad and Tobago (Huevos, Tobago, Trinidad), Netherland Antilles (Aruba), Guyana (Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Takutu-Upper Essequibo), Suriname (Para, Paramaribo, Suriname), French Guiana (Cayenne, Saint-Laurent-du-Maroni), Brazil (Acre, Alagoas, Amazonas, Amapá, Bahia, Ceará, Distrito Federal, Espírito Santo, Goiás, Maranhao, Mato Grosso, Minas Gerais, Pará, Pernambuco, Rio de Janeiro, Rio Grande do Norte, Rondônia, Roraima, Tocantins), Ecuador (Azuay, Esmeraldas, Guayas, Imbabura, Loja, Manabí: Plata Is.), E Peru (Ancash, Loreto, Madre de Dios) and E Bolivia (Beni, Santa Cruz), NSL–1915 [2750] m.

Sources: Beebe, 1919, 1946, Mole, 1924, H.W. Parker, 1935, Brongersma, 1940, E.H. Taylor, 1942a, Bogert & Oliver, 1945, H.M. Smith & Taylor, 1945, Cochran, 1946, Mertens, 1952c, Hoge, 1953b, 1967, Duellman, 1961, L.C. Stuart, 1963, Fowlie, 1965, Busack, 1966, Roze, 1966a, Boos & Quesnel, 1968, L.M. Hardy & McDiarmid, 1969, Keiser, 1974, 1982, R.W. Henderson & Hoevers, 1975, Emsley, 1977, Cunha & Nascimento, 1978, 1980, 1993, Hoge et al., 1978, J.C. Lee, 1980, 1996, Vanzolini et al., 1980, Abuys, 1985a, L.D. Wilson & Meyer, 1985, Vanzolini, 1986a, Chippaux, 1987, Duellman & Salas, 1991, Flores-Villela et al., 1991, Pérez-Higareda & Smith, 1991, N.J. Silva, 1993, Van Devender et al., 1994, J.A. Campbell, 1998b, Starace, 1998, Vazquez-Diaz et al., 1998, G. Köhler, 1999b, Lehr & Aguilar, 2000a, Nogueira, 2001, Savage, 2002, Hernandez, 2004, Duellman, 2005, G. Köhler et al., 2005, McCranie et al., 2006, Cisneros-Heredia & Touzet, 2007, Navarrete et al., 2009, Ugueto & Rivas, 2010, McCranie, 2011a and C.J. Cole et al., 2013.

Remarks: Holotype erroneously listed as specimen from ZMB 2376–2384 *fide* Wermuth *in* L.C. Stuart (1963: 108). Keiser (1974: 9) listed ZSMH 2645/0 as the holotype. Trinidad and Tobago record (Huevos Is.) needs confirmation *fide* Boos (1983b: 21). See Franzen & Glaw (2007: 250) for type data and a figure of head.

2. *Oxybelis brevirostris* (Cope, 1861c). Proc. Acad. Nat. Sci. Philadelphia (1860) 12(12): 555–556. (*Dryophis brevirostris*)

Synonym: *Oxybelis coerulescens* Jan, 1863b.

Type: Holotype, USNM 31349 (formerly ANSP), a 1028 mm specimen (R.W. Mitchell, 1857–1860).

Type locality: "Veraguas, New Grenada" [= Cocuyos de Veraguas, a gold mine near the Río Concepción, N Veraguas Province, cen. Panama, ca. 8°45'N, 81°00'W, elevation 100 m].

Distribution: Lower Central America and ext. NW South America. Eastern Honduras (Colón, Gracias a Dios, Olancho), E Nicaragua (Atlántico Norte, Chontales, Jinotega, Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, ? San José), Panama (Veraguas), W Colombia (Cauca, Chocó, Nariño, Risaralda, Valle, Gorgona Is.) and W Ecuador (Azuay, El Oro, Esmeraldas, Guayas, Los Ríos, Pichincha), NSL–2500 m.

Sources: E.H. Taylor, 1951, 1954, Medem, 1979, Miyata, 1980, N.J. Scott et al., 1983, L.D. Wilson & Meyer, 1985, Savage & Villa, 1986, G. Köhler, 1999b, Savage, 2002, McCranie et al., 2006, Cisneros-Heredia & Touzet, 2007, McCranie, 2011a and Travers et al., 2011.

3. *Oxybelis fulgidus* (Daudin, 1803c). Hist. Nat. Rept. 6: 352–354, pl. 80. (*Coluber fulgidus*)

Synonym: *Dryiophis catesbyi* Schlegel, 1837.

Type: Holotype, MNHN, a 1524 mm specimen (H. Ruiz-López, June 1784–Aug. 1786 via Velasques via Polony).

Type locality: "Saint-Domingue, dans les environs du Port-au-Prince," (in error *fide* Roze, 1966a: 192). Corrected to Río Santo Domingo, headwaters of Río Urubamba at old Muña, near Cusco, Cusco Dept., SE Peru, 13°36'S, 71°50'W, elevation 3150 m *fide* Wetherbee (1986b: 7). Suggested as Suriname *fide* K.P.Schmidt (1941: 506). Restricted to Chichén Itzá, Yucatán, Mexico *fide* H.M. Smith & Taylor (1950a: 352).

Distribution: Southern Mexico, Central America and N South America. Southeastern Mexico (Campeche, Oaxaca, Quintana Roo, Yucatán), Belize (Belize, Cayo, Corozal, Orange Walk, Stann Creek, Toledo), N Guatemala (Alta Verapaz, Petén), El Salvador (Cuscatlán, La Libertad, San Miguel, San Salvador, Santa Ana, San Vicente), Honduras (Choluteca, Colón, Cortés, Francisco Morazán, Gracias a Dios, Islas de la Bahía, Olancho, Yoro, Elena and Utila is.), W Nicaragua (Chinandega, Chontales, Granada, León, Managua, Masaya, Río San Juan, Ometepe Is.), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas), Panama (Canal Zone, Coclé, Colón, Herrera, Panamá, Barro Colorado Is.), S Colombia (Amazonas, Caquetá), E Venezuela (Amazonas, Anzoátegui, Bolívar, Delta Amacuro, Monagas, Sucre, Zulia, Patos Is.), Guyana (Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Demerara-Berbice, Upper Takutu-Upper Essequiba), Suriname (Nickerie, Para), French Guiana (Cayenne Saint-Laurent-du-Maroni), Ecuador (Los Ríos, Morona-Santiago, Napo, Pastaza), E Peru (Cusco, Loreto, Madre a Dios), N Brazil (Amapá, Amazonas, Maranhão, Mato Grosso, Pará, Rondônia) and NE Bolivia (Beni), NSL–1600 (3150) m.

Sources: H.W. Parker, 1935, Beebe, 1946, L.C. Stuart, 1948, 1963, Roze, 1966a, Hoge, 1967, R.W. Henderson & Hoevers, 1975, Cunha & Nascimento, 1978, Hoge et al., 1978, J.C. Lee, 1980, Boos, 1983b, Abuys, 1985a, L.D. Wilson & Meyer, 1985, Dixon & Soini, 1986, Lancini, 1986, Vanzolini, 1986b, Chippaux, 1987, Duellman & Salas, 1991, J.A. Campbell, 1998b, Starace, 1998, Strussmann & André de Carvalho, 1998, G. Köhler, 1999b, T. Barros-Blanco & Pirela, 2000, Mijares-Urrutia & Arends, 2000, Stafford & Meyer, 2000, Savage, 2002, Solórzano, 2004, G. Köhler et al., 2005, Cisneros-Heredia & Touzet, 2007, Navarrete et al., 2009, McCranie, 2011a and C.J. Cole et al., 2013.

Remarks: Wetherbee (1986b: 15) has shown that the type was probably sent to Velasques in Mexico via Dr. Polony of Santo Domingo to Daudin in France.

4. *Oxybelis wilsoni* Villa & McCranie, 1995. Rev. Biol. Trop. 43(1–3): 297–303, figs. 1a–c.

Type: Holotype, USNM 318010, a 1982 mm male (J. R. McCranie, 20 Nov. 1989), lost *fide* McCranie (1999: 11).

Type locality: "Rocky Point, Santa Elena on the eastern end of Isla de Roatán, Departamento de Islas de la Bahía, Honduras."

Distribution: Northern Honduras (Islas de Bahía: Roatán), NSL–90 m.

Sources: Keiser, 1969, Groves, 1995, McCranie, 1999, 2011, Savage, 2002 and McCranie et al., 2005.

Remarks: McCranie (1999: 11–12) indicated that the types (holotype and paratypes) are presently lost.

OXYRHABDIUM Boulenger, 1893a (*nomen substitutum*) (Xenodermatidae)

Synonyms: *Stenognathus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen praeoccupatum), Stegognathus* – Hoffmann, 1890 *(nomen incorrectum),* and *Oxyrhabdinium* – W.W. Tanner & Avery, 1982 *(nomen incorrectum).*

Type species: *Stenognathus modestus* A.-M.-C. Duméril, Bibron & Duméril, 1854a.

Distribution: Philippines.

Sources: Boulenger, 1893a, E.H. Taylor, 1922a, Leviton, 1957, 1965a, Vidal et al., 2008 and Kelly et al., 2009.

1. *Oxyrhabdium leporinum* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 12. (*Rhabdosoma leporinum*)

Synonyms: *Stenognathus brevirostris* W.C.H. Peters, 1872b and *Oxyrhabdium leporinum visayanum* Leviton, 1957.

Type: Holotype, BMNH 1946.1.13.98, a 711 mm female (H. Cuming, 1836–1840).

Type locality: "Philippine Islands."
Distribution: Philippines (Cebu, Luzon, Negros), 450–2000 m.
Remarks: A.C.L.G. Günther's type series was composite; one of the two syntypes was *Oxyrhabdium modestum*, so BMNH 1946.1.13.98 is the holotype. Probably occurs on Panay *fide* Leviton (1957: 289). *Oxyrhabdium visayanum* a valid species *fide* R. Crombie (pers. comm.).

2. *Oxyrhabdium modestum* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 504–506. (*Stenognathus modestus*)

Synonym: *Geophis schadenbergi* J.G. Fischer, 1885b.
Types: Syntypes (2), MNHN 7301a–b, longest syntype 433 mm.
Type locality: "Java" [W Indonesia] (in error *fide* W.C.H. Peters, 1872b: 587, A.C.L.G. Günther, 1873b: 169, and E.H. Taylor, 1922a: 100). Designated as Mindanao Island, southern Philippines *fide* Leviton (1957: 291).
Distribution: Southern Philippines (Basilan, Bohol, Dinagat, Leyte, Mindanao, Negros, Samar), NSL–1920 m.
Remarks: Negros, Luzon and Calamines records doubtful *fide* Leviton (1965a: 411).

OXYRHOPUS Wagler, 1830 (Xenodontidae)

Synonyms: *Oxyrrhopus* Fitzinger, 1843 *(nomen emendatum), Sphenocephalus* Wiegmann *in* Fitzinger, 1843, *Oxyropus* Gervais *in* d'Orbigny, 1847 *(nomen emendatum), Otyrrhopus* – Sumichrast, 1880 *(nomen incorrectum), Oxyrophus* – Hoffmann, 1890 *(nomen incorrectum), Oxirhopus* – Brazil, 1911 *(nomen incorrectum), Erythroxyrhopus* J.C. Thompson, 1913b, *Erythroxirhopus* – Briceño-Rossi, 1934 *(nomen incorrectum), Oxiropus* – Briceño-Rossi, 1934 *(nomen incorrectum), Oxyrhophus* – Neill & Allen, 1959 *(nomen incorrectum),* and *Oxirhopus* – J.D. Williams, 1983 *(nomen incorrectum).*
Type species: *Coluber petolarius* Linnaeus, 1758.
Distribution: Latin America.
Sources: F. Werner, 1924c, Bailey *in* J.A. Peters & Orejas-Miranda, 1970, Cadle, 1984a, Zaher, 1996, Vidal et al., 2000 and Zaher et al., 2009.
Remarks: Several undescribed species exist *fide* Bailey *in* J.A. Peters & Orejas-Miranda (1970: 229) and Henle & Ehrl (1991: 166).

1. *Oxyrhopus clathratus* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 1026–1028.

Synonyms: *Oxyrhopus doliatus viperina* F. Werner, 1903b and *Clelia clathrata pulcherrima* L. Müller, 1923.
Type: Lectotype, MNHN 3791, a 944–945 mm specimen (F.L.N.C.L.de Castelnau, June 1843–Aug. 1847), designated by Bernardo et al. (2012: 139).
Type locality: "Brazil" via lectotype selection.
Distribution: Southeastern Brazil (Bahia, Espírito Santo, S Minas Gerais, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo, Cananéia, Cardoso, Grande, São Sebastião and São Vicente Is.) and ext. NE Argentina (Misiones), 60–930 m.
Sources: J.D. Williams & Francini, 1991, Cei, 1994, Giraudo, 1999, Argôlo, 2001a, Duarte-Rocha & Van Sluys, 2006, Cicchi et al., 2007, Medeiros et al., 2010 and Bernardo et al., 2012.
Remarks: Photographs of lectotype in Bernardo et al. (2012: figs. 4a–e).

2. *Oxyrhopus doliatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 1020–1022.

Synonyms: *Oxyrrhopus doliatus* A.-M.-C. Duméril, 1853 *(nomen nudum)* and *Oxyrhopus venezuelanus* Shreve, 1947.
Type: Holotype, MNHN 325, a 566 mm female (Joly).
Type locality: "trés-probablement originaire du Brésil" [= very probably Brazil] (in error *fide* J.A. Peters & Orejas-Miranda, 1970: 231).
Distribution: Northern Venezuela (Aragua, Carabobo, Distrito Federal, Falcón, Lara, Mérida, Miranda, Trujillo, Yaracuy), NSL–300 [1220] m.
Sources: Zaher & Caramaschi, 1993, Reynolds et al., 1997, Rivas-Fuenmayor, 2002 and Navarrete et al., 2009.
Remarks: J.A. Peters & Orejas-Miranda (1970: 231) reported it known only from Cusco, Peru.

O

3. *Oxyrhopus erdisii* (T. Barbour, 1913a). Proc. Acad. Sci. Philadelphia 65(3): 506, pl. 17, figs. 3–4. (*Drepanodon erdisii*)

Type: Holotype, MCZ 8829, a 497 mm female (G.F. Eaton & E.C. Erdis, 1912).
Type locality: "Machu Pichu, 9,000–10,000 feet altitude, Department of Cusco, Southern Peru." Elevation emended to 9,500 feet *fide* Barbour & Loveridge (1929: 254).
Distribution: Eastern Peru (Cusco, Madre de Dios), 2750–3050 m.
Source: Zaher & Caramaschi, 1993.

4. *Oxyrhopus fitzingeri* (Tschudi, 1845). Arch. Naturg. 11(1): 165. (*Siphlophis fitzingeri*)

Synonym: *Oxyrhopus fitzingeri frizzelli* K.P. Schmidt & Walker, 1943b.
Type: Lectotype, MHNN 13 (formerly MZN 99), a 760 mm female (J.J. von Tschudi, Aug. 1838–Feb. 1841), designated by Schätti (1986a: 102).

Type locality: "Champs de cannes ("Rohrfelder") bordent les fleuves des régions côtières [du Pérou]" [= marshes bordering the rivers of coastal Peru] via lectotype selection.

Distribution: Southwestern Ecuador (Guayas, Loja) and NW Peru (N Ancash, La Libertad, Lambayeque, Lima, Piura), 300–1830 m.

Sources: Tschudi, 1846, Jan & Sordelli, 1870–1881, K.P.Schmidt & Walker, 1943b, J.A. Peters, 1960a, Miyata, 1982 and Pérez-Santos & Moreno, 1991.

Remarks: Original description reprinted in Tschudi (1846: 56–57, pl. 8).

5. *Oxyrhopus formosus* (Wied-Neuwied, 1820a). Reise Brasil. 1: 381–386. (*Coluber formosus*)

Synonyms: *Oxyrhopus leucocephalus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrhopus labialis* Jan, 1863b, *Oxyrhopus submarginatus* W.C.H. Peters, 1871a, *Clelia peruviana* L.E. Griffin, 1916, and *Oxyrhopus iridescens* F. Werner, 1927.

Type: Holotype, not designated, a 380 mm specimen (A.M.P. zu Wied-Neuwied, 2 Jan.–12 Apr. 1815), location unknown.

Type locality: "den grossen Waldungen fand, die der Fluss Mucuri durchströmt" [= dense woodland bordering the Mucuri River]. Emended to "Diese unvergleichlich schöne Natter wurde an der Ufern des Mucuri von den Indianern, welche diesen Fluss beschifften, getödtet, als ich mich zu Morro d'Arara an der Lagoa dieses Namens aufhielt" *fide* Wied-Neuwied (1825c: 385) [= Morro d'Arara, 30 km above mouth of Río Mucuri, ext. S Bahia, SE Brazil, 17°32'S, 39°35'W].

Distribution: Northern South America. Colombia (Córdoba, Santander), SE Venezuela (Amazonas, Bolívar), Brazil (Acre, Amazonas, Bahia, Maranhão, Pará, Rondônia), E Ecuador (Napo, Pastaza), Peru (Huanuco, Junín, Loreto [LSUMZ 14598, 26846], Madre de Dios, Piura) and Bolivia, 200–1000 m.

Sources: Wied-Neuwied, 1822 *in* 1822–1831, L.E. Griffin, 1916, Cunha & Nascimento, 1978, 1983a, 1993, Duellman, 1978, Gasc & Rodrigues, 1980, Abuys, 1985a, Pérez-Santos, 1986, Chippaux, 1987, Pérez-Santos & Moreno, 1988, 1991, Duellman & Salas, 1991, N.J. Silva, 1993, Starace, 1998, Mattei & Barrio-Amorgós, 1999, Duellman, 2005, Lynch, 2009, MacCulloch et al., 2009, Navarrete et al., 2009, Carvajal-Cogollo et al., 2011c and Uetz et al., 2011.

Remarks: Wied-Neuwied was staying at Morro d'Arara, a village near the Mucuri River in S Bahia, when he collected the type. Lake Arara, in Amazonas State (3°26'S, 61°22'W), is not the type locality.

O

6. *Oxyrhopus guibei* Hoge & Romano-Hoge, 1978. Mem. Inst. Butantan (1977) 40–41: 58, figs. 3, 5, 7. (*Oxyrhopus trigeminus guibei*)

Type: Holotype, IB 27382, an 1175 mm female (native, 3 July 1967), destroyed by fire 15 May 2010.

Type locality: "Londrina, state of Paraná, Brazil" [= Londrina, N Paraná State, SE Brazil, 23°18'S, 51°09'W].

Distribution: Southeastern South America. Eastern Bolivia (Beni, Cochabamba, Santa Cruz), S Brazil (Alagoas, Bahia, S Goiás, S Mato Grosso, Mato Grosso do Sul, Minas Gerais, Paraná. Rio de Janeiro, São Paulo, Tocantins), S Paraguay (Alto Paraguay, Alto Paraná, Amambay, Canindeyú, Central, Itapúa, Misiones, Neembucú, Paraguarí) and NE Argentina (Chaco, Corrientes, Formosa, Misiones), NSL–1000 m.

Sources: Zaher & Caramaschi, 1993, Yanosky et al., 1996, Freire, 1999b, Giraudo & Scrocchi, 2002, Cacciali, 2008 and Lima-Silveira, 2008.

Remarks: Possibly occurs in NW Brazil (Acre, Amazonas) and E Peru (Loreto) *fide* Zaher & Caramaschi (1993: 825).

7. *Oxyrhopus leucomelas* (F. Werner, 1916). Zool. Anz. 47(11): 310. (*Tropidodipsas leucomelas*)

Type: Holotype, LMB, a 240 mm female (A.H. Fassl, Jan.–March 1910).

Type locality: "Coñon del Tolima, 1700 m (Central-cordilleren), der Anden von Kolumbien" [= Tolima Canyon, 1700 m, above Ibagué (4°27'N, 75°14'W) in Cordillera Central of Andes, Tolima Dept., cen. Colombia].

Distribution: Northwestern South America. Colombia (Antioquia, Boyacá, Cauca, Huila, Magdalena, Meta, Norte de Santander, Nariño, Risaralda, Tolima, Valle del Cauca), Venezuela (Tochira), E Ecuador (Napo, Tungurahua) and Peru (Ayachuco [LSUMZ 26873], Huánuco), 1000–3050 m.

Sources: Downs, 1961, J.A. Peters, 1960a, Medem, 1965, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, 1991, Henle & Ehrl, 1991, Lynch, 2009 and Calcaño & Barrio-Amorós, 2010.

8. *Oxyrhopus marcapatae* (Boulenger, 1902d). Ann. Mag. Nat. Hist. (7) 10(59): 401–402. (*Homalocranium marcapatae*)

Synonym: *Drepanodon eatoni* Ruthven *in* T. Barbour, 1913a.

Type: Holotype, BMNH 1946.1.8.72, a 390 mm female (G.R. Ockenden, 1902).

Type locality: "Marcapata Valley, Andes of E. Peru" [= Cusco Dept., SE Peru].

Distribution: Southeastern Peru (Cusco), 1830–2745 m.

Source: T. Barbour, 1913a.

9. *Oxyrhopus melanogenys* (Tschudi, 1845). Arch. Naturg. 11(1): 163. (*Sphenocephalus melanogenys*)

Synonyms: *Tachymenis bitorquata* A.C.L.G. Günther, 1872b and *Oxyrhopus melanogenys orientalis* Cunha & Nascimento, 1983a.

Type: Lectotype, MHNN 14 (formerly MZN 99) [longest syntype 755 mm], (J.J. von Tschudi, Aug. 1838–Feb. 1841), designated by Schätti (1986a: 102),

Type locality: "Republica Peruana" [= Peru]. Emended to "den Urwäldern des Chanchamayogebietes" *fide* Tschudi (1846: 49). Further emended to "dans les forêts vierges de la région de Chanchamayo (Pérou)" [= virgin forests of the Chanchamayo region, Peru] *fide* Schätti (1986a: 102).

Distribution: Amazonia. Southeastern Venezuela (Amazonas, Bolívar), E Ecuador (Morona-Santiago, Napo, Pastaza), Guyana (Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Demerara-Berbice), French Guiana (Cayenne, Saint-Laurent-du-Maroni), E Peru (Amazonas, Cajamarca, Huánuco, Junín, Loreto, Madre de Dios, San Martin), N Brazil (Acre, Amazonas, Bahia, Ceará, Maranhão, Mato Grosso, Pará, Rondônia, Roraima) and N Bolivia (Beni, La Paz), NSL–1200 m.

Sources: Tschudi, 1846, Amaral, 1937c, J.A. Peters, 1960a, Duellman, 1978, Dixon & Soini, 1986, Cunha & Nascimento, 1978, 1983a, 1993, Pérez-Santos, 1986, Nascimento et al., 1987, 1988, Pérez-Santos & Moreno, 1988, 1991, Henle & Ehrl, 1991, N.J. Silva, 1993, Zaher & Caramaschi, 1993, Starace, 1998, Frota, 2000b, Duellman, 2005, Means & Kalamandeen, 2007, Loebmann & Roberto, 2009, Lynch, 2009, MacCulloch et al., 2009, Navarrete et al., 2009, Rivas-Fuenmayor et al., 2012 and C.J. Cole et al., 2013.

Remarks: Supplemental original description in Tschudi (1845: 49, pl. 4). Pérez-Santos & Moreno (1988: 262) cited a specimen from Santander, Colombia.

10. *Oxyrhopus occipitalis* (Wagler *in* Spix, 1824). Serp. Brasil. Sp. Nov.: 21–23, pl. 6, fig. 2. (*Natrix occipitalis*)

Synonym: *Oxyrhopus occipitalis* Jan, 1863b *(nomen praeoccupatum).*

Type: Lectotype, ZSM 2053/0, a 746 mm male (J.B. von Spix, Dec. 1819–Jan. 1820), designated by Hoogmoed & Gruber (1983: 328).

Type locality: "ad flumen Solimöens" [= Río Solimões or upper Amazon River, bet. mouth of Río Negro and Peruvian border, Amazonas State, NW Brazil].

Distribution: Amazonia. Eastern Colombia (Amazonas, Boyacá, Meta, Nariño, Norte de Santander, Putumayo, Santander, Vaupés), S Venezuela (Amazonas, Bolívar), Guyana (Demerara-Mahaica, Potaro-Siparuni, Upper Demerara-Berbice), Suriname, French Guiana (Cayenne, Saint-Laurent-du Maroni), W Brazil (Amapá, Amazonas, Rondônia), E Ecuador, and NE Peru, 100–1050 m.

Sources: Hoge et al., 1973, Vanzolini, 1986b, N.J. Silva, 1993, Franzen & Glaw, 2007, Lynch, 2009, MacCulloch et al., 2009 and C.J. Cole et al., 2013.

11. *Oxyrhopus petolarius* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 225. (*Coluber petolarius*)

Synonyms: *Coluber petola* Linnaeus, 1758, *Coluber pethola* Linnaeus, 1766, *Coluber petalarius* Linnaeus, 1766, *Coronella cerastoides* Laurenti, 1768, *Coronella fasciata* Laurenti, 1768, *Coluber zebra* Bonnaterre, 1790, ? *Coluber aurantiacus* Gravenhorst, 1807, *Coluber digitalis* A. Reuss, 1834, *Lycodon semifasciatus* Tschudi, 1845, *Colubrinus hydrus* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(lapsus calami), Oxyrhopus bi-prae-ocularis* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen incorrigendum), Oxyrhopus immaculatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrhopus multifasciatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrhopus sebae* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrhopus spadiceus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrrhopus doliatus semicinctus* Cope, 1887c, *Oxyrhopus bipraeocularis* Boulenger, 1896a *(nomen corrigendum), Oxyrrhopus intermedius* F. Werner, 1899c, *Oxyrhopus doliatus aequifasciata* F. Werner, 1909b, ? *Tarbophis splendidus* Ahl, 1924a, *Clelia cornelii* L. Müller, 1928, *Drepanpdon alternatus* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Clelia baileyi* H.M. Smith, 1942.

Types: Syntypes (8), ZMUU 8 (C. Gyllenborg, 1744), ZMUU 45 (MP, 1745), ZMUU 151 (JA, 1749), NHR Lin-73 (formerly MAFR), an 845 mm specimen (Mus. Drottn.), NHR Lin-74 (formerly MAFR), a 490 mm specimen (Mus. Drottn.), and NHR Lin-75 (formerly MAFR), 740 mm, 450 mm and 410 mm specimens (Mus. Drottn.).

Type locality: "Africa," (in error *fide* Roze, 1966a: 195).

Distribution: Latin America. Southeastern Mexico (Chiapas, Oaxaca, Puebla, S Veracruz), SW Belize (Belize, Cayo), N Guatemala (Alta Verapaz, Petén), N Honduras (Atlántida, Colón, Cortés, Gracias a Dios, Olancho), W El Salvador (Santa Ana), E Nicaragua (Atlántico Norte, Atlántico Sur, Chontales, Jinotega, Matagalpa, Nueva Segovia, Rio San Juan), Costa Rica (Alajuela, Cartago, Heredia, Limón, Puntarenas, San José), Panama (Canal Zone, Coclé, Colón, Darién, Herrera, Panamá, Veraguas, Barro Colorado Is.), Colombia (Amazonas, Antioquia, Atlántico, Bolívar, Boyacá, Caldas, Caquetá, Cauca, Chocó, Córdoba, Cundinamarca, Huila, Magdalena, Meta, Nariño, Norte de Santander, Putumayo, Risaralda, Santander, Tolima, Valle, Vaupés), Venezuela (Amazonas, Anzoátegui, Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy, Vargas, Zulia), Trinidad and Tobago (Trinidad), Guyana (Barima-Waini, Essequibo

Islands-West Demerara, Upper Demerara-Berbice), Suriname (Nickerie, Para, Paramanca, Paramaribo), French Guiana (Cayenne, Saint-Laurent-du-Maroni), Ecuador (Carchi, Guayas, Imbabura, Los Ríos, Manabí, Morona-Santiago, Napo, Pastaza, Pichincha, Zamora-Chinchipe), E Peru (Amazonas, Loreto, Madre de Dios, Pasco), Brazil (Amapá, Amazonas, Bahia, Ceará, Distrito Federal, Goiás, Mato Grosso, Mato Grosso do Sul, Pará, Rio de Janeiro, Rondônia, São Paulo, Sergipe), E Bolivia (La Paz, Santa Cruz) and Argentina (Córdoba, Formosa, Misiones), NSL–2750 m.

Silva, 1993, Fugler et al., 1995, Duellman & Mendelson III, 1995, Reati, 1996, Yanosky et al., 1996, J.A. Campbell, 1998b, Gorzula & Señaris, 1998, Starace, 1998, Esqueda & La Marca, 1999, Giraudo, 1999, G. Köhler, 1999b, Stafford & Meyer, 2000, Lehr, 2001, Markezich, 2002, Savage, 2002, Rivas-Fuenemayer & Barrio-Amorgós, 2005, García-Vázquez et al., 2009, Lynch, 2009, MacCulloch et al., 2009, Navarrete et al., 2009, Lotzkat et al., 2010, McCranie, 2011a and C.J. Cole et al., 2013.

Remarks: See MacCulloch et al. 2009 for remarks on confusion between this species and *O. melanogenys,* especially in the Guiana Shield area. There are likely two species involved split into *petola* and *petolarius* by some; however problem involves nomenclatural and other problems that need solving in a detailed study. Thus we retain what is likely two species under this name. See Savage (2011: 223–224) for a details on application of the name *Coluber petolarius* and synonyms.

O

12. *Oxyrhopus rhombifer* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 1018–1019.

Synonyms: *Oxyrrhopus rhombifer* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Oxyrrhopus subpunctatus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Oxyrhopus dorbignyi* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrhopus subpunctatus* Duméril, Bibron & Duméril, 1854b, *Coronella bachmanni* Weyenberg, 1876a, *Oxyrhopus rhombifer inaequifasciata* F. Werner, 1909b, *Leptodira weiseri* L. Müller, 1923, *Oxyrhopus rhombifer septentrionalis* Vellard, 1943, and *Pseudoboa ornata* Hoge & Mertens, 1955.

Type: Holotype, MNHN 1705, a 712 mm specimen (A.C.V.M.D. d'Orbigny, 22 April 1827–20 April 1828).

Type locality: "province de los Corrientes" [= Corrientes Prov., ext. NE Argentina].

Distribution: Southern South America. Southern Brazil (Bahia, Ceara, Distrito Federal, Goiás, Mato Grosso, Mato Grosso do Sul, Minas Gerais, Pará, Paraná, Pernambuco, Rio de Janeiro, Rio Grande do Sul, Rondônia, Santa Catarina, São Paulo), SE Bolivia (Santa Cruz, Tarija), Paraguay (Alto Paraguay, Boquerón, Itapúa, Misiones, Neembucú), Uruguay (Artigas, Canelones, Cerro Largo, Colonia, Durazno, Flores, Lavalleja, Moldonado, Paysandú, Rivera, Salto, Sariano, Trienta y Tres) and N Argentina (Buenos Aires, Catamarca, Chaco, Chubut, Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, La Pampa, La Rioja, Mendoza, Rio Negro, Salta, San Juan, San Luis, Santa Fe, Santiago de Estero, Tucumán), 100–1500 m.

Sources: Serie, 1921, 1936, Cordeiro & Hoge, 1974, Amaral, 1978, Lema & Fabián-Beurmann, 1977, Lema, 1980, J.D. Williams & Francini, 1991, Cei, 1994, N.J. 13. *Oxyrhopus trigeminus* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 1013–1015.

Synonyms: *Oxyrrhopus trigeminus* A.-M.-C. Duméril, 1853 (*nomen nudum*) and *Erythroxirhopus trigeminus* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type: Lectotype, MNHN 7599, designated by Zaher & Caramaschi (1993: 818).

Type locality: "l'état de Bahia, Brésil" [=Bahia State, E Brazil] via lectotype selection.

Distribution: Central South America. Southeastern Venezuela (Amazonas, Bolívar), E Brazil (Alagoas, Amapá, Bahia, Ceará, Distrito Federal, S Goiás, Mato Grosso do Sul, Minas Gerais, Pará, Paraíba, Pernambuco, Rio de Janeiro, Rio Grande do Norte, Rondônia, São Paulo, Marajo Is.), Bolivia (La Paz) and Peru (Loreto), NSL–300 m.

Sources: Amaral, 1935e, Hoge et al., 1973, 1975, 1978, Cordeiro & Hoge, 1974, Vanzolini et al., 1980, Cascimento et al., 1991, N.J. Silva, 1993, Zaher & Caramaschi, 1993, Freitas, 1999, Franklin, 2001 and Navarrete et al., 2009.

Remarks: Probably occurs in Maranhão, Piauí and Sergipe, Brazil *fide* Zaher and Caramaschi (1993: 820).

14. *Oxyrhopus vanidicus* Lynch, 2009. Pap. Avul. Zool. 49(25): 333–335.

Type: Holotype, ICNMNH 10683 (formerly JMR 4106), an adult male (J.M. Renjifo, 13 May 2003).

Type locality: "Km 10, Leticia-Tarapacá road, municipality of Leticia, Amazonas, Colombia" [= Km. 10, Leticia (4°05'S, 69°34'W)–Tarapacá (2°53'S, 69°45'W) road, SE Amazonas Prov., ext. SE Colombia].

Distribution: Southeastern Colombia (Amazonas, Meta, Putumayo, Vaupés), Brazil (Amazonas, Pará), NE Ecuador (Sucumbios) and NE Peru (Loreto), 200–470 m.

Remarks: Specimens of this species have been misidentified as *O. melanogenys, O. petola semifasciatus* and *O. trigeminus fide* Lynch (2009: 336). Possibly a synonym of *O. melanogenys fide* Rivas-Fuenmayor et al. (2012: 47).

OXYURANUS Kinghorn, 1923 (Elapidae)

Synonyms: *Parademansia* Kinghorn, 1955, *Oxyuramus* – Battersby & Swinton, 1960 *(nomen incorrectum),* and *Oxyurans* – Anon., 1978 *(nomen incorrectum).*

Type species: *Pseudechis scutellatus* W.C.H. Peters, 1867d.

Distribution: Austro-Papua.

Sources: Kinghorn, 1929, Worrell, 1969, Covacevich et al., 1981, Cogger et al., 1983a, Shine & Covacevich, 1983, Longmore, 1986, S.K. 1. *Oxyuranus microlepidotus* (F. McCoy, 1879b). Prod. Zool. Victoria 3: 12–13, pl. 23, figs. 2–2a, 3–3a. (*Diemenia microlepidota*)

Synonyms: *Diemenia ferox* Macleay, 1882 and *Parademansia microlepidtus* – Khole, 1991 *(nomen incorrectum).*

Type: Lectotype, NMV D12354 (formerly NMV 493 & NMV 12871), specimen with prepared skull (W. Blandowski, 1849–1858), designated by Coventry (1970: 121).

Type locality: "Junction of Murray and Darling Rivers" [NW Victoria, SE Australia] via lectotype selection.

Distribution: Central Australia (W New South Wales, ext. SE Northern Territory, ext. SW Queensland, N South Australia), 10–130 m.

Sources: Kinghorn, 1923, Covacevich & Wombey, 1976, Broad et al., 1979 and Mirtschin, 1981, 1982a–b.

2. *Oxyuranus scutellatus* (W.C.H. Peters, 1867d). Mber. Königl. Akad. Wiss. Berlin 1867(11): 710–711. (*Pseudechis scutellatus*)

Synonyms: *Pseudechis wilesmithii* De Vis, 1911, *Oxyuranus maclennani* Kinghorn, 1923, *Oxyuranus scutellatus canni* K.R. Slater, 1956, *Oxyuranus maclennoni* – Slater, 1956 *(nomen incorrectum), Oxuranus scutallatus* – Manjunatha-Kini & Iwanaga, 1986 *(nomen incorrectum), Oxyuranus scutulatus* – Khole, 1991 *(nomen incorrectum), Oxyuranus scutellatus barringeri* Hoser, 2002b, *Oxyuranus scutellatus adelynhoserae* Hoser, 2009c & 2012i *(nomen illegitimum),* and *Oxyuranus scutellatus andrewwilsoni* Hoser, 2009c & 2012i *(nomen illegitimum).*

Type: Holotype, ZMB 5883, a 2230 mm specimen (Mus. Godeffroy).

Type locality: "Rockhampton" [E Queensland, E Australia, 23°23'S, 150°30'E, elevation 10 m].

Distribution: Southern Papua New Guinea (Central, Gulf, Milne Bay, Western, Daru Is.) and N Australia (ext. NE New South Wales, N Northern Territory, N and E Queensland, ext. N Western Australia, Bathurst, Koolan, Melville and Thursday Is.), NSL–800 m.

Sources: Thomson, 1933, 1950, MacKay, 1952, K.R. Slater 1956, 1968, C.R. Johnson, 1975a, F. Parker, 1982, Whitaker et al., 1982, Storr et al., 1986, O'Shea, 1996, B. Barnett, 1999b, J.C. Murphy & Schlager, 2003 and Wüster et al., 2005.

3. *Oxyuranus temporalis* Doughty, Maryan, Donnellan & Hutchinson, 2007. Zootaxa (1422): 52–54, figs. 3a–c, 4a–b, 5a.

Type: Holotype, WAM 166250 (formerly SAMA-FN BS-9075), a 970 mm female (M.N. Hutchinson, 22 Sept. 2006).

Type locality: "east of the Walter James Distribution, Western Australia (24°40'06"S, 128°45'52"E), Australia."

Distribution: Central Australia (E Western Australia), 415–515 m.

Source: Brennan et al., 2012.

P

†*PACHYOPHIS* Nopcsa, 1923 (†Pachyophiidae)

Synonym: *Mesophis* Bolkay, 1925.
Type species: †*Pachyophis woodwardi* Nopcsa, 1923.
Distribution: Upper Cretaceous of Bosnia (marine in life).
Sources: Bolkay, 1925, A.M. Müller, 1968, McDowell, 1987, M.S,Y. Lee et al., 1999, Caldwell & Albino, 2001, Scanlon & Lee, 2002, Rage & Escuillié, 2003a–b, Bardet et al., 2008 and Houssaye, 2010.
Remarks: Holotype illustrated in Lee et al. (1999: figs. 1–23). A lizard *fide* Rage (1984b: 62). †*Mesophis* a valid genus *fide* M.S.Y. Lee et al. (1999: 517).

1. †*Pachyophis woodwardi* Nopcsa, 1923. Palaeontographica 55(4): 118–122.

Synonym: *Mesophis nopcsai* Bolkay, 1925.
Type: Holotype, NMW A3919, skull fragments and 101 vertebrae and ribs, ca. 400 mm in length.
Type locality: "die Beschaffenheit der Plattenkalke von Bilek...über die fossilen Kohlen Bosniens und der Herzegovina, aus dem Neoc om." Emended to "Östlich von Bilek, in dem Vorort Selista (ost-Hercegovina)" [= Seliste, near Bileca, Bosnia; early upper Cretaceous, Cenomanian *fide* Rage, 1984b: 62].
Distribution: Upper Cretaceous (Cenomanian: 93.9–100.5 mya) of Bosnia. Known only from type locality.

†*PACHYRHACHIS* G. Haas, 1979 (†Pachyophiidae)

Synonyms: *Ophiomorphus* G. Haas, 1980 *(nomen praeoccupatum)* and *Estesius* Wallach, 1984 *(nomen substitutum).*
Type species: †*Pachyrhachis problematicus* G. Haas, 1979.
Distribution: Upper Cretaceous of Israel (marine in life).
Sources: G. Haas, 1979, 1980a, Rage, 1984b, McDowell, 1987, Caldwell & Lee, 1997, M.S.Y. Lee & Caldwell, 1998, M.S.Y. Lee et al., 1998, Zaher, 1998, Scanlon et al., 1999, Zaher & Rieppel, 1999, Caldwell, 2000, Rage & Escuillié, 2000, 2003a–b, Rieppel & Zaher, 2000, Tchernov et al., 2000, Caldwell & Albino, 2001, M.S.Y. Lee & Scranlon, 2002, Scanlon & Lee, 2002, Rieppel et al., 2003, Polcyn et al., 2005 and Bardet et al., 2008.
Remarks: A lizard *fide* Rage, 1984b. A snake *fide* Caldwell & Lee (1997: 705).

1. †*Pachyrhachis problematicus* G. Haas, 1979. Bull. Mus. Natl. Hist. Nat. (4) 1C(1): 61–64, figs. 1–6.

Synonym: †*Ophiomorphus colberti* G. Haas, 1980b.
Type: Holotype, HUJ-PAL 3659, nearly complete skeleton of a 1700 mm specimen.
Type locality: "Lower Cenomanian banked limestone of Ein Jabrud, near Ramallah, 20 km North of Jerusalem on the El-Bira – Jericho road" [= Ein Jabrud, West Bank, cen. Israel; upper Cretaceous].
Distribution: Upper Cretaceous (Cenomanian: 93.9–100.5 mya) of Israel.

†*PALAEONATRIX* Szyndlar *in* Mlynarski, Szyndlar, Estes & Sanchiz, 1982 (Natricidae)

Synonym: †*Dolniceophis* Rage & Rocek, 1983.
Type species: †*Palaeonatrix silesiaca* Szyndlar *in* Mlynarski, Szyndlar, Estes & Sanchiz, 1982.
Distribution: Lower Miocene of Czech Republic and Germany, and middle Miocene of France and Poland. Fossils unassigned to species include lower Miocene (Orleanian, MN 4: 16.0–16.9 mya) of Austria.
Sources: Rage, 1984b and Szyndlar, 1991b, 1998.

P

1. †*Palaeonatrix lehmani* (Rage & Rocek, 1983). Casopis Min. Geol. 28(1): 18–19, pls. 1, pl. 2, fig 1. (†*Dolniceophis lehmani*)

Type: Holotype, CUP 3930, one trunk vertebra.
Type locality: "Dolnice locality near the town of Cheb, West Bohemia, Czechoslovakia, 50°04'N, 12°22'E; Ottnangian, lower fossiliferous level Dolnice 1 (fine calcareous silts), Lower Miocene."
Distribution: Lower Miocene (Orleanian, MN 4: 16.0–16.9 mya) of Czech Republic, France and Germany, and middle Miocene (Astaracian, MN 6: 12.8–13.7 mya) of France.
Sources: Szyndlar, 1987, Szyndlar & Schleich, 1993, Augé and Rage, 2000, Rage & Bailon, 2005 and Szyndlar, 2005.

2. †*Palaeonatrix silesiaca* Szyndlar *in* Mlynarski, Szyndlar, Estes & Sanchiz, 1982. Estud. Geol. 38: 114–115, fig. 10.

Type: Holotype, ZPW OP 86/24, one trunk vertebra (Z. Ryziewicz, 1950–1958).

Type locality: "Nowa Wies Królewska II (NWK II), Opole, Silesia, southern Poland; Late Miocene (MN 7)" [= Sarmatian (Astaracian), middle Miocene *fide* Rage, 1984b: 50].
Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of Poland. Known only from type series.
Source: Szyndlar, 1984a.

†*PALAEOPHIS* Owen, 1840 (†Palaeophiidae)

Synonyms: †*Dinophis* Marsh, 1869 *(nomen praeoccupatum),* †*Paloeophis* – Beneden, 1871 *(nomen incorrectum),* †*Titanophis* Marsh, 1877 *(nomen substitutum),* †*Paleophis* – Palacky, 1898 *(nomen incorrectum),* †*Paleophis* – Lynn, 1934 *(nomen emendatum),* †*Palelophis* – Huene, 1956 *(nomen incorrectum),* †*Vialovophis* Nessov & Odovitschenko, 1984, and †*Nessovophis* Averianov, 1997.
Type species: †*Palaeophis toliapicus* Owen, 1840.
Distribution: Upper Cretaceous and Paleocene of Morocco, upper Paleocene of Kazakhstan, upper Paleocene or lower Eocene of USA, lower Eocene of Belgium, Denmark, France, Germany, India, Ivory Coast, Kyrgystan, Mali, Morocco, United Kingdom and USA, middle Eocene of Belgium, Italy, Mali, Nigeria, Ukraine, United Kingdom, Uzbekistan, and USA, and upper Eocene of Kazakhstan and Ukraine.
Sources: Marsh, 1877, Gilmore, 1938, Kuhn, 1939a, 1963, Holman, 1979b, 1982c, 2000a, Rage & Wouters, 1979, Rage, 1984b, Rage & Holman, 1984 and Rage et al., 2003, 2008.
Remarks: Upper Eocene record from United Kingdom doubtful *fide* Rage (1983b: 227).

P

1. †*Palaeophis africanus* Andrews, 1924. Bull. Geol. Surv. Nigeria 7: 43, 39–41, figs. 1a–c.

Type: Holotype, BMNH 4964, one trunk vertebra (J.D. Falcóner).
Type locality: "Nigeria, the exact locality being Oshosun, Abeokuta Province on the railway 27 1/4 miles north of Lagos" [= Ososun, Ogun State, SW Western Region, ext. SW Nigeria; Oshoshun formation, middle Eocene *fide* Rage, 1984b: 34].
Distribution: Middle Eocene (37.2–48.6 mya) of Nigeria.

2. †*Palaeophis casei* Holman, 1982c. J. Vert. Paleont. 2(2): 163–166, fig. 1.

Type: Holotype, PU 23488, one trunk vertebra (G.R. Case and P. Borodin, Nov.–Dec. 1980).
Type locality: "Case Estuary Number 1 Site at Meridian, Lauderdale County, Mississippi, at latitude 32°25'N, 89°27'W; the Bashi Marl, an upper unit of the Wilcox Group, early Eocene," (partially in error). Corrected to Tuscahoma formation, at Sec. 6, T6N, R16E *fide* Parmley and Case (1988: 334).
Distribution: Upper Paleocene (Clarkfordian: 55.4–56.8 mya) or lower Eocene (Wasatchian: 50.3–55.4 mya) of USA (Mississippi). Known only from type locality.
Sources: Parmley & Case, 1988, Holman et al., 1991 and Weems, 1999.

3. †*Palaeophis colossaeus* Rage, 1983a. C.R. Acad. Sci. Paris (3) 296(22): 1741–1743, figs. 1a–e.

Type: Holotype, MNHN TGE 614, one middle trunk vertebra from a 9000 mm specimen.
Type locality: "butte de Tamaguilelt, Mali; Lutétien (Eocène moyen)" [= Tamaguélelt hills, S Gao Region, E Mali].
Distribution: Middle Eocene (Lutetian: 37.2–48.6 mya) of Mali. Known only from type series.

4. †*Palaeophis ferganicus* Averianov, 1997. Russ. J. Herp. 4(2): 132–135, fig. 4.

Type: Holotype, ZISP PC 1/35, one middle trunk vertebra (A.O. Averianov, 1988).
Type locality: "Andarak 2, Lyailyak District, Osh Region, Kyrgystan. Early Eocene (early Ypresian)."
Distribution: Lower Eocene (Ypresian, MP 7: 48.6–55.8 mya) of Kyrgystan.

5. †*Palaeophis grandis* (Marsh, 1869). Amer. J. Sci. Arts (2) 48(144): 397–400. (†*Dinophis grandis*)

Type: Holotype, YPM 2762, one trunk vertebra (W.S. Kimball).
Type locality: "the Eocene greensand, near Shark River, Monmouth county, New Jersey." Emended to Shark River formation *fide* Gilmore (1938: 51).
Distribution: Lower-middle Eocene (38.0–55.4 mya) of USA (Maryland, New Jersey).
Remarks: Possibly a synonym of †*Palaeophis littoralis* Cope *fide* Gilmore (1938: 49) or †*P. typhaeus* Owen *fide* Rage (1984b: 34).

6. †*Palaeophis littoralis* Cope, 1869a. Proc. Acad. Nat. Sci. Philadelphia (1868) 20(4): 234.

Synonym: †*Palaeophis littoralis* Cope, 1868d *(nomen nudum).*
Types: Syntypes (3), AMNH 2392 (formerly GSNJ), three fragmentary vertebrae (Knieskern), lost *fide* H. Miller (1955: 2).
Type locality: "green sand of Squankum, Monmouth Co., N. J" [= New Jersey, USA]. Emended to Eocene green sand bed of Shark River *fide* Cope (1869a: 234), Manasquam Marl, Eocene *fide* Gilmore (1938: 48), and Ypresian, lower Eocene *fide* Rage (1984b: 34).
Distribution: Upper Paleocene (Clarkforkian: 55.4–56.8 mya) of USA (Mississippi) and lower to middle Eocene

(38.0–55.4 mya) of USA (Alabama, Mississippi, New Jersey).

Sources: Cope, 1869a, H. Miller, 1955, Parmley and Case, 1988 and Holman et al., 1990.

Remarks: Possibly a synonym of †*Palaeophis toliapicus* Owen *fide* Rage (1984b: 34).

7. †*Palaeophis maghrebianus* Arambourg, 1952. Notes Mém. Serv. Géol. Maroc (92): 291–294, fig. 58, pl. 41, fig. 10.

Type: Holotype, MNHN APH 5, one trunk vertebra.

Type locality: "Djemaïa; les niveaux ypéslens des ouled Abdoundu Maroc" [= Douar Jemaa, Fez Prov., N Morocco; Ypresian, lower Eocene].

Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) of Morocco.

Source: Bardet et al., 2010.

8. †*Palaeophis nessovi* Averianov, 1997. Russ. J. Herp. 4(2): 135, figs. 3f–i.

Type: Holotype, ZISP PC 1/36, one middle trunk vertebra.

Type locality: "Kachar, iron ore quarry, 52 km W of Kustanay city, Kustanay Province, northern Kazakhstan, Upper Eocene (Priabonian)."

Distribution; Upper Eocene (Priabonian: 33.9–37.2 mya) of Kazakhstan. Known only from type locality.

Source: Kordikova, 1998.

9. †*Palaeophis tamdy* (Averianov, 1997). Russ. J. Herp. 4(2): 131–132, figs. 2a–j. (†*Nessovophis tamdy*)

Type: Holotype, ZISP PC 7/34, one anterior trunk vertebra.

Type locality: "Dzheroi 2, white quartz sands in a large hollow near the eastern Muruntau-Tamdy road, Central Kyzylkum Desert, Bukhara Viloyat, Uzbekistan. Middle Eocene (Bartonian)."

Distribution: Middle Eocene (Bartonian: 37.2–40.4 mya) of Uzbekistan. Known only from type locality.

10. †*Palaeophis toliapicus* Owen, 1840. Proc. Geol. Soc. London (1839–1840) 3(66): 165–166.

Types: Syntypes (2), BMNH 38998 and BMNH 39447 (formerly RCSM), two nodules with several vertebrae (J. Hunter & J.S. Bowerbank).

Type locality: "London clay from the Isle of Sheppey" [= Kent, England, United Kingdom; lower Eocene: upper Cuisian *fide* Rage (1983b: 222) or Ypresian *fide* Rage, 1984b: 34].

Distribution: Lower Eocene (Ypresian or Cuisian: 48.6–55.8 mya) of Belgium, Denmark, France, United Kingdom and USA (Mississippi).

Sources: Owen, 1841a, Lydekker, 1888, Rage, 1983b, Augé et al., 1997 and Weems, 1999.

Remarks: Original description reprinted in Owen (1841b: 209–210, pl. 22).

11. †*Palaeophis typhaeus* Owen, 1850. Palaeont. Soc. Monogr. 1(3): 56–61, pl. 13, figs. 5–8, pl. 14, figs. 1–3, 7–9, 16–17, 26–28.

Synonyms: †*Palaeophis porcatus* Owen, 1850 and †*Palaeophis oweni* Zigno, 1882.

Type: Holotype, BMNH, one trunk vertebra illustrated in pl. 13, figs. 5–8 (F. Dixon, J.S. Bowerbank & G.A. Combe), lost *fide* Rage (1984b: 34).

Type locality: "Eocene clay at Bracklesham, Sussex" [= Bracklesham, Sussex, England, United Kingdom; Bracklesham group, Lutetian or uppermost Ypresian *fide* Rage (1984b: 34); 50°45'N, 0°54'E].

Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) of United Kingdom (England) and middle Eocene (Cuisian and Lutetian: 40.4–48.6 mya) of Belgium, Italy, United Kingdom and ? France.

Sources: Lydekker, 1888, Rage, 1983b and Augé et al., 1997.

Remarks: Lydekker (1888: 259) listed 4 syntypes (BMNH 25600, 33207, 33209–10).

12. †*Palaeophis udovichenkoi* Averianov, 1997. Russ. J. Herp. 4(2): 135–137, figs. 5a–e.

Type: Holotype, ZISP PC 8/37, one middle trunk vertebra.

Type locality: "Prolom, limestone quarry 8 km NE of Belogorsk city in the Crimea, Ukraine, Middle-?Upper Eocene (Bartonian-?Priabonian)."

Distribution: Middle or upper Eocene (Bartonian: 37.2–40.4 mya or Priabonian: 33.9–37.2 mya) of Ukraine. Known only from type locality.

13. †*Palaeophis vastaniensis* Bajpai & Head, 2007. Gondwana Geol. Mag. 22(2): 86–88, figs. 2a–c.

Type: Holotype, IITR/SB/VLM 914, three articulated precloacal vertebrae.

Type locality: "Vastan Lignite Mine, Taluka Mangrol, District Surat, Gujarat, western India; early Eocene Cambay Shale, Shallow Benthic Zone 8 *(N. globulus* Zone)."

Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) of India.

Source: Rage et al., 2008.

14. †*Palaeophis virginianus* Lynn, 1934. John Hopkins Univ. Stud. Geol. 11: 245–249, pl. 17, figs. 1–6. (†*Paleophis virginianus*)

Types: Syntypes (2), USNM 13640–41, two trunk vertebrae (W.G. Lynn, 2 Dec. 1933 and 27 March 1934).

Type locality: "Belvedere Beach, Virginia, in Eocene deposits of the Aquia Creek stage" [= Ypresian (?Cuisian), lower Eocene *fide* Rage, 1984b: 34].

Distribution: Lower Eocene (Wasatchian: 50.3–55.4 mya) of USA (Alabama, Georgia, Mississippi, New Jersey, Virginia).

Sources: Holman, 1977a, Holman and Case, 1988, Parmley and Case, 1988, Holman et al., 1991 and Weems, 1999.

15. †*Palaeophis zhylan* (Nessov and Udovitschenko, 1984). Paleont. Sbornik 21: 71–72, figs. 18–20. (†*Vialovophis zhylan*)

Type: Holotype, AHCCCP 18/12173, one middle trunk vertebra (L.A. Nessov, 1977).
Type locality: "Kazakh Republic, Chimkent Region, Quarry Dzilga [= Zhylga], Paleogene."
Distribution: Upper Paleocene and Pleistocene (Gelasian: 1.8–2.6 mya) of Kazakhstan.
Source: Kordikova, 1998.

16. †*Palaeophis zhylga* (Averianov, 1997). Russ. J. Herp. 4(2): 132, figs. 3a–e. (†*Nessovophis zhylga*)

Type: Holotype, ZISP PC 45/32, one anterior trunk vertebra (A.O. Averianov, I.G. Danilov, L.A. Nessov, O.R. Potapova, or A.S. Rezvyi, 1989, 1990 or 1996).
Type locality: "Zhylga 1b, the white sand quarry near Zhylga 1a, the white quartz sands quarry, 10 km NW to Zhylga railway station, Chimkent Province, Kazakhstan. Lower Eocene (Ypresian)."
Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) and upper Paleocne of Kazakhstan.
Source: Kordikova, 1998.
Remarks: Possibly a member of the †Nigerophiidae *fide* Rage et al. (2003: 700).

P

†*PALAEOPYTHON* Rochebrune, 1880 (Pythonidae)

Synonyms: †*Paleopython* Palacky, 1898 *(nomen emendatum),* †*Palaeophyton* – Nopcsa, 1926 *(nomen incorrectum),* †*Palaeopithon* – Ginsburg, 1970 *(nomen incorrectum),* and †*Palaepython* – Rage, 1974 *(nomen incorrectum).*
Type species: †*Python cadurcensis* Filhol, 1877.
Distribution: Middle Eocene of France and Germany, upper Eocene of France and Switzerland, and ? lower Oligocene of France.
Sources: Rochebrune, 1880, 1884, Lydekker, 1888, Kuhn, 1939a–b, 1963, Rage, 1974, 1984b and Rage & Augé, 2010.

1. †*Palaeopython cadurcensis* (Filhol, 1877). Ann. Sci. Nat. Géol., Paris 8: 490–493, pls. 52–53, figs. 435–444. (†*Python cadurcensis*)

Types: Syntypes (8), MNHN QU 16317, one left dentary [figs. 437–438], MNHN QU 16318, five articulated middle trunk vertebrae [figs. 441–442], MNHN QU 16319, one middle trunk vertebra [figs. 439–440, 443–444], and MNHN QU 16321, one right maxilla [figs. 435–436] (H. Filhol).
Type locality: "divers gisements des les Phosphorites du Quercy, près de Caylux, des départements du Lot, du Tarn-et-Garonne, et de l'Aveyron, l'éocène supérieur dans cette partie du sud-ouest de la France" [probably Headonian, upper Eocene *fide* Rage, 1984b: 19].
Distribution: Middle Eocene (Bartonian: 37.2–40.4 mya) and upper Eocene (Priabonian: 33.9–37.2 mya) of France and ? Switzerland.

2. †*Palaeopython ceciliensis* Barnes, 1927. Jahrb. Halle. Verband. Erforsch. Mitteldeutsch. Bodensch. (2) 6: 9–10, pl. 1, fig. 7.

Type: Holotype, GM 2978, one partial trunk vertebra (J. Walther, 1925).
Type locality: "Grube Cecilie, der Braunkohle des Geiseltals; obere mittel Kohle, subherzynen Braunkohlen formation, Eozäne" [=SW of Halle, Germany; middle Rhenanian (= Lutetian), Middle Eocene *fide* Rage, 1984b: 19].
Distribution: Middle Eocene (Lutetian: 40.4–48.6 mya) of Germany.
Remarks: Erroneously allocated to †*Paleryx* by Kuhn (1939b: 127 and 1963: 14) *fide* Rage (1984b: 20). The incomplete vertebra (holotype) is unsatisfactory for accurate comparison *fide* Szyndlar & Böhme (1993: 392).

3. †*Palaeopython filholii* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 277–278, pl. 12, figs. 5a–c.

Type: Holotype, MNHN QU 16322 (formerly QU 322), one posterior trunk vertebra.
Type locality: "Eocène.—Phosphorites du Quercy" [France; probably Headonian, upper Eocene *fide* Rage, 1984b: 19].
Distribution: Upper Eocene (Priabonian: 33.9–37.2 mya) of France.
Remarks: Lower Eocene *fide* Rage (1974: 287).

4. †*Palaeopython fischeri* Schaal, 2004. Cour. Forsch.-Inst. Senck. (252): 36–44, figs. 1–7.

Type: Holotype, SMF ME 929, one trunk vertebra.
Type locality: "Grube Messel bei Darmstadt, Hessen, Deutschland. Mittleres Eozän, Unteres Lutetium, MP 11, Messel-Ölschiefer-Formation."
Distribution: Middle Eocene (Lutetian, MP 11: 48.6 mya) of Germany.

5. †*Palaeopython neglectus* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saóne et Loire 5: 154–155, pl. 2, figs. 5a–b.

Type: Lectotype, MNHN QU 16326, one trunk vertebra, designated by Rage (1984b: 20).

Type locality: "Phosphorites du Quercy, France; upper Eocene or Oligocene" via lectotype selection.
Distribution: Upper Eocene (Priabonian: 33.9–37.2 mya) or Oligocene (Rupelian/Chattian: 23.0–33.9 mya) of France. Known only from lectotype.
Remarks: Generic allocation dubious *fide* Rage (1984b: 20).

†*PALEOFARANCIA* Auffenberg, 1963 (Carphophiidae)

Type species: †*Paleofarancia brevispinosus* Auffenberg, 1963.
Distribution: Upper Miocene of USA.
Sources: Holman, 1979b, 2000a and Rage, 1984b.

1. †*Paleofarancia brevispinosus* Auffenberg, 1963. Tulane Stud. Zool. 10(3): 169, fig. 16.

Type: Holotype, UF 5566, one middle trunk vertebra (S. Telford, Sr., 1952).
Type locality: "bottom of the stream formed by Lithia Springs, close to its head near the Alafia River, Hillsborough County, Florida (R21E, T30S, Sec. 16); Alachua formation, Middle Pliocene (?), Hemphillian."
Distribution: Upper Miocene (Hemphillian: 4.9–10.3 mya) of USA (Florida). Known only from type locality.
Remarks: Modified description provided in Holman (2000a: 121–122). Age questionable *fide* Auffenberg (1963: 135) and Rage (1984b: 50).

†*PALEOHETERODON* Holman, 1964 (Xenodontidae)

Type species: †*Paleoheterodon tiheni* Holman, 1964.
Distribution: Middle Miocene of USA and France, upper Miocene of USA, and upper Miocene–lower Pliocene of USA. Fossils unassigned to species include middle/upper Miocene (Clarendonian) of USA (Kansas).
Sources: Holman, 1979b, Rage, 1984b and Parmley & Hunter, 2010.

1. †*Paleoheterodon arcuatus* Rage and Holman, 1984. Géobios 17(1): 93–94, figs. 3a–e.

Type: Holotype, UCBL 285 001, one trunk vertebra.
Type locality: "fissure M de La-Grive-Saint-Alban (Isère), France; zone MN 7, Astaracien, the French Miocene."
Distribution: Middle Miocene (Astaracian, MN 6–8: 11.6–13.7 mya) of France.
Sources: Augé & Rage, 2000 and Szyndlar, 2012.

2. †*Paleoheterodon tiheni* Holman, 1964. Copeia 1964(4): 633, fig. 1.

Type: Holotype, UNSM 61031, one trunk vertebra (J.A. Tihen & C.A. Chantell, summer 1962 or 1963).
Type locality: "Near the Norden-Johnstown Road, about 300 yards south of the bridge across the Niobrara River; on the Ed McCall Ranch, SE 1/4, SW 1/4 of Sect. 33, T 33 N, Rm 23 W; Brown County, Nebraska; Valentinian; Valentine formation; Norden Bridge Quarry" [= Barstovian, middle Miocene *fide* Rage, 1984b: 50].
Distribution: Middle Miocene (Barstovian: 13.6–16.3 mya) of USA (Nebraska, South Dakota), upper Miocene (Clarendonian: 10.3–13.6 mya and Hemphillian: 16.3–20.8 mya) of USA (Nebraska, Texas), and upper Miocene–upper Pliocene (Hemphillian-Blancan: 1.8–10.3 mya) of USA (Indiana).
Sources: R.L. Wilson, 1968, Holman, 1973a, 1975, 1977e, 1978, 1987a, 1995b, 2000a, Voorhies et al., 1987 Parmley, 1988 and Parmley & Holman, 1995.

†*PALERYX* Owen, 1850 (Pythonidae)

Synonyms: †*Palaeryx* – Massalongo, 1859 *(nomen incorrectum),* and †*Paleoeryx* – Palacky, 1898 *(nomen incorrectum).*
Type species: †*Paleryx rhombifer* Owen, 1850.
Distribution: Middle Eocene of Germany, and upper Eocene of United Kingdom.
Source: Rage, 1984b.
Remarks: *Paleryx cayluxi* Stefano is *incertae sedis fide* Rage (1984: 22).

1. †*Paleryx rhombifer* Owen, 1850. Palaeont. Soc. Monogr. 1(3): 67, pl. 13, figs. 29–32.

Synonym: †*Paleryx depressus* Owen, 1850.
Type: Holotype, BMNH 25259, one anterior trunk vertebra (A.P. Falcóner).
Type locality: "the Eocene sand at Hordwell" [= Hordwell, Hampshire, England; Headonian, upper Eocene *fide* Rage, 1984b: 20].
Distribution: Upper Eocene (Priabonian, MP 17–20: 33.9–37.2 mya) of United Kingdom (England).
Sources: Lydekker, 1888 and Rage & Ford, 1980.

2. †*Paleryx spinifer* Barnes, 1927. Jahrb. Halle. Verband. Erforsch. Mitteldeutsch. Bodensch. (2) 6: 7–9, pl. 1, figs. 1–6.

Types: Syntypes (5), GM 2979, articulated vertebrae, GM 5822, isolated vertebrae, GM 5823, one parietal, GM 5824, one pterygoid, and GM 5826, one maxilla (J. Walther, 1925).
Type locality: "Grube Cecilie, der Braunkohle des Geiseltals; obere mittel Kohle, Subherzynen

Fraunkohlen formation, Eozäne" [= SW of Halle, Germany; middle Rhenanian (= Lutetian), middle Eocene *fide* Rage, 1984b: 20].

Distribution: Middle Eocene (Lutetian: 40.4–48.6 mya) of Germany.

Remarks: Generic allocation doubtful *fide* Rage (1984b: 20) and Szyndlar & Böhme (1993: 392). Kuhn's (1939b: 125) assignment of skeleton to this species invalid *fide* Rage (1984b: 20).

PANTHEROPHIS Fitzinger, 1843 (Colubridae)

Synonyms: *Scotophis* Baird & Girard, 1853, *Scotophisus* A.L. Herrera, 1899 *(nomen emendatum)*, †*Palaeoelaphe* Gilmore, 1938, and *Mintonius* Collins & Taggart, 2008.

Type species: *Coluber guttatus* Linnaeus, 1758.

Distribution: Southern Canada, E United States and NE Mexico.

Fossil records: Middle Miocene to upper Pleistocene of S-cen. Canada and USA. Fossils unassigned to species include middle/upper Miocene (Clarendonian) of USA (Kansas), upper Miocene/lower Pliocene (Hemphillian) of USA (Indiana), and upper Pleistocene (Rancholabrean II) of USA (South Carolina).

Sources: Dowling et al., 1983, Schulz, 1996, Holman, 2000a, Utiger et al., 2002, 2005, Burbrink & Lawson, 2007, Collins & Taggart, 2008 and Pyron & Burbrink, 2009a.

Remarks: A synonym of *Pituophis fide* Burbrink & Lawson (2007: 186–187). Collins & Taggart (2008: 16) proposed *Mintonius* for *vulpinus* and *gloydi*, resurrected *Scotophis* for *bairdi, obsoletus, alleghaniensis*, and *spiloides* and retained *emoryi, guttatus,* and *slowenskii* in *Pantherophis*. *Pantherophis* should include *Mintonius* and *Scotophis* and exclude *Pituophis fide* Pyron & Burbrink (2009a: 528).

P

1. *Pantherophis alleghaniensis* (Holbrook, 1836). No. Amer. Herp. 1: 111–112, pl. 20. (*Coluber alleghaniensis*)

Synonyms: *Coluber quadrivittata* Holbrook, 1836, *Scotophis confinis* Baird & Girard, 1853, *Elaphis holbrooki* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Elaphis holbrookii* Duméril, Bibron & Dumril, 1854a, *Scotophis obsoletus lemniscatus* Cope, 1889a, *Elaphe quadrivittata deckerti* Brady, 1932, *Elaphe williamsi* T. Barbour & Carr, 1940, *Elaphe quadrivitatta parallela* T. Barbour & Engels, 1942, and *Elaphe obsoleta rossalleni* Neill, 1949.

Types: Syntypes (2), ANSP 16792 (Wilkins), location of second syntype unknown.

Type locality: "Highlands of the Hudson" [New York] and "summit of the Blue Ridge in Virginia."

Distribution: Eastern USA (Connecticut, Florida, Delaware, Georgia, Maryland, Massachusetts, New Jersey, New York, E and cen. North Carolina, E Pennsylvania, Rhode Island, South Carolina, W Vermont, E Virginia, E West Virginia)

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida) and upper Pleistocene (Rancholabrean II) of USA (Florida, Georgia, Pennsylvania, Virginia).

Sources: Burbrink et al., 2000, Burbrink, 2001 and Gibbs et al., 2006.

Remarks: Malnate (1971: 362) corrected collector of type from Wilkens to Wilkins. Hybrids exist between *P. alleghaniensis* and *P. spiloides fide* Gibbs et al., 2006.

2. *Pantherophis bairdi* (Yarrow *in* Cope, 1880). Bull. U.S. Natl. Mus. (17): 41. (*Coluber bairdi*)

Type: Holotype, USNM 10403 (W.F. von Manteuffel, 1878).

Type locality: "near Fort Davis, Tex. This post is in the Apache Mountains, 50 miles from the Mexican border or Rio Grande, Northwest of Presidio del Norte" [= Jeff Davis Co., Texas].

Distribution: South-central USA (W Texas) and NE Mexico (N Coahuila, Nuevo León, W Tamaulipas), 900–1800 (2900) m.

Sources: Olson, 1977, R. Lawson & Lieb, 1990, Schulz & Philippes, 1991, Cranston & Cranston, 1996, Werler & Dixon, 2000, Burbrink et al., 2000, Burbrink, 2001 and Farr et al., 2009.

3. †*Pantherophis buisi* (Holman, 1973b). Copeia 1973(3): 575–578, figs. 1–2. (†*Elaphe buisi*)

Type: Holotype, UMMP V-57403, a partial skeleton (C. Hibbard & W. Akersten, Map, 1968).

Type locality: "Ogallala Formation, Upper Middle Pliocene. Buis Ranch local fauna, Beaver County, Oklahoma, NE ¼ SW ¼ Sec. 5 T 5 N, R 26 E. C. M. 36º45' N, 100°30' W."

Distribution: Lower Pliocene (Hemphillian: 3.6–4.9 mya) of USA (Oklahoma). Known only from type locality.

Remarks: Characters fit between *Pantherophis obsoletus* and *Bogertophis subocularis fide* Holman (2000a: 160).

4. *Pantherophis emoryi* (Baird & Girard, 1853). Cat. No. Amer. Rept., Serp. 1: 157–158. (*Scotophis emoryi*)

Synonyms: *Coluber rhinomegas* Cope, 1860c, *Elaphe laeta intermontanus* Woodbury & Woodbury, 1942, *Elaphe quivira* Burt, 1946 (*nomen nudum*), and *Elaphe guttata meahllmorum* H.M. Smith, Chiszar, Staley & Tepedelen, 1994.

Type: Holotype, USNM 2257, a 1043–1048 mm specimen (J.H. Clark [U.S.-Mex. Bound. Surv.], 1848–1852, via J.D. Graham), lost *fide* Dowling (1951: 43).

Type locality: "Howard Springs, Tex." [= 20 miles SW Ozona, Crockett Co., Texas, USA *fide* Dowling, 1951: 43].

Distribution: South-central and W USA (Arkansas, W and SE Colorado, SW Illinois, cen. N and W Kansas, S Missouri, SE Nebraska, New Mexico, Oklahoma, cen. and W Texas, E Utah) and NE Mexico (E Chihuahua, Coahuila, NE Durango, N Hidalgo, Nuevo León, ext. N Querétaro, San Luis Potosí, Tamaulipas, ext. N Veracruz, NE Zacatecas), NSL–1900 m.

Fossil records: Upper Miocene (Hemphillian) of USA (Nebraska), middle Pliocene (Blancan III) of USA (Texas), upper Pliocene (Plancan V) of USA (Nebraska), middle/upper Pleistocene (Irvingtonian II) of USA (Arkansas, Texas), and upper Pleistocene (Rancholabrean II) of USA (New Mexico, Texas).

Sources: Baird, 1859, Dowling, 1951, Fitch, 1999, Hammerson, 1999, Werler & Dixon, 2000, Burbrink, 2002, Lemos-Espinal et al., 2004c and H.M. Smith, 2005b.

Remarks: Holotype illustrated in Baird (1859: pl. 12). Yarrow (1882: 101) erroneously listed type locality as Fort Smith, Arkansas with Whipple as collector. Elevated to specific status *fide* Burbrink (2001: 473).

5. *Pantherophis guttatus* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 385–386. (*Coluber guttatus*)

Synonyms: *Coluber maculatus* Lacépède, 1789 (*nomen rejiciendum*), *Coluber maculatus* Bonnaterre, 1790, *Coluber ludovicianus* Suckow, 1797, *Coluber compressus* Donndorff, 1798, *Coluber moniligera* Latreille *in* Sonnini & Latreille, 1801b, *Coluber carolinianus* G. Shaw, 1802, *Coluber molossus* Daudin, 1803c, *Coluber pantherinus* Daudin, 1803c, ? *Coluber zeae* Gravenhorst, 1807, ? *Coluber zonatus* Gravenhorst, 1807, *Coluber floridanus* Harlan, 1827, *Coluber guttatus sellatus* Cope, 1889a, and *Coluber rosaceus* Cope, 1889a.

Type: Holotype, ZMUU 147 (formerly JA 1749) (A. Garden, 1760–1761).

Type locality: "Carolina" [USA]. Restricted to vicinity of Charleston, South Carolina, USA *fide* Klauber (1948: 6).

Distribution: Southeastern USA (Alabama, S Delaware, Florida: Bahia, Boca Grande, Honda, Indian, Key West, Lower Matecumbe, Vaca, Little Pine, Little Torch, Little Pine, Big Pine, Middle Torch, Ramrod, Stock, Summerland and Vaca Is.; Georgia, cen. Kentucky, E Louisiana, Maryland, Mississippi, S New Jersey, S North Carolina, South Carolina, S Tennessee, Virginia, ext. W West Virginia) and introduced into Mexico (Hidalgo), Grand Cayman, Martinique, Turks and Caicos Is. (Grande Turk) and U.S. Virgin Is. (St. Thomas), NSL–1830 m.

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Alabama, Florida, Georgia, Pennsylvania, Tennessee, Virginia).

Sources: J.C. Mitchell, 1977, Christman, 1980, Ashton & Ashton, 1988, Ernst & Barbour, 1989, Conant & Collins, 1991, H.M. Smith et al., 1994, Palmer & Braswell, 1995, Vaughan et al., 1996, Tennant, 1997, Quijano et al., 1998, W. Schmidt, 1999, D. Bartlett & Tennant, 2000, D. Schmidt, 2000, Burbrink, 2002, Kunz, 2004, G. Köhler & Berg, 2005, R.W. Henderson & Powell, 2009, Pritzel, 2011 and Reynolds & Riggs, 2011.

6. †*Pantherophis kansensis* (Gilmore, 1938). Geol. Soc. Amer., Spec. Pap. (9): 63–64, figs. 24a–b, 25a–d. (†*Palaeoelaphe kansensis*)

Synonym: †*Elaphe nebraskensis* Holman, 1964.

Type: Holotype, USNM 13500, several disarticulated vertebrae, including one cervical vertebra [fig. 24] and one trunk vertebra [fig. 25] (J.B. Hatcher, Oct. 1884).

Type locality: "'Quarry E', Long Island, Phillipps Co., Kans. Republican River formation, Lower Pliocene."

Distribution: Middle Miocene (Clarendonian and Barstovian: 10.3–16.3 mya) of USA (Nebraska, South Dakota, Texas) and upper Miocene (Hemphillian: 4.9–10.3 mya) of Canada (Saskatchewan) and USA (Kansas, Nebraska, Texas).

Fossil records: Middle Miocene (Barstovian) of Canada (Saskatchewan) and USA (Nebraska, South Dakota, Texas), upper Miocene (Clarendonian) of USA (Nebraska), upper Miocene (Clarendonian/Hemphillian) of USA (Kansas), and upper Miocene (Hemphillian) of USA (Nebraska, Texas).

Sources: Auffenberg, 1963, Holman, 1964, 1970, 1973a, 1977b–c, 1979a, 1987a, 1995a, Rage, 1984b, Parmley & Holman, 1995 and Parmley & Hunter, 2010.

Remarks: Type vertebrae may originate from more than one individual *fide* Gilmore (1938: 64). Revised diagnosis in Holman (2000a: 162). Closer to *Pantherophis vulpinus* than *P. obsoletus fide* Holman (2000a: 162–163).

7. *Pantherophis obsoletus* (Say *in* E. James, 1823). Exped. Pittsburgh–Rocky Mts. 1: 140. (*Coluber obsoletus*)

Synonyms: *Coluber reticulatus* Lacépède, 1789 (*nomen rejiciendum*), *Scotophis laetus* Baird & Girard, 1853, and *Scotophis lindheimeri* Baird & Girard, 1853.

Types: Syntypes (3), ANSP (T. Say, 29 Aug.–26 Sept., 1819), longest syntype 1515 mm, lost *fide* Dowling (1952b: 4).

Type locality: "the Missouri from the vicinity of Isle au Vache to Council Bluff" [= Missouri River between Cow Island (39°27'N, 94°58'W, elevation 300 m), W Platte Co., NW Missouri and Council Bluffs (41°15'N, 95°52'W, elevation 240 m), SW Pottawattamie Co., SE Iowa, USA]. Restricted to Council Bluffs, Iowa, USA *fide* K.P. Schmidt (1953a: 197) and vicinity of Cow Island, Leavenworth Co., Kansas, USA *fide* Dundee (1996b: 78).

Distribution: Central USA (Arkansas, S, E Iowa, E Kansas, Louisiana, ext. SE Minnesota, Missouri, SE Nebraska, Oklahoma, cen. and E Texas), NSL–1200 m.

Fossil records: Upper Miocene (Hemphillian) of USA (Nebraska), lower Pliocene (Hemphillian) of USA (Kansas, Oklahoma), middle Pliocene (Blancan II, III) of USA (Kansas), upper Pliocene (Blancan V) of USA (Kansas), lower/middle Pleistocene (Irvingtonian I) of USA (Kansas), and upper Pleistocene (Rancholabrean II) of USA (Kansas, Texas).

Sources: Neill, 1949a, A.H. Wright & Wright, 1957, Burbrink et al., 2000, D. Schmidt, 2000, 2004a, Werler & Dixon, 2000 and Burbrink, 2001.

8. †*Pantherophis pliocenicus* (Holman, 1968). Copeia 1968(1): 155–156, fig. 3. (†*Elaphe pliocenica*)

Type: Holotype, MSUVP V-53170, one trunk vertebra from a 1070 mm specimen.

Type locality: "Glenns Ferry Formation, upper Pliocene, Hagerman Quadrangle, NW 1/4, Sec. 5, T 8 S, R 13 E, Twin Falls County, Idaho."

Distribution: Middle Pliocene (Blancan: 3.6 mya) of USA (Idaho) and upper Pliocene (Blancan) of USA (Washington).

Sources: Holman, 1979a, 2000, Rage, 1984a and Parmley & Walker, 2003.

9. *Pantherophis ramspotti* Crother, White, Savage, Eckstut, Graham & Gardner, 2011. Intern. Scholar. Res. Network Zool. 2011(11), 10–11.

Type: Holotype, USNM 578514 (formerly JRP 1395), an 880 mm female (J.R. Parmelee, 21 June 2002).

Type locality: "Warren Co. (R24W, T76N, Sec. 30), Iowa" [USA].

Distribution: Northern USA (Iowa, S Minnesota, N Missouri, E Nebraska, SE South Dakota), 230–500 m.

Sources: Conant, 1940, A.H. Wright & Wright, 1957, R.C. Vogt, 1981, Holman, 1982b, 1982e, 1984c, 1987b, Ernst & Barbour, 1989, Powell, 1990, and Conant & Collins, 1991, 1998, Burbrink et al., 2000 and Crother et al., 2011b.

Remarks: Probably occurs in Wisconsin and N Illinois.

10. *Pantherophis slowinskii* (Burbrink, 2002). Mol. Phylogen. Evol. 25: 472–476. (*Elaphe slowinskii*)

Type: Holotype, LSUMZ 55922, an 1122 mm male (J. Boundy and J.B. Slowinski, 6 May 1993).

Type locality: "Longleaf Pine Highway, 0.5 miles west of Hwy 119, Natchitoches Parish, Louisiana," USA.

Distribution: Southern USA (W Louisiana and ext. E Texas), NSL–70 m.

P

11. *Pantherophis spiloides* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 269–270. (*Elaphis spiloides*)

Synonym: *Elaphis spiloides* A.-M.-C. Duméril, 1853 (*nomen nudum*).

Type: Holotype, MNHN 827, an 1176 mm specimen.

Type locality: "Amérique du Nord de La Nouvelle-Orléans" [= New Orleans, Louisiana, USA, 29°57'N, 90°04'W, elevation NSL].

Distribution: Southern Canada (ext. S Ontario) and E and SE USA (Alabama, NE Arkansas, Florida (W panhandle), ? NW Georgia, Illinois, Indiana, Kentucky, SE Louisiana, S Michigan, Mississippi, ext. NW North Carolina, Ohio, cen. and W Pennsylvania, Tennessee, ext. W Virginia, West Virginia and ext. SW Wisconsin), NSL–600 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Tennessee).

Sources: Burbrink et al., 2000, Burbrink 2001 and Gibbs et al., 2006.

Remarks: Type locality in error *fide* Blaney (1971: 424–425) but J. Boundy examined holotype and it is a typical S Louisiana snake. Hybrids exist between *P. alleghaniensis* and *P. spiloides fide* Gibbs et al., 2006.

12. *Pantherophis vulpinus* (Baird & Girard, 1853). Cat. No. Amer. Rept., Serp. 1: 75–76. (*Scotophis vulpinus*)

Synonyms: *Elaphis rubriceps* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Elaphis rubriceps* A.-M.-C. Duméril, Bibron & Duméril, 1854a, and *Elaphe vulpina gloydi* Conant, 1940.

Type: Neotype, USNM 9969, a 1242 mm male (P.R. Hoy), designated by Conant (1940: 10).

Type locality: "Racine, Wisconsin" [= Racine, E Racine Co, E Wisconsin, USA, 42°44'N, 87°47'W, elevation 185 m] via neotype selection.

Distribution: Extreme S Canada (S Ontario) and N USA (Illinois, NW Indiana, Iowa, E Michigan, SE Minnesota, NE Missouri, NE Nebraska, N Ohio, SE South Dakota, Wisconsin), 135–450 m.

Fossil records: Upper Miocene (Hemphillian) of USA (Nebraska), middle Pliocene (Blancan II, III) of USA (Idaho, Nebraska, Texas), upper Pliocene (Blancan V) of USA (Kansas, Nebraska, Washington), lower Pleistocene (Irvingtonian I) of USA (Pennsylvania, South Dakota), middle Pleistocene (Irvingtonian II) of USA (Nebraska), middle/upper Pleistocene (Irvingtonian II) of USA (Arkansas, Maryland, West Virginia), and upper Pleistocene (Rancholabrean I, II) of USA (Alabama, Georgia, Kansas, Missouri, Ohio, Oklahoma, West Virginia, Wisconsin).

Sources: Conant, 1940, A.H. Wright & Wright, 1957, R.C. Vogt, 1981, Holman, 1982b, 1982e, 1984c, 1987b, Ernst & Barbour, 1989, Powell, 1990, and Conant & Collins, 1991, 1998, Collins, 1991, Harding, 1997, Parmley &

Walker, 1998, Burbrink et al., 2000, Parmley & Walker, 2003 and Crother et al., 2011b.

Remarks: Syntypes (USNM 1570, Gross Ile, Michigan, C. Fox, and USNM 7269, Racine, Wisconsin, P.R. Hoy) lost *fide* Conant (1940: 10).

†*PARACOLUBER* Holman, 1970 (Colubridae)

Type species: †*Paracoluber storeri* Holman, 1970.

Distribution: Upper Miocene–lower Pliocene of USA, lower Miocene of USA, middle Miocene of Canada, and upper Miocene of USA.

Sources: Holman, 1976c, 1979a, 2000a, Parmley, 1984, 1988, Rage, 1984b, Parmley & Holman, 1995 and Parmley & Hunter, 2010.

Remarks: Possibly lower Miocene of USA (California).

1. †*Paracoluber storeri* Holman, 1970. Canad. J. Earth Sci. 7(5): 1321, figs. 2a–b.

Type: Holotype, ROM 7707, one posterior trunk vertebra (L.S. Russell & J. Storer, 1967).

Type locality: "Kleinfelder Farm locality, near Rockglen, Saskatchewan, Lsd. 16, Sec. 31, Tp. 2, Rge. 30, W. of 2nd Meridian; Barstovian (Upper Miocene) Wood Mountain Formation" [= middle Miocene].

Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (Wyoming), middle Miocene (Barstovian: 13.6–16.3 mya) of Canada (Saskatchewan), upper Miocene (Hemphillian: 4.9–10.3 mya) of USA (Nebraska, Texas), and upper Miocene/lower Pliocene (Hemphillian) of USA (Indiana).

†*PARAEPICRATES* M.K. Hecht *in* McGrew, 1959 (Boidae)

Type species: †*Paraepicrates brevispondylus* M.K. Hecht *in* McGrew, 1959.

Distribution: Middle Eocene of USA.

Sources: M.K. Hecht, 1959, Kluge, 1988a and Holman, 2000a.

Remarks: A valid genus *fide* Rage (2001: 121).

1. †*Paraepicrates brevispondylus* M.K. Hecht *in* McGrew, 1959. Bull. Amer. Mus. Nat. Hist. 117(3): 143–144, pl. 55, figs. 1–5.

Type: Holotype, AMNH 3829, one middle trunk vertebra (P.O. McGrew & field crews, 1950–1952).

Type locality: "Locality 5 an the south side of Elk Mountain and Tabernacle Butte area at the northern end of the Green River Basin, about 15 miles from the southwest flank of the Wind River Mountains and 25 miles north of the villaage of Farson, in southeast corner of Sublette County, Wyoming (T 27–29N, R 103–106 W), [USA]; late Bridgerian, middle Eocene.

Distribution: Middle Eocene (Bridgerian: 46.2–50.3 mya) of USA (Wyoming)

Remarks: A species of *Lichanura fide* Kluge (1988a: 229).

PARAHELICOPS Bourret, 1934c (Natricidae)

Type species: *Parahelicops annamensis* Bourret, 1934c.

Distribution: Indo-China.

Sources: J.C. Murphy et al., 2008, Ziegler et al., 2008, Zaher et al., 2009, I. Das, 2010, 2012 and Yang et al., 2011.

Remarks: A synonym of *Opisthotropis* Günther *fide* M.A. Smith (1943: 334).

1. *Parahelicops annamensis* Bourret, 1934c. Bull. Gén. Instr. Publ. Hanoi 14(9): 170–171, fig. 2.

Type: Holotype, MNHN 1938.117 (formerly RLB M.327), a 460 mm specimen (R.L. Bourret, 1930–1934).

Type locality: "Bana, station d'altitude située à 1.500m d'altitude au bord de la Baie de Tourane, Annam" [= Ba Na, Da Nang Prov., cen. Vietnam, 15°59'N, 107°59'E, elevation 1500 m].

Distribution: Southern Laos (Xe Kong) and cen. Vietnam (Da Nang, Kon Tum), 1280–1500 m.

Sources: Bourret, 1939d, M.A. Smith, 1943, Orlov et al., 1998, Orlov et al., 2003 and B.L. Stuart, 2006.

2. *Parahelicops boonsongi* E.H. Taylor & Elbel, 1958. Univ. Kansas Sci. Bull. 38(13): 1156–1159, fig. 31.

P

Type: Holotype, FMNH 135328 (formerly RE 5500 & EHT-HMS 31707), a 621+ mm male (R.E. Elbel, 2 June 1955).

Type locality: "Phu Nam Lang (mt.), 1780 m., Ban Khok (subvillage), Na Phung (village), Dan Sai (district), Loei (province), Thailand" [= ca. 17°23'N, 101°06'E].

Distribution: North-central Thailand (SW Loei), 700–1780 m.

Sources: E.H. Taylor, 1965, M.J. Cox, 1991b and M.J. Cox et al., 1998.

Remarks: Possibly occurs in S China, Laos and Vietnam *fide* E.H. Taylor (1965: 841) and M.J. Cox (1991b: 241).

PARAHYDROPHIS Burger & Natsuno, 1974 (Elapidae)

Synonyms: *Parahydrophis* Voris, 1969 *(nomen ineditum)* and *Parhydrophis* – Minton, 1975 *(nomen incorrectum).*

Type species: *Distira mertoni* Roux, 1910b.

Distribution: Tidal rivers and marine waters of Austro-Papua, including Arafura Sea and Gulf of Carpentaria.

Sources: M.A. Smith, 1926a, McDowell, 1969b, 1974b, Burger & Natsuno, 1974, Gow, 1989, Golay et al., 1993, A.R. Rasmussen, 1997, David & Ineich, 1999, Cogger, 2000, Wells, 2007, Zaher et al., 2009 and Hoser, 2012e.
Remarks: Previously a member of *Ephalophis*.

1. *Parahydrophis mertoni* (Roux, 1910b). Abh. Senck. Naturf. Ges. (1910–1911) 33: 222, pl. 13, figs. 4–4a. (*Distira mertoni*)

Type: Holotype, NMBA 6246, a 380 mm male (H. Merton, 5 May 1908).
Type locality: "Sungi Waskai, Wokam, Aru-Inseln, südöstlichen Molukken" [= Sungi Waskai, Wokam Is., Aru Arch., SE Maluku, ext. SE Indonesia, 5°37'S, 134°30'E].
Distribution: Extreme SE Indonesia (Aru Is.) and ext. N Australia (ext. N Northern Territory, NW Queensland), NSL.

†*PARAOXYBELIS* Auffenberg, 1963 (Colubridae)

Type species: †*Paraoxybelis floridanus* Auffenberg, 1963.
Distribution: Lower Miocene of USA.
Sources: Holman, 1979b, 2000a and Rage, 1984b.

1. †*Paraoxybelis floridanus* Auffenberg, 1963. Tulane Stud. Zool. 10(3): 189–190, fig. 39 (left).

Type: Holotype, UF 5134, one trunk vertebra (W. Auffenberg, March 1954).
Type locality: "Boulder Bar, Thomas Farm, Gilchrist County, Florida (R15E, T7S, Sec. 20); Hawthorne fm., Lower Miocene (zone B) (Arikareean)" [= early Hemingfordian *fide* Woodburne, 1987: 201].
Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (Florida). Known only from type locality.
Remarks: Holotype erroneously listed as UF 5143 *fide* Auffenberg (1963: 190). Taxonomic status doubtful *fide* Rage (1984b: 50): possibly an *Oxybelis, Leptophis* or *Uromacer*.

PARAPHIMOPHIS Grazziotin, Zaher, Murphy, Scrocchi, Benavides, Zhang & Bonatto, 2012 (Xenodontidae)

Type species: *Oxyrrhopus rusticus* Cope, 1878b.
Distribution: Southern South America.
Sources: Achaval, 1973, Halloy & Laurent, 1984, Cei, 1986, Scrocchi & Viñas, 1990, Marques & Lema, 1992, Cei, 1994, Giraudo & Arazamendia, 1997a, Leynaud & Bucher, 1999, Cabrera, 2004, Carriera et al., 2005 and Scolaro, 2005, 2006.

1. *Paraphimophis rusticus* (Cope, 1878b). Proc. Amer. Philos. Soc. (1877) 17(101): 92–93. (*Oxyrrhopus rusticus*)

Type: Holotype, ANSP 11326 (formerly SIM).
Type locality: "supposed to be the Argentine Confederation" [= Argentina].
Distribution: Southern South America. Southeastern Brazil (S Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo), Paraguay, Uruguay (Artigas, Canelones, Colonia, Maldonado, Montevideo, Rio Negro, Salto, San José) and Argentina (Buenos Aires, Chubut, Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, La Pampa, Mendoza, Misiones, Nequén, Rio Negro, Salta, San Luis, Santa Fe, Santiago del Estero, Tucumán).
Remarks: Previously in the genus *Clelia*.

PARAPISTOCALAMUS Roux, 1934 (Elapidae)

Type species: *Parapistocalamus hedigeri* Roux, 1934.
Distribution: Eastern Papua New Guinea.
Sources: E.E. Williams & Parker, 1964, McDowell, 1969a, 1987, M. McCoy, 1980, Golay et al., 1993, O'Shea, 1996, David & Ineich, 1999 and Zaher et al., 2009.

1. *Parapistocalamus hedigeri* Roux, 1934. Verh. Naturf. Ges. Basel 45: 78–80, figs. 1–2.

Synonym: *Denisonia furva* Brazenor, 1947.
Type: Holotype, NMBA 11967, a 305 mm female (H. Hediger, 1931–1934).
Type locality: "Distr. Buin, S. de l'île Bougainville (l'Archipel des Salomon)" [= Buin Distr., S Bougainville Is., N Solomon Arch., E Papua New Guinea, 6°50'S, 155°44'E].
Distribution: Papua New Guinea (N Solomons: SE Bougainville), NSL–610 m.

†*PARAPLATYSPONDYLIA* Holman & Harrison, 1998b (Boidae)

Type species: †*Paraplatyspondylia batesi* Holman & Harrison, 1998b.
Distribution: Upper Eocene of United Kingdom.
Sources: Holman & Harrison, 1998b and Rage, 2011.

1. †*Paraplatyspondylia batesi* Holman & Harrison, 1998b. Acta Zool. Cracov. 41(1): 24–27, fig. 1a–e.

Type: Holotype, MSUVP 1434, one middle trunk vertebra (D.L. Harrison field crew, 1995).

Type locality: "Hordle Cliff, Hampshire, England. Rodent Bed in the upper part of the Totland Bay Member, MP17, of the Headon Hill Formation (Upper Eocene).
Distribution: Upper Eocene (Priabonian, MP 17: 33.9–37.2 mya) of United Kingdom (England). Known only from type locality.

PARAPOSTOLEPIS Amaral, 1930d (Xenodontidae)

Type species: *Apostolepis polylepis* Amaral, 1922a.
Distribution: Northeastern Brazil.
Sources: J.A. Peters & Orejas-Miranda, 1970, Amaral, 1978, Lema, 2003b, and Hofstadler-Deiques & Lema, 2005.
Remarks: A valid genus *fide* Lema *(pers. comm.).*

1. *Parapostolepis polylepis* (Amaral, 1922a). Anex. Mem. Inst. Butantan (1921) 1(1): 13–14, pl. 1, figs. 5–8. *(Apostolepis polylepis)*

Type: Holotype, IB 1681, a 620 mm female (F. de Assis-Iglesias, 1916–1918), destroyed by fire 15 May 2010.
Type locality: "Povoação Eng.ro Dodt, município de Santa Filomena, Estado do Piauí, Brasil" [= Engenheiro Dodt, Santa Filomena, Piauí State, Brazil, 8°49'S, 45°56'W, elevation 270 m].
Distribution: Northeastern Brazil (S Piauí), 270 m.

PARARHABDOPHIS Bourret, 1934a (Natricidae)

Type species: *Pararhabdophis chapaensis* Bourret, 1934a.
Distribution: Northern Vietnam.
Sources: Bourret, 1936b, M.A. Smith, 1943, Orlov et al., 2003, V.S. Nguyen et al., 2009, Zaher et al., 2009 and I. Das, 2010, 2012.

1. *Pararhabdophis chapaensis* Bourret, 1934a. Bull. Gén. Instr. Publ. Hanoi 14(7): 131–132, fig. 2.

Type: Holotype, MNHN 1938.125 (formerly RLB M.270), a 690+ mm male (R.L. Bourret, 1930–1931).
Type locality: "Chapa, province de Laokay (Tonkin), à l'altitude moyenne de 1.600 m., Indochine française" [= Sa Pa, NW Lao Cai Prov., ext. N Vietnam, 22°21'N, 103°50'E, elevation 1500–1600 m].
Distribution: Northern Vietnam (NW Lao Cai), 1500–1600 m. Known only from the holotype.

PARARHADINAEA Boettger, 1898 (Pseudoxyrhophiidae)

Synonyms: *Pseudorhadinaea* Boulenger, 1899e *(nomen substitutum), Rhabdotophis* F. Werner, 1909d, and *Pararhadinea* – Boettger, 1913 *(nomen incorrectum).*
Type species: *Pararhadinaea melanogaster* Boettger, 1898.
Distribution: Madagascar.
Sources: Guibé, 1958, Domergue, 1984b, Glaw & Vences, 1994, Raxworthy & Nussbaum, 1994, Cadle, 1999, Kelly et al., 2009 and Zaher et al., 2009.
Remarks: *Pararhadinaea albignaci* Domergue has been transferred to *Exallodontophis fide* Cadle, 1999.

1. *Pararhadinaea melanogaster* Boettger, 1898. Kat. Rept. Senck. Mus. 2: 33–34.

Synonyms: *Rhabdotophis subcaudalis* F. Werner, 1909d and *Pararhadinaea melanogaster marojejyensis* Domergue, 1984b.
Type: Holotype, SMF 17885 (formerly SMF-B 7313,1a), a female (A. Voeltzkow, 1897).
Type locality: "Insel Nossibé" [Madagascar], [= Nosy Be Is., W Antsiranana Prov., ext. NW Madagascar, bet. 13°12'–25'S and 48°10'–22'E, elevation < 225 m].
Distribution: Northern Madagascar (N Antsiranana, Nosy Be Is.), 30–500 m.
Sources: F. Werner, 1909d, 1929a, Boettger, 1913, Mertens, 1967a, Domergue, 1984b, Glaw et al., 2005b and Franzen et al., 2009.

PARASUTA Worrell, 1961c (Elapidae)

Type species: *Elaps gouldii* Gray, 1841a.
Distribution: Australia.
Sources: Worrell, 1961c, Cogger et al., 1983a, Wallach, 1985, Longmore, 1986, Storr et al., 1986, Gow, 1989, Hutchison, 1990, Greer, 1997, Keogh et al., 1998, Cogger, 2000, Sanders et al., 2008 and Hoser, 2012e.

1. *Parasuta dwyeri* (Worrell, 1956). Aust. Zool. 12(3): 202–203, figs. 1a–c, 3. (*Denisonia dwyeri*)

Synonym: *Parasuta robertsoni* Wells and Wellington, 1985.
Type: Holotype, AMS 14808, a 309 mm specimen (W. Dunmall).
Type locality: "Glenmorgan area, Queensland" [= vicinity of Glenmorgan, SE Queensland, E Australia, 27°15'S, 149°41'E, elevation 290 m].
Distribution: Southeastern Australia (Australian Capital Territory, New South Wales, ext. SE Queensland, NE Victoria), NSL–1395 m.
Sources: Coventry, 1971 and Shea & Sadlier, 1999.
Remarks: A subspecies of *Suta spectabilis fide* Cogger (1992: 692).

P

2. *Parasuta flagellum* (F. McCoy, 1878d). Prod. Zool. Victoria 2: 7–8, pl. 11, figs. 1, 1a–d. (*Hoplocephalus flagellum*)

Synonyms: *Hoplocephalus flagellum* McCoy, 1867 (*nomen nudum*) and *Parasuta harveyi* Wells & Wellington, 1985.
Type: Lectotype, NMV D4259, a 311 mm specimen, designated by Coventry (1970: 122).
Type locality: "Boroondara, Victoria" [=Boroondara (37°50'S, 145°03'E, elevation 80 m) (or Kew East (37°48'S, 145°03'E, elevation 50 m *fide* Coventry, 1970: 122), S Victoria, ext. SE Australia] via lectotype selection.
Distribution: Southeastern Australia (Australian Capital Territory, SE New South Wales, ext. S South Australia, Victoria, Kangaroo Is.), 10–590 m.

3. *Parasuta gouldii* (Gray, 1841a). Ann. Mag. Nat. Hist. 7(42): 91. (*Elaps gouldii*)

Type: Holotype, BMNH 1946.1.21.73, a female (J. Gould, 1837–1839).
Type locality: "Western Australia."
Distribution: Southwestern Australia (SW Western Australia), NSL–445 m.
Sources: Storr, 1981c and Bush et al., 1995.
Remarks: A member of *Rhinoplocephalus fide* Bush et al., 1995.

4. *Parasuta monachus* (Storr, 1964). West. Aust. Nat. 9(4): 89–90. (*Denisonia monachus*)

Type: Holotype, WAM 20606 (J. Douglas, 26 June 1963).
Type locality: "Kalgoorlie, Western Australia; Lat. 30° 43' S, Long. 121° 27' E" [= Kalgoorlie, S Western Australia, SW Australia, 30°45'S, 121°28'E, elevation 385 m].
Distribution: Southwestern Australia (SW Northern Territory, South Australia, S Western Australia), 105–835 m.
Sources: Storr, 1981c and Hoser, 1989.

5. *Parasuta nigriceps* (A.C.L.G. Günther, 1863c). Ann. Mag. Nat. Hist. (3) 12(71): 362. (*Hoplocephalus nigriceps*)

Synonym: *Denisonia nigrostriata brevicauda* F.J. Mitchell, 1951.
Type: Holotype, BMNH 1946.1.20.70, a 406 mm male.
Type locality: "probably from Australia."
Distribution: Southern Australia (SW New South Wales, S South Australia, NW Victoria, S Western Australia, Flinders Is.), NSL–630 m.
Sources: Coventry, 1971, Storr, 1981c and Bush et al., 1995.

P

6. *Parasuta spectabilis* (Krefft, 1869b). Snakes Aust.: 61, pl. 12, fig. 4. (*Hoplocephalus spectabilis*)

Synonyms: *Denisonia spectabilis nullarbor* Storr, 1981e and *Rhinoplocephalus spectabilis bushi* Storr, 1988.
Types: Syntypes (6), AMS 131133–35 (formerly AMS 6593–95), AMS 131137 (formerly AMS 6597), AMS 131139 (formerly AMS 6599), and BMNH 1866.6.13.1, longest syntype 305 mm (G. Masters).
Type locality: "Port Lincoln, South Australia" [= Port Lincoln, S South Australia, S Australia, 34°44'S, 135°52'E, elevation NSL].
Distribution: Southern Australia (New South Wales, South Australia, W Victoria, SE Western Australia), NSL–1095 m.
Sources: Storr, 1981c, Hoser, 1989 and Shea & Sadlier, 1999.

PARATAPINOPHIS Angel, 1929 (Natricidae)

Type species: *Paratapinophis praemaxillaris* Angel, 1929.
Distribution: Northern Indochina.
Sources: Deuve, 1970, J.B. Rasmussen, 1982a, Mo et al., 1984, Zhao, 2006, J.C. Murphy et al., 2008, I. Das, 2010, 2012, David et al., 2011 and Yang et al., 2011.

1. *Paratapinophis praemaxillaris* Angel, 1929. Bull. Mus. Hist. Nat., Paris (2) 1(1): 78, figs. a–d.

Types: Syntypes (2), MNHN 1928.63–64, a 214 mm and 210 mm specimen (J.T. Delacour [Second Delacour-Lowe Mission], 15 Dec. 1925–13 Jan. 1926).
Type locality: "Xieng-Khouang, Haut-Laos" [= Xieng Khoang, Xiangkhouang Prov., N Laos, 19°17'N, 103°25'E].
Distribution: Northern Indochina. Southern China (Yunnan), N Thailand (Nan, Chiang Mai) and N Laos (Xiangkhouang), 475–1400 m.

†*PARAUNGALIOPHIS* Rage, 2011 (Ungaliophiidae)

Type species: †*Paraungaliophis pricei* Rage, 2011.
Distribution: Middle Palaeocene of Brazil.
Source: Rage, 2011.

1. †*Paraungaliophis pricei* Rage, 2011. Palaeovertebrata (2008) 36(1–4): 41–44, fig. 1.

Type: Holotype, DMG 1365-R, one middle trunk vertebra.
Type locality: "Itaboraí, State of Rio de Janeiro, Brazil; middle Palaeocene."
Distribution: Middle Paleocene (Itaboraian, 57.0–59.0 mya) of Brazil.

PAREAS Wagler, 1830 (Pareatidae)

Synonyms: *Pareos* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum), Eberhardtia* Angel, 1920c, *Eberhardia* – Neave, 1939 *(nomen incorrectum), Parea* – Nutaphand, 1991b *(nomen incorrectum), Dannyleeus* Hoser, 2012q *(nomen illegitimum),* and *Katrinahoserserpenea* Hoser, 2012q *(nomen illegitimum).*

Type species: *Pareas carinatus* Wagler, 1830.

Distribution: Eastern and SE Asia and W Indonesia.

Sources: Boulenger, 1914c, Wall, 1922c, Maki, 1931, C.H. Pope, 1935, Bourret, 1936b, Deuve, 1970, Rao & Yang, 1992, Zhao & Adler, 1993, K. Guo & Deng, 2009, Zaher et al., 2009, I. Das, 2010, 2012, Y. Guo et al., 2011 and Hoser, 2012q.

Remarks: Consists of two clades, with *P. carinatus* and *P. nuchalis* possibly a separate genus *fide* Y. Guo et al. (2011: 61) and Pyron et al. (2011: 334).

1. *Pareas boulengeri* (Angel, 1920a). Bull. Mus. Hist. Nat., Paris 26(2): 113–114. (*Amblycephalus boulengeri*)

Types: Syntypes (3), MNHN 1912.349–51, a 470 mm, 460 mm and 182 mm specimen (R.P. Cavalerie).

Type locality: "Koeï Tchéou (Chine)" [= Guizhou Prov., SE China, ca. 27°N, 107°E].

Distribution: China (Anhui, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Henan, Hunan, Jiangsu, Jiangxi, Shaanxi, Sichuan, Yunnan, Zhejiang), 315–1360 m.

Sources: C.H. Pope, 1929, Chang, 1936, Wen, 1983, Zhao, 2006 and Yao, 2012.

Remarks: A subspecies of *P. monticolus fide* Bourret (1936b: 426).

2. *Pareas carinatus* Wagler, 1830. Nat. Syst. Amph.: 181.

Synonyms: *Amblycephalus carinatus* H. Boie *in* Schlegel, 1826a (*nomen nudum*), *Amblycephalus carinatus* Schlegel, 1826b (*nomen nudum*), *Amblycephalus carinatus* H. Boie, 1828 (*nomen nudum*), *Pareas berdmorei* Theobald, 1868b, and *Amblycephalus carinatus unicolor* Bourret, 1934d.

Types: Syntypes (4), RMNH 954a–b and BMNH, a male (formerly RMNH) (C.G.C. Reinwardt, 1816–1821).

Type locality: "Asia." Emended to Java *fide* RMNH catalogue and Schlegel (1837: 286).

Distribution: Southeast Asia and Indonesia. Southern China (Yunnan), S Myanmar (Tanintharyi), Thailand (Chiang Mai, Chiang Rai, Chumphon, Kanchanaburi, Lamphum, Loei, Nakhon Ratchasima, Nakhon Si Tammarat, Narathiwat, Pattani, Phetchabun, Saraburi, Songkhla, Tak, Uthai Thani), N Laos (Bolikhamsai), S Cambodia (Koh Kong, Kampong Chhnang, Kampong Speu, Kampot, Mondulkiri), Vietnam (Dok Lak, Dong Nai, Lang Dong, Quang Binh, Quang Nam, Quang Tri, Son La, Tay Ninh, Vinh Phu), N West Malaysia (Terengganu), East Malaysia (Sabah), Brunei and Indonesia (Bali, Java, Kalimantan, Lombok, Sumatra), 20–1780 m.

Sources: Schlegel, 1837, Rooij, 1917, M.A. Smith, 1923a, 1930a, 1943, Wall, 1925a, Brongersma, 1929, Cochran, 1930, Kopstein, 1930, 1938, 1941, Mertens, 1930, Bourret, 1935c, 1936b, C. Haas, 1950, E.H. Taylor & Elbel, 1958, E.H. Taylor, 1965, Campden-Main, 1970a, Saint-Girons, 1972a, Capocaccia, 1976, Tweedie, 1983, M.J. Cox, 1991b, Stuebing, 1991, David & Vogel, 1996, M.J. Cox et al., 1998, Chan-ard et al., 1999, Orlov et al., 2000, McKay, 2006, B.L. Stuart & Emmett, 2006, Ziegler et al., 2006, Bain et al., 2007, I. Das, 2007b, and V.S. Nguyen et al., 2009.

Remarks: Official Specific Name no. 2452 *fide* Opinion 963 (ICZN, 1971).

3. *Pareas chinensis* (T. Barbour, 1912a). Mem. Mus. Comp. Zool. 40(4): 132, pl. 2, fig. 1. (*Amblycephalus chinensis*)

Synonyms: *Amblycephalus kuangtungensis* T. Vogt, 1922, *Amblycephalus yunnanensis* T. Vogt, 1922, and *Amblycephalus niger* C.H. Pope, 1928b.

Type: Holotype, MCZ 7326, a 463 mm female (W.R. Zappey & J.E. Thayer [Arnold Arboretum Exped.], 1909).

Type locality: "Luluping, western Szechwan, China." [= E and S of Washan at ca. 29°44'N, 103°15'E *fide* C.H. Pope, 1935: 371]. Restated as Lu-lu-ping *fide* T. Barbour & Amaral (1929: 210).

Distribution: Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hong Kong, Jiangsu, Jiangxi, Sichuan, Yunnan, Zhejiang) and N Vietnam (Hoang Lien Son), 500–2200 m.

Sources: C.H. Pope, 1929, Bourret, 1934a, Chang, 1936, B.Q. Hu et al., 1959, 1980, Tian et al., 1986, Wu et al., 1979, Huang et al., 1990, Ota et al., 1997 and Zhao, 2006.

Remarks: Official Specific Name no. 2092 *fide* Opinion 744 (ICZN, 1965b). A subspecies of *P. monticola fide* Bourret (1936b: 426). Possibly a synonym of *P. formosus fide* Jiang, 2004.

4. *Pareas formosensis* (Van Denburgh, 1909). Proc. California Acad. Sci. (4) 3(3): 55. (*Amblycephalus formosensis*)

Synonyms: *Psammodynastes compressus* Oshima, 1910 and *Amblycephalus komaii* Maki, 1931.

Type: Holotype, CAS 18006, a 274 mm specimen (V. Kühne, 27 March 1909).

Type locality: "Kanshirei, Formosa" [= Kuan-tzu Ling, Baihe Distr., Tainan Prov., SW Taiwan, 23°21'N, 120°30'E, elevation 365 m].

Distribution: Taiwan (Chiayi, Kaohsiung, Nantou, Pingtung, Tainan, Taipei), 315–500 m.

Sources: C.S. Wang & Wang, 1956, Kuntz, 1963, Lue et al., 1989, Lue, 1990, Lue & Lai, 1992, Ota et al., 1997 and Xiang & Li, 2009.

5. *Pareas hamptoni* (Boulenger, 1905f). J. Bombay Nat. Hist. Soc. (1904–1905) 16(2): 236, pl., fig. 2. (*Amblycephalus hamptoni*)

Synonyms: *Eberhardtia tonkinensis* Angel, 1920c, and *Amblycephalus carinatus hainanus* M.A. Smith, 1923a.

Type: Holotype, BMNH 1946.1.20.16, a 555 mm male (H. Hampton, 1898–1905).

Type locality: "the neighbourhood of Mogok, Upper Burma" [= vicinity of Mogok (22°55'N, 96°30'E, elevation 1135 m), SE Sagaing Div., N Mandalay State, N Myanmar].

Distribution: Southeastern Asia. Southern China (Guizhou, Guangxi, Hainan, Yunnan), N Myanmar (Kachin, N Mandalay, Shan), NE Thailand (Narathiwat, Tak), N Laos (Champasak, Xaignbouli) and Vietnam (Bac Kan, Bac Thai, Binh Tri Thien, Cao Bang, Dak Lak, Dong Nai, Ha Giang, Hai Duong, Ha Tinh, Kon Tum, Lam Dong, Lao Cai, Quang Binh, Quang Nam, Thai Nguyen, Vinh Phuc), 500–1980 m.

Sources: Wall, 1905e, 1922c, Bourret, 1934c, 1935b–c, 1937b, 1939a, 1939d, M.A. Smith, 1943, E.H. Taylor, 1965, Romer, 1966, 1979a, Deuve, 1970, Campden-Main, 1970a, B.Q. Hu et al., 1980, Tian et al., 1986, M.J. Cox, 1991b, Ota et al., 1997, Orlov et al., 2000, Zhao, 2006, Ziegler et al., 2007, V.S. Nguyen et al., 2009, I. Das, 2010 and Vogel, 2010.

Remarks: Possibly occurs in Thailand (Nan) *fide* M.J. Cox (1991b: 259).

P

6. *Pareas iwasakii* (M. Maki, 1937). Trans. Nat. Hist. Soc. Formosa 27(169): 217–218, 3 figs. (*Amblycephalus formosensis iwasakii*)

Type: Holotype, ? KUM, a 220 mm male (Iwasaki, 26 Jan. 1937), lost *fide* Toriba (1993: 72).

Type locality: "Ishigaka-jima, Riukyu Archipelagoes" [= Ishigakishima Is., Yaeyama Group, S Ryukyu Arch., ext. S Japan, 24°24'N, 124°12'E].

Distribution: Extreme S Japan (Ryukyus: Iriomotejima and Ishigakijima Is.).

Sources: Takara, 1962, Nakamura & Uéno, 1963, M. Mori, 1984, 1986 and Ota et al., 1997.

7. *Pareas macularius* Theobald, 1868a. J. Linn. Soc. London (Zool.) 10(41): 54–55.

Synonyms: *Pareas modestus* Theobald, 1868a, *Pareas andersonii* Boulenger, 1888h, and *Amblycephalus tamdaoensis* Bourret, 1935c.

Types: Syntypes (3), BMNH 1925.12.22.1, BMNH 1926.3.17.9, and BMNH 1946.1.20.8 (formerly IMC 8024–26), longest syntype 610 mm (T.M. Berdmore, 1855–1856 via W. Theobald, Jr.).

Type locality: "Tenasserim" [= Tanintharyi Div., S Myanmar]. Emended to Martaban, Tenasserim [= Mottama, Mon Div., S Myanmar, 16°34'N, 97°37'E, elevation 10 m] *fide* Sclater (1891: 67).

Distribution: Southeastern Asia. Northeastern India (Sikkim, West Bengal), Bangladesh, S China (Guangdong, Guangxi, Guizhou, Yunnan), Myanmar (Kachin, Mandalay, Mon, Shan, Tanintharyi, Yangon), N Thailand (Chiang Mai), N Laos (Xiangkhouang) and N Vietnam (Bac Kan, Cao Bang, Hai Duong, Hoa Binh, Lai Chau, Nghe An, Quang Binh, Vinh Phuc), NSL–1300 m.

Sources: Wall, 1926b, Rendahl, 1937, M.A. Smith, 1943, E.H. Taylor & Elbel, 1958, E.H. Taylor, 1965, B.Q. Hu et al., 1980, Murthy, 1986, Tian et al., 1986, M.A.R. Khan, 1988, M.J. Cox, 1991b, Huang, 2004, Whitaker & Captain, 2004, Ziegler et al., 2007 and V.S. Nguyen et al., 2009.

Remarks: Theobald (1868a: 55) listed two syntypes from Tenasserim in ASB but Sclater (1891: 67) listed three (IMC 8024–26) as syntypes from Martaban, Tenasserim (all collected by Berdmore).

8. *Pareas margaritophorus* (Jan *in* Bocourt, 1866). Nouv. Arch. Mus. Hist. Nat. 2(1): 8. (*Leptognathus margaritophorus*)

Synonyms: *Pareas macularius* Blyth, 1859 (*nomen nudum*), *Pareas modestus* Theobald, 1868, *Pareas moellendorffi* Boettger, 1885b, *Pareas andersonii* Boulenger, 1888, and *Amblycephalus tamdaoensis* Bourett, 1935.

Type: Holotype, MNHN 599, a 250 mm specimen (F. Bocourt, 1861).

Type locality: "des provinces méridionales du Royaume de Siam" [= southern provinces of Thailand]. Probably the vicinity of Bangkok, Thailand *fide* Milne-Edwards (1866: 1).

Distribution: Southeastern Asia. Southern China (Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Lantan, Stonecutter's Is.), S Myanmar (Tanintharyi), Thailand (Champasak, Chanthaburi, Chiang Mai, Krung Thep Mahanakhon, Nakhon Ratchasima, Narathiwat, Pattani), Cambodia (Kampon Speau, Kampot, Koh Kong, Oddar Meanchey, Pursat, Stung Treng), Laos (Bolikhamsai, Vientiane, Xiangkhouang), Vietnam (Gia Lai, Hai Duong, Ha Tay, Hoa Binh, Ho Chi Minh City, Kien Giang, Lam Dong, Ninh Binh, Quang Tri, Tay Ninh, Vinh Phuc), N West Malaysia (Johor, Kedah, Kelantan, Perak, Perlis) and Singapore, NSL–1640 m.

Sources: Flower, 1899, K.P. Schmidt, 1927b, Cochran, 1930, Fan, 1931, Bourret, 1934b, 1939b, M.A. Smith, 1943, Deuve, 1962d, 1970, E.H. Taylor, 1965,

Campden-Main, 1970a, Saint-Girons, 1972a, Romer, 1979a, B.-Q. Hu et al., 1980, Tweedie, 1983, Tian et al., 1986, M.J. Cox, 1991b, M.J. Cox et al., 1998, Chanard et al., 1999, Orlov et al., 2000, B. Lee and Koh, 2005, B.L. Stuart et al., 2006, Grismer et al., 2008a, V.S. Nguyen et al., 2009 and T. Hartmann et al., 2013.

Remarks: Occurs in Brunei *fide* I. Das (2007: 20).

9. *Pareas monticola* (Cantor, 1839b). Proc. Zool. Soc. London 7(1): 53–54. (*Dipsas monticola*)

Synonym: *Pareas nuchalis* A.C.L.G. Günther, 1863c (*nomen nudum*).

Type: Holotype, BMNH 1946.1.20.5 (formerly OUM), a male (T.E. Cantor, 1834–1839, via British East India Comp.).

Type locality: "Naga Hills (Asám)" [= Nagaland State, NE India].

Distribution: Southern Asia. Northeastern India (Arunachal Pradesh, Assam, Meghalaya, Mizoram, Nagaland, North Bengal, Sikkim), Bangladesh, SW China (Yunnan, Xizang), N Myanmar (Chin) and Vietnam (Lao Cai, Vinh Phu), 100–2500 m.

Sources: Wall, 1908c , 1909d , 1910c, 1922c, Annandale, 1912, M.A. Smith, 1943, Swan & Leviton, 1962, Murthy, 1986, Tian et al., 1986, M.A.R. Khan, 1988, Orlov et al., 2000, 2003, Ahmed et al., 2009, V.S. Nguyen et al., 2009 and I Das, 2010.

Remarks: Nicobar Is. record rejected *fide* Wall (1922c: 23) and (1925a: 245).

10. *Pareas nigriceps* K. Guo & Deng, 2009. Zootaxa (2008): 54–58, figs. 1a–d, 2.

Type: Holotype, HNU 200505004, a 521 mm male (H.-M. Yan and K.-J. Guo, 28 May 2005).

Type locality: "Xiaohei Hill, Gaoligong Mountains National Nature Reserve (24.83671ºN 98.76185ºE, 2067 m a.s.l.), Longling County, Baoshan District, Yunnan province, Perople's [sic] Republic of China."

Distribution: Southern China (W Yunnan), 2010–2070 m.

Remarks: Holotype length listed as 396 mm *fide* K. Guo & Deng (2009: fig. 2).

11. *Pareas nuchalis* (Boulenger, 1900f). Proc. Zool. Soc. London 69(2): 185, pl. 17, figs. 1, 1a–b. (*Amblycephalus nuchalis*)

Type: Holotype, SMK, a 490 mm specimen (A.H. Everett, 1869–1872).

Type locality: "Matang, Borneo" [= Kampong Matang, First Division, Kidi Distr., W Sarawak, East Malaysia, 1°35'N, 110°14'E, elevation 15 m].

Distribution: Borneo. East Malaysia (Sabah, Sarawak) and cen. Indonesia (Kalimantan), 15–850 m.

Sources: C. Haas, 1950, Stuebing, 1991 and Malkmus et al.,2002.

Remarks: C. Haas (1950: 529) erroneously listed the type as being in BMNH.

12. *Pareas stanleyi* (Boulenger, 1914c). Ann. Mag. Nat. Hist. (8) 14(84): 484. (*Amblycephalus stanleyi*)

Synonym: *Amblycephalus sinensis* Stanley, 1917.

Type: Holotype, BMNH 1946.1.20.4, a 440 mm male (A. Stanley, 1898–1914).

Type locality: "N. W. Fokien, China" [= NW Fujian Prov., SE China]. Emended to Kuatun, village in the mountains of Ch'ungan Hsien, NW Fukien, China *fide* C.H. Pope (1929: 462), [= Guadun, in Wuyishan Mtns., ext. N Fujian Prov., SE China, 27°45'N, 117°50'E, elevation 900–1200 m].

Distribution: Southeastern China (Fujian, Guizhou, Hunan, Jiangxi, Sichuan, Zhejiang), 365–1200 m.

Source: Zhao, 2006.

PARIAS Gray, 1849a (Viperidae)

Synonyms: *Rerias* – Kingsley, 1888 *(nomen incorrectum)* and *Pareas* – Hoffmann, 1890 *(nomen incorrectum).*

Type species: *Megaera flavomaculatus* Gray, 1842b.

Distribution: Malay Peninsula and East Indies.

Sources: Maslin, 1942, M.A Smith, 1943, Maslin, 1945, Klemmer, 1963, Leviton, 1964d, W. Burger, 1971, Hoge & Romano-Hoge, 1981a, Malhotra & Davis, 1991, Golay et al., 1993, Kraus et al., 1996, David & Vogel, 1998, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Malhotra & Thorpe, 1997, 2000, 2004c, Ziegler et al., 2001, Giannasi et al., 2001a, G. Peng & Fuji, 2001, David et al., 2002, 2009, 2011, Gumprecht et al., 2004c, Castoe & Parkinson, 2006, Grismer et al., 2006a, 2008b, Sanders et al., 2006, Dawson et al., 2008, Ganesh et al., 2008, Orlov et al., 2008, 2009, I. Das, 2010, 2012, David et al., 2011c, P. Guo & Wang, 2011, Sumontha et al., 2011 and Hoser, 2012d, o.

1. *Parias flavomaculatus* (Gray, 1842b). Zool. Misc. 2(Mar.): 49. (*Megaera flavomaculatus*)

Synonyms: *Megaera ornata* Gray, 1842b, *Megaera variegata* Gray, 1842b, *Trimeresurus schadenbergi* J.G. Fischer, 1885b, *Trimerisurus halieus* L.E. Griffin, 1910, and *Trimeresurus mcgregori* E.H. Taylor, 1919.

Type: Lectotype, BMNH 1946.1.19.34 (formerly BMNH I.3.la), an adult male (H. Cuming, 1836–1840), designated by Iskandar & Colijn (2001: 158).

Type locality: "Philippine Islands" via lectotype selection. Restricted to Luzon Is., Philippines *fide* Leviton (1964b: 260).

Distribution: Philippines (Agutayan, Batan, Bohol, Camiguin, Catanduanes, Dinagat, Jolo, Leyte, Luzon,

Mindanao, Mindoro, Negros, Penay, Polillo), 400–800 m.

Sources: Leviton, 1964b, 1964d, Ross & Lazell, 1991, Ross & Gonzales, 1992, Lamar, 1997b, Sajdak, 2010 and Siler et al., 2011.

2. *Parias hageni* (Lidth de Jeude, 1886). Notes Leyden Mus. 8: 52–54, pl. 2, fig. 6. (*Bothrops hageni*)

Type: Lectotype, RMNH 819 (B. Hagen, 1881–1886), designated by Brongersma (1933c: 7).

Type locality: "Deli, Sumatra" [= Deli, North Sumatra Prov., Sumatra, W Indonesia, 3°37'N, 98°44'E, elevation 20 m] via lectotype selection.

Distribution: Malay Peninsula and Sumatra. Peninsular Thailand (Pattani, Phang Nga, Songkhla, Surat Thani, Trang), Singapore, West Malaysia (Johor, Pahang, Perak, Selangor) and Indonesia (Batu, Bangka, Mentawai Arch., Nias, Simeulue, Sumatra), 20–1000 m.

Sources: Brongersma, 1933c, Grandison, 1972, Tweedie, 1983, M.J. Cox, 1991b, B.L. Lim, 1991, B.L. Lim et al., 1995, David & Vogel, 1996, M.J. Cox et al., 1998, David & Vogel, 1998, Chan-ard et al., 1999, Ryabov et al., 2002, Sanders et al., 2002 and I. Das, 2010.

3. *Parias malcomi* (Loveridge, 1938a). Proc. Biol. Soc. Washington 51: 45. (*Trimeresurus sumatranus malcolmi*)

Type: Holotype, MCZ 43604, a 1060 mm male (J.A. Griswold, Jr. [Harvard Primate Exped.], 20 July 1937).

Type locality: "Sungii River, near Bundutuan, Mount Kinabalu, British North Borneo, at an altitude *circa* 3,000 feet" [= Sungii River, vicinity of Bundu Tuhan, Mt. Kinabalu, Sabah, East Malaysia, elevation 915 m].

Distribution: East Malaysia (Sabah) and Brunei, 915–1700 m.

Sources: Stuebing & Inger, 1998, Keller, 2008 and I. Das, 2012.

Remarks: A valid species *fide* Stuebing & Inger (1998: 227).

P

4. *Parias mcgregori* (E.H. Taylor, 1919). Philippine J. Sci. 14D(1): 110–111, figs. 1a–c. (*Trimeresurus flavomaculatus mcgregori*)

Type: Neotype, CAS 60525, a female, designated by Leviton (1964d: 262).

Type locality: "Batan Island, Philippines" [= Batan Is., Batanes Prov., ext. N Philippines] via neotype selection.

Distribution: Extreme N Philippines (Batan, Sabtang).

Source: Gumprecht, 2002.

Remarks: Holotype (BSM 748, an 865 mm R.C. McGregor, 12 June 1907) destroyed January 1945 during World War II.

5. *Parias schultzei* (L.E. Griffin, 1909b). Philippine J. Sci. 4A(1): 601. (*Trimeresurus schultzei*)

Type: Holotype, PNM 315 *fide* E.H. Taylor (1922a: 294), a 330 mm specimen (W. Schultze), destroyed Jan. 1945 during World War II.

Type locality: "Iwahig, Palawan" [= Iwahig, cen. Palawan Is., SW Philippines, ca. 9°44'N, 118°40'E, elevation NSL].

Distribution: Philippines (Balabac, Palawan).

Sources: Leviton, 1964d and Alcala, 1986.

6. *Parias sumatranus* (Raffles, 1822). Trans. Linn. Soc. London 13(2): 334. (*Coluber sumatranus*)

Synonyms: *Coluber sumatrensis* H. Boie *in* Schlegel, 1826a *(nomen emendatum)* and *Trigonocephalus formosus* Müller & Schlegel, 1844a *in* Temminck, 1842–1845.

Type: Holotype, not designated, a 1220–1525 mm specimen (T.S.B. Raffles, Mar.–Dec. 1818), location unknown.

Type locality: "Island of Sumatra" [W Indonesia]. Restricted herein to vicinity of Bengkulu city, SW Sumatra, W Indonesia.

Distribution: Malay Peninsula and Greater Sundas. Peninsular Thailand (Narathiwat, Pattani), West Malaysia (Johor, ? Kedah, ? Kelantan, ? Perak, Perlis), Singapore, East Malaysia (Sabah, Sarawak) and Indonesia (Bangka, Belitung, N Kalimantan, Mentawai Arch., Nias, Simeulue, Sumatra), NSL–1000 m.

Sources: M.A. Smith, 1928a, E.H. Taylor, 1965, Regenass & Kramer, 1981, M.J. Cox, 1991b, David & Vogel, 1996, Ryabov et al., 2002, Sanders et al., 2002 and I. Das, 2010.

Remarks: Bengkulu was a trading center established by the East India Company and Raffles was stationed there from March 1818 until the end of the year. Possibly occurs on Palawan, Philippines *fide* Das (2010: 306). Holotype formerly in BMNH *fide* Cox et al. (2013: 762).

PAROPLOCEPHALUS Keogh, Scott & Scanlon, 2000 (Elapidae)

Type species: *Brachyaspis atriceps* Storr, 1980.

Distribution: Southwestern Australia.

Source: Keogh et al., 2000.

1. *Paroplocephalus atriceps* (Storr, 1980). Rec. West. Aust. Mus. 8(3): 397–399, fig. 1. (*Brachyaspis atriceps*)

Type: Holotype, WAM 67330, a 379 mm (svl) specimen (P. Griffin and G. Baron, 6 Oct. 1979).

Type locality: "Lake Cronin in the southern interior of Western Australia, in 32°23'S, 119°45'E."
Distribution: Southwestern Australia (S Western Australia), 270–440 m.

†*PATAGONIOPHIS* Albino, 1986 (†Madtsoiidae)

Type species: †*Patagoniophis parvus* Albino, 1986.
Distribution: Upper Cretaceous of Argentina and lower Eocene of Australia.
Sources: Albino, 1987b, Scanlon, 2005 and Albino, 2011b.

1. †*Patagoniophis australiensis* Scanlon, 2005. Mem. Queensland Mus. 51(1): 217–220, fig. 1e.

Type: Holotype, QMF 19710, one middle trunk vertebra (H. Godthelp & M. Archer field crews, mid-1980s–early 1990s).
Type locality: "MP1 horizon, Main Quarry, Tingamarra, Boat Mountain, near Murgon, south-east Queensland (26°S, 152°E), Australia; Tingamarra Local fauna, Early Eocene, 54.6+/-0.05 MYBP."
Distribution: Lower Eocene (54.6 mya) of Australia. Known only from type locality.

2. †*Patagoniophis parvus* Albino, 1986. Actas IV Congr. Argent. Paleont. Bioestr. 2: 18, fig. 2.

Type: Holotype, MACN RN 33, one trunk vertebra.
Type locality: "Ladera sudoeste del Cerro Cuadrado, noreste de la Ea. Los. Alamitos, Arroyo Verde, Dpto. Valcheta, Río Negro, Argentina. Sector medio de la Formación Los Alamitos, Campaniano-Maastrichtiano temprano, Cretácio tardío" [= SW slope of Cerro Cuadrado, NE of Los Alamitos, 41°57'S, 66°21'W, proximal zone of Arroyo Verde, 41°55'S, 66°10'W, Valcheta Dept., SE Río Negro Prov., S Argentina; middle section of Los Alamitos formation, early Campanian-Maastrichtian, upper Cretaceous].
Distribution: Upper Cretaceous (Campanian-Maastrichtian: 65.5–83.6 mya) of Argentina. Known only from type locality.

†*PAULACOUTOPHIS* Rage, 2011 (Booidea *incertae sedis*)

Type species: †*Paulacoutophis perplexus* Rage, 2011.
Distribution: Middle Palaeocene of Brazil.
Source: Rage, 2011.

1. †*Paulacoutophis perplexus* Rage, 2011. Palaeovertebrata (2008) 36(1–4): 52–55, fig. 8.

Type: Holotype, DGM 1367-R, one middle trunk vertebra (1968).
Type locality: "Itaboraí, State of Río de Janeiro, Brazil; middle Palaeocene."
Distribution: Middle Paleocene (Itaboraian: 57.0–59.0 mya) of Brazil.

PELAMIS Daudin, 1803d (Elapidae)

Synonyms: *Ophinectes* Rafinesque-Schmaltz, 1817 *(nomen emendatum), Pelamys* Wagler, 1830 *(nomen praeoccupatum), Pelamides* Cuvier & Voigt, 1832 *(nomen emendatum), Elaphrodytes* Gistel, 1848 *(nomen substitutum), Pelamijs* Bleeker, 1856 *(nomen emendatum), Hydrus* Boulenger, 1890a *(nomen praeoccupatum), Pelamydrus* Stejneger, 1910 *(nomen susbstitutum), Belamydrus* – Steindachner, 1913b *(nomen incorrectum), Pelamydus* – Briceño-Rossi, 1934 *(nomen incorrectum), Pelamiris* – Daniel, 1949 *(nomen incorrectum), Pelamytrus* – Imazumi, Kuroda & Okada, 1950 *(nomen incorrectum), Pelamus* – J.H. Brown, 1973 *(nomen incorrectum),* and *Pelemis* – Dowling *in* Dowling & Duellman, 1978 *(nomen incorrectum).*
Type species: *Anguis platura* Linnaeus, 1766.
Distribution: Marine waters of Indian and Pacific Oceans, including Andaman Sea, Arabian Sea, Arafura Sea, Banda Sea, Banderas Bay, Bass Strait, Bay of Bengal, Bismarck Sea, Blanca Bay, Celebes Sea, Coral Sea, Culebra Bay, East China Sea, Formosa Strait, Gulf of Aden, Gulf of California, Gulf of Cambay, Gulf of Carpentaria, Gulf of Dulce, Gulf of Fonseca, Gulf of Guayaquil, Gulf of Kutch, Gulf of Mannar, Gulf of Martaban, Gulf of Oman, Gulf of Panamá, Gulf of Thailand, Gulf of Tonkin, Honda Bay, N Indian Ocean, Java Sea, Kanggava Bay, Laccadive Sea, Los Angeles Bay, Magdalena Bay, Manila Bay, Molucca Sea, Noumea Lagoon, Persian Gulf, Possiet Bay, Sagami Bay, Savu Sea, Sea of Japan, Solomon Sea, South China Sea, Strait of Hormuz, Strait of Malacca, Sulu Sea, Suruga Bay, Tasman Bay, Timor Sea, Tomini Sea and Yellow Sea.

5. *Pelias darevskii* (Vedmederya, Orlov & Tuniyev, 1986). Proc. Zool. Inst., USSR Acad. Sci. 157: 58–59. (*Vipera darevskii*)

Synonym: *Vipera kaznakovi darevskii* Vedmederya, 1984 (*nomen nudum*).

Type: Holotype, ZISP 19934, a 421 mm female (I.S. Darevsky, June 1980).

Type locality: "south-eastern part of Dzavachet mountain ridge in the border of Armenia." Restricted to Legli Mtn., the Mokrye (Wet) Mountains, Lesser Caucasus, Gukasynsky region, Armenia [ca. 41°10'N, 43°59'E, elevation 3000 m] *fide* Orlov & Tuniyev (1990: 21).

Distribution: Lesser Caucasus of NW Armenia (Gegharkunik, Kotayk, Lori, Shirak, Tavush) and ext. NE Turkey (Artvin), 2500–3000 m.

Sources: Billing et al., 1990, Orlov & Tuniyev, 1986b, 1990, Höggren et al., 1993, Tuniyev et al., 2009, 2012 and Avci et al., 2010.

Remarks: Photographs of holotype in Orlov & Tuniyev (1990: figs. 10a–c). Occurrence in S Georgia doubtful *fide* Joger and Nilson *in* David & Ineich (1999: 335).

6. *Pelias dinniki* (Nikolsky, 1913). Herpetol. Caucas.: 176–179. (*Vipera berus dinniki*)

Synonyms: *Vipera berus dinnicki* Nikolsky, 1916 *(nomen emendatum), Vipera tigrina* Tzarevsky, 1917, and *Vipera kaznakowi orientalis* Vedmederya, 1984 *(nomen nudum).*

Type: Lectotype, ZDKU 26044, an adult female (N.Y. Dinnik, 1908), designated by Vedmederya et al. (1986b: 58).

Type locality: "upper reaches of the Malaya (Small) Laba River, Northern Caucasus and Svanetla, Georgia, elevation 2440 m" via lectotype selection.

Distribution: Greater Caucasus of NW Azerbaijan, N Georgia and ext. SW Russia, 1500–3000 m.

Sources: Nikolsky, 1916, Vedmederya et al., 1986b, 1990, Billing et al., 1990, Orlov & Tuniyev, 1990, Höggren et al., 1993, Nilson et al., 1994, 1995, Herrmann & Joger, 1997, Smedt, 2006 and Tuniyev et al., 2009.

Remarks: Photograph of lectotype in Orlov & Tuniyev (1990: fig. 5). Previously a synonym of *P. kaznakovi*.

7. *Pelias ebneri* (Knoepffler & Sochurek, 1955). Bergenländ. Heimat. 17(4): 185–186. (*Vipera ursinii ebneri*)

Type: Holotype, NMW 14889, a 330 mm male (R. Ebner, 1936)

Type locality: "Elbursgebirge zwischen Rhema und Demawend in 2700 m. Nord-Persien" [= between Rhema and Damavand volcano (35°57'N, 52°07'E), Elburz Mtns., Mazandaran Prov., N Iran, elevation 2700 m].

Distribution: Northern Iran (Mazandaran) and ext. SE Azerbaijan (Lerik), 2000–2700 m.

Sources: Tuniyev et al., 2009, 2010.

Remarks: A synonym of *P. ursinii fide* McDiarmid et al. (1999: 410).

8. *Pelias eriwanensis* (A.F.T. Reuss, 1933c). Nachr. Aquar. Terrar.-Ver. (26): 373. (*Acridophaga renardi eriwanensis*)

Type: Holotype, ZMB 55160, a 425 mm male (Ramme & Richter, 2 Sept. 1929).

Type locality: "Lake Sevan above Shordzha at 2000 m a.s.l. [Yerevan], Armenia," *fide* Krecsák (2007: 658).

Distribution: Asia Minor. Northeastern Turkey (Kars), Armenia and W Azerbaijan, 2000 m.

Sources: Reuss, 1935a, Höggren et al., 1993, Nilson et al., 1994, 1995, 1999, Krecsák, 2007 and Tuniyev et al., 2009, 2010.

Remarks: Neotype designation *fide* Nilson et al. (1999: 105) invalid. A valid species *fide* David & Ineich (1999:

336) but a synonym of *P. ursinii fide* McDiarmid et al. (1999: 410). Photographs of holotype in Krecsák (2007: 657, fig. 1).

9. *Pelias kaznakovi* (Nikolsky, 1909a). Mitt. Kaukas. Mus. 4(3): 174. (*Vipera kaznakovi*)

Synonyms: *Coluber kaznakowi* Nikolsky, 1916 *(nomen emendatum), Mesocoronis kaxnakovi* – A.F.T. Reuss, 1927a *(nomen incorrectum), Vipera berus ornata* Basoglu, 1947 *(nomen praeoccupatum),* and *Vipera kaznokovi* – Bogert, 1961 *(nomen incorrectum).*

Type: Lectotype, ZMT 4408 (Y.V. Voronov), designated by Kramer (1961b: 713).

Type locality: “USSR, Georgien, Kreis Suchum, Cebelda, an der Ostküste des Schwarzen Meeres” [= Tsebelda or Tsebel’dinskoye, Sukhumi Distr., Abkhazia Prov., NW Georgia, 43°01’N, 41°16’E, elevation 440 m] via lectotype restriction.

Distribution: Asia Minor. Extreme NE Turkey (Artvin), SW Georgia (Abkhazia) and Armenia, 440–2400 (3000) m.

Sources: Darevsky, 1956, Kramer, 1961b, Kretz, 1971, Bannikov et al., 1977, Saint-Girons, 1980b, Orlov & Tuniyev, 1990, Höggren et al., 1993, Nilson et al., 1994, 1995, Billing et al., 1990, Herrmann & Joger, 1997, Tuniyev & Ostrovskikh, 2001, Smedt, 2006, Afsar & Afsar, 2009 and Tuniyev et al., 2009.

Remarks: Lectotype designation of Orlov & Tuniyev (1990: 6). The species complex of *Pelias kaznakovi, P. orlovi*, and *P. magnifica* possibly conspecific. Original description reprinted in Nikolsky (1910a: 81–84).

P

10. *Pelias lotievi* (Nilson, Tuniyev, Orlov, Höggren & Andrén, 1995). Asiatic Herpetol. Res. 6: 21–23, fig. 22. (*Vipera lotievi*)

Type: Holotype, ZISP 20309, a 422 mm female (K. Lotiev, 20–23 July 1986).

Type locality: “Armkhi, Checheno-Ingushetia, Russia, below Mt. Stolovaya, 2000 m. altitude.”

Distribution: Greater Caucasus of N Georgia, N Azerbaijan and SW Russia (Dagestan), 1200–2700 m.

Sources: Tuniyev et al., 2009, 2010.

11. *Pelias magnifica* (Tuniyev & Ostrovskikh, 2001). Russ. J. Herp. 8(2): 123–126, fig. 9. (*Vipera magnifica*)

Type: Holotype, CSNBR 541, a 436 mm male (B.S. Tuniyev, 24 June 1998).

Type locality: “Shakhghireevskoye Gorge, the Malaya Laba River, Krasnodarskii region, Russia.”

Distribution: Greater Caucasus in SW Russia (Krasnodar Krai) and NW Georgia, 700–1000 m.

Source: Tuniyev et al., 2009.

Remarks: The species complex of *Pelias kaznakovi, P. orlovi,* and *P. magnifica* possibly conspecific. A synonym of *P. dinniki fide* Smedt (2006: 149).

12. *Pelias nikolskii* (Vedmederya, Grubant & Rudayeva, 1986a). Vesnik Kharkov Univ. (288): 84. (*Vipera nikolskii*)

Type: Holotype, ZDKU 14703, a 680 mm female (K. Pengo, 1867).

Type locality: “near the Uda River in the vicinity of Kharkov,” Russia.

Distribution: Southwestern Russia.

Remarks: A valid species *fide* Ananjeva et al. (2004: 205).

13. *Pelias olguni* Tuniyev, Avci, Tuniyev, Agasian & Agasian, 2012. Russ. J. Herp. 19(4): 323–325, fig. 4.

Type: Holotype, SNP 866, a 496 mm female (B. Tuniyev, S. Tuniyev, A. Avci, 21 July 2011).

Type locality: “Turkey, Ardahan Province, Town Posof, Mt. Ilgar-Dag, (2020 m a.s.l.).”

Distribution: Lesser Caucasus of NE Turkey (Ardahan, Artvin), 2020–2100 m.

14. *Pelias orlovi* (Tuniyev & Ostrovskikh, 2001). Russ. J. Herp. 8(2): 117–123, figs. 1–4. (*Vipera orlovi*)

Type: Holotype, CSNBR 528, a 447 mm male (S.V. Ostrovskikh, 12 May 1997).

Type locality: “Papai Mountain, Krasnodarskii region, Russia.”

Distribution: Southwestern Russia (Krasnodar Krai), 820–1100 m.

Source: Tuniyev et al., 2009.

Remarks: A synonym of *P. dinniki fide* Mallow et al., 2003 and Smedt, 2006.

15. *Pelias pontica* (Billing, Nilson & Sattler, 1990). Zool. Scripta 19(2): 228–229, figs. 1–3. (*Vipera pontica*)

Type: Holotype, GNM 5021 (formerly GNM Re.ex. 5021), a 277 mm male (U. Sattler, June 1989).

Type locality: “Coruh valley, province Artvin, northeastern Turkey.”

Distribution: Extreme NE Turkey (Artvin) and cen. Georgia.

16. *Pelias renardi* Christoph, 1861. Bull. Soc. Impér. Nat. Moscou 34(4): 600–606.

Synonyms: *Acridophaga uralensis* A.F.T. Reuss, 1929a, *Vipera renardi parursinii* Nilson & Andrén, 2001, *Vipera renardi tienshanica* Nilson & Andrén, 2001 and *Vipera renardi bashkirovi* Garanin, Pavlov & Bakiev, 2004.

Types: Syntypes (2), none designated, longest female 533 mm, longest male 477 mm (S. von Renard, 1840–1860), lost *fide* Golay et al. (1993: 291).

Type locality: "Sarepta allenthalben in der Steppe, südlichen Russland" [= Krasnoarmeysky Rayon, Volgogradskaya Distr., SW Russia, 48°31'N, 44°31'E, elevation 10 m].

Distribution: Central Asia. Ukraine, SW Russia, N Azerbaijan, Uzbekistan, Kazakhstan, Kyrgyzstan, Tadzhikistan and NW China (Xinjiang), 10 m.

Sources: Boulenger, 1893f, Nilson et al., 1994, 1995, Ostrovskikh, 1997, Nilson & Andrén, 2001, Bakleu et al., 2004, Tuniyev et. al., 2009, 2010 and Gvozdík et al., 2012.

Remarks: A valid species *fide* David & Ineich (1999: 340) but a synonym of *P. ursinii fide* McDiarmid et al. (1999: 409).

17. *Pelias sachalinensis* (Tzarevsky, 1917). Ann. Mus. Zool. Acad. Sci. Petrograd (1916) 21: 37. (*Vipera berus sachalinensis*)

Synonym: *Coluber sachalinensis continentalis* Nikolsky, 1927b.

Type: Holotype, ZISP 7960 *fide* I.S. Darevsky *in* McDiarmid et al. (1999: 399).

Type locality: "Sachalin" [= Sakhalin Island, E Russia].

Distribution: North Korea, N Mongolia and E Russia (SE Siberia, Sakhalin & Santarskie Is.).

Source: Szyndlar & Hung, 1987.

Remarks: A valid species *fide* Adnagulov et al. (2000: 150) and Joger et al., 2007. Syntypes ZISP 11992–93 *fide* Golay et al. (1993: 284).

18. *Pelias seoanei* (Lataste, 1879). Bull. Soc. Zool. France 4: 132. (*Vipera berus seoanei*)

Synonyms: *Vipera seoanei cantabrica* Braña & Bas, 1983 and *Vipera seoannei* – Bon, 1987 *(nomen incorrectum).*

Types: Syntypes (2), BMNH 1946.1.21.44–45 (formerly BMNH 1920.1.20.786).

Type locality: "montibus Gallaecorum et Cantabrorum, d'Espagne" [= mountains of Galicia and Cantabrici, Spain]. Restricted to Cabanas, La Coruna Prov., Spain *fide* Mertens & Müller (1928: 52).

Distribution: Extreme SW France (Basses-Pyrènées), N Portugal (Braga, Porto, Viana de Castelo, Vila Real) and NW Spain (Álava, N Burgos, Vila Guipúzcoa, La Coruña, Léon, Lugo, Navarra, Orense, Oviedo, N Palencia, Pontevedra, Santander, Vizcaya), NSL–1500 (1900) m.

Sources: Saint-Girons & Duguy, 1976, Salvador, 1985, Castanet & Guyetant, 1989, Herrmann & Joger, 1997, Pleguezuelos, 1997, Salvador & Pleguezuelos, 2002, Malkmus, 2005, Smedt, 2006 and Vacher & Geniez, 2010.

19. *Pelias ursinii* Bonaparte, 1835 *in* 1832–1841. Icon. Fauna Ital. 2(12): 60 [p. 1 of *Pelias chersea* account], pl. 78, fig. 2 [*Pelias berus* pl.].

Synonyms: *Coluber dorsolaevibrunneo* Boddaert, 1783 (*nomen oblitum), Coluber orientalis* Gmelin, 1789 (*nomen oblitum), Coluber foetidus* Güldenstedt *in* Georgi, 1801 *(nomen suppressum), Vipera berus rákosiensis* Méhely, 1894 *(nomen incorrigendum), Vipera ursinii rakosiensis* – Méhely, 1894 *(nomen corrigendum), Vipera macrops* Méhely, 1911, *Vipera ursinii rudolphi* A.F.T. Reuss, 1924a, *Coluber ursinoides* Nikolsky, 1927 *(nomen illegitimum), Pelias berus uralensis* R. Reuss, 1929a *(nomen nudum), Acridophaga uralensis* R. Reuss, 1929a, *Vipera berus ralosiensis* – F. Werner, 1929c *(nomen incorrectum), Vipera orsinii* – Ghidini, 1938 *(nomen incorrectum), Vipera ursinii wettsteini* Knoepffler & Sochurek, 1955, *Vipera orsinii* Ghidini, 1958 *(nomen emendatum), Vipera ursinii graeca* Nilson & Andrén, 1988a, *Vipera ursinii rakoniensis* – González, 1991 *(nomen incorrectum),* and *Vipera ursinii moldavica* Nilson, Andrén & Joger, 1993.

Type: Holotype, ANSP 6915, a juvenile (formerly CLB 674 & DW 6914-15) (C.-L.-J.-L. Bonaparte, 1814–1835, via Wilson).

Type locality: "monti dell'Abruzzo prossimi alla provincia d'Ascoli, Italica" [= hills of Abruzzo near the province of Ascoli, Italy].

Distribution: Southeastern Europe. Southeastern France (Alpes-Maritimes, Basses-Alpes, Vaucluse, Var), cen. Italy (Abruzzi, Marche, Umbria), E Austria (N Burgenland, Lower Austria, Vienna), Romania, Bulgaria (Shumen, Sofiya), Bosnia-Herzegovina, Croatia, Krk Is., N Macedonia, Montenegro, Moldavia, NE Albania, Greece (Ioannina) and Armenia, 250–3000 m.

Fossil records: Lower Pleistocene (Calabrian: 0.8–1.8 mya) of Czech Republic and middle Pleistocene (Ionian: 0.13–0.78 mya) of France.

Sources: Boulenger, 1893e, A.F.T. Reuss, 1935b, Stugren, 1955, Lanza, 1958, Kramer, 1961b, Bruno, 1967, 1977, 1984, Eiselt & Baran, 1970, Eiselt, 1976, Bannikov et al., 1977, Saint-Girons, 1980b, Dely, 1983, Dely & Stohl, 1984, Nilson & Andrén, 1988a, Billing et al., 1990, Borkin et al., 1990a–b, 1997, Agrimi & Luiselli, 1992, Kammel, 1992a-b, Höggren et al., 1993, Nilson et al., 1993, Zhao & Adler, 1993, Nilson et al., 1994, Herrmann & Joger, 1997, Holman, 1998a, Újvári et al., 2000, Cabela et al., 2001, Krecsák & Zamfirescu, 2001, Krecsák et al., 2003, De Smedt, 2006, Sindaco et al., 2006, Kreiner, 2007, Trapp, 2007, Valakos et al., 2008, Vacher & Geniez, 2010, Stojanov et al., 2011 and Gvozdík et al., 2012.

Remarks: Lectotype designation of ANSP 6915 *fide* Kramer (1961b: 713) invalid *fide* McDiarmid et al. (1999: 411). In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Pelias ursinii* Bonaparte is designated a *nomen protectum* and *Coluber dorsolaevibrunneo* Boddaert and *Coluber orientalis* Gmelin a *nomina oblita*.

PELTOPELOR A.C.L.G. Günther, 1864a (Viperidae)

Synonym: *Peltocolor* – Hoffmann, 1890 *(nomen incorrectum).*
Type species: *Trimesurus macrolepis* Beddome, 1862.
Distribution: Southern India.
Source: M.A. Smith, 1943, Gumprecht et al., 2004, Vogel, 2006 and Hutton & David, 2009.

1. *Peltopelor macrolepis* (Beddome, 1862). Madras Quart. J. Med. Sci. 5: 2, pl. 2, fig. 6. (*Trimesurus macrolepis*)

Type: Lectotype, BMNH 1946.1.18.72 (formerly BMNH 1861.12.30.80), a male (R.H. Beddome, 1857–1862), designated by Toriba *in* Golay et al. (1993: 101).
Type locality: "Anamallay Mountains; at 6,000 feet elevation" [= Anaimalai Hills, Western Ghats, E Tamil Nadu/W Kerala States, SW India, ca. 10°22'N, 77°08'E] via lectotype selection."
Distribution: Southern India (Western Ghats of Kerala, Tamil Nadu), 610–1980 m.

PHALOTRIS Cope, 1862a (Xenodontidae)

Synonyms: *Elapsomorphus* A.-M.-C. Duméril, 1853 *(nomen nudum)* and *Phalotus* Scudder, 1884 *(nomen emendatum).*
Type species: *Elapomorphus tricolor* A.-M.-C. Duméril, Bibron & Duméril, 1854b.
Distribution: Southern South America.
Sources: Ferrarezzi, 1993, 1994, Puorto & Ferrarezzi, 1994, Hofstadler-Deiques & Lema, 2005, Cacciali et al., 2007 and Zaher et al., 2009.

P

1. *Phalotris bilineatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 839–840. (*Elapomorphus bilineatus*)

Synonyms: *Elapomorphus spegazzinii* Boulenger, 1913f, *Elapomorphus suspectus* Amaral, 1924b, and *Elapomorphus bollei* Mertens, 1954a.
Type: Holotype, MNHN 3667, a 348 mm specimen (A.C.V.M.D. d'Obigny, 1826–1833).
Type locality: "province de los Corrientes" [= Corrientes Prov., ext. NE Argentina].
Distribution: Argentina (Buenos Aires, Chaco, Chubut, Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, La Pampa, Mendoza, Misiones, Río Negro, Salta, San Luis, Santa Fe, Santiago del Estero, Tucumán), NSL–500 m.
Sources: Lema, 1978b, Scolaro & Cei, 1979, Cei, 1986, 1994, J.D. Williams & Francini, 1991, Leynaud & Bucher, 1999, Avila et al., 2001 and Scolaro, 2005, 2006.
Remarks: *Phalotris spegazzinii* and *P. suspectus* valid species *fide* Lema (pers. comm.).

2. *Phalotris concolor* Ferrarezzi, 1994. Mem. Inst. Butantan (1993) 55(Suppl. 1): 26–28, figs. 2a–c.

Type: Holotype, IB 55018, a 550 mm female (R.N. Feio & G. Cotta, 1990), destroyed by fire 15 May 2010.
Type locality: "Brasil: Minas Gerais: Municipio de Cristália (17S, 43W, próximo a Grão Mogol), margem do rio Tacambiruçu, afluente da margem direita do rio Jequitinhonha."
Distribution: Brazil (Minas Gerais). Known only from type locality.
Source: Lema, 2002c.

3. *Phalotris cuyanus* (Cei, 1984). Bol. Mus. Cienc. Nat. Anthro. Juan Cornelio Moyano (4): 48–49, figs. a–d. (*Elapomorphus cuyanus*)

Type: Holotype, MHNSR 300, a 442 mm male (H.A. Lagiglia, 20 April 1975).
Type locality: "Los Reyunos, San Rafael, Mendoza, 900 m s. m., área de Sierra Pintada, Argentina."
Distribution: West-central Argentina (Mendoza, San Juan), 900–1000 m.
Sources: Cei, 1986, Lema et al., 2005a and Leynaud et al., 2005.
Remarks: Type locality elevation listed as 900–1000 m *fide* Cei (1984: 48) but corrected to 900 m *fide* Cei (1986: 416).

4. *Phalotris labiomaculatus* Lema, 2002b. Comm. Mus. Ciênc. Tecnol. PUCRS (Zool.) 15(2): 203–207, figs. 1–2.

Type: Holotype, MCP 10693, a 583 mm male (R.N. Yuke, Sept. 1983).
Type locality: "within Esperança Farm, at Buriti Grande, Porto Franco Municipality, State of Maranhão, Brazil (6.20°5'S-47.24°W)."
Distribution: Northeastern Brazil (Maranhão, Tocantins), 200 m.
Source: França et al., 2005.

5. *Phalotris lativittatus* Ferrarezzi, 1994. Mem. Inst. Butantan (1993) 55(Suppl. 1): 28–30, figs. 3a–c.

Type: Holotype, IB 26188, a 775 mm male (J.M. Guerra, 25 May 1966), destroyed by fire 15 May 2010.
Type locality: "Brasil: São Paulo: municipio de Matão (22S, 48W)."
Distribution: Southeastern Brazil (Santa Catarina, São Paulo), 325 m.
Sources: Lema, 2002b and Silveira Vasconcelos & Gomes dos Santos, 2009.

6. *Phalotris lemniscatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 840–841. (*Elapormorphus lemniscatus*)

Synonyms: *Elapsomorphus lemniscatus* A.-M.-C. Duméril, 1853 *(nomen nudum), Elapomorphus iheringi* Strauch, 1884, *Phalotris melanopleurus* Cope, 1885a, *Elapomorphus trilineatus* Boulenger, 1889a, and *Elapomorphus lemniscatus divittatus* Lema, 1984.

Type: Holotype, MNHN 3668, a 245–249 mm specimen (C.R. Darwin, 24 Dec. 1832–4 July 1835 [Chile] or 26 July 1832–4 Dec. 1833 [Uruguay]).

Type locality: "Amérique du Sud" [= South America]. Emended to Chili *fide* MNHN catalogue. Restricted to Montevideo, Uruguay *fide* Lema (1984: 67).

Distribution: Southern South America. Southeastern Brazil (Rio Grande do Sul, Santa Catarina, São Paulo), S Bolivia, E Paraguay, Uruguay (Artigas, Canalones, Cerro Largo, Durazano, Lavalleja, Maldonado, Montevideo, Paysandú, Rivera, Rocha, San José, Soriano) and N Argentina (Corrientes, Entre Ríos, Treinta y Tres), 500 m.

Remarks: *Phalotris divittatus, P. iheringi* and *P. trilineatus* valid species *fide* Lema (pers.comm.).

7. *Phalotris matogrossensis* Lema, Agostini & Cappellari, 2005. Iheringia 95(1): 71–75, figs. 12–21.

Type: Holotype, MCP 12801, a 507 mm male (C. Strüssmann).

Type locality: "Cuiabá, Mato Grosso, bairro Cophema, 15°37'S 56°05'O," Brazil."

Distribution: Southeastern Brazil (S Goiás, S Matto Grosso, Mato Grosso do Sul, Minas Gerais, Paraná, Rio Grande do Sul, São Paulo) and SE Paraguay (? Caaguazú).

Source: Jansen & G. Köhler, 2008.

8. *Phalotris mertensi* (Hoge, 1955). Senck. Biol. 36(5–6): 301–304, pl. 27, fig. 1, pl. 29, fig. 3. (*Elapomorphus mertensi*)

Type: Holotype, IB 16425, a 930 mm female (F. Wenceslau-Garcia, 13 April 1955), destroyed by fire 15 May 2010.

Type locality: "Serra Azul, São Paulo, Brasilien" [= Serra Azul, NE São Paulo State, SE Brazil, 21°19'S, 47°34'W, elevation 615 m].

Distribution: Southeastern Brazil (Goiás, Mato Grosso, S Minas Gerais, N Paraná, São Paulo), 510–615 m.

Sources: Lema et al., 2005a and Forlani et al., 2010.

9. *Phalotris multipunctatus* Puorto & Ferrarezzi, 1994. Mem. Inst. Butantan (1993) 55(Suppl. 1): 40–42, figs. 1a–c.

Type: Holotype, IB 43635, a 380 mm male (C.W. Marchesan, Jr., 24 Oct. 1980), destroyed by fire 15 May 2010.

Type locality: "Brasil: Estado de São Paulo: município de Brotas (22 17S, 48 07W): Fazenda Elba."

Distribution: Southern Brazil (Mato Grosso, São Paulo).

10. *Phalotris nasutus* (Gomés, 1915). Ann. Paul. Med. Med. Cirurg. 4(6): 121, pl. 3, figs. 1–3. (*Elapomorphus nasutus*)

Type: Holotype, IB 873, a 800 female (A. Alonso, March 1915), destroyed by fire 15 May 2010.

Type locality: "Paineiras, perto de Uberaba, Estado de Minas Geraes, Brasil" [= Paineiras, cen. Minas Gerais State, SE Brazil, 18°54'S, 45°32'W, elevation 625 m].

Distribution: Central and SE Brazil (Distrito Federal, Goiás, Mato Grosso, Mato Grosso do Sul, Minas Gerais, São Paulo) and Bolivia (Santa Cruz), 500–1000 m.

Sources: Hoge & Garcia, 1949, Ferrarezzi, 1994, Lema, 1999, 2002b, Valdujo & Nogueira, 2001 and Jansen, 2008.

Remarks: Type locality listed as Peiropolis, Minas Gerais, Brazil *fide* Vanzolini (1986a: 7).

11. *Phalotris nigrilatus* Ferrarezzi, 1994. Mem. Inst. Butantan (1993) 55(Suppl. 1): 30–31, figs. 4a–c.

Type: Holotype, FML 709, a 715 mm female (R. Golbach, 1973).

Type locality: "Paraguai: Dept. San Pedro: Carumbé" [= Estancia Carumbé, San Pedro, Dept., cen. Paraguay, 23°54'S, 56°20'W, elevation 250 m].

Distribution: South-central Paraguay (San Pedro), 250 m.

Source: Cacciali et al., 2007b.

12. *Phalotris punctatus* (Lema, 1979b). Rev. Bras. Biol. 39(4): 836–851, figs. 1–6. (*Elapomorphus punctatus*)

Type: Holotype, MLPA 151, a 393 mm male (C. Piorno).

Type locality: "Rosário de la Frontera, Província de Salta, Argentina" [= Rosario de la Frontera, Salta Prov., N Argentina, 25°48'S, 64°58'W, elevation 790 m].

Distribution: Northern Argentina (Catamarca, Chaco, Córdoba, Corrientes, Formosa, Misiones, Salta, Santa Fe), 425–1270 m.

Sources: J.D. Williams & Francini, 1991, Leynaud & Bucher, 1999 and Leynaud et al., 2005.

13. *Phalotris reticulatus* (W.C.H. Peters, 1860d). Mber. Kønigl. Akad. Wiss. Berlin 1860(10): 518–519. (*Elapomorphus reticulatus*)

Type: Holotype, ZMB 3811, a 318 mm specimen.
Type locality: "Brasilien" [= Brazil].
Distribution: Brazil (Minas Gerais, São Paulo), 805 m.
Sources: Giraudo, 1999 and Ferrarezzi et al., 2005b.

14. *Phalotris sansebastiani* Jansen & G. Köhler, 2008. Senck. Biol. 88(1): 103–110, figs. 1–2.

Type: Holotype, MNK 4345, a 524 mm male (native, Jan. 2007).
Type locality: "Hacienda San Sebastian, S 16º21.676', W 62º 0.017', 550 m, Provincia Ñuflo de Chávez, Departament of Santa Cruz, Bolivia."
Distribution: Eastern Bolivia (Santa Cruz), 550 m.

15. *Phalotris tricolor* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 837–839. (*Elapomorphus tricolor*)

Synonym: *Elapomorphus punctatus* Lema, 1979b.
Type: Holotype, MNHN 520, a 938 mm skin (A.C.V.M.D. d'Orbigny, 11 Nov. 1830–21 June 1831 or 17 Sept.–17 Nov. 1832).
Type locality: "Santa-Cruz" [Bolivia]. Restricted to Santa Cruz de la Sierra à Chuquisaca, Santa Cruz, Bolivia *fide* Vanzolini (1948: 383).
Distribution: Southern South America. Eastern Bolivia (Santa Cruz), S Brazil (Mato Grosso, W São Paulo), Paraguay (Alto Paraguay, Amambay, Asunción, Boquerón, Caaguazú, Caazapá, Central, Concepción, Cordillera, Guairá, Misiones, Neembucú, Paraguarí, Presidente Hayes, San Pedro) and Uruguay, 100–370 m.
Sources: Vanzolini, 1948, Hoge, 1955, J.D. Cei, 1994, Leynaud & Bucher, 1999, Leynaud et al., 2005, Cacciali, 2008 and Jansen & Köhler, 2008.
Remarks: Specimens previously identified as *P. tricolor* are *P. punctatus fide* Giraudo & Scrocchi (2002: 29).

PHILODRYAS Wagler, 1830 (Xenodontidae)

Synonyms: *Chlorosoma* Wagler, 1830, *Orophis* Fitzinger, 1843, *Phylodryas* Fitzinger, 1843 *(nomen emendatum), Taeniophis* Girard, 1854, *Taenophis* – Girard, 1854 *(nomen incorrectum), Callirhinus* Girard, 1858a, *Euophrys* A.C.L.G. Günther, 1858, *Philodrias* – Senna, 1886 *(nomen incorrectum), Atomophis* Cope, 1887c *(nomen substitutum), Dirrhox* Cope, 1887a *(nomen nudum), Agratomus* Cope, 1887c, *Dirrhox* Cope, 1887c *(nomen substitutum), Monobothris* Cope, 1894c, *Pseudablabes* Boulenger, 1896a, *Pachyurus* Philippi, 1899 (*nomen nudum*), *Stenodeiros* Philippi, 1899 *(nomen nudum),* Rhinodryas F. Werner, 1903a, *Pachyurus* Philippi *in* Quijada, 1916, *Stenodeiros* Philippi *in* Quijada, 1916, *Pseudoblabes* – Phisalix, 1922 *(nomen incorrectum), Platyinion* Amaral, 1923, *Pseuduromacer* F. Werner, 1924a, *Phylodrias* – Amaral, 1926d *(nomen incorrectum), Chloroma* – Briceño-Rossi, 1934 *(nomen incorrectum), Cholrosoma* – Freiberg, 1939 *(nomen incorrectum), Estherophis* Donoso-Barros, 1962, *Phylodryas* – Abalos, Baez & Nader, 1964 *(nomen incorrectum), Philodryass* – Donoso-Barros, 1966 *(nomen incorrectum), Platynion* J.A. Peters & Orejas-Miranda, 1970 *(nomen emendatum), Philodry* – Cunha & Nascimento, 1978 *(nomen incorrectum), Incaspis* Donoso-Barros, 1974, *Pseadablabes* – Vaz-Ferreira, Covelo de Zollesi & Achaval, 1976 *(nomen incorrectum), Platinion* – Dixon & Thomas, 1985 *(nomen incorrectum),* and *Xenoxybelis* Rodrigues-Machado, 1993.
Type species: *Coluber olfersii* Lichtenstein, 1823.
Distribution: South America.
Sources: F. Werner, 1924c, Amaral, 1930e, J.A. Peters & Orejas-Miranda, 1970, R.A. Thomas, 1976a, Duellman, 1978, Cadle, 1984a, David & Ineich, 1999, Zaher, 1999, Vidal et al., 2000, Zaher et al., 2009 and Navarro-Cornejo, 2012.
Remarks: Gender of genus is feminine *fide* Donnelly and Myers (1991: 46). *Pseudablabes* and *Xenoxybelis* are synonyms *fide* Zaher et al., 2009.

1. *Philodryas aestiva* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1111–1115. (*Dryophylax aestivus*)

Synonyms: *Philodryas carinatus* Hensel, 1868, *Philodryas campicola* Jensen, 1900, *Philodryas subcarinatus* Boulenger, 1902b, *Pseuduromacer lugubris* F. Werner, 1924a, *Philodryas aestivus manegarzoni* Orejas-Miranda, 1959a and *Philodryas aestivus levisquamus* R.A. Thomas, 1976 (*nomen ineditum*).
Types: Syntypes (3), MNHN 3842, an adult female (Gaudichaud) [Sainte-Catherine], MNHN (Clossen) [Brésil], and MNHN [méridional du Nouveau-Monde ou des Antilles], longest syntype 840 mm.
Type locality: "l'ile Sainte-Catherine" [= Santa Catarina Is., Santa Catarina State, S Brazil, 27°36'S, 48°30'W], "Brésil" [= Brazil], and "continent méridional du Nouveau-Monde ou des Antilles" [= South America or Antilles].
Distribution: Southern South America. Central Bolivia (Cochabamba, Tarija), SE Brazil (Bahia, Distrito Federal, Goiás, Mato Grosso do Sul, Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo), Uruguay (Artigas, Canelones, Cerro Largo, Colonia, Flores, Florida, Kocha, Lavalleja, Maldonado, Montevideo, Paysandú, Rio Negro, Rivera, Rocha, Salto, San José, Sariano, Tacuarembó, Treinta y Tres), S Paraguay (Alto Paraná, Caaguazú, Central, Guairá, Itapúa, Misiones, Neembucú, Paraguarí) and N Argentina (Buenos Aires, Chaco, Córdoba, Corrientes,

P

Entre Ríos, Formosa, Jujuy, Santiago del Estero, Misiones, Salta, Santa Fe, Treinta y Tres, Tucumán), NSL–2500 m.

Remarks: The type is not in MNHN *fide* M. Lang *(in litt.).* A member of *Philodryas* (previously in the genus *Xenoxybelis) fide* Grazziotin et al. (2012: 12).

4. *Philodryas arnaldoi* (Amaral, 1933b). Mem. Inst. Butantan (1932) 7: 100–101, figs. 2–3, 4.2. (*Chlorosoma arnaldoi*)

Type: Holotype, IB 7807, an 896+ mm female, destroyed by fire on 15 May 2010..

Type locality: "S. Bento, Sta. Catharina, Brasil" [= São Bento, Santa Catarina State, ext. S Brazil].

Distribution: Southern Brazil (Paraná, Rio Grande do Sul, Santa Catarina, São Paulo), NSL–785 m.

Source: Lema, 1962b.

5. *Philodryas baroni* Berg, 1895. An. Mus. Nac. Buenos Aires 4: 189–191, figs. 1.1–1.4.

Synonyms: *Rhinodryas königi* F. Werner, 1903a and *Philodryas baroni fuscoflavescens* Serie, 1915a.

Types: Syntypes (3), MACN, a 1430 mm female (A. Sohncke) [Chaco], and a 1280 mm female and 1180 mm male (M. Barón-Morlat) [Tucumán].

Type locality: "Tucuman et Chaco australis (Riacho de Oro)" [= Tucumán and Riacho de Oro, S Chaco, Argentina].

Distribution: Bolivia, NW Paraguay (W Alto Paraguay, Boquerón, Caaguazú) and N Argentina (Catamarca, Chaco, Córdoba, Formosa, Salta, Santa Fe, Santiago del Estero, Tucumán), 150–300 m.

Sources: Koslowsky, 1898b, Abalos et al., 1964, Cei, 1986, J.D. Williams & Francini, 1991, Arzamendia, 1999, Leynaud & Bucher, 1999 and Cacciali, 2008.

6. *Philodryas boliviana* Boulenger, 1896a. Cat. Snakes Brit. Mus. 3: 132, pl. 9, fig. 1. (*Philodryas bolivianus*)

Synonym: *Liophis bolivianus* F. Werner, 1909b.

Type: Lectotype, BMNH 1946.1.2.86, a 690–692 mm female (M.R. Rolle), designated by R.A. Thomas herein.

Type locality: "Charobamba, Bolivia" [= Coroico, La Paz Dept., cen. Bolivia, 16°12'S, 67°44'W, elevation 1690 m] via lectotype selection.

Distribution: Bolivia (? Chuquisaca, La Paz, Santa Cruz, Tarija), 1690–2600 m.

Sources: F. Werner, 1909c, Amaral, 1944a and Fugler et al., 1995.

Remarks: A valid species *fide* R.A. Thomas (1976a: 111–117, fig. 15). Lectotype designation of BMNH 1946.1.2.86 *fide* R.A. Thomas (1976a: 111) invalid. Boulenger (1896a: 132) erroneously listed the two adult syntypes as males. Type locality erroneously listed as Cochabamba *fide* Amaral (1926d: 31).

7. *Philodryas chamissonis* (Wiegmann *in* Meyen, 1834). Nova Acta Acad. Caesar. Leop.-Carol. 17(1): 246–250, pl. 19. (*Coronella chamissonis*)

Synonyms: ? *Coluber aesculapii* Molina, 1782, *Coluber chamissonis* Hemprich *in* Wiegmann, 1834 *(nomen nudum), Psammophis temminckii* Schlegel, 1837, *Taeniophis tantillus* Girard, 1854, *Coluber regius* Philippi, 1899 *(nomen nudum), Dromicus chamissonis subtetragona* Philippi, 1899, *Liophis gracilis* Philippi, 1899 (*nomen nudum*), *Liophis insularis* Philippi, 1899 (*nomen nudum*), *Liophis luctuosa* Philippi, 1899 (*nomen nudum*), *Taeniophis multilineata* Philippi, 1899 *(nomen nudum), Coronella plumbea* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus albiventris* Philippi *in* Quijada, 1916 (*nomen nudum*), *Dromicus cinereus* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus concolor* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus leucurus* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus liguanus* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus maculatus* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus marmorata* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus tenuis* Philippi *in* Quijada, 1916 *(nomen nudum), Dromicus variegatus* Philippi *in* Quijada, 1916 *(nomen nudum), Liophis gracilis* Philippi *in* Quijada, 1916 (*nomen nudum*), *Liophis insularis* Philippi *in* Quijada, 1916 *(nomen nudum), Liophis lutea* Philippi *in* Quijada, 1916 *(nomen nudum), Liophis marmorata* Philippi *in* Quijada, 1916 *(nomen nudum), Pachyurus mucronatus* Philippi *in* Quijada, 1916 *(nomen nudum)*, and *Taeniophis albigularis* Philippi *in* Quijada, 1916 *(nomen nudum).*

Type: Holotype, ZMB, a 762 mm specimen (F.J.F. Meyen, 1830–1832), lost *fide* R. Günther (*in litt*.)

Type locality: "Chile, bei Tollo" [= Tollo, Santiago Prov., cen. Chile, 33°24'S, 70°23'W, elevation 1380 m].

Distribution: Central Chile (Antofagasta, Atacama, Concepción, Coquimbo, Malleco, Santiago, Valdavía, Valparaíso), NSL–1900 m.

Sources: Philippi, 1899, Quijada, 1916, Donoso-Barros & Candiani, 1950, Donoso-Barros, 1954, 1966, 1970, Donoso-Barros & Cardenas, 1964 and Webb & Greer, 1969.

P

8. *Philodryas cordata* Donnelly & Myers, 1991. Amer. Mus. Novit. (3017): 46–49, figs. 32–33.

Type: Holotype, AMNH 136212, a 740+ mm male (C.W. Myers, 24 Feb. 1990).

Type locality: "FUDECI Summit Camp 1, 1030 m elevation, north side of Cerro Guaiquinima, Bolívar, eastern Venezuela, *ca*. 5°56'N, 63°42'W."

Distribution: Eastern Venezuela (SW Bolívar), 1030–1520 m. Known only from type locality.

Sources: Mägdefrau et al., 1991 and Navarrete et al., 2009.

9. *Philodryas georgeboulengeri* Grazziotin, Zaher, Murphy, Scrocchi, Benavides, Zhang & Bonatto, 2012. Cladistics 28(5): 456–457. (*nomen substitutum*)

Synonym: *Oxybelis boulengeri* Procter, 1923 *(nomen praeoccupatum).*

Type: Holotype, BMNH 1946.1.9.86, a juvenile male (A.C. McDougall, 1922).

Type locality: "Trinidad, River Mamore, Bolivia" [= Trinidad, Beni Dept., E Bolivia, 14°50'S, 64°54'W, elevation 160 m].

Distribution: Eastern Peru (Cuzco) and E Bolivia (Beni), 160 m.

Sources: Keiser, 1989, Duellman & Salas, 1991, Fugler et al., 1995, Lehr, 2002 and Costa-Prudente et al., 2008.

Remarks: Original description in Procter (1923: 1062–1063, figs. 1a–c). A valid species fide Keiser, 1989. A member of *Philodryas* (previously in *Xenoxybelis) fide* Pyron et al. 2011.

10. *Philodryas laticeps* F. Werner, 1900a. Zool. Anz. 23(612): 198.

Synonyms: *Philodryas oligolepis* Gomes *in* Amaral, 1921 and *Philodryas affinis* L. Müller, 1928.

Type: Holotype, ZMB 15704, a 1045–1060 mm female (F. Weichberger).

Type locality: "Sta. Catarina, Brasilien" [= Santa Catarina State, S Brazil].

Distribution: South and SE Brazil (Espírito Santo, Minas Gerais, Santa Catarina) and Bolivia (Cochabamba, Santa Cruz), 190–420 m.

Source: Zaher et al., 2008.

Remarks: Neotype designation of FMNH 168003, a 1081 mm male from Río Chaparé at Río Mamoré (15°56'S, 64°41'W), Cochabamba Dept., Bolivia (W.P. McLean, 30 July 1965) *fide* R.A. Thomas (1976a: 235) invalid. Photograph of holotype in Zaher et al. (2008: figs. 2 a–f).

11. *Philodryas livida* (Amaral, 1923). Proc. New England Zool. Club 8: 91–93. (*Platyinion lividum*)

Type: Holotype, IB 3000, a 730 mm male (E. Guarini, 18 Oct. 1920), destroyed by fire 15 May 2010.

Type locality: "Dorizon, State of Paraná, Brazil" (in error). Corrected to Guaycurús, Estado de Matto

Grosso, Brasil [= Guaicurus, W Mato Grosso do Sul State, cen. Brazil, 20°07'S, 56°48'W, elevation 145 m] *fide* Amaral (1925b: 5).

Distribution: Southern Brazil (Mato Grosso do Sul, Goiás, ? Paraná, São Paulo), 145–880 m.

Sources: R.A. Thomas & Fernandes, 1996 and Valdujo & Nogueira, 1999.

Remarks: Supplemental original description in Amaral (1926a: 113, pl. 3, figs. 10–12). Amaral (1977: 164) erroneously reverted to Dorizon, Paraná as the type locality.

12. *Philodryas mattogrossensis* Koslowsky, 1898a. Rev. Mus. La Plata 8: 29–30, pl. 1, figs. 1–3.

Synonyms: *Philodryas ternetzii* Schenkel, 1901, *Philodryas erlandi* Lönnberg, 1902, and *Philodryas boulengeri* F. Werner, 1909b.

Type: Holotype, MLP, an 1195 mm female (C. Bach).

Type locality: "Miranda (Matto-Grosso), Brasil" [= Miranda, N Mato Grosso State, SW Brazil, 8°23'S, 57°57'W, elevation 225 m].

Distribution: Southern South America. Southern Brazil (Mato Grosso, Mato Grosso do Sul, Minas Gerais, São Paulo), S Bolivia (Chaco, Santa Cruz, Tarija), N Paraguay (Alto Paraguay, Boquerón, Concepción, Presidente Hayes) and ext. N Argentina (Chaco, Formosa, Salta), 150–500 m.

17. *Philodryas simonsii* Boulenger, 1900b. Ann. Mag. Nat. Hist. (7) 6(32): 185–186.

Synonyms: *Dromicus angustilineatus* K.P. Schmidt & Walker, 1943b, *Dromicus inca* K.P. Schmidt & Walker, 1943c, and *Incaspis cercostropha* Donoso-Barros, 1974.

Type: Holotype, BMNH 1946.1.4.98 (formerly BMNH 1900.3.30.18), a 780 mm male (P.O. Simons, 1899–1901).

Type locality: "Cajamarca, 9000 ft., Peru" [= Cajamarca, S Cajamarca Dept., NW Perú, 7°10'S, 78°31'W, elevation 2745 m].

Distribution: Southern South America. Extreme S Ecuador (Loja), W Peru (Ancash, Arequipa, Ayacucho, Cajamarca, Lima, Tacna) and ext. N Chile (Tarapacá), NSL–3050 m.

Sources: K.P. Schmidt & Walker, 1943b, Donoso-Barros, 1966, R.A. Thomas, 1977a and Franco, 2003.

18. *Philodryas tachymenoides* (K.P. Schmidt & Walker, 1943b). Field Mus. Nat. Hist. (Zool.) 24(27): 309–310. (*Dromicus tachymenoides*)

Type: Holotype, FMNH 34261, a 1055 mm female (C.C. Sanborn, Oct. 1939).

Type locality: "Chucurapi, a sugar hacienda near Mollendo, in the Department of Arequipa, Peru" [Chucurapi, near Mollendo (17°01'S, 72°01'W, elevation 95 m), S Arequipa Dept., S Peru].

Distribution: Southern Peru (Ancash, Arequipa, Lima, Puno, Tacna) and ext. N Chile (Tarapacá), NSL–3400 m.

Sources: Donoso-Barros, 1962, 1966, 1970 and Aguilar et al., 2007.

19. *Philodryas trilineata* (Burmeister, 1861). Reise La Plata-Staaten: 529. (*Herpetodryas trilineatus*)

Synonyms: *Dryophylax burmeisteri* Jan *in* Burmeister, 1861, *Dromicus chilensis* Steindachner, 1867b and *Philodryas arenarius* Andersson, 1898.

Type: Lectotype, ZMUH IV.108, an 1156 mm male (K.H.K. Burmeister, 1857–1860), designated by L. Müller (1941: 198), destroyed 31 March–5 April 1945 during World War II.

Type locality: "Mendoza." Emended to Mendoza, Argentina *fide* Jan and Sordelli (1870–1881: 10).

Distribution: Bolivia (Santa Cruz) and W Argentina (Chubut, Córdoba, Catamarca, La Pampa, La Rioja, Mendoza, Neuquén, Río Negro, Salta, San Juan, San Luis, Tucumán), 1000–2000 m.

Sources: F. Werner, 1896c, Andersson, 1898, Berg, 1898, Cei et al., 1978, Cei, 1986,1994, J.D. Williams & Francini, 1991, Lobo & Scrocchi, 1994 and Scolaro, 2005, 2006.

Remarks: Lectotype illustrated in Jan & Sordelli (1870–1881, 3[49]: pl. 5, fig. 1).

20. *Philodryas varia* (Jan, 1863a). Arch. Zool. Anat. Fis. 2(2): 297. (*Liophis wagleri varia*)

Synonyms: *Philodryas borellii* Peracca, 1897b and *Philodryas patagoniensis haywardi* Laurent, 1973b.
Type: Holotype, MNHN 7502, a 380–387 mm male (A.C.V.M.D. d'Orbidny, 1834).
Type locality: "Veracruz" [Mexico] (in error). Corrected to Santa Cruz de la Sierra, Santa Cruz Dept., Bolivia [17°48'S, 63°10'W, elevation 425 m] *fide* R.A. Thomas and Johnson (1984: 80).
Distribution: Southern South America. Southern Bolivia (Cochabamba, W Santa Cruz, Tarija) and NW Argentina (Catamarca, Jujuy, Salta, Tucumán), 500–2000+ m.
Sources: R.A. Thomas et al., 1977, J.D. Johnson, 1982, R.A. Thomas & Johnson, 1984, J.D. Williams & Francini, 1991 and Fugler et al., 1995.
Remarks: Type locality restriction of Rodriguez Clara, Veracruz, Mexico *fide* H.M. Smith and Taylor (1950a: 350) invalid. Buenos Aires, Argentina records need confirmation *fide* J.D. Williams & Francini (1991: 74). A synonym of *Masticophis mentovarius fide* H.M. Smith & Taylor (1945: 97), based solely on the incorrect type locality, but removed *fide* J.D. Johnson (1982: 259.2).

21. *Philodryas viridissima* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 226. (*Coluber viridissimus*)

Synonyms: ? *Coluber purpurescens* Gmelin, 1789, ? *Coluber subcyaneus* Lacépède, 1789 (*nomen rejiciendum*), *Coluber janthinus* Daudin, 1803c, ? *Natrix caerulescens* Merrem, 1820, and *Philodryas crassifrons* Cope, 1861c.
Type: Holotype, ZMUU 149 (formerly JA).
Type locality: "Surinamei" [= Suriname, or Guianas].
Distribution: Northern South America. Southeastern Colombia (Amazonas, Meta), E Venezuela (Amazonas, Bolívar, Monagas), Guyana (Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Demerara-Berbice, Upper Takutu-Upper Essequibo), Suriname (Marowijne, Nickerie, Paramaribo, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), Brazil (Acre, Amazonas, Bahia, Maranhão, Mato Grosso, ? Minas Gerais, Pará, Rondônia, Marajo Is.), E Ecuador (Morona-Santiago, Napo, Pastaza), E Peru (Loreto, Madre de Dios, Pasco, San Martin) and N Bolivia (Beni, Cochabamba, La Paz, Santa Cruz), NSL–985 m.

3. *Philothamnus bequaerti* (K.P. Schmidt, 1923). Bull. Amer. Mus. Nat. Hist. 49(1): 75–76, fig. 3. (*Chlorophis bequaerti*)

Type: Holotype, AMNH 12080, a 652 mm male (H. Lang & J. P. Chapin [Lang-Chapin Belgian Congo Exped.], Nov. 1910).

Type locality: "Niangara, Belgian Congo, ca. 3°40'N, 27°50'E" [= Niangara, ext. N Orientale Prov., NE Democratic Republic of the Congo, 3°42'N, 27°53'E, elevation 675 m].

Distribution: Central Africa. Central Cameroon (Adamaoua, Centre), S Chad (Moyen-Chari), Central African Republic (Bamingui-Bangoran, Haute-Sangha, Kemo-Gribingui, Ombella-Mpuko, Ouaka, Ouham, Ouham-Pende, Vakaga), S Congo (Pool), Democratic Republic of the Congo (? S Bandundu, Bas-Congo, N Equateur, N Orientale), Uganda (Central, Eastern, Northern, Western, Kome Is.), E South Sudan (Eastern Equatoria, Junglei) and W Ethiopia (Gondar, Illubabor, Wollega), 100–1200 m.

Sources: Hughes, 1985, Joger, 1990, Largen & Rasmussen, 1993, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007 and Largen & Spawls, 2010.

4. *Philothamnus carinatus* (Andersson, 1901). Bih. Kon. Sven. Vet.-Akad. Handl. (4) 27(5): 9–11. (*Chlorophis carinatus*)

Synonyms: *Herpetaethiops bellii* A.C.L.G. Günther, 1866 *(nomen oblitum)* and *Philothamnus nigrofasciatus* Buchholz & Peters *in* W.C.H. Peters, 1875 *(nomen rejiciendum).*

Types: Syntypes (5), NHR 1972, a 700 mm female (Knöppel, 1886) [Cameroon], NHR 1973–76, an 815 mm female, 730+ mm female, 595 mm male, and 300 mm male (K.W. Knutson and G. Valdau, 1885) [Mapanja].

Type locality: "Cameroon" and "Mapanja, Cameroon." Restricted to Mapanja [= Mapanja, Sud-Ouest Prov., SW Cameroon, 4°07'N, 9°07'E, elevation 1600 m] *fide* Mertens (1964a: 227).

Distribution: Central Africa. Southeastern Guinea (Macenta, Nzérékoré), W Ivory Coast (Danané, Dix-Huit Montagnes), S Ghana (Accra, Ahafo, Ashanti, Central, Eastern, Volta, Western), Togo (Plateaux), SW Nigeria, S Cameroon (Adamaoua, Est, Centre, Littoral, Nord-Ouest, Sud, Sud-Ouest), S Central African Republic (Haute-Sangha, Lobaye, Mbomou, Ombella-Mpoko, Sangha), Equatorial Guinea (Littoral, Bioko Is.), Gabon (Estuaire, Haut-Ogooué, Moyen-Ogooué, Ngounié, Ogooué-Ivindo, Ogooué-Lolo, Ogooué-Maritime, Woleu-Ntem), Congo (Kouilou, Lekoumou, Sangha), NW Angola (Cabinda), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), SW Uganda (Western), SW Kenya (Western), W Rwanda, W Burundi and W Tanzania (Kigoma), NSL–2300 m.

Sources: Witte, 1953, 1962, Angel et al., 1954, Doucet, 1963, Mertens, 1965c, Knoepffler, 1966, Villiers, 1966, Pitman, 1974, Trape, 1981, 1985, Joger, 1990, J.B. Rasmussen, 1991, J.-F. Trape & Roux-Estève, 1995, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008 and Segniagbeto et al., 2011.

Remarks: Official Specific Name no. *fide* Opinion 1214 (ICZN, 1982e). NHR catalogue lists NHR 1973–76 syntypes under NHR 1973 (4). In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Chlorophis carinatus* Andersson is designated a *nomen protectum* and *Herpetaethiops bellii* Günther a *nomen oblitum*.

5. *Philothamnus dorsalis* (Bocage, 1866b). J. Sci. Math. Phys. Nat., Lisboa 1(1): 48. (*Leptophis dorsalis*)

Type: Lectotype, MBL (J.A. d'Anchieta, 1864), designated by Bocage (1882b: 10), destroyed by fire 18 March 1978.
Type locality: "Molembo, Afrique occidentale,"[= Molembo, West Africa]. Emended to Molembo de la Côte de Loango au nord du Zaire *fide* Bocage (1882b: 10), [= Malembo, Cabinda Prov., ext. NW Angola, 05°20'S, 12°11'E, elevation 110 m].
Distribution: Central Africa. Southern Cameroon (Est, Ouest, Sud), W Gabon (Moyen-Ogooué, Ogooué-Maritime), S Congo (Bouenza, Brazzaville, Kouilou, Plateau, Pool), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Katanga, Kinshasa, Nord-Kivu, Orientale) and N Angola (Benquela, Cabinda, Huíla, Lunda Norte, Zaire), 10–1700 m.
Sources: J.B. Rasmussen, 1991, J.-F. Trape & Roux-Estève, 1995, Chippaux, 2006, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

6. *Philothamnus girardi* Bocage, 1893a. J. Sci. Math. Phy. Nat. (2) 3(9): 46.

Type: Lectotype, BMNH 1946.1.6.3, a 736 mm female (F. Newton, 1892), designated by Hughes (1985: 525).
Type locality: "Annobon Island" [= Pagalu Is., Equatorial Guinea, 1°26'S, 5°38'E] via lectotype selection.
Distribution: Equatorial Guinea (Pagalu Is.).
Sources: Mertens, 1934b and Jesus et al., 2009.
Remarks: Supplemental original description reprinted in Bocage (1893b: 47–48). Boulenger (1894a: 102) listed the lectotype as male and Hughes (1985: 525) listed it as a neotype. Possibly occurs in Congo (Kouilou) *fide* J.-F. Trape & Roux-Estève (1995: 39).

7. *Philothamnus heterodermus* (Hallowell, 1857b). Proc. Acad. Nat. Sci. Philadelphia (1857–1858) 9(3): 54. (*Chlorophis heterodermus*)

Synonym: *Chlorophis cyaneus* G. Hecht, 1929b.
Type: Holotype, ANSP 5219, a 540 mm specimen (H.A. Ford).
Type locality: "Gaboon country, West Africa" [= Gabon].
Distribution: West and cen. Africa. Guinea–Bissau (Bafatá, Gabú, Tombali, Orango Is.), Guinea (Gaoual), S Sierra Leone (S Northern, Southern, Western), Liberia (Maryland, Montserrado, Margibi, Nimba), S Ivory Coast (Abidjan, Bas-Sassandra, Bouna, Danané, Dix-Huit Montagnes, Guiglo, Lagunes, Sassandra, Tabou, Toumodi), S Ghana (Accra, Ashanti, Central, Eastern, Western), S Togo (Plateaux), S Benin (Cotonou), S Nigeria (Bendel, Benue, Cross River, Delta, Lagos, Ogun, Oyo, Rivers), Cameroon (Adamaoua, Centre, Est, Littoral, Nord, Nord-Ouest, Ouest, Sud, Sud-Ouest), ext. S Chad (Legone Oriental), Central African Republic (Haute-Sangha, Kemo-Gribingui, Lobaye, Mbomou, Ombella-Mpoko, Sangha), Gabon (Moyen-Ogooué, Ogooué-Ivindo, Woleu-Ntem), Congo (Brazzaville, Kouilou, Lekoumou, Niari, Pool, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Équateur, Katanga, Kinshasa, Orientale, Sud- Kivu), SW Uganda (Western), N Rwanda, Burundi, Tanzania (Mbeya), and W Angola (Cuanza Sul), NSL–1900 m.

Remarks: BMNH catalogue lists BMNH 1946.1.10.25 from Congo as a type. Probably occurs in Togo *fide* Segniagbeto et al. (2011: 353). Mozambique record

P

doubtful *fide* Loveridge (1958: 105); Dar es Salaam, Lake Rukwa and Lamu Is., Tanzania records doubtful *fide* Spawls et al. (2002: 356).

9. *Philothamnus hoplogaster* (A.C.L.G. Günther, 1863b). Ann. Mag. Nat. Hist. (3) 11(64): 286. (*Ahaetulla hoplogaster*)

Synonyms: *Philothamnus neglectus* W.C.H. Peters, 1867a and *Chlorophis oldhami* Theobald, 1868b.

Types: Syntypes (3), BMNH 1946.1.6.1, BMNH 1946.1.6.6, and BMNH 1946.1.6.14, longest syntype 650–660 mm (T. Ayers).

Type locality: "Port Natal" [= Durban, E KwaZulu-Natal Prov., E South Africa, 29°52'S, 31°02'E, elevation NSL].

Distribution: Eastern Africa. Southeastern South Sudan (Eastern Equatoria), S Democratic Republic of the Congo (Bas-Congo, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa), S Uganda (Central), SE Kenya (Coast), Burundi (Bururi), Tanzania (Das es Salaam, Iringa, Kigoma, Kilimanjaro, Lindi, Mbeya, Morogoro, Mtwara, Piwani, Rukwa, Ruvuma, Tanga, Mafia Is.), Angola (Benguela, Bié, Lunda Norte, Namibe), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), Mozambique (Cabo Delgado, Gaza, Inhambane, Manica, Maputo, Niassa, Sofala, Tete, Zambézia), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), ext. NE Botswana (North East, North West), cen. Namibia (Damaraland), Swaziland and South Africa (E Cape, KwaZulu-Natal, Transvaal), NSL–1800 m.

Sources: Uthmöller, 1937, 1941a, Laurent, 1956a, 1964a, FitzSimons, 1974, Broadley & Cock, 1975, Spawls, 1978, Broadley, 1983, Pienaar et al., 1983, Auerbach, 1987, Branch, 1988, Boycott & Culverwell, 1992, Spawls et al., 2002, Broadley et al., 2003 and Broadley & Blaylock, 2013.

Remarks: Namibia record rejected *fide* FitzSimons (1962: 148) but accepted *fide* Hughes (1985: 517). Probably occurs in Central African Republic *fide* Chirio & Ineich (2006: 51).

10. *Philothamnus hughesi* J.-F. Trape and Roux-Estève, 1990. J. Afr. Zool. 104(5): 376–378, fig. 1.

Type: Holotype, MNHN 1989.2543, an 810 mm female (D. Schwarz, 22 Dec. 1982).

Type locality: "Gangalingolo (10 Km au sud-ouest de Brazzaville), Congo" [= Gangalingolo, S Brazzaville Region, S Congo, 4°18'S, 15°13'E, elevation 300 m].

Distribution: Central Africa. Cameroon (Adamaoua, Centre, Ouest, Nord-Ouest), S Chad, Central African Republic (Haute-Sangha, Lobaye, Mbomou, Ombella-Mpoko, Ouaka, Ouham), Gabon, Congo (Brazzaville), N Democratic Republic of the Congo (Equateur, Orientale), SE South Sudan (Eastern Equatoria) and S Uganda (S Central), 300–2100 m.

Sources: Roux-Estève, 1965, Joger, 1990, J.-F. Trape & Roux-Estève, 1995, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006 and Chirio & LeBreton, 2007.

11. *Philothamnus irregularis* (Leach *in* Bowdich, 1819). Miss. Cape Coast Castle-Ashantee: 494. (*Coluber irregularis*)

Synonyms: *Coluber azureus* Lacépède, 1789 (*nomen rejiciendum*), *Coluber caeruleus* Lacépède, 1789 (*nomen rejiciendum*), *Coluber caerulescens* Daudin, 1803d, *Coluber caesius* Cloquet, 1818 *in* Levrault, 1816–1830, *Dendrophis chenonii* J.T. Reinhardt, 1843, and *Ahaehulla fraenata* F. Müller, 1885.

Type: Holotype, BMNH 1965.641 (T.E. Bowdich, April 1817–Oct. 1818).

Type locality: "Fantee, Cape Coast Castle to Ashantee" [= Fantee tribal area, between Mansu and Fosu along Amissa (Oki) River, Central Region, S Ghana, elevation 160–180 m].

Distribution: West Africa. Senegal (Dakar, Fatick, Kaolack, Kédougou, Louga, Tambacounda), Gambia (Kombo Saint Mary, MacCarthy Island, Western), Guinea–Bissau (Biomo, Bissau, Bolama, Cacheu, Gabú, Bolama Is.), Guinea (Beyla, Boffa, Boké, Kérouané, Nzérékoré, Télimélé), Sierra Leone (Eastern, Northern, Southern, Western, Sherbro Is.), Liberia (Bong, Grand Cape Mount, Montserrado, Nimba), S Mali (S Gao, Koulikoro, Mopti, Ségou, Sikasso), Ivory Coast (Abidjan, Bouaké, Bouna, Danané, Ferkéssédougou, Lagunes, Toumodi), Burkina Faso (Centre, Centre Est, S Centre-Nord, Centre Ouest, Est, Hauts-Bassins, Sud-Ouest, Volta-Noire), Ghana (Accra, S Central, Eastern, Northern, Upper East, Upper West, Volta, S Western), S Togo (Kara, Maritime, Plateaux), S Benin (Alibori, Atakora, Atlantique, Maritime, Zou), SW Niger (Dosso, Niamey), Nigeria (Abia, Bauchi, Bayelsa, Benue, Borno, Delta, Imo, Jigawa, Kaduna, Kogi, Kwara, Lagos, Niger, Oyo, Plateau, Rivers, Soko to, Taraba), N Cameroon (Adamaoua, Centre, Littoral, Extreme-Nord, Nord, Nord-Ouest, Sud, Sud-Ouest), SW Chad (Mayo-Kebbi), Central African Republic (Kemo-Gribingui), Democratic Republic of the Congo (Katanga, Kinshasa, Orientale), NSL–1400 m.

Sources: Bowdich, 1819, Villiers, 1953, 1966, 1975, E.H. Taylor & Weyer, 1958, Doucet, 1963, Menzies, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, Papenfuss, 1969, Dunger, 1973, Miles et al., 1978, Roman, 1980, Hughes, 1983, 1984, 2013, Greenbaum & Carr, 2005, Villiers & Condamin, 2005, Chippaux, 2006, J.-F. Remarks: Official Specific Name no. 234 *fide* Opinion 328 (ICZN, 1955a).

P

12. *Philothamnus macrops* (Boulenger, 1895d). Ann. Mag. Nat. Hist. (6) 16(92): 171. (*Oligolepis macrops*)

Type: Holotype, BMNH 1946.1.10.32, a 215 mm specimen.
Type locality: "Usambara, German East Africa" [= Usambara Mtns., Tanga Prov., ext. NW Tanganyika, ca. 4°45'S, 38°30'E].
Distribution: Eastern Tanzania (Iringa, Lindi, Mbeya, Mtwara, Tanga, Zanzibar Is.), NSL–2000 m.
Sources: Loveridge, 1928, J.B. Rasmussen, 1981 and Spawls et al., 2002.
Remarks: Possibly occurs in N Mozambique *fide* Spawls et al. (2002: 358).

13. *Philothamnus natalensis* (A. Smith, 1848 *in* 1838–1849). Illust. Zool. So. Africa, Rept.: pl. 64, figs. 1, 1ab, 2, 2a–b, 3, 3a–b, 2 pp. (*Dendrophis* [*Philothamnus*] *natalensis*)

Synonyms: *Dendrophis subcarinatus* Jan, 1863b (*nomen nudum*), *Dendrophis subcarinatus* Jan, 1869 *in* Jan & Sordelli, 1866–1870, and *Philothamnus natalensis occidentalis* Broadley, 1966a.
Type: Holotype, not designated, an 820 mm specimen (A. Smith, 1831), location unknown.
Type locality: "neighbourhood of Port Natal" [= vicinity of Durban (29°52'S, 31°02'E, elevation NSL), E KwaZulu-Natal Prov., E South Africa].
Distribution: Southeastern Africa. Eastern Zimbabwe (Manicaland, Masvingo, Midlands), S Mozambique (Gaza, Inhaca, Inhambane, Manica, Maputo, Sofala, Bazaruto and Magarngue Is.), NE Swaziland and SE South Africa (Eastern Cape, Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, North West, Western Cape), NSL–1570 m.
Sources: FitzSimons, 1937, 1974, Broadley & Cock, 1975, De Waal, 1978, Broadley, 1983, 1990, Pienaar et al., 1983, Branch, 1988 and Broadley & Blaylock, 2013.
Remarks: BMNH catalogue lists 7 paratypes (BMNH 1862.9.2.27, 1865.7.27.5, 1876.11.9.4, 1877.8.8.6, 1887.12.6.9, 1878.10.12.23, 1953.1.1.4) from South Africa whereas FitzSimons (1937: 262) reported no types in BMNH. Namibia records need confirmation.

14. *Philothamnus nitidus* (A.C.L.G. Günther, 1863b). Ann. Mag. Nat. Hist. (3) 11(64): 286–287. (*Ahaetulla nitida*)

Synonyms: *Ahaetulla lagoensis* A.C.L.G. Günther, 1872b, *Philothamnus irregularis longifrenatus* Buchholz and Peters *in* W.C.H. Peters, 1875, and *Philothamnus nitidus loveridgei* Laurent, 1960.
Types: Syntypes (2), BMNH 1946.1.10.28, an 813 mm male [Demerara, i.e. Lagos], and BMNH 1946.1.6.2, a female [Nigeria].
Type locality: "Demerara, South America" [= Demerara, Guyana] (in error) and not stated. Corrected to Lagos, Nigeria [= Lagos, Nigeria, 6°27'N, 3°24'E, elevation NSL] *fide* Boulenger (1894a: 101).
Distribution: West, cen. and E Africa. Southeastern Guinea, Sierra Leone (Southern), S Ivory Coast (Abidjan, Guiglo, Lagunes, Moyen-Cavally, Tabou, Tai), S Ghana (Accra, Central, Eastern, Volta), S Togo (Plateaux), S Benin (Maritime, Zou), SW Nigeria (Lagos), S Cameroon (Adamaoua, Centre, Est, Littoral, Nord-Ouest, Sud, Sud-Ouest), SW Central African Republic (Haute-Sangha, Lobaye), Equatorial Guinea (Bioko Is.), Gabon (Haut-Ogooué, Moyen-Ogooué, Nyanga), Congo (Brazzaville, Kouilou, Pool), Congo (Cuvette, Kouilou, Lekoumou, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, N Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), NE Angola (Lunda Norte), S Uganda (Central, Western, Kome Is.), SW Kenya (S Rift Valley, Western), Rwanda (Kigali), Burundi (Rutana) and SW Tanzania (Rukwa), NSL–1200 m.
Sources: Boulenger, 1894a, Witte, 1962, Doucet, 1963, Laurent, 1964a, Mertens, 1965c, Roux-Estève, 1965, Leston & Hughes, 1968, Hughes & Barry, 1969, Dunger, 1973, Hughes, 1983, 2013, Joger, 1990, J.-F. Trape & Roux-Estève, 1990, 1995, Boycott & Culverwell, 1992, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007 and Segniagbeto et al., 2011.
Remarks: BMNH 1946.1.10.28 is type of *Ahaetulla lagoensis*, but BMNH catalogue reads type of *A. nitidus fide* M. Lang (pers. comm.). Hughes (1985: 524) listed BMNH 1946.1.10.24 from "Demerara, Guyana" as one of Günther's types of *P. nitidus*.

15. *Philothamnus ornatus* Bocage, 1872. J. Sci. Math. Phys. Nat., Lisboa 4(13): 80–81.

Types: Syntypes (3), MBL (2), a male and female (J.A. d'Anchieta, 1871) [Huilla], and MBL, a female (Hopffer, 1871) [Cacheu], longest syntype 710 mm, destroyed by fire 18 March 1978.
Type locality: "Cacheu, sur la côté de Guinée, Afrique occidentale" [= Cacheu, Guinea–bissau] (in error *fide* Loveridge, 1958: 84) and "Huilla" [Angola]. Restricted to Huilla, Mossamedes Distr., Angola *fide* Bogert (1940: 52).
Distribution: Central Africa. Southern Cameroon (Centre, Est, Littoral, Nord-Ouest), NE Democratic Republic of the Congo (NE Orientale), SW Tanzania (Rukwa), W Angola (Benguela, Bié, Cunene, Huambo, Huíla), Zambia (Eastern, Northern, North West), NE Namibia (Caprivi, Okavango), N Botswana (North West) and NE Zimbabwe (Manicaland, Mashonaland East, Mashonaland West), 300–1500 m.
Sources: Bocage, 1895, 1896, Bogert, 1940, FitzSimons, 1974, Broadley, 1971, 1983, Broadley & Cock, 1975, Auerbach, 1987, Branch, 1988, Spawls et al., 2002, M. Griffin, 2003, Chippaux, 2006, Chirio & LeBreton, 2007 and Broadley & Blaylock, 2013.

16. *Philothamnus pobeguini* (Chabanaud, 1917a). Bull. Mus. Hist. Nat., Paris (1916) 22(7): 371–372, fig. 12. (*Chlorophis heterodermus pobeguini)*

Type: Holotype, MNHN 1916.206, a 780 mm male (H. Pobéguin, 1908).

Type locality: "Guinée française" [= Guinea].

Distribution: Guinea (Boké, Forécariah, Macenta, Nzérékoré, Télimélé), NSL–200 m.

Remarks: A valid species *fide* J.-F. Trape *in* Chirio (2013: 85).

17. *Philothamnus punctatus* W.C.H. Peters, 1867a. Mber. Königl. Akad. Wiss. Berlin 1866(12): 889–890.

Synonyms: *Dendrophis melanostigma* Jan, 1863b (*nomen nudum*), *Dendrophis melanostigma* Jan, 1869 *in* Jan & Sordelli, 1866–1870, *Ahaetulla kirkii* A.C.L.G. Günther, 1868, and *Philothamnus punctatus sansibaricus* Pfeffer, 1893.

Types: Syntypes (7), ZMB 1919a–b, ZMB 1920a–b, ZMB 5571a–c, one male and two females, sex of others unknown (C. von der Decken).

Type locality: "Zanzibarküste, Ostafrika" [= Zanzibar coast, East Africa or coastal Kenya and Tanzania].

Distribution: East Africa. Eastern Ethiopia (Bale, Hararge, Sidamo), Somalia (Awdal, Bay, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Shabeellaha Hoose, Togdheer, Woqooyi Galbeed), E Kenya (E Coast, N Eastern, N North-Eastern), E Tanzania (Dar es Salaam, Iringa, Kilimanjaro, Lindi, Mtwara, Piwani, Ruvuma, Tanga, Pemba and Zanzibar Is.), NE Malawi (Northern) and N Mozambique (Cabo Delgado, Niassa, Sofala, Zambézia), 200–1500 m.

Sources: Lanza, 1983a, Largen & Rasmussen, 1993, Spawls et al., 2002, Branch et al., 2005 and Largen & Spawls, 2010.

18. *Philothamnus ruandae* Loveridge, 1951b. Bull. Inst. Roy. Sci. Nat. Belgique 27(37): 2–3. (*Philothamnus heterodermus ruandae*)

Type: Holotype, IRSNB 2053 (formerly IRSNB I.G. 15860), a 922 mm female (F.L. Hendrickx, 1947).

Type locality: "Mulungu, Lake Kivu, Congo Belge" [= Mulungu, Sud-Kivu Prov., E Democratic Republic of the Congo, 2°19'S, 28°48'E, elevation 1800 m].

Distribution: East Africa. Eastern Democratic Republic of the Congo (Katanga, Nord-Kivu, Sud-Kivu), SW Uganda (S Western), W Rwanda and NW Burundi, 700–2350 m.

Sources: Laurent, 1956a, Witte, 1962, 1975, Pitman, 1974 and Spawls et al., 2002.

19. *Philothamnus semivariegatus* (A. Smith, 1847 *in* 1838–1849). Illust. Zool. So. Africa, Rept.: pls. 59–60, 2 pp. (*Dendrophis semivariegata*)

Synonyms: *Philothamnus smithii* Bocage, 1882b and *Ahaetulla bocagii* A.C.L.G. Günther, 1888c.

Type: Lectotype, NMSZ 1859.13.1257a (formerly RSM), a 1067 mm specimen with skull and viscera removed (A. Smith, July 1828), designated by Bogert (1940: 56).

Type locality: "Busman Flat, South Africa" [= Bushman Flat, W Northern Cape Prov., W South Africa, ca. 29°40'S, 17°53'E, elevation 935 m] via lectotype selection.

Distribution: Subsaharan Africa. Southern Senegal (Dakar, Fatick, Kédougou, Kolda, Thiès, Ziguinchor), Gambia (MacCarthy Island), Guinea–Bissau (Bissau, Quinara), Guinea (Beyla, Dubréka, Macenta, Télimélé), Sierra Leone (Eastern, Northern, Southern), Liberia (Bong), Ivory Coast (Abidjan, Bouaké, Ferkéssédongou, Toumodi), S Mali (S Gao, Koulikoro, Mopti, Sikasso), Ghana (Accra, E Brong-Ahafo, Central, Northern, Upper East, Upper West, Volta), N Togo (Centrale, Kara, Maritime, Plateaux), Burkina Faso (Centre-Est, Centre-Ouest, Est, Sud-Ouest, Volta-Noire), Benin (Alibori, Atlantique, Collines, Cotonou, Maritime, Zou), SW Niger (Dosso, Niamey), Nigeria (Bauchi, Benue, Delta, Kwara, Lagos, Plateau), Cameroon (Adamaoua, Centre, Extreme-Nord, Littoral, Nord, Nord-Ouest, Ouest, Sud-Ouest), Equatorial Guinea (Bioko Is.), Congo (Kouilou), Central African Republic (Bamingui-Bangoran, Haute-Kotto, Haut-Mbomou, Kemo-Gribingui, Lobaye, Ouaka, Ouham, Ombella-Mpoko, Ouham-Pende, Vakaga), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Maniema, Nord-Kivu, Orientale, Sud-Kivu), Angola (Benguela, Bié, Cuanza Sul, Cunene, Huíla, Lunda Norte, Moxico, Namibe), S Sudan (Al Khartum, Nahr An Nil), SE South Sudan (Eastern Equatoria), S Eritrea (Southern, Southern Red Sea), Ethiopia (Gemu Gofa, Illubabor, Sidamo), Somalia (Bay, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Shabeellaha Hoose, Sool, Togdheer, Woqooyi Galbeed), Uganda (Central, Eastern, Northern, Western, Kome and Sese Is.), Kenya (Coast, S Eastern, North-Eastern, Nyanza, Rift Valley, Western, Lamu and Manda Is.), Tanzania (Arusha, Dar es Salaam, Dodoma, Iringa, Kigoma, Kilimanjaro, Lindi, Mara, Mbeya, Morogoro, Mtwara, Mwanza, Piwani, Rukwa, Ruvuma, Shinyanga, Singida, Tabora, Tanga, Kagera, Jambiani, Mafia, Pemba, Ukwere and Zanzibar Is.), Rwanda, Burundi (Bururi), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), Mozambique (Gaza, Inhambane, Manica, Maputo, Nampula, Tete, Sofala, Zambézia, Bazaruto and Querimba Is.), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo,

Matebeleland North, Matebeleland South, Midlands), Botswana (Central Gaborone, Ghanzi, Kgalagali, Kweneng, North East, North West, South East, Southern, Tuli), N Namibia (Caprivi, Khomas, Kunene, Omaheke, Omusati, Otjozondjupa), Swaziland, E South Africa (Eastern Cape, NW Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, E Northern, North West), NSL–2000 m.

Trape & Roux-Estève, 1995, Clauss & Clauss, 2002, Spawls et al., 2002, Broadley et al., 2003, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Largen & Spawls, 2010, Ullenburch et al., 2010, Segniagbeto et al., 2011, Auliya et al., 2012, Broadley & Blaylock, 2013 and Chirio, 2013.

Remarks: Official Specific Name no. 235 *fide* Opinion 328 (ICZN, 1955a). Yemen record rejected *fide* Gasperetti (1988: 265) and Spawls et al. (2002: 363).

20. *Philothamnus thomensis* Bocage, 1882a. J. Sci. Math. Phys. Nat., Lisboa 8(32): 302.

Type: Lectotype, BMNH 1946.1.21.60, a 900 mm specimen, designated by Hughes (1985: 524).

Type locality: “ile de S. Thomé, Angola” [= São Tomé Is., São Tomé and Príncipe, Gulf of Guinea] via lectotype selection.

Distribution: São Tomé and Príncipe (São Tomé Is.).

Source: Jesus et al., 2009.

PHIMOPHIS Cope, 1860d (*nomen substitutum*) (Xenodontidae)

Synonyms: *Rhinosimus* A.-M.-C. Duméril, 1853 *(nomen nudum), Rhinosimus* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen rejiciendum), Pilmophis* – Rochebrune, 1884 *(nomen rejiciendum), Phymophis* – Aleman, 1953 *(nomen incorrectum),* and *Rhinosomus* – Hoge, 1953c *(nomen incorrectum).*

Type species: *Rhinosimus guerini* A.-M.-C. Duméril, Bibron & Duméril, 1854b.

Distribution: Lower Central America and South America.

Sources: J.A. Peters & Orejas-Miranda, 1970, Cadle, 1984a, Abdala, 1990, Rodrigues, 1993b and Zaher et al., 2009.

Remarks: Official Generic Name no. 1585 *fide* Opinion 698 (ICZN, 1955a).

1. *Phimophis guerini* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 991–992, pl. 72, figs. 1–3. (*Rhinosimus guerinii*)

Synonyms: *Rhinosimus guerinii* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Rhinostoma scytaloides* F. Werner, 1913, and *Rhinosimus amarali* Mello, 1926.

Type: Holotype, MNHN 7594, a 758 mm specimen.

Type locality: Unknown. Restricted to Bahia, Brazil [= Salvador, E Bahia State, E Brazil, 12°58’S, 38°32’W, elevation NSL] *fide* Serié (1936: 47).

Distribution: Eastern South America. Suriname or French Guiana, E Brazil (Alagoas, Bahia, Goiás, Mato Grosso do Sul, Minas Gerais, S Piauí, São Paulo) and N Argentina (Chaco, Córdoba, Corrientes, Entre Ríos, Formosa, Misiones, Santa Fe, Tucumán), 20–300 m.

Sources: Hoge, 1953c, Hoogmoed, 1982, Abdala, 1990, J.D. Williams & Francini, 1991, Cei, 1994, Leynaud & Chiaraviglio, 1996, Yanosky et al., 1996, Freitas, 1999, Giraudo & Scrocchi, 2002 and Silva Lisboa et al., 2011.

Remarks: Official Specific Name no. 1968 *fide* Opinion 698 (ICZN, 1964b). A second specimen from E. Deville mentioned, but not described, by Duméril, Bibron & Duméril (1854b: 992) originated from Bahia, Brazil.

2. *Phimophis guianensis* (Troschel *in* Schomburgk, 1848). Versuch Fauna Flora Brit.-Guiana: 653. (*Heterodon guianensis*)

P

Synonyms: *Coluber contaminatus* Gravenhorst, 1807 (*nomen oblitum), Rhinostoma guntheri* Cope, 1860e, *Rhinostoma guianense* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Rhinostoma guiamnense* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type: Holotype, not designated, a 762 mm specimen (R.H. Schomburgk, 1834–1836 or 1840–1844), location unknown.

Type locality: “in der unmittelbaren Umgebung von Pirara, Britisch-Guiana” [= vicinity of Pirara (3°37’N, 59°40’W, elevation 80 m), W Rupununi Region, SW Guyana].

Distribution: Panamá and N South America. Eastern Panama (Coclé, Darien, Los Santos, Panamá), Colombia (Atlántico, Bolívar, Caldas, Chocó, Córdoba, Cundinamarca, Huila, La Guajira, Magdalena, Meta, Sucre, Vaupés), N Venezuela (Amazonas, Anzoátegui, Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Nueva Esparta, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy, Vargas, Zulia, Cubagua and Margarita Is.), Guyana (Demerara-Mahaica, Upper Demerara-Upper Essequibo),

Suriname (Para) and French Guiana (Cayenne, Saint-Laurent-du-Maroni), NSL–900 m.

Sources: Serie, 1915, Dunn, 1949, Roze, 1966a, Amaral, 1978, Gasc & Rodrigues, 1980, Abuys, 1985b, Lancini-V., 1986, Pérez-Santos, 1986, Chippaux, 1987, Pérez-Santos & Moreno, 1988, Gorzula & Señaris, 1998, Starace, 1998, Mijares-Urrutia & Arends, 2000, Giraudo & Scrocchi, 2002, Navarrete et al., 2009, Ugueto & Rivas, 2010 and C.J. Cole et al., 2013.

Remarks: Official Specific Name no. 1967 *fide* Opinion 698 (ICZN, 1964). In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Heterodon guianensis* Troschel is designated a *nomen protectum* and *Coluber contaminatus* Gravenhorst a *nomen oblitum*. Probably occurs in NE Brazil.

3. *Phimophis vittatus* (Boulenger, 1896a). Cat. Snakes Brit. Mus. 3: 115, pl. 5, fig. 3. (*Rhinostoma vittatum*)

Type: Holotype, BMNH 1946.1.9.29, a 620+ mm female (E.W. White).

Type locality: "Buenos Ayres, Argentina," (in error *fide* J.A. Peters and Orejas-Miranda, 1970: 246 & Cei, 1994: 651).

Distribution: Southern South America. Southern Bolivia (Tarija), Paraguay and N Argentina (Catamarca, Chaco, Córdoba, Formosa, La Rioja, Salta, San Juan, San Luis, Santa Fe, Santiago del Estero, Tucumán, Aragonés Is.), 200–800 m.

Sources: Peracca, 1897b, Bertoni, 1915, Abalos et al., 1964, Abdala, 1990, J.D. Williams & Francini, 1991, Cei, 1994, Leynaud & Bucher, 1999 and Giraudi & Scrocchi, 2002.

Remarks: Argentine records of Entre Ríos and Santa Fe need confirmation *fide* J.D. Williams & Francini (1991: 76).

P

PHYLLORHYNCHUS Stejneger, 1890b (Colubridae)

Synonym: *Phyllorhyncus* – Pinney, 1981 *(nomen incorrectum).*

Type species: *Phyllorhynchus browni* Stejneger, 1890b.

Distribution: Southwestern USA and NW Mexico.

Fossil record: Pleistocene of SW USA.

Sources: Klauber, 1935b, Bogert & Oliver, 1945, Fowlie, 1965, Hardy & McDiarmid, 1969, McDiarmid & McCleary, 1993, Goldberg, 1996, Bartlett & Tennant, 2000 and Cadle, 2011.

1. *Phyllorhynchus browni* Stejneger, 1890b. Proc. U.S. Natl. Mus. 13(802): 152–155, 3 figs.

Synonyms: *Phyllorhynchus browni lucidus* Klauber, 1940c, *Phyllorhynchus browni fortitus* Bogert and Oliver, 1945, and *Phyllorhynchus browni klauberi* Shannon & Humphrey, 1959a.

Type: Holotype, USNM 15719, a 325 mm specimen (H. Brown).

Type locality: "Tucson, Arizona" [Pima Co., USA].

Distribution: Southwestern USA (S Arizona) and NW Mexico (Sinaloa, Sonora), 300–915 m.

Source: Stebbins, 1985.

Remarks: Possibly two valid species *(P. browni* and *P. fortitus) fide* H.M. Smith et al. (2005: 68) and Cadle (2011: 4).

2. *Phyllorhynchus decurtatus* (Cope, 1869b). Proc. Acad. Nat. Sci. Philadelphia (1868) 20(5): 310–311. (*Phimothyra decurtata*)

Synonyms: *Phyllorhynchus decurtatus perkinsi* Klauber, 1935b, *Phyllorhynchus decurtatus nubilus* Klauber, 1940c, *Phyllorhynchus decurtatus norrisi* H.M. Smith & Langebartel, 1951, *Phyllorhynchus arenicola* Savage & Cliff, 1954, and *Phyllorhynchus decurtatus porelli* Powers & Banta, 1974.

Type: Holotype, ANSP 5489, a 350 mm specimen (W.M. Gabb, 1867).

Type locality: "upper part of Lower California" [= Baja California Norte State, Mexico].

Distribution: Southwestern USA (SW Arizona, S California, S Nevada, ext. SW Utah) and NW Mexico (Baja California Norte, Baja California Sur, W Sonora, Angel de la Guarda, San Marcos, Montserrate, San José and Cerralvo Is.), NSL–910 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Arizona).

Sources: Stejneger, 1890b, Atsatt, 1923, R.W. Murphy & Ottley, 1980, 1984, McCleary & McDiarmid, 1993, P.R. Brown, 1997, Grismer, 1999, 2000, Holman, 2000a and S.A. Gardner & Mendelson, III, 2004.

PITUOPHIS Holbrook, 1842b (Colubridae)

Synonyms: *Churchillia* Baird & Girard, 1852a, *Pityophis* Hallowell, 1852 *(nomen emendatum), Pythyophis* – Voigtländer, 1860 *(nomen incorrectum), Petuophis* – J.K. Lord, 1866 *(nomen incorrectum), Curchillia* Marschall, 1873 *(nomen emendatum), Pitiofis* – Dugès, 1887 *(nomen incorrectum), Pituoplus* – Cragin, 1881 *(nomen incorrectum), Pithyophis* A.L. Herrera, 1889 *(nomen emendatum), Pityophisus* A.L. Herrera, 1889 *(nomen emendatum), Pitiophis* – Herrera, 1890 *(nomen incorrectum), Epiglottophis* Cope, 1891a, *Pityopis* – Velasco, 1895 *(nomen incorrectum), Pitnophis* – F.C. Baker & Woodruff, 1897 *(nomen incorrectum), Pityophisus* Herrera, 1899 *(nomen emendatum), Pityphis* – R.H. Johnson, 1902 *(nomen incorrectum), Churchilla* – E.B. Branson, 1904 *(nomen emendatum), Piturophis* – Cyrén, 1934 *(nomen incorrectum), Pituophia* – Stanek, 1962 *(nomen incorrectum),* and *Pituophrys* – Halpin, 1983 *(nomen incorrectum),*

Type species: *Coluber melanoleucus* Daudin, 1803c.

Distribution: Southwestern Canada, USA, Mexico and Guatemala.

Fossil records: Upper Miocene to upper Pleistocene of USA. Fossils unassigned to species include upper Miocene (Clarendonian) of USA (Nebraska), and upper Pliocene (Blancan V) of USA (Idaho).

Sources: Van Denburgh & Slevin, 1919, Stull, 1932a, 1940, H.M. Smith & Taylor, 1945, H.M. Smith & Kennedy, 1951, Himmelstein, 1973b, Dowling et al., 1983, Sweet, 1984, J.L. Knight, 1986, Holman, 1995a, 2000a, Keogh, 1996, Rodrígues-Robles & Jesús-Escobar, 1999, Parmley & Walker, 2003, Burbrink & Lawson, 2007, Collins & Taggart, 2008, Pyron & Burbrink, 2009a, Parmley & Hunter, 2010 and Hirschkorn & Skubowius, 2011.

1. *Pituophis catenifer* (Blainville, 1835). Nouv. Ann. Mus. Hist. Nat. (3) 4(3): 290–291, pl. 26, figs. 2, 2a–b. (*Coluber catenifer*)

Synonyms: *Coluber sayi* Schlegel, 1837, *Pityophis affinis* Hallowell, 1852a, *Churchillia bellona* Baird & Girard, 1852a, *Pituophis annectens* Baird & Girard, 1853, *Pituophis mcclellanii* Baird & Girard, 1953, *Pituophis wilkesii* Baird & Girard, 1853, *Pityophis heermanni* Hallowell, 1853a, *Elaphis reticulatus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Rhinechis mexicanus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Elaphis reticulatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Pituophis mexicanus* A.-M.-C. Duméril, Bibron & Dumeril, 1854a, *Pituophis catenifer deserticola* Stejneger, 1893b, *Pituophis catenifer stejnegeri* Van Denburgh, 1920a, *Pituophis catenifer rutilus* Van Denburgh, 1920a, *Pituophis catenifer coronalis* Klauber, 1946b, *Pituophis catenifer fuliginatus* Klauber, 1946b, and *Pituophis catenifer pumilus* Klauber, 1946c.

Type: Holotype, MNHN 57, a 1080 mm specimen (P-E. Botta, March–Oct. 1827).

Type locality: "Californie" [= Alta Californie or California, W USA]. Restricted to vicinity of San Francisco, California, USA *fide* K.P. Schmidt (1953a: 202), but probably southern California *fide* Klauber (1947: 13).

Distribution: Extreme SW Canada (SE Alberta, S British Columbia, SW Saskatchewan), cen. and W USA (Arizona, California: Santa Cruz, Santa Rosa and San Miguel Is.; Colorado, Idaho, Illinois, W Indiana, Iowa, Kansas, S Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, SW North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, SW Wisconsin, Wyoming) and N Mexico (N Baja California Norte, Chihuahua, Coahuila, N Durango, Nuevo León, San Luis Potosí, Sinaloa, Sonora, Tamaulipas, Veracruz, Zacatecas, San Martin, South Coronado and Tiburon Is.), NSL–2895 m.

Fossil records: Upper Miocene (Hemphillian) of USA (Arizona, Nebraska), middle Pliocene (Blancan II, III) of USA (Kansas, Nebraska, Texas), upper Pliocene (Blancan V) of USA (Kansas, Washington), Pleistocene of USA (Illinois), middle/upper Pleistocene (Irvingtonian II) of USA (Arkansas, Colorado), and upper Pleistocene (Rancholabrean I, II) of USA (Arizona, California, Kansas, Missouri, Nevada, New Mexico, Oklahoma, Texas, Utah).

Sources: Klauber, 1946b, 1947, Zweifel, 1954b, Logier & Toner, 1961, K.L. Williams et al., 1961, Conant, 1965, Bullock & Tanner, 1966, Froom, 1972, W.S. Parker and Brown, 1980, Pérez-Higareda, 1981, R.W. Murphy & Ottley, 1984, Gutzke et al., 1985, Stebbins, 1985, Sweet & Parker, 1990, Conant & Collins, 1991, T. Van Devender & Bradley, 1994, H.A. Brown et al., 1995, Reichling, 1995, Degenhardt et al., 1996, P.R. Brown, 1997, Grismer, 1997, 2002, Harding, 1997, Moriarty, 1998, Fitch, 1999, Rodríguez-Robles & Jesús-Escobar, 2000, Werler & Dixon, 2000, Loeffler, 2001 and Parmley & Peck, 2002.

Remarks: *Pituophis fulginatus* a valid species *fide* McPeak (2000: 78).

2. *Pituophis deppei* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 268. (*Elaphis deppei*)

Synonyms: *Elaphis deppei* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Elaphis pleurostictus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Arizona jani* Cope, 1861a, and *Pituophis deppei pholidostictus* Jan, 1863b.

Type: Holotype, ? RMNH, a 1658 mm specimen (F. Deppe, Dec. 1824–Jan. 1827).

Type locality: "Mexique" [= Mexico]. Restricted to San Juan Teotihuacán, México State, Mexico *fide* H.M. Smith and Taylor (1950a: 334).

Distribution: Mexico (Aguascalientes, S Chihuahua, S Coahuila, Colima, Distrito Federal, Durango, Guanajuato, Hidalgo, Jalisco, México, Michoacán, S Nuevo León, Oaxaca, Puebla, Querétaro, SW San Luis Potosí, Sonora, Tamaulipas, Veracruz, Zacatecas), 1490–2990 m.

Sources: Zweifel, 1954b, Duellman, 1960, Conant, 1965, Pérez-Higareda & Smith, 1991, Kardon, 1995, Casas-Andreu et al., 1996, McCranie & Wilson, 2001b, Lemos-Espinal et al., 2004c, H.M. Smith et al., 2005a–b and Ramírez-Bautista et al., 2011.

Remarks: RMNH 355 (or RMNH 379a) from Mexico, originally catalogued as *Lycodon pholidostictus,* was exchanged from ZMB in 1843.

3. *Pituophis insulanus* Klauber, 1946. Trans. San Diegpo Soc. Nat. Hist. 11(1): 11–14, pl. 1, fig. 1. (*Pituophis catenifer insulanus*)

Type: Holotype, CAS 56353, a 1210 mm female (J.R. Slevin 7 Aug. 1922).

Type locality: "Cedros (Cerros) Island off the west coast of Baja California, Mexico."
Distribution: Extreme NW Mexico (Baja California Norte: Cedros Is.).
Source: Grismer, 2002.
Remarks: A valid species *fide* Grismer, 1994, 2001a, 2002.

4. *Pituophis lineaticollis* (Cope, 1861e). Proc. Acad. Nat. Sci. Philadelphia 13(7): 300–301. (*Arizona lineaticollis*)

Synonyms: *Pituophis deppei brevilineata* K.P. Schmidt & Shannon, 1947, and *Pituophis deppei gibsoni* L.C. Stuart, 1954a.
Type: Neotype, UMMZ 114668, adult female (W.E. Duellman, 29 Feb. 1956), designated by Duellman (1960: 607).
Type locality: "24 kilometers northwest of Ciudad Oaxaca, Oaxaca, Mexico" via neotype selection. Emended to 1676 m elevation *fide* Kluge (1984: 49).
Distribution: Southern Mexico (Chiapas, Colima, Guerrero, Jalisco, México, Michoacán, Morelos, Oaxaca, Puebla) and SW Guatemala (Chimaltenango, Quiché, Sacatépequez), 1000–3000 m.
Sources: H.M. Smith & Taylor, 1945, Duellman, 1960, Casas-Andreu et al., 1996, Benitez-Gálvez, 1997, Ponce-Campos & Ustach, 2004 and Reyes-Velasco et al., 2012.
Remarks: Holotype lost *fide* Duellman (1960: 607).

5. *Pituophis melanoleucus* (Daudin, 1803c). Hist. Nat. Rept. 6: 409–410. (*Coluber melanoleucus*)

P

Synonyms: *Pituophis melanoleucus mugitus* T. Barbour, 1921b, and *Pituophis lodingi* Blanchard, 1924b.
Type: Holotype, not designated (W. Bartram, July 1765–Oct. 1777), lost *fide* Adler (2004: 290).
Type locality: "Floride" [= Florida, USA] and "Pensilvanie, Caroline méridionale et de la Floríde, Amérique septentrionale" [= Pennsylvania, southern Carolina and Florida, USA]. Restricted to Carolina *fide* Barbour (1921b: 117) and to Charleston, South Carolina, USA *fide* K.P. Schmidt (1953a: 201).
Distribution: Southeastern USA (SE New Jersey, S Kentucky, S West Virginia, W Virginia, Tennessee, S North Carolina, South Carolina, ext. E Louisiana, SE Mississippi, Alabama, Georgia, Florida), NSL–600 m.
Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Florida, Georgia, Pennsylvania).
Sources: Moore, 1893, Conant, 1956, Himmelstein, 1973a, Zappalorti et al., 1983, Ernst & Barbour, 1989, Sweet & Parker, 1990, Conant & Collins, 1991, Palmer & Braswell, 1995, Reichling, 1995 and Rodrigues-Robles & Jesús-Escobar, 2000.
Remarks: Original description based on Bartram (1791: 276) [Florida] with mention of Palisot de Beauvois [Pennsylvania, Carolina and Florida].

6. *Pituophis ruthveni* Stull, 1929. Occ. Pap. Mus. Zool., Univ. Michigan (205): 1–2. (*Pituophis melanoleucus ruthveni*)

Type: Holotype, USNM 76278, a 1520 mm male (W.D. Harris, 24 March 1927).
Type locality: "Longleaf, Louisiana" [Rapides Parish, Louisiana, USA].
Distribution: Southern USA (N Louisiana, ext. E Texas), 30–150 m.
Sources: Dundee & Rossman, 1989, Reichling, 1995, Rodrígues-Robles & Jesús-Escobar, 2000, Werler & Dixon, 2000 and Grismer, 2001.

7. *Pituophis vertebralis* (Blainville, 1835). Nouv. Ann. Mus. Hist. Nat. (3) 4(3): 293, pl. 27, figs. 2, 2a–b. (*Coluber vertebralis*)

Synonyms: *Pityophis haematois* Cope, 1860f, *Pituophis catenifer bimaris* Klauber, 1946b, and *Pituophis catenifer insulanus* Klauber, 1946b.
Type: Holotype, MNHN 63, a 530 mm specimen (P.-E. Botta, March–Oct. 1827).
Type locality: "mont Liban, la Californie" [= ? Mount Lebanon, Alta Californie, or California, W USA] (possibly in error). Restricted to Cabo San Lucas, Baja California Sur, Mexico *fide* H.M. Smith and Taylor (1950a: 322).
Distribution: Extreme NW Mexico (Baja California Norte, Baja California Sur, Cedros, Magdalena, San Jose and Santa Margarita Is.), NSL–500 m.
Sources: Klauber, 1946b, Sweet & Parker, 1990, Grismer, 1994, 1997, 2001 and Rodrigues-Robles & Jesús-Escobar, 2000.
Remarks: A valid species *fide* Pyron & Burbrink (2009: 527). A synonym of *P. catenifer fide* Rodrigues-Robles & Jesús-Escobar, 2000.

PLAGIOPHOLIS Boulenger, 1893a (Pseudoxenodontidae)

Synonyms: *Trirhinopholis* Boulenger, 1893a, *Trichinopholis* – Palacky, 1898 *(nomen incorrectum), Trirhinopolis* – M.A. Smith, 1915a *(nomen incorrectum), Plaglopholis* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Trirhinopholis* – Deuve, 1970 *(nomen incorrectum).*
Type species: *Plagiopholis blakewayi* Boulenger, 1893a.
Distribution: Southeastern Asia.
Sources: Bourret, 1936b, M.A. Smith, 1943, Zhao & Adler, 1993, Zhao, 2006 and Zaher et al., 2009.

1. *Plagiopholis blakewayi* Boulenger, 1893a. Cat. Snakes Brit. Mus. 1: 301–302, pl. 19, figs. 3, 3a–b.

Synonym: *Oligodon kunmimgensis* Kou & Wu, 1993.
Type: Holotype, BMNH 1946.1.12.35, a 245 mm male (Blakeway).
Type locality: "Toungyi, Shan States, mountains of Burma, 5000 feet" [= Taunggyi, SW Shan State, E Myanmar, elevation 1525 m].
Distribution: Northern Myanmar (Kachin, Shan), NW Thailand (Chiang Mai) and SW China (Guizhou, Sichuan, S Yunnan), 1300–2200 m.
Sources: Wall, 1921g, 1923i, 1925d, Anonymous, 1973, Tian et al., 1986, Zhao et al., 1986, Tillack et al., 2006 and I. Das, 2010.

2. *Plagiopholis delacouri* Angel, 1929. Bull. Mus. Hist. Nat., Paris (2) 1(1): 78–79.

Types: Syntypes (2), MNHN 1928.65–66, longest syntype 189 mm (J.T. Delacour [Second Delacour-Lowe Mission], 15 Dec. 1925–13 Jan. 1926).
Type locality: "Xieng-Khouang, Haut-Laos" [= Xiang Khoang, Xiangkhouang Prov., N Laos, 19°17'N, 103°25'E].
Distribution: Northern Laos (Xiangkhouang) and ext. N Vietnam (Lao Cai, Vinh Phuc), 600–2500 m.
Sources: Deuve, 1970, Orlov et al., 2003, V.S. Nguyen et al., 2009 and I. Das, 2010.

3. *Plagiopholis nuchalis* (Boulenger, 1893a). Cat. Snakes Brit. Mus. 1: 419–420, pl. 28, fig. 1. (*Trirhinopholis nuchalis*)

Synonym: *Oligodon evansi* Wall, 1913e.
Type: Holotype, BMNH 1946.1.13.94, a 340 mm female (E.W. Oates, 1867–1893).
Type locality: "Toungyi, S. Shan States, mountains of Burma" [= Taunggyi, SW Shan State, cen. Myanmar, 20°47'N, 97°02'E, elevation 1415 m].
Distribution: Southeastern Asia. Southern China (Yunnan) E Myanmar (Kachin, Karen, Sagaing, Shan), NW Thailand (Chiang Mai, Kanchanaburi, Lampang, Lamphun, Loei, Mae Hong Son) and NW Vietnam (Hoa Binh, Lao Cai, Lai Chau, Nghe An), 600–1620 m.
Sources: Wall, 1919d, E.H. Taylor, 1965, Deuve, 1970, Cheke, 1973, B.-Q. Hu et al., 1980, Tian et al., 1986, M.J. Cox, 1991b, M.J. Cox et al., 1998, Orlov et al., 2003, Tillack et al., 2006, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.
Remarks: Possibly occurs in Laos *fide* Deuve (1970: 116). Specimens from high elevations (1400–2500 m) in Vietnam possibly *P. delacouri* or *P. styani fide* N. Orlov *in* Tillack et al. (2006: 185).

4. *Plagiopholis styani* (Boulenger, 1899b). Proc. Zool. Soc. London 67(1): 164–165, pl. 18, figs. 2–2a. (*Trirhinopholis styani*)

Types: Syntypes (2), BMNH 1946.1.14.11–12, a 350 mm male and a juvenile (J.D. La Touche, spring 1896/1898).
Type locality: "Kuatun, a village about 270 miles from Foochow, in the mountains at the North-west of the Province of Fokien, at an altitude of 3000 to 4000 feet or more, China" [= Guadun, in Wuyishan Mtns., ext. N Fujian Prov., SE China, 27°45'N, 117°50'E, elevation 900–1200 m].
Distribution: Southern China (Anhui, Fujian, S Gansu, Guangxi, Hunan, Jiangxi, Sichuan, Zhejiang) and ext. N Vietnam (Lang Son, Lao Cai, Vinh Phuc), 670–1500 m.
Sources: C.H. Pope, 1935, Bourret, 1939d, 1941b, B.-Q. Hu et al., 1980, Tian et al., 1986, B.H. Li, 1987, Inger et al., 1990, Huang et al., 1999, Orlov et al., 2003, Zhao, 2006, V.S. Nguyen et al., 2009, Xiang & Li, 2009 and I. Das, 2010, 2012.

5. *Plagiopholis unipostocularis* Zhao, Jiang & Huang, 1978. Mater. Herpetol. Res., Chengdu 4: 21.

Type: Holotype, CIB 505121, a 300 mm female.
Type locality: "Yunnan Prov., China."
Distribution: Southwestern China (Yunnan). Known only from holotype.
Remarks: Supplemental original description in Zhao et al. (1979: 313, fig. 2).

PLATYCEPS Blyth, 1860 (Colubridae)

P

Synonyms: *Tyria* Bonaparte, 1840 *(nomen praeoccupatum), Dendrophilus* Fitzinger, 1843 *(nomen praeoccupatum), Pseudoperiops* Jan, 1857 *(nomen nudum), Etairejus* Jan, 1857 *(nomen oblitum), Dendrophlius* – Bedriaga, 1882 *in* 1881–1882 *(nomen incorrectum), Acanthocalyx* Cope, 1895c, and *Tylanthera* Cope, 1895c.
Type species: *Coluber ventromaculatus* Gray, 1834 *in* Gray & Hardwicke, 1830–1835.
Distribution: Southwestern Asia and N Africa.
Fossil records: Upper Miocene of Europe.
Sources: Schätti & Wilson, 1986, Schätti & Utiger, 2001 and Nagy et al., 2004.
Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Platyceps* Blyth is designated a *nomen protectum* and *Pseudoperiops* Jan and *Etairejus* Jan are designated *nomina oblita*.

1. *Platyceps afarensis* Schätti & Ineich, 2004. Rev. Suisse Zool. 111(4): 686–687, fig. 1.

Type: Holotype, MNHN 2001.650, a 1035 mm male (CECAP personnel, 1999–2000).

Type locality: "Arta (11°31'N 42°51'E, approx. 705 ma.s.l.), Djibouti."
Distribution: Djibouti, 705 m. Known only from type locality.

2. *Platyceps atayevi* (Tuniyev & Shammakov, 1993). Asiatic Herpetol. Res. 5: 2–5, fig. 1. (*Coluber atayevi*)

Type: Holotype, CSBR 420, a 672 mm male (B.S. Tuniyev, 12 May 1991).
Type locality: "environs of Saivan Village, Saivan-Nokhur Plateau, western Kopet-Dag, Bakharden Region, Turkmenistan."
Distribution: Turkmenistan (Ashgabad, Bakharden), 1200–1300 m.
Remarks: A valid species *fide* Nagy et al., 2004. Previously a synonym of *P. najadum*.

3. *Platyceps bholanathi* (R. Sharma, 1976b). Comp. Physiol. Ecol. 1(3): 106, fig. 1. (*Coluber bholanathi*)

Type: Holotype, ZSI 21337, a 992–1190 mm male (B. Nath, 9 Sept. 1962).
Type locality: "Nagarjana Hill (16°31'N, 79°14'E), Guntur District, Andhra Pradesh (India)."
Distribution: Southern India (Andhra Pradesh 530–610 m).
Sources: Schätti, 1986a, Sanyal et al., 1993 and Seetharamaraju & Srinivasulu, 2013.

4. *Platyceps brevis* (Boulenger, 1895a). Ann. Mus. Civ. Stor. Nat. Genova (2) 15(35): 13–14, pl. 3, figs. 3, 3a–b. (*Zamenis brevis*)

Synonyms: *Zamenis tripraeocularis* F. Werner, 1925, *Zamenis boschisi* Scortecci, 1930a, and *Coronella semiornata fuscorosea* Loveridge, 1935.
Type: Holotype, MSNG 28848, a 200 mm male (V. Bottego, 16 Oct.–12 Dec. 1892).
Type locality: "Ogaden" [= Hararge Prov., E Ethiopia].
Distribution: Northeastern Africa. Somalia (Bari, Bay, Gedo, Mudug, Nugaal, Togdheer, Woqooyi Galbeed), SE Ethiopia (Bale, Gemu Gofa, Hararge, Sidamo), Kenya and NE Tanzania, 200–1400 m.
Sources: Lanza, 1963, 1983a, 1990b, Largen & Rasmussen, 1993, Spawls et al., 2002, Schätti & Charvet, 2003 and Largen & Spawls, 2010.

5. *Platyceps collaris* (F. Müller, 1878b). Verh. Naturf. Ges. Basel 6(4): 599. (*Zamenis dahlii collaris*)

Synonyms: *Zamenis dahlii rubriceps* Venzmer, 1919, and *Coluber rubriceps thracius* Rehák, 1985.
Type: Lectotype, NMBA 1166, adult male, designated by Schätti et al. (2001: 15).
Type locality: "Beirut" [= Beirut, Beirut Distr., Lebanon] via lectotype selection.
Distribution: Middle East. Southeastern Bulgaria (Burgas), Turkey (Marden), Syria, Lebanon (Beirut, Beqaa, El Jnoub, Mont-Liban, Nabatiye), Israel (Central, Gaza Strip, Golan Heights, Haifa, Jerusalem, Northern, N Southern, Tel Aviv, West Bank) and W Jordan (Ajloun, Amman, Balqa, Irbid, Jarash, Jawf, Karak, Maan, Tafilah), NSL–1900 m.
Sources: Baran, 1976a, Hraoui-Bloquet, 1981, Obst, 1981, Rehák, 1985, Ilani, 1986, Bousklia & Amitai, 2001, Disi et al., 1988, 2001, Schätti, 1993a, El-Oran, 1994, Schätti et al., 2001, Hraoui-Bloquet et al., 2002, Amr & Disi, 2011, Bar & Haimovitch, 2011 and Stojanov et al., 2011.
Remarks: *Platyceps rubriceps* a valid species *fide* Nagy et al., 2004 and Amr, 2009a.

6. *Platyceps elegantissimus* (A.C.L.G. Günther, 1878). Proc. Zool. Soc. London 46(1): 977–978, pl. 62. (*Zamenis elegantissimus*)

Type: Holotype, BMNH 1946.1.15.7, a 660 mm female (R.F. Burton, 1851–1853).
Type locality: "mountains east of El Muwayláh, Midian" [= mtns. E of Almuwaylih (27°41'N, 35°29'E), Tabuk Prov., NW Saudi Arabia].
Distribution: Middle East and Arabia. Southern Israel (E Southern), SW Jordan (Aqaba, Maan, Madaba, Tafilah) and N Saudi Arabia (Ha'il, Jazan, Madinah, Makkah, Qasim, Riyadh, Tabuk), NSL–1650 m.
Sources: Gasperetti, 1976b, 1988, Y. Werner & Sivan, 1991, Schätti & Gasperetti, 1994, Bouskila & Amitai, 2001, Disi et al., 2001, Baker et al., 2004, Egan, 2007, Amr & Disi, 2011 and Bar & Haimovitch, 2011.
Remarks: Possibly occurs in Sinai *fide* Marx, 1968.

7. *Platyceps florulentus* (I. Geoffroy-Saint-Hilaire, 1827 *in* Savigny, 1809–1829). Descr. Rept. Égypte 1(1): 146, 151, pl. 8, figs. 2–2′. (*Coluber florulentus*)

Synonyms: *Coluber ruber* Gmelin, 1789 (*nomen oblitum*), *Coluber keniensis* H.W. Parker, 1932c, and *Coluber florulentus perreti* Schätti, 1988b.
Type: Lectotype, a 760 mm specimen illustrated in pl. 8, fig. 2 (Expéd. Armée Franç., 1798–1801), lost *fide* Kramer & Schnurrenberger (1963: 486).
Type locality: "Égypte" [= Egypt].
Distribution: Northeastern Africa. Northern Cameroon (Extreme-Nord, Nord), NE Nigeria (Borno, Plateau, Taraba), E Egypt (Alexandria, Assiut, Aswan, Beheira, Beni Suef, Cairo, Damietta, Daqahlia, El-Bahr El-Ahmar, Faiyum, Gharbia, Giza, Ismailia, Matrouh, Menufia, Minya, E New Valley, North Sinai, Qalyubia, Qena, Sharkeya, Sohag, Suez), E Sudan (El-Bahr El-Ahmar, Al Khartum, Al Nil Al Abyad, An Nil Al Azraq, Ash Shamaliyah, Nahr An Nil, Sennar, Shamal Kurdufan), Eritrea (Anseba, Gash-Barka, Northern Red Sea), Ethiopia (Arussi, Gojjam, Gondar, Hararge, Kefa, Shoa), N Somalia (Bari, Woqooyi Galbeed), W Kenya (cen. Eastern) and N Uganda (W Northern), 160–2400 m.

P

Sources: Pitman, 1974, Pozuelo, 1974, Lanza, 1983a, 1990b, Schätti, 1988b, Largen & Rasmussen, 1993, Bons & Geniez, 1996, Broadley & Schatti, 1997, Schätti, 2001, Spawls et al., 2002, Chirio & LeBreton, 2007 and Largen & Spawls, 2010.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Coluber florulentus* Geoffroy-Saint-Hilaire is designated a *nomen protectum* and *Coluber ruber* Gmelin a *nomen oblitum*.

8. *Platyceps gracilis* (A.C.L.G. Günther, 1862b). Ann. Mag. Nat. Hist. (3) 9(49): 125–126. (*Zamenis gracilis*)

Synonym: *Coluber cinereus* Linnaeus, 1758.

Types: Syntypes (6), BMNH 1946.1.15.1–4, two females and two juveniles (W. Masters), BMNH 1946.1.13.82, a female (Sykes), and BMNH 1946.1.13.85 (formerly FPM), a female.

Type locality: "western India (Kurrachee)," "India" and "unknown," respectively.

Distribution: Central India (Madhya Pradesh, Maharashtra).

Sources: M.A. Smith, 1943, Schätti, 1986b, Whitaker & Captain, 2004 and N. Khaire, 2006.

Remarks: Five syntypes in BMNH *fide* A.C.L.G. Günther (1862b: 125) but six *fide* BMNH catalogue (M. Lang, *in litt*.).

9. *Platyceps insulanus* (Mertens, 1965a). Senck. Biol. 46(1): 5–9, figs. 1–2. (*Coluber insulanus*)

Type: Holotype, SMF 60027, a 910+ mm male (W. Kost, 26 Nov. 1964).

Type locality: "Insel Sarso, Farsan-Archipel, Rotes Meer, SW-Arabien" [= Saso Is., Farsan Arch., Jazan Govern., SW Saudi Aribia, Red Sea, 16°51'N, 41°36'E].

Distribution: Southwestern Saudi Arabia, (Sarso Is.), NSL–30 m.

Source: Largen & Rasmussen, 1993.

10. *Platyceps karelinii* (Brandt, 1838). Bull. Acad. Imp. Sci. St. Pétersbourg 3(16): 243. (*Coluber* [*Tyria*] *karelinii*)

Synonyms: *Coluber chesneii* W.C.L. Martin, 1838, *Choristodon brachycephalus* Severzow, 1873, and *Zamenis rogersi* J. Anderson, 1893.

Types: Syntypes (6), ZISP 1695–1700 (formerly AIS 1695–1700), longest syntype 807 mm (G.S. Karelin, 1828–1836).

Type locality: "sur la côte orientale de la mer Caspienne, dans la Turcomanie et dans le nord de la Perse, notamment dans les environs d'Astrabad" [= eastern shore of Caspian Sea, within Turkey and northern Iran, notably the vicinity of Gorgan, Golestan Prov., N Iran]. Restricted to eastern shore of Caspian Sea *fide* Nikolsky (1916: 98).

Distribution: Northeastern Africa, Middle East and SW Asia. Northeastern Libya (Al Fatih, Butnan), N Egypt (Cairo, Matrouh, North Sinai, South Sinai, Suez), S Israel (Southern, West Bank), Jordan (Ajloun, Amman, Aqaba, Balqa, Irbid, Karak, Maan, Madaba, Mafraq, Tafilah, Zarqa), Lebanon, Syria (Damascus, Daría, Dayr az Zawr, Halab, Homs), NE Saudi Arabia (Eastern, Tarut Is.), Kuwait, Bahrain, United Arab Emirates (Sir Bani Yas Is.), SW Kazakhstan, Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan, E Iraq (Al Anbar, Baghdad, Basrah, Dhi Qar, Diyala, Maysan, Ninawa, Salah Al-Din, Sulaymaniyah, Wasit), Iran (Bushehr, Central, Fars, Golestan, Kermanshah, Khorasan Razavi, Khuzestan, Markazi, Semnan, Sistan va Baluchestan, South Khorasan, Yazd), Afghanistan (Balkh, Helmand, Herat, Kandahar, Nimruz) and SW Pakistan (N Balochistan), NSL–2200 m.

Sources: Strauch, 1873, Minton, 1966, Mertens, 1969a, Bannikov et al., 1977, Latifi, 1991, Gasperetti, 1988, Szczerbak et al., 1993, Schleich et al., 1996, M.S. Khan, 1997, 2002, Disi et al., 2001, Baha El Din, 2006, Amr & Disi, 2011, Bar & Haimovitch, 2011 and Schätti et al., 2012.

Remarks: *Zamenis rogersi* J. Anderson a synonym *fide* Schätti et al., 2012.

11. *Platyceps largeni* (Schätti, 2001a). Russ. J. Herp. 8(2): 142–144, fig. 2. (*Coluber largeni*)

Type: Holotype, BMNH 1973.3211, ca. 600 mm female (M.J. Largen, 7 Jan. 1970).

Type locality: "Sarad Island, Dahlak, Ethiopia" [= Sarad Is., Dahlak Arch., Northern Red Sea Prov., E Eritrea, 15°50'N, 39°55'E].

Distribution: Eastern Eritrea (Southern Red Sea: Andeber, Nocra and Sarad Is.).

Source: Largen & Spawls, 2010.

Remarks: Possibly a synonym of *P. taylori*.

12. *Platyceps manseri* (Leviton, 1986). Fauna Saudi Arabia 8: 438, figs. 1a–d. (*Coluber manseri*)

Type: Holotype, CAS 140514, a 375 mm female (P. Manser, July–Sept. 1975).

Type locality: "vicinity of Hakimah (17°01'N 42°50'E) (elev. approx. 80 m), southern Tihama, Saudi Arabia" [= Hakimat Abu Arish, Jazan Prov., SW Saudia Arabia].

Distribution: Southwestern Saudi Arabia (Jazan), 80–200 m.

Sources: Gasperetti, 1988 and Egan, 2007.

Remarks: Previously a subspecies or synonym of *P. varaiabliis*.

13. *Platyceps messanai* (Schätti & Lanza, 1989). Boll. Mus. Reg. Sci. Nat. Torino 7(2): 414–418, figs. 1–6. (*Coluber messanai*)

Type: Holotype, MZUF 5468, a 542 mm male (E. Granchi, B. Lanza & A. Simonetta, 9 Aug. 1969).

P

Type locality: "Wadi Run, Central Nogal Valley, Somalia (about 8°48'20" N-48°53'30" E)."
Distribution: Northeastern Somalia (Nugaal), 500 m. Known only from type locality.
Source: Schätti & Charvet, 2003.

14. *Platyceps mintonorum* (Mertens, 1969a). Stutt. Beitr. Naturk. (197): 56–60, fig. 17. (*Coluber karelini mintonorum*)

Type: Holotype, SMF 62942, a 1550 mm male (M.G. Konieczny, 12 April 1962).
Type locality: "Zangi-Nawar, 27 km südwestlich Nushki, Distr. Chagai, West-Pakistan" [= Balochistan, SW Pakistan, 29°26'N, 65°47'E, 900 m].
Distribution: Southwestern Asia. Southeastern Iran, S Afghanistan (Helmand, Kandahar) and SW Pakistan (Balochistan), 700–1060 m.
Source: Schätti & Stutz, 2005 and Schätti et al., 2012.

15. *Platyceps najadum* (Eichwald, 1831). Zool. Spec. Rossiae 3: 174. (*Tyria najadum*)

Synonyms: *Tyria dahlii* Fitzinger, 1826a (*nomen nudum*), *Tyria ocellata* Eichwald, 1831, *Coluber olivaceus* Dwigubsky, 1832, *Coluber fascicularis* Ménétriés, 1832, *Coluber dahlii* Schinz, 1833, *Zamenis dahlii immaculata* Schreiber, 1912, *Coluber najadum kalymnensis* B. Schneider, 1980, and *Coluber najadum albitemporalis* Darevsky & Orlov, 1994.
Type: Holotype, not designated, a 760 mm specimen (K.E.I. Eichwald, 1825–1826), location unknown.
Type locality: "urbis Bacuáe, ad mare caspium" [= Baku, on the Caspian Sea, E Azerbaijan, 40°25'N, 49°52'E, elevation 20 m].
Distribution: Southeastern Europe amd SW Asia. Croatia (Krk and Pag Is.), S Bosnia-Herzegovina, Montenegro, S Bulgaria, (Blagoevgrad, Haskovo, Kardzhali, Pazardzhik, Plovdiv, Sliven, Yambol), Albania, Macedonia, Greece (Aitolia and Akarnania, Arkadhia, Akhaia, Argolis, Arta, Attica, Drama, Evritania, Evros, Evvoia, Florina, Fokis, Fthiotis, Grevena, Ilia, Imathia, Ioannina, Kardhitsa, Kastoria, Kefallinia, Kerkira, Khalkidhiki, Kilkis, Korinthia, Kozani, Lakonia, Larisa, Lesvos, Levkas, Magnisia, Messinia, Pella, Pieria, Preveza, Rodhopi, Serrai, Thesprotia, Thessaloniki, Trikala, Voiotia, Xanthi, Zakinthos, Chios, Corfu, Kavala, Lesbos, Limnos, Rhodos, Samos, Samothraki and Thasos Is.), Cyprus, Turkey, Syria (Damascus), Lebanon (Liban-Nord, Mont-Liban), Armenia, SW Russia (Dagestan), Georgia, Armenia, Azerbaijan, Iraq and N Iran, NSL–2200 m.
Sources: F. Werner, 1939, Baran, 1976a, Bruno, 1984, Latifi, 1991, Darevsky & Szczerbak, 1993, Schätti, 1993a, 2004, Tuniyev & Shammakov, 1993, Darvevsky and Orlov, 1994, Szczerbak, 1994, Tokar et al., 1995, Tuniyev et al., 1999, Petkovski et al., 2000, Hraoui-Bloquet et al., 2002, Valakos et al., 2004, Schätti et al., 2005, Trapp, 2007, Valakos et al., 2008, Baier et al., 2009, Tuniyev et al., 2009, Stojanov et al., 2011, Jablonski et al., 2012 and Paphiles & Valakos, 2012.
Remarks: Presence on Cyprus needs confirmation *fide* Baier et al. (2009: 261–262).

P

16. †*Platyceps planicarinatus* (Bachmayer & Szyndlar, 1985). Ann. Naturhist. Mus. Wien 87A: 84–86, figs. 1.17–1.21, pl. 1, figs. 4–6. (†*Nanus planicarinatus*)

Type: Holotype, NMWGP 1984/97, one trunk vertebra.
Type locality: "Kohfidisch fissure deposits of Burgenland, Austria; Late Pannonian (= Pontian, MN 11) in the Paratethyian terms or Early Pliocene."
Distribution: Upper Miocene (Turolian, MN 11–13: 4.9–8.7 mya) of Austria and Italy.
Source: Bachmayer & Szyndlar, 1987, Delfino, 2002 and Szyndlar, 2012.
Remarks: Possibly related to *P. najadum fide* Bachmayer & Szyndlar (1987: 30).

17. *Platyceps rhodorachis* (Jan *in* Filippi, 1865). Viaggio Persia 1: 356. (*Zamenis rhodorachis*)

Synonyms: ? *Natrix scheuchzeri* Merrem, 1820 (*nomen dubium*), ? *Coluber schneideri* Merrem, 1820 (*nomen dubium*), *Etairejus rhodorachis* Jan, 1857 (*nomen nudum*), *Zamenis ladacensis* J. Anderson, 1871b, *Gonyosoma dorsale* J. Anderson, 1872, *Zamenis rhodorhachis* Boulenger, 1891g *(nomen emendatum), Zamenis ladacensis subnigra* Boettger, 1893b, *Zamenis rhodorhachis tessellata* F. Werner, 1909c, *Coluber karelini mintonorum* Mertens, 1969a, and *Coluber rhodorachis kashmirensis* M.S. Khan & Khan, 2000.
Type: Lectotype, MSNG CE 30312 (formerly MSNG 3320), a 585 mm female (Ratchy via G. Jan, 1864), designated by Kramer & Schnurrenberger (1963: 501).
Type locality: "Umgebung von Schiras Zentral-persien" [= vicinity of Shiraz (29°37'N, 52°32'E, elevation 1545 m), Fars Prov., SW Iran] via lectotype selection.
Distribution: Northeastern Africa, Arabia and SW Asia. Eritrea (Northern Red Sea, Southern Red Sea, Difnein Is.), E Ethiopia (Hararge), Djibouti (Maskali and Musha Is.), N Somalia (Awdal, Mudug, Nugaal, Sanaag, Sool, Togdheer, Woqooyi Galbeed), Saudi Arabia (Bahah, Asir, Riyadh, Ha'il, Jazan, Madinah, Makkah, Najran, Qasim, Riyadh, Tabuk), United Arab Emirates (Fujairah, Ras al Khaimah, Sharjah), Oman (Al Batinah, Al Dakhiliyah, Al Wusta, Ash Sharqiyah, Dhofar, Musandam, Muscat, Masirah Is.), Yemen (Abyan, Ad Dali', Aden, Al Bayda, Al Hudaydah, Al Mahrah, Amanat Al Asimah, Hadhramaut, Sana'a, Ta'izz), N Israel (Haifa, Northern, West Bank), Jordan (Amman, Aqaba, Balqa, Irbid, Karak, Maan, Mafraq, Tafilah, Zarqa), Syria, N Iraq (Sulaymaniyah), Iran (Central, Esfahan, Fars, Khuzestan, Kordestan, Razavi Khorasan, Saheli, Semnan, Sistan va Baluchestan), W Tadzhikistan, Kazakhstan, S Turkmenistan & S Uzbekistan, Afghanistan, Pakistan (Balochistan,

F.A.T.A., Gilgit-Baltistan, Jammu & Kashmir, Khyber Pakhtunkhwa, Punjab, Sindh), and N India, NSL–2800 m.

Sources: J. Anderson, 1898, Kramer & Schnurrenberger, 1963, Minton, 1966, Mertens, 1969a, Leviton & Anderson, 1970a, Lanza, 1983a, 1990b, Bannikov et al., 1977, Latifi, 1991, Gasperetti, 1988, Schätti, 1989, 1993a, 2006a–b, Leviton et al., 1992, Largen & Rasmussen, 1993, Ataev et al., 1994, Schätti & Gasperetti, 1994, Szczerbak, 1994, Schleich et al., 1996, M.S. Khan & Khan, 2000, Bouskila & Amitai, 2001, Disi et al., 2001, Baker et al., 2004, Egan, 2007, Largen & Spawls, 2010, Afrasiab & Mohamad, 2001, Amr & Disi, 2011, Bar & Haimovitch, 2011, Grossmann et al., 2012 and Masroor, 2012.

Remarks: This taxon is a complex of species yet to be resolved *fide* Schätti (2006: 77).

18. *Platyceps saharicus* Schätti & McCarthy, 2004. Rev. Suisse Zool. 111(4): 693–700, fig. 1.

Type: Holotype, FMNH 72108, a 1270 mm female (H. Hoogstraal, 14 May 1953).

Type locality: "Egypt: St. Catherine's Monastery area, Wadi el Sheikh" [= Wadi el Sheikh, vicinity of St. Catherine's Monastery (28°33'N, 33°59'E, elevation 1585 m), South Sinai Govern., NE Egypt].

Distribution: North Africa and Middle East. Southeastern Algeria (Illizi, Tamanrasset), SE Libya (Al Kufrah), N Chad (Borkou-Ennedi-Tibesti), NE Sudan, E Egypt (Alexandria, El-Bahr El-Ahmar, ext. SW New Valley, North Sinai, Sharkeya, South Sinai, Suez, Shadwan Is.), Israel (Jerusalem, Southern, West Bank), W Jordan (Irbid, Ma'an) and W Saudi Arabia (Jazan, Tabuk), 550–1700 m.

Sources: Geniez & Gaulthier, 2008 and Bar & Haimovitch, 2011.

Remarks: Occurs south to Somalia and east to Afghanistan *fide* Baha El Din (2006: 258).

19. *Platyceps schmidtleri* (Schätti & McCarthy, 2001). Herpetozoa 14(1–2): 82–85, figs. 1–2. (*Coluber schmidtleri*)

Synonym: *Zamenis ventrimaculatus semifasciatus* Werner, 1917 *(nomen praeoccupatum).*

Type: Holotype, FMNH 170927, a 655 mm male (E.D. Womochel, 14 Oct. 1968).

Type locality: "'Fars, 5 mi. N. E. Yasoodi' (Yasuj, Boyerahmad-va-Kogiluye, 30º40'N, 51º36'E)" [= 3 km NE Yasuj, Fars Prov., Iran].

Distribution: Southwestern Iran (Zagros Mtns. of Fars, Khuzestan), 1500–2000 m.

Remarks: Related to *P. collaris* and *P. najadum*.

20. *Platyceps scortecci* (Lanza, 1963). Atti Soc. Ital. Sci. Nat. Mus. Civ. Stor. Nat. Milano 102(4): 379–381, figs. 1a–1d. (*Coluber scortecci*)

Type: Holotype, MSNM 2146, a 293 mm female (G. Scortecci, 1931).

Type locality: "Dusa Mareb (Somalia centrale)" [= Dhuusamareeb, Galguduud Region, cen. Somalia, 5°32N, 46º23'E, elevation 250 m].

Distribution: Central Somalia (Nugaal, Galguduud), 250 m.

Source: Schätti, 1986b.

21. *Platyceps sinai* (K.P. Schmidt & Marx, 1956). Fieldiana: Zool. 39(4): 30–32, fig. 4. (*Lytorhynchus sinai*)

Type: Holotype, USNM 134989, a female (R.E. Kuntz).

Type locality: "Wadi Feiran, Sinai Peninsula" [Egypt].

Distribution: Middle East and N Africa. Southeastern Israel (Southern, West Bank), W Jordan (Aqaba, Maan, Madaba, Tafilah) and NE Egypt (South Sinai), 1500–1650 m.

Sources: Marx, 1968, Leviton, 1986, Sindaco et al., 1995, Y.L. Werner, 1995, Bouskila & Amitai, 2001, Disi et al., 2001, Baker et al., 2004, Amr & Disi, 2011 and Bar & Haimovitch, 2011.

22. *Platyceps smithi* (Boulenger, 1895h). Proc. Zool. Soc. London 63(3): 536–537, pl. 30, figs. 2–2a. (*Zamenis smithi*)

Synonym: *Coronella semiornata fuscorosea* Loveridge, 1935.

Type: Lectotype, BMNH 1946.1.13.79, a male (A. Donaldson-Smith, 23 Aug. 1894), designated by Schätti (1988b: 113), longest syntype 560 mm.

Type locality: "Shebeli" [= Webi Shebeli, Dacata River, SE Hamarro Hadad, Hararge Prov., E Ethiopia, 7°20'N, 42°17'E, elevation 600 m] via lectotype selection.

Distribution: Northeastern Africa. Southern Somalia (Bay, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Shabeellaha Dhexe), S Ethiopia (Bale, Gemu Gofa, Hararge, Sidamo) and Kenya (Coast, Eastern, ext. N North-Eastern, N Rift Valley), 100–1300 m.

Sources: Lanza, 1983a, 1990b, Largen & Rasmussen, 1993 and Spawls et al., 2002.

Remarks: Possibly a synonym of *P. brevis.*

23. *Platyceps somalicus* (Boulenger, 1896g). Ann. Mus. Civ. Stor. Nat. Genova (2) 17(37): 11. (*Zamenis somalicus*)

Type: Holotype, MSNG 29059, a 440 mm female (E. Ruspoli, 1893).

Type locality: "Audo Mts., between Webi Shebeli and Web, Gallaland" [= Audo Mtns., Bale Prov., SE Ethiopia, ca. 6°30'N, 41°30'E, elevation 1500 m].

Distribution: Southern Ethiopia (Bale), 1500 m.

Sources: Parker, 1949, Schätti, 1986b, Largen & Rasmussen, 1993, Schätti & Charvet, 2003 and Largen & Spawls, 2010.

24. *Platyceps taylori* (H.W. Parker, 1949). Zool. Verh. (6): 40–44, fig. 7. (*Coluber taylori*)

Type: Holotype, BMNH 1949.2.1.56, a 500 mm female (native, 4 March 1933).

Type locality: "north western part of the mountainous OGO, Borama district, British Somaliland (42° 45' E. X 10° 20' N.), 4000 ft." [= Ogo Mtns., N Hararge Prov., E Ethiopia, 10°20'N, 42°45'E, elevation 1220 m].

Distribution: Northeast Africa. Eritrea (Northern Red Sea, Southern Red Sea), E Ethiopia (Hararge, Shoa), Djibouti and N Somalia (Bari, Woqooyi Galbeed), NSL–1220 m..

Sources: Lanza, 1972, 1983a, 1990b, Schatti, 1988a, 2001, 2007, Largen & Rasmussen, 1993 and Largen & Spawls, 2010.

25. *Platyceps thomasi* (H.W. Parker, 1931a). Ann. Mag. Nat. Hist. (10) 8(47): 516–517. (*Coluber thomasi*)

Type: Holotype, BMNH 1946.1.14.73 (formerly BMNH 1931.7.16.68), a 213–217 mm female (B. Thomas, 7 Nov. 1930).

Type locality: "Ain, 1500 ft., between Salalah and Rub'al Khali, S. E. Arabia" [= Ain, between Salalah (17°00'N, 54°06'E) and Rub-al-Khail (18°40'N, 53°12'E), W Dhofar Region, W Oman, ca. 17°43'N, 53°34'E, elevation 450 m].

Distribution: Western Oman (Dhofar) and E Yemen, NSL–460 m.

Sources: Arnold, 1980b, Leviton, 1986, Schätti, 1986b, Gasperetti, 1988, Egan, 2007 and Smid, 2010.

Remarks: Sympatric with *P. variabilis* in SE Oman *fide* Smid (2010: 330).

26. *Platyceps variabilis* (Boulenger, 1905e). Ann. Mag. Nat. Hist. (7) 16(92): 178–179. (*Zamenis variabilis*)

Type: Lectotype, BMNH 1946.1.14.70 (formerly BMNH 1903.1.28.12), a female, (G.W. Bury, 1900–1903), designated by Gasperetti (1988: 409), longest syntype 380 mm.

Type locality: "Schaf Ravine, South Arabia" [= Yemen] via lectotype selection.

Distribution: Western Oman (Dhofar) and SW Yemen (Ad Dali', Al Hudaydah), (25) 355–1525 m.

Sources: Leviton, 1986, Gasperetti, 1988, Schätti, 1989, Schätti & Gasperetti, 1994, Egan, 2007 and Smid, 2010.

Remarks: Boulenger (1905e:179) reported 10 syntypes but listed 13 specimens.

27. *Platyceps ventromaculatus* (Gray, 1834 *in* Gray & Hardwicke, 1830–1835). Illust. Indian Zool. 2(13–14): pl. 80, fig. 1. (*Coluber ventromaculatus*)

Synonyms: *Pseudoperiops persicus* Jan, 1857 *(nomen nudum), Zamenis ventrimaculatus* A.C.L.G. Günther, 1858 *(nomen emendatum), Platyceps semifasciatus* Blyth, 1860, *Platyceps fasciatus* Stoliczka, 1870c *(nomen emendatum), Platyceps subfasciatus* Loveridge, 1957 *(nomen emendatum),* Coluber *ventromaculatus bengalensis* M.S. Khan & Khan, 2000, *Coluber ventromaculatus indusai* M.S. Khan & Khan, 2000, and *Coluber ventromaculatus khanorum* Barabanov, 2002 (*nomen substitutum*).

Type: Holotype, BMNH 1946.1.11.42, a gravid female (T. Hardwicke, 1756–1823).

Type locality: Unknown. Designated as Bengal *fide* K.P. Schmidt (1939b: 74).

Distribution: Southern Asia. Pakistan (ext. SE Balochistan, Jammu & Kashmir, Khyber Pakhtunkhwa, Punjab, Sindh) and NW India (Delhi, Gujarat, Maharashtra, Punjab, Rajasthan, Uttar Pradesh), NSL–500 (1000) m.

Sources: Wall, 1914b, Minton, 1966, Mertens, 1969a, Gasperetti, 1988, Leviton et al., 1992, Disi, 1993, M.S. Khan, 1997, 2002, 2006, M.S. Khan & Khan, 2000, Schätti, 2006b, Schätti & Schmitz, 2006, Egan, 2007, Baig et al., 2008, Soorae et al., 2009, Vyas, 2011 and Masroor, 2012.

Remarks: Records from Himachal Pradesh and Uttaranchal, India require confirmation *fide* Schätti & Schmitz (2006: 757).

PLATYPLECTRURUS A.C.L.G. Günther, 1868 (Uropeltidae)

Synonyms: *Platyplecturus* – Phisalix, 1917b *(nomen incorrectum), Wallia* F. Werner, 1925, *Platyplactrurus* – W.W. Tanner & Avery, 1982 *(nomen incorrectum),* and *Platyplecturus* – Skoczylas, 1978 *(nomen incorrectum).*

Type species: *Plectrurus trilineatus* Beddome, 1867.

Distribution: Southern India and Sri Lanka.

Sources: Beddome, 1886, M.A. Smith, 1943, Gans, 1966, Murthy, 1981c, 1982b, Rajendran, 1985, McDiarmid et al., 1999 and Aengals, 2009.

1. *Platyplectrurus madurensis* Beddome, 1877a. Proc. Zool. Soc. London 45(1): 167.

Synonyms: *Wallia inexpectata* F. Werner, 1925, *Platyplectrurus ruhunae* Deraniyagala, 1954, and *Platyplectrurus madurensis ruhanae* Gans, 1966 *(nomen emendatum).*

Types: Syntypes (8), BMNH 1883.1.12.56–58, BMNH 1946.1.15.78–80, and MNHN 1895.115a–b, four longest syntypes 356 mm, 319 mm, 280 mm and 270 mm.

Type locality: "About Kodiukarnal on the Pulney Mountains (Madura district), Southern India, 600 feet

P

elevation" [= Kodaikanal, S Tamil Nadu, ext. S India, 10°14'N, 77°29'E, elevation 2100 m].

Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu) and S Sri Lanka (Southern), 1200–2200 m.

Sources: Wall, 1923a, M.A. Smith, 1928b, Deraniyagala, 1955, Murthy, 1974, 1983b and A. Silva, 1990.

2. *Platyplectrurus trilineatus* (Beddome, 1867). Madras Quart. J. Med. Sci. 11: 14, pl. 1, fig. 1. (*Plectrurus trilineatus*)

Synonym: *Platyplectrurus bilineatus* Beddome, 1886.

Types: Syntypes (3), BMNH 1946.1.15.72 (formerly BMNH 1866.12.15.10), MNHN 1895.112, and 1895.113.

Type locality: "Anamallay forests, Madras Presidency; elevation 4,000 feet" [=W Tamil Nadu State, S India]. Emended to Anamallay forests above Ponachi [= Pollachi, 10°40'N, 77°01'E] at an elevation of 4000 feet *fide* Beddome (1886: 32).

Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 1300–1860 m.

Sources: Murthy, 1983b and Ganesh, 2011.

†*PLATYSPONDYLIA* Rage, 1974 (Tropidophiidae)

Type species: †*Platyspondylia lepta* Rage, 1974.

Distribution: Upper Eocene of France and middle-upper Oligocene of France and Germany.

Sources: Underwood, 1976, Rage, 1984b, 2011, McDowell, 1987, Holman & Harrison, 1998b, Szyndlar & Rage, 2003 and Szyndlar et al., 2008.

1. †*Platyspondylia germanica* Szyndlar & Rage, 2003. Booidea Oligocene Miocene Europe: 81–83, figs. 39a–e.

Type: Holotype, SMNS 87146-2, one trunk vertebra.

Type locality: "Herlingen 11 (Germany), late Oligocene (MP 28/30)."

Distribution: Upper Oligocene (Arvernian, MP 28–30: 23.0–28.4 mya) of Germany.

2. †*Platyspondylia lepta* Rage, 1974. Palaeovertebrata 6(3–4): 288–293, fig. 4a.

Type: Holotype, MNHN PFR 6350, one middle trunk vertebra.

Type locality: "Phosphorites du Quercy, Pech-du-Fraysse, Oligocène Supérieur" [= Pech-du-Fraysse, Tarn-et-Garrone Dept., SW France; upper Oligocene, Arvernian].

Distribution: Upper Oligocene (Arvernian, MP 28–30: 23.0–28.4 mya) of France.

3. †*Platyspondylia sudrei* Rage, 1988c. Palaeontographica 205A: 22–24, figs. 20–21.

Type: Holotype, USTL BRT 1345, one middle trunk vertebra (Pernotet).

Type locality: "Le Bretou, Phosphorites du Quercy, France; niveau-repère du Bretou, Headonien inférieur (= Marinésien; Bartonien `anté-Ludien'), Eocène supérieur" [= Bretou, Tarn-et-Garonne Dept., SW France; upper Eocene, early Headonian].

Distribution: Upper Eocene (Priabonian, MP 17–18: 33.9–37.2 mya) of France.

Source: Rage, 2006.

PLECTRURUS A.-M.-C. Duméril & Duméril, 1851 (Uropeltidae)

Synonyms: *Maudia* Gray, 1858c, *Plecturus* – W.C.H. Peters, 1861h *(nomen incorrectum), Mandia* – Hoffmann, 1890 *(nomen incorrectum),* and *Pelctrurus* – Mahendra, 1984 *(nomen incorrectum).*

Type species: *Plectrurus perrotetii* A.-M.-C. Duméril & Bibron *in* A.-M.-C. Duméril & Duméril, 1851.

Distribution: Southern India.

Sources: Jan, 1865b, Beddome, 1886, M.A. Smith, 1943, Gans, 1966, Murthy, 1981c, 1982b, Rajendran, 1985, McDiarmid et al., 1999 and Aengals, 2009.

1. *Plectrurus aureus* Beddome, 1880. Proc. Zool. Soc. London 48(2): 182.

Types: Syntypes (2), BMNH 1946.1.1.54 (formerly BMNH 1883.1.12.53) and MNHN 1895.107 (R.H. Beddome, 1857–1880).

Type locality: "Chambra mountain in Wynad, near Kalpatty, Malabar, at 4,500 and 6000 feet elevation" [= Chembra Peak, Wyanad hills of Western Ghats, N Kerala State, SW India, ca. 11°30'N, 76°05'E, elevation 1370–1830 m].

Distribution: Southwestern India (Western Ghats of W Karnataka), 1370–2050 m.

2. *Plectrurus guentheri* Beddome, 1863a. Madras Quart. J. Med. Sci. 6: 48, pl. 2, fig. 10. (*nomen corrigendum*)

Synonyms: *Plectrurus güntheri* Beddome, 1863a *(nomen incorrigendum)* and *Plectrurus guentheri* – Beddome, 1863b *(nomen corrigendum).*

Type: Holotype, BMNH 1946.1.16.32 (formerly BMNH 1883.1.12.54), a 330–356 mm specimen (R.H. Beddome, 1857–1863).

Type locality: "Walaghat, in the Wynaud, on the Western slopes of the Neilgherries, Madras Presidency" [= Walaghat, Nilgiri Hills, cen. Westrn Ghats, Kerala State, SW India]. Emended ro Walahghat, on the

western slopes of the Nilgherries (3500 feet elevation) *fide* Beddome (1863b: 228).

Distribution: Southwestern India (Western Ghats of E Kerala, SW Tamil Nadu), 1065–2250 m.

Source: Murthy, 1983b.

Remarks: Supplemental original description in Beddome (1863b: 228, pl. 27).

3. *Plectrurus perrotetii* A.-M.-C. Duméril & Bibron *in* A.-M.-C. Duméril & Duméril, 1851. Cat. Méth. Rept. Mus. Paris: 224.

Synonyms: *Plectrurus perrotetti* Gray, 1858c *(nomen emendatum), Plectrurus brevis* A.C.L.G. Günther, 1875 *(nomen nudum), Plectrurus perrotteti* A.C.L.G. Günther, 1875 *(nomen emendatum), Plectrurus davidsoni* Beddome, 1886, and *Plectrurus davisonii* Boulenger, 1893a *(nomen emendatum).*

Types: Syntypes (15–20), BMNH 1946.1.1.41, MNHN 170, MNHN 190, MNHN 6996, and ZMB 4036, longest syntype 248 mm (G.S. Perrotet, 1822–1831 & A. Delessert), location of other syntypes unknown.

Type locality: "Monts Nilgerrhy (Indes orient.)" [= Nilghiri hills, Western Ghats, W Tamil Nadu State, S India, ca. 11°24'N, 76°45'E].

Distribution: Southwestern India (Western Ghats of W Karnataka, NE Kerala, SW Tamil Nadu), 1065–2250 m.

Sources: Murthy, 1983b, 1990, J.C. Murphy & Schlager, 2003, Whitaker & Captain, 2004 and Hutton & David, 2009.

Remarks: Supplemental original description in Duméril, Bibron & Duméril (1854a: 167–168, pl. 59, figs. 4–4a).

PLESIODIPSAS Harvey, Rivas-Fuenmayor,

P

PLESIODIPSAS Harvey, Rivas-Fuenmayor, Portilla & Ruede-Almonacid, 2009 (Dipsadidae)

Type species: *Tropidodipsas perijanensis* Aleman, 1953.

Distribution: Colombia and Venezuela.

Sources: Harvey et al., 2009 and Zaher et al., 2009.

1. *Plesiodipsas perijanensis* (Aleman, 1953). Mem. Soc. Cienc. Nat. La Salle 13(35): 217–218, 1 fig. (*Tropidodipsas perijanensis*)

Type: Holotype, MHNLS 4478, a 910 mm female (R. Urbano, 9 March 1952).

Type locality: "Jamayaujaina, Sierra de Perijá, Estado Zulia, a 1.700 metros de altura, Venezuela."

Distribution: Colombia (César, Santander) and Venezuela (Zulia), 1350–2100 m.

Sources: Roze, 1966a, Lancini, 1986 and Navarrete et al., 2009.

Remarks: Previously in the genus *Dipsas.*

†*PLESIOTORTRIX* Rochebrune, 1884 (Boidae)

Type species: †*Plesiotortrix edwardsi* Rochebrune, 1884.

Distribution: Upper Eocene or Oligocene of France.

Source: Rage, 1984b.

1. †*Plesiotortrix edwardsi* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 156, pl. 2, figs. 6–6a.

Type: Holotype, MNHN QU 16332, three articulated trunk vertebrae.

Type locality: "Phosphorites du Quercy" [Tarn-et-Garonne Prov., SW France, upper Eocene or Oligocene].

Distribution: Upper Eocene (33.9–37.2 mya) or Oligocene (23.0–33.9 mya) of France. Known only from type series.

PLIOCERCUS Cope, 1860e (Dipsadidae)

Synonyms: *Elapochrus* W.C.H. Peters, 1860c, *Pleiocercus* Salvin, 1861 *(nomen emendatum), Pleiokerkos* Cope, 1862b *(nomen emendatum), Cosmiosophis* Jan, 1863a, *Plioceras* – K.P. Schmidt, 1936a *(nomen incorrectum),* and *Elapochrous* – H.M. Smith & Taylor, 1945 *(nomen incorrectum).*

Type species: *Pliocercus elapoides* Cope, 1860e.

Distribution: Latin America.

Sources: H.M. Smith & Taylor, 1945, J.A. Peters & Orejas-Miranda, 1970, H.W. Greene & McDiarmid, 1981, Cadle, 1984b, L.D. Wilson & Meyer, 1985, Savage & Crother, 1989, H.M. Smith et al., 1995, 1996, H.M. Smith & Chiszar, 1996, L.D. Wilson et al., 1996, L.D. Wilson & McCranie, 1997, H.M. Smith & Chiszar, 2000b and Zaher et al., 2009.

Remarks: A synonym of *Urotheca* fide Savage and Crother (1989: 341). H.M. Smith & Chiszar, 2001b–g recognized *P. andrewsi, bicolor, dimidiatus, elapoides,* and *euryzonus* as valid species. Possibly only a single species *fide* L.D. Wilson et al. (1996: 62), but *P. euryzonus* and *P. elapoides* sympatric in Honduran Mosquitia *fide* L.D. Wilson et al., 2003.

1. *Pliocercus elapoides* Cope, 1860e. Proc. Acad. Nat. Sci. Philadelphia 12(6): 253–254.

Synonyms: *Elapochrus deppei* W.C.H. Peters, 1860c, *Pleiocercus aequalis* Salvin, 1861, *Liophis tricinctus* Jan, 1863a, *Pliocercus salvinii* F. Müller, 1878b, *Pliocercus sargii* J.G. Fischer, 1881, *Liophis elapoides diastema* Bocourt, 1886 *in* Duméril, Bocourt & Mocquard, 1870–1909, *Pliocercus bicolor* H.M. Smith, 1941b, *Pliocercus elapoides laticollaris* H.M. Smith, 1941b, *Pliocercus elapoides semicinctus* K.P. Schmidt, 1941, *Pliocercus andrewsi* H.M. Smith,

1942h, *Pliocercus elapoides schmidti* H.M. Smith, 1942h, *Pliocercus elapoides celatus* H.M. Smith, 1943b, *Pliocercus elapoides salvadorensis* Mertens, 1952a, *Pliocercus andrewsi pacificus* H.M. Smith & Chrapliwy, 1957, *Pliocercus elapoides hobartsmithi* Liner, 1960, *Pliocercus elapoides occidentalis* H.M. Smith & Landy, 1965, *Pliocercus psychoides* H.M. Smith & Chiszar, 1996, and *Pliocercus wilmarai* Smith, Pérez-Higareda & Chiszar *in* H.M. Smith & Chiszar, 1996.

Types: Syntypes (4), ANSP 3810–13, longest syntype 502 mm (R.M. de Oca).

Type locality: "near Jalapa, Mexico" [= vicinity of Jalapa, cen. Veracruz State, E Mexico, 19°33'N, 96°55'W, elevation 1455 m].

Distribution: Southeastern Mexico and upper Central America. Southeastern Mexico (Campeche, Chiapas, Hidalgo, Oaxaca, Puebla, Quintana Roo, San Luis Potosí, Tabasco, S Tamaulipas, Veracruz, Yucatán), Belize (Cayo, Stann Creek, Toledo), Guatemala (Alta Verapaz, Baja Verapaz, Chimaltenango, Escuintla, Huehuetenango, Petén, Quetzaltenango, Retalhuleu, Santa Marcos, Santa Rosa, Suchitepequez), W Honduras (Colón, Comayagua, Copán, Cortés, Francisco Morazán, La Paz, Ocotepeque, Olancho, Yoro) and El Salvador (Chalatenango, La Libertad, Morazán, San Vicente, Sonsonate, Usulután), NSL–1980 m.

Sources: H.M. Smith, 1941b, 1942h, Mertens, 1952a, L.C. Stuart, 1963, H.W. Greene, 1969, R.W. Henderson & Hoevers, 1975, J.C. Lee, 1980, 1996, H.M. Smith et al., 1989, J.A. Campbell, 1998b, H.M. Smith & Chiszar, 2001a, 2001c–d, 2001f, G. Köhler et al., 2005, McCranie et al., 2006, Ramírez-Bautista et al., 2010 and McCranie, 2011a.

Remarks: *Pliocercus aequalis* and *P. bicolor* valid species *fide* Pérez-Higareda & Smith, 1986. H.M. Smith et al. (1995: 208) discussed the date of publication of *Elapochrus deppei*.

2. *Pliocercus euryzonus* Cope, 1862b. Proc. Acad. Nat. Sci. Philadelphia 14(1): 72–73.

Synonyms: *Liophis splendens* Jan, 1863a, *Pliocercus dimidiatus* Cope, 1865, *Pliocerus rurizona* – Briceño-Rossi, 1934 *(nomen incorrectum), Urotheca aureorostris* Briceño-Rossi, 1934 *(nomen nudum), Pliocercus annellatus* E.H. Taylor, 1951, *Pliocercus arubricus* E.H. Taylor, 1954, and *Pliocercus euryzonus burghardti* H.M. Smith & Chiszar, 1996.

Type: Holotype, USNM 4303 (formerly SIM 4303), a 603 mm specimen (N. Michler [Darien Surv. Exped.], 1857–1860), lost *fide* J.A. Peters (1960a: 535).

Type locality: "Region of the Truando, New Grenada" [= vicinity of Río Truandó, N Chocó Dept., W Colombia].

Distribution: Lower Central America and NW South America. Northeastern Honduras (Gracias a Dios), E Nicaragua (Atlántico Norte, Atlántico Sur, Matagalpa, Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia: Bonita Is.; Limón, Puntarenas, San José), Panama (Bocas del Toro, Canal Zone, Chiriquí, Coclé, Colón, Darién, San Blas, Veraguas, Barro Colorado Is.), W Colombia (Antioquia, Boyaca, Caldas, Cauca, Chocó, Cundinamarca, Huila, Meta, Nariño, Risaralda, Santander, Valle del Cauca) and NW Ecuador (Carchi, Cotopaxi, Esmeraldas, Imbabura, Los Rios, Pichincha), NSL–2750 m.

Sources: E.H. Taylor, 1954, N.J. Scott, 1969, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, 1991, H.M. Smith & Chiszar, 2001e, 2001g, Savage, 2002, McCranie et al., 2006 and McCranie, 2011a.

Remarks: Record from Brazil rejected *fide* Savage & Crother, 1989.

POECILOPHOLIS Boulenger, 1903b (Atractaspididae)

Synonyms: *Poicilopholis* – Hughes, 1983 *(nomen incorrectum)* and *Poecilipholis* – Knoepffler, 1968 *(nomen incorrectum).*

Type species: *Poecilopholis cameronensis* Boulenger, 1903b.

Distribution: West Africa.

Sources: Perret, 1961, Girardin, 1978, Wallach, 1991, Underwood & Kochva, 1993, Chippaux, 2006, Chirio & LeBreton, 2007 and Vidal et al., 2008.

1. *Poecilopholis cameronensis* Boulenger, 1903b. Ann. Mag. Nat. Hist. (7) 12(69): 352–353.

Type: Holotype, BMNH 1946.1.1.69, a 520 mm specimen (G.L. Bates).

Type locality: "Efulen, S. Cameroon" [= Efoulan, W Sud Prov., ext. SW Cameroon, 2°56'N, 11°05'E, elevation 660 m].

Distribution: Southwestern Cameroon (Sud), 420–1060 m.

POLEMON Jan, 1858b (Atractaspididae)

Synonyms: *Microsoma* Jan, 1858, *Miodon* A.H.A. Duméril, 1859, *Urobelus* Reinhardt, 1861b, *Mijodon* – Hoffmann, 1890 *(nomen incorrectum), Myodon* – Hoffmann, 1890 *(nomen incorrectum), Palaemon* – Bocage, 1895 *(nomen incorrectum), Microsona* – Canton, 1895 *(nomen incorrectum), Cynodontophis* F. Werner, 1902, *Mioden* – Sternfeld, 1908e *(nomen incorrectum), Elapocalamus* Boulenger, 1911b, *Melanocalamus* Witte, 1941, *Myodon* – Lema, 1978 *(nomen incorrectum),* and *Cynodantophis* – Phelps, 1981 *(nomen incorrectum).*

Type species: *Polemon barthii* Jan, 1858b.

Distribution: West, cen. and E Africa.

Sources: Witte & Laurent, 1943, 1947, Loveridge, 1944b, Witte, 1962, Bourgeois, 1968, Hughes, 1983, Wallach,

1991, Underwood and Kochva, 1993, Nagy et al., 2005, Vidal et al., 2008, Kelly et al., 2009 and Zaher et al., 2009.

1. *Polemon acanthias* (Reinhardt, 186lb). Vidensk. Medd. Naturhist. Foren. Kjøbenhavn (1860) 2: 229–238, pl. 3, figs. 1–4. (*Urobelus acanthias*)

Synonym: *Calamaria acanthias* Kröyer, 1853 *(nomen nudum).*
Type: Lectotype, ZMUC 63128, a 315 mm specimen (Schönning, 1850), designated by F.W. Braestrup *in* Hughes & Barry (1969: 1024).
Type locality: "Guinea" [= coast of Ghana *fide* Hughes & Barry, 1969: 1024] via lectotype selection.
Distribution: West Africa. Southern Guinea (Macenta, Nzérékoré), Sierra Leone, Liberia (Bong, Montserrado), S Ivory Coast (Abidjan, Daloa, Danane, Dix-Huit Montagnes, Guiglo, Man, San Pédro, Tabou), S Ghana (Central, Eastern), S Togo (Plateaux) and S Nigeria (Ondo), NSL–1200 m.
Sources: Aylmer, 1922, Angel, 1933b, Villiers, 1950a, 1954a, Doucet, 1963, L.R. Cole, 1967, Condamin, 1959, Doucet, 1963, Leston & Hughes, 1968, Hughes & Barry, 1969, Leston, 1970, Hughes, 1983, Roman, 1984, Chippaux, 2006 and Segniagbeto et al., 2011.
Remarks: Reinhardt attributed authorship to Kröyer, recognized by A.C.L.G. Günther (1888c: 323).

2. *Polemon barthii* Jan, 1858b. Rev. Mag. Zool. (2) 10: 516, 520.

Type: Holotype, ZSM 2167/0, a 490–510 mm female (H. Barth, 1857–1859), destroyed 24–25 April 1944 during World War II.
Type locality: "Guinée" [= coast of Ghana *fide* Hughes & Barry, 1969: 1024].
Distribution: West Africa. Liberia (Bong), Ivory Coast (Guiglo, Tabou), S Ghana (Eastern) and SW Cameroon.
Sources: L. Müller, 1910, Angel, 1933b, Doucet, 1963, Leston & Hughes, 1968, Hughes & Barry, 1969, Villiers, 1975, Hughes, 1983, 2003, Roman, 1984, Villiers & Condamin, 2005 and Chippaux, 2006.
Remarks: Supplemental original description in Jan (1859c: pl. 5, figs. 1–8). Photograph of the holotype in Franzen & Glaw (2007: fig. 15). Probably occurs in Togo *fide* and Segniagbeto et al. (2011: 353).

3. *Polemon bocourti* Mocquard, 1897a. Bull. Mus. Hist. Nat., Paris 3(1): 54.

Synonym: *Aparallactus hagmanni* Gough, 1902.
Types: Syntypes (2), MNHN 1896.553–54, 540 mm and 350 mm specimens (E. Haug, 1895–1897).
Type locality: "les environs de Lambaréné, sur le bas Ogooué, Gabon" [= vicinity of Lambaréné, Moyen-Ogooúe Region, W Gabon, 0°42'S, 10°13'E, elevation 25 m].
Distribution: Central Africa. Southeastern Guinea, S Cameroon (Centre, Nord-Ouest, Sud, Sud-Ouest), Equatorial Guinea, Gabon (Moyen-Ogooué), Congo (Brazzaville, Cuvette) and W Democratic Republic of the Congo (Bas-Congo, Bandundu, Equateur, Kasai Occidental, Kasai-Oriental, Kinshasa), 25–1200 m.
Sources: L. Müller, 1910, Witte, 1933a, 1962, Witte & Laurent, 1943, Doucet, 1963, Thys van den Audenaerde, 1965, Villiers, 1966, 1975, J.-F. Trape & Roux-Estève, 1995, Hughes, 2003, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.
Remarks: Original description reprinted in Bocourt (1897d: 13–14). Photograph of syntype in Pauwels & Vande weghe (2008: fig. 284).

4. *Polemon christyi* (Boulenger, 1903b). Ann. Mag. Nat. Hist. (7) 12(69): 354. (*Miodon christyi*)

Synonyms: *Miodon unicolor* K.P. Schmidt, 1923 and *Melanocalamus leopoldi* Witte, 1941.
Type: Holotype, BMNH 1946.1.8.88, a 430 mm female (C. Christy).
Type locality: "Uganda."
Distribution: Eastern Africa. Southeastern South Sudan (Eastern Equatoria), E Democratic Republic of the Congo (Katanga, Nord-Kivu, Orientale, Sud-Kivu), Uganda (Central, Eastern, Western), SW Kenya (Western), Rwanda (Bwmba, Kibungo, Ruhengeri), Burundi (Bujumbura, Ngozi), SW Tanzania (Rukwa) and N Zambia (Copperbelt, N Northern, North-Western), NSL–1700 m.
Sources: Witte, 1941, 1953, 1962, 1975, Broadley, 1971d, Pitman, 1974, Spawls, 1978, Joger, 1990, Broadley & Howell, 1991, Spawls et al., 2002 and Chirio, 2009.
Remarks: Central African Republic record doubtful *fide* Chirio & Ineich (2006: 58).

5. *Polemon collaris* (W.C.H. Peters, 1881e). Sitz. Ges. Naturf. Freunde Berlin 1881(9): 148–149. (*Microsoma collare*)

Synonyms: *Miodon collaris brevior* Witte & Laurent, 1947 and *Miodon collaris longior* Witte & Laurent, 1947.
Type: Holotype, ZMB 10045 (M.-F.W.A. von Mechow, 1873–1881).
Type locality: "Macange, Cuango, West-Afrika" [= Malanje, Malanje Prov., N Angola, 9°33'S, 16°20'E, elevation 1125 m].
Distribution: Central Africa. Southeastern Nigeria (Cross River), S Cameroon (Adamoua, Centre, Est, Littoral, Nord-Ouest, Sud, Sud-Ouest), Equatorial Guinea (Bioko Is.), Gabon (Haut-Ogooué, Moyen-Ogooué, Ogooué-Ivindo), SW Central African Republic (Haute Sangha, Lobaye, Ombella-Mpoko, Ouaka, Sangha), S Congo (Brazzaville, Kouilou, Lekoumou, Plateau), Democratic Republic of the Congo (Bandundu,

Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), SW Uganda (W Western) and N Angola (Benguela, Bié, Cuanza, Huambo, Malanje, Uigé), NSL–2000 m.

Sources: Laurent, 1956a, Perret & Mertens, 1957**b**, Witte, 1962, 1975, Bourgeois, 1963c, Mertens, 1965c, Knoepffler, 1966, Roux-Estéve, 1965, Thys van den Audenaerde, 1965, Villiers, 1966, Pitman, 1974, J.A. Butler & Reid, 1986, Joger, 1990, J.-F. Trape & Roux-Estève, 1995, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

Remarks: Type locality erroneously listed as Kwango, French Equatorial Africa [= Congo] *fide* Loveridge (1944b: 175) and Mertens (1964a: 231).

6. *Polemon fulvicollis* (Mocquard, 1887c). Bull. Soc. Philom. Paris (1886–1887) (7) 11(1): 65–66. (*Microsoma fulvicollis*)

Synonyms: *Miodon gracilis* Witte & Laurent, 1943 (*nomen praeoccupatum*) and *Polemon fulvicollis laurenti* Resetar & Marx, 1981 *(nomen substitutum).*

Type: Holotype, MNHN 1886.211, a 200 mm specimen (P.P.F.C. Savorgnan de Brazza [Brazza Mission Scientifique du Congo], Nov. 1875–June 1882).

Type locality: “Franceville, Congo” [= Franceville, Haut-Ogooué Region, E Gabon, 1°38’S, 13°35’E, elevation 400 m].

Distribution: Central Africa. Southern Cameroon (Centre, Est, Sud), Congo (Lekoumou, Sangha), E Gabon (Haut-Ogooué, Moyen-Ogooué), N Democratic Republic of the Congo (Equateur, Kivu, Orientale) and W Uganda, 350–860 m.

Sources: Villiers, 1966, J.-F. Trape & Roux-Estève, 1990, 1995, Spawls et al., 2002, Chippaux, 2006 Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

7. *Polemon gabonensis* (A.H.A. Duméril, 1856). Rev. Mag. Zool. (2) 8: 468–470. (*Elapocalamus gabonensis*)

Synonyms: *Elapomorphus caecutiens* A.C.L.G. Günther, 1888c, *Miodon gabonensis schmidti* Witte & Laurent, 1947, and *Miodon gabonensis brachyurus* Laurent, 1960.

Type: Holotype, MNHN 3674, a 550 mm specimen (C.E. Aubry-Lecomte, 1853–1856).

Type locality: “côte du Gabon, l’Afrique occidentale” [= coast of Gabon, West Africa] (in error *fide* Loveridge (1944a: 173). Corrected to Congo *fide* Loveridge (1944a: 173).

Distribution: West and cen. Africa. Southeastern Ghana (Accra), S Togo (Maritime), SE Nigeria (Cross River), S Cameroon (Adamaoua, Centre, Est, Littoral, Nord-Ouest, Ouest, Sud, Sud-Ouest), SW Central African Republic (Haute-Sangha, Lobaye, Ombella-Mpoko), Equatorial Guinea, Gabon, Congo, Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Nord-Kivu, Orientale, Sud-Kivu, Idjwi Is.) and W Uganda (W Western), 50–1450 m.

Sources: A.H.A. Duméril, 1859, L. Müller, 1910, Angel, 1933b, Laurent, 1953, 1956a, Witte, 1962, 1975, Doucet, 1963, Roux-Estève, 1965, Thys van den Audenaerde, 1965, Hughes, 1983, 2013, Joger, 1990, Spawls et al., 2002, Chippaux, 2006 and Chirio & LeBreton, 2007.

Remarks: Possibly occurs in N Rwanda *fide* Spawls et al. (2002: 429).

8. *Polemon gracilis* (Boulenger, 1911b). Ann. Mag. Nat. Hist. (8) 8(45): 371. (*Elapocalamus gracilis*)

Type: Holotype, BMNH 1946.1.8.86, a 285 mm female (G.L.Bates, 1895–1911).

Type locality: “Bitye, South Cameroon” [= Bityé, E Sud Dept., S Cameroon, 3°01’N, 12°21’E, elevation 650 m].

Distribution: Central Africa. Nigeria, SW Cameroon (Sud, Sud-Ouest), Gabon and Congo, 500–800 m.

Sources: Perret, 1960, Resetar & Marx, 1981 and Chirio & LeBreton, 2007.

9. *Polemon graueri* (Sternfeld, 1908a). Sitz. Ges. Natur. Freunde Berlin 1908: 94. (*Miodon graueri*)

Type: Holotype, ZMB, a 270 mm male (R. Grauer, 1905–1908).

Type locality: “Entetbe (Uganda)” [= Entebbe, Wasiki Distr., West Mengo Prov., cen. Uganda, 00º03’N, 32º28’E, elevation 1195 m].

Distribution: Central Africa. Eastern Democratic Republic of Congo (Nord-Kivu, Orientale, Sud-Kivu, Idjwi Is.), Uganda (Central, Eastern, Western) and W Rwanda, 800–1830 m.

Sources: Pittman, 1974, Witte, 1975 and Spawls et al., 2002.

Remarks: Previously a subspecies of *P. fulvicollis.*

10. *Polemon griseiceps* (Laurent, 1947). Bull. Mus. Roy. Hist. Nat. Belg. 23(16): 11–12. (*Miodon griseiceps*)

Type: Holotype, BMNH 1946.1.21.90 (formerly BMNH 1913.10.29.11), a 502 mm male (G.L. Bates, 1895–1931).

Type locality: “Bitye” [= Bityé, E Sud Dept., S Cameroon, 3°01’N, 12°21’E, elevation 650 m].

Distribution: West Africa. Southern Cameroon (Centre, Sud), SW Central African Republic and Congo (Brazzaville, Cuvette-Ouest, Sangha), 500–1240 m.

Sources: Villiers, 1966, Joger, 1990, J.B. Rasmussen, 1991, J.-F. Trape & Roux-Estève, 1995, Chippaux, 2006 and Chirio & LeBreton, 2007.

Remarks: Welch (1982: 143) listed Central African Republic. Chirio & Ineich (2006: 58) considered the Central African Republic record unlikely.

11. *Polemon neuwiedi* (Jan, 1858b). Rev. Mag. Zool. (2) 10: 516, 519–520. (*Microsoma neuwiedi*)

Synonym: *Cynodontophis werneri* L. Müller, 1910.
Type: Holotype, USTL, a 172 mm specimen (A.M.P. zu Wied-Neuwied via A. Westphal-Castelnau), destroyed in 1944 during World War II.
Type locality: "côtes de Guinée (Christiansbourg), " [= Christian Borg, S Accra Region, SE Ghana, 5°33'N, 0°11'W, elevation 10 m].
Distribution: West Africa. Southern Mali (Sikasso), SW Burkina Faso (Hauts-Bassins), NE Ivory Coast (Bouna), S Ghana (Accra, Western), S Togo (Maritime), S Benin (Collines) and Nigeria, 10–200 m.
Sources: Angel, 1933, Doucet, 1963, Leston & Hughes, 1968, Hughes & Barry, 1969, Hughes, 1983, 2013, Roman, 1984, Rödel et al., 1995, Chippaux, 2006, J.-F. Trape & Mané, 2006b and Segniagbeto et al., 2011.
Remarks: Supplemental original description in Jan (1859c: pl. 4, figs. 1–10).

12. *Polemon notatus* (W.C.H. Peters, 1882c). Sitz. Ges. Naturf. Freunde Berlin 1882(8): 127–128. (*Microsoma notatum*)

Synonym: *Cynodontophis aemulans* F. Werner, 1902.
Type: Holotype, ZMB 10271.
Type locality: Unknown. Designated as Cameroon *fide* Chirio & LeBreton (2007: 654).
Distribution: West Africa. Southern Cameroon (Centre, Est, Littoral, Sud, Sud-Ouest), W Gabon (Ogooué-Maritime), S Congo (Brazzaville, Kouilou), SW Central African Republic (Haute-Sangha) and W Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kinshasa), 10–1300 m.
Sources: L. Müller, 1910, Perret & Mertens, 1957b, Witte, 1962, Villiers, 1966, J.-F. Trape & Roux-Estève, 1995, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

13. *Polemon robustus* (Witte & Laurent, 1943). Rev. Zool. Bot. Afr. 37(1–2): 167. (*Miodon robustus*)

Type: Holotype, MRAC 9829, a 645 mm female (H. Schouteden, 1934).
Type locality: "Bolobo (Congo belge: Distr. du Lac Léopold II), Congo belge" [= Bolobo, ext. NW Bandundu Region, ext. W Democratic Republic of the Congo, 2°10'S, 16°14'E, elevation 315 m].
Distribution: Southwestern Central African Republic (Haute-Sangha, Lobaye) and W Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kinshasa), 315–450 m.
Sources: Witte, 1962, Bourgeois, 1963c, Thys van den Audenaerde, 1965, Chippaux, 2006, Chirio & Ineich, 2006 and Chirio & LeBreton, 2007.
Remarks: Probably occurs in E Cameroon *fide* Chirio & LeBreton (2007: 656).

P

†*POLLACKOPHIS* Holman, 1998b (Colubridae)

Type species: †*Pollackophis depressus* Holman, 1998b.
Distribution: Lower Miocene of USA.
Sources: Holman, 1998b, 2000a.

1. †*Pollackophis depressus* Holman, 1998b. Delaware Geol. Surv., Spec. Publ. (21): 145, figs. 2a–e.

Type: Holotype, USNM 483397, one trunk vertebra.
Type locality: "From the Pollack Farm Site, Delaware Geological Survey Site Id11-a (39°14'08"N, 75°34'36"W), near Cheswold, Kent County, Delaware. Creswold sands of the Calvert Formation; lower Mioclene, Hemingfordian Age."
Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (Delaware).

POLYODONTOGNATHUS Wall, 1921g (Elapidae)

Synonyms: *Polyodontognatus* – Bourret, 1934g *(nomen incorrectum)* and *Polydontognathus* – Schulze, Kükenthal, Hediger & Hesse, 1935 *in* 1932–1935 *(nomen incorrectum).*
Type species: *Hydrus caerulescens* G. Shaw, 1802.
Distribution: Marine waters of Indo-Australia, including Arabian Sea, Bay of Bengal, Bight of Bangkok, Gulf of Carpentaria, Gulf of Martaban, Gulf of Thailand, N Indian Ocean, Java Sea, Morrison Bay, Sea of Singgora, Strait of Malacca and Yellow Sea.
Sources: Kharin, 2004a, N. Khaire, 2006, Zhao, 2006, Wells, 2007, V.S. Nguyen et al., 2009 and Hoser, 2012e.

1. *Polyodontognathus caerulescens* (G. Shaw, 1802). Gen. Zool., Amph. 3(2): 561–562. (*Hydrus caerulescens*)

Synonyms: *Hydrophis hybrida* Schlegel, 1844 *in* 1837–1844, ? *Hydrophis colubrinus* Jerdon, 1854, *Hydrophis protervus* Jan, 1859b, *Hydrophis wertmani* Jan, 1859a, *Hydrophis frontalis* Jan, 1863b, *Hydrophis polydonta* Jan, 1863b (*nomen nudum*), *Hydrophis polydontus* Jan, 1872 *in* Jan & Sordelli, 1870–1881, *Hydrophis caerulescens thai* M.A. Smith, 1920, *Hydrophis coerulescens* – Boquet, 1964 *(nomen incorrectum), Hydrophis caerulscens* – Deraniyagala, 1977 *(nomen incorrectum),* and *Hydrophis coerelescens* – M.W. Lin, 1975 *(nomen incorrectum).*
Type: Holotype, BMNH 1946.1.3.90 (formerly BMNH III.6.13.a), a 610 mm male (P. Russell, 1781–1791).
Type locality: "East-India." Emended to Vizagapatam [= Vishakhapatnam, Andhra Pradesh State, SE India, 17°41'N, 83°13'E, elevation 25 m] *fide* BMNH label, Wall (1921g: 379) and Cogger et al. (1983: 250).

Distribution: Indo-Australia. Pakistan (SW Sindh), India (Andhra Pradesh, Karnataka, Kerala, Maharashtra, Orissa, Tamil Nadu, West Bengal), Sri Lanka, Bangladesh, Myanmar (Mergui Arch., Tanintharyi), Thailand (Chanthaburi, Pattani, Phet Buri, Samut Sakhon, Samut Songkhram, Phuket Is.), Cambodia (Koh Kong), Vietnam (coastal regions of central and S), China (Guangdong, Shandong), Taiwan, West Malaysia (Johore, Kelantan, Pahang, Pinang, Perak, Selangor, Terengganu, Angsa Is.), Singapore, East Malaysia (Sabah, Sarawak), Indonesia (N Java) and N Australia (Northern Territory, Queensland).

Sources: Wall, 1921g, Bourret, 1934g, 1936b, E.H. Taylor, 1965, Minton, 1966, Tian et al., 1986, M.A.R. Khan, 1988, Stuebing, 1991 and M.S. Khan, 2000.

POPEIA Malhotra & Thorpe, 2004c (Viperidae)

Type species: *Trimeresurus popeorum* M.A. Smith, 1937.

Distribution: Southeast Asia and Indonesia.

Sources: Maslin, 1942, M.A Smith, 1943, Maslin, 1945, Klemmer, 1963, Leviton, 1964d, W. Burger, 1971, Kramer, 1977, Hoge & Romano-Hoge, 1981a, Malhotra & Davis, 1991, Golay et al., 1993, Kraus et al., 1996, David & Vogel, 1998, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Malhotra & Thorpe, 1997, 2000, 2004c, Ziegler et al., 2001, Giannasi et al., 2001a, G. Peng & Fuji, 2001, David et al., 2002, 2009, 2011, Gumprecht et al., 2004c, Castoe & Parkinson, 2006, Grismer et al., 2006a, 2008b, Sanders et al., 2006, Dawson et al., 2008, Ganesh et al., 2008, Orlov et al., 2008, 2009, I. 1. *Popeia barati* (Regenass & Kramer, 1981). Rev. Suisse Zool. 88(1): 189–190, figs. 5–8. (*Trimeresurus popeorum barati*)

Type: Holotype, NMBA 2587, a 505 mm male (M. Müller, 1885).

Type locality: "Solok, Sumatra" [= Solok Regency, Sumatera Barat Prov., W-cen. Sumatra, W Indonesia].

Distribution: Western Indonesia (Sumatra, Mentawai Arch.: Pagai), 390–1600 m.

Sources: David & Gernot, 1996, Vogel et al., 2004 and David et al., 2009.

2. *Popeia buniana* Grismer, Grismer & McGuire, 2006a. Zootaxa (1305): 9–13, fig. 2.

Type: Holotype, ZRC 2.6176, a 699 mm male (J.A. McGuire & J.L. Grismer, 21 July 2002).

Type locality: "Tekek-Juara Trail at 2° 49' 18.0' N x 104° 10' 28.5"E at 295 m, Pulau Tioman, Pahang State, West Malaysia" [= Tekek-Juara trail, Tioman Is., E Pahang State, SE West Malaysia, 2°49'N, 104°10'E, elevation 295 m].

Distribution: Southeastern West Malaysia (Pahang: Tioman Is.), 240–810 m.

Sources: Grismer, 2005, 2011 and Grismer and Khang Aun, 2008.

3. *Popeia fucatus* (Vogel, David & Pauwels, 2004). Zootaxa (727): 24–30, figs. 6–9, 13. (*Trimeresurus fucatus*)

Type: Holotype, MNHN 1990.4283, a 704 mm male.

Type locality: "Province of Nakhon Si Thammarat, Thailand."

Distribution: Myanmar (Taninthayi, Kanmaw Is.), Thailand (Chumphon, Krabi, Nakhon Si Thammarat, Phang Nga, Prachuap Khiri Khan, Surat Thani, Trang) and West Malaysia (Johor, Kedah, Pahang, Perak, Pinang, Selangor, Terengganu, Langkawi and Penang Is.), 400–1280 m.

Sources: I. Das, 2012, 2012.

4. *Popeia nebularis* (Vogel, David & Pauwels, 2004). Zootaxa (727): 38–45, figs. 14–17. (*Trimeresurus nebularis*)

Synonym: *Popeia inornata* Sanders, Malhotra, Gumprecht, Thorpe & Kuch, 2004.

Type: Holotype, USNM 142425, an 881 mm female (H. Baker, 17 Oct. 1959).

Type locality: "Gunung Brinchang [now Gunung Batu Berinchang], Cameron Highlands, State of Pahang, West Malaysia."

Distribution: West Malaysia (Pahang), 1370–1765 m.

Sources: Sanders et al., 2004 and David et al., 2009.

5. *Popeia phuketensis* Sumonthal, Kunya, Pauwels, Nitikul & Punnadee, 2011. Russ. J. Herp. 18(3): 186–189, figs. 1–4.

Type: Holotype, THNHM 15905, a 495 (svl) mm male (K. Kunya, 5 Oct. 2009).

Type locality: "Ban Bangrong, Thalang District, Phuket Island, Phuket Province, southwestern Thailand."

Distribution: Thailand (Phuket: Phuket Is.). Known only from type locality.

6. *Popeia popeorum* (M.A. Smith, 1937). J. Bombay Nat. Hist. Soc. 39(4): 730. (*Trimeresurus popeorum*) (*nomen corrigendum*)

Synonyms: *Coluber viridicaeruleus* Lacépède, 1789 (*nomen rejiciendum*), *Trimeresurus popeiorum* M.A. Smith, 1937 *(nomen incorrigendum),* and *Trimeresurus popeorum* – M.A. Smith, 1943 *(nomen corrigendum).*

Type: Lectotype, BMNH 1872.4.17.137, a 925 mm male (T.C. Jerdon, 1836–1852), designated by E.H. Taylor & Elbel (1958: 1174).

Type locality: " Khasi Hills, Assam" [= Khasi Hills, E Meghalaya State, NE India, 25°35'N, 91°38'E, elevation 1370–1675 m] via lectotype selection.

Distribution: Southeastern Asia. Northeastern India (Arunachal Pradesh, Assam, Meghalaya, Sikkim, West Bengal), Myanmar (Bago, Chin, Kayin, Mon, Taninthayi), Laos (Louangphrabang, Luang Prabang, Phongsali, Vientiane) and Thailand (Chiang Mai, Chiang Rai, Lampang, Loei, Muang Pan, Phang Nga, Tak), NSL–2100 m.

Sources: C.H. Pope & Pope, 1933, E.H. Taylor & Elbel, 1958, E.H. Taylor, 1965, Regenass & Kramer, 1981, Tweedie, 1983, G. Vogel, 1990, M.J. Cox, 1991b, David and Vogel, 1996, Malhotra & Thorpe, 1997, Orlov, 1997, M.J. Cox et al., 1998, Chan-ard et al., 1999, Orlov et al., 2000, Grismer et al., 2002b, Malkmus et al., 2002, Schleich & Kästle, 2002, Leviton et al., 2003 and Vogel et al., 2004.

Remarks: May occur in E Nepal but no specific records available (Schleich & Kästle, 2002). Records from Cambodia and Vietnam are different species *fide* Vogel et al. (2004: 24). Original orthography of *T. popeiorum* was a clerical error [corrected by the author on reprints] *fide* M.A. Smith (1943: 518) and following Art. 32.5.1.1 (ICZN, 1999: 40), the snake named after Mr. and Mrs. Pope is correctly *Pope* + *orum*.

7. *Popeia sabahi* (Regenass & Kramer, 1981). Rev. Suisse Zool. 89(1): 190–192, figs. 10–12. (*Trimeresurus popeorum sabahi*)

Type: Holotype, MCZ 43608, a 682 mm male (J.A. Griswold, 8 June 1937).

Type locality: "Mount Kinabulu, Kulapis River, British North Borneo."

Distribution: East Malaysia (Sabah, Sarawak) and Brunei, 200–1500 m

Sources: Vogel et al., 2004, I. Das, 2007b and David et al., 2009.

8. *Popeia toba* (David, Petri, Vogel & Doria, 2009). Ann. Mus. Civ. Stor. Nat. "Giacomo Doria," Genova 100: 325–331, figs. 1–7. (*Trimeresurus toba*)

Type: Holotype, MSNG 30988, a 798 mm female (E. Modigliani, 1891).

Type locality: " 'Si Rambie', now Sirambi, about 13 km SE of Balige, off the southern shore of Danau Toba (Indonesia, Sumatra Island, Province of Sumatera Utara)."

Distribution: Western Indonesia (N Sumatra), 300 m.

P

PORTHIDIUM Cope, 1871b (Viperidae)

Synonyms: *Thanatos* Posada Arango, 1889a, *Thanatophis* Posada-Arango, 1889b (*nomen substitutum*), and *Tejeraia* Sandner-Montilla, 1989

Type species: *Bothrops nasutus* Bocourt, 1868.

Distribution: Latin America.

Sources: H.M. Smith, 1941i, H.M. Smith & Taylor, 1945, J.A. Peters & Orejas-Miranda, 1970, Hoge, 1966a, Burger, 1971, Hoge & Romano-Hoge, 1971, 1981a, J.A. Campbell & Lamar, 1989, 2004, Maes, 1989, Kraus et al., 1996, Werman, 1997, Gutberlet, 1998, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Gutberlet & Harvey, 2002, Castoe et al., 2005, Castoe & Parkinson, 2006 and Hoser, 2012d.

1. *Porthidium arcosae* Schätti & Kramer, 1993. Rev. Suisse Zool. 100(2): 264–266, fig. 4. (*Porthidium lansbergii arcosae*)

Synonym: ? *Bothrops boussingaultii* Jan, 1863b *(nomen nudum).*

Type: Holotype, QCAZ 1325, a 635 mm female (E. Ventura, Aug. 1989).

Type locality: "Agua Blanca, ca. 15km NW Salango (1°37'S x 80°48'W), Manabi, ca. 100 m ü. M., Ecuador."

Distribution: Western Ecuador (Manabi), 100 m.

Source: Coloma et al., 2000.

2. *Porthidium dunni* (Hartweg & Oliver, 1938). Occ. Pap. Mus. Zool., Univ. Michigan (390): 6, pl. 1, figs. b, d. (*Trimeresurus dunni*)

Type: Holotype, UMMZ 82732, a 404 mm female (N. Hartweg & J.A. Oliver, 7 July 1936).

Type locality: "immediate vicinity of the village of Tehuantepec, the Pacific slope of the Isthmus of Tehuantepec, Oaxaca" [= vicinity of Tehuantepec (16°21'N, 95°16'W, elevation 60 m), SE Oaxaca State, S Mexico].

Distribution: Southern Mexico (ext. W Chiapas, S Oaxaca), NSL–700 m.

Sources: Amaral, 1944b, J.D. Johnson, 1974, J.A. Campbell, 1976, Casas-Andreu et al., 1996 and Bryson et al., 2008.

3. *Porthidium hespere* (J.A. Campbell, 1976). J. Herp. 10(3): 152–156, figs. 1, 3. (*Bothrops hesperis*)

Type: Holotype, UTA 4443, a 579 mm female (S. Aviña, 15 Oct. 1973).

Type locality: "west-facing slope in the foothills ca. 12 airline km NE of Tecomán, Municipio de Ixlahuacán, Colima, western Mexico. This site lies between the Río Armería drainage and the Río Salado (a tributary of the Río Coahuayana) at an elevation of approximately 300 m." Emended to 19.2 air-line km northeast of Tecomán *fide* J.A. Campbell & Lamar (1989: 316).

Distribution: Western Mexico (SW Colima, W Michoacán), NSL–610 m.

Sources: J.A. Campbell, 1976, and Alvarado-Díaz et al., 1997 and Bryson et al., 2008.

4. *Porthidium lansbergii* (Schlegel, 1841). Mag. Zool. Anat. Comp. Palaeont. 1841: 1–3, pl. 1, 4 figs. (*Trigonocephalus lansbergii*)

Synonoms: ? *Trigonocephalus savianus* Filippi, 1848, *Trigonocephalus landsbergii* – Jan, 1859b *(nomen incorrectum), Teleuraspis castelnaui brachystoma* Cope, 1860b, *Bothrops lansbergii venezuelensis* Roze, 1959c *(nomen praeoccupatum), Bothrops lansbergii rozei* J.A. Peters, 1968 (*nomen substitutum), Bothrops lansbergii janisrozei* – Hoge & Romano-Hoge, 1971 (*nomen incorrectum),* and *Bothrops lansbergi hutmanni* Sandner-Montilla, 1989.

Type: Holotype, RMNH 1556, a 361 mm specimen (R.F. van Lansberge).

Type locality: "environs de Turbaco, en Colombie" [= Turbaco, N Bolívar Dept., N Colombia, 10°20'N, 75°25'W, elevation 175 m].

Distribution: Panama and N South America. Eastern Panama (Coclé, Colón, Darién, Panamá), NW Colombia (Antioquia, Atlántico, Bolívar, Chocó, Córdoba, La Guajira, Magdalena, Norte de Santander, Santander, Tolima) and Venezuela (Anzoátegui, Bolívar, Carabobo, Delta Amacuro, Falcón, Guárico, Lara, Monagas, Nueva Esparta, Sucre, Trujillo, Zulia, Coche and Margarita Is.), NSL–1270 m.

Sources: Nicéforo-María, 1938, Amaral, 1944b, Roze, 1966a, L.D. Wilson & Meyer, 1985, Lancini-V., 1986, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, Schätti & Kramer, 1993, Solórzano, 1994, Mijares-Urrutia & Arends, 2000, Manzanilla & Natera, 2003, Infante-Rivero, 2009, Navarrete et al., 2009 and Ugueto & Rivas, 2010.

Remarks: Type locality correction to Tumaco [= Tumaco, W Narino Prov., W Colombia, 1°48'N, 78°46'W, elevation NSL] *fide* Amaral (1929: 21) invalid.

5. *Porthidium nasutum* (Bocourt, 1868). Ann. Sci. Nat. (Zool.) (5) 10: 202. (*Bothrops nasutus*)

Synonyms: *Bothriopsis proboscideus* Cope, 1875a and *Thanatos sutus* Posada-Arango, 1889a.

Type: Holotype, MNHN 1592 (M.-F. Bocourt, 1865–1866).

Type locality: "Pansos, sur les bords du Polochic (Guatémala)" [= Panzos, on the Río Polochic, ext. E Alta Verapaz Dept., E Guatemala].

Distribution: Latin America. Southeastern Mexico (NW Chiapas, ? Tabasco, SE Veracruz), S Belize (Cayo), N Guatemala (Alta Verapaz, Izabal, Petén), NW Honduras (Atlántida, Colón, Cortés, Gracias a Dios, Olancho, Santa Bárbara, Yoro), E Nicaragua (Atlántico Norte, Atlántico Sur, Jinotega, Matagalpa, Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón), Panama (Bocas del Toro, Canal Zone, Coclé, Colón, Darién, Limón, Panamá), W Colombia (Antioquia, Cauca, Chocó, Valle) and NW Ecuador (Esmeraldas, Manabi, Pichincha), NSL–900 [1500] m.

Sources: Nicéforo-María, 1938, Pifano & Römer, 1949b, E.H. Taylor, 1951, 1954, R.W. Henderson & Hoevers, 1975, J.C. Lee, 1980, 1996, 2000, Miyata, 1980, Porras et al., 1981, Villa, 1984, L.D. Remarks: Colombian records from 1500–1900 m rejected *fide* Porras et al. (1981: 91).

6. *Porthidium ophryomegas* (Bocourt, 1868). Ann. Sci. Nat. (Zool.) (5) 10: 201–202. (*Bothrops ophryomegas*)

Synonym: *Trimeresurus lansbergii annectens* K.P. Schmidt, 1936d.

Type: Holotype, MNHN 1593 (M.-F. Bocourt, 1865–1867).

Type locality: "versant occidental de la Cordillère. Escuintla (Guatémala)" [= S slope of mountains at Escuintla, E Escuintla Dept., S Guatemala].

Distribution: Central America. South-central Guatemala (El Progreso, Retalhuleu, Santa Rosa, Zacapa), Honduras (Choluteca, Comayagua, El Paraíso, Francisco Morazán, Gracias a Dios, Olancho, Valle, Yoro), El Salvador (Chalatenango, La Unión, Santa Ana, Sonsonate), W Nicaragua (Carazo, Chinandega, Chontales, Granada, Managua, Matagalpa, Río San Juan, Rivas) and NW Costa Rica (Alajuela, Guanacaste, Puntarenas), NSL–1400 m.

Sources: Amaral, 1944b, E.H. Taylor, 1951, 1954, Mertens, 1952c, Villa, 1984, L.D. Wilson & Meyer, 1985, Solórzano, 1994, 2004, D. Lawson, 1997, G. Köhler, 1999b, Savage, 2002, Lamar & Sasa, 2003, McCranie et al., 2006, N. Herrera et al., 2007, Bryson, et al., 2008 and McCranie, 2011a.

Remarks: Holotype erroneously listed as MNHN 1539 *fide* McDiarmid et al. (1999: 470).

7. *Porthidium porrasi* Lamar & Sasa, 2003. Rev. Biol. Trop. 51(3–4): 799–800, figs 2a–b.

Type: Holotype, UTA 30829, a 306 mm male (10 July 1990).

Type locality: "Drake Bay, Península de Osa, Puntarenas Province, Costa Rica."

Distribution: Western Costa Rica (Puntarenas), NSL–400 m.

8. *Porthidium volcanicum* Solórzano, 1995. Rev. Biol. Trop. 42(3): 696–700, figs. 2–3.

Synonym: *Bothrops volcanica* Solórzano, 1987 (*nomen nudum*).

Type: Holotype, UCR 11642, a 259 mm male (natives, 7 Jan. 1988).

Type locality: "Ujarrás de Buenos Aires (Valle del General, suroeste de la provincia de Puntarenas, Costa Rica)."

Distribution: Southwestern Costa Rica (SW Puntarenas) and Panama (Chiriquí), 400–1000 m.
Sources: Solórzano, 1995, 2004, Savage, 2002 and Dwyer & Van Den Burgh, 2012.

9. *Porthidium yucatanicum* (H.M. Smith, 1941i). Zoologica 26(1): 62–63. (*Trimeresurus yucatanicus*)

Synonym: *Bothrops yucatannicus* Hoge & Romano-Hoge, 1981a *(nomen emendatum).*
Type: Holotype, USNM 46571, a 254 mm female (E.W. Nelson and E.A. Goldman, Feb. 1901).
Type locality: "Chichen Itza, Yucatán, Mexico" [= Chichen-itza, Yucatán State, SE Mexico, 20°41'N, 88°34'W, elevation 35 m].
Distribution: Yucatán Peninsula, SE Mexico (ext. N Campeche, N Quintana Roo, Yucatán), NSL–250 m.
Sources: J.C. Lee, 1980, 1996, 2000, C.J. McCoy & Censky, 1992 and McCranie & G. Köhler, 2001.
Remarks: Belize record is misidentified *Bothrops asper.*

†*POUITELLA* Rage, 1988b (†Lapparentophiidae)

Type species: †*Pouitella pervetus* Rage, 1988b.
Distribution: Upper Cretaceous of France.
Source: Rage, 1988b.

1. †*Pouitella pervetus* Rage, 1988b. C. R. Acad. Sci. Paris (2) 307B: 1029–1032, figs. a–f.

Type: Holotype, UPVI BRZ 1, one trunk vertebra (A.L. Pouit and D. Pouit).
Type locality: "Brézé (Maine-et-Loire, France); fin du Cénomanien inférieur ou Cénomanien moyen" [= Brézé, Maine-et-Loire Dept., NW France, early or middle Cenomanian, upper Cretaceous].
Distribution: Upper Cretaceous (Cenomanian: 93.9–100.5 mya) of France. Known only from holotype.

P

PROATHERIS Broadley, 1996b (Viperidae)

Type species: *Vipera superciliaris* W.C.H. Peters, 1854.
Distribution: Eastern Africa.
Sources: W.C.H. Peters, 1882, Kramer, 1961a, Stevens, 1973, V.F.M. FitzSimons, 1974, Broadley, 1983, 1996b, Morgan, 1988, Golay et al., 1993, Herrmann & Joger, 1995, 1997, Spawls & Branch, 1995, David & Ineich, 1999, Herrmann et al., 1999, McDiarmid et al., 1999, D.P. Lawson et al., 2001, Lenk et al., 2001b, Spawls et al., 2002, Mallow et al., 2003, Dobiey & Vogel, 2007, Phelps, 2010 and Hoser, 2012d.

1. *Proatheris superciliaris* (W.C.H. Peters, 1854). Mber. Königl. Akad. Wiss. Berlin 1854(11): 625. (*Vipera superciliaris*)

Type: Holotype, ZMB 4121, a 570 mm male (W.C.H. Peters, April 1847).
Type locality: "Terra Querimba" [Mozambique]. Emended to Festlande, der Cap Delgado-Insel Querimba [= Quissanga, mainland opposite Querimba Island, E Cabo Delgado Prov., NE Mozambique, 12°26'S, 40°30'E, elevation NSL] *fide* W.C.H. Peters (1882: 145).
Distribution: Eastern Africa. Southern Tanzania (SW Iringa, S Mbeya), S Malawi (Southern, Nchisi Is.) and N Mozambique (Cabo Delgado, Sofala, Tete, Zambézia), NSL–800 m.

†*PROCEROPHIS* Rage, Folie, Rana, Singh, Rose & Smith, 2008 (Colubroidea *incertae sedis*)

Type species: †*Procerophis sahnii* Rage, Folie, Rana, Singh, Rose & Smith, 2008.
Distribution: Lower Eocene of India.
Source: Rage et al., 2008.

1. †*Procerophis sahnii* Rage, Folie, Rana, Singh, Rose & Smith, 2008. Acta Palaeontol. Polon. 53(3): 397–399, fig. 4a.

Type: Holotype, GU/RSR/VAS 1014, one posterior trunk vertebra.
Type locality: Vastan Lignite Mine, northeast of Surat, Gujarat, western India; Early Eocene (middle to late Ypresian) continental beds of Cambay Formation."
Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) of India. Known only from type locality.

†*PROPTYCHOPHIS* Whistler & Wright, 1989 (Colubridae)

Type species: †*Proptychophis achoris* Whistler & Wright, 1989.
Distribution: Upper Miocene of USA.
Sources: Whistler & Wright, 1989 and Holman, 2000a.

1. †*Proptychophis achoris* Whistler & Wright, 1989. Herpetologica 45(3): 352–355, figs. 1a–c.

Type: Holotype, MVP 120208, one trunk vertebra (D.P. Whistler and previous field crews, late 1960s–1989).
Type locality: "badlands 1 km northwest of Red Rock Canyon State Park Headquarters, SW1/4, Sec. 27, T29S, R37E (Mt. Diablo Base and Meridian), northwestern Mojave Desert, eastern Kern County, California; lower part of Member 5, Dove Spring Formation;

Late Miocene, early late Clarendonian North America Mammal Age, 10.0-10.1 MYBP."

Distribution: Upper Miocene (Clarendonian: 10.3–13.6 mya) of USA (California). Known only from type locality.

PROSYMNA Gray, 1849a (Prosymnidae)

Synonyms: *Temnorhynchus* A. Smith, 1849, *Prosymma* – J.T. Werner, 1909d, *Astenophis* – Calabresi, 1927 *(nomen incorrectum),* and *Proxymna* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type species: *Calamaria meleagris* J.T. Reinhardt, 1843.

Distribution: Central, E and S Africa.

Sources: Chabanaud, 1917b, Loveridge, 1957a, 1958, Broadley, 1980, 1983, Branch, 1988, Vidal et al., 2008, Kelly et al., 2009 and Chirio et al., 2011.

1. *Prosymna ambigua* Bocage, 1873a. J. Sci. Math. Phys. Nat., Lisboa 4(15): 218. (*Prosymna ambiguus*)

Synonyms: *Prosymna bocagii* Boulenger, 1897b, *Prosymna meleagris concolor* Lönnberg, 1910, *Prosymna ambigua brevis* Laurent, 1954a, *Prosymna ambigua loveridgei* Laurent, 1954a, and *Prosymna ambigua urundiensis* Laurent, 1954a.

Type: Holotype, MBL 610, a 125 mm female (Bayão, 1863), destroyed by fire 18 March 1978.

Type locality: "Duque de Bragança, Angola, Afrique occidentale" [= Duque de Bragança, W Malanje Prov., N Angola, 09°06'S, 15°57'E, elevation 1110 m].

Distribution: Central Africa. Central Cameroon (Adamaoua, Centre, Est), Central African Republic (Kemo-Gribingui, Mbomou, Ombella-Mpoko, Ouaka, Ouham, Sangha), S Congo (Bouenza, Brazzaville, Kouilou, Niari, Pool), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), NE Angola (Lunda Norte, Lunda Sul, Malanje), N Zambia (N Northern, North-Western), Malawi (Central, Northern, Southern), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), SE South Sudan (Eastern Equatoria), N Uganda (N Eastern, Northern), SW Kenya (Nyanza), NW Tanzania (Mwanza, Kagera), S Burundi (Bururi), 15–1260 m.

Sources: Hewitt, 1910, K.P. Schmidt, 1923, Loveridge, 1933, 1942, Witte, 1933a, 1953, 1962, 1966, Monard, 1937, Uthmöller, 1937, 1941a–b, Scortecci, 1939b, Villiers, 1952b, 1966, Laurent, 1954a, 1960, Vesey-FitzGerald, 1958, Perret, 1961, V.F.M. FitzSimons, 1962a, 1974, Laurent, 1964a, Thys van den Audenaerde, 1965, Broadley, 1971d, 1980, Pitman, 1974, Haacke and Bruton, 1978, Lanza, 1983a, Pienaar et al., 1983, Joger, 1990, Boycott & Culverwell, 1992, J.-F. Trape & Roux-Estève, 1995, Chippaux, 1999, Spawls et al., 2002, Broadley et al., 2003, Chirio & Ineich, 2006 and Chirio & LeBreton, 2007.

Remarks: Loveridge (1958: 152) erroneously listed the holotype as 225 mm.

2. *Prosymna angolensis* Boulenger, 1915a. Proc. Zool. Soc. London 85(2): 208. (*nomen substitutum*)

Synonym: *Prosymna frontalis* Bocage, 1895 (*nomen praeoccupatum*).

Type: Neotype, NMW 19275b, a 182 mm male, designated by Broadley (1980: 497).

Type locality: "Caconda, Angola" [= Caconda, N Huíla Prov., SW Angola, 13°44'S, 15°04'E, elevation 1700 m] via neotype selection.

Distribution: Southwestern Africa. Western Angola (Benguela, Cuanza Sul, Huambo, Huíla, Luanda, Mocamedes, Namibe), W Zambia (W Western), NE Namibia (Caprivi, Okavango, Oshikoto), N Botswana (North West) and W Zimbabwe (Matabeleland North), 150–1020 m.

Sources: Mertens, 1937, 1955, Monard, 1937, Bogert, 1940, V.F.M. FitzSimons, 1962a, 1974, Broadley, 1971d, Auerbach, 1987, Broadley et al., 2003, M. Griffin, 2003 and Broadley & Blaylock, 2013.

Remarks: Original description in Bocage (1895: 98–99, pl. 11, fig. 2). Holotype destroyed by fire 18 March 1978 *fide* Broadley (1980: 497).

3. *Prosymna bivittata* F. Werner, 1903a. Abh. Bayer. Akad. Wiss. 22(2): 381. (*Prosymna sundevalli bivittata*)

Synonym: *Prosymna sundevallii macrospila* F. Werner, 1910.

Type: Holotype, ZSM 1890/0, a 296 mm female (Kuhn, 1902), lost *fide* EMBL database.

Type locality: "Deutsch-Südwestafrika" [= German South West Africa or Namibia]. Emended to Windhoek, south of the ODistribution River, Namibia [= Little Namaqualand *fide* Loveridge, 1958: 136] *fide* F. Werner (1902: 339).

Distribution: Southern Africa. Northern Namibia (Khomas, Kunene, Omaheke, Otjozondjupa), Botswana (Gaborone, Ghanzi, Kgalagadi, North West, Southern), S Zimbabwe (Masvingo, S Matebeleland North, Matebeleland South), and N South Africa (NW Cape, NW Free State, KwaZulu-Natal, Transvaal), 300–1380 m.

Sources: Mertens, 1955, 1971, V.F.M. FitzSimons, 1962a, 1974, Broadley & Cock, 1975, De Waal, 1978, Pienaar et al., 1983, Auerbach, 1987, Warner & Combrint, 2010a and Broadley & Blaylock, 2013.

Remarks: Probably occurs in S Mozambique *fide* Broadley (1980: 511).

4. *Prosymna frontalis* (W.C.H. Peters, 1867c). Mber. Königl. Akad. Wiss. Berlin 1867(4): 236, pl., figs. 1, 1a–e, 2, 2–d. (*Temnorhynchus frontalis*)

Synonym: *Prosymna bergeri* Lindholm *in* Lampe & Lindholm, 1902.

Type: Lectotype, ZMB 5763a, a 300–302 mm male (Hahn), designated by Mertens (1955: 94).

Type locality: "Otjimbingue, Damaraland, Südwestafrika" [= Otjimbingwe, SE Erongo Distr., cen. Namibia, 22°21'S, 16°08'E, elevation 900 m] via lectotype selection.

Distribution: Southwestern Africa. Southwestern Angola (Benguela), Namibia (Erongo, Hardap, Karas, Khomas, Kunene, Omaheke, Oshikoto, Otjozondjupa) and W South Africa (ext. NW Northern Cape), 300–1765 m.

Sources: Sternfeld, 1910a, Metheun & Hewitt, 1914, V.F.M. FitzSimons, 1938, 1962a, 1974 and Mertens, 1955, 1971.

Remarks: Loveridge (1958: 149) clarified the erroneous length of the type reported by W.C.H. Peters (1867c: 236).

5. *Prosymna greigerti* Mocquard, 1906, Bull. Mus. Hist. Nat., Paris (4) 12(7): 466.

Synonyms: *Prosymna meleagris collaris* Sternfeld, 1908c and *Prosymna meleagris laurenti* Loveridge, 1958.

Type: Holotype, MNHN 1906.154, a 173 mm specimen (Greigert, 1897–1902).

Type locality: "region Lobi, Haute-Volta" [= region of Lobi tribe, SW Burkina Faso, NE Ivory Coast and NW Ghana].

P

Distribution: West and cen. Africa. Western Senegal (Saint-Louis, Kédougou, Kaolack, Kolda, Matam, Tambacounda, Thiès), Gambia (McCarthy Island), Guinea (Labé, Siguiri, Télimélé), Burkina Faso (Centre, Centre-Est, Centre-Norde, Centre-Ouest, Est, Hauts-Bassins, Nord, Sahel, Sud-Ouest, Volta-Noire), N Ghana (NE Northern), N Benin (Alibori), N Togo (Kara, Savanes), SW Niger (Dosso, Niamey, S Tahoua, N Nigeria (Bauchi, Borno, Kaduna, Plateau, Sokoto), N Cameroon (Extreme-Nord, Nord), SW Mali (Kayes, Koulikoro, Mopti, Ségou, Sikasso), SW Chad (Chari-Baguirmi, Mayo-Kebbi), S Central African Republic (Bamingui-Bangoran, Ombella-Mpoko, Ouham, Vakaga), NW Democratic Republic of the Congo (W Bandundu), E Sudan (An Nil Al Azraq, Nahr An Nil, Sennar), SE South Sudan (Central Equatoria, Eastern Equatoria), and W Ethiopia (Wollega), 10–1200 m.

Sources: Aylmer, 1922, Angel, 1933b, Villiers, 1950a, 1956b, 1975, Loveridge, 1958, Condamin & Villiers, 1962, Witte, 1962, Doucet, 1963, Papenfuss, 1969, Roux-Estève, 1969a, Hulselmans & Verheyen, 1970, Miles et al., 1978, Roman 1980, 1984, Hakansson, 1981, Joger, 1990, Chippaux, 1999, Spawls et al., 2002, Chirio & Ineich, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, Chirio, 2009, Chirio et al., 2011, Segniagbeto et al., 2011, Chirio, 2013 and Hughes, 2013.

Remarks: Type locality probably in the vicinity of Bouna (13°47'N, 0°06'W, elevation 320 m), Sahel Dept., NE Burkina Faso or Diébougou (10°58'N, 3°15'W, elevation 300 m), Sud-Ouest Dept., SW Burkina Faso as those localities were Lt. Greigert's habitation. A valid species *fide* Chirio et al., 2011. Previously a synonym of *P. meleagris*. Possibly occurs in N Uganda *fide* Spawls et al., 2002.

6. *Prosymna janii* Bianconi, 1862. Mem. Accad. Sci. Ist. Bologna (2) 1: 470–472, pl. 1, 4 figs.

Type: Holotype, MZUB, a 180 mm male.

Type locality: "Mosambicana" [= Mozambique]. Restricted to Inhambane, Mozambique *fide* W.C.H. Peters (1882a: 106).

Distribution: Southern Mozambique (Gaza, Inhambane, Maputo, Bazaruto, Benguera and Inhaca Is.) and ext. NE South Africa (E KwaZulu-Natal), NSL–80 m.

Sources: Jan & Sordelli, 1876 *in* 1870–1881, W.C.H. Peters, 1882d, V.F.M. FitzSimons, 1962a, 1974, Bruton & Haacke, 1975, Bourquin, 1977, Haacke & Bruton, 1978 and Broadley, 1990a, 1992a.

Remarks: Original description reprinted in Bianconi (1850–1870: 286–288, pl. 15, 4 figs. [pagination misprinted as 386–388]). Holotype head illustrated in Broadley (1980: fig. 1).

7. *Prosymna lineata* (W.C.H. Peters, 1871b). Mber. Königl. Akad. Wiss. Berlin 1871(11): 568–569. (*Temnorhynchus lineatus*)

Type: Holotype, ZMB 7257, a 126 mm specimen (Grützner).

Type locality: "Matlale (S Ostafrika)" [= Polokwane, cen. Limpopo Prov., N South Africa, 23º54'S, 29º27'E, elevation 1250 m].

Distribution: Southern Africa Central Mozambique (Nampula, Tete), Zimbabwe (Mashonaland East, Mashonaland Central, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands, Umtali), E Botswana (Central, Gaborone, Kweneng, North East, North West, Southern) and N South Africa (N KwaZulu-Natal, Limpopo, Mpumalanga), NSL–1250 m.

Sources: Broadley, 1980, 1983, 1999c, Auerbach, 1987, M. Griffin, 2003, Marais, 2004 and Broadley & Blaylock, 2013.

8. *Prosymna meleagris* (J.T. Reinhardt, 1843). Kgl. Danske Vidensk. Selsk. Natur. Math. Afh. 10: 238–241, pl. 1, figs. 4–6. (*Calamaria meleagris*)

Type: Lectotype, ZMUC 60618, a 215 mm male (J.R. Chenon, 1826–1836), designated by F.W. Braestrup *in* Hughes & Barry (1969: 1018).

Type locality: "Guinea" [= coast of Ghana *fide* Hughes & Barry, 1969: 1018] via lectotype selection. Restricted to vicinity of Accra, Ghana *fide* J.B. Rasmussen & Hughes (1997: 14, 16).

Distribution: West Africa. Eastern Senegal (Dakar, Fatick, Louga, Saint-Louis, Tambacounda, Ziguinchor), Guinea-Bissau (Oio), Guinea (Boké, Dubréka, Gaoual, Kindia, Mali, Télimélé), Sierra Leone, Liberia, Ivory Coast (Bouaké, Dabakala, Toumodi), Ghana (Accra, Central, Eastern, Northern, Upper East, Upper West, Volta, Western), S Togo (Centrale, Maritime, Plateaux), S Benin (Collines) and S Nigeria (Benue, Lagos, Plateau), NSL–1200 m.

Sources: Aylmer, 1922, Angel, 1933b, Villiers, 1950a, 1956b, 1975, Condamin & Villiers, 1962, Witte, 1962, Doucet, 1963, Papenfuss, 1969, Roux-Estève, 1969a, Hulselmans & Verheyen, 1970, Miles et al., 1978, Roman 1980, 1984, Joger, 1990, Largen & Rasmussen, 1993, J.B. Rasmussen & Hughes, 1997, Chippaux, 1999, Spawls et al., 2002, J.-F. Trape & Mané, 2006b, Largen & Spawls, 2009, Chirio et al., 2011, Segniagbeto et al., 2011, Auliya et al., 2012, Chirio, 2013 and Hughes, 2013.

9. *Prosymna ornatissima* T. Barbour & Loveridge, 1928. Mem. Mus. Comp. Zool. 50(2): 120–121, pl. 2, fig. 2.

Type: Holotype, MCZ 23271, a 286 mm female (A. Loveridge, 7 Oct. 1926).

Type locality: "Nyange, Uluguru Mountains, Tanganyika Territory, 2,500 ft." [= Nyange, N Morogoro Region, E Tanzania, elevation 760 m].

Distribution: East-central Tanzania (Uluguru Mtns. of N Morogoro), 760 m.

Source: Spawls et al., 2002.

10. *Prosymna pitmani* Battersby, 1951. Ann. Mag. Nat. Hist. (12) 4(44): 828–829.

Type: Holotype, BMNH 1950.1.3.96, a 309 mm male (C.J.P. Ionides, 1926–1951).

Type locality: "Kilwa, Southern Province, Tanganyika Territory." Restricted to Nanguale, Kilwa District [= Lindi Region, SE Tanzania, ca. 9°00'S, 39°00'E, elevation 150–200 m] *fide* Ionides *in* Loveridge (1958: 168).

Distribution: Southeastern Tanzania (Lindi, Mtwara) and S Malawi (Southern), 150–600 m.

Sources: Loveridge, 1955b, Stevens, 1974 and Spawls et al., 2002.

11. *Prosymna ruspolii* (Boulenger, 1896g). Ann. Mus. Civ. Stor. Nat. Genova (2) 17(37): 12. (*Asthenophis ruspolii*)

Synonyms: *Prosymna agrestis* Scortecci, 1929 and *Prosymna ruspolii keniensis* Broadley, 1980.

Type: Holotype, MSNG CE 29057, a 198 mm male (E. Ruspoli, 1893).

Type locality: "Magala Umberto I, Ganale Doria" [= Magala Umberto I, Ganale Doria River, S Bale Prov., SE Ethiopia, 4°18'N, 42°03'E, elevation 200 m].

Distribution: Northeastern Africa. Southern Ethiopia (Bale, Gemu Gofa, Sidamo), S Somalia (Bay, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Shabeellaha Hoose), NE Tanzania (Arusha) and NW Kenya (Rift Valley), NSL–1500 m.

Sources: Scortecci, 1929, 1930, 1939b, H.W. Parker, 1949, Lanza, 1983a, Largen & Rasmussen, 1993, Gravlund, 2000c, Spawls et al., 2002 and Largen & Spawls, 2010.

Remarks: H.W. Parker (1949: 65) and Loveridge (1958: 158) listed type locality as Magala, Umberto Island but Broadley (1980: 524) and Largen & Rasmeussen (1993: 402) listed it as Umberto I village on the Ganale Doria River.

12. *Prosymna semifasciata* Broadley, 1995b. Arnoldia, Zimbabwe 10(4): 30–31, fig. 1.

Type: Holotype, NMZB 13732, a 258 mm male (K.M. Howell, C.A. Msuya & W.T. Stanley, 22 July 1994).

Type locality: "Kwamgumi Forest Reserve, Muheza District, Tanga Region, Tanzania (4°56'S, 38°44'E) at approximately 230 m.a.s.l."

Distribution: Northeastern Tanzania (Tanga), 230 m. Known only from type locality.

Source: Spawls et al., 2002.

13. *Prosymna somalica* H.W. Parker, 1930d. Ann. Mag. Nat. Hist. (10) 6(35): 605–606.

Type: Holotype, BMNH 1946.1.5.42 (formerly BMNH 1930.5.9.12), a 193 mm male (R.H.R. Taylor, 1929–1930).

Type locality: "8° N. x 47° 22' E. 2000 feet, British Somaliland." Emended to The Haud, on the boundary between Italian and British Somaliland, [= The Haud, on the border between Nugaal Region, NW Somalia and Hararge Prov., E Ethiopia, 8°00'N, 47°22'E, elevation 610 m] *fide* H.W. Parker (1932b: 335, 364).

Distribution: Eastern Ethiopia (E Hararge) and N Somalia (Bari, Nugaal, Togdheer, Woqooyi Galbeed), 610–1525 m.

Sources: H.W. Parker, 1932b, 1949, Lanza, 1983a, Largen & Rasmussen, 1993 and Largen & Spawls, 2010.

14. *Prosymna stuhlmannii* (Pfeffer, 1893). Jahrb. Hamburg. Wiss. Anst. 10: 78–79, pl. 1, figs. 8–10. (*Ligonirostra stuhlmannii*)

Synonyms: *Prosymna vassei* Mocquard, 1906, *Prosymna variabilis* F. Werner, 1909d, *Stenorhabdium temporale* F. Werner, 1909d, and *Prosymna transvaalensis* Hewitt, 1910.
Types: Syntypes (3), ZMH 7910 (formerly ZMH 1646) and ZMH 521–22, longest syntype 190–200 mm (F. Stuhlmann, Sept. 1888).
Type locality: "Usambáa, Ostafrikanische" [= Usambara Mtns., N Tanga Region, NE Tanzania] *fide* Hallermenn (2006: 141).
Distribution: Eastern Africa. Extreme S Somalia (Jubbada Hoose), S Kenya (Coast, S Eastern, Rift Valley), SE Tanzania (Arusha, Dar es Salaam, Dodoma, Kilimanjaro, Lindi, Mbeya, Mtwara Piwani, Rukwa, Ruvuma, Tabora, Tanga, Kagera, Zanzibar Is.), SE Zambia (E Central, Eastern, Northern), S Malawi (Southern), Mozambique (Gaza, Inhambane, Maputo, Nampula, Sofala, Tete, Zambézia, Mozambique Is.), Zimbabwe (Manicaland, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matebeleland South), Swaziland and NE South Africa (KwaZulu-Natal,), NSL–1675 m.
Sources: Lanza, 1983a, 1990b, Broadley, 1992c, Broadley et al., 2003, Hallermann, 2006 and Broadley & Blaylock, 2013.

15. *Prosymna sundevallii* (A. Smith, 1849 *in* 1838–1849). Illust. Zool. So. Afr., Rept. (App.): 17–18. (*Temnorhynchus sundevallii*) (*nomen corrigendum*)

P

Synonyms: *Temnorhynchus sundervallii* A. Smith, 1849 *in* 1838–1849 *(nomen incorrigendum)* and *Rhinostoma cupreum* A.C.L.G. Günther, 1858.
Type: Holotype, NMSZ 1859.13.246 (formerly RSM), a 199 mm specimen (A. Smith, 1831–1834).
Type locality: "Kaffirland, to the eastward of the Cape Colony" [= KwaZulu-Natal, South Africal], (in error *fide* Broadley, 1980: 494). Corrected to Eastern or Western Cape Prov., South Africa *fide* Broadley (1980: 494).
Distribution: Southeastern Africa. Central Mozambique (Nampula, Tete), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), S Botswana (Central, SW Kgalagadi), Lesotho and South Africa (Eastern Cape, Free State, Gauteng, Limpopo, Western Cape), NSL–1800 m.
Sources: V.F.M. FitzSimons, 1962a, 1974, Broadley, 1965, Broadley & Cock, 1975, De Waal, 1978, Pienaar et al., 1983, Auerbach, 1987, Spawls et al., 2002 and M. Griffin, 2003.
Remarks: Specific epithet of *sundervallii* corrected to *sundevalli* in index and errata sheet. Natal [= KwaZulu-Natal], South Africa records need confirmation *fide* Broadley (1980: 507). Probably occurs in Namibia *fide* M. Griffin 2003.

16. *Prosymna visseri* V.F.M. FitzSimons, 1959. Ann. Transvaal Mus. 23(4): 408–409.

Type: Holotype, TMP 24531, a 307 mm male (C. Koch, Sept. 1956).
Type locality: "near Caracul, S. Angola" [= vicinity of Caraculo (15°01'S, 12°40'E, elevation 480 m), Namibe Prov., ext. SW Angola].
Distribution: Southwestern Angola (Benguela, Huíla, Namibe) and NW Namibia (E Kunene), 480–1250 m.
Sources: V.F.M. FitzSimons, 1962a, Branch, 1988, Broadley, 1990b and M. Griffin, 2003.

PROTOBOTHROPS Hoge & Romano-Hoge, 1983 (Viperidae)

Synonym: *Ceratrimeresurus* Liang & Liu *in* Liang, 2003.
Type species: *Bothrops flavoviridis* Hallowell, 1861.
Fossil records: Lower Miocene of Japan.
Distribution: Southern and SE Asia.
Sources: Hoge & Romano-Hoge, 1981a, 1983, Maes, 1989, Kraus et al., 1996, David & Ineich, 1999, McDiarmid et al., 1999, Toda et al., 1999, Malhotra & Thorpe, 2000, Ziegler et al., 2001, Gumprecht et al., 2004, Herrmann et al., 2004. Castoe & Parkinson, 2006, Gao et al., 2006b, 2007, Orlov et al., 2009, Yang et al., 2011, Liu et al., 2012 and Hoser, 2012d.
Remarks: A synonym of *Trimeresurus fide* Golay et al., 1993 and McDiarmid et al., 1999.

1. *Protobothrops cornutus* (M.A. Smith, 1930b). Ann. Mag. Nat. Hist. (10) 6(36): 682–683, 1 fig. (*Trimeresurus cornutus*)

Synonym: *Ceratrimeresurus shenlii* Liang and Liu *in* Liang, 2003.
Type: Holotype, BMNH 1946.1.19.25 (formerly BMNH 1930.11.16.2), a 587 mm female (J.T. Delacour & W. Lowe [Fifth Delacour-Lowe-Greenway-Poilane Mission], late Nov.–mid-Dec. 1929).
Type locality: "Fan-si-pan mountains, Chapa, a hill-station at 5000 feet altitude, Tonkin, Indo-China." [= Mt. Fan Si Pan, Sa Pa Distr., Lai Châu Prov., N Vietnam, ca. 22°18'N, 103°46'E *fide* Herrmann et al., 2004: 214].
Distribution: Northern Vietnam (Ha Giang, Ha Tinh, Lao Cai, Nghe An, Thua Thien-Hue) and S China (Hunan), 300–2000 m.
Sources: Ziegler et al., 2001, Orlov et al., 2003, Herrmann et al., 2004, Shiryaey et al., 2007, V.S. Nguyen et al., 2009, Quyet & Ziegler, 2009 and I. Das, 2010.
Remarks: Holotype listed as male in original description. *Ceratrimeresurus shenlii* is possibly a synonym *fide* Vogel, 2006, confirmed by David et al. (2008c: 17).

2. *Protobothrops dabieshanensis* X. Huang, Pan, Han, Zhang, Hou, Yu, Zheng & Zhang, 2012. Asian Herpetol. Res. 3(3): 213–216, figs. 1a–f.

Type: Holotype, AHU 2011-EE-Hp01, an 836 mm female (X. Huang, B.-W. Zhang & D.-M. Han, July 2011).
Type locality: "Yaoluoping Nature Reserve in the Dabie Mountains (116°04'12" N, 30°58'17" E, 1210 m a.s.l.)" [= Yaoluoping Nature Reserve, Dabie Mtns., SW Anhui Prov., SE China, 30°58'N, 116°04'E, elevation 1210 m].
Distribution: Southeastern China (SW Anhui), 1210 m.

3. *Protobothrops elegans* (Gray, 1849a). Cat. Snakes Brit. Mus.: 7. (*Craspedocephalus elegans*)

Synonyms: *Trimeresurus luteus* Boettger, 1895c and *Lachesis lutea* – Boettger, 1898.
Types: Syntypes (2), BMNH 1946.1.20.2 (formerly BMNH 1847.3.4.62) and BMNH 1946.1.19.31 (formerly BMNH 1847.3.4.64), an adult and juvenile (E. Belcher, 1843–1846).
Type locality: "West coast of (North?) America?" (in error). Corrected to Ishigakishima Is., Ryukyu Arch., S Japan *fide* Stejneger (1907: 477).
Distribution: Extreme S Japan (Ryukyus: Aragusukujima, Irimoteshima, Ishigakishima, Kayamajima, Kohamajima, Kuroshima, Miyakoshima, Sakishima and Taketomijima Is.).
Sources: Maki, 1931, Keegan & Yoshino, 1959, Takara, 1962, Koba & Kikukawa, 1976, M. Mori, 1984 and Toriba, 1989a–b.
Remarks: Closely related to, and sometimes a synonym of, *Protobothrops mucrosquamatus.*

4. *Protobothrops flavoviridis* (Hallowell, 1861). Proc. Acad. Nat. Sci. Philadelphia (1860) 12(11): 492–493. (*Bothrops flavoviridis*)

Synonyms: *Trimeresurus riukiuanus* Hilgendorf, 1880, *Trimeresurus riukianus* – Boulenger, 1896a, *Trimeresurus fravoviridis* – Takahashi, 1922 *(nomen incorrectum),* and *Trimeresurus flavoviridis tinkhami* Gloyd, 1955b.
Type: Holotype, ANSP, a mutilated specimen (Macomb [No. Pacific Explor. Exped.], April 1855), lost *fide* Stejneger (1907a: 476).
Type locality: "Amakarima Island, (one of the Loo-Choo group)" [= Keramashima, Keramashima group, cen. Ryukyu Arch., S Japan, 26°05'N, 127°15'E].
Distribution: Extreme S Japan (Ryukyus: Amamioshima, Gishifujima, Gusukujima, Hamahigajima, Hyanzajima, Iejima, Iheyajima, Ikeijima, Kakeromajima, Korijima, Kumejima, Kuroshima, Minnajima, Miyagijima, Ohajima, Okinawajima, Sesokojima, Tokashikijima, Tokunojima, Tonakijima, Ukejima, Ukibarujima, Yabuchijima, Yagachijima and Yorojima Is.), NSL–200 m.
Sources: Stejneger, 1907a, Maki, 1931, Takara, 1962, Leviton, 1968b, Koba, 1971, M. Mori, 1982, Nishimura, 1986, Shiroma & Kamura, 1987, Toriba, 1989a–b, Nishimura et al., 1991, Nishimura & Kamura, 1992, 1993, Nobusaka et al., 1994, Shiroma, 1997 and Rodda et al., 1999.

5. *Protobothrops jerdonii* (A.C.L.G. Günther, 1875). Proc. Zool. Soc. London 43(1): 233–234, pl. 34. (*Trimeresurus jerdonii*)

Synonyms: *Trimeresurus xanthomelas* A.C.L.G. Günther, 1889, *Lachesis melli* T. Vogt, 1922, *Trimeresurus jerdonii meridionalis* Bourret, 1935b *(nomen praeoccupatum), Trimeresurus jerdonii bourreti* Klemmer, 1963 *(nomen substitutum),* and *Protobothrops jordonii* – Yao, 2012 *(nomen incorrectum).*
Types: Syntypes (3), BMNH 1946.1.18.66–68 (formerly BMNH 1872.4.17.138, BMNH 1872.4.17.242 and BMNH 1872.4.17.267), two males and a female, longest syntype 711 mm (T.C. Jerdon, 1836–1852).
Type locality: "Khassya, northern India" [= Khasi Hills, E Meghalaya State, NE India, 25°35'N, 91°38'E, elevation 1370–1675 m].
Distribution: Southeastern Asia. Eastern Nepal (Dolakha), NE India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland), Bhutan, NW Myanmar (Chin, Kachin), S China (Gansu, Guangxi, Guizhou, Henan, Hubei, Hunan, Shaanxi, Shanxi, Sichuan, Yunnan, Xizang), Laos and N Vietnam (Lai Chau), 1200–2700 (3250) m.
Sources: A.C.L.G. Günther, 1892b, Wall, 1910i, 1925a, 1928, Bourret, 1935b, 1936b, C.H. Pope, 1935, M.A. Smith, 1935, C.-C. Liu, 1940, Kramer, 1977, Hu et al., 1980, Tian et al., 1986, Y.-X. Ahmed et al., 2009, V.S. Nguyen et al., 2009, Wangyal, 2011 and Yao, 2012.

6. *Protobothrops kaulbacki* (M.A. Smith, 1940c). Rec. Ind. Mus. 42(3): 485–486, pl. 8, fig. 5. (*Trimeresurus kaulbacki*)

Synonym: *Protobothrops kaulbachi* Kraus, Mink & Brown, 1996 *(nomen emendatum).*
Types: Syntypes (2), BMNH 1946.1.19.23–24 (formerly BMNH 1940.6.1.51–52), a 1390 mm female and 1340 mm male (R. Kaulbach, 1937–1939).
Type locality: "Trans-Himalayan region on the borders of Tibet and China, to the north of the tribal area generally known as the Triangle." Restricted to Pangnamdim, north of the Triangle, Upper Burma [= Pangnamdim, Nam Tamai Valley, Kachin Div., N. Myanmar, ca. 27°42'N, 97°54'E, elevation 1750 m] *fide* M.A. Smith (1943: 512).
Distribution: Northeastern India (Arunachal Pradesh), SW China (Xizang) and N Myanmar (Kachin), 1015–1750 m.

Sources: Kraus et al., 1996, Leviton et al., 2003 and I. Das, 2010, 2012.

7. *Protobothrops maolanensis* Yang, Orlov & Wang, 2011. Zootaxa (2936): 60–65, fig. 1.

Type: Holotype, SYS 211, an 805 mm male (S. Zheng & J.-H. Yang, 18 May 2010).
Type locality: "Maolan National Nature Reserve, Maolan town, Libo County, Guizhou, China (25º12'50.0"N, 107º59'56.04"E, 560 m a.s.l.)."
Distribution: Southern China (Guizhou), 560 m. Known only from type locality.
Source: Liu et al., 2012.

8. *Protobothrops mucrosquamatus* (Cantor, 1839a). Proc. Zool. Soc. London 7(1): 32. (*Trigonocephalus mucrosquamatus*)

Type: Lectotype, specimen illustrated in colored sketch of T.E. Cantor (1834–1837: no. 18) in RSL, designated by M.A. Smith (1943: 507).
Type locality: "Naga Hills, Assam" [= Nagaland State, NE India].
Distribution: Southeastern Asia. Northeastern India (Arunachal Pradesh, Nagaland), Bangladesh, N Myanmar (Kachin), SE China (Anhui, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hainan, Hunan, Jiangxi, Shaanxi, Sichuan, Yunnan, Zhejiang), Taiwan (Chiai, Pingtung, Taichung, Taipei), Laos (Khammouan) and N Vietnam (Bac Kan, Cao Bang, Gia Lai, Ha Giang, Hai Duong, Hai Phong, Ha Tay, Ha Tinh, Kon Tum, Lang Son, Lao Cai, Nghe An, Ninh Binh, Quang Ninh, Quang Tri, Thai Nguyen, Thua Thien-Hue, Vinh Phuc, Hon Nor Way Is.), 100–1830 m.
Sources: A.C.L.G. Günther, 1864a, Maki, 1933a–b, C.H. Pope, 1929, 1935, Bourret, 1936b, 1939d, C.S. Wang & Wang, 1956, Kuntz, 1963, Hu et al., 1980, Lue et al., 1989, Lue, 1990, M.-H. Huang, 1990, Zhang & Zhao, 1990, Orlov, 1997, Darevsky, 1999, Orlov et al., 2000, 2001, Leviton et al., 2003, Ao et al., 2004, P. Guo et al., 2006a–b, Ziegler et al., 2006, Bain et al., 2007, B.L. Stuart & Heatwole, 2008, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010, 2012 and Yao, 2012.
Remarks: Holotype lost *fide* A.C.L.G. Günther (1864a: 390).

P

9. *Protobothrops tokarensis* (Nagai, 1928). Surv. Nat. Hist. Kagoshima 3: 6, 3 pls. (*Trimeresurus tokarensis*)

Type: Holotype, KMJ (K. Nagai, 1922–1928), lost [probably during World War II] *fide* McDiarmid et al. (1999: 347).
Type locality: "Takarashima, Prov. Kagoshima" [= Takarajima, Tokara Group, N Ryukyu Arch., ext. S Japan, 29°09'N, 129°13'E].
Distribution: Extreme S Japan (Ryukyus: Kotakarajima and Takarajima Is.), NSL–100 m.
Sources: Maki, 1931, Takara, 1962, Koba & Kikukawa, 1969, 1971, Koba et al., 1970, M. Mori, 1984 and Toriba, 1989a–b.

10. *Protobothrops trungkhanhensis* Orlov, Ryabov & Nguyen, 2009. Russ. J. Herp. 16(1): 71–74, figs. 1–4.

Type: Holotype, ZISP 25351, a 733 mm male (T.T. Nguyen, N.L. Orlov & S.A. Ryabov, Sept. 2008).
Type locality: "Trung Khanh Nature Reserve, Trung Khanh district, Cao Bang Province, N-E Vietnam, elevation 600 m."
Distribution: Northern Vietnam (Cao Bang), 600 m. Known only from type locality.
Source: Ziegler & Nguyen, 2010.

11. *Protobothrops xiangchengensis* (Zhao, Jiang & Huang, 1978). Mater. Herpetol. Res. Chengdu 4: 21. (*Trimeresurus xiangchengensis*)

Type: Holotype, CIB 725049 or CIB 725050, a 741 mm male (17 Oct. 1972).
Type locality: "Sichuan Province, Xiangcheng, altitude 3100 m,"
Distribution: China (W Sichuan, Yunnan), 3000–3200 m.
Sources: Zhao, 1979a, Zhang & Zhao, 1990, Zhao & Adler, 1993, David & Tong, 1997, P. Guo et al., 1999b, 2006b and G. Peng & Fuji, 2001
Remarks: Supplemental original escription in Zhao (1979a: 422–424, fig. 1). Photographs of the holotype in Orlov et al. (2009: figs. 12–13). Holotype listed as CIB 725049 (*fide* Zhao, 1979a) and CIB 725050 (*fide* Zhao et al., 1978). Collection date of type listed as 10 Oct. 1972 *fide* David & Tong (1997: 20). Probably a synonym of *Trimeresurus* (= *Protobothrops*) *mucrosquamatus fide* McDiarmid et al. (1999: 348). P. Guo et al., 2006b indicated a close relationship to *P. jerdoni*.

PSAMMODYNASTES A.C.L.G. Günther, 1858 (Elapoidea *incertae sedis*)

Synonyms: *Psammodytes* – Gervais *in* d'Orbigny, 1847b *(nomen incorrectum), Psamodynastes* – Palacky, 1898 *(nomen incorrectum), Anisodon* Rosén, 1905a *(nomen praeoccupatum), Anisodontes* Rosén, 1905b *(nomen susbstitutum), Psalmodynastes* – E.H. Taylor, 1917 *(nomen incorrectum), Psammodinastes* – Scortecci, 1929 *(nomen incorrectum), Psammdynastes* – Maki, 1931 *(nomen incorrectum), Psamnodynastes* – Reeves, 1933 *(nomen incorrectum), Psammodynates* – Briceño-Rossi, 1934 *(nomen incorrectum), Psammodymastes* – Majupuria, 1981 *(nomen incorrectum),* and *Psamaodynastes* – W.W. Tanner & Avery, 1982 *(nomen incorrectum).*
Type species: *Psammophis pulverulenta* H. Boie *in* F. Boie, 1827.
Distribution: Southeastern Asia and East Indies.

Sources: J.G. Fischer, 1885a, Mocquard, 1887d, 1888, Rooij, 1917, C. Haas, 1950, Tweedie, 1983, Stuebing, 1991, David & Vogel, 1996, Vidal et al., 2008, Kelly et al., 2009 and I. Das, 2007b, 2010, 2012.

1. *Psammodynastes pictus* A.C.L.G. Günther, 1858. Cat. Colub. Snakes Brit. Mus.: 251–252.

Synonym: *Psammophis conjunctus* W.C.H. Peters, 1868a.
Types: Syntypes (4), BMNH 1946.1.8.54–55, two males (E. Belcher, 1843–1847) and BMNH 1946.1.8.56 and BMNH 1946.1.9.88, two females (T.S.B. Raffles, 1805–1824), longest syntype 432 mm.
Type locality: "Borneo" and "India," (latter in error *fide* A.C.L.G. Günther, 1864a: 292). Raffles syntype locality corrected to Sumatra *fide* Boulenger (1896a: 174) [= Kalimantan and Sumatra, Indonesia]. Restricted to Sumatra *fide* C. Haas (1950: 584).
Distribution: Malay Peninsula and Greater Sundas. West Malaysia (Johore, Selangor, Terengganu), Singapore, East Malaysia (Sabah, Sarawak), Brunei and W Indonesia (Bangka, Belitung, Bintan, Galang, Kalimantan, Mentawai Arch., Riau Arch., Simeulue, Sulawesi, Sumatra), NSL–300 m.
Sources: Chasen & Smedley, 1927, B.L. Lim, 1963 and K.K.P. Lim & Chou, 1990.
Remarks: India and Bangladesh records doubtful. Sulawesi specimens probably introduced *fide* I. Das (2010: 339).

2. *Psammodynastes pulverulentus* (H. Boie *in* F. Boie, 1827). Isis von Oken 20(6): 547–548. (*Psammophis pulverulenta*)

Synonyms: *Psammophis pulverulenta* H. Boie in Schlegel, 1826a *(nomen nudum), Psammophis pulverulenta* Schlegel, 1826b *(nomen nudum), Dipsas ferruginea* Cantor, 1839b, *Psammophis floresianus* Bleeker, 1859b (*nomen nudum*), *Lycodon bairdii* Steindachner, 1867a, *Anisodon lilljeborgi* Rosén, 1905a, and *Psammodynastes pulverulentus papenfussi* Zhao, 1995.
Type: Lectotype, RMNH 765 (H. Boie & H.C. Macklot, Dec. 1825–Sept. 1827), designated by R.F. Inger herein.
Type locality: "Java" [SW Indonesia].
Distribution: Southeastern Asia and East Indies. Northeastern India (Andhra Pradesh, Arunachal Pradesh, Assam, Meghalaya, Mizoram, Nagaland, N Orissa, Sikkim, Uttar Pradesh, N West Bengal), Nepal (Ilam, Khotang, Udayapur, Rupandehi), Bhutan, SE Bangladesh (Chittagong), Myanmar (Bago, Kachin, Mon, Sagaing, Shan, Tanintharyi, Yangon), S China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hunan, Jiangxi, Yunnan, Xizang, Lanyu Is.), Taiwan (Changhwa, Hsinchu, Pingtung, Taichung, Taipei, Botel-Tobago and Batan Is.), Vietnam (Bac Kan, Dac Lac, Dong Nai, Gia Lai, Hai Duong, Hai Phong, Ha Tinh, Hoa Binh, Ho Chi Minh City, Khanh Hoa, Lam Dong, Lang Son, Nghe An, Phu Yen, Quang Binh, Quang Ninh, Son La, Tay Ninh, Thai Nguyen, Thanh Hoa, Thua Thien-Hue, Vinh Phuc), Laos (Attapu, Champasak, Savannakhet, Vientiane, Xiangkhouang), Cambodia (Kampot, Koh Kong, Kampong Chhnang, Oddar Meanchey), Thailand (Chanthaburi, Chiang Mai, Chon Buri, Kanchanaburi, Khon Kaen, Ko Chang, Krabi, Loei, Lop Buri, Nakhon Ratchasima, Nakhon Si Thammarat, Narathiwat, Nong Khai, Pattani, Phetchabun, Phrae, Phuket, Prachin Buri, Ranong, Rayong, Sakon Nakhon, Surat Thani, Ubon Ratchathani, Chang Is.), West Malaysia (Pahang, Perak, Pinang, Perlis, Selangor, Tioman Is.), East Malaysia (Sabah, Sarawak), Brunei, Indonesia (Alor, Bali, Bawean, Buton, Bangka, Bintan, Enggano, Flores, Great Natuna, Java, Kalimantan, Komodo, Lombien, Lombok, Natuna Arch., Pador, Riau Arch., Rinca, Sangihe Arch., Siau, Selantan, Siberut, Simeulue, Sula, Sulawesi, Sumatra, Sumba, Sumbawa, Tengah, Togian Arch., Utara) and Philippines (Balabac, Basilan, Bohol, Bongao, Busuanga, Camiguin, Dinagat, Jolo, Leyte, Luzon, Mindanao, Negros, Palawan, Panay, Polillo, Sabtán, Samar, Siargao), NSL–2000 m.
Sources: Wall, 1910g, 1912c, M.A. Smith, 1922b, 1930a, 1940b, 1943, E.H. Taylor, 1922a, 1965, Kopstein, 1927, 1930, 1938, 1941, K.P. Type species: *Coluber sibilans* Linnaeus, 1758.

Distribution: Africa and S Asia.

Fossil records: Fossils unassigned to species include upper Miocene (Turolian, MN 13: 4.9–7.3 mya) of Spain.

Sources: H. Boie, 1826, Boulenger, 1895h, F. Werner, 1924c, Loveridge, 1940, Broadley, 1977b, 1983, 2002, Brandstätter, 1995, 1996, Hughes, 1999, Gravlund, 2001, Nagy et al., 2003, Lawson et al., 2005, Chippaux, 2006, Kelly et al., 2008, 2009, Vidal et al., 2008, Zaher et al., 2009, Hoser, 2012u and Szyndlar, 2012.

Remarks: *Rhamphiophis acutus* transferred to *Psammophis fide* Kelly et al., 2008.

1. *Psammophis acutus* A.C.L.G. Günther, 1888c. Ann. Mag. Nat. Hist. (6) 1(3): 327–328, pl. 19, fig. d.

Synonyms: *Rhamphiophis acutus wittei* Laurent, 1956a and *Rhamphiophis acutus jappi* Broadley, 1971a.

Type: Holotype, BMNH 1946.1.2.81 (formerly BMNH 1864.7.13.36), a 914 mm male (F.M.J. Welwitsch, 18 Oct. 1856–11 June 1857).

Type locality: "Pungo Andongo" [= Pedras Negras, NW Malanje, N Angola, 9°40'S, 15°35'E, elevation 1100–1265 m].

Distribution: Southern Africa. Gabon (Haut-Ogooué), S Congo, SE Democratic Republic of the Congo (Katanga), Angola (Benguela, Bié, Huambo, Huíla, Lunda Norte, Malanje), Rwanda, W Burundi (Gitega, Ruyigi), W Tanzania (Iringa, Kigoma, Mbeya, Rukwa), N Malawi (Northern) and Zambia (Luapula, Northern, North-Western, Western), 450–1815 m.

Sources: Loveridge, 1933, Witte, 1953, 1962, 1966, Laurent, 1956, Vesey-FitzGerald, 1958, Broadley & Pitman, 1960, Ashe, 1965, Broadley, 1971a, Derleyn et al., 1983, Spawls et al., 2002, Broadley et al., 2003 and Segniagbeto et al., 2011.

Remarks: Previously in the genus *Rhamphiophis*. Probably occurs in N Malawi *fide* Broadley (1971a: 3) and N Namibia *fide* M. Griffin, 2003.

2. *Psammophis aegyptius* Marx, 1958b. Fieldiana: Zool. 39(18): 194–198, figs. 30c, 31c.

Type: Holotype, FMNH 75092 (formerly CNHM 75092), an 1183 mm male (R.E. Kuntz & G. M. Malakatis).

Type locality: "near the government house at Siwa, Siwa Oasis, Western Desert Governate, Egypt" [= Siwa, Siwa Oasis, W Matrouh Govern., NW Egypt, 29°12'N, 25°31'E, elevation BSL].

Distribution: North Africa and Israel. Southeastern Algeria (Illizi, Tamanrasset), S Libya (Al Kurfah, Murzuq), N Niger (Agadez), N Chad (Kanem), Sudan (Al Khartum), Egypt (Assiut, Aswan, El-Bahr El-Ahmar, Matrouh, New Valley, Qena, Sohag, South Sinai, Suez, Giftun El Saghir, Shadwan and Tiran Is.) and ext. S Israel (S Southern), BSL–1500 m.

Sources: Kramer & Schnurrenberger, 1963, Schleich et al., 1996, Bouskila & Amitai, 2001, Baha El Din, 2006, J.-F. Tarpe & Mané, 2006b and Bar & Haimovitch, 2011.

Remarks: Previously a subspecies of *P. schokari*.

3. *Psammophis angolensis* (Bocage, 1872). J. Sci. Math. Phys. Nat., Lisboa 4(13): 82. (*Amphiophis angolensis*)

Synonym: *Ablabes homeyeri* W.C.H. Peters, 1877d.

Type: Holotype, MBL (F.A.P. Bayão, 1868), destroyed by fire 18 March 1978.

Type locality: "Dondo (intérieur d'Angola)" [= Dondo, north bank of Kwanza River, SW Cuanza Norte Distr., NW Angola, 09°41'S, 14°26'E, elevation 50 m].

Distribution: Southern Africa. Northwestern Ethiopia (Gojjam), Tanzania (Dar es Salaam, Dodoma, Iringa, Lindi, Morogoro, Mbeya, Mtwara, Mwanza, Piwani, Ruvuma, Shinyanga, Singida, Tabora, Zanzibar Is.), SE Democratic Republic of the Congo (Katanga), Angola (Benguela, Cuanza Norte, Cuanza Sul, Cunene, Luanda, Lunda Norte, Malanje, Moxico, Huíla, Zaire), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), S Mozambique (Gaza, Inhambane, Sofala, Zambézia), N Namibia (Caprivi, Kunene, Okavango, Oshikoto), N Botswana (North West), Zimbabwe (Bulawayo, Manicaland, Mashonaland East, Mashonaland Central, Mashonaland West, Masvingo, Matebeleland North, Matebeleland South, Midlands) and NE South Africa (Limpopo, Mpumalanga), NSL–2000 m.

Sources: Bocage, 1895, Monard, 1937, Laurent, 1950c, 1954a, 1964a, Witte, 1953, 1962, Mertens, 1955, 1971, Sweeney, 1961, V.F.M. FitzSimons, 1962a, 1974, Laurent, 1964a, Noble, 1966, Bourgeois, 1967, Broadley, 1971d, Pienaar et al., 1983, Auerbach, 1987, Broadley & Howell, 1991, Largen & Rasmussen, 1993, Broadley, 2002, Spawls et al., 2002, Broadley et al., 2003, Marais, 2004, Largen & Spawls, 2010 and Broadley & Blaylock, 2013.

Remarks: Type locality has been variously cited as Danda, Loanda Distr. (Loveridge, 1940: 68 and Broadley, 1962c: 834), Donda, Loanda Distr. (V.F.M. FitzSimons, 1962a: 235 and Auerbach, 1987: 171), Dondo, Luanda Distr. (Crawford-Cabral & Mesquitela, 1989), all of which are incorrect. Loveridge (1957a: 280) and Hellmich (1957b: 42) correctly located Dondo on the north bank of the Kwanza River, Cuanza Norte

P

Distr., Angola. Free State, South Africa record rejected by Hewitt (1912b: 25) and Loveridge (1940: 69).

4. *Psammophis ansorgii* Boulenger, 1905d. Ann. Mag. Nat. Hist. (7) 16(92): 113, pl. 4, fig. 4.

Type: Holotype, BMNH 1946.1.8.49, a 700 mm male (W.J. Ansorge, end of 1904).

Type locality: "between Benguella and Bihé, Angola."

Distribution: Central Angola (E Benguella, Huambo), 1800 m.

Sources: Loveridge, 1940, Helmich, 1957b and Broadley, 2002, 2005.

5. *Psammophis biseriatus* W.C.H. Peters, 1881d. Sitz. Ges. Naturf. Freunde Berlin 1881(6): 88.

Type: Holotype, ZMB 9394, a male (J.M. Hilderbrandt, 1878–1881).

Type locality: "Taita (Africa orientalis)" [= Taita, S Rift Valley, S Kenya, 1°40'N, 36°10'E, elevation 665 m].

Distribution: Eastern Africa. Eritrea (Southern Red Sea: Dahlak Is.), S Ethiopia (Bale, Gemu Gofa, Hararge, Sidamo), Djibouti, Somalia (Bakool, Bay, Galguluud, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Mudug, Nugaal, Sanaag, Sool, Shabeellaha Dhexe, Shabeellaha Hoose, Coiama Is.), E Kenya (Coast, Eastern, North-Eastern, N Rift Valley, Patta Is.) and NE Tanzania (Arusha, Dodoma, Iringa, Kilimanjaro, Tabora), NSL–1300 m.

Sources: Stejneger, 1894b, Bezy & Drewes, 1985, Broadley & Howell, 1991, Largen & Rasmussen, 1993, Vernet, 2000, Spawls et al., 2002 and Largen & Spawls, 2010.

Remarks: Type locality (Taita Distr.) and Ukamba Distr. (1°29'S, 37°17'E) visited by Hildebrandt before traveling to Mombasa *fide* W.C.H. Peters (1878: 194), suggesting type locality is Taita rather than Taita Hills, W of Voi, Kenya.

6. *Psammophis brevirostris* W.C.H. Peters, 1881d. Sitz. Ges. Naturf. Freunde Berlin 1881(6): 89.

Type: Lectotype, ZMB 7256A, designated by Broadley (1977b: 19).

Type locality: "Matlale Mission, near Pietersburg, Transvaal" [= Matlale Mission, near Polokwane (23°53'S, 29°27'E, elevation 1315 m), Limpopo Prov., NE South Africa] via lectotype selection.

Distribution: Southern Africa. Southeastern Zimbabwe (Manicaland, Mashonaland East, Matebeleland South), S Mozambique (Maputo), E Botswana (Central, Ghanzi, Kweneng, North East, South East), Swaziland (Maputo) and E South Africa (Eastern Cape, Gauteng, E KwaZulu-Natal, Limpopo, Mpumalanga, North-West), NSL–2000 m.

Sources: Auerbach, 1987, Broadley, 2002, M. Griffin, 2003 and Broadley & Blaylock, 2013.

Remarks: Photograph of lectotype in Broadley (1977b: pl. 3a).

7. *Psammophis elegans* (G. Shaw, 1802). Gen. Zool., Amph. 3(2): 536. (*Coluber elegans*)

Synonym: *Psammophis elegans univittatus* Perret, 1961.

Type: Lectotype, BMNH 1946.1.8.8, a 610 mm specimen, designated by K.L. Williams & Smith (1962: 300).

Type locality: "South America," (in error) via lectotype selection. Corrected to West Africa *fide* Boulenger (1896a: 168).

Distribution: West Africa. Southern Mauritania (Hodh El Gharbi, Trarza), Senegal (Dakar, Fatick, Kédougou, Kolda, Matam, Saint-Louis, Tambacounda, Thiès, Ziguinchor), Gambia (Western), Guinea–Bissau (Biombo, Bissau, Oio, Tombali, Bolama Is.), Guinea (Boffa, Kouroussa, Nzérékoré, Télimélé), Sierra Leone (Eastern, W Northern, Southern), SW Mali (Kayes, Koulikoro, Mopti), Ivory Coast (Abidjan, Bouaké, Bouna, Fekéssédougou, Toumodi), Burkina Faso (Centre, Centre-Est, Centre-Nord, Centre-Ouest, Est, Haute-Bassins, Sahel, Sud-Ouest, Volta-Noire), Ghana (Central, Northern, Upper East, Upper West, Volta, Tumbo Is.), Togo (Kara, Plateaux), N Benin (Alibori, Atakora, Borgou, Cotonou, Zou), S Niger (Dosso, S Maradi, Niamey, S Zinder), Nigeria (Delta, Kaduna, Lagos, Plateau, Sokoto), N Cameroon (Adamaoua, Extreme-Nord, Nord) and Central African Republic (Bamingui-Bangoran, Sangha), NSL–1475 m.

Sources: Angel, 1933b, Villiers, 1950a, 1951b, 1952b, 1953, 1954a, 1956b, 1963, 1975, Perret, 1961, Doucet, 1963, Menzies, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, J Papenfuss, 1969, Roux-Estève, 1969a, W. Böhme, 1978, Roman, 1980, Joger, 1981, 1990, Hughes, 1983, 2013, Roman, 1984, Chippaux, 2006, Chirio & Ineich, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, Chirio, 2009, 2013, Ullenburch et al., 2010, Segniagbeto et al., 2011 and Auliya et al., 2012.

Remarks: Original description based on Seba (1735: 59, pl. 60, fig. 1) from Nova Hispaniâ (= Mexico & Central America *fide* Wallach, 2011: 6). Official Specific Name no. 2046 *fide* Opinion 717 (ICZN, 1965a).

8. *Psammophis jallae* Peracca, 1896c. Boll. Mus. Zool. Anat. Comp. Univ. Torino 11(255): 2–4, 2 figs.

Synonyms: *Psammophis rohani* Angel, 1921b and *Psammophis longirostris* V.F.M. FitzSimons, 1932.

Types: Syntypes (2), MZUT 1633 and MZUT 1871 (formerly MZUT 1823a–b) (L. Jalla).

Type locality: "Strada da Kazungula a Buluwaio, Zambese" [= road between Kazungula (17°13'S, 25°51'E, elevation 1135 m), Southern Prov., Zambia to Bulawayo (20°10'S, 28°35'E, elevation 1380 m), Bulawayo Prov., W Zimbabwe].

P

Distribution: Southern Africa. Southeastern Angola (Bié, Cuando Cubango), SE Democratic Republic of the Congo (S Katanga), W Zambia (Western), Zimbabwe (Bulawayo, Mashonaland East, Matebeleland North, Matebeleland South, Midlands), NE Namibia (Okavango, Otjozondjupa), Botswana (Central, Ghanzi, Kgatleng, Kweneng, North West, Southern) and NE South Africa (Limpopo), 600–1500 m.

Sources: Mertens, 1955, 1971, V.F.M. FitzSimons, 1962a, Witte, 1962, Broadley, 1971d, Broadley & Cock, 1975, Auerbach, 1985, 1987, Broadley, 2002, Broadley et al., 2003, M. Griffin, 2003, Marais, 2004 and Broadley & Blaylock, 2013.

9. *Psammophis leightoni* Boulenger, 1902f. Proc. Zool. Soc. London 72(1): 126, pl. 12.

Type: Holotype, BMNH 1946.1.8.27, a 910 mm specimen (G. Leighton).

Type locality: "Eerste River Station, 21 miles east of Cape Town, Cape Colony" [= Eerste River Station, SW Western Cape Prov., SW South Africa, 34°05'S, 18°46'E, elevation 10 m].

Distribution: Extreme SW South Africa (SW Western Cape), NSL–185 m.

Sources: V.F.M. FitzSimons, 1962a, 1974 and Broadley, 1975, 2002.

Remarks: Possibly not a valid species *fide* Kelly et al. (2008: 1053).

10. *Psammophis leopardinus* Bocage, 1887a. J. Sci. Math. Phys. Nat., Lisboa 11(44): 206–207. (*Psammophis sibilans leopardinus*)

P

Type: Lectotype, MBL 1798, designated by Broadley (1977b: 18), destroyed by fire 18 March 1978.

Type locality: "Catumbela, Angola" [= Catumbela, NW Benguela Distr., W Angola, 12°26'S, 13°33'E, elevation 25 m] via lectotype selection.

Distribution: Southwestern Angola (Benguella, Huíla, Namibe) and Namibia (Erongo, Hardap, Khomas, Kunene, Okavango, Oshikoto, Otjozondjupa), 25–1500 m.

Sources: Bocage, 1887d, Broadley, 1977, 2002, Elzen, 1980, Hughes, 1999 and M. Griffin, 2003.

11. *Psammophis mossambicus* W.C.H. Peters, 1882d. Reise Mossambique, Zool. 3: 122. (*Psammophis sibilans mossambica*)

Synonyms: *Psammophis sibilans tettensis* W.C.H. Peters, 1882d and *Psammophis thomasi* Gough, 1908.

Type: Lectotype, ZMB 2468A (W.C.H. Peters, June 1843–Aug. 1847), designated by Broadley (2002: 96).

Type locality: "Insel Mossambique" [= Mozambique Is., Mozambique] via lectotype selection.

Distribution: Eastern Africa. Sudan Sudan, Uganda (Central, Eastern, Northern, Western), SW Kenya (S Coastal, S Eastern, Nyanza, Rift Valley, Western), Tanzania (Arusha, Dar es Salaam, Dodoma, Iringa, Kigoma, Kilimanjaro, Lindi, Mara, Mbeya, Morogoro, Mtwara, Mwanza, Piwani, Rukwa, Ruvuma, Shinyanga, Singida, Tabora, Tanga, Kagera), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Katanga, Kinshasa, Orientale), Angola (Huíla, Lunda Norte, Moxico), Mozambique (Cabo Delgado, Gaza, Inhambane, Manica, Maputo, Nampula, Niassa, Sofala, Zambézia), Malawi (Central, Northern, Southern), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), N Botswana (Central, Ghanzi, North West), N Namibia (Khomas, Kunene, Okavango, Otjozondjupa), Swaziland and NE South Africa (KwaZulu-Natal, Limpopo, Mpumalanga), NSL–1500 m.

Sources: Mertens, 1955, 1971, Sweeney, 1961, Witte, 1962, Laurent, 1964a, Thys van den Audenaerde, 1965, Pienaar et al., 1983, Broadley & Howell, 1991, Boycott & Culverwell, 1992, Branch & McCartney, 1993, Hughes, 1999, Broadley, 2002, Clauss & Clauss, 2002, Spawls et al., 2002, Broadley et al., 2003, M. Griffin, 2003 and Broadley & Blaylock, 2013.

Remarks: Taxonomy of *P. sibilans* complex *(mossambicus-occidentalis-phillipsii-rukwae-sibilans)* unresolved and therefore ranges are only approximate.

12. *Psammophis namibensis* Broadley, 1975. Arnoldia, Rhodesia 7(13): 9–11, pl. 1. (*Psammophis leightoni namibensis*)

Type: Holotype, TMP 37093, a 885+ mm female (W.D. Haacke, 12 May 1969).

Type locality: "Harus in the Uri-Hauchab Mountains, Diamond Area No. 2, South West Africa" [= NW Karas Prov., SW Namibia, 25°21'S, 15°10'E, elevation 465 m].

Distribution: Southwest Africa. Southwestern Angola (Namibe), W Namibia (Erongo, Hardap, Karas, Kunene) and NW South Africa (NW Northern Cape), NSL–1500 m.

Sources: Broadley, 2002 and M. Griffin, 2003.

Remarks: Possibly not a valid species *fide* Kelly et al. (2008: 1053).

13. *Psammophis notostictus* W.C.H. Peters, 1867c. Mber. Königl. Akad. Wiss. Berlin 1867(4): 237. (*Psammophis moniliger notostictus*)

Synonym: *Psammophis sibilans stenocephalus* Bocage, 1887a.

Types: Syntypes (2), ZMB 5756a–b (C.H. Hahn, 1844–1867).

Type locality: "Otjimbingue in Südwestafrica" [= Otjimbingwe, SE Karibib Distr., cen. Namibia, 22°21'S, 16°08'N, elevation 900 m].

Distribution: Southwestern Africa. Southwestern Angola (Namibe), Namibia (Erongo, Hardap, Karas, Khomas, Kunene, Omaheke, Oshikoto, Otjozondjupa), ext. SW Botswana (SW Kgalagadi), W Lesotho and W South Africa (Eastern Cape, S Free State, Northern Cape, Western Cape), NSL–1500 m.

Sources: Bocage, 1887d, Mertens, 1955, 1971, V.F.M. FitzSimons, 1962a, 1974, Broadley, 1975, 1977b, 2002, De Waal, 1978, Elzen, 1980, Auerbach, 1987, M. Griffin, 2003, Marais, 2004 and Broadley & Blaylock, 2013.

14. *Psammophis occidentalis* F. Werner, 1919. Denkschr. Akad. Wiss. Wien, Math.-Natur. Kl. 96: 504. (*Psammophis subtaeniatus occidentalis*)

Synonym: *Psammophis irregularis* Fischer, 1856b *(nomen oblitum).*

Type: Lectotype, NMW 19245.2, a 511+ mm female, designated by Hughes & Wade (2004: 129).

Type locality: "Congo" via lectotype selection.

Distribution: West Africa. Southern Mauritania (Assaba, Guidimaka, Hodh El Gharbi), Senegal (Dakar, Diourbel, Fatick, Kaolack, Kédougou, Kolda, Louga, Matam, Saint-Louis, Tambacounda, Thiès, Ziguinchor), Gambia (MacCarthy Island, Western), Guinea-Bissau (Bissau, Cacheu, Gabú, Tombali, Bolama Is.), Guinea (Beyla, Dubréka, Kérouané, Macenta, Nzérékoré, Yomou, Los Is.), Sierra Leone (Eastern, Northern, Southern, Western, Bunce Is.), Liberia (Monrovia, Montserrado, Nimba), S Mali (S Gao, Kayes, Koulikoro, Mopti, Ségou, Sikasso, Tahoua, S Tombouctou), Ivory Coast (Abidjan, Daloa, Toumodi), Burkina Faso (Centre, Centre-Est, Centre-Nord, Centre-Ouest, Est, Haute-Bassins, Nord, Sahel, Sud-Ouest, Volta-Noire), Ghana (Accra, Northern, Volta), Togo (Centrale, Kara, Maritime, Plateaux, Savanes), Benin (Atakora, Borgou), S Niger (Agadez, Diffa, Dosso, Maradi, Niamey, Zinder), Nigeria (Akwa Ibom, Bauchi, Borno, Cross River, Delta, Gongola, Kano, Kwara, Niger, Plateau, Rivers), S Cameroon (Centre, Est, Littoral, Nord-Ouest, Ouest, Sud, Sud-Ouest), Central African Republic (Bamingui-Bangoran, Nana-Mambere, Ouham, Ouham-Pende, Vakaga), Equatorial Guinea, Gabon (Ogooué-Ivindo, Ogooué-Maritime) and S Congo (Bouenza, Brazzavillle, Kouilou), 20–2000 m.

Sources: Menzies, 1966, Hakansson, 1981, J.-F. Trape & Roux-Estève, 1995, W. Böhme et al., 1996, Hughes & Wade, 2004, Luiselli et al., 2004b, Chirio & Ineich, 2006, J.F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, Kelly et al., 2008, 2011, Pauwels & Vande Weghe, 2008, Segniagbeto et al., 2011 and Auliya et al., 2012.

Remarks: A valid species *fide* Kelly et al., 2008. In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Psammophis subtaeniatus occidentalis* Werner is designated a *nomen protectum* and *Psammophis irregularis* Fischer a *nomen oblitum*. Taxonomy of *P. sibilans* complex *(mossambicus-occidentalis-phillipsii-rukwae-sibilans)* unresolved and therefore ranges are only approximate.

15. *Psammophis orientalis* Broadley, 1977b. Arnoldia, Rhodesia 8(12): 17–18. (*Psammophis subtaeniatus orientalis*)

Type: Holotype, MCZ 146965, a 972 mm female (A. Loveridge, 23 Sept. 1917).

Type locality: "Morogoro, Tanzania" [= Morogoro, Morogoro Prov., E Tanzania, 6°49'S, 37°40'E, elevation 510 m].

Distribution: Eastern Africa. Southwestern Sudan (Janub Darfur), S South Sudan (Eastern Equatoria, Western Equatoria), E Kenya (Coast, Eastern, Lamu Is.), E Tanzania (Arusha, Dar es Salaam, Dodoma, Kigoma, Kilimanjaro, Mbeya, Morogoro, Mtwara, Mwanza, Shinyanga, Singida, Tabora, Tanga, Zanzibar Is.), Mozambique (Gaza, Inhambane, Manica, Maputo, Sofala, Tete, Zambézia, Bazaruto and Benguela Is.), Malawi (Central, Northern, Southern) and E Zimbabwe (Manicaland, Masvingo), NSL–1300 m.

Sources: Steehouder, 1992b, Broadley, 2002, Spawls et al., 2002 and Broadley & Blaylock, 2013.

Remarks: A valid species *fide* Spawls et al. (2002: 405).

16. *Psammophis phillipsii* (Hallowell, 1844c). Proc. Acad. Nat. Sci. Philadelphia (1844–1845) 2(6): 169. (*Coluber phillipsii*)

Synonym: *Psammophis regularis* Sternfeld, 1908b.

Type: Lectotype, ANSP 5112, a female (S.M.E. Goheen, 1836–1838), designated by Broadley (1977b: 24); longest syntype 1006 mm.

Type locality: "Liberia, West coast of Africa," via lectotype selection.

Distribution: West Africa. Senegal (Tambacounda), Gambia (Western), Guinea-Bissau (Bubaque, Soga and Uno Is.), Guinea (Dubréka, Kouroussa, Macenta, Nzérékoré, Télimélé), Liberia (Montserrado, Margibi), S Ivory Coast (Abidjan, Daloa, Lagunes, Toumodi), S Ghana (Accra), S Togo (Centrale, Kara, Maritime, Plateaux, Savanes), S Benin (Atlantique, Borgou, Collines, Zou), S Nigeria (Akwa Ibom, Cross River, Delta, Rivers), Cameroon (Adamaoua), Gabon, Congo (Brazzaville, Cuvette, Kouilou, Plateau, Pool), Central African Republic (Bamingui-Bangoran, Gribingui, Haute-Kotto, Haute-Sangha, Kemo-Gribingui, Lobaye, Mbomou, Ombella-Mpoko, Ouaka, Ouham, Ouham-Pende, Sangha), NSL–1200 m.

Sources: Sternfeld, 1908b–c, 1909a–b, Angel, 1933b, Villiers, 1950a, 1954a, 1959, 1963, 1975, E.H. Taylor & Weyer, 1958, Broadley, 1959, 1971d, 1977b, 1983, Doucet, 1963, Knoepffler, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, Roux-Estève, 1969a,

Roman, 1980, 1984, Hakansson, 1981, Hughes, 1983, 1999, 2013, J.A. Butler & Reid, 1986, Joger, 1990, Gruschwitz et al., 1991, D.P. Lawson, 1993, J.-F. Böhme et al., 2011, Segniagbeto et al., 2011 and Chirio, 2013.

Remarks: Taxonomy of *P. sibilans* complex *(mossambicus-occidentalis-phillipsii-rukwae-sibilans)* unresolved and therefore ranges are only approximate.

17. *Psammophis pulcher* Boulenger, 1895h. Proc. Zool. Soc. London 63(3): 537–538, pl. 30, figs. 3–3a.

Type: Holotype, BMNH 1946.1.8.50 (formerly BMNH 1895.6.11.7), a 435 mm female (A. Donaldson-Smith, 24 Dec. 1894).

Type locality: "Webi Shebeli, Galla or western Somaliland" [= Webi Shebeli, Dacata River, SE Hamarro Hadad, Hararge Prov., E Ethiopia, 7°20'N, 42°17'E, elevation 500–600 m].

Distribution: Southeastern Ethiopia (Hararge), S Somalia and S Kenya (SW Coast, S Eastern), 400–820 m.

Sources: Drewes & Spawls, 1973, Spawls, 1978, Largen & Rasmussen, 1993, Spawls et al., 2002 and Largen & Spawls, 2010.

18. *Psammophis punctulatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 897–898.

Synonyms: *Dendrophis furcata* Bianconi, 1859, and *Psammophis punctulatus trivirgatus* W.C.H. Peters, 1878.

P

Type: Holotype, MNHN 6552, a 1230 mm specimen (B. d'Arnaud [Second-White Nile Exped.], Nov. 1840–April 1841).

Type locality: "Arabie" [= Arabia] (in error). Corrected herein to Nile River, bet. Al Khartum (15°35'N, elevatuon 390 m), An Nil Al Abyad Prov., SE Sudan, and Juba (4°42'N, elevation 500 m), Upper Nile, Jonglei or Central Equatoria Prov., South Sudan].

Distribution: Eastern Africa. Extreme SE Egypt (SE El-Bahr El-Ahmar), E Sudan (An Nil Al Abyad, An Nil Al Azraq, Ash Shaqiyah, Sennar), South Sudan, Eritrea (Anseba, Gash-Barka, Northern Red Sea, Southern Red Sea), Ethiopia (Bale, Geua Gofa, Hararge, Kefa, Shoa, Sidamo), Djibouti, Somalia (Awdal, Bakool, Bay, Galguduud, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mudug, Nugaal, Shabeellaha Dhexe, Shabeellaha Hoose, Togdheer, Woqooyi Galbeed), NE Uganda (NE Northern), Kenya (Coast, Eastern, Rift Valley, North-Eastern), NE Tanzania (Arusha, Kilimanjaro), NSL–1400 m.

Sources: H,W. Parker, 1932b, 1936c, 1949, Pitman, 1974, Spawls, 1978, Lanza, 1983a, 1990b, Schätti, 1989, Broadley & Howell, 1991, Largen & Rasmussen, 1993, Spawls et al., 2002, Baha El Din, 2006 and Largen & Spawls, 2010.

Remarks: Loveridge (1940: 21) correctly suspected erroneous type locality data for *P. punctulatus* (Arabia) and *Dendrophis furcata* (Mozambique). Concerning the former, B. d'Arnaud collected on two White Nile expeditions with G. Thibaut and Sabatier (1840–1842).

19. *Psammophis rukwae* Broadley, 1966c. Arnoldia, Rhodesia 2(36): 3–4. (*Psammophis sibilans rukwae*)

Synonym: *Psammophis leucogaster* Spawls, 1983.

Type: Holotype, NMZB 4212 (formerly NMSR 4212), a 1255 mm male (L.D.E.F. Vesey-FitzGerald, 23 Nov. 1959).

Type locality: "Kafukola, Rukwa Valley, Tanganyika at 2,600 feet" [= Kafukola, S Rukwa Region, SW Tanzania, 8°05'S, 31°57'E, elevation 790 m].

Distribution: West, cen. and E Africa. Western Senegal (Dakar, Saint-Louis, Thiès), N Ghana (Northern, Upper West), Burkina Faso (Est, Nord), Togo, N Benin (Borgou), Niger (Dosso, Niamey), Nigeria (Borno, Gongola, Kaduna), S Algeria (Tamanrasset), N Cameroon (Nord), S Chad, Central African Republic, SW Sudan (Janub Darfur), S South Sudan (Eastern Equatoria), E Uganda (N Eastern), SW Kenya (S Rift Valley) and W Tanzania (Arusha, Dodoma, Mwanza, Rukwa, Shinyanga), NSL–1675 m.

Sources: W. Böhme, 1975, 1978, 1986, Joger, 1981, 1982, Spawls, 1983, Largen & Rasmussen, 1993, Chippaux, 1999 and Spawls et al., 2002.

20. *Psammophis schokari* (Forskål, 1775). Descr. Animal.: 14–15. (*Coluber schokari*)

Synonyms: *Coluber gemmatus* G. Shaw, 1803, *Coluber lacrymans* A. Reuss, 1834, *Psammophis punctatus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Psammophis punctatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Psammophis sibilans hierosolimitana* Jan, 1863b (*nomen nudum*), *Psammophis sibilans hierosolimitana* Jan, 1870 *in* Jan & Sordelli, 1866–1870, *Psammophis sindanus* Stoliczka, 1872a, and *Psammophis sibilans teknae* Valverde, 1989a.

Type: Neotype, FMNH 66153, a 763 mm male (H. Hoogstraal & R.E. Kuntz, 27 Jan. 1951), designated by Marx (1988: 13–14).

Type locality: "Hodeida (= Al Hudaydah), Yemen" [= Al Hudaydah, Al Hudaydah Prov., W Yemen, 14°48'N, 42°57'E, elevation NSL] via neotype selection.

Distribution: Northern Africa, Middel East and SW Asia. Morocco (Agadir, Azilal, Boulemane, Chechaouene, Essaouira, Figuig, Nador, Khenitra, Khemisset, Kaar es Souk, Marrakech, Nador, Oujda, Ouarzazate, Rabat, Tan Tan, Tata, Taza, Tiznit), Algeria (Adrar, Annaba, Béchar, Biskra, El Bayadh, El Oued Laghouat, M'Sila, Naama, Ouargla), S Tunisia (Gabès, Gafsa, Nabeul, Sfax, Sidi Bou Zid, Sousse, Tataouine), Libya (Ajdabiya,

Al Jabal, Al Jufrah, Al Khums, Al Kurfah, Az Zawiyah, Banghazi, Butnan, Gharyan, Ghat, Misratah, Murzuq, Nalut, Sabha, Surt, Tarabulus), Egypt (Alexandria, Aswan, Beheira, Cairo, El-Bahr El-Ahmar, Faiyum, Giza, Ismailia, Matrouh, New Valley, North Sinai, Port Said, Qena, Sharkeya, South Sinai, Suez, Shadwan Is.), Western Sahara (Rio de Oro, Saguia El Hamra), W Mauritania (W Adrar, Brakna, Inchiri, Tagant, Trarza), Senegal (Dakar, Saint-Louis), N Mali (Tombouctou), N Niger (Agadez), N Chad, N Sudan (El-Bahr El-Ahmar, Al Khartum, An Nil Al Abyad, An Nil Al Azraq, Ash Shamaliyah, Janub Kurdufan, Shamal Darfur, Shamal Kurdufan), Eritrea (Central, Gash-Barka, Northern Red Sea), Ethiopia (E Hararge), Djibouti, N Somalia (Awdal, Bari, Sanaag, Sool, Togdheer, Woqooyi Galbeed), Jordan (Ajloun, Amman, Aqaba, Irbid, Karak, Maan, Mafraq, Tafilah, Zarqa), Israel (Central, Gaza Strip, Golan Heights, Haifa, Jerusalem, Northern, Southern, Tel Aviv, West Bank), Lebanon (Beirut, El Jnoub), S Syria, Saudi Arabia (Asir, Bahah, Eastern, Ha'il, Jawf, Jazan, Madinah, Makkah, Northern, Qasim, Riyadh, Tabuk, Farasan Is.), Bahrain and Sitra Is., Kuwait, United Arab Emirates (Abu Dhabi, Dubai, Fujairah, Ras al Khaimah, Sharjah), Oman (Batinah, Janubiah, Muscat, Sharqiyah, Masirah Is.), Yemen (Abyan, Ad Dali', Aden, Al Hudaydah, Dhamar, Hadhramaut, Lahij, Sana'a, Shabwah, Ta'izz, Kamaran Is.), S Iraq (Al Anbar, Al Basrah, Maysan), Iran (Central, Esfahan, Fars, Kerman, Khuzestan, Mazandaran, Razavi Khorasan, Semnan, Sistan va Baluchestan, Yazd), S Turkmenistan, S Afghanistan (Helmand, Kandahar Nangarhar, Nimroze), Pakistan (Balochistan, F.A.T.A., Jammu & Kashmir, Khyber Pakhtunkhwa, Punjab, Sindh) and NW India (Gujarat, Maharashtra, Rajasthan), NSL–2400 m.

Remarks: Syntypes in ZMUC lost *fide* F.W. Braestrup *in* Kramer & Schnurrenberger (1963: 516). Photographs and illustrations of neotype in Marx (1988: figs. 2–5).

21. *Psammophis sibilans* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 222. (*Coluber sibilans*)

Synonyms: *Coluber moniliger* Daudin, 1803d, *Coluber auritus* I. Geoffroy-Saint-Hilaire, 1827, *Psammophis irregularis* J.G. Fischer, 1856b, *Psammophidion smithii* Fitzinger, 1861, *Psammophis sibilans intermedius* J.G. Fischer, 1884a, and *Psammophis silvomarginata* Brandstätter, 1995 (*nomen ineditum*).

Type: Holotype, ZMUU 42 (formerly MP 30), a 950 mm specimen.

Type locality: "Asia," (in error). Corrected to Africa *fide* J. Anderson (1898: 305) and Flower (1933: 824). Restricted to Egypt *fide* Loveridge (1953: 274).

Distribution: Northeastern Africa. Egypt (Assiut, Aswan, Beheira, Beni Suef, Cairo, Faiyum, Gharbia, Giza, Ismailia, Matrouh, Minya, North Sinai, Qena, Sohag), SE Sudan (Al Khartum, An Nil Al Abyad, An Nile Al Azraq, Sennar, South Sudan (Bahr al Ghazal, Eastern Equatoria), Eritrea (Anseba, Central, Northern Red Sea, Southern), Ethiopia (Arussi, Bale, Gemu Gofa, Gojjam, Gondar, Hararge, Ilubabor, Kefa, Shoa, Sidamo, Tigre, Wollega, Wollo), Somalia (Hiraan, Jubbada Dhexe, Jubbada Hoose, Togdheer, Sanaag, Shabeellaha Dhexe, Shabeellaha Hoose, Woqooyi Galbeed), Kenya (Central, Coast, Eastern, Nairobi, North-Eastern, Nyanza, Rift Valley, Western), Uganda (Acholi, Ankole, Bukedi, Bunyoro, Busoga, East Mengo, Karamoja, Lango, Madi, Masaka, Sebei, Teso, Toro, West Mengo, West Nile, Sese Is.), Tanzania (Arusha, Dar es Salaam, Dodoma, Kilimanjaro, Morogoro, Mtwara, Piwani, Singida, Tanga, Zanzibar, Ukwere Is.), NE Democratic Republic of the Congo (E Kivu E Orientale), Rwanda (Butare, Byumba, Kibungo) and Burundi (Muyinga, Ngozi, Ruyigi), NSL–2500 m.

Sources: Loveridge, 1936c, 1953, Marx, 1958, 1988, Broadley, 1959, 1971d, 1983, Sweeney, 1961, Witte, 1962, 1966, Blackwell, 1967, V.F.M. FitzSimons, 1974, Pitman, 1974, Spawls, 1978, Roman, 1980, 1984, Lanza, 1983a, 1990b, Boycott & Culverwell, 1992, Steehouder, 1992b, Largen & Rasmussen, 1993, Hughes, 1999, Ibrahim, 2002 and Largen & Spawls, 2010.

Remarks: Holotype illustrated in J. Anderson (1898: fig. 12) and Brandstätter (1996: fig. 25). Original description based on A. Seba (1735: 52–53, pl. 52, fig. 4; 1735: 57, pl. 56, fig. 4; 1735: 115, pl. 107, fig. 4). Taxonomy of *P. sibilans* complex *(mossambicus-occidentalis-phillipsii-rukwae-sibilans)* unresolved and therefore ranges are only approximate. Multiple records from Guinea and Benin *fide* Chirio (2013: 83) and Hughes (2013: 123).

22. *Psammophis subtaeniatus* W.C.H. Peters, 1882d. Reise Mossambique, Zool. 3: 121–122. (*Psammophis sibilans subtaeniatus*)

Synonyms: *Psammophis moniliger bilineatus* W.C.H. Peters, 1867c *(nomen rejiciendum), Psammophis*

bocagii Boulenger, 1895h, and *Psammophis transvaalensis* Gough, 1908.

Type: Lectotype, ZMB 9992A (W.C.H. Peters, June 1843–Aug. 1847), designated by Broadley (1977b: 13).

Type locality: "Tete" [= Tete, Tete Prov., W Mozambique, 16°10'S, 33°36'E, elevation 125 m] via lectotype selection.

Distribution: Southern Africa. Southwestern Angola (Benguela, Cunene, Namibe), S Zambia (Central, Eastern, Southern, Western), S Malawi (Southern), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), Botswana (Central, Gaborone, Ghanzi, Kgatleng, Kweneng, North West, North East, South East, Southern), N Namibia (Caprivi, Erongo, Khomas, Kunene, Okavango, Omaheke, Oshikoto, Otjozondjupa), Mozambique (Gaza, Tete), Swaziland and NE South Africa (Limpopo, Mpumalanga, North West), 35–1500 m.

Sources: Mertens, 1955, Laurent, 1956a, Broadley, 1959, 1966c, 1971d, 1990, 1992a, Sweeney, 1961, Witte, 1962, 1975, V.F.M. FitzSimons, 1974, Pitman, 1974, Broadley & Cock, 1975, Spawls, 1978, Pienaar et al., 1983, Auerbach, 1987, W. Böhme, 1987, Broadley & Howell, 1991, Boycott & Culverwell, 1992, Chippaux, 1999, Broadley, 2002, Clauss & Clauss, 2002, Broadley et al., 2003 and Broadley & Blaylock, 2013.

Remarks: Official Specific Name no. 2801 *fide* Opinion 1210 (ICZN, 1982c).

23. *Psammophis sudanensis* F. Werner, 1919. Denkschr. Akad. Wiss. Wien, Math.-Natur. Kl. 96: 504. (*Psammophis sibilans sudanensis*)

P

Synonym: *Psammophis leucogaster* Spawls, 1983.

Type: Lectotype, NMW 19086, a male (F. Werner [Kordofan Zool. Exped.], 28 March 1914), designated by Tiedemann et al. (1994: 73).

Type locality: "Kasugli, S-Kordofan, Anglo-ägyptischen Sudan" [= Kadugli, Janub Kurdufan Prov., S Sudan, 11°01'N, 29°43'E, elevation 510 m] via lectotype selection.

Distribution: West, cen. and E Africa. Western Guinea (Boké, Télimélé), S Benin (Atlantique, Zou), N Cameroon (Extreme-Nord, Nord), Central African Republic (Ouham, Ouham-Pende, Vakaga), S Sudan (Janub Kurdufan), E Uganda (Eastern, E Northern), Kenya (SW Coast, Eastern, Nairobi, Nyanza, N Rift Valley, Western), and NE Tanzania (Arusha, Dar es Salaam, Dodoma, Kilimanjaro, Pwani, Singida, Tabora), NSL–2700 m.

Sources: Spawls, 1983, W. Böhme, 1986, 1987, Hughes, 1999, Spawls et al., 2002, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Ullenburch et al., 2010, Chirio, 2013 and Hughes, 2013.

24. *Psammophis tanganicus* Loveridge, 1940. Bull. Mus. Comp. Zool. 87(1): 57–60. (*Psammophis biseriatus tanganicus*)

Type: Holotype, MCZ 30380, a 633 mm female (A. Loveridge, 12 Dec. 1929).

Type locality: "Mangasini, Usandawi, central Tanganyika Territory" [= Mangasini, NW Singida Region, cen. Tanzania, ca. 4°53'S, 34°09'E, elevation 1110 m].

Distribution: Northeastern Africa. Southern Libya (Awbari), Sudan (El-Bahr El-Ahmar, Shamal Kurdufan), Eritrea (Southern Red Sea), E Ethiopia (Bale, Hararge, Shoa, Sidamo), W Somalia (Awdal, Bakool, Bari, Gedo, Nugaal, Sanaag, Togdheer, Woqooyi Galbeed), Kenya (SW Coast, Eastern, North-Eastern, N Rift Valley), E Uganda (Eastern) and NE Tanzania (Dodoma, Kilimanjaro, Singida), 1000–1700 m.

Sources: Corkill, 1935, Scortecci, 1936, Kramer & Schnurrenberger, 1963, Pitman, 1974, Spawls, 1978, Lanza, 1983a, Bezy & Drewes, 1985, Largen & Rasmussen, 1993, Spawls et al., 2002 and Largen & Spawls, 2010.

Remarks: Broadley & Howell (1991: 27) listed type locality as Kwa Mtoro, Dodoma Region, 5°14'S, 35°26'E, elevation 1185 m.

25. *Psammophis trigrammus* A.C.L.G. Günther, 1865. Ann. Mag. Nat. Hist. (3) 15(86): 95, pl. 2, fig. e.

Type: Holotype, BMNH 1946.1.8.12 (formerly BMNH 1864.7.11.4), a 1180–1219 mm male (F.F. Monteiro, 1864).

Type locality: "on the banks of the river S. Nicolao (Little Fish Bay, West Africa)," (partly in error). Corrected to Mossamedes [= Rio São Nicolau or Bentiaba River, N Namibe Distr., SW Angola, 14°16'S, 12°23'E, elevation 10–100 m] *fide* Bocage (1887c: 206).

Distribution: Southwestern Africa. Southwestern Angola (Namibe), W Namibia (Erongo, Hardap, Karas, Khomas, Kunene, Okavango, Otjozondjupa) and ext. W South Africa (W Northern Cape), NSL–1500 m.

Sources: Mertens, 1955, 1971, V.F.M. FitzSimons, 1974 and Broadley, 1983, 2002.

26. *Psammophis trinasalis* F. Werner, 1902. Verh. Zool. Bol. Ges. Wien 52(1): 340. (*Psammophis sibilans trinasalis*)

Synonym: *Psammophis moniliger furcatus* W.C.H. Peters, 1867c (*nomen praeoccupatum*).

Type: Lectotype, ZFMK 30503, a 663 mm male (F. Werner, 1900), designated by Elzen (1980: 343).

Type locality: "Windhoek, Deutsch-Südwest-Afrika" [= Windhoek, Khomas Distr., cen. Namibia, 22°34'S, 17°05'E, elevation 1665 m] via lectotype selection.

Distribution: Southern Africa. Southwestern Angola (Namibe), Namibia (Erongo, Hardap, Karas, Khomas, Kunene, Okavango, Omaheke, Oshikoto, Otjozondjupa),

Botswana (Central, Ghanzi, Kgalagadi, Kweneng, North West, Southern), and N South Africa (Eastern Cape, Free State, Gauteng, Limpopo, Mpumalanga, N Northern Cape, North West), NSL–1665 m.

Sources: Mertens, 1955, 1971, Buys & Buys, 1983, Broadley, 2002, M. Griffin, 2003 and Broadley & Blaylock, 2013.

Remarks: Photograph of lectotype in Elzen (1980: fig. 3a), who stated it to be female.

27. *Psammophis zambiensis* Hughes & Wade, 2002. Bull. Brit. Mus. Nat. Hist. (Zool.) 68(2): 75–77, figs. 1–3.

Type: Holotype, BMNH 1959.1.1.81 (formerly IRSNB), a female (H.J. Bredo, 1943–1944).

Type locality: "Abercorn (now Mbala)" (in error). Probably from Mweru Wantipa, Mporokoso Distr., N Northern Prov., Zambia *fide* Vesey-FitzGerald *in* Hughes & Wade (2002: 79).

Distribution: Southeastern Democratic Republic of Congo (Katanga) and N Zambia (Central, Luapula, Northern, North-Western), 1000–1750 m.

Sources: Broadley et al., 2003 and Broadley & Cotterill, 2004.

PSAMMOPHYLAX Fitzinger, 1843 (Psammophiidae)

Synonyms: *Cerastes* Wagler, 1830 *(nomen praeoccupatum), Trimerorhinus* A. Smith, 1847, *Psammophilax* – Doumergue, 1901 *(nomen incorrectum), Trimerhinus* – Bogert, 1942b *(nomen incorrectum),* and *Trimerirhinus*– Anthony, 1955 *(nomen incorrectum).*

Type species: *Coluber rhombeatus* Linnaeus, 1758.

Distribution: Eastern and S Africa.

Sources: V.F.M. FitzSimons, 1962a, 1966, 1974, Broadley, 1977a, 1983, Branch, 1988, Marais, 1992, Gravlund, 2002, Vidal & Hedges, 2002, Kelly et al., 2008, 2009, Vidal et al., 2008 and Zaher et al., 2009.

1. *Psammophylax multisquamis* (Loveridge, 1932a). Proc. Biol. Soc. Washington 45: 84–85. (*Trimerorhinus tritaeniatus multisquamis*)

Type: Holotype, MCZ 18213, an 804 mm female (A. Loveridge, 21 Aug. 1915).

Type locality: "Nairobi, Kenya Colony" [= Nairobi, cen. Nairobi Prov., S Kenya, 1°18'S, 36°49'E, elevation 1675 m].

Distribution: Northeast Africa. Central Ethiopia (Arussi, Bale, Gojjam, Hararge, Kefa, Shoa, Sidamo), S Kenya (Central, S Eastern, Nairobi, S Rift Valley, Western), N Rwanda (Kibungo) and N Tanzania (Arusha, Dodoma, Iringa, Mbeya, Rukwa, Shinyanga), 600–3350 m.

Sources: Spawls et al., 2002 and Largen & Spawls, 2010.

Remarks: A valid species *fide* Spawls et al., 2002 and Kelly et al., 2008. A synonym of *P. variabilis fide* Largen & Spawls, 2010.

2. *Psammophylax rhombeatus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 220. (*Coluber rhombeatus*)

Synonyms: *Coronella tygrina* Laurenti, 1768, *Coluber aristotelis* Merrem, 1820, *Psammophylax ocellatus* Bocage, 1873a, *Psammophylax rhombeatus trilineata* Boettger, 1883b, *Psammophylax rhombeatus biseriata* F. Müller, 1893, and *Psammophis longementalis* Roux, 1907c.

Types: Syntypes (2), NHR 1232 (formerly MAFR & NHR 28), NHR 1233 (formerly MAFR & NHR 26), NHR 1234 (formerly MAFR & NHR 26), NHR 1236 (formerly MDG) and/or NHR 1240, a 600 mm and 480+ mm specimen (Mus. Drottn.).

Type locality: "Indiis" [= India] (in error). Corrected to South Africa *fide* V.F.M. FitzSimons (1962a: 210). Restricted to SW Western Cape Prov., South Africa *fide* Broadley (1977a: 17).

Distribution: Southern Africa. Southwestern Angola (Cunene, Huíla), W Namibia (Erongo, Karas, Kunene), W Swaziland, NW Lesotho and South Africa (Eastern Cape, E Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, Northern Cape, Western Cape), NSL–1500 m.

Sources: De Waal, 1978, R.M. Douglas, 1992 and Cottone & Bauer, 2010.

Remarks: Possibly occurs in Gaborone, Botswana *fide* Auerbach (1985: 35).

3. *Psammophylax togoensis* (Matschie, 1893b). Mitt. Forsch. Gelehrt. Deutsch. Schutzgeb. 6(3): 212–213. (*Psammophis togoensis*)

Synonym: *Rhamphiophis acutus garambensis* Witte, 1959.

Type: Holotype, ZMB 13249 (H.E. Kling, 26 Oct. 1891–4 Mar. 1892, and R. Büttner, 1890–1891).

Type locality: "Hinterlande von Togo," [= interior of Togo].

Distribution: West and cen. Africa. Guinea (Kouroussa), Ivory Coast (Toumodi), Ghana (Brong-Ahafo, Volta), Togo (Centrale, Plateaux), Cameroon (Adamaoua, Nord, Sud-Ouest), Congo (Cuvette, Plateau), W Central African Republic (S Ouham-Pendé or N Nana Nambere), NE Democratic Republic of the Congo (Oriental), W South Sudan (Western Equatoria) and W Uganda (S Northern, N Western), 200–1000 m.

Sources: Hughes & Barry, 1969, Broadley, 1971a, Hughes, 1983, Chirio & Ineich, 1991, J.-F. Trape & Roux-Estève, 1995, Chippaux, 2006, Chirio & LeBreton, 2007 and Segniagbeto et al., 2011.

Remarks: A valid species *fide* Segniagbeto et al. (2012: 347). Probably occurs in Burkina Faso and Nigeria *fide*

Hughes (1983: 353) and possibly occurs in Benin *fide* Hughes (2013: 152).

4. *Psammophylax tritaeniatus* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 423–424, pl. 19, fig. h. (*Rhagerrhis tritaeniata*)

Synonyms: *Coronella tritaenia* A.C.L.G. Günther, 1881c and *Psammophylax tritaeniatus fitzgeraldi* Broadley, 1960.

Type: Holotype, BMNH 1946.1.2.78 (formerly BMNH 1853.8.17.9), a 508 mm male (Warwick).

Type locality: "South-eastern Africa." Restricted to Rhodesia or the Transvaal [= Zimbabwe or Limpopo/ Mpumalanga, South Africa] *fide* Broadley (1977a: 17).

Distribution: Southern Africa. Southeastern Democratic Republic of the Congo (Katanga), S Tanzania (Arusha, Lindi, Mbeya, Mtwara, Rukwa, Ruvuma, ext. N Singida), S Angola (Benguella, Cuando Cubango, Cunene, Huambo, Huíla, Moxico, Namibe), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), Mozambique (Cabo Delgado, Manica), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matebeleland North, Matebeleland South, Midlands), Botswana (Central, Gaborone, Kgatleng, Kweneng, North West, South East, Southern), Namibia (Erongo, Khomas, Kunene, Ohangwena, Okavango, Omaheke, Omasati, Oshana, Oshikoto, Otjozondjupa) and N South Africa (Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, E Northern Cape), 35–2200 m.

Sources: Mertens, 1955, 1971, Witte, 1962, Broadley, 1971d, De Waal, 1978, Elzen, 1980, Pienaar et al., 1983, Auerbach, 1987, Broadley & Howell, 1991, Clauss & Clauss, 2002, Spawls et al., 2002, Broadley et al., 2003 and Broadley & Blaylock, 2013.

5. *Psammophylax variabilis* A.C.L.G. Günther, 1892a. Proc. Zool. Soc. London 60(4): 557–558, pl. 35.

Synonyms: *Psammophylax tritaeniatus festivus* Laurent, 1956a, *Psammophylax tritaeniatus subniger* Laurent, 1956a, and *Psammophylax tritaeniatus vanoyei* Laurent, 1956a.

Types: Syntypes (4), BMNH 1946.1.2.66–69 (formerly BMNH 1892.12.31–34), three males and one female, longest syntype 622 mm (A. Whyte, 1891–1892, via H.H. Johnston).

Type locality: "Shiré Highlands south of Lake Nyassa, principally upon Mount Zomba and Mount Milanji, Nyassaland" [= Shire Highlands, mainly Mt. Zomba (ca. 15°21'S, 35°18'E) and Mt. Mulanji (ca. 16°00'S, 35°33'E), Southern Region, S Malawi, elevation 1000–2000 m].

Distribution: Southeastern Africa. Eastern Democratic Republic of the Congo (Katanga, Kivu, Orientale), S Rwanda, N Burundi (Bururi, Muramvya, Ngozi), S Tanzania (Iringa, Mbeya), Zambia (Eastern, Northern, Western), S Malawi (Southern), N Mozambique (Niassa), NE Namibia (E Caprivi) and ext. N Botswana (N North West), 1000–3500 m.

PSEUDAGKISTRODON Van Denburgh, 1909 (Natricidae)

Synonyms: *Pseudoagkisrrodon* – Maki, 1933 *(nomen incorrectum)* and *Pseudoagkistrodon* – Maki, 1931 *(nomen incorrectum).*

Type species: *Macropisthodon rudis* Boulenger, 1906a.

Distribution: Eastern Asia.

Sources: Takahashi, 1930, Maki, 1931, C.H. Pope, 1935, C.-S. Wang & Wang, 1956, Kuntz, 1963, Hu et al., 1980, Tian et al.,1986, B.-H. Li, 1987, K.-Y. Lue, 1987, 1990, McDowell, 1987, K.Y. Lue et al., 1989, M.-H. Huang, 1990, Zhao & Adler, 1993 and Xiang & Li, 2009.

1. *Pseudagkistrodon rudis* (Boulenger, 1906a). Ann. Mag. Nat. Hist. (7) 17(102): 568. (*Macropisthodon rudis*)

Synonyms: *Pseudagkistrodon carinatus* Van Denburgh, 1909, *Natrix namiei* Oshima, 1910, *Macropisthodon rudis melanogaster* Mell, 1922, and *Macropisthodon rudis multiprefrontalis* Zhao & Jiang, 1981.

Type: Holotype, BMNH 1946.1.13.82, a 590 mm male (F.J. Dymond).

Type locality: "Tongchuan fu, Yunnan" [= Dongchuan, Kunming, N Yunnan Prov., S China, 26°05'N, 103°11'E, elevation 1310 m].

Distribution: Southeastern China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hunan, Jiangxi, Sichuan, Yunnan, Zhejiang) and Taiwan (Hsinchu, Pingtung, Taichung, Taipei), 300–2300 m.

PSEUDALSOPHIS Zaher, Grazziotin, Cadle, Murphy, Moura-Leste & Bonatto, 2009 (Xenodontidae)

Type species: *Lygophis elegans* Tschudi, 1845.

Distribution: Galapagos Arch. and W South America.

Fossil records: Holocene of Galapagos Islands (Floreana).

Sources: Steindachner, 1876, S.W. Garman, 1892a, Van Denburgh, 1912b, Steadman, 1986, Zaher et al., 2009 and Vidal et al., 2010.

1. *Pseudalsophis biserialis* (A.C.L.G. Günther, 1860a). Proc. Zool. Soc. London 28(1): 97–98. (*Herpetodryas biserialis*)

Synonyms: *Dromicus chamissonis habelii* Steindachner, 1876, and *Dromicus biserialis eibli* Mertens, 1960
Type: Holotype, BMNH 1946.1.4.56, a 362 mm female (C. Darwin, Sept. 1835).
Type locality: "Charles Island (Galapagos Islands)" [= Floreana Is., Galapagos Arch., Ecuador].
Distribution: Ecuador (Galapagos Arch.: Champion, Floreana, Gardner, San Cristóbal).
Sources: Van Denburgh, 1912b, Steadman et al., 1984, Steadman, 1986, Mertens, 1960 and R.A. Thomas, 1997.
Remarks: Original description reprinted in A.C.L.G. Günther (1860k: 78–79).

2. *Pseudalsophis dorsalis* (Steindachner, 1876). Schlangen Galapagos: 306–309, pl. 1, figs. 1, 1a–c. (*Dromicus chamissonis dorsalis*)

Synonyms: *Herpetodryas dorsalis* Günther *in* Steindachner, 1876 *(nomen nudum)* and *Dromicus chamissonis habelli* Steindachner, 1876.
Types Syntypes (2), NMW 25168.1–2, longest syntype 990 mm (Habel, 1868).
Type locality: "Galapagos-Inseln" [= Galapagos Is.]. Restricted to Santa Cruz Is. *fide* R.A. Thomas (1997: 36).
Distribution: Ecuador (Galapagos Is.: Baltra, Bartólome, Rábida, Santiago, Santa Cruz, Santa Fé).
Remarks: NMW catalogue lists type locality as Indefatigable (= Santa Cruz) and Jervis Is. (= Rábida) and collection date as 1875 *fide* Tiedemann et al. (1994: 65).

3. *Pseudalsophis elegans* (Tschudi, 1845). Arch. Naturg. 11(1): 164–165. (*Lygophis elegans*)

Synonyms: *Dryophylax fremvillei* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Dryophylax freminvillei* A.-M.-C. Duméril, Bibron and Duméril, 1854a, *Dromicus rufodorsatus* A.C.L.G. Günther, 1858, *Tachymenis canilatus* Cope, 1868b, *Lygophis poecilostomus* Cope, 1875b, *Dryophylax vitellinus* Cope, 1878a, and *Tachymenis Surinamensis* Dunn, 1922.
Type: Holotype, MHNN 11 (formerly MZN 80), a 356 mm female (J.J. von Tschudi, Aug. 1838–Feb. 1841).
Type locality: "Republica Peruana" [= Peru]. Emended to Montañas von Urubamba gefunden, ein jüngeres in der Nahe von Lima, Peru [= Urubamba Mtns. in the vicinity of Lima, Peru] *fide* Tschudi (1846: 54) (partially in error and corrected to Lima, Peru *fide* Schätti, 1986: 101). Restricted to Lima *fide* K.P. Schmidt & Walker (1943b: 317).
Distribution: Coastal Ecuador (Guayas), Peru (Libertad, Lima, Piura, Tacna, San Lorenzo Is.) and ext. N Chile (Arica, Tarapacá), NSL–2400 m.
Sources: K.P. Schmidt & Walker, 1943b, Peters, 1960, Donoso-Barros, 1966, Myers & Hoogmoed, 1974 and R.A. Thomas & Ineich, 1999.
Remarks: Page 164 is mislabeled 166 in Tschudi, 1845. Supplemental original description in Tschudi (1846: 53–54, pl. 6, 2 figs.). Previously in the genus *Alsophis*.

4. *Pseudalsophis hoodensis* (Van Denburgh, 1912b). Proc. California Acad. Sci. (4) 1(4): 338–341, pl. 24. (*Dromicus hoodensis*)

Type: Holotype, CAS 11799, a 735 mm male (J.R. Slevin [CAS Galapagos Exped.], 23 June 1906).
Type locality: "Hood Island, Galapagos Archipelago" [= Española Is., Galapagos Arch., Ecuador].
Distribution: Ecuador (Galapagos Arch.: Española, Gardner).
Sources: R.A. Thomas, 1997 and Zaher, 1999.
Remarks: Previously a subspecies of *Alsophis biserialis* (A.C.L.G. Günther).

5. *Pseudalsophis occidentalis* (Van Denburgh, 1912b). Proc. California Acad. Sci. (4): 1(4): 347–349, pl. 27. (*Dromicus occidentalis*)

Synonym: *Dromicus occidentalis helleri* Van Denburgh, 1912b.
Type: Holotype, CAS 11488, a 1142 mm female (J.R. Slevin [CAS Galapagos Exped.], 18 April 1906).
Type locality: "Narborough Island, Galapagos Archipelago" [= Fernandina Is., Galapagos Arch., Ecuador].
Distribution: Ecuador (Galapagos Arch.: Fernandina, Isabela, Tortuga).
Source: Zaher, 1999.
Remarks: A valid species based on hemipeneal morphology *fide* Zaher (1999: 52).

6. *Pseudalsophis slevini* (Van Denburgh, 1912b). Proc. California Acad. Sci. (4) 1(4): 351–353, pl. 29 (upper). (*Dromicus slevini*)

Type: Holotype, CAS 12216, a 323 mm male (J.R. Slevin [CAS Galapagos Exped.], 14 Aug. 1906).
Type locality: "Duncan Island, Galapagos Archipelago" [= Pinzón Is., Galapagos Arch., Ecuador].
Distribution: Ecuador (Galapagos: Fernandina, Isabela, Pinzón).
Source: R.A. Thomas, 1997.

7. *Pseudalsophis steindachneri* (Van Denburgh, 1912b). Proc. California Acad. Sci. (4) 1(4): 353–355, pl. 30 (upper). (*Dromicus steindachneri*)

Type: Holotype, CAS 10795, a 420 mm male (J.R. Slevin [CAS Galapagos Exped.], 16 Jan. 1906).

Type locality: "Indefatigable Island, Galapagos Archipelago" [= Santa Cruz Is., Galapagos Arch., Ecuador].
Distribution: Ecuador (Galapagos: Baltra, Rábida, Santa Cruz, Santiago).
Source: R.A. Thomas, 1997.

PSEUDASPIS Fitzinger, 1843 (Pseudaspididae)

Synonyms: *Cadmus* Theobald, 1868b, *Ophirhina* Bocage, 1882a, and *Pseudaspic* – Skinner, 1973 *(nomen incorrectum).*
Type species: *Coluber canus* Linnaeus, 1758.
Distribution: Southern and E Africa.
Sources: Bocage, 1895, Loveridge, 1929, 1957a, Monard, 1937, Bogert, 1940, Witte, 1941, 1953, 1962, Mertens, 1955, 1971, Laurent, 1956a, Vesey-FitzGerald, 1958, 1975, Sweeney, 1961c, V.F.M. FitzSimons, 1962a, 1974, Broadley, 1971d, 1983, Broadley & Cock, 1975, De Waal, 1978, Spawls, 1978, Jacobsen & Haacke, 1980, Buys & Buys, 1983, Derleyn et al., 1983, Pienaar et al., 1983, Auerbach, 1987, Branch, 1988, Broadley & Howell, 1991, Boycott & Culverwell, 1992, Marais, 1992, Clauss & Clauss, 2002, Spawls et al., 2002, Broadley et al., 2003, Marais, 2004, Lawson et al., 2005, Vidal et al., 2008, Kelly et al., 2009 and Broadley & Blaylock, 2013.

1. *Pseudaspis cana* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 221–222. (*Coluber canus*)

Synonyms: *Coluber padera* Linnaeus, 1758, *Coluber elegantissimus* Laurenti, 1768, *Coluber ocellatus* Gmelin, 1789, *Coluber politus* Seetzen, 1796, *Coluber crucifer* G. Shaw, 1802, *Coluber parias* Hermann, 1804, *Cadmus cuneiformis* Theobald, 1868b, *Coronella phocarum* A.C.L.G. Günther, 1872c, and *Ophirina anchietae* Bocage, 1882a.
Type: Holotype, NHR Lin-22 (formerly MAFR), a 330 mm male (Mus. Drottn.).
Type locality: "Indiis" [= India] (in error). Corrected to Cape of Good Hope, South Africa [= Cape of Good Hope, Western Cape Prov., SW South Africa, 34°21'S, 18°28'E, elevation 20 m] *fide* Flower (1933: 818).
Distribution: Southern and E Africa. Southern Kenya (Central, S Eastern, S Rift Valley), Rwanda (Cyangugu), Burundi (Bururi, Ruyigi), Tanzania (Iringa, Kilimanjaro, Mbeya), SE Democratic Republic of the Congo (Katanga), SW Angola (Cuanza Sul, Huíla), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), S Malawi (Southern), S Mozambique (Ganza, Inhambane, Maputo), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Matabeleland North, Matabeleland South, Midlands), Botswana (Central, Ghanzi, Gaborone, Kgalagadi, Kgatleng, Kweneng, North East, North West, South East, Southern), Namibia (Caprivi, Erongo, Hardap, Karas, Khomas, Kunene, Okavango, Omaheke, Otjozondjupa), Swaziland, and South Africa (Eastern Cape, Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, Northern Cape, North West, Western Cape, Robben Is.), NSL–1950 m.
Remarks: Possibly extirpated in Malawi *fide* Sweeney (1961: 127). Possibly *P. anchietae* is a valid species based on hemipenial morphology *fide* Visser (2010: 3).

PSEUDECHIS Wagler, 1830 (Elapidae)

Synonyms: *Alecto* Wagler, 1830 *(nomen praeoccupatum), Pseudechys* – Spencer, 1892 *(nomen incorrectum), Peseudechis* – Brazil, 1914 *(nomen incorrectum), Pseudoechis* – Anon., 1978 *(nomen incorrectum), Cannia* Wells & Wellington, 1984, *Panacedechis* Wells & Wellington, 1985, and *Pailsus* Hoser, 1998a.
Type species: *Coluber porphyriacus* G. Shaw, 1794.
Distribution: Austro-Papua.
Fossil record: Pleistocene of Australia.
Sources: F. Werner, 1923b, R. Mackay, 1955, Cogger et al., 1983a, Storr, 1985, Longmore, 1986, Mengden et al., 1986, Shine, 1987e–f, S.K. Wilson & Knowles, 1988, Gow, 1989, Hoser, 1989, 1998a, 2001, 2012e, Covacevich & Couper, 1991, Greer, 1997, Cogger, 2000, Sanders et al., 2008 and Zaher et al., 2009.

1. *Pseudechis australis* (Gray, 1842c). Zool. Misc. 2(Apr.): 55. (*Naja australis*)

Synonyms: *Pseudechis darwiniensis* Macleay, 1878b, *Pseudechis cupreus* Boulenger, 1896a, *Pseudechis denisonioides* F. Werner, 1909e, *Pseudechis platycephalus* Thomson, 1933, *Denisonia brunnea* F.J. Mitchell, 1951, *Cannia centralis* Wells & Wellington, 1985, *Cannia weigeli* Wells & Wellington, 1987, *Cannia australis aplini* Hoser, 2001, *Cannia australis burgessi* Hoser, 2001, and *Cannia australis newmani* Hoser, 2001.
Type: Holotype, BMNH 1946.1.20.39, a female (Gilbert).
Type locality: "North coast of New Holland; Port Essington" [= ruins at tip of Cobourg Peninsula, N Northern Territory, N Australia, ca. 11°09'N, 132°00'E, elevation NSL].
Distribution: Austro-Papua. Eastern Indonesia (E Papua), SW Papua New Guinea (Western) and Australia (New South Wales, Northern Territory, Queensland, South Australia, Tasmania, ext. N Victoria, Western Australia, Angarbulumardja, Augustus, Barrow, Bernier, Bickerton, Brigadier, Carlia, Centre, Cockatoo, Comeile, Connexion, Coronation, Cotton, Dirk Hartog, Dorre, Fenelon, Finch, Fletcher, Groote Eylandt, Hidden, Inglis, Jirgan, Jungulu, Katers, Koolan, Long, Maria, Middle Osborn, Mornington, Muir, North Point, Pobassoo, Probable, Quoin, Rosemary, Sir Graham

P

Moore, South West, Sunday, Wessel Marchinbar, West, West Lewis and Wigram Is.), NSL–995 m.

Sources: F. McCoy, 1887, Roux, 1919b, L.A. Smith, 1982, F. Parker, 1982, Whitaker et al., 1982, Bush et al., 1995, O'Shea, 1996, Hoser, 1998a, Shea & Sadlier, 1999 and Storr et al., 2002.

Remarks: Composed of several unnamed species *fide* Kuch et al. (2005a: 125).

2. *Pseudechis butleri* L.A. Smith, 1982. Rec. W. Aust. Mus. 10(1): 43, fig. 1a.

Type: Holotype, WAM 22345, a 930 mm (svl) gravid female (I.C. Carnaby, 15 Oct. 1963).

Type locality: "19 km SE of Yalgoo, Western Australia, in 28°29'S, 116°49'E."

Distribution: Western Australia (W Western Australia), 260–555 m.

Sources: Maryan, 1994 and Storr et al., 2002.

3. *Pseudechis colletti* Boulenger, 1902e. Ann. Mag. Nat. Hist. (7) 10(60): 494–495.

Type: Holotype, BMNH 1946.1.20.69, a 450 mm specimen (R. Collett).

Type locality: "Queensland" [Australia].

Distribution: Northeastern Australia (Queensland), 20–320 m.

4. *Pseudechis guttatus* De Vis, 1905. Ann. Queensland Mus. (6): 49–50.

Synonyms: *Pseudechis mortonensis* De Vis, 1911, *Panacedechis worrelli* Wells & Wellington, 1985, and *Pseudechis qutatus* – Khole, 1991 *(nomen incorrectum).*

Type: Holotype, QM J189, a 1070 mm eviscerated specimen.

Type locality: "Cecil Plains, Queensland" [= Cecil Plains, SE Queensland, E Australia, 27°32'S, 151°12'E, elevation 355 m].

Distribution: Southeastern Australia (E New South Wales, SE Queensland), 35–1240 m.

Sources: F. McCoy, 1879a, Charles et al., 1979, Gibson, 1983 and Shea & Sadlier, 1999.

5. *Pseudechis pailsi* (Hoser, 1998a). Monitor 10(1): 5–9, 31, 1 fig. (*Pailsus pailsi*) (*nomen corrigendum*)

Synonyms: *Pailsus pailsei* Hoser, 1998a *(nomen incorrigendum)* and *Pailsus pailsi* – Wüster et al., 2001b *(nomen corrigendum).*

Type: Holotype, NMV D69704, a 1071 mm female (19 Nov. 1984).

Type locality: "East Leichardt Dam, near Mount Isa, Queensland, Lat. 20°47' [S], Long. 139°47' [E], Australia."

Distribution: Northeasterm Australia (NW Queensland), 360 m.

Sources: Hoser, 2000c and Wüster et al., 2005.

6. *Pseudechis papuanus* W.C.H. Peters & Doria, 1878. Ann. Mus. Civ. Stor. Nat. Genova 13: 409–410.

Synonym: *Panacedechis papuanus trevorhawkeswoodi* Hoser, 2009c & 2012i *(nomen illegitimum).*

Types: Syntypes (2), MSNG 8018a–b, longest syntype 1900 mm (C.L.M. D'Albertis, 1875).

Type locality: "Monte Epa" and "coste opposte dell'IsolaYule, Nuova Guinea meridionale orientale" [= Mt. Epa (8°40'S, 148°05'E) and coast opposite Yule Island (8°49'S, 146°32'E), Central Prov., SE Papua New Guinea].

Distribution: New Guinea. Eastern Indonesia (SE Papua, Fredrik Hendrik Is.) and S Papua New Guinea (Central, Western, Yule Is.), NSL–250 m.

Sources: Roux, 1919b, K.R. Slater, 1968, Whitaker et al., 1982, F. Parker, 1982, O'Shea, 1996, Wüster et al., 2005 and Hoser, 2009c.

7. *Pseudechis porphyriacus* (G. Shaw, 1794). Zool. New Holland: 27–28, pl. 10. (*Coluber porphyriacus*)

Synonyms: *Trimeresurus leptocephalus* Lacépède, 1804, *Trimeresurus porphyreus* Merrem, 1820 *(nomen emendatum), Duberria porphyriaca* – Fitzinger, 1826a, *Acanthophis tortor* Lesson, 1828 *(nomen nudum), Acanthophis tortor* Lesson, 1829, *in* Duperrey, 1826–1832, *Pseudechis porphyricus* – Wagler, 1830 *(nomen incorrectum), Naja porphyrica* –Schlegel, 1837 *(nomen incorrectum), Trimeresurus porphyrica* – A.-M.C. Duméril, Bibron & Duméril, 1854b *(nomen incorrectum), Pseudechis porphyraicus* – F. McCoy, 1867 *(nomen incorrectum), Pseudechis porphyriacea* – F. Müller, 1878b *(nomen incorrectum), Pseudechis porphyriachis* – Limpus, 1978 *(nomen incorrectum), Pseudechis porphyrica* – Mengden, 1985 *(nomen incorrectum), Pseudechis porphyriacus eipperi* Hoser, 2003d, and *Pseudechis porphyriacus rentoni* Hoser, 2003d.

Type: Holotype, not designated, lost *fide* Cogger et al. (1983: 231).

Type locality: "New Holland" [= Australia].

Distribution: Eastern Australia (Australian Capital Territory, New South Wales, E Queensland, SE South Australia, Victoria), NSL–1280 m.

Sources: F. McCoy, 1878a, M.J. Smith, 1975, Heatwole & Johnson, 1979, Shine et al., 1981, Shine, 1987d, Hoser, 2003d and J.C. Murphy & Schlager, 2003.

8. *Pseudechis rossignolii* (Hoser, 2000a). Litt. Serp. 20(6): 178–180. (*Pailsus rossignolii*)

Type: Holotype, MZB 364, a 1050 mm specimen.

Type locality: "south New Guinea, in the general region of Meraoke Lat 8º 30' Long 140º 20' and areas a short distance west of here along the coast."

Distribution: Eastern Indonesia (SE Papua), NSL.
Source: Wüster et al., 2005b.
Remarks: Original description reprinted in Hoser (2003b: 23–26).

PSEUDELAPHE Mertens & Rosenberg, 1943 (Colubridae)

Synonym: *Pseudoelaphe* – Dowling, 1952a *(nomen incorrectum).*
Type species: *Coluber flavirufus* Cope, 1867b.
Distribution: Southeastern Mexico and upper Central America.
Sources: H.M. Smith, 1941L, Dowling, 1952a–b, H.M. Smith & Williams, 1966b, L.D. Wilson & Hahn, 1973, L.D. Wilson & Meyer, 1985, Schulz, 1993, 1996, J.C. Lee, 1996, 2000, Schulz et al., 1997, J.A. Type locality: Unknown. Designated as America *fide* J.A. Peters (1960a: 535).
Distribution: Amazonia. Colombia (Amazonas, Chocó, Cundinamarca, Magdalena, Meta, Vaupés), E Venezuela (Amazonas, Anzoátegui, Bolívar, Delta Amacuro, Monagas, Sucre), Guyana (Essequibo Islands-West Demerara, Upper Demerara-Berbice), Suriname (Marowijne, Paramaribo, Saramacca), French Guyana (Cayenne, Saint-Laurent-du-Maroni), N Brazil (Acre, Amazonas, Maranhão, Pará, Rondônia), E Ecuador (Morona-Santiago, Napo, Pastaza, Sucumbios), E Peru (Loreto, Madre de Dios) and E Bolivia (Beni, La Paz, Santa Cruz), NSL–1200 m.
Sources: Beebe, 1946, Roze, 1966a, Hoge et al., 1973, Cunha and Nascimento, 1978, 1983a, 1993, Duellman, 1978, 2005, Fugler & Walls, 1978, Gasc & Rodrigues, 1980, Fugler, 1983, 1984, Abuys, 1985b, Dixon and Soini, 1986, Lancini-V, 1986, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, 1991, Duellman & Salas, 1991, Henle & Ehrl, 1991, Gorzula & Señaris, 1998, Starace, 1998, Rivas-Fuenmayor & La Marca, 2001c, Navarrete et al., 2009 and C.J. Cole et al., 2013.

2. *Pseudoboa haasi* (Boettger, 1905). Zool. Anz. 29(11): 374–375. (*Oxyrrhopus haasi*)

Type: Lectotype, SMF 19867 (formerly SMF-B 9111, 2a), a 690 mm specimen (A. Haas, 1905), designated by Mertens (1922: 181).
Type locality: "Campos von Palmas, Parana" [= Palm country of Paraná State, S Brazil].
Distribution: Southern Brazil (Paraná, S Santa Catarina, NE Rio Grande do Sul, E São Paulo) and Argentina (Misiones), 100–600 m.
Sources: Amaral, 1926e, 1937d, Lema & Ely, 1979, Giraudo, 1999 and Marques et al., 2001.

3. *Pseudoboa martinsi* Zaher, Oliveira & Franco, 2008. Zootaxa (1674): 28–32, figs. 1a–b, 2a–d, 3a–b.

Type: Holotype, MZUSP 8549, a 1020 mm male (B. Zimmerman, Nov. 1984).
Type locality: "Fazenda Porto Alegre, a forest fragment belonging to the PDBFF (Projeto Dinâmica Biológica de Fragmenios Florestais), Manaus, State of Amazonas, Brazil (2° 25' 00" S, 59° 43' 00' W)."
Distribution: Brazil (Amazonas, Pará, Rondônia, Roraima).
Source: Martins & Oliveira, 1998.
Remarks: Possibly occurs in other Brazilian states as well as Bolivia, Colombia, Peru and Venezuela *fide* Zaher et al. (2008: 33).

4. *Pseudoboa neuwiedii* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1001–1002. (*Scytale neuwiedii*)

Synonyms: *Scytale neuwiedii* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Olisthenes euphaeus* Cope, 1860a, *Rhinocheilus thominotii* Bocourt and Dugès, 1887, and *Pseudoboa robinsoni* Stejneger, 1901c.
Type: Lectotype, MNHN 3779, a 900 mm specimen (L.D. de Bauperthuy, 1841), designated by Hoge & Lancini (1960a: 59).
Type locality: "Côte-Ferme" [= South America] via lectotype selection. Restricted to "Cumaná y sus alrededores" [= vicinity of Cumaná, Sucre State, NE Venezuela] *fide* Hoge & Lancini (1960a: 61).
Distribution: Panama, Amazonia and Grenada. Panama (Chiriquí, Coclé, Colón, Darién, Herrera, Panamá), Colombia (Antioquia, Atlántico, Bolívar, Boyaca, Caldas, Chocó, Córdoba, Cundinamarca, La Guajira, Magdalena, Meta, Norte de Santander, Santander, Sucre, Tolima, Vaupés, Vichada), Venezuela (Amazonas, Anzoátegui, Apure, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Nueva Esparta, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy, Vargas, Zulia, Margarita Is.), Trinidad and Tobago (Tobago, Trinidad), Grenada, Guyana (Potaro-Siparuni, Upper Demerara-Berbice, Upper Takutu-Upper Essequibo), Suriname (Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), and N Brazil (Amapá, Amazonas, Distrito Federal, Goiás, Maranhão, Mato Grosso, Minas Gerais, Paraiba, Roraima), NSL–2750 m.
Sources: Amaral, 1935d–e, Shreve, 1947, Roze, 1952a, 1966a, Hoge, 1953b, 1967, Emsley, 1977, Abuys, 1985b, Lancini, 1986, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, Gorzula & Señaris, 1998, Starace, 1998, Esqueda & La Marca, 1999, Kornacker, 2001, Markezich, 2002, Rivas-Fuenemayer & Barrio-Amorgós, 2005, Navarrete et al., 2009, Ugueto & Rivas, 2010 and C.J. Cole et al., 2013.
Remarks: Probably extirpated in Grenada *fide* Emsley (1977: 250).

5. *Pseudoboa nigra* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1002. (*Scytale neuwiedii nigrum*)

Synonym: *Pseudoboa albimaculata* Mello, 1926.
Type: Holotype, MNHN (Lemelle-Deville, 1841–1843).
Type locality: "Bahia" [Brazil].
Distribution: Eastern Brazil (Alagoas, Bahia, Ceará, Distrito Federal, Goias, Maranhão, Mato Grosso, Mato Grosso do Sul, Minas Gerais, Pará, Paraiba, Pernambuco, Piauí, Rio de Janeiro, Rio Grande do Norte, Rondônia, São Paulo, Tocantins), E Bolivia (Beni, Santa Cruz) and N Paraguay (Alto Paraguay, Amambay, Boquerón, Concepción, Presidente Hayes), NSL–300 m.
Sources: Bailey, 1939b, Cordeiro & Hoge, 1974, Abalos & Mischis, 1975, Hoge et al., 1975, Vanzolini et al., 1980, J.D. Williams & Francini, 1991, Freitas, 1999, Cacciali, 2008 and Orofino et al., 2010.
Remarks: Official Specific Name no. 1969 *fide* Opinion 698 (ICZN, 1964a). Argentine records doubtful *fide* J.D. Williams & Francini (1991: 77).

6. *Pseudoboa serrana* Morato, Moura-Leite, Costa-Prudente & Silveira–bérnila, 1995. Biociências 3(2): 254–257, figs. 1–4.

Type: Holotype, IB 10393, a 1154 mm male (30 Jan. 1942), destroyed by fire 15 May 2010.
Type locality: "Brazil: Rio de Janeiro: Teresópolis: Sierra dos Órgãos (Parque Nacional) (22°27'S; 42°58'W)."
Distribution: Southeastern Brazil (S Minas Gerais, Rio de Janeiro, E São Paulo), NSL–650 m..
Source: Marques et al., 2001.

PSEUDOBOODON Peracca, 1897 (Lamprophiidae)

Type species: *Pseudoboodon gascae* Peracca, 1897a.
Distribution: Northeast Africa.
Sources: J.B. Rasmussen & Largen, 1992, Largen & Rasmussen, 1993, Spawls, 2004, Vidal et al., 2008, Kelly et al., 2009, Zaher et al., 2009 and Largen & Spawls, 2010.

1. *Pseudoboodon boehmei* J.B. Rasmussen & Largen, 1992. Steenstrupia 18(3): 76–79, figs. 7–8.

Type: Holotype, BMNH 1976.1668, a 620 mm male (Polytech. Cen. London & Imper. College W Ethiopia Exped., 20 Sept. 1974).
Type locality: "Godare Forest, Illubabor Province, Ethiopia (07°26'N 35°00'E, altitude 820 m)."
Distribution: Southwestern Ethiopia (Illubabor, Kefa, Wollega), 800–2150 m.

2. *Pseudoboodon gascae* Peracca, 1897a. Boll. Mus. Zool. Comp. Univ. Torino 12(273): 2–3, 1 fig.

Type: Lectotype, MZUT 1658, a 660 mm female (A. Gasca), designated by Andreone & Gavetti (2007: 91).
Type locality: "Maldi (Eritrea)" [= Maldi, S Anseba Prov., N Eritrea, 15°38'N, 38°48'E, elevation 2450 m] via lectotype selection.
Distribution: Eritrea (Anseba, S Northern Red Sea, Southern) and E Ethiopia (Hararge, Sidamo), 1500–2450 m.
Remarks: Lectotype illustrated in J.B. Rasmussen (1992: figs. 5–6) and Andreone & Gavetti (2007: fig. 10).

3. *Pseudoboodon lemniscatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 365–366. (*Boaedon lemniscatum*)

Synonyms: *Boedon lemniscatum* A.-M.-C. Duméril, 1953 (*nomen nudum*), *Lamprophis rogeri* Mocquard, 1904a, and *Pseudoboodon erlangeri* F. Werner, 1923a.
Type: Holotype, MNHN 1903.285, a 400 mm skin (E.-J. Petit).
Type locality: "Abyssinie" [= Ethiopia].
Distribution: Eritrea (S Northern Red Sea, Southern) and Ethiopia (Arussi, Bale, Gemu Gofa, Gojjam, Gondar, Hararge, Illubabor, Kefa, Shoa, Sidamo, Tigre, Wollega, Wollo), 1750–3300 m.
Sources: Bogert, 1940, H.W. Parker, 1949 and Largen & Largen, 1982.

4. *Pseudoboodon sandfordorum* Spawls, 2004. Afr. J. Herp. 53(1): 12–16, figs. 1–3.

Type: Holotype, WML 2003.47.4, a 655 mm male (natives, 23 Nov. 1997).
Type locality: "Mugher River Gorge, near Keriyo Hamlet (09° 24' N 38° 39' E, altitude 1 800 m), central highlands of Ethiopia."
Distribution: Central Ethiopia (Shoa), 1800–2400 m. Known from vicinity of type locality.

†*PSEUDOCEMOPHORA* Auffenberg, 1963 (Colubridae)

Type species: †*Pseudocemophora antiqua* Auffenberg, 1963.
Distribution: Lower to upper Miocene of USA.
Sources: Holman, 1979a and Rage, 1984b.

1. †*Pseudocemophora antiqua* Auffenberg, 1963. Tulane Stud. Zool. 10(3): 187–188, fig. 36 (paratype).

Type: Holotype, UF 6458, one trunk vertebra (W. Auffenberg, March 1954).
Type locality: "Boulder Bar, Thomas Farm, Gilchrist County (R15E, T75, Sec. 20), Florida; lower Miocene (Arikareean), Hawthorne fm."
Distribution: Lower Miocene (Arikareean) of USA (Wyoming), lower Miocene (Hemingfordian) of USA (Florida), and lower/upper Miocene (Hemingfordian/Barstovian) of USA (Wyoming).
Remarks: Possibly known from the middle Miocene (Barstovian) *fide* Rage (1984b: 51).

PSEUDOCERASTES Boulenger, 1896a (Viperidae)

Synonyms: *Pseudocerastas* – F. Werner, 1922b *(nomen incorrectum), Pseudoceratus* – Briceño-Rossi, 1934 *(nomen incorrectum), Pseudocrastes* – Leviton, 1959a *(nomen incorrectum),* and *Pseudocerates* – Marx & Rabb, 1965 *(nomen incorrectum).*
Type species: *Cerastes persicus* A.-M.-C. Duméril, Bibron & Duméril, 1854b.
Distribution: Arabia and SW Asia.
Sources: Strauch, 1873, Blanford, 1876, Nikolsky, 1913, 1916, Wall, 1925a, 1928, Flower, 1930, 1933, K.P. Schmidt, 1930, 1939b, F. Werner, 1938a, M.A. Smith, 1943, Laurent, 1948, Barash & Hoofien, 1956, G. Haas, 1957, Khalaf, 1959, Marx & Rabb, 1965, Mendelssohn, 1965, Minton, 1966, Marx, 1968, Minton et al., 1968, Leviton & Anderson, 1970a, Kochva, 1974, Baran, 1976a, Arnold & Gallagher, 1977, Groombridge, 1980, M.S. Khan, 1980, 1982b, 1990, 2002, Joger, 1984, Brodmann, 1987, R. Price, 1987a, Gasperetti, 1988, Marx et al., 1988, Gallagher, 1990, Latifi, 1991, Leviton et al., 1992a, Martens, 1993, Spawls & Branch, 1995, Nilson & Andrén, 1997, David & Ineich, 1999, Herrmann et al., 1999, McDiarmid et al., 1999, Disi et al., 2001, Lenk et al., 2001b, Mallow et al., 2003, Bostanchi et al., 2006, Wüster et al., 2008, Stümpel & Joger, 2009, Fathinia & Rastegar-Pouyani, 2010, Phelps, 2010 and Hoser, 2012d.

1. *Pseudocerastes fieldi* K.P. Schmidt, 1930. Field Mus. Nat. Hist. (Zool.) 17(6): 227–228, fig. 2.

Type: Holotype, FMNH 11061, a 726 mm male (H. Field [Marshall Field No. Arab. Desert Exped.], 9 May 1928).
Type locality: "Bair Wells, Transjordan" [= Jibal Matahat Ba'ir, Ma'an Govern, cen. Jordan, ca. 30°41'N, 36°45'E, elevation 890 m].
Distribution: Middle East and Arabia. Northeastern Egypt (North Sinai, South Sinai), S Israel (Southern), Jordan (Amman, Aqaba, Maan, Mafraq, Zarqa), S Syria (Homs), N Saudi Arabia (Jawf, Northern), W Iraq (Al Anbar) and SW Iran (Bushehr), NSL–915 m.
Sources: Gasperetti, 1988, Bouskila & Amitai, 2001, M.S. Khan, 2002, Baha El Din, 2006, Amr & Disi, 2011 and Bar & Haimovitch, 2011.

Remarks: A valid species *fide* Bostanchi et al. (2006: 445) and Fathinia & Rastegar-Pouyani (2010: 277).

2. *Pseudocerastes persicus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1443–1444, pl. 78bis, fig. 5. (*Cerastes persicus*)

Synonyms: *Cerastes persicus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Vipera persica* – Jan, 1859a, and *Pseudocerastes bicornis* Wall, 1913.

Type: Holotype, MNHN 4027 (P.M.R. Aucher-Eloy, 1830–1838).

Type locality: "Perse" [= Iran].

Distribution: Southwestern Asia. Extreme SE Turkey (Kars), NW Azerbaijan, United Arab Emirates (Ras al Khaimah), N Oman (Ad Dakhiliyah, Al Batinah, Ash Sharqiyah, Musandam, Muscat), W Iraq (Al Anbar, Dahuk, Ninawa), Iran (Central, Esfahan, Fars, Hormozghan, Kerman, Khuzestan, Lorestan, Merkazi Qum, Razavi Khorasan, Semnan, Sistan va Baluchestan, Tehran, West Azarbaijan, Yazd, Zanjan), S Afghanistan (Kandahar, Nimroze, Zabul) and Pakistan (Balochistan, Khyber Pakhtunkhwa, Sindh), 335–2200 m.

Sources: Strauch, 1873, Blanford, 1876, Nikolsky, 1913, 1916, 1928, K.P. Schmidt, 1930, 1939b, F. Werner, 1938a, Laurent, 1948, Khalaf, 1959, Marx & Rabb, 1965, Mendelssohn, 1965, Minton, 1966, Marx, 1968, Minton et al., 1968, Leviton & Anderson, 1970a, Kochva, 1974, Baran, 1976a, Arnold & Gallagher, 1977, M.S. Khan, 1980, 1982b, 1990, 2002, Joger, 1984, Brodmann, 1987, R. Price, 1987a, Gasperetti, 1988, Marx et al., 1988, Latifi, 1991, Leviton et al., 1992a, Martens, 1993, Nilson & Andrén, 1997, David & Ineich, 1999, Herrmann et al., 1999, McDiarmid et al., 1999, Disi et al., 2001, Lenk et al., 2001b, Mallow et al., 2003, Wüster et al., 2008, Stümpel & Joger, 2009, Fathinia & Rastegar-Pouyani, 2010 and Grossmann et al., 2012.

Remarks: Records from S Armenia and Afghanistan doubtful *fide* Spawls et al., 2002. *Pseudocerastes bicornis,* known only from head and neck of holotype, considered a valid species *fide* M.S. Khan (2002: 190).

3. *Pseudocerastes urarachnoides* Bostanchi, Anderson, Kami & Papenfuss, 2006. Proc. California Acad. Sci. (4) 57(14): 446–448, figs. 1–12.

Type: Holotype, FMNH 170929, a 531 mm female (D.R. Womochel and A.F. DeBlase [Second Street Exped. Iran], 27 Aug. 1968).

Type locality: "Iran: Ilam Province: 70 km SW Ilam [probably on road to Amirabad and Mehran]."

Distribution: Western Iran (Zagros Mtns. of Ilam, Kermanshah, Khuzestan), 200–300 m.

Source: Fathinia et al., 2009.

PSEUDOERYX Fitzinger, 1826a (Xenodontidae)

Synonyms: *Pseudoerix* Thon *in* Ersch & Gruber, 1838 *(nomen emendatum), Dimades* Gray, 1842d, *Pseuderyx* Fitzinger, 1843 *(nomen emendatum), Callopisma* A.-M.-C. Duméril, 1853 *(nomen praeoccupatum), Calopisma* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen emendatum),* and *Pseudaeryx* – Senna, 1886 *(nomen incorrectum).*

Type species: *Coluber plicatilis* Linnaeus, 1758.

Distribution: South America.

Sources: Bertoni, 1915, Serié, 1921, Hoge, 1964d, 1967, Neill, 1964, Nicéforo-María, 1964, J.A. Peters & Orejas-Miranda, 1970, Amaral, 1978, Cunha & Nascimento, 1993, Lancini, 1979, Gasc & Rodrigues, 1980, Fugler, 1983, Abuys, 1986a, Chippaux, 1987, Pérez-Santos & Moreno, 1988, 1991, Duellman & Salas, 1991, Henle & Ehrl, 1991, J.D. Williams & Francini, 1991, Giraudo, 1999, Vidal et al., 2000, Schargel et al., 2007, Navarrete et al., 2009, and Zaher et al., 2009.

1. *Pseudoeryx plicatilis* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 217. (*Coluber plicatilis*)

Synonyms: *Coluber bali* Lacépède, 1789 (*nomen rejiciendum*), *Pseudoeryx daudinii* Fitzinger, 1826a, *Pseudoeryx mimeticus* Cope, 1886a, *Pseudoeryx plicatilis anomalolepis* Bocourt, 1895 *in* Duméril, Bocourt & Mocquard, 1870–1909, *Hydrops lehmanni* Dunn, 1944e, and *Pseudoeryx plicatilis ecuadorensis* Mertens, 1965b.

Type: Lectotype, NRH Lin-57 (formerly MAFR) a 770 mm male (Mus. Drottn.), designated by Hoge (1964d: 61).

Type locality: "Ternataeis" [= Ternate, Indonesia] (in error *fide* Hoge, 1964d: 61).

Distribution: South America. Southeastern Colombia (Amazonas, Cauca, Leticia), SE Venezuela (Amazonas, Bolívar), Guyana (East Berbice-Corentyne, Pomeroon-Supenaam), Suriname (Nickerie, Para, Paramaribo, Saramacca), French Guyana (Cayenne, Saint-Laurent-du-Maroni), Brazil (Acre, Amapá, Amazonas, Maranhão, Mato Grosso, Mato Grosso do Sul, Pará, Rondônia, Roraima, São Paulo, Marajo Is.), E Ecuador (Napo), NE Peru (Loreto, Madre de Dios, Napo), E Bolivia (Beni, Santa Cruz), Paraguay (Alto Paraguay, Central, Neembucú) and NE Argentina (Chaco, Corrientes, Formosa, Misiones), NSL–410 m.

Sources: Roze, 1957b, Hoge & Maranhão Nina, 1964, Mertens, 1965b, K.L. Williams & Fugler, 1968, Cunha & Nascimento, 1978, Dixon & Soini, 1986, Pérez-Santos, 1986, Starace, 1998, Giraudo, 2001, Duellman, 2005, Scartozzoni et al., 2010, Cabral & Caballero, 2012 and C.J. Cole et al., 2013.

2. *Pseudoeryx relictualis* Schargel, Rivas-Fuenmayor, Barros-Blanco, Pèfaur & Navarrete, 2007. Herpetologica 63(2): 236–241, fig. 1.

Type: Holotype, CVULA IV 6955, a 627 mm female (F. Diaz, 11 Sept. 2003).
Type locality: "Hacienda La Trinidad, sector Montalbán, Municipio Catatumbo, Zulia state, Venezuela (09° 09' 01" N; 72° 02' 29" W)."
Distribution: Northwestern Venezuela (Zulia), NSL.

PSEUDOFERANIA Ogilby, 1890a (Homalopsidae)

Type species: *Pseudoferania macleayi* Ogilby, 1890a.
Distribution: Tidal rivers and coastal marine waters of Austro-Papua.
Sources: Kinghorn, 1964, F. Parker, 1982, S.K. Wilson & Knowles, 1988, Gow, 1989, Ehmann, 1992, O'Shea, 1996, Shea & Sadlier, 1999, Cogger, 2000 and J.C. Murphy, 2011.
Remarks: A valid genus *fide* J.C. Murphy (2011a: 234).

1. *Pseudoferania macleayi* Ogilby, 1890a. Proc. Linn. Soc. N.S.W. (2) 5(1): 51–52.

Type: Lectotype, AMS 460 (J.A. Boyd), designated by Gyi (1970: 109).
Type locality: "Ripple Creek, Herbert River District, Queensland" [Australia].
Distribution: Extreme NE Australia (NE Queensland), 90 m.
Sources: Kinghorn, 1929, Gow, 1983, 1989 and Ehmann, 1992.
Remarks: Previously a synonym of *Enhydris polylepis*.

2. *Pseudoferania polylepis* (J.G. Fischer, 1886). Abh. Ges. Naturwiss. Ver. Hamburg 9(1): 62–63. (*Hypsirhina polylepis*)

Synonym: *Pseudoferania harritosi* Wells & Wellington, 1985.
Type: Holotype, MTKD D 437, a 280 mm female (Gerrard, 1885), destroyed 13–14 Feb. 1945 during World War II.
Type locality: "Fly River, Süd-Neuguinea" [= Fly River, Western Prov., SW Papua New Guinea].
Distribution: Austro-Papua. Eastern Indonesia (S Papua), S Papua New Guinea (Western) and N Australia (N Northern Territory, N Queensland, ext. N Western Australia, Groote Eylandt and Melville Is.), NSL–280 m.
Remarks: Previously in the genus *Enhydris*.

P

PSEUDOFICIMIA Bocourt, 1883 *in* Duméril, Bocourt & Mocquard, 1870–1909 (Colubridae)

Type species: *Toluca frontalis* Cope, 1864.
Distribution: Western Mexico.
Sources: E.H. Taylor & Smith, 1942a, 1945, Campbell & Simmons, 1962, L.M. Hardy, 1972, 1973, 1975c and H.M. Smith & Smith, 1976, 1993.

1. *Pseudoficimia frontalis* (Cope, 1864). Proc. Acad. Nat. Sci. Philadelphia 16(3): 167. (*Toluca frontalis*)

Synonyms: *Pseudoficimia pulchra* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Pseudoficimia pulcherrima* E.H. Taylor & Smith, 1942a, and *Pseudoficimia hiltoni* Bogert & Oliver, 1945.
Type: Lectotype, USNM 31425 (formerly USNM 1363), a 502 mm female (J. Xantus, 1859–1861), designated by L.M. Hardy (1972: 58).
Type locality: "Colima" [= Colima State, W Mexico] via lectotype selection.
Distribution: Western Mexico. (Colima, ext. SW Durango, Guanajuato, Guerrero, Jalisco, S México, W Michoacán, Morelos, Nayarit, Puebla, Sinaloa, ext. S Sonora), NSL–1100 m.

PSEUDOHAJE A.C.L.G. Günther, 1858 (Elapidae)

Synonyms: *Pseudohage* – Villiers, 1951a *(nomen incorrectum)* and *Pseodohaja* – Khalil, 1963 *(nomen incorrectum).*
Type species: *Pseudohaje nigra* A.C.L.G. Günther, 1858.
Distribution: West and cen. Africa.
Sources: Bogert, 1942a, 1943, Klemmer, 1963, Hughes & Barry, 1969, Villiers, 1975, Hughes, 1976b, 1983, Roman, 1976, 1984, Courtois & Chippaux, 1977, Hughes, 1983, Golay, 1985, Joger, 1990, Golay et al., 1993, Spawls & Branch, 1995, Keogh, 1998, David & Ineich, 1999, Chippaux, 2006, Dobiey & Vogel, 2007 and Zaher et al., 2009.

1. *Pseudohaje goldii* (Boulenger, 1895c). Ann. Mag. Nat. Hist. (6) 16(91): 34. (*Naia goldii*)

Synonyms: *Naia yakomae* Mocquard, 1896a, *Pseudohaje gold* – Chapman, 1968 *(nomen incorrectum),* and *Pseudohaje gouldii* – Skoczylas, 1978 *(nomen incorrectum).*
Type: Holotype, BMNH 1946.1.21.43 (formerly BMNH 1895.5.3.53), a 1750 mm male (W.H. Crosse, 1890–1895).

Type locality: "near Asaba, about 150 miles up the Niger" [= vicinity of Asaba (6°12'N, 6°41'E, elevation 50 m), Niger River, NE Delta State, S Nigeria].

Distribution: West and cen. Africa. Southeastern Ivory Coast (Abidjan, Agboville), S Ghana (Eastern, Western), S Nigeria (Akwa Ibom, Bayelsa, Bendel, Cross River, Delta, Edo, Plateau, Rivers), S Cameroon (Adamaoua, Centre, Est, Littoral, Nord-Ouest, Ouest, Sud, Sud-Ouest), S Central African Republic (Haute-Sangha, Lobaye, Ombella-Mpoko, Ouaka, Ouham, Sangha), Equatorial Guinea (Bioko Is.), Gabon (Estuaire, Ngouié, Ogooué-Maritime, Woleu-Ntem), S Congo (Kouilou), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kinshasa, Nord-Kivu, Orientale), S Uganda (Central, Western, Sanga Is.), SW Kenya (Western), N Angola (Cuanza Sul, Lunda Norte) and NE Namibia (Okavango), NSL–1525 m.

Sources: Sternfeld, 1908b, 1909a, Boulenger, 1915a, 1920c, Angel, 1933b, H.W. Parker, 1936d, Mertens, 1941a, 1955, 1964a, 1971, Laurent, 1954a, 1958, 1960, Loveridge, 1957a, E.H. Taylor & Weyer, 1958, Perret, 1961, Isemonger, 1962, Roux-Estève, 1965, Thys van den Audenaerde, 1965, Broadley, 1968a, A. Brunner, 1968, Pitman, 1974, Courtois, 1978, Spawls, 1978, Stucki-Stirn, 1979, J.-F. Trape, 1981, 1985, J.-F. Trape & Carme, 1982, J.A. Butler & Reid, 1986, J.-F. Trape & Roux-Estève, 1995, Akani et al., 2005, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

Remarks: Probably occurs in Togo *fide* Segniagbeto et al. (2011: 353) and possibly occurs in Rwanda *fide* Spawls et al.(2002: 460).

2. *Pseudohaje nigra* A.C.L.G. Günther, 1858. Cat. Colub. Snakes Brit. Mus.: 222.

Synonym: *Naia guentheri* Boulenger, 1896a.

Type: Holotype, BMNH 1946.1.21.41, a 2130–2311 mm male (Edward, 13th Earl of Derby).

Type locality: Unknown. Designated as West Africa *fide* Boulenger (1896a: 388).

Distribution: West Africa. Guinea (Nzérékoré, Télimélé), Sierra Leone (Southern, Western), Liberia (Nimba), SE Ivory Coast, S Ghana (Ashanti, Brong-Ahafo, Central, Eastern, Western), S Togo (Plateaux), and S Nigeria (Anambra), NSL–600 m.

Sources: Sternfeld, 1908c, 1909b, Barbour & Loveridge, 1930, Cansdale, 1954, Doucet, 1963, Menzies, 1966, Roman, 1976, Rödel et al., 1995, W. Böhme et al., 2011, Segniagbeto et al., 2011 and Chirio, 2013.

PSEUDOLATICAUDA Kharin, 1984 (Elapidae)

Type species: *Platurus semifasciatus* Schlegel, 1837.

Distribution: Marine waters and outlying reefs of East Asia, East Indies and SW Pacific, including Banda Sea, Flores Sea, Java Sea, Manila Bay, Sea of Japan, South China Sea, Taiwan Strait and Yellow Sea.

Sources: Kharin, 1984, Golay et al., 1993, Kharin & Czeblukov, 2006, Kharin & Hallerman, 2009a, Zaher et al., 2009 and Hoser, 2012e.

1. *Pseudolaticauda schistorhynchus* (A.C.L.G. Günther, 1874). Proc. Zool. Soc. London 42(1): 295–299, pl. 45, fig. b. (*Platurus schistorhynchus*)

Synonym: *Laticauda semifasciata schistorhyncha* – Sternfeld, 1920c.

Type: Lectotype, BMNH 1946.1.6.98 (formerly BMNH 1874.3.31.4), a juvenile male (Rolleston via A.C.L.G. Günther), designated by Kharin & Czeblukov (2006: fig. 14) and Kharin et al. (2010: 288).

Type locality: "Niue or Savage Island,"[= Niue Island, bet. 18°57'–19°09'S and 169°46–57'W, SW Pacific Ocean].

Distribution: Southwest Pacific. Northern New Guinea (East Sepik, Bertrand Is.), Tonga, Samoa and Niue.

Remarks: Photographs of lectotype in Kharin & Czeblukov (2006: fig. 14). Boulenger (1896a: 309) erroneously listed Günther's illustration of the type as fig. A.

2. *Pseudolaticauda semifasciata* (Schlegel, 1837). Essai Phys. Serp. 2: 516. (*Platurus semifasciatus*)

Synonyms: *Platutus semifasciatus* H. Boie *in* Schlegel, 1826a *(nomen nudum), Platutus semifasciatus* F. Boie, 1827 *(nomen nudum), Platurus fasciatus* Hilgendorf, 1876 *(lapsus calami), Laticauda septemfasciata* – Rizzoli, 1973 *(nomen incorrectum), Fasciata semifasciata* – Cahill, 1981 *(nomen incorrectum),* and *Laticauda semifesciata* – Culotta & Pickwell, 1993 *(nomen incorrectum).*

Type: Holotype, RMNH 1468, an 1118 mm female (C.G.C. Reinwardt, Feb. 1821–June 1822), designated by Stejneger (1907a: 409).

Type locality: "mer des Moluques" [= Maluku, E Indonesia].

Distribution: East Asia and East Indies. Southeastern Russia, S Japan (Kyushu, Amanioshima, Erabushima, Iriomotejima, Kagoshima, Miyakojima, Okinawashima, Yakujima and Yokoshima Is.), China (Fujian, Liaoning), Taiwan (Taitung, Lan Yu Is.), Indonesia (Ambon, Flores, Java, Malukku, Seram, Sulawesi) and Philippines (Bohol, Capones, Cuyo, Gato, Luzon, Monja, Negros, Palawan, Sulu Arch., Visayas).

Sources: Temminck & Schlegel, 1838, Rooij, 1917, E.H. Taylor, 1922a, Herre & Rabor, 1949, Kuntz, 1963, Guinea et al., 1983, Tamiya et al., 1983b, M. Mori, 1986, Tian et al., 1986, Toriba & Yosida, 1986, Toriba & Nakamoto, 1987, Kharin, 2009, Xiang & Li, 2009 and A.R. Rasmussen et al., 2011.

Remarks: C.G.C. Reinwardt listed as collector of type *fide* Schlegel (1837: 516) and Stejneger (1907a: 409) but Reinwardt only collected in Java and Sumatra.

PSEUDOLEPTODEIRA E.H. Taylor, 1938 (Dipsadidae)

Type species: *Hypsiglena latifasciata* A.C.L.G. Günther, 1894.

Distribution: Western Mexico.

Sources: Boulenger, 1905g, Mocquard, 1908, Dunn, 1936, E.H. Taylor, 1938, Duellman, 1954, 1958a, Shannon & Humphrey, 1964, Dowling & Jenner, 1987, García & Ceballos, 1994, H.M. Smith et al., 2000, Canseco-Márquez & Nolasco Vólez, 2008, Reyes-Velasco & Mulcahy, 2010 and Mulcahy et al., 2011.

1. *Pseudoleptodeira latifasciata* (A.C.L.G. Günther, 1894 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 138, pl. 49, fig. b. (*Hypsiglena latifasciata*)

Synonym: *Leptodira guilleni* Boulenger, 1905g.

Type: Holotype, BMNH 1946.1.23.44, a 349 mm female (F.D. Godman & O. Salvin, 1861–1863).

Type locality: "Southern Mexico." Restricted to Huajintlán, Guerrero, Mexico *fide* H.M. Smith & Taylor (1950: 331).

Distribution: Southwestern Mexico (Chiapas, Colima, Guerrero, Jalisco, Michoacán, Morelos, Oaxaca, Puebla), 100–1300 m.

Remarks: Duellman (1958a: 91) erroneously cited type as BMNH 1946.1.2.44. BMNH catalogue lists BMNH 1946.1.23.43 as a syntype.

P

PSEUDONAJA A.C.L.G. Günther, 1858 (Elapidae)

Synonyms: *Euprepiosoma* Fitzinger, 1861, *Pseudonaia* Krefft, 1862 *(nomen emendatum), Pseudonaje* – Hoffmann, 1890 *(nomen incorrectum), Pseudojata* – K.N.G. Simpson, 1973 *(nomen incorrectum), Dugitophis* Wells, 2002, *Notopseudonaja* Wells, 2002, *Placidaserpens* Wells, 2002, and *Hulimkai* Hoser, 2012i *(nomen illegitimum).*

Type species: *Pseudonaja nuchalis* A.C.L.G. Gunther, 1858.

Distribution: Austro-Papua.

Fossil records: Pleistocene of Australia.

Sources: M.J. Smith, 1975, Gillam, 1979, Cogger et al., 1983a, Golay, 1985, Mengden, 1985b, Storr, 1985, S.K. Wilson & Knowles, 1988, Gow, 1989, Shine, 1989, Golay et al., 1993, Greer, 1997, David & Ineich, 1999, Cogger, 2000, Wells, 2002, Scanlon & Lee, 2004, A. Skinner, 2005, 2009, Sanders et al., 2008, Zaher et al., 2009 and Hoser, 2012e.

1. *Pseudonaja affinis* A.C.L.G. Günther, 1872b. Ann. Mag. Nat. Hist. (4) 9(49): 35–36, pl. 4, fig. c.

Synonyms: *Demansia nuchalis tanneri* Worrell, 1961b, *Pseudonaja affinis exilis* Storr, 1989, and *Pseudonaja affinis charlespiersoni* Hoser, 2009c & 2012i *(nomen illegitimum).*

Type: Holotype, BMNH 1946.1.19.77, a 1372 mm specimen (J.L.G. Krefft, 1861–1872).

Type locality: "Australia."

Distribution: Southwestern Australia (Southern Australia, S Western Australia, Boxer, Figure of Eight and Rottnest Is.), NSL–465 m.

Sources: Storr et al., 1986 and Bush et al., 1995.

2. *Pseudonaja aspidorhyncha* (F. McCoy, 1879c). Prod. Zool. Victoria 3: 13–14, pl. 23, figs. 4–4a. (*Diemenia aspidorhyncha*)

Synonyms: *Diemenia carinata* Longman, 1915, *Demansia acutirostris* F.J. Mitchell, 1951, and *Pseudonaja gowi* Wells, 2002.

Type: Lectotype, NMV D12352 (formerly NMV 3261 & NMV 12871), a 1345 mm specimen with prepared skull, designated by Coventry (1970: 121).

Type locality: "Junction of Murray River and Darling River, Victoria, Australia" via lectotype selection.

Distribution: Southern Australia (cen. New South Wales, S Northern Territory, SW Queensland, South Australia, NW Victoria), NSL–585 m.

Source: A. Skinner, 2009.

3. *Pseudonaja guttata* (H.W. Parker, 1926a). Ann. Mag. Nat. Hist. (9) 17(102): 668–669. (*Demansia guttata*)

Synonym: *Pseudonaja guttata whybrowi* Hoser, 2009c & 2012i *(nomen illegitimum).*

Type: Holotype, BMNH 1946.1.20.67 (formerly BMNH 1926.2.25.107), a 740 mm female (G.H. Wilkins).

Type locality: "Winton, Queensland (Lat. 22° 19' S., Long. 143° 4' E.), Australia."

Distribution: Northeastern Australia (E Northern Territory, Queensland, ext. NE South Australia), 15–455 m.

Sources: B. Miller, 1982 and Covacevich & Couper, 1991.

4. *Pseudonaja inframacula* (Waite, 1925). Rec. So. Aust. Mus. 3(1): 26–28, figs. 10–11. (*Demansia textilis inframacula*)

Types: Syntypes (2), SAMA 960a–b, 1055 mm and 960 mm specimens (E.R. Waite & F. Wood Jones, Jan. 1925), lost *fide* Cogger et al. (1983: 234) and A. Skinner (2009: 189).

Type locality: "northern end of Coffin's Bay Peninsula, on the west coast of Eyre Peninsula" [= Point Sir Isaac, S South Australia, Australia, 34°26'S, 135°12'E, elevation NSL].

Distribution: Extreme S Australia (S South Australia, North Neptunes and Wardang Is.), NSL–100 m.

5. *Pseudonaja ingrami* (Boulenger, 1908d). Ann. Mag. Nat. Hist. (8) 1(4): 334. (*Diemenia ingrami*)

Type: Holotype, BMNH 1946.1.20.32, a 1510 mm male (W. Stalker).
Type locality: "near Alexandria, in the Northern Territory of the colony of South Australia" [= vicinity of Alexandria Station, Nicholson, NE Northern Territory, N Australia, 19°05'S, 136°43'E, elevation 240 m].
Distribution: North-central Australia (cen. Northern Territory, ext. W Queensland, ext. NE Western Australia), 130–240 m.
Source: S. Phillips, 1993.

6. *Pseudonaja mengdeni* Wells & Wellington, 1985. Aust. J. Herp. (Suppl. 1): 48.

Synonym: *Pseudonaja kellyi* Wells & Wellington, 1985.
Type: Holotype, NTM 1989, a gravid female (B. Jukes).
Type locality: "2 km east of Maryvale, Northern Territory, Australia" [= 2 km E Maryvale, Titjikala, S Northern Territory, cen. Australia, 24°40'S, 134°06'E, elevation 390 m].
Distribution: Australia (W New South Wales, Northern Territory, South Australia, Western Australia), NSL–740 m.
Source: A. Skinner, 2009.

7. *Pseudonaja modesta* (A.C.L.G. Günther, 1872b). Ann. Mag. Nat. Hist. (4) 9(49): 35, pl. 3, fig. c. (*Cacophis modesta*)

Synonyms: *Brachysoma sutherlandi* De Vis, 1884c and *Furina ramsayi* Macleay, 1885a.
Type: Lectotype, BMNH 1946.1.18.42, a juvenile male (Duboulay), designated by Gillam (1979: 13).
Type locality: "Perth, Western Australia" via lectotype selection.
Distribution: Australia (NW New South Wales, Northern Territory, W Queensland, South Australia, Western Australia), NSL–955 m.
Source: Mengden, 1985a.
Remarks: Ingram (1979: 13) erroneously listed type figure as pl. 2, fig. C.

8. *Pseudonaja nuchalis* A. Gunther, 1858. Cat. Colub. Snakes Brit. Mus.: 227–228.

Synonyms: *Pseudelaps bancrofti* De Vis, 1911, *Pseudonaja imperitor* Wells & Wellington, 1985, *Pseudonaja jukesi* Wells & Wellington, 1985, and *Pseudonaja vanderstraateni* Wells & Wellington, 1985.
Type: Lectotype, BMNH 1946.1.20.41, skin of male, longest syntype 1626 mm (Edward, 13th Earl of Derby), designated by Wells & Wellington (1985: 48).
Type locality: "Port Essington, N.T." [= ruins at tip of Cobourg Peninsula, N Northern Territory, N Australia, ca. 11°09'N, 132°00'E, elevation NSL] via lectotype selection
Distribution: Australia (W New South Wales, Northern Territory, Queensland, South Australia, ext. N Victoria, Western Australia), NSL–820 m.
Sources: M.J. Smith, 1975, Bush, 1989 and Bush et al., 1995.

9. *Pseudonaja textilis* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1242–1243. (*Furina textilis*)

Synonyms: *Furina textilis* A.-M.-C. Duméril, 1853 *(nomen nudum), Pseudoelaps superciliosus* J.G. Fischer, 1856b, *Demansia annulata* A.C.L.G. Günther, 1858, *Pseudoelaps kubingii* Jan, 1859a, e, *Pseudoelaps sordellii* Jan, 1859a, e, *Pseudoelaps kubinyi* – Jan, 1863b *(nomen incorrectum), Pseudoelaps superciliosus beckeri* Jan, 1863a *(nomen nudum), Cacophis güntherii* Steindachner, 1867a *(nomen incorrigendum), Pseudelaps beckeri* Jan, 1873 *in* Jan & Sordelli, 1870–1881, *Furina bicucullata* F. Type: Holotype, MNHN 3944, a 300 mm specimen (J. Verreaux, Oct. 1846), lost *fide* Cogger et al. (1983: 233).
Type locality: "Australie" [= Australia].
Distribution: Eastern Papua New Guinea (Central, Milne Bay, Oro) and Australia (Australian Capital Territory, New South Wales, S Northern Territory, Queensland, South Australia, Victoria, ext. NE Western Australia), NSL–1235 m
Sources: F. Scott et al., 1977, Whitaker et al., 1982, K. Griffiths, 1987, Hoser, 1989, 2003b, e, 2009c, O'Shea, 1996, Watharow, 2000, J.C. Murphy & Schlager, 2003, D.J. Williams et al., 2008 and A. Skinner, 2009.
Remarks: New Guinea population possibly a separate species *fide* D.J. Williams et al. (2008: 58–59).

PSEUDOPLECTRURUS Boulenger, 1890a (Uropeltidae)

Synonym: *Pseudoplectrusus* – Briceño-Rossi, 1934 *(nomen incorrectum).*
Type species: *Silybura canarica* Beddome, 1870.
Distribution: Southern India.

Sources: A.C.L.G. Günther, 1875, Beddome, 1886, Boulenger, 1896a, Wall, 1923c, M.A. Smith,1943, Gans, 1966, Murthy, 1973, 1981c, 1982b, 1985, Mahendra, 1984 and McDiarmid et al., 1999.

1. *Pseudoplectrurus canaricus* (Beddome, 1870). Madras Month. J. Med. Sci. 2: 170. (*Silybura canarica*)

Types: Syntypes (6), BMNH 1946.1.15.95–98 (formerly BMNH 1874.4.29.940–43), BMNH 1946.1.16.71 (formerly BMNH 1872.1.2.3), and MNHN 1895.102, three males, a female and a juvenile, longest syntype 406 mm (R.H. Beddome, 1857–1870).

Type locality: "South Canara, very common on the top of the Kudra Mukh, a mountain 6,000 feet high, Madras Presidency" [= Mt. Kudremukh, SW Karnataka State, SW India, 13°08'N, 75°16'E]. Emended to near Mangalore [= 12°52'N, 74°53'E] *fide* Boulenger (1893a: 160).

Distribution: Southwestern India (Western Ghats of SW Karnataka), 1830–2000 m.

PSEUDORABDION Jan, 1862b (Calamariidae)

Synonyms: *Oxycalamus* A.C.L.G. Günther, 1864a, *Typhlogeophis* A.C.L.G. Günther, 1879a, *Thyphlogeophis* Carus, 1879 *(nomen emendatum), Idiopholis* Mocquard, 1892a–b, *Pseudorhabdion* Boulenger, 1885c *(nomen emendatum), Pseudorhabdium* Boulenger, 1893a *(nomen emendatum), Typhlogeophus* – Casto de Elera, 1895 *(nomen incorrectum),* and *Agrophis* F. Müller, 1895.

Type species: *Calamaria longiceps* Cantor, 1847.

Distribution: Malay Peninsula and East Indies.

Sources: Rooij, 1917, Leviton & Brown, 1959, Inger & Leviton, 1966, R.M. Brown et al., 1999, Zaher et al., 2009 and I. Das, 2010, 2012.

P

1. *Pseudorabdion albonuchalis* (A.C.L.G. Günther, 1896b). Ann. Mag. Nat. Hist. (6) 17(99): 229. (*Geophis albonuchalis*)

Type: Neotype, FMNH 151709 (formerly CNHM 151709), a 272 mm male (W. Hosmer, 22 March 1964), designated by Inger & Leviton (1966: 312).

Type locality: "Sungei Pesu, Fourth Division, Sarawak" [East Malaysia] via neotype selection.

Distribution: East Malaysia (Sabah, Sarawak), NSL–500 m.

Sources: Shelford, 1901b, C. Haas, 1950, Haile, 1958, Stuebing, 1991, Manthey & Grossmann, 1997 and I. Das, 2012.

Remarks: Holotype lost *fide* J.C. Battersby *in* Leviton & Brown (1959: 496). Photographs of neotype in Inger & Leviton (1966: fig. 3a–b).

2. *Pseudorabdion ater* (E.H. Taylor, 1922b). Philippine J. Sci. 21D(2): 202–203, figs. 6–7. (*Typhlogeophis ater*)

Type: Holotype, CAS 62043 (formerly EHT 1103), a 173 mm male (E.H. Taylor, 28 Sept. 1920).

Type locality: "small brook that empties into Tumugao River just above the waterwork's intake near Pasananka, Zamboanga Peninsula, Mindanao, Philippine Islands" [= Pasonanca, ext. SW Zamboanga del Sur Prov., ext. W Mindanao Is., ext. S Philippines, 6°57'N, 122°04'E, elevation 45 m].

Distribution: Extreme S Philippines (ext. SW Mindanao), 45 m. Known only from holotype.

Sources: Leviton, 1959b and Alcala, 1986.

3. *Pseudorabdion collaris* (Mocquard, 1892a). Naturaliste (2) 14(117): 35. (*Idiopholis collaris*)

Synonym: *Idiopholis everetti* Shelford, 1901.

Type: Holotype, MNHN 1891.65, a 190 mm specimen (M.A. Chaper, Nov. 1890–Jan. 1891).

Type locality: "vallée du Sebroeang (ouest de Bornéo)" [= Sebruang Valley, joining the Kapuas River NE of Sintang, cen. Kalimantan Barat Prov., W Kalimantan, Indonesia, 0°26'N, 111°53'E, elevation 300 m]. Emended to Sintang, Bornéo *fide* Mocquard (1892b: 190).

Distribution: Borneo. East Malaysia (Sabah, Sarawak) and Indonesia (W Kalimantan), 30–650 m.

Sources: Brongersma, 1946, Haile, 1959, Manthey & Grossmann, 1997, Malkmus et al., 2002 and I. Das, 2010.

Remarks: Supplemental original description in Mocquard (1892b: 191–192, pl. 7, figs. 1, 1a–c).

4. *Pseudorabdion eiselti* Inger & Leviton, 1961. Fieldiana: Zool. 44(5): 45–47, fig. 13.

Type: Holotype, NMW 16806, a 200 mm gravid female (J. Schild, 1899).

Type locality: "Padang, Sumatra" [= Padang, Sumatera Barat Prov., W Sumatra, W Indonesia, 0°57'S, 100°21'E, elevation NSL].

Distribution: Extreme W Indonesia (Nias, Siberut, W Sumatra), NSL.

Sources: Dring et al., 1990, David & Vogel, 1996 and Iskandar & Colijn, 2001.

5. *Pseudorabdion longiceps* (Cantor, 1847). J. Asiat. Soc. Bengal 16(182): 910, pl. 40, fig. 1. (*Calamaria longiceps*)

Synonym: *Rabdion torquatum* A.-M.-C. Duméril, Bibron & Duméril, 1854a.

Type: Holotype, BMNH 1946.1.2.13, a 156 mm male (W.T. Lewis, 1825–1847).

Type locality: "Great Hill of Pinang, Malayan Peninsula" [= Pinang Hill, Penang Is., Pinang State, NW West Malaysia, 5°25'N, 100°17'E].

Distribution: Malay Peninsula and Indonesia. Peninsular Thailand (Narathiwat, Pattani, Yala), West Malaysia (Johore, Pahang, Perak, Pinang, Selangor, Penang and Sibu Is.), Singapore, East Malaysia (Sarawak), Brunei and Indonesia (Bengkalis, Bintan, Galang, W Kalimantan, Nias, Riau Arch., Sumatra), NSL–500 m.

Das, 2012.

Remarks: Philippine (Luzon) record doubtful *fide* Leviton & Brown (1959: 481) and Sulawesi records doubtful *fide* Lang & Vogel (2005: 247).

6. *Pseudorabdion mcnamarae* E.H. Taylor, 1917. Philippine J. Sci. 12D(6): 363, figs. 2a–c. (*Pseudorhabdium mcnamarae*)

Synonym: *Pseudorhabdium minutum* E.H. Taylor, 1922b.

Type: Holotype, CM 2606 (formerly EHT 196), a 242 mm female (H. McNamara & E.H. Taylor, 24 Dec. 1915).

Type locality: "Mount Canlaon, or Malaspina, a volcano in the north-central part of Negros Island, Occidental Negros, P.I., elevation about 900 m" [= Mount Canlaon, N Negros Occidental Prov., N Negros Is., S Philippines, 10°25'N, 123°08'E, elevation 900 m].

Distribution: Northern Philippines (Luzon, Negros, Panay), 300–1600 m.

Sources: E.H. Taylor, 1922a–b, Leviton, 1959b, Alcala, 1986, Sison & Gonzales, 1995, Ferner et al., 2001 and Gaulke, 2011.

7. *Pseudorabdion modiglianii* G. Doria & Petri, 2010. Ann. Mus. Civ. Stor. Nat. "Giacomo Doria," Genova 102: 193–195, fig. 2.

Type: Holotype, MSNG 55461, a 203 mm female (E. Modigliani, 1–15 April 1894).

Type locality: Indonesia, Sumatra Island, Province of Sumatera Barat, Padang" [= Padang, Sumatera Barat Prov., W Sumatra, W Indonesia, 0°57'S, 100°21'E, elevation NSL].

Distribution: Western Indonesia (W Sumatra), NSL.

8. *Pseudorabdion montanum* Leviton & Brown, 1959. Proc. California Acad. Sci. (4) 29(14): 491–494, figs. 5–6.

Type: Holotype, CAS–SU 21080 (formerly SU 21080), a 531 mm female (W.C. Brown, M. Pinero & T. Serate, 22 April 1958).

Type locality: "on the north side of the north peak of Cuernos de Negros, Negros Oriental Province, Negros Island" [= Cuernos de Negros, S Negros Oriental Prov., ext. S Negros Is., S Philippines, 9°15'N, 123°11'E, elevation ca. 1200 m].

Distribution: Central Philippines (S Negros), 1200 m.

Sources: Leviton, 1959b and Alcala, 1986.

9. *Pseudorabdion oxycephalum* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 242–243. (*Rhabdosoma oxycephalum*)

Synonym: *Typhlogeophis brevis* A.C.L.G. Günther, 1879a.

Type: Holotype, BMNH 1946.1.1.99, a 305 mm female (H. Cuming, 1836–1840).

Type locality: "Philippines."

Distribution: Central Philippines (Negros, Panay), NSL–1200 m.

Sources: A.C.L.G. Günther, 1873b, Casto de Elera, 1895, L.E. Griffin, 1911, E.H. Taylor, 1922a–b, Leviton, 1959b, Alcala, 1986, Ferner et al., 2001 and Gaulke, 2011.

Remarks: Records from Luzon, Mindanao, Dinagat and Calamian doubtful *fide* Leviton & Brown (1959: 491) and Gaulke (2011: 309).

10. *Pseudorabdion sarasinorum* (F. Müller, 1895). Verh. Naturf. Ges. Basel (1892–1895) 10(3): 827–828, 2 figs. (*Agrophis sarasinorum*)

Type: Holotype, NMBA 1678, a 235 mm male (P. Sarasin & F. Sarasin, 1894).

Type locality: "Gunung (Vulcan) Soudara ca. 1200 m., Celebes" [= Gunung Duasudara, ext. E Sulawesi Utara Prov., ext. NE Sulawesi, 1°29'N, 125°09'E, elevation 1200 m].

Distribution: Eastern Indonesia (N Sulawesi), 1000–1720 m.

Sources: Boulenger, 1897g, Bosch, 1985 and Lang & Vogel, 2005.

Remarks: Illustration of holotype in Leviton & Brown (1959: fig. 7).

11. *Pseudorabdion saravacensis* (Shelford, 1901a). Ann. Mag. Nat. Hist. (7) 8(48): 516. (*Agrophis saravacensis*)

Type: Holotype, BMNH 1946.1.2.3 (formerly SMK), a 142 mm male.

Type locality: "Kuching, Sarawak, Borneo" [= Kuching, ext. W Sarawak, ext. W East Malaysia, 1°33'N, 110°21'E, elevation 30 m].

Distribution: Western East Malaysia (ext. W Sarawak), 30 m. Known only from holotype.

Source: Rooij, 1917.

12. *Pseudorabdion sirambense* G. Doria & Petri, 2010. Ann. Mus. Civ. Stor. Nat. 'Giacomo Doria' 102: 196–197, fig. 3.

Type: Holotype, MSNG 55463 (formerly MSNG 30372), a 98 mm male (E. Modigliani, 1890).
Type locality: Indonesia, Sumatra Island, Province of Sumatera Utara, 'Si Rambé' (now Sirambi, about 13 km SE of Balige, off the southern shore of Danau Toba)" [= Sirambe, 2 km N Naga Saribu, N Sumatra, 2°16'N, 99°07'E, elevation 1430 m].
Distribution: Western Indonesia (Sumatra), 1430 m.

13. *Pseudorabdion talonuran* R.M. Brown, Leviton & Sison, 1999. Asiatic Herpetol. Res. 8: 7–10, figs. 2–3.

Type: Holotype, PNM 2712, a 265 mm male (R.M. Brown & R. Sison, 28 May 1992).
Type locality: "western foothills of Mt. Madja-as (11°23'N, 122°09'E; elev. 1500 m), Barangay Allojipan, Municipality of Culasi, Antique Province, Panay Island, Philippines."
Distribution: Central Philippines (Panay), 1410–1500 m. Known only from type locality.
Sources: Ferner et al., 2001 and Gaulke, 2011.

14. *Pseudorabdion taylori* Leviton & Brown, 1959. Proc. California Acad. Sci. (4) 29(14): 502–504, figs. 9–10.

Type: Holotype, MCZ 25749, a 211 mm male (E.H. Taylor, 24–25 April 1923).
Type locality: "Saub, Cotabato Province, Mindanao Island" [= Saub, Maitum SW Sarangani Prov., ext. S Mindanao Island, ext. S Philippines, 6°02'N, 124°30'E, elevation NSL].
Distribution: Extreme S Philippines (ext. S Mindanao), NSL. Known only from the type series.
Sources: Leviton, 1959b and Alcala, 1986.

PSEUDOTOMODON Koslowsky, 1896b (Xenodontidae)

Synonym: *Pseudotomodon* Peracca, 1897c.
Type species: *Pelias trigonatus* Leybold, 1873.
Distribution: Western Argentina.
Sources: Koslowsky, 1896b, Serié, 1936, Abalos et al., 1964, J.A. Peters & Orejas-Miranda, 1970, Cei, 1986, J.D. Williams & Francini, 1991, Avila, 1997, Cruz et al., 1999, Giraudo & Scrocchi, 2002, Harvey & Muñoz, 2004, Scolaro, 2005, 2006, Gallardo, 2006, Avila, 2009a and Zaher et al., 2009.

1. *Pseudotomodon trigonatus* (Leybold, 1873). Pampas Arjent.: 82–83. (*Pelias trigonatus*)

Synonyms: *Pseudotomodon mendozinus* Koslowsky, 1896b and *Pseudotomodon crivellii* Peracca, 1897c.
Type: Holotype, ? MNHNC, a 400 mm specimen (F. Leybold, 18 Feb. 1871).
Type locality: "estancia de Lo-Aguirre, Pampas Arjentinas, Provincia Mendoza, Sud-América" [= Los Aguirre ranch [bet. San Carlos (33°46'S, 69°03W, elevation 960 m) and Tierra Blanca (ca. 34°02'S, 69°05'W, elervation 1300 m) *fide* Leybold map of expedition], San Carlos Dept., W Mendoza Prov., cen. Argentina].
Distribution: Western Argentina (Chubut, Córdoba, La Pampa, La Rioja, Mendoza, Neuquén, Río Negro, San Juan, San Luis, Santiago del Estero), 150–1650 m.
Remarks: Catamarca and Tucumán records need confirmation *fide* J.D. Williams & Francini (1991: 78).

PSEUDOTYPHLOPS Schlegel, 1839 (*nomen corrigendum*) (Uropeltidae)

Synonym: *Pseudo-typhlops* Schlegel, 1839 *in* 1837–1844 *(nomen incorrigendum)*, and *Pseudotyphlops* – M.A. Smith, 1943 *(nomen corrigendum).*
Type species: *Uropeltis philippinus* J.P. Müller, 1832.
Distribution: Sri Lanka.
Sources: A.C.L.G. Günther, 1864a, Wall, 1921g, 1923h, M.A. Smith, 1943, E.H. Taylor, 1953b, Deraniyagala, 1955, Gans, 1966, 1976, Murthy, 1973, P. Silva, 1980a, A. Silva, 1990, McDiarmid et al., 1999 and Somaweera, 2006.

1. *Pseudotyphlops philippinus* (J.P. Müller, 1832). Zeits. Physiol. 4(2): 252–253, pl. 22, figs. 2a–c, 3. (*Uropeltis philippinus*)

Synonyms: *Uropeltis philippinus* Cuvier, 1829 (*nomen nudum*), *Uropeltis philippina* Wagler, 1830 (*nomen nudum*), *Uropeltis grandis* Kelaart, 1853, *Uropeltis pardalis* Kelaart, 1853, and *Uropeltis saffragamus* Kelaart, 1853.
Type: Holotype, MNHN 5621, a 205 mm specimen.
Type locality: "Philippinischen Inseln," (in error *fide* M.A. Smith, 1943: 93). Corrected to Ceylon [= Sri Lanka] *fide* A.C.L.G. Günther (1864a: 188).
Distribution: Southeastern Sri Lanka (Central, N Eastern, Sabaragamuwa, Southern, Uva), NSL–1035 m.

PSEUDOXENODON Boulenger, 1890a (Pseudoxenodontidae)

Synonyms: *Pseudocenodon* – Palacky, 1898 *(nomen incorrectum), Psendoxenodon* – Phisalix, 1917a *(nomen incorrectum), Pseudovenodon* – Maki, 1931

(nomen incorrectum), Pseudoxenedon – Chin & Chou, 1968 *(nomen incorrectum), Pseudoendon* – Shrestha, 1981 *(nomen incorrectum),* and *Pseudaxoxenodon* – Yao, 2012 *(nomen incorrectum).*

Type species: *Tropidonotus macrops* Blyth, 1854a.

Distribution: Southeastern Asia and Greater Sundas.

Sources: C.H. Pope, 1929, 1935, Maki, 1931, Zaher et al., 2009 and I. Das, 2010.

1. *Pseudoxenodon bambusicola* T. Vogt, 1922. Arch. Naturg. 88A(10): 138–139.

Synonym: *Pseudoxenodon melli* T. Vogt, 1922.

Type: Holotype, ZMB 38070, a 510 mm male (R. Mell, 1914).

Type locality: "Provinz Kuangtung, Sudchinas" [= Guangdong Prov., S China]. Emended to Grenzberge gegen Hunan und Kiangsi in Bambus- und lichtem Laubwald zwischen 600–900 m Seehöhe nicht gerade selten by Mell (1922: 118) [= N Guangdong Prov. at the Hunan-Jiangsu border, S China, 600–900 m, ca. 24°30'N, 114°00'E].

Distribution: Southeastern China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hunan, Jiangxi, Zhejiang), Laos (Khammouan) and N Vietnam (Bac Giang, Bac Kan, Cao Bang, Ha Giang, Ha Tay, Lao Cai, Phu Tho, Thai Nguyen, Tuyen Quang, Vinh Phuc), 300–1500 m.

Sources: Mell, 1922, 1931a, M.A. Smith, 1923a, F. Werner, 1926, K.P. Schmidt, 1927a, Bourret, 1936b, 1939c–d, 1943, Gressitt, 1941b, Hu et al., 1980, Tian et al., 1986, Huang et al., 1990, Zhao & Adler, 1993, Zhao, 2006, Ziegler et al., 2006, B.L. Stuart & Heatwole, 2008, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

2. *Pseudoxenodon baramensis* (M.A. Smith, 1921b). J. Fed. Malay. States Mus. 10(3): 199. (*Tropidonotus baramensis*)

Type: Holotype, BMNH 1946.1.13.11 (formerly FMSM & MAS 4579), a 700 mm male (natives, 1919).

Type locality: "Mount Dulit, Sarawak, North Borneo, at 1,000 metres" [= Banjaran Dulit, 3rd Division, Baram Distr., N Sarawak, cen. East Malaysia, ca. 3°15'N, 114°15'E, elevation 1000 m].

Distribution: East Malaysia (Sarawak), 1000 m.

Sources: C. Haas, 1950, Malnate, 1960b, Stuebing, 1991 and Stuebing & Inger, 1999.

Remarks: C. Haas (1950: 538) erroneously listed Robinson and Kloss as collectors.

3. *Pseudoxenodon inornatus* (H. Boie *in* F. Boie, 1827). Isis von Oken 20(6): 541. (*Xenodon inornatus*)

Synonyms: *Xenodon inornatus* H. Boie *in* Schlegel, 1826a *(noemen nudum), Xenodon inornatus* Schlegel, 1826b *(noemen nudum), Pseudoxenodon jacobsonii* Lidth de Jeude, 1922, and *Pseudoxenodon inornatus buettikoferi* Brongersma & Helle, 1951.

Type: Holotype, RMNH 233, a 464–470 mm male (H. Kuhl & J.C. van Hasselt, 1821).

Type locality: "Java" [SW Indonesia]. Restricted to region of Mt. Pangerango and Mt. Salak, West Java, Indonesia *fide* Brongersma (1948b: 14). Emended to Tjihandjawar, at the foot of Mt. Pangerango, W. Java [= Cihanyawar, Nagrak, Jawa Barat, W Java, SW Indonesia, 07°03'S, 108°40'E] *fide* Brongersma (1950: 1499).

Distribution: Western Indonesia (Java, Kalimantan, Sumatra), 600–915 m.

Sources: Schlegel, 1837, Jan & Sordelli, 1866–1870, Rooij, 1917, Dammerman, 1926, Brongersma, 1950, C. Haas, 1950 and David & Vogel, 1996.

Remarks: Original description based on H. Boie's MS (1823–1825). Authorship attributed to Kuhl by F. Boie but not so stated in H. Boie MS.

4. *Pseudoxenodon karlschmidti* C.H. Pope, 1928a. Amer. Mus. Novit. (320): 3–4.

Synonyms: *Pseudoxenodon angusticeps sikiangensis* Mell, 1931a, *Pseudoxenodon sinii* Fan, 1931, *Pseudoxenodon angusticeps banaensis* Bourret, 1936b, and *Pseudoxenodon popei* Gressitt, 1936.

Type: Holotype, AMNH 34658, a 796 mm female (C.H. Pope [Third AMNH Asiatic Exped.], April–Sept. 1926).

Type locality: "Kuatun, a village in the mountains of Ch'ungan Hsien, northwest Fukien Province, China" [= Guadun, in Wuyishan Mtns., ext. N Fujian Prov., SE China, 27°45'N, 117°50'E, elevation 900–1200 m].

Distribution: Southern China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hunan) and ext. N Vietnam (Ha Giang, Vinh Phuc), 500–2500m.

Sources: Fan, 1931, Bourret, 1936b, 1939d, Gressitt, 1941a, Hu et al., 1980, Tian et al., 1986, Zhao & Adler, 1993, Zhao, 2006 and V.S. Nguyen et al., 2009.

Remarks: Supplemental original description in C.H. Pope (1929: 410–412, figs. 6a–c). Possibly occurs in Hong Kong, China *fide* Karsen et al. (1998: 162).

5. *Pseudoxenodon macrops* (Blyth, 1854a). J. Asiat. Soc. Bengal 23(3): 296–297. (*Tropidonotus macrops*)

Synonyms: *Tropidonotus angusticeps* Blyth, 1854a (*partim*), *Xenodon macrophthalmus* A.C.L.G. Günther, 1858 (*partim*), *Tropidonotus sikkimensis* J. Anderson, 1871b, *Pseudoxenodon sinensis* Boulenger, 1904a, *Tropidonotus handeli* F. Werner, 1922a, *Tropidonotus tigrinus niger* T. Vogt, 1922, *Pseudoxenodon fukienensis* C.H. Pope, 1928a, *Pseudoxenodon angusticeps uniformis* Bourret, 1935c, and *Pseudoxsenodon macrops sinensis* – Yao, 2012 *(nomen incorrectum).*

Types: Syntypes (4), ZSI 7506–07 (formerly IMC 7506–07), and ZS1 7556–57, longest syntype 744 mm (W.S. Sherwill, 1843–1854).

P

Type locality: "near Darjiling" [= vicinity of Darjeeling (27°02'N, 88°16'E, elvation 2100 m), N West Bengal State, NE India].

Distribution: Southeastern Asia. China (Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hubei, Hunan, Shaanxi, Sichuan, Xizang, Yunnan), NE India (Aranachal Pradesh, Assam, Meghalaya, Mizoram, Nagaland, Sikkim, N West Bengal), Nepal (Baglung, Darchula, Dolakha, Ilam, Kanchanpur, Kaski, Kathmandu), Bhutan, Myanmar (Kachin, Rakhine, Shan, Tanintharyi, Ramri Is.), N Thailand (Chiang Mai, Loei, Mae Hong Son, Phetchabun), N Laos (Champasak, Khammouan), Vietnam (Da Nang, Ha Tinh, Kon Tum, Lam Dong, Lao Cai, Lai Chau, Nighe An, Quang Binh,Vinh Phuc), West Malaysia (N Pahang, Perak) and East Malaysia (Sarawak), 150–3300 m.

Sources: Wall, 1909d, 1909h, 1910d, 1923d, T. Barbour, 1912a, G.E. Shaw & Shebbeare, 1929, M.L.Y. Chang, 1932, Bourret, 1935c, 1936b, 1939c–d, 1943, G.E. Shaw et al., 1939, M.A. Smith, 1943, E.H. Taylor & Elbel, 1958, L.W. Swan & Leviton, 1962, E.H. Taylor, 1965, B.L. Lim, 1967b, Campden-Main, 1970a, Deuve, 1970, Fleming & Fleming, 1973, Kramer, 1977, Hu et al., 1980, Majupuria, 1981, Tweedie, 1983, Murthy, 1986, Tian et al., 1986, K.-Y. Lue, 1987, Nanhoe & Ouboter, 1987, Zhao & Adler, 1993, M.J. Cox et al., 1998, Chan-ard et al., 1999, Farkas and Fritz, 1999c, Schleich and Kästle, 2002, Ao et al., 2004, Tiwari & Shah, 2004, Whitaker & Captain, 2004, Zhao, 2006, Bain et al., 2007, Zhao, 2006, Ziegler et al., 2007, B.L. Stuart & Heatwole, 2008, V.S. Nguyen et al., 2009 and Yao, 2012.

Remarks: K.-Y. Lue (1987: 115) listed *Pseudoxenodon macrops* from Taiwan.

P

6. *Pseudoxenodon stejnegeri* T. Barbour, 1908. Bull. Mus. Comp. Zool. 51(12): 317–318.

Synonyms: *Xenodon macrophthalmus* A.C.L.G. Günther, 1858 (*in parte*), ? *Tropidonotus dorsalis* A.C.L.G. Günther, 1864a, *Pseudoxenodon macrops sauteri* Steindachner, 1913b, *Pseudoxenodon striaticaudatus* C.H. Pope, 1928a, and *Pseudoxenodon nothus* H.M. Smith, 1942a (*nomen substitutum*).

Type: Holotype, MCZ 7103, a 602+ mm male (A. Owston, 29 Nov. 1906).

Type locality: "Mt. Arizan, Central Formosa" [= Mt. Arishan, ext. NE Chiayi Prov., cen. Taiwan, 23°35'N, 120°49'E].

Distribution: Southeastern China (Anhui, Fujian, Guangxi, Guizhou, Hebei, Hubei, Hunan, Jiangxi, Sichuan, Yunnan, Zhejiang) and Taiwan (Chiayi), 400–2100 m.

Sources: T. Barbour, 1909, Maki, 1931–b, C.-S. Wang & Wang, 1956, Hu et al., 1980, Toriba *in* Zhao, 1983, Tian et al., 1986, B.-H. Li, 1987, K.-Y. Lue et al., 1989, Huang et al., 1990, K.-Y. Lue, 1990, Zhao & Adler, 1993, Kou, 1995, Zhao, 2006, Yang, 2008 and Xiang & Li, 2009.

Remarks: Original description reprinted in T. Barbour (1909: 67–68, pl. 7, fig. 8). T. Barbour (1908: 67) erroneously reported length of type as 470 mm.

PSEUDOXYRHOPUS A.C.L.G. Günther, 1881b (*nomen protectum*) (Pseudoxyrhophiidae)

Synonym: *Homalocephalus* Jan, 1863a (*nomen rejiciendum*).

Type species: *Homalocephalus heterurus* Jan, 1863a.

Distribution: Madagascar.

Sources: Boulenger, 1890e, Guibé, 1958, Brygoo, 1983, Raxworthy & Nussbaum, 1994, Cadle, 1999, Nagy et al., 2003, Glaw et al., 2005b, Glaw & Vences, 2007, Kelly et al., 2009 and Zaher et al., 2009.

Remarks: Official Generic Name *fide* Opinion 1789 (ICZN, 1994).

1. *Pseudoxyrhopus ambreensis* Mocquard, 1894a. C. R. Soc. Philom. Paris 1894(9): 4.

Type: Holotype, MNHN 1893.213, a 296–300 mm male (C. Alluaud and Belly, May–July 1893).

Type locality: "mont d'Ambre, Madagascar" [= Mt. Ambre, Madagascar]. Emended to Mararaomby [= Maroaomby, Montagne d'Ambre, N Antsiranana Prov., ext. N Madagascar, ca. 12°30'S, 49°11'E, elevation 900 m] *fide* Raxworthy and Nussbaum (1994: 3, 5).

Distribution: Extreme N Madagascar (N Antsiranana), 900–1200 m.

2. *Pseudoxyrhopus analabe* Nussbaum, Andreone & Raxworthy, 1998. Copeia 1998(1): 129–130, figs. 1–2.

Type: Holotype, MRSN 1591, a 311 mm female (F. Andreone, H. Randriamahazo & J.E. Randrianirina, 2 Feb. 1996).

Type locality: "western slope of Anjanaharibe-Sud Mountain, Valley of Analabe River, 49°26.60'E, 14°46.62'S, 1050-m elevation, Befandriana Fivondronana, Mahajunga Province, Madagascar."

Distribution: Northern Madagascar (ext. N Mahajanga), 1050 m. Known only from type locality.

3. *Pseudoxyrhopus ankafinaensis* Raxworthy & Nussbaum, 1994. Misc. Publ. Mus. Zool., Univ. Michigan (182): 6–8, figs. 5–6.

Type: Holotype, BMNH 1882.2.25.65, a 1064+ mm male (W.D. Cowan, mid-Feb.–mid-Mar., 1880).

Type locality: "Ankafana, Betsileo, Madagascar" [= Ankafina forest, 3 km W Tsarafidy, cen. Fianarantsoa Prov., cen. Madagascar, 21°12'S, 47°13'E, elevation 1550–1650 m].

Distribution: Central Madagascar (cen. Fianarantsoa), 1550–1650 m. Known only from the holotype.

4. *Pseudoxyrhopus heterurus* (Jan, 1863a). Arch. Zool. Anat. Fis. 2(2): 286. (*Homalocephalus heterurus*)

Type: Holotype, formerly MSNM, a 525 mm specimen, destroyed in 1943 during World War II.
Type locality: "Madagascar."
Distribution: Eastern Madagascar (Antsiranana, SE Fianarantsoa, N Toamasina, ext. SE Toliara, Nosy Mangabe and Sainte-Marie Is.), NSL–950 m.
Sources: Jan & Sordelli, 1860–1866, Raxworthy, 1988 and Henkel & Schmidt, 2000.
Remarks: Official Specific Name *fide* Opinion 1789 (ICZN, 1994).

5. *Pseudoxyrhopus imerinae* (A.C.L.G. Günther, 1890). Ann. Mag. Nat. Hist. (6) 5(25): 71–72. (*Liophis imerinae*)

Synonym: *Coronella microps* Boulenger, 1888a (*nomen occupatum*).
Type: Holotype, BMNH 1946.1.7.80 (formerly BMNH 1889.8.28.22), a 457 mm female (J. Wills, 1870–1889).
Type locality: "forest-district east of Imerina, Madagascar" [= E of Imerina, (ca. 18°54'S, 47°50'E, elevation 1500 m), E Antananarivo Prov., cen. Madagascar].
Distribution: Eastern Madagascar (Antananarivo, Fianarantsoa, SE Toliara), 1275–2200 m.

6. *Pseudoxyrhopus kely* Raxworthy & Nussbaum, 1994. Misc. Publ. Mus. Zool., Univ. Michigan (182): 13–15, figs. 11–12.

Type: Holotype, UMMZ 192021, a 217 mm male (C.J. Raxworthy, 4 Sept. 1989).
Type locality: "Mandena, 24°58'S, 47°2'E, 20 m altitude, Tôlanaro (Fort Dauphin) Fivondronana, Toliara (Tuléar) Province, Madagascar."
Distribution: Extreme SE Madagascar (ext. SE Toliara), NSL–25 m. Known only from type locality.

7. *Pseudoxyrhopus microps* A.C.L.G. Günther, 1881b. Ann. Mag. Nat. Hist. (5) 7(41): 359–360, 2 figs.

Type: Holotype, BMNH 1946.1.7.76 (formerly BMNH 1881.3.29.16), a 1355–1372 mm male (T. Waters).
Type locality: "district of Betsileo, Madagascar" [= N Fianarantsoa Prov., cen. Madagascar].
Distribution: Eastern Madagascar (N Antsiranana, Fianarantsoa, Toamasina, SE Toliara, Nosy Be Is.), 70–1285 m.
Source: Angel, 1935.

8. *Pseudoxyrhopus oblectator* Cadle, 1999. Bull. Mus. Comp. Zool. 155(8): 385–390, figs. 1–2, 4, 5, 17.

Type: Holotype, MCZ 182292, a 392 mm male (J.E. Cadle, T. Pierre & R. Emile, 10 Jan. 1998).
Type locality: "Mahajo Stream (a southern tributary of the Ranomena River), Ranonvafana National Park (northern sector), Fivondronana Ifanadiana, Fianarantsoa Province, Madagascar; 1,110 m [approximately 21°13'S, 47°28'E]."
Distribution: Central Madagascar (Fianarantsoa), 900–1110 m. Known only from type locality.

9. *Pseudoxyrhopus quinquelineatus* (A.C.L.G. Günther, 1881b). Ann. Mag. Nat. Hist. (5) 7(41): 359, 2 figs. (*Liophis quinquelineatus*)

Types: Syntypes (2), BMNH 1946.1.12.33–34 (formerly BMNH 1881.3.29.13–14), a 490 mm male and 427–432 mm female (T. Waters, 1873–1881).
Type locality: "District of Betsileo, Madagascar" [= N Fianarantsoa Prov., cen. Madagascar].
Distribution: Madagascar (Antananarivo, N Antsiranana, Fianarantsoa, cen. Mahajanga, S Toamasina, Toliara), NSL–1300 m.
Source: Henkel & Schmidt, 2000.

10. *Pseudoxyrhopus sokosoko* Raxworthy & Nussbaum, 1994. Misc. Publ. Mus. Zool., Univ. Michigan (182): 22–23, figs. 17–18.

Type: Holotype, UMMZ 195847, a 353 mm male (J.B. Ramanamanjato, 27 Dec. 1990).
Type locality: "Ampamakiesiny Pass 14 km northwest of Ranomafana-Sud, 24°32'S, 47°51'E, 800 m altitude, Tôlanaro (Fort Dauphin) Fivondronana, Toliara (Tuléar) Province, Madagascar."
Distribution: Extreme SE Madagascar (SE Toliara), 75–800 m.

P

11. *Pseudoxyrhopus tritaeniatus* Mocquard, 1894a. C.R. Soc. Philom. Paris 1894(9): 4–5.

Synonym: *Pseudoxyrhopus dubius* Mocquard, 1904a.
Type: Holotype, MNHN 1891.24, a 620–642 mm male (Catat).
Type locality: "Betsileo, Madagascar" [= N Fianarantsoa Prov., cen. Madagascar].
Distribution: Eastern Madagascar (Antsiranana, Fianarantsoa, Toamasina, Nosy Mangabe Is.), 20–1000 m.
Source: Angel, 1935.

PSEUSTES Fitzinger, 1843 (Colubridae)

Synonyms: *Thamnobius* Fitzinger, 1843, *Pseuste* – A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen incorrectum), Phrynonax* Cope, 1862d, *Synchalinus* Cope, 1894d, *Paraphrynonax* Lutz & Mello, 1922a, *Paraphinonax* – Briceño-Rossi, 1934 *(nomen incorrectum), Paratynonax* – Briceño-Rossi, 1934 *(nomen*

incorrectum), Phrinonax – Briceño-Rossi, 1934 *(nomen incorrectum), Thannobsus* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Pseutes* – Fugler & Walls, 1978 *(nomen incorrectum).*

Type species: *Natrix sulphurea* Wagler *in* Spix, 1824.

Distribution: Latin America and Trinidad & Tobago.

Sources: Amaral, 1930h, J.A. Peters, 1960a, J.A. Peters & Orejas-Miranda, 1970 and Pérez-Santos & Moreno, 1988, 1991.

1. *Pseustes poecilonotus* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 100–101. (*Spilotes poecilonotus*)

Synonyms: *Tropidodipsas lunulata* Cope, 1861b, *Ahaetulla polylepis* W.C.H. Peters, 1867d, *Spilotes fasciatus* W.C.H. Peters, 1869, *Spilotes chrysobronchus* Cope, 1875a, *Spilotes argus* Bocourt, 1888 *in* A.H.A. Duméril, Mocquard & Bocourt, 1870–1909, *Synchalinus corallioides*, *Phrynonax eutropis* Boulenger, 1894a, *Phrynonax guentheri* Boulenger, 1894a, *Phrynonax lyoni* Stejneger, 1901c, *Phrynonax atriceps* F. Werner, 1913, *Phrynonax poecilonatus* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Phrynonax sancheri* Briceño-Rossi, 1934 *(nomen nudum).*

Type: Lectotype, BMNH 1946.1.7.39, a 1600 mm male (D. Dyson, 1844–1858), designated by Boulenger (1894a: 20).

Type locality: "Honduras," (probably in error) via lectotype selection. Corrected to Bristish Honduras [= Beize] *fide* K.P. Schmidt (1941: 499).

Distribution: Latin America and Trinidad & Tobago. Southern Mexico (Campeche, Chiapas, Oaxaca, Quintana Roo, San Luis Potosí, Tabasco, Veracruz, Yucatán), W Belize (Belize, Cayo, Orange Walk, Stann Creek), N Guatemala (Alta Verapaz, Petén), NW Honduras (Atlántida, Colón, Cortés, Gracias a Dios, Olancho, Yoro), E Nicaragua (Atlántico Norte, Atlántico Sur, Matagalpa), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Bocas del Toro, Chiriquí, Colón, Canal Zone, Darién, Panamá, Barro Colorado Is.), Colombia (Amazonas, Cauca, Chocó, Magdalena, Santander, Valle, Gorgona Is.), Venezuela (Amazonas, Aragua, Bolívar, Distrito Federal, Monagas, Sucre, Zulia), Trinidad and Tobago (Trinidad), Guyana (Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Pomeroon-Supenaam, Potaro-Siparuni, Upper Demerara-Berbice, Upper Takutu-Upper Essequibo), Suriname (Para, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), E Ecuador (Napo, Pastaza), E Peru (Junín, Loreto, Madre de Dios, San Martín), N Brazil (Amapá, Pará) and Bolivia (Beni, Santa Cruz), NSL–1420 m.

Sources: Bocourt, 1888 *in* Duméril, Bocourt & Mocquard, 1870–1909, A.C.L.G. Günther, 1894 (*in* 1895–1902), Peracca, 1896c, Gomes, 1918, T. Barbour & Amaral, 1924, L.C. Stuart, 1935b, 1963, Brongersma, 1937b, K.P. Schmidt, 1941, H.M. Smith & Taylor, 1945, Beebe, 1946, E.H. Taylor, 1951, 1954, Duellman, 1963, Medem, 1965, 1979, Roze, 1966a, Hoge, 1967, R.W. Cole et al., 2013.

Remarks: Boulenger (1894a: 20) listed holotype as female. L.C. Stuart (1963: 111) listed the lectotype as BMNH 1946.1.7.41. Manabi, Ecuador record doubtful *fide* Pérez-Santos & Moreno (1991: 291).

2. *Pseustes sexcarinatus* (Wagler *in* Spix, 1824). Serp. Brasil. Sp. Nov.: 35–36, pl. 12. (*Natrix sexcarinata*)

Type: Holotype, ZSM 1744/0, a 1509 mm male (J.B. Spix & K.F.P. von Martins, Aug. 1819–April 1820), destroyed 11 April 1945 during World War II.

Type locality: "ad flumen Amazonum, dans l'intérieur du Brésil" [= Río Amazonas, bet. Tajapuru (1°02'S, 51°02'W) and Manaus (3°06'S, 60°01'W), N Pará State, N Brazil].

Distribution: Northern Brazil (Pará).

Sources: Serié, 1915a, 1936, Hoge, 1964a, J.A. Peters & Orejas-Miranda, 1970, Hoogmoed & Gruber, 1983, J.D. Williams & Francini, 1991 and Cei, 1994.

Remarks: Probably a senior synonym of *P. poecilonotus* (A.C.L.G. Günther) *fide* J.A. Peters & Orejas-Miranda (1970: 258) and Dixon and Soini (1977: 68).

3. *Pseustes shropshirei* (T. Barbour & Amaral, 1924). Occ. Pap. Boston Soc. Nat. Hist. (1921–1931) (5): 131. (*Phrynonax shropshirei*)

Type: Holotype, MCZ 18819, a 1460 mm male (J.B. Shropshire [and/or W.S. Brooks & E. Wigglesworth], Jan.–Feb. 1924).

Type locality: "vicinity of Gatun, Canal Zone of Panama" [= vicinity of Gatun (9°17'N, 79°46'W, elevation 40 m), Colon Prov., cen. Panama]. Emended to Fort Sherman, Canal Zone, Panamá *fide* T. Barbour and Loveridge (1929a: 313).

Distribution: Lower Central America and N South America. Panama (Bocas del Toro, Canal Zone: Barro Colorado Is.; Colón, Darién, Panamá, Veraguas),

W Colombia (Antioquia, Atlántico, Boyacá, Cauca, Chocó, Cundinamarca, Magdalena, Meta, Norte de Santander, Santander, Tolima, Valle, Gorgona Is.), W Ecuador (Esmeraldas, Guayas), Venezuela (Aragua, Barinas, Carabobo, Cojedes, Distrito Federal, Lara, Mérida, Miranda, Táchira, Trujillo, Zulia), Trinidad and Tobago (Trinidad), N Guyana, Bolivia, Peru and Brazil, NSL–2000 m.

Sources: Brongersma, 1937b, Niceforo-Maria, 1942, C.W. Myers & Rand, 1969, Rand & Ortleb, 1969, Miyata, 1982, Pérez-Santos, 1986, Rivas-Fuenmayor & Fuentes, 1998, Gorzula & Señaris, 1998, Starace, 1998, Renjifo & Lundberg, 1999, Calcaño & Barrio-Amorós, 2003b and Navarrete et al., 2009.

Remarks: Original description listed no specific collector of holotype but Shopshire collected paratype. Introductory remarks stated Barbour had little time for field work but that Brooks & Wigglesworth collected extensively and that all specimens (including Shropshire's) were put untagged in containers from a given locality. MCZ catalogue lists Barbour, Brooks & Wigglesworth as collectors of entire series. T. Barbour & Loveridge (1929: 318) listed Shropshire as sole collector of both type and paratype. Probably a synonym of *P. poecilonotus fide* Amaral (1930h: 317) and Savage (2002: 680). E.H. Taylor's (1951, 1954) Costa Rican records were misidentified *P. poecilonotus*. Meta, Colombia record doubtful *fide* Pérez-Santos & Moreno (1988: 279).

4. *Pseustes sulphureus* (Wagler *in* Spix, 1824). Serp. Brasil. Sp. Nov.: 26–27, pl. 9. (*Natrix sulphurea*)

Synonyms: *Coluber caracaras* Gmelin, 1789, *Coluber poecilostoma* Wied-Neuwied, 1824b, *Dipsas dieperinkii* Schlegel, 1837, *Spilotes poecilostoma serrarius* Jan, 1863b (*nomen nudum*), *Phrynonax faucherei* Mocquard, 1903, and *Paraphrynonax versicolor* Lutz & Mello, 1922a.

Type: Lectotype, ZSM 1681/0, a 2791+ mm male (K.F.P. von Martius, Dec. 1819–Feb. 1820), designated by Hoogmoed & Gruber (1983: 329).

Type locality: "ad littora fluminis Japura" [= shore of Río Japurá, NW Amazonas State, ext. NW Brazil or E Amazonas Prov., ext. SE Colombia (3°08'S, 64°66'W to 0°24'S, 72°17'W) *fide* Vanzolini, 1981: xxvi].

Distribution: Northern South America and Trinidad. Southeastern Colombia (Amazonas, Caquetá, Meta, Vaupés), E Venezuela (Amazonas, Bolívar, Monagas), Trinidad and Tobago (Trinidad), Guyana (Cuyuni-Mazaruni, Demerara-Mahaica, Essequibo Islands-West Demerara, Upper Takutu-Upper Essequibo), Suriname (Marowijne, Nickerie, Para, Paramaribo), French Guiana (Cayenne, Saint-Laurent-du-Maroni), E Ecuador (Morona-Santiago, Napo), E Peru (Loreto, Madre de Dios, Pasco, San Martín), Brazil (Amazonas, Bahia, Ceará, Distrito Federal, Espírito Santo, Mato Grosso, Minas Gerais, Pará, Rio de Janeiro, São Paulo) and E Bolivia (Cochabamba, Santa Cruz), NSL–840 m.

Sources: Gomes, 1918, H.W. Parker, 1933a, Beebe, 1946, Hoge, 1964d, 1969c, Rossman & Williams, 1966, P. Müller, 1968b, Hoge & Romano-Hoge, 1970a, Amaral, 1978, Emsley, 1977, Cunha & Nascimento, 1978, 1993, Gasc & Rodrigues, 1980, Cunha et al., 1985, Abuys, 1986a, Dixon & Sonini, 1986, Pérez-Santos, 1986, Chippaux, 1987, Nascimento et al., 1988, Duellman & Salas, 1991, Henle & Ehrl, 1991, Riva et al., 1991, Fugler et al., 1995, Marques & Calleffo, 1997, J.C. Murphy, 1997, Starace, 1998, Freitas, 1999, Lehr, 2001, Duellman, 2005, Borges-Nojosa et al., 2006, Navarrete et al., 2009 and C.J. Cole et al., 2013.

PSOMOPHIS C.W. Myers & Cadle, 1994 (Xenodontidae)

Type species: *Rhadinaea obtusa* Cope, 1863b.

Distribution: Central and South America.

Sources: C.W. Myers and Cadle, 1994, Zaher et al., 2009 and Vidal et al., 2010.

1. *Psomophis genimaculatus* (Boettger, 1885a). Zeits. Naturwiss., Halle 58: 229–231. (*Liophis [Lygophis] genimaculata*)

Type: Lectotype, BMNH 1946.1.5.83 (formerly BMNH 1885.91.11), a 362 mm male, designated by Hoge (1958c: 222).

Type locality: "Paraguay" via lectotype selection.

Distribution: Southern South America. Eastern and S Bolivia (Beni, Santa Cruz), SW Brazil (Mato Grosso do Sul), N Paraguay (Boquerón, Central) and N Argentina (Corrientes, Formosa, Salta), 90 m.

Sources: Lions & Alvarez, 1997, Leynaud & Bucher, 1999 and Ziegler et al., 2003.

Remarks: Photographs of lectotype in Myers & Cadle (1994: figs. 5a, 6 upper). Lectotype erroneously listed as BMNH 1946.1.5.38 *fide* Hoge (1958b: 222). Records from Chaco, Misiones and Santa Fe, Argentina doubtful *fide* Giraudo & Scrocchi (2002: 35).

2. *Psomophis joberti* (Sauvage, 1884a). Bull. Soc. Philom. Paris (7) 8: 146–147. (*Enicognathus joberti*)

Type: Holotype, MNHN 5353 (formerly MNHN 1879.64), a 370 mm female (Jobert).

Type locality: "Marajo, Amazone" [= Marajó Is., mouth of Río Amazonas, E Pará State, N Brazil, ca. 0°53'S, 49°38'W, elevation 15 m].

Distribution: Eastern Brazil (Amazonas, Bahia, Ceará, Goias, Mato Grosso, Minas Gerais, Pará, Paraiba, Pernambuco, Rio Grande do Norte, São Paulo), NSL–125 m.

Sources: Freitas, 1999 and Passos & Fernandes, 2002b.

3. *Psomophis obtusus* (Cope, 1863b). Proc. Acad. Nat. Sci. Philadelphia 15(3): 101. (*Rhadinaea obtusa*)

Type: Holotype, USNM uncatalogued, a 410+ female (H.W. Kennedy), lost *fide* Myers & Cadle (1994: 23).

Type locality: "Paysondu, Uruguay" [= Paysandú, W Paysandú Prov., W Uruguay, 32°19'S, 58°04'W, elevation 25 m].

Distribution: Southern South America. Southern Brazil (Rio Grande do Sul), Paraguay (Central), Uruguay (Artigas, Canelones, Cerro Largo, Flores, Florida, Lavalleja, Maldonado, Montevideo, Paysandú, Rivera, Rocha, Salto, Soriano, Tacuarembó, Treinta y Tres) and N Argentina (NE Buenos Aires, Chaco, Corrientes, Entre Ríos, Formosa, San Juan, Santa Fe), 25–435 m.

†*PTEROSPHENUS* Lucas, 1898 (†Palaeophiidae)

Synonyms: †*Moeriophis* C.W. Andrews, 1901, †*Mocriophis* – Gilmore, 1938 *(nomen incorrectum),* †*Pterophenus* – Huene, 1959 *(nomen incorrectum),* and †*Pterosphernus* – Terent'ev, 1961 *(nomen incorrectum).*

Type species: †*Pterosphenus schucherti* Lucas, 1899.

Distribution: Lower Eocene of India, middle Eocene of Egypt and Uzbekistan, upper Eocene of Ecuador, Egypt, Libya and USA, and Eocene of USA.

Sources: Janensch, 1906a, Holman, 1979a, Rage, 1984b and Rage et al., 2003, 2008.

P

1. †*Pterosphenus biswasi* Rage, Bajpai, Thewissen & Tiwari, 2003. Geodiversitas 25(4): 705–707, fig. 4.

Type: Holotype, RUSB 2784-4, one trunk vertebra.

Type locality: "HD Pit (also called North Pit) in Panandhro Lignite Mine, District Kutch, Gujarat State, on the northwestern margin of India. Naredi Formation, Ypresian, Lower Eocene."

Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) of India. Known only from type locality.

2. †*Pterosphenus kutchensis* Rage, Bajpai, Thewissen & Tiwari, 2003. Geodiversitas 25(4): 701–704, fig. 2.

Type: Holotype, RUSB 2721-1, one trunk vertebra.

Type locality: "HD Pit (also called North Pit) in Panandhro Lignite Mine, District Kutch, Gujarat State, on the northwestern margin of India. Naredi Formation, Ypresian, Lower Eocene."

Distribution: Lower Eocene (Ypresian: 48.6–55.8 mya) of India. Known only from type locality.

3. †*Pterosphenus schucherti* Lucas, 1899. Proc. U.S. Natl. Mus. 21(1164): 637–638, pl. 45, figs. 1–5, 46.

Type: Holotype, USNM 4047, one trunk vertebra (C. Schuchert, 1896).

Type locality: "Eocene of Cocoa, Alabama." Emended to about two miles southeast of Melvin (Cocoa), Choctaw Co., Alabama, Jackson formation, Eocene *fide* Gilmore (1938: 57) [= two miles southeast of Melvin, ext. W Choctaw County, SW Alabama, USA; upper Eocene, Jackson formation].

Distribution: Upper Eocene (Chadronian: 33.9–38.0 mya) of USA (Alabama, Arkansas, Georgia, Louisiana, Mississippi, Texas) and Eocene (33.9–55.4) of USA (Florida, New Jersey).

Sources: Gilmore, 1938, H.W. Miller, 1955, Holman, 1977a, 2000a, Westgate & Ward, 1981, Westgate, 1984, Hutchison, 1985, Parmley & Case, 1988 and Holman et al., 1991.

Remarks: Rage (184b: 36) listed ca. 40 vertebrae as syntypes.

5. †*Pterosphenus schweinfurthi* (C.W. Andrews, 1901). Geol. Mag. (4) 8(10): 438–440, fig. 2. (†*Moeriophis schweinfurthi*)

Type: Holotype, CGM C10194, one trunk vertebra.

Type locality: "Lower Tertiary deposits of Egypt" [= north of Birket Qurun 8 (The Fayum), Qasr el Sagha formation, upper Bartonian (= Priabonian), upper Eocene].

Distribution: Middle Eocene (Lutetian: 37.2–48.6 mya) of Egypt and upper Eocene (Priabonian: 33.9–37.2 mya) of Egypt and Libya.

Sources: C.W. Andrews, 1906 and Hoffstetter, 1960b.

6. †*Pterosphenus sheppardi* Hoffstetter, 1958a. Bull. Soc. Géol. France (6) 8(1): 45–49, pl. 7.

Type: Holotype, BMNH 5504, five articulated trunk vertebrae with six proximal ribs (G. Sheppard, 1929).

Type locality: "Ancon se situe au S de la péninsule de Santa Elena, dans la région Côtière de la République de l'Équateur (Amérique du Sud), et correspond approximativement aux coordonnées: lat. 2°20' S, long. 80°50' W. La formation Seca, dont le nom est emprunté à la Quebrada Seca du Même district... indique clairement l'Éocène supérieur et plus précisément l'âge Jackson de l'échelle nord-américaine" [= vicinity of Ancon, ext. W Guayas Prov., SW Ecuador, 2°20'S, 80°50'W; upper Eocene, Seca Formation].

Distribution: Upper Eocene (33.9–37.2 mya) of Ecuador. Known only from type series.

Sources: Hoffstetter, 1958b, 1970.

†*PTERYGOBOA* Holman, 1976a (Boidae)

Type species: †*Pterygoboa miocenica* Holman, 1976a.
Distribution: Lower and middle Miocene of USA.
Sources: Holman, 1976a, 1977e, 1979a, 1998b.

1. †*Pterygoboa delawarensis* Holman, 1998b. Delaware Geol. Surv., Spec. Publ. (21): 143–144, figs. 1a–e.

Type: Holotype, USNM 483393, one trunk vertebra.
Type locality: "From the Pollack Farm Site (Delaware Geological Survey site Idll-a, near Cheswold, Kent County, Delaware. Cheswold sands of the Calvert Formation; lower Miocene, Hemingfordian Age."
Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (Delaware). Known only from holotype.

2. †*Pterygoboa miocenica* Holman, 1976a. Herpetologica 32(1): 43–44, figs. 2a–c.

Type: Holotype, SDSM 8376, one trunk vertebra.
Type locality: "Black Bear Quarry II (early Heminfordian) Bennett County, South Dakota, USA; Rosebud Formation, early Hemingfordian (lower middle Miocene)."
Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (South Dakota), and middle Miocene (Barstovian: 13.6–16.3 mya) of USA (Nebraska, South Dakota).

PTYAS Fitzinger, 1843 (Colubridae)

Synonyms: *Zaocys* Cope, 1861c, *Zapyrus* A.C.L.G. Günther, 1864a, *Megablabes* A.C.L.G. Günther, 1865, *Zaoccys* Theobald, 1872 *(nomen emendatum), Hemidryas* W. Peters & Doria, 1878, *Zoacys* – Steindachner, 1913b *(nomen incorrectum), Zaocis* – Kopstein, 1930 *(nomen incorrectum), Ptays* – Maki, 1931 *(nomen incorrectum)* and *Pytas* – Shrestha, 1981 *(nomen incorrectum).*
Type species: *Coluber mucosus* Linnaeus, 1758.
Distribution: Southern and E Asia and East Indies.
Fossil records: Pleistocene of India.
Sources: Rooij, 1917, Wall, 1926b, M.A. Smith, 1943, C. Haas, 1950, E.H. Taylor, 1965, Saint-Girons, 1972a, Hu et al., 1980, Tweedie, 1983, Hodges, 1993, Nagy et al., 2004 and I. Das, 2011.
Remarks: *Zaocys* a synonym *fide* Wall (1914e: 168), E.H.Taylor (1965: 738) and Leviton (1983: 200).

1. *Ptyas carinata* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 112–113. (*Coryphodon carinatus*)

Synonym: *Zaocys tenasserimensis* Sclater, 1891a.
Type: Lectotype, BMNH 1946.1.11.35, a 3048 mm male (E. Belcher, 1843–1846), designated by A.C.L.G. Günther (1864a: 256).
Type locality: "Borneo" via type locality restriction.
Distribution: Southeast Asia and East Indies. Southwestern China (Yunnan), S Myanmar (Karen, Tanintharyi), Thailand (Chiang Mai, Lampang, Nakhon Si Thammarat, Pattani, Phang Nga), Laos, cen. Vietnam (Binh Phuoc, Da Nang, Thua Thien-Hue), Cambodia (Mandolkivi), West Malaysia (Johor, Perak, Perlis, Selangor, Tioman Is.), Singapore, East Malaysia (Sarawak), Brunei, W Indonesia (Java, W Kalimantan, Sumatra), and ext. SW Philippines (cen. Palawan), NSL–2165 m.
Sources: Lidth de Jeude, 1922, E.H. Taylor, 1922a, Kopstein, 1930, Bourret, 1934c, B.L. Lim, 1964, Campden-Main, 1970a, Leviton, 1983, Alcala, 1986, K.K.P. Lim & Chou, 1990, Stuebing, 1991, K.K.P. Lim & Lim, 1992, Zhao & Adler, 1993, David & Vogel, 1996, M.J. Cox et al., 1998, Grismer et al., 2002b, B.L. Stuart et al., 2006, I. Das, 2007b, 2010, 2012 and V.S. Nguyen et al., 2009.
Remarks: Possibly occurs in Cambodia *fide* Iskandar & Colijn (2001: 79).

2. *Ptyas dhumnades* (Cantor, 1842b). Ann. Mag. Nat. Hist. 9(59): 483. (*Coluber dhumnades*)

Synonyms: *Ablabes vittatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Zaocys oshimai* Stejneger, 1925, and *Zaocys dhumnades montanus* C.H. Pope, 1928b.
Type: Lectotype, BMNH 1946.1.14.89, a male (T.E. Cantor, July 1840–March 1841, via British East India Comp.), designated by Boulenger (1893a: 376), lost *fide* V.S. Nguyen et al. (2009: 335).
Type locality: "Chusan" [= Zhoushan Is., Zhoushan Arch., Zhejiang Prov., E China, bet. 29°57'–30°11'N & 121°56'–122°20'E] via lectotype selection.
Distribution: Eastern Asia. Eastern China (Anhui, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hebei, Henan, Hubei, Hunan, Jiangsu, Jiangxi, Shaanxi, Sichuan, Yunnan, Zhejiang), Taiwan (Chiai, Nantou, Pingtung, Taichung, Taipei) and ext. N Vietnam (Hoang Lien Son, Lao Cai, Vinh Phuc), 130–2000 m.
Sources: Wall, 1903, C.H. Pope, 1929, 1935, Maki, 1931, Angel & Bourret, 1933, Bourret, 1939d, C.-S.Wang & Wang, 1956, Kuntz, 1963, Mao, 1965b, Deuve, 1970, Hu et al., 1980, Tian et al., 1986, B.H. Li, 1987, K.-Y. Lue, 1987, K.-Y. Lue et al., 1989, Huang et al., 1990, Ota, 1991, Zhao & Adler, 1993, Kou, 1995, Zhao, 2006, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010, 2012 and Yao, 2012.

Remarks: Boulenger (1893a: 376) listed both syntypes as male. Probably occurs in N Laos *fide* Deuve (1970: 131).

3. *Ptyas dipsas* (Schlegel, 1837). Essai Phys. Serp. 1: 153, 2: 197–198. (*Herpetodryas dipsas*)

Synonyms: *Leptophis olivaceus* Duméril, Bibron & Duméril, 1854a and *Megablabes olivaceus* A.C.L.G. Günther, 1865.

Type: Holotype, MNHN 7313, an 1830–1872 mm male lacking a skull (J.R.C. Quoy & J.P. Gaimard, 1828).

Type locality: "Célèbe" [= Sulawesi, E Indonesia].

Distribution: Eastern Indonesia (Sulawesi), NSL–1100 m.

Sources: Bosch, 1985, Lazell et al., 1991, Lang & Vogel, 2005, and Koch, 2012.

Remarks: Halmahera record of Roux (1904) rejected *fide* Lazell et al. (1991: 356).

4. *Ptyas fusca* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 112. (*Coryphodon fuscus*)

Synonym: *Herpetodryas horneri* Jan, 1863b.

Type: Lectotype, BMNH 1946.1.17.14, a juvenile male (E. Belcher, 1843–1846), designated by C. Haas (1950: 538).

Type locality: "Borneo" [= Kalimantan] via lectotype selection..

Distribution: Malay Peninsula and W Indonesia. Peninsular Thailand (Phang Nga), West Malaysia (Johor, Pinang), Singapore, East Malaysia (Sabah, Sarawak), Brunei and W Indonesia (Bangka, Belitung, Kalimantan, Natuna Besar, Nias, Sumatra), NSL–1330 m.

Sources: Lidth de Jeude, 1922, C. Haas, 1950, K.K.P. Lim & Chou, 1990, Stuebing, 1991, David & Vogel, 1996, M.J. Cox et al., 1998, Malkmus et al., 2002, Pauwels et al., 2002 and I. Das, 2010, 2012.

Remarks: Singapore record doubtful *fide* K.K.P. Lim & Lim (1992: 145).

5. *Ptyas korros* (Schlegel, 1837). Essai Phys. Serp. 1: 145, 2: 139. (*Coluber korros*)

Synonyms: *Coluber korros* H. Boie *in* Schlegel, 1826a *(nomen nudum), Coluber korros* Schlegel, 1826b *(nomen nudum), Coluber boncorage* Lesson, 1831, *Coluber korros* Lesson, 1831 *(nomen praeoccupatum), Coluber cancellatus* Oppel *in* Schlegel, 1837 (*nomen ineditum*), *Liopeltis libertatis* T. Barbour, 1910, *Ptyas korros chinensis* Mell, 1931a, and *Ptyas korros indicus* Mell, 1931a.

Types: Syntypes (7), RMNH 410a–d, RMNH 411 (H. Boie & H.C. Maclklot, Dec. 1825–Sept. 1827) [Java] and RMNH 414a–b (L. Horner, Feb.–Dec. 1835) [Padang], longest syntype 1630 mm.

Type locality: "îles de Java et de Sumatra" [= Java and Sumatra, Indonesia]. Restricted to Java, W Indonesia *fide* M.A. Smith (1943: 162) and RMNH catalogue.

Distribution: Southeastern Asia and W Indonesia. Northeastern India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, N West Bengal), Bangladesh (Chitagong), Bhutan, Myanmar (Kachin, Tanintharyi, Yangon), Thailand (Chainat, Chaiyaphum, Chanthaburi, Chiang Mai, Chon Buri, Chumphon, Kalasin, Khon Kaen, Krung Thep Mahanakhon, Loei, Lop Buri, Nakhon Pathom, Nakhon Ratchasima, Nakhon Si Thammarat, Narathiwat, Pattani, Phang Nga, Phatthalung, Phetchabun, Phuket, Prachin Buri, Prachuap Khiri Khan, Rayong, Saraburi, Sisaket, Songkhla, Suphan Buri, Trang, Yala), SE China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hunan, Jiangxi, Yunnan, Zhejiang), Taiwan (Hsinchu, Nantou, Tainan, Taipai), Macau, Laos (Attapu, Bolikhansai, Champasak, Houaphan, Khammouan, Louangphrabang, Phongsali, Savannakhet, Salavan, Vientiane, Xaignabouli, Xekong, Xiangkhouang), Cambodia (Chhnang, Koh Kong, Kampong, Kampong Cham, Kampong Speu, Kandal, Siem Reap, Takeo), Vietnam (Bac Giang, Bac Kan, Bac Ninh, Binh Dinh, Binh Dong, Binh Phuoc, Ca Mau, Cao Bang, Dak Lak, Da Nang, Dong Nai, Ha Giang, Hai Duong, Ha Tay, Ha Tinh, Hoa Binh, Ho Chi Minh City, Khanh Hoa, Kien Giang, Kon Tum, Lam Dong, Lang Son, Lao Cai, Nghe An, Ninh Binh, Phu Tho, Quang Binh, Quang Nam, Quang Ninh, Quang Tri, Soc Trang, Son La, Tay Ninh, Thai Nguyen, Thanh Hoa, Thua Thien-Hue, Tuyen Quang, Vinh Phuc), West Malaysia (Perak, Perlis, Pinang, Selangor), Singapore and W Indonesia (Bali, Java, Kalimantan, Sumatra), NSL–3000 m.

Sources: Schlegel, 1844, Wall & Evans, 1900, Stejneger, 1907a, Wall, 1925d, Dunn, 1927, K.P. Schmidt, 1927a, C.H. Pope, 1929, 1935, Mell, 1930, Fan, 1931, Maki, 1931–b, Brongersma & Wehlburg, 1933, Bourret, 1934d, 1935b–d, 1937b, 1939a, 1941b, Herklots, 1934, Kopstein, 1938, G.F. Cox et al., 1998, Chan-ard et al., 1999, Orlov et al., 2000, Ahsan & Parvin, 2001, Auliya, 2002, Whitaker & Captain, 2004, Zhao, 2006, M.F. Ahmed et al., 2009, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010, 2012 and Wangyal, 2011.

Remarks: Schlegel listed C. Reinwardt as collector but types collected by H. Boie, H.C. Macklot & L. Horner *fide* C. Haas (1950: 546) and RMNH catalogue. Probably belongs in *Xenelaphis* based on hemipenis

(Brongersma & Wehlburg, 1933) and multicameral tracheal lung (Wallach, 1998a).

6. *Ptyas luzonensis* (A.C.L.G. Günther, 1873b). Proc. Zool. Soc. London 41(1): 169–170. (*Zaocys luzonensis*)

Type: Holotype, BMNH 1946.1.7.89, a 2500–2591 mm male (A.B. Meyer, 1870–1873).

Type locality: "Luzon, Philippine Islands." Restricted to Manila, Luzon, N Philippines *fide* A.B. Meyer (1887: 9).

Distribution: Northern and cen. Philippines (Catanduanes, Leyte, Luzon, Negros, Panay, Polillo), NSL–1100 m.

Sources: Boulenger, 1893a, Boettger, 1898, E.H. Taylor, 1922a, Leviton, 1983, Alcala, 1986, Ross et al., 1987, Ross & Gonzales, 1992 and Devan-Song & Brown, 2012.

7. *Ptyas mucosa* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 226. (*Coluber mucosus*)

Synonyms: *Coluber blumenbachii* Merrem, 1820, *Natrix shawii* Wagler, 1825 (*nomen ineditum*), *Coluber dhumna* Cantor, 1839b, *Leptophis trifrenatus* Hallowell, 1861, *Coryphodon blumenbachi carinata* Jan, 1867 *in* Jan & Sordelli, 1866–1870, *Zamenis mucosus pallidus* Abreu, 1918, and *Ptyas mucosus maximus* Deraniyagala, 1955.

Type: Holotype, NHR Lin- 61 (formerly MAFR), a 455 mm specimen (Mus. Drottn.).

Type locality: "Indiis" [= India].

Distribution: Southern Asia and W Indonesia. Southern Turkmenistan, E Iran, Afghanistan (Faryab, Herat, Kabul, Kandahar, Nangarhar, Wardak), Pakistan (SW Balochistan, F.A.T.A., Gilgit-Baltistan, Khyber Pakhtunkhwa, Punjab, Sindh), India (Andaman & Nicobars: Andaman Is., Andhra Pradesh, Assam, Bihar, Gujarat, Himachal Pradesh, Jammu and Kashmir, Karnataka, Kerala, Maharashtra, Madhya Pradesh, Manipur, Mizoram, Nagaland, Orissa, Punjab, Rajasthan, Sikkim, Tamil Nadu, Uttar Pradesh, West Bengal), Sri Lanka (Central, Eastern, North Central, Northern, North Western, Sabaragamuwa, Southern, Uva, Western), Nepal (Achham, Bajhang, Baitadi, Bajura, Banke, Bara, Bardiya, Bhojpur, Chitwan, Dailekh, Dang, Dadeldhura, Dhankuta, Dhanusa, Doti, Jhapa, Kailali, Kanchanapur, Kapilbastu, Kaski, Kathmandu, Mahottari, Makwanpur, Morang, Mugu, Nawalparasi, Nuwakot, Parsa, Rautahat, Rupandehi, Sankhuwasabha, Saptari, Sarlahi, Siraha, Sunsari, Surkhet, Udayapur), Bangladesh, Myanmar (Chin, Mandalay, Rangoon, Shan, Yangon), Thailand (Bangkok, Chaiyaphum, Kanchanaburi, Krung Thep Mahanakhon, Lampang, Loei, Lop Buri, Nakhon Pathom, Rayong, Si Saket), S China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hubei, Hunan, Jiangxi, Sichuan, Yunnan, SE Xizang, Zhejiang), Taiwan (Chiai, Hsinchu, Nantou, Pingtung, Taiman, Taipei, Penghu Is.), Macau, Cambodia (Kandal, Kampong Chan, Kampong Chhnang, Preah Vihear, Siem Reap, Takeo), Laos (Champasak, Khammouan, Louangphrabang, Vientiane, Xiangkhouang), Vietnam (Ca Mau, Cao Bang, Dak Lak, Da Nang, Dien Bien, Dong Nai, Hanoi, Ha Tinh, Hoa Binh, Ho Chi Minh City, Kien Giang, Lang Son, Lao Cai, Nghe An, Ninh Binh, Phu Tho, Quang Binh, Quang Nam, Son La, Tay Ninh, Thai Nguyen, Thanh Hoa, Vinh Phuc, Yen Bai), West Malaysia (Pahang, Pinang) and W Indonesia (Bali, Java, Sumatra), NSL–4000 m.

PTYCHOPHIS Gomés, 1915 (Dipsadidae)

Synonym: *Paraptychophis* Lema, 1967: 62.
Type species: *Ptychophis flavovirgatus* Gomés, 1915.
Distribution: Southeastern Brazil.
Sources: Amaral, 1930e–f, 1977, Lema, 1967, Hoge & Romano-Hoge, 1969a, J.A. Peters & Orejas-Miranda, 1970, Porto & Caramaschi, 1988, Lema & Deiques, 1992 and Zaher et al., 2009.

1. *Ptychophis flavovirgatus* Gomés, 1915. Ann. Paul. Med. Cirurg. 4(6): 128–129, pl. 4, figs. 4–6.

Synonym: *Paraptychophis meyeri* Lema, 1967.
Type: Holotype, IB 526, a 510 mm male (A. Swarowsky, April 1914), destroyed by fire 15 May 2010.
Type locality: "São Bento, Estado de Santa Catharina, Brazil" [= São Bento do Sul, NE Santa Catarina State, S Brazil, 26°15'S, 49°23'W, elevation 835 m].
Distribution: Southeastern Brazil (ext. S Minas Gerais, E Paraná, Rio Grande do Sul, N Santa Catarina), 10–1300 m.

Nguyen et al., 2009, Xiang & Li, 2009, Barker & Barker, 2010a and Dorcas & Willson, 2011.

Remarks: Original description based on Seba (1735: 20, pl. 19, figs. 1 and 28, pl. 27, fig. 1). Introduced and established in USA (S Florida) *fide* Dorcas & Willson, 2011. Possibly occurs in West Malaysia *fide* I. Das (2012: 142).

3. *Python breitensteini* Steindachner, 1880. Sitz. Akad. Wiss. Wien, Math.-Naturwiss. Kl. 82(2): 267–268.

Type: Holotype, NMW 13287, an 800 mm specimen (H. Breitenstein, 1880).

Type locality: "Teweh, Borneo" [= Muarateweh, Central Prov., cen. Kalimantan, Indonesia, 0°56'S, 143°53'E, elevation 35 m].

Distribution: Borneo. East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Kalimantan), NSL–600 m.

Sources: Keogh et al., 2001, Malkmus et al., 2002, I. Das, 2010, 2012 and Zug et al., 2011.

Remarks: Type locality at junction of Barito and Teweh rivers *fide* Keogh et al. (2001: 122).

4. *Python brongersmai* Stull, 1938. Occ. Pap. Boston Soc. Nat. Hist. (8): 297–298. (*Python curtus brongersmai*)

Type: Holotype, MCZ 29779, an 1180 mm male.

Type locality: "Singapore, Malay Peninsula."

Distribution: Southeast Asia and W Indonesia. Southern Thailand (Krabi, Nakhon Si Thammarat, Pattani, Phang Nga, Ratchaburi, Songkhla, Surat Thani), Vietnam (Binh Thuan, Ca Mau, Ho Chi Minh City), West Malaysia (Johor, Kedah, Kuala Lumpur, Melaka, Pinang, Perak, Selanger), Singapore and W Indonesia (Bangka, Bintan, Sumatra), NSL–85 m.

Sources: Keogh et al., 2001, J.C. Murphy & Schlager, 2003, V.S. Nguyen et al., 2009, I. Das, 2010, 2012 and Zug et al., 2011.

Remarks: Status undetermined in Singapore *fide* K.K.P. Lim & Lim (1992: 144). Questionable records from Vietnam may be introductions.

5. *Python curtus* Schlegel, 1872. De Dierentuin Nat. Art. Mag., Rept. (4): 54, 1 fig.

Type: Holotype, RMNH 3782, a 460 mm male (S. Müller, 1833–1835).

Type locality: "Sumatra" [W Indonesia]. Restricted to between Padang and Indrapura, Sumatra *fide* Hubrecht (1879c: 245) and vicinity of Padang and in the Padang Highlands *fide* Brongersma (1947b: 667).

Distribution: Indonesia (Bangka, Beitung, Bengkulu, Lampung, Sumatra), NSL–920 m.

Sources: Hubrecht, 1879d, Blanford, 1881, Sauvage, 1884, J.G. Fischer, 1885a, Boulenger, 1889c, 1912c, 1920e, Flower, 1896, 1899, Zenneck, 1898, Ridley, 1899, Rooij, 1917, Robinson & Kloss, 1920, Stull, 1935, 1938, Westermann, 1942, Brongersma, 1947b, C. Haas, 1950, B.L. Lim, 1955, 1956, 1958, 1960, Haile, 1959, E.H. Taylor, 1965, Stimson, 1969, Tweedie, 1983, K.F.L. Lim & Lee, 1989, K.K.P. Lim & Chou, 1990, Stuebing, 1991, D.G. Barker & Barker, 1994, David & Vogel, 1996, M.J. Cox et al., 1998, Chan-ard et al., 1999, Keogh et al., 2001, I. Das, 2010, 2012 and Zug et al., 2011.

6. †*Python europaeus* Szyndlar & Rage, 2003. Booidea Oligocene Miocene Europe: 68–70, figs. 31e–g.

Type: Holotype, MNHN VCO 29, one trunk vertebra.

Type locality: "Vieux Collonges (= Mont Ceindre) (France), early/middle Miocene (MN 4/5)."

Distribution: Lower Miocene (Orleanian, MN 4–5: 13.7–16.9 mya) of France.

7. *Python kyaiktiyo* Zug, Gotte & Jacobs, 2011. Proc. Biol. Soc. Washington 124(2): 129–130, figs. 2a–b, 3.

Type: Holotype, USNM 572046, 1270 mm gravid female (W.K. Sai, Z.L. Win & N. Hla, 11 Mar. 2002).

Type locality: "Myanmar, Mon State, in Kyaiktiyo Wildlife Sanctuary at Yetagon Myaung (17°26'38"N, 97°05'58"E;~390 m elevation), approximately 5 km NE Kinmun."

Distribution: Southern Myanmar (Mon), 390 m. Known only from type locality.

8. †*Python maurus* Rage, 1976. Géol. Méditer. 3(2): 59–60, fig. 3, pl., fig. 13.

Type: Holotype, MNHN BML900, one trunk vertebra.

Type locality: "Beni Mellal, Maroc; Miocène" [= Beni Mellal, Beni Mellal Prov., cen. Morocco; middle Miocene].

Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of Morocco. Known only from type series.

9. *Python molurus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 225. (*Coluber molurus*)

Synonyms: *Boa albicans* J.G. Schneider, 1801, *Boa castanea* J.G. Schneider, 1801, *Boa cinerea* J.G. Schneider, 1801, *Boa orbiculata* J.G. Schneider, 1801, *Boa ordinata* J.G. Schneider, 1801, *Coluber boaeformis* G. Shaw, 1802, *Boa moluroidea* Daudin, 1803b (*nomen nudum*), *Python bora* Daudin, 1803b, *Python tigris* Daudin, 1803b, *Python jamesonii* Gray, 1842a, *Astrophis tigris* Fitzinger, 1861, *Python albo-maculata* Higgins, 1873 *Python bimaculata* Higgins, 1873, *Python bora* Higgins, 1873, *Python lazuli* Higgins, 1873, *Python molurus intermedia* F. Werner, 1899d, *Python molurus ocellata* F. Werner, 1899d, and *Python molurus pimbura* Deraniyagala, 1945.

Type: Holotype, NHR Lin-5 (formerly MDG), an 1140 mm female.

Type locality: "Indiis" [= India].

Distribution: Southern Asia. Pakistan (E Balochistan, N Punjab, Sindh), India (Andhra Pradesh, Arunachal Pradesh, Goa, Gujarat, Jammu and Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttaranchal, Uttar Pradesh, West Bengal, Sikkim), Nepal (Bardiya), Bangladesh and Sri Lanka (Central, Eastern, Sabaragamuwa, Western), NSL–2500 m.

Sources: Boulenger, 1893a, Wall, 1907e, 1912a, 1921g, 1923c, 1925a , 1926a, Rooij, 1917, Mertens, 1930, F. Werner, 1930b, G.E. Shaw et al., 1938a, M.A. Smith, 1943, Deraniyagala, 1955, Daniel & Shull, 1963, Deoras, 1965, Minton, 1966, Deuve, 1970, Fleming & Fleming, 1973, Acharjyo & Mishra, 1976, 1980, R.C. Remarks: Holotype in ZMUU *fide* Stimson (1969: 31) but not listed by Lönnberg, 1896, Vanzolini, 1969, or Wallin, 2001. *Python sebae* or *P. natalensis* are recorded in the Pliocene of Laetoli, Tanzania (Rage & Bailon, 2011).

15. *Python timoriensis* (W.C.H. Peters, 1876b). Mber. Königl. Akad. Wiss. Berlin 1876(8): 533, pl., figs. 3–3c. (*Liasis amethystinus timoriensis*)

Synonyms: *Python timorensis* Boulenger, 1893a *(nomen emendatum),* and *Liasis petersii* Hubrecht, 1879b.

Type: Holotype, ZMB 8927, a decapitated head (De Jong) *fide* C. Haas (1950: 523).

Type locality: "Kupang (Timor)" [Indonesia] (in error *fide* McDiarmid et al., 1999: 182, confirmed *fide* H. Kaiser *in* Lang, 2011: 184).

Distribution: Lesser Sundas of S Indonesia (Adonara, Flores, Lomblen, Lombok, Pantar, Solor, Sumbawa).

Sources: Rooij, 1917, F. Werner, 1921b, Mertens, 1930, C. Haas, 1950, Brongersma, 1956b, 1968 and Lang, 2011.

Remarks: Official Specific Name no. 2425 *fide* Opinion 939 (ICZN, 1970). Records from Komodo and Timor questionable *fide* Iskandar & Colijn (2001: 31).

PYTHONODIPSAS A.C.L.G. Günther, 1868 (Pseudaspididae)

Synonyms: *Pythondipsas* – Ditmars, 1933 *(nomen incorrectum), Phitodipsas* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Pythanodipsas* – Visser, 1967 *(nomen incorrectum).*

Type species: *Pythonodipsas carinata* A.C.L.G. Günther, 1868.

Distribution: Southwestern Africa.

Sources: Mertens, 1955, 1971, V.F.M. FitzSimons, 1962a, 1974, C.T. Stuart, 1976, Marx et al., 1982, Broadley, 1983, Schätti & McCarthy, 1987, Branch, 1988, Marais, 1992, Marais, 2004, Lawson et al., 2005, Vidal et al., 2008 and Kelly et al., 2009.

1. *Pythonodipsas carinata* A.C.L.G. Günther, 1868. Ann. Mag. Nat. Hist. (4) 1(6): 426, pl. 19, fig. k.

Type: Holotype, BMNH 1946.1.4.70 (formerly SAM), a 622 mm male (? J. Chapman, 1861–1863).

Type locality: "Zambezi" [= Zambezi River, Mozambique] (in error). Corrected to Damaraland, NW Namibia *fide* Broadley (1971c: 679).

Distribution: Southwestern Angola (Namibe) and W Namibia (Erongo, Hardap, Karas, Khomas, Kunene), NSL–870 m.

Remarks: Original description attributes collector to J. Chapman on the Zambezi River (and Broadley has shown that Chapman did not go down the Zambezi and that type locality is in Namibia); however, Günther (1868: 413–414) also listed Cape Town Mus. as source so it is more likely that the type came from SAM rather than Chapman.

R

RABDION A.-M.-C. Duméril, 1853 (Calamariidae)

Synonyms: *Rhabdion* Lichtenstein & Martens, 1856 *(nomen emendatum), Rhabdophidium* Boulenger, 1894a *(nomen substitutum), Rabdophidium* – Palacky, 1898 *(nomen incorrectum),* and *Rhacophidium* – Boettger, 1900 *(nomen incorrectum).*
Type species: *Rabdion forsteni* A.-M.-C. Duméril, Bibron & Duméril, 1854a.
Distribution: Eastern Indonesia.
Sources: Zaher et al., 2009 and Koch, 2012.

1. *Rabdion forsteni* A.-M.-C. Duméril, Bibron & Duméril, 1854a. Erpet. Gén. 7(1): 116–119.

Types: Syntypes (2), MNHN 7210, a 399 mm specimen, and RMNH 46 (E.A. Forsten, 1840–1842).
Type locality: "iles Célèbes" [= Sulawesi, E Indonesia].
Distribution: Eastern Indonesia (Sulawesi), 1830 m.
Sources: Bleeker, 1857b, Boettger, 1900, Rooij, 1917c, Haas, 1950, Bosch, 1985, Malkmus, 1993a, 2000, Lang & Vogel, 2005 and Koch, 2012.

RAMPHOTYPHLOPS Fitzinger, 1843 (Typhlopidae)

Synonyms: *Typhlina* Wagler, 1830 *(nomen praeoccupatum), Pseudotyphlops* Fitzinger, 1843 (*nomen praeoccupatum), Pilidion* A.-M.-C. Duméril & ad Bibron, 1844 (*nomen substitutum), Typhlinalis* Gray, 1845 *(nomen substitutum), Rhamphotyphlops* Agassiz, 1847 *(nomen emendatum), Rhinophidion* Fitzinger, 1861 *(nomen nudum), Typhlira* – Jan, 1861a *(nomen incorrectum), Pilidium* A.C.L.G. Günther, 1872a *(nomen emendatum), Tychlina* – Grzimek, 1975 *(nomen incorrectum), Ramphotypholps* – H.M. Smith & Kohler, 1978 *(nomen incorrectum), Ramphothyphlops* – Ziegler, 2002 *(nomen incorrectum), Billmacordus* Hoser, 2012am *(nomen illegitimum), Funkityphlops* Hoser, 2012am *(nomen illegitimum), Johnwilsontyphlops* Hoser, 2012am *(nomen illegitimum), Maxhoserus* Hoser, 2012am *(nomen illegitimum), Oxytyphlops* Hoser, 2012am *(nomen illegitimum),* and *Piersontyphlops* Hoser, 2012am *(nomen illegitimum).*
Type species: *Typhlops multilineatus* Schlegel, 1839 *in* 1837–1844.
Distribution: Southeastern Asia and Indo-Australia The parthenogenetic *R. braminus* has been introduced into many areas worldwide.
Sources: Robb, 1960, 1966, McDowell, 1974a, Hahn, 1980a, Cogger et al., 1983a, Storr, 1981d, 1983, Cogger, 1992, Storr et al., 1986, S.K. Wilson & Knowles, 1988, Welch, 1988, Ehmann, 1992, Wallach, 1995a, 1998b, Wallach & Ineich, 1996, Greer, 1997, M.S. Khan, 1999b, McDiarmid et al., 1999 and Vidal et al., 2010.
Remarks: Official Generic Name no. 2156 *fide* Opinion 1207 (ICZN, 1982b).

1. *Ramphotyphlops acuticaudus* (W.C.H. Peters, 1877a). Mber. Königl. Akad. Wiss. Berlin 1877(6): 416–417, pl., figs. 2, 2a–2c. (*Typhlops acuticaudus*)

Synonym: *Typhlops acuticauda* Waite, 1981.
Type: Holotype, ZMB 9127, a 123 mm specimen (Kubary via Mus. Goddefroy).
Type locality: "Palaos" [= Palau Islands, Caroline Group, Federated States of Micronesia]
Distribution: Micronesia (Palau: Angaur, Babelthaup, Koror and Palau Is.), NSL–10 m.
Source: Crombie & Pregill, 1999.

2. *Ramphotyphlops adocetus* Wynn, Reynolds, Buden, Falanruw & Lynch, 2012. Zootaxa (3172): 41–42, figs. 2, 7a.

Type: Holotype, USNM 529971, a 373 mm male (O. Sirom, 15 July 1999).
Type locality: "Pasa Island, Ant Atoll, Caroline Islands (Federated States of Micronesia)."
Distribution: Micronesia (Ant Atoll: Pasa Is.), NSL.

3. *Ramphotyphlops albiceps* (Boulenger, 1898b). Ann. Mag. Nat. Hist. (7) 1(2): 124. (*Typhlops albiceps*)

Synonyms: *Typhlops albicep* – F. Werner, 1921a *(nomen incorrectum),* and *Typhlops malaisei* Rendahl, 1937.
Type: Holotype, BMNH 1946.1.10.50 (formerly BMNH 1897.10.8.17), a 128 mm specimen (Royal Siamese Museum, Bangkok).
Type locality: "Chantaboon, Siam" [= Chanthaburi, cen. Chanthaburi Prov., SE Thailand, 12°48'N, 102°10'E, elevation NSL–105 m].
Distribution: Southeastern Asia. Southern China (Hong Kong), Thailand (Chanthaburi, Pattani, Phang Nga), S Myanmar (Kayin), West Malaysia (Kedah,

R

Pahang, Perak, Selangor, Similan and Tioman Is.) and Singapore, NSL–1370 m.

Remarks: Occurs in Vietnam *fide* Das (2011: 348).

4. *Ramphotyphlops angusticeps* (W.C.H. Peters, 1877a). Mber. Königl. Akad. Wiss. Berlin 1877(6): 417, pl., figs. 3, 3a–3c. (*Typhlops angusticeps*)

Synonym: *Typhlops olivaceus reduncus* T. Barbour, 1921a.

Type: Holotype, ZMB 9055, a 455 mm specimen (Cox via Mus. Godeffroy).

Type locality: "Neu-Caledonien" [= New Caledonia] (in error *fide* Roux, 1913: 135 and Bauer et al., 2002: 163).

Distribution: Southern Solomons (Guadalcanal, Malaita, Rennell and San Cristobal Is.), NSL–15 m.

Sources: Waite, 1918b and V. Tanner, 1948.

5. *Ramphotyphlops becki* (V. Tanner, 1948). Great Basin Nat. 9(1–2): 12, 15, figs. 4–5. (*Typhlops becki*)

Type: Holotype, BYU 7448, a 117 mm specimen (D.E. Beck & Ramsey, 30 Nov. 1944).

Type locality: "Tenaru River, northeast portion of Guadalcanal, Solomon Islands."

Distribution: Southern Solomons (Guadacanal Is.).

Source: Shea & Wallach, 2000.

Remarks: Previously a synonym of *R. willeyi*.

6. *Ramphotyphlops braminus* (Daudin, 1803d). Hist. Nat. Rept. 7: 279–280. (*Eryx braminus*)

Synonyms: *Tortrix russelii* Merrem, 1820, *Argyrophis bramicus* Gray, 1845 *(nomen emendatum), Argyrophis truncatus* Gray, 1845, *Onychocephalus capensis* A. Smith, 1846 *in* 1838–1849, *Ophthalmidium tenue* Hallowell, 1861, *Rhinophidion nicobaricum* Fitzinger, 1861 *(nomen nudum), Typhlops accedens* Jan, 1863b, *Typhlops euproctus* Boettger, 1882, *Typhlops bramineus* – A.B. Meyer, 1887 *(nomen incorrectum), Tortrix russellii* Boulenger, 1893a *(nomen emendatum), Typhlops limbrickii* Annandale, 1906, *Typhlops braminus arenicola* Annandale, 1906, *Typhlops braminus pallidus* Wall, 1909f, *Glauconia braueri* Sternfeld, 1910c, *Typhlops fletcheri* Wall, 1919b, *Typhlops khoratensis* E.H. Taylor, 1962, and *Typhlops pseudosaurus* Dryden & Taylor, 1969.

Type: Lectotype, specimen described and illustrated in P. Russell (1796: 48, pl. 43), designated herein.

Type locality: "Vizagapatam, coast of Coromandel, India" [= Vishakhapatnam, Andhra Pradesh State, SE India, 17°41'N, 83°13'E, elevation 25 m] via lectotype selection.

R

Distribution: Worldwide distribution. 7. *Ramphotyphlops cumingii* (Gray, 1845). Cat. Lizards Brit. Mus.: 133–134. (*Onychophis cumingii*)

Synonyms: *Typhlops longicauda* E.H. Taylor, 1919, *Typhlops rugosa* E.H. Taylor, 1919, *Typhlops dendrophis* E.H. Taylor, 1922a, and *Typhlops mindanensis* E.H. Taylor, 1922a.
Types: Syntypes (3), BMNH 1946.1.11.19–20 (H. Cuming, 1836–1840), and BMNH 1946.1.10.83 (E. Belcher, 1843–1846).
Type locality: "Philippines" and "Indian Ocean."
Distribution: Philippines (Bohol, Marinduque, Mindanao, Negros, Panay, Polillo).
Source: Ferner et al., 2001.

8. *Ramphotyphlops depressus* (W.C.H. Peters, 1880a). Mber. Königl. Akad. Wiss. Berlin 1880(2): 220. (*Typhlops depressus*)

Synonyms: *Typhlops aluensis* Boulenger, 1887g, *Typhlops philococos* F. Werner, 1898b, *Typhlops philococcus* – Waite, 1918b *(nomen incorrectum), Typhlops alluensis* – Kinghorn, 1928a *(nomen incorrectum), Typhlops buehleri* Hediger, 1933, and *Typhlops alvensis* – Brattstrom & Schwenkmeyer, 1951 *(nomen incorrectum).*
Type: Holotype, ZMB 9667, a 235 mm specimen.
Type locality: "papuanischen Insel Duke of York" [= Duke of York Is., Bismarck Archipelago, Papua New Guinea, 4°10'S, 152°28'E].
Distribution: Eastern Papua New Guinea (Ambitle, Bougainville, Duke of York, Manus, Matupi, New Britian, New Ireland, Pinipel, St. Matthias, Tambiu, Woodlark) and Solomons (Guadalcanal, Kolombangara, Malaita, Mbanika, New Georgia, Nggela, Pirumeri, Ranongga, Rossel, San Cristobal, Santa Ysabel, Shortland, Simbo, Three Sisters, Tulaghi), NSL–915 m.
Sources: McDowell, 1974a, Wallach, 1996b, Bauer et al., 2002 and Kraus & Allison, 2004.

R

9. *Ramphotyphlops exocoeti* (Boulenger, 1887j). Proc. Zool. Soc. London 55(3): 517. (*Typhlops exocoeti*)

Synonym: *Typhlops capensis* Rendahl, 1918.
Type: Lectotype, BMNH 1946.1.11.78 (formerly BMNH 1887.4.25.3), a 350 or 230 mm specimen, designated by Wells & Wellington (1985: 40).
Type locality: "Christmas Island, Indian Ocean," via lectotype selection.
Distribution: Australia (Christmas Is.), NSL–360 m.
Sources: Cogger et al., 1983b, Wallach, 2003 and Wallach & Glaw, 2009.

10. *Ramphotyphlops flaviventer* (W.C.H. Peters, 1864a). Mber. Königl. Akad. Wiss. Berlin 1864(4): 271–272. (*Typhlops flaviventer*)

Type: Holotype, ZMB 5029, a 320 mm specimen (K.E. von Martens, March 1862–Dec. 1864).
Type locality: "Ternate" [= Ternate Is., Maluku, E Indonesia, bet. 0°45'–52'N and 127°18'–23'E].
Distribution: Eastern Indonesia (Maluku: Batjan, Halmahera, Morotai, Ternate, Tidore).
Sources: Wallach, 1996b and Wynn et al., 2012.

11. *Ramphotyphlops hatmaliyeb* Wynn, Reynolds, Buden, Falanruw & Lynch, 2012. Zootaxa (3172): 46–47, figs. 5, 7c.

Type: Holotype, USNM 558300, a 331 mm female (M. Falanruw, 4 Aug. 2007).
Type locality: "Giilab (= Gielap, Gielop) Island, Ulithi, Caroline Islands (Federated States of Micronesia)."
Distribution: Micronesia (Ulithi: Bulbul, Dorooleng, Giilab, Piig and Soong Is.).

12. *Ramphotyphlops lineatus* (Schlegel, 1839 *in* 1837–1844). Abbild. Amph.: 39, pl. 32, figs. 32–34. (*Typhlops lineatus*)

Synonyms: *Typhlops lineatus* Fitzinger, 1826a *(nomen nudum), Typhlops lineatus* F. Boie, 1827 (*nomen nudum*), *Acontias lineatus* Wagler, 1830 (*nomen nudum*), *Typhlops lineatus acontias* Gray *in* Griffith & Pidgeon, 1831 (*nomen nudum*), *Typhlina lineata* Fitzinger, 1843, *Typhlops lineatus sumatrana* F. Werner, 1896b, and *Typhlops lineatus numatrana* – Boulenger, 1897j *(nomen incorrectum).*
Types: Syntypes (2), RMNH 3696a–b, longest syntype 273 mm (C.G.C. Reinwardt, 1816–1821).
Type locality: "Java" [SW Indonesia]
Distribution: Southeast Asia and Greater Sundas. Cambodia, Laos, Vietnam, S Thailand (Narathiwat, Pattani), West Malaysia (Peark, Pinang, Selangor), Singapore, East Malaysia (Sarawak) and W Indonesia (Bangka, Java, Kalimantan, Nias, Sumatra), NSL–1420 m.
Sources: T. Barbour, 1912, E.H. Taylor, 1965, McDowell, 1974, David & Vogel, 1996 and I. Das, 2010, 2012.
Remarks: RMNH 3692 also a syntype *fide* Cox et al. (2013: 11).

13. *Ramphotyphlops lorenzi* (F. Werner, 1909b). Mitt. Naturhist. Mus. Hamburg 26: 209. (*Typhlops lorenzi*)

Type: Holotype, ZMH, a 337 mm specimen, (T. Lorenz, 1901), destroyed in July 1943 during World War II.
Type locality: "Insel Poeloe (Miang besar), etwas nördlich von Äquator, Ostküste von Borneo" [= Palau Miang-Besar somewhat N of the equator on the E coast of Borneo, 00°43'N, 118°00'E].
Distribution: Indonesia (Kalimantan: Miang Besar). Known only from type locality.

Sources: Rooij, 1917, McDowell, 1974a, Stuebing, 1991 and I. Das, 2010.

14. *Ramphotyphlops mansuetus* (T. Barbour, 1921). Proc. New England Zool. Club 7: 108–109, pl. 6. (*Typhlops cumingii mansuetus*)

Type: Holotype, MCZ 14270, a 154 mm specimen (W.M. Mann, 19 May–24 Nov. 1916).

Type locality: "Keri Keri, San Cristóbal, Solomon Islands" [= Kirakira, Makira Is., Makira-Ulawa Prov., Solomon Islands, 10º27'S, 161º54'E, elevation 15 m].

Distribution: Papua New Guinea (Bougainville Is.) and Solomons (Makira Is.), NSL–1065 m.

Sources: McDowell, 1974a, Iskandar & Colijn, 2001, Wallach, 2003 and McCoy, 2006.

Remarks: Previously a synonym of *Anilios affinis*.

15. *Ramphotyphlops marxi* (Wallach, 1993b). Raffles Bull. Zool. 41(2): 265–270, figs. 1–2. (*Typhlops marxi*)

Type: Holotype, FMNH 96520, a 180 mm female (D.S. Rabor, 1957).

Type locality: "Tarabucan (12°13'N, 124°35'E), four miles southeast of spur of Sigarag Mountains (which are 13 miles south of Catarman), Matuguinao Municipality, extreme northern Western Sámar Province, northwestern Sámar Island, northeastern Visayas Group, east-central Philippines."

Distribution: Central Philippines (Samar). Known only from type locality.

Source: Wallach, 2003.

16. *Ramphotyphlops multilineatus* (Schlegel, 1839 *in* 1837–1844). Abbild. Amph.: 40, pl. 32, figs. 39–42. (*Typhlops multilineatus*) (*nomen corrigendum*)

Synonyms: *Typlops multilineatus* Schlegel, 1839 *in* 1837–1844 *(nomen incorrigendum), Typhlops multilineatus* – A.-M.-C. Duméril & Bibron, 1844 *(nomen corrigendum), Onchophis multicarinatus* Gray, 1845, *Typhlops bibroni* Jan, 1863b, and *Typhlina multilineata* McDowell, 1974a.

Type: Holotype, MNHN 1067, a 370 mm specimen (S. Müller, 1825–1827).

Type locality: "Westküste von Neu-Guinea" [= W coast of New Guinea, Papua Prov., E Indonesia]. Emended to Port-Dory [= Manokwari, West Papua, E Indonesia] *fide* MNHN catalogue.

Distribution: New Guinea. Eastern Indonesia (N Papua, Angadi, Kai Besar, Kai Cecil, Salawati Is.) and cen. Papu New Guinea (Chimbu), NSL–870 m.

Sources: Brongersma, 1934, Haas, 1950, McDowell, 1974a and O'Shea, 1996.

Remarks: Official Specific Name no. 2798 *fide* Opinion 1207 (ICZN, 1982b).

17. *Ramphotyphlops olivaceus* (Gray, 1845). Cat. Lizards Brit. Mus.: 133. (*Onychophis olivaceus*)

Synonyms: *Typhlops ligorostris* M.A. Smith & Procter, 1921, and *Typhlina olivacea* McDowell, 1974a.

Type: Holotype, BMNH 1946.1.10.57 (H. Cuming, 1836–1839).

Type locality: "Philippines."

Distribution: East Indies. East Malaysia (Sarawak), Indonesia (Ambon, Ewaafi, Kalimantan, Misool, Sangihe, Seram, Sulawesi) and Philippines (Babuan, Samar, Dalutan), NSL–35 m.

Sources: E.H. Taylor, 1922, McDowell, 1974a, Lang & Vogel, 2005 and Koch, 2012.

Remarks: Australian record doubtful *fide* McDowell (1974a: 43).

18. *Ramphotyphlops ozakiae* Wallach *in* Niyomwan, 1999. Sp. Divers. Blind Snakes Thailand: 14, 32, 41, 42, 47, 57, 79, 96, 107, 118, 130, 140, figs. 4.1, 4.3D, 4.5D, 4.8H.

Type: Holotype, FMNH 180007 (formerly WRH 3679), a 158 mm male (W.R. Heyer, 17 Nov. 1969).

Type locality: "NE Thailand." Corrected herein to Sakaerat Experimental Station, Amphoe Pak Thong Chai, Nakhon Ratchasima Prov., SE Thailand, 14º43'N, 102º01'E, elevation 200 m.

Distribution: Thailand (Nakhon Ratchasima) and W Indonesia (Sumatra [ZMUC 52174]), 200–1100 m.

Sources: Niyomwan et al., 2001 and Wallach (pers. data).

Remarks: Uncertain if the inadvertent description by Niyomwan (mistakenly assuming the species had already been published by Wallach) is valid under the Rules.

19. *Ramphotyphlops similis* (Brongersma, 1934). Zool. Meded. 17(3–4): 192–193, figs. 22–24. (*Typhlops similis*)

Type: Holotype, RMNH 6295, a 235 mm specimen (C.B.H. von Rosenberg, 1870).

Type locality: "Doré, New Guinea" [Manokwari, N West Papua Prov., E Indonesia, 0°52' S, 134°04'E, elevation NSL].

Distribution: Eastern Indonesia (N West Papua), NSL. Known only from type locality.

Sources: O'Shea, 1996 and Wallach, 1996b.

20. *Ramphotyphlops suluensis* (E.H. Taylor, 1918a). Philippine J. Sci. 13D(5): 257–259, 265, fig. 11a–c. (*Typhlops suluensis*)

Type: Holotype, BSCM 2001, a 340 mm specimen (E.H. Taylor, 2 Oct. 1917).

Type locality: "Bunuan, Tapian Group, Sulu Archipelago, Philippine Islands" [= Bubuan Island, Sulu Archipelago, SW Philippines, 5º25'N, 120º35'E, elevation NSL].

Distribution: Philippines (Basilan, Bubuan and Sibutu Is.), NSL–20 m.
Remarks: Previously a synonym of *R. olivaceus*.

21. *Ramphotyphlops supranasalis* (Brongersma, 1934). Zool. Meded. 17(3–4): 191, fig. 25. (*Typhlops supranasalis*)

Type: Holotype, RMNH 6291, a 301 mm specimen (Bernstein, 1866).
Type locality: "Salawatti" [= Salawati Island, West Papua Prov., E Indonesia, bet. 0°53'–1°22'S and 130°38'–131°05'E].
Distribution: Eastern Indonesia (West Papua: Salawati). Known only from type locality.
Sources: O'Shea, 1996 and Wallach, 1996b.

22. *Ramphotyphlops willeyi* (Boulenger *in* Willey, 1900h). Zool. Results (5): 603–604, 4 figs. (*Typhlops willeyi*)

Type: Holotype, BMNH 1946.1.10.80 (formerly BMNH 1900.5.29.1), a 195 mm specimen (A. Willey, 1895–1897).
Type locality: "Lifu, Loyalty Islands" [= Lifou Is., Loyalty Is., New Caledonia, bet. 20°41'–21°11'S and 167°01–28'E].
Distribution: New Caledonia (Loyalties: Lifou, Maré Is.), NSL–60 m.
Sources: Roux, 1913, Wallach, 1995a, Bauer & Sadlier, 2000, Shea & Wallach, 2000 and Wynn et al., 2012.

REGINA Baird & Girard, 1853 (Natricidae)

Synonyms: *Liodytes* Cope, 1885a, *Reginaus* A.L. Herrera, 1899 *(nomen emendatum),* and *Mariolisus* Hoser, 2012h *(nomen illegitimum).*
Type species: *Coluber septemvittatus* Say, 1825.
Distribution: Extreme SE Canada and E USA.
Fossil records: Upper Pliocene to upper Pleistocene of E USA. Fossils unassigned to species include upper Pleistocene (Rancholabrean II) of USA (Georgia).
Sources: Jan, 1865d, H.M. Smith & Huheey, 1960, Rossman, 1963b, 1985, Meylan, 1982, R. Price, 1983, Ernst & Barbour, 1989, Conant & Collins, 1991, Holman, 1995a, 2000a, Dwyer & Kaiser, 1997, Alfaro & Arnold, 2001, Ernst, 2002a, Gibbons & Dorcas, 2004 and Zaher et al., 2009.
Remarks: *Regina rigida* and *R. alleni* form a monophyletic clade with *Seminatrix fide* Alfaro & Arnold, 2001, Pyron et al., 2011 and Zaher et al., 2012 but morphological characters support the four species of *Regina* as a single taxon *fide* Rossman, 1963a and 1985.

R

1. *Regina alleni* (S.W. Garman, 1874). Proc. Boston Soc. Nat. Hist. (1874–1875) 17(2): 92, 3 figs. (*Helicops alleni*)

Synonym: *Liodytes alleni lineapiatus* Auffenberg, 1950.
Type: Holotype, MCZ 2255, a 650 mm female (J.A. Allen, March 1869).
Type locality: "near Jacksonville, Florida" [USA] (in error). Corrected to Hawkinsville, 2 miles S of Crow's Bluff, Lake County, *fide* R.E. Hellman *in* K.P. Schmidt (1953a: 178).
Distribution: Extreme SE USA (Florida, ext. S Georgia), NSL–75 m.
Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Florida)
Sources: Auffenberg, 1950, 1963, Godley, 1980, 1982, Ashton & Ashton, 1988, Tennant, 1997 and Dorcas et al., 2003.
Remarks: Data tag on type reads St. Johns River, Hawkinsville and MCZ catalogue reads Fla., St. Johns River, Hawkinsville. A member of *Seminatrix fide* Zaher et al., 2012.

2. *Regina grahamii* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 47–48.

Synonym: *Natrix grohamii* – F.C. Baker & Woodruff *(nomen incorrectum).*
Type: Holotype, USNM 1376, a 273 mm specimen (J.H. Clark [U.S.-Mex. Bound. Surv.], 1850–1852, via J.D. Graham).
Type locality: "Rio Salado, Tex." [Texas, USA]. Emended to Salado Creek [= 4 miles from San Antonio, Bexar Co. *fide* Cochran, 1961: 208], Bell Co., Texas, USA *fide* K.P. Schmidt (1953a: 158).
Distribution: Central USA (Arkansas, Illinois, Iowa, E Kansas, Louisiana, W Mississippi, Missouri, ext. SE Nebraska, Oklahoma, E Texas), NSL–600 m.
Fossil records: Upper Pliocene (Blancan V) of USA (Nebraska), middle Pleistocene (Irvingtonian II) of USA (Nebraska), and upper Pleistocene (Rancholabrean I, II) of USA (Kansas).
Sources: Hall, 1969, Holman, 1972, Dundee & Rossman, 1989, Hardy, 1997 and Werler & Dixon, 2000.
Remarks: This species forms a monophyletic clade with *Nerodia cyclopion* and *N. floridana fide* Zaher et al., 2012.

3. †*Regina intermedia* Meylan, 1982. Bull. Florida St. Mus. (Biol. Sci.) 27(3): 40–43, figs. 10a–c, j.

Type: Holotype, UF 26383, fragmentary left dentary (J. Klein & R. Martin, 1967–1974).
Type locality: "Inglis IA, a sinkhole in the Ocala limestones on the north bank of the now defunct Cross Florida Barge Canal in Section 8, R.16 E., T.17 S., Citrus County, Florida; Inglis IA Local Fauna, early Irvingtonian, early Pleistocene."

Distribution: Lower Pleistocene (Irvingtonian: 0.40–1.9 mya) of USA (Florida). Known only from type locality.

4. *Regina rigida* (Say, 1825). J. Acad. Nat. Sci. Philadelphia 4(2): 239–240. (*Coluber rigidus*)

Synonyms: *Tropidonotus leberis unicolor* Lichtenstein & Martens, 1856, *Natrix rigida deltae* Huheey, 1959, and *Natrix rigida sinicola* Huheey, 1959.
Type: Holotype, ANSP 16795, a 523 mm specimen.
Type locality: "southern states" [USA]. Restricted to Charleston, South Carolina *fide* K.P. Schmidt (1953a: 158).
Distribution: Southeastern USA (S Alabama, Arkansas, N Florida, S Georgia, Louisiana, S Mississippi, SE North Carolina, ext. SE Oklahoma, E South Carolina, E Texas, SE Virginia), NSL–150 m.
Sources: Huheey, 1959, Dundee & Rossman, 1989, Palmer & Braswell, 1995, Tennant, 1997, and Werler & Dixon, 2000.
Remarks: A member of *Seminatrix fide* Zaher et al., 2012.

5. *Regina septemvittata* (Say, 1825). J. Acad. Nat. Sci. Philadelphia 4(2): 240–241. (*Coluber septemvittatus*)

Synonym: *Natrix septemvittata mabila* Neill, 1963.
Types: Syntypes (3), ANSP, one syntype 251 mm (R. Haines & T. M'Euen), and WHC, a 582 mm specimen (W. Hyde).
Type locality: "Germantown" and "near Philadelphia, Pennsylvania" [USA].
Distribution: Extreme SE Canada (SW Ontario) and E USA (Alabama, cen. Arkansas, Delaware, NW Florida, N Georgia, NE Illinois, Indiana, Kentucky, Maryland, Michigan, Mississippi, ext. S Missouri, W New Jersey, W New York, W North Carolina, Ohio, ext. SE Oklahoma, W and S Pennsylvania, NW South Carolina, Tennessee, Virginia, West Virginia, SE Wisconsin), NSL–760 m.
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Ohio, Pennsylvania, Virginia).
Sources: J. Wood, 1949, Conant, 1960, Logier & Toner, 1961, Froom, 1967, 1972, Spangler & Mount, 1969, Branson & Baker, 1973, 1974, Butler et al., 1980, Trauth, 1991a, Palmer & Braswell, 1995, J. Harding, 1997, Tennant, 1997 and Ernst, 2002b.
Remarks: Official Specific Name no. 1814 *fide* Opinion 632 (ICZN, 1962). Types not in ANSP *fide* Malnate, 1971. This species is sister taxon to *Tropidoclonion lineatum fide* Zaher et al., 2012.

RENA Baird & Girard, 1853 (Leptotyphlopidae)

Synonym: *Renaus* A.L. Herrera, 1899 *(nomen emendatum).*
Type species: *Rena dulcis* Baird & Girard, 1853.
Distribution: Southwestern USA and Latin America.
Fossil records: Pleistocene of SW USA.
Sources: Klauber, 1940a, J.A. Peters & Orejas-Mirando, 1970, Hahn, 1980a, Wallach, 1998b, McDiarmid et al., 1999 and Pinto, 2010.

1. *Rena bressoni* (E.H. Taylor, 1939c). Copeia 1939(1): 5–6, pl. 1, figs. 7–8. (*Leptotyphlops bressoni*)

Type: Holotype, UIMNH 25076 (formerly EHT-HMS 5247 & EHT-CC 12), a 261–265 mm specimen (J.R. Bresson, 1935).
Type locality: "Hda. El Sabino, Uruapan, Michoacán, Mexico" [= Hacienda El Sabino, near Uruapan (19°25'N, 102°03'W, elevation 1625 m), Michoacán, SW México].
Distribution: Southwestern México (W Michoacán), 490–1625 m.
Sources: Klauber, 1940a, H.M. Smith & Taylor, 1945, Duellman, 1961, 1965b, Dixon & Vaughn, 2003 and Pinto, 2010.

2. *Rena dissecta* (Cope, 1896a). Amer. Nat. 30(357): 753. (*Glauconia dissecta*)

Synonym: *Leptotyphlops dulius supraocularis* W.W. Tanner, 1985.
Type: Holotype, ANSP 10752, a 235 mm specimen (E.D. Cope).
Type locality: "at the silver mines at Lake Valley, southern New Mexico" [= Lake Valley, Sierra County, S New Mexico, USA, 36°05'N, 108°09'W, elevation 1800 m].
Distribution: Southwestern USA (SE Arizona, SE Colorado, ext. S Kansas, New Mexico, Oklahoma, W Texas) and N México (Chihuahua, Coahuila, ext. NE Sonora), 215–2170 m.
Sources: Klauber, 1940a, H.M. Smith & Taylor, 1945, Hibbard, 1964, Fowlie, 1965, Hahn, 1979c, H.M. Smith & Chiszar, 1993, Degenhardt et al., 1996, Werler & Dixon, 2000, Dixon & Vaughn, 2003, Ernst & Ernst, 2003 and Lemos-Espinal & Smith, 2007a–b.
Remarks: A synonym of *Leptotyphlops myopicus fide* Pinto (2010: 87)

R

3. *Rena dugesii* (Bocourt, 1881). Bull. Soc. Philom. Paris (7) 5(2): 81–82. (*Catodon dugesii*)

Synonym: *Stenostoma tenuiculum* S.W. Garman, 1884.
Type: Syntypes (2), MNHN 1651a–b, longest syntype 229 mm (A.A.D. Dugès, 1853–1881).
Type locality: "Colima (Mexique)" [= Colima, Colima State, SW México, 19°15'N, 103°43'W, elevation 490 m].
Distribution: Western México (SW Chihuahua, Colima, Jalisco, Sinaloa, SE Sonora), NSL–2000 m.
Sources: Klauber, 1940a, E.H. Taylor, 1940d, Bogert & Oliver, 1945, H.M. Smith & Taylor, 1945, Hardy &

McDiarmid, 1969, Hahn, 1979d, Webb, 1984, García & Ceballos, 1994 and Ramírez-Bautista, 1994.

Remarks: Supplemental original description in A.H.A. Duméril et al. (1870–1909: 507–508, pl. 29, figs. 9, 9a–c, pl. 30, fig. 4).

4. *Rena dulcis* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 142–143.

Synonym: *Stenostoma rubellum* S.W. Garman, 1884.

Type: Holotype, USNM 7296, a 186–191 mm male (J.H. Clark [U.S.-Mex. Bound. Surv.], 1850–1852, via J.D. Graham).

Type locality: "Between San Pedro and Camanche Springs, Tex." [= between San Pedro camp (31°54'N, 110°12'W) or San Pedro springs (31°51'N, 110°12'W) and Comanche Springs (30°53'N, 102°53'W, elevation 900 m), Pecos Co., W Texas, USA].

Distribution: Central USA (SE Colorado, S Oklahoma, cen. Texas) and NE México (Coahuila, N Nuevo León, N Tamaulipas), 10–1525 m.

Sources: Yarrow, 1882, Klauber, 1940a, H.M. Smith & Taylor, 1945, Hahn, 1979c, H.M. Smith & Chiszar, 1993, Degenhardt et al., 1996, Bartlett & Tennant, 2000, Moeller et al., 2000, Werler & Dixon, 2000, Dixon & Vaughn, 2003, J.C. Murphy & Schlager, 2003, Lemos-Espinal & Smith, 2007 and Pinto, 2010.

Remarks: Holotype was sent to Smithsonian in 1852 by J.D. Graham, who was listed as collector by Baird & Girard (1853: 143) and Cochran (1961: 209) but corrected by Baird (1859a: 24) and Degenhardt et al., (1996: 257). Type locality restriction to Comanche, Comanche Co., Texas *fide* H.M. Smith & Taylor (1950a: 361) invalid as it is outside the route of the US-Mex. Bound. Surv. (Bartlett, 1854; Emory, 1857).

5. *Rena humilis* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 143.

Synonyms: *Glauconia boettgeri* F. Werner, 1899a, *Leptotyphlops humilis cahuilae* Klauber, 1931b, *Leptotyphlops humilis slevini* Klauber, 1931b, *Leptotyphlops humilis utahensis* V. Tanner, 1938, *Leptotyphlops humilis levitoni* R.W. Murphy, 1975, *Leptotyphlops humilis lindsayi* R.W. Murphy, 1975, and *Leptotyphlops humilis chihuahuaensis* W.W. Tanner, 1985.

Type: Holotype, USNM 2101, a 152 mm specimen (J.L. Le Conte, 1850).

Type locality: "Valliecitas, Cal." [= Vallecito, San Diego Co., S California, USA, 38°05'N, 120°28'W, elevation 535 m]. Restricted to vicinity of Vallecito, E San Diego Co., California, USA *fide* Klauber (1931b: 343) and to the upper Sonoran Life Zone north or west of the Vallecito area *fide* Brattstrom (1953b: 180).

Distribution: Southwestern USA (S Arizona, S California, S Nevada, SW Texas, SW Utah) and N México (Baja California Norte, Baja California Sur, SW Chihuahua, Sonora, Carmen, Cedros, Cerralvo, Danzante, San Marcos, Santa Catalina and Santa Cruz Is.), 75 m BSL–1575 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Arizona).

Sources: Klauber, 1931b, 1940a, R.W. Murphy, 1975, Hahn, 1979d, Stebbins, 1985, Degenhardt et al., 1996, P.R. Brown, 1997, Recchio, 1997, H.M. Smith et al., 1998, 2005, Grismer, 1999, 2002, Bartlett & Tennant, 2000, Werler & Dixon, 2000 and Pinto, 2010.

6. *Rena iversoni* (H.M. Smith, Breukelen, Auth & Chiszar, 1998). SW Nat. 43(4): 437–439, fig. 2a. (*Leptotyphlops dulcis iversoni*)

Type: Holotype, UF 105870 (formerly UF 81JI557), a 196 mm specimen (J.B. Iverson, 11 May 1981).

Type locality: "vicinity of Hwy 101, 23.7 km SW Río San Marcos (in turn 8.1 km SW Cd. Victoria), Tamaulipas, México, 36.5 km NE of Jaumave" [= ca. 23°35'N, 99°15'W, elevation ca. 1000 m].

Distribution: Northeastern México (cen. Tamaulipas), 375–1000 m.

Sources: Dixon & Vaughn, 2003 and Pinto, 2010.

Remarks: Elevated to species status *fide* Pinto (2010: 113).

7. *Rena maxima* (Loveridge, 1932b). Proc. Biol. Soc. Washington 45: 151–152. (*Leptotyphlops maximus*)

Type: Holotype, MCZ 33604, a 289–300 mm male (W.W. Brown, Jan.–June 1932).

Type locality: "between 4,000 and 6,000 feet at Chilpancingo, State of Guerrero, Mexico" [= Chilpancingo, cen. Guerrero State, S Mexico, 17°33'N, 99°30'W, elevation 1220–1830 m].

Distribution: Southern México (Guerrero, S México, Morelos, Oaxaca, S Puebla), 90–1850 m.

Sources: E.H. Taylor, 1939c, Klauber, 1940a, H.M. Smith & Taylor, 1945, Hahn, 1980b, Dixon & Vaughn, 2003, Woolrich-Piña et al., 2005, Canseco-Márquez & Gutiérrez-Mayén, 2006, 2010, Martínez-Coronel & López-Hernández, 2008 and Pinto, 2010.

8. *Rena myopica* (S.W. Garman, 1884). Mem. Mus. Comp. Zool. (1883) 8: 130–131. (*Stenostoma myopicum*)

Type: Lectotype, FMNH 73386, a 137 mm specimen (E. Palmer, 1879), designated by Pinto (2010: 87).

Type locality: "Savineto near Tampico, Tamaulipas, México" [= ca. 22°15'N, 97°52'W, elevation 25 m] via lectotype selection.

Distribution: Northeastern México (Chihuahua, Coahuila, Hidalgo, Nuevo León, Puebla, San Luis Potosí, NE Sonora, Tamaulipas), 25–2175 m.

Sources: H.M. Smith & Taylor, 1945, E.H. Taylor, 1949, Hahn, 1979c, H.M. Smith et al., 1998, Auth et al., 2000,

Dixon & Vaughn, 2003, Pinto, 2010 and Ramírez-Bautista et al., 2010.

9. *Rena segrega* (Klauber, 1939). Trans. San Diego Soc. Nat. Hist. 9(14a): 67–68. (*Leptotyphlops humilis segregus*)

Type: Holotype, USNM 103670, a 313 mm specimen (T.F. Smith, 11 Aug. 1936).
Type locality: "Chalk Draw, Brewster County, Texas" [= 15 mi. SW Marathon (30°12'N, 103°15'W, elevation 1245 m) and 65 mi. S Alpine (30°22'N, 103°40'W, elevation 1375 m), Brewster Co., W Texas, elevation ca. 1200 m].
Distribution: Southwestern USA (SE Arizona, S New Mexico, SW Texas) and N Mexico (N Chihuahua, W Coahuila), 700–1525 m.
Sources: Klauber, 1940a, H.M. Smith & Taylor, 1945, Lemos-Espinal & Smith, 2007a–b and Pinto, 2010.

RHABDOPHIS Fitzinger, 1843 (Natricidae)

Synonyms: *Tropinotus* Kuhl & Hasselt, 1822a *(partim, nomen nudum), Tropidonotus* H. Boie, 1826 *(partim), Tropedinotus* – Holbrook, 1842a *(nomen incorrectum), Steirophis* Fitzinger, 1843, *Stirophis* Agassiz, 1847 *(nomen emendatum), Hydrophilophis* P. Schmidt, 1852, *Tropidonatus* – Higgins, 1873 *(nomen incorrectum), Trepidonotus* – Lessona, 1877 *(nomen incorrectum), Tropidenotus* – Bedriaga, 1883 *(nomen incorrectum), Bothrodytes* Cope, 1886c, *Tropidonotis* – Velasco, 1890d *(nomen incorrectum), Tropinodotus* – Phisalix, 1922 *(nomen incorrectum), Tropitonotus* – Mertens, 1921b *(nomen incorrectum), Topedonotus* – Roddy, 1928 *(nomen incorrectum), Rhabdophes* – Taub, 1965 *(nomen incorrectum), Rhadophis* – Marx & Rabb, 1972 *(nomen incorrectum), Tropidontus* – Tiedemann & Häupl, 1980 *(nomen incorrectum), Nuchisulcophis* Mahendra, 1984, and *Rabdophis* – Yao, 2012 *(nomen incorrectum).*
Type species: *Tropidonotus subminiatus* Schlegel, 1837.
Distribution: Southeastern and E Asia and East Indies.
Fossil record: Subrecent.
Sources: Stejneger, 1907a, Rooij, 1917, C.H. Pope, 1935, M.A.Smith, 1943c, Haas, 1950, Malnate, 1960a, McDowell, 1961, Zhao & Adler, 1993, I. Das, 2010, 2012 and Cadle, 2011.

1. *Rhabdophis adleri* Zhao, 1997a. Asiatic Herpetol. Res. 7: 168–169, fig. 1.

Type: Holotype, CIB 64-III-5917, a 790 mm male (native, 10 June 1964).
Type locality: "Dali Village in Mt Diaoluo, Lingshui Co., Hainan Prov., China, 225 meters."
Distribution: Southern China (Hainan), 60–800 m.
Source: Zhao et al., 2004.

2. *Rhabdophis angelii* (Bourret, 1934b). Bull. Gén. Instr. Publ. Hanoi 14(8): 151–152, fig. 1. (*Natrix angelii*)

Type: Holotype, MNHN 1938.123 (formerly RLB M.295), a 429 mm specimen (Deloustal).
Type locality: "Station d'altitude du Tam-Dao, située à 900 m d'altitude dans la province de Vinh-Yên, au bord même du delta tonkinois, sur des montagnes du Tonkin, l'Indochine française" [= Tam Dao, Vinh Phuc Prov., N Vietnam, 21°27'N, 105°39'E, elevation 900 m].
Distribution: Northern Vietnam (Thai Nguyen, Vinh Phuc), 450–900 m.
Sources: Bourret, 1935c, 1936b, 1939c–d, V.S. Nguyen et al., 2009 and I. Das, 2010.

3. *Rhabdophis auriculatus* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 80. (*Tropidonotus auriculatus*)

Synonym: *Rhabdophis auriculata myersi* Leviton, 1970c.
Type: Holotype, BMNH 1946.1.15.16, a 470 mm female (H. Cuming, 1836–1840).
Type locality: "Philippine Islands." Restricted to Mt. Apo, Davao Prov., Mindanao Is., S Philippines *fide* Leviton (1970c: 356).
Distribution: Philippines (Basilan, Bohol, Dinagat, Leyte, Mindanao, Samar), 130–1980 m.
Sources: E.H. Taylor, 1922a, 1923, Leviton, 1970c, Ross & Lazell, 1991 and B.E. Smith, 1993.
Remarks: Luzon record needs confirmation *fide* Leviton (1970c: 357); it may represent the Mindanao population, in which case this species is restricted to S Philippines.

4. *Rhabdophis barbouri* (E.H. Taylor, 1922c). Philippine J. Sci. 21(3): 291–293. (*Natrix barbouri*)

Synonym: *Leptophis vertebralis* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen rejiciendum).*
Type: Holotype, CAS 61552 (formerly EHT 939), an 803 mm male (E.H. Taylor, 26 April 1920).
Type locality: "Balbalan, Kalinga, Luzon, Philippine Islands" [= Balbalan, Kalinga Subprov., Mountain Prov., Luzon Is., Philippines *fide* Leviton, 1959b: 415].
Distribution: Northern Philippines (Luzon), NSL–1500 m.
Sources: E.H. Taylor, 1922d, Leviton, 1959b and Malnate & Underwood, 1988.
Remarks: Official Specific Name no. 2106 *fide* Opinion 756 (ICZN, 1966a).

5. *Rhabdophis callichromus* (Bourret, 1934b). Bull. Gén. Instr. Publ. Hanoi 14(8): 155–156. (*Natrix chrysarga callichroma*)

Synonym: *Natrix auchenia* M.A. Smith, 1938.

Type: Holotype, MNHN 1938.122 (formerly RLB M.310), a 714 mm specimen (Jabouille, 1933).

Type locality: "station d'altitude du Mont Bavi, située à 400 m d'altitude dans la province de Son-Tây, ègalement en bordure du delta tonkinois, sur des montagnes du Tonkin, l'Indochine française" [= Bavì, Hà Son Binh Prov., N Vietnam, 21°05'N, 105°23'E, elevation 400 m].

Distribution: Northern Vietnam (Ha Tay, Son Tay, Vinh Phuc), 400 m.

Sources: Bourret, 1936b, 1939d, Orlov et al., 2000 and V.S. Nguyen et al., 2009.

Remarks: Occurs in Hainan, China *fide* V.S. Nguyen et al. (2009: 366) and Das (2011: 339).

6. *Rhabdophis callistus* (A.C.L.G. Günther, 1873). Proc. Zool. Soc. London 41(1): 170, pl. 17, fig. c. (*Tropidonotus callistus*)

Type: Holotype, BMNH 1946.1.15.42 (formerly BMNH 1872.46.124), a 295–305 mm specimen (A.B. Meyer, Dec. 1870–Nov. 1871).

Type locality: "Northern Celebes" [= N Sulawesi, E Indonesia].

Distribution: Eastern Indonesia (N Sulawesi).

Sources: Land & Vogel, 2005 and Koch, 2012.

Remarks: Photographs of the holotype in Lang & Vogel (2005: figs. 118–119). A valid species *fide* Iskandar & Colijn (2001: 104) and Lang & Vogel (2005: 172–173).

7. *Rhabdophis chrysargoides* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 71. (*Tropidonotus chrysargoides*)

Type: Holotype, BMNH 1946.1.13.42 (formerly RMNH), an adult female (H. Schlegel exch.).

Type locality: Unknown. Designated as Java, Indonesia *fide* C. Haas (1950: 539).

Distribution: Indonesia (Buton, Java, Muna, Sangihe Arch., Siau, Sulawesi), 350–1000 m.

Sources: Kopstein, 1930, Bosch, 1985, Malkmus, 1993a, 2000 and Koch, 2012.

Remarks: Bosch (1985: 16) erroneously attributed authorship to A.-M.-C. Duméril, Bibron & Duméril, 1854.

8. *Rhabdophis chrysargos* (Schlegel, 1837). Essai Phys. Serp. 1: 167, 2: 312–313, pl. 12, figs. 6–7. (*Tropidonotus chrysargos*)

Synonyms: *Natrix nobilis* Wagler, 1825 (*nomen ineditum*), *Tropidonotus chrysargus* H. Boie *in* Schlegel, 1826a *(nomen nudum), Tropidonotus chrysargus* Schlegel, 1826b *(nomen nudum), Tropidonotus chrysargus* H. Boie *in* F. Boie, 1827 *(nomen nudum), Tropidonotus junceus* Cantor, 1847, *Amphiesma chrysargum* – A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Leptophis albomaculatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Tropidonotus chrysargus* – A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Tropidonotus dipsas* Blyth, 1854a, *Tropidonotus zebrinus* Blyth, 1854a, *Amphiesma chrijsargum* Bleeker, 1856 *(nomen emendatum),* and *Tropidonotus maculatus torquatus* Mocquard, 1890b.

Type: Lectotype, RMNH 10426 (formerly RMNH 1051), a 690 mm specimen (H. Kuhl & J.C. van Hasselt, Dec. 1820–Sept. 1823), designated by Iskandar & Colijn (2001: 104).

Type locality: "Magmedon, Java" [= Mt. Megamendung, West Java, SW Indonesia, 6°38'S, 106°54'E, elevation 650 m] via lectotype selection.

Distribution: Southeastern Asia and East Indies. Southern China (Guangdong, Hainan), Thailand (Chachoengsao, Chiang Mai, Krabi, Nakhon Ratchasima, Nakhon Si Thammarat, Pattani, Phang Nga, Prachuap Khiri Khan, Rayong, Rat Buri, Roi Et, Sisaket, Trang, Trat, Yala), S Myanmar (Tanintharyi, Mergui Arch.: Sullivan and King's Is.), Vietnam (Bac Giang, Dong Nai, Gai Lai, Ha Tinh, Hoa Binh, Lam Dong, Nghe An, Quang Binh, Quang Tri, Son La, Thanh Hoa, Thua Thien-Hue), N Laos (Champasak, Xiangkhouang), SW Cambodia (Kampot, Kandal, Koh Kong, Mondolkiri), West Malaysia (Johore, Kelantan, Pahlang, Perak, Pinang, Selangor, Tioman Is.), East Malaysia (Sabah, Sarawak), Brunei, Indonesia (Anambas Arch., Bali, Flores, Java, S Kalimantan, Mentawai Arch., Nias, Siberut, Simeulue, Sipora, Sumatra, Ternate) and SW Philippines (Balabac, Busuanga, Culion, Palawan), 100–1675 m.

Sources: Sclater, 1891a–b, Flower, 1899, M.A. Smith, 1916, 1923a, 1931b, Wall, 1923b, Kopstein, 1930, 1938, Bourret, 1934b, 1936b, 1939d, C.H. Pope, 1935, C. Haas, 1941, 1949, Bergman, 1959, Leviton, 1959b, E.H. Taylor, 1965, Campden-Main, 1970a, Deuve, 1970, Saint-Girons, 1972a, B. Hu et al., 1980, Tweedie, 1983, Bosch, 1985, Tian et al., 1986, Malkmus, 1987, 1989, 1992, M.J. Cox, 1991b, Stuebing, 1991, David & Vogel, 1996, Zhao, 1997, M.J. Cox et al., 1998, Chan-ard et al., 1999, Grismer et al., 2002, Malkmus et al., 2002, B.L. Stuart & Emmett, 2006, B.L. Stuart et al., 2006, I. Das, 2007b and V.S. Nguyen et al., 2009.

Remarks: Original description based on H. Boie's MS (1823–1825: pls. 27–28). C.H. Pope (1935: 102) reported two specimens from Hong Kong. Sulawesi records doubtful, probably *Rhabdophis chrysargoides, fide* Lang & Vogel (2005: 254).

9. *Rhabdophis conspicillatus* (A.C.L.G. Günther, 1872a). Proc. Zool. Soc. London 40(1): 596–597, fig. 4. (*Tropidonotus conspicillatus*)

Synonym: *Natrix conspicillata* – T. Barbour, 1912.

Types: Syntypes (3), BMNH 1946.1.23.76–77, a 406 mm male and a female [Matang] (A.H. Everett, 1869–1872), and BMNH 1946.1.23.78, a juvenile male [Borneo] (L.L. Dillwyn, 1855–1865).

R

Type locality: "Matang in the district of Sarawak, western Borneo" [= Kampong Matang, First Division, Kidi Distr., W Sarawak, East Malaysia, 1°35'N, 110°14'E, elevation 15 m]. Emended to "Matang" and "Borneo" *fide* Boulenger (1893a: 222).

Distribution: Malaysia and Borneo. West Malaysia (Perak), East Malaysia (Sabah, Sarawak) and W Indonesia (Great Natuna, Kalimantan, Singkep, Sumatra), 15–1000 m.

Sources: Boulenger, 1893a, T. Barbour, 1912b, Smedley, 1932b, C. Haas, 1950, Tweedie, 1983, Malnate & Underwood, 1988, Stuebing, 1991, David & Vogel, 1996, Malkmus et al., 2002 and I. Das, 2010, 2012.

Remarks: L.L. Dillwyn and J. Motley collected around Labuan (5°19'N, 115°13'E) and adjacent Sabah *fide* Motley & Dillwyn, 1855, the probable type locality of BMNH 1946.1.23.78, which Boulenger (1893a: 222) lists as a type.

10. *Rhabdophis himalayanus* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 265–266, pl. 22, fig. h. (*Tropidonotus himalayanus*)

Synonyms: *Xenodon macrophthalmus* A.C.L.G. Günther, 1858 *(partim), Tropidonotus himalayanus ornatus* Wall, 1908c, and *Rhabdophis speciosus* Wall, 1925c.

Types: Syntypes (2), BMNH 1946.1.13.15, a 787 mm female (B.H. Hodgson, 1842) [Nepal], and 1946.1.23.75, a female (H.R.A. von Schlagintweit, A. von Schlagintweit, & R. von Schlagintweit, 1854–1858) [Sikkim].

Type locality: "Nepal" and "Sikkim" [NE India].

Distribution: Southern Asia. Southwestern China (Xizang, Yunnan), Nepal (Ilam, Kaski, Kathmandu, Myagdi, Nuwakot, Sankhuwasabha), Bhutan, NE India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, North Bengal, Sikkim), Bangladesh (Sylhet) and Myanmar (Chin, Kachin, Mon, Shan), 30–2350 m.

Sources: Theobald, 1876a–b, Sclater, 1891a, Annandale, 1905b, Wall, 1908c, 1909d, 1923d, 1925c, M.A. Smith, 1938, 1940, G.E. Shaw et al., 1939, Anonymous, 1962, L. Swan & Leviton, 1962, Deuve, 1970, Fleming & Fleming, 1973, Kramer, 1977, Majupuria, 1981, Nanhoe & Ouboter, 1987, Tiwari & Shah, 2004, Whitaker & Captain, 2004, M.F. Ahmed et al., 2009 and Rahman & Ahmed, 2012.

Remarks: Probably cen. Laos *fide* Deuve (1970: 101).

11. *Rhabdophis leonardi* (Wall, 1923b). J. Bombay Nat. Hist. Soc. (1923–1924) 29(2): 466. (*Natrix leonardi*)

Synonym: *Natrix swinhonis reducta* Mell, 1931a.

Type: Holotype, formerly BNHS 466, a 660 mm specimen (P.M.R. Leonard).

Type locality: "Sinlum Kaba, Upper Burma Hills, circ. 6,000 feet (Lat. 25° long. 97°)" [= Sinlumkaba, S Kachin Div., N Myanmar, ca. 24°16'N, 97°31'E, elevation 1830 m].

Distribution: Southwestern China (Guangxi, Sichuan, Xizang, Yunnan) and NE Myanmar (Kachin), 1250–2850 m.

Sources: Wall, 1925d, Jiang & Zhao, 1983, Tian et al., 1986 and Zhao, 2006.

Remarks: Sinlum Kaba was variously reported by Wall as 6000', 24°N, 97°E (Wall, 1921b: 43), Upper Burma Hills, 6000', 24°N, 97 1/2°E (Wall, 1923d: 610), and Kachin Hills, 6500', 25°N, 97°E (Wall, 1925d: 810).

12. *Rhabdophis lineatus* (W.C.H. Peters, 1861c). Mber. Königl. Akad. Wiss. Berlin 1861(4): 686–687. (*Tropidonotus lineatus*)

Types: Syntypes (2), ZMB 3976a–b, 690 mm and 205 mm specimens (F. Jagor, July 1860).

Type locality: "Loquilocun, Insel Samar, Philippinen" [= Loquilócon, a little forest village on Loquilócon River, cen. Western Samar, cen. Samar Is., Philippines, 11°48'N, 125°06'E].

Distribution: Southern Philippines (Basilan, Bohol, Dinagat, Mindanao, Samar), 300–1065 m.

Sources: Leviton, 1959b and Ross & Lazell, 1991.

Remarks: Tiedemann & Häupl (1980: 63), Tiedemann et al. (1994: 76) and Bauer et al. (1995: 75) listed a supposed syntype (NMW 23469) with locality as E Mindanao and collector as Semper in 1874, all of which exclude it as a type specimen.

13. *Rhabdophis murudensis* (M.A. Smith, 1925b). Sarawak Mus. J. 3(8): 5–6. (*Natrix murudensis*)

Type: Holotype, BMNH 1946.1.13.26 (formerly MAS 7210), a female (E.G. Mjöberg, 1925).

Type locality: "Mt. Murud, Borneo at 5500-6000 feet altitude" [= Mt. Murud, ext. NE Sarawak, cen. East Malaysia, 3°52'N, 115°30'E, elevation 1700 m].

Distribution: East Malaysia (Sabah, Sarawak), 915–2500 m.

Sources: Stuebing & Inger, 1999, Malkmus et al., 2002 and Stuebing & Lian, 2002.

14. *Rhabdophis nigrocinctus* (Blyth, 1855c). Proc. Asiatic Soc. Bengal 24(7): 717. (*Tropidonotus nigrocinctus*)

Synonyms: *Tropidonotus eisenhoferi* Gyldenstolpe, 1916, and *Pseudoxenodon fruhstorferi* F. Werner, 1925.

Types: Syntypes (3), ZSI 7479–81 (formerly IMC 7479–81), longest syntype 673 mm (T.M. Berdmore, 1855).

Type locality: "Mergui and the valley of the Tenasserim river" [Myanmar] (in error). Corrected to Pegu [= Schwe Gyen, on the lower Sitang River, bet. Bago and Mon Div., S Myanmar, bet 16°58'–17°36'N, elevation < 30 m] *fide* Sclater (1891b: 37).

Distribution: Southeast Asia. Southern China (Sichuan, Yunnan), N Vietnam (Dien Bien, Nghe An, Son La), Laos (Khammouan, Phongsali, Vientiane), Cambodia (Kampot, Koh Kong), Thailand (Bangkok, Chanthaburi, Chiang Mai, Chumphon, Kanchanaburi, Loei, Mae Hong Son, Nakhon Ratchasima, Phang Nga, Ranong, Surat Thani) and S Myanmar (Bago, Tanintharyi, Mergui Arch.: King's Is.), 400–2410 m.

Sources: Sclater, 1891a, C.H. Pope, 1935, Bourret, 1936b, 1939d, E.H. Taylor, 1965, Deuve, 1970, Hu et al., 1980, Tian et al., 1986, M.J. Cox, 1991b, M.J. Cox et al., 1998, Chan-ard et al., 1999, B.L. Stuart & Emmett, 2006, Zhao, 2006, B.L. Stuart & Heatwole, 2008 and V.S. Nguyen et al., 2009.

15. *Rhabdophis nuchalis* (Boulenger, 1891a). Ann. Mag. Nat. Hist. (6) 7(39): 281. (*Tropidonotus nuchalis*)

Synonyms: *Natrix nivalis* K.P. Schmidt, 1925a, and *Natrix nuchalis collaris* T. Vogt, 1927.

Types: Syntypes (4), BMNH 1946.1.12.69–70, four females, longest syntype 640 mm (A.E. Pratt, 1887–1890).

Type locality: "China. Ichang." Emended to Ichang, Upper Yangtse-Kiang by A.C.L.G. Günther (1889: 218) and Boulenger (1893a: 218) [= Yichang, W Hubei, cen. China, 30°42'N, 111°17'E].

Distribution: Southern Asia. Northeastern India (Nagaland), S China (Gansu, Guangxi, Guizhou, Shaanxi, Xizang, Hubei, Yunnan), N Myanmar (Kachin) and N Vietnam (Cao Bang, Lao Chai, Vinh Phuc), 620–2750 m.

Sources: A.C.L.G. Günther, 1889, Boulenger, 1893a, Bourret, 1936b, 1939, B.-Q. Hu et al., 1980, Tien et al., 1986, Inger et al., 1990, Zhao, 2006, V.S. Nguyen et al., 2009, I. Das, 2010 and Yao, 2012.

R

16. *Rhabdophis pentasupralabialis* Jiang & Zhao, 1983. Acta Herpetol. Sinica (2) 2(1): 60–61, 1 fig. (*Rhabdophis nuchalis pentasupralabialis*)

Type: Holotype, CIB 80-II-0040, a male (E.-M. Zhao, 26 July 1980).

Type locality: "Jiulong County, Sichuan, alt. 2750m, China."

Distribution: Southern China (Sichuan, Yunnan), 1200–3200 m.

Sources: Zhao, 1995 and 2006.

17. *Rhabdophis sarawacensis* (A.C.L.G. Günther, 1872a). Proc. Zool. Soc. London 40(1): 596 (*Tropidonotus sarawacensis*)

Synonym: *Tropidonotus maculatus* W.C.H. Peters, 1871b.

Types: Syntypes (3), BMNH 1946.1.13.12–14, two males and one female (A.H. Everett, 1869–1872).

Type locality: "Matang in the district of Sarawak, western Borneo" [= Kampong Matang, First Division, Kidi Distr., W Sarawak, East Malaysia, 1°35'N, 110°14'E, elevation 15 m].

Distribution: Malay Peninsula and Borneo. West Malaysia (Kelantan, Pahang, Perak), East Malaysia (Sabah, Sarawak) and Indonesia (Kalimantan), 15–1760 m.

Sources: Tweedie, 1983, Stuebing, 1991, Stuebing & Inger, 1999, Malkmus et al., 2002, David & I. Das, 2003 and Inger & Tan, 2010.

18. *Rhabdophis spilogaster* (F. Boie, 1827). Isis von Oken 20(6): 535. (*Tropidonotus spilogaster*)

Synonyms: *Tropidonotus spilogaster* H. Boie *in* Schlegel, 1826a *(nomen nudum), Tropidonotus spilogaster* Schlegel, 1826b *(nomen nudum),* and *Tropidonotus crebripunctatus* Wiegmann *in* Meyen, 1834.

Types: Syntypes (5), RMNH 1048a–b (G.A. Frank, 1843) and RMNH 1049a–c (Frank, 1847).

Type locality: "Java" [W Indonesia] (in error). Corrected to Philippines *fide* RMNH catalogue and Boulenger (1893a: 257). Restricted to Luzon Is., Philippines *fide* Leviton (1959b: 439) and herein.

Distribution: Northern Philippines (Batan, Camiguin Norte, Catanduanes, Limay, Lubang, Luzon, Polillo), NSL–30 m.

Sources: L.E. Griffin, 1911, E.H. Taylor, 1922a, Leviton, 1959b, Rabor, 1981, Alcala, 1986, Ross & Gonzales, 1992, R. Brown et al., 1996, 2000 and Oliveros et al., 2011.

Remarks: Original description supposedly based on H. Boie's MS (1823–1825) but description of *T. spilogaster* is not in it. Schlegel (1837: 309) erroneously suggests that type locality is Mariana Is. based on Boie's types. Data for Negros Is. record in error *fide* Leviton (1959b: 435).

19. *Rhabdophis subminiatus* (Schlegel, 1837). Essai Phys. Serp. 1: 167–168, 2: 313–314. (*Tropidonotus subminiatus*)

Synonyms: *Tropidonotus subminiatus* H. Boie *in* Schlegel, 1826a (*nomen nudum*), *Tropidonotus subminiatus* Schlegel, 1826b (*nomen nudum*), *Tropidonotus subminiatus* Reinwardt *in* F. Boie, 1827 (*nomen nudum*), *Tropidonotus manadensis* A.C.L.G. Günther, 1873b, *Pseudoxenodon intermedius* Lönnberg, 1899, *Natrix helleri* K.P. Schmidt, 1925a, *Natrix subminiata hongkongensis* Mell, 1931a, *Natrix subminiata siamensis* Mell, 1931a, *Natrix laobaoensis* Bourret, 1934c, and *Rhabdophis subminatus* – Kochva, 1987 *(nomen incorrectum).*

Type: Lectotype, RMNH 1067, a 710 mm specimen (C.G.C. Reinwardt, 1816–1821), designated by R.F. Inger herein.

Type locality: "Java dans les champs de Sawa inondés" [= wetlands of Java, Indonesia]. Emended to West Java *fide* C. Haas (1950: 543).

Distribution: Southeastern Asia and Greater Sundas. Northeastern India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, North Bengal, Sikkim, West Bengal), Bangladesh, Nepal (Chitwan), Bhutan (Sarpang), S China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Yunnan), Myanmar (Bago, Chin, Kachin, Rakhine, Shan, Tanintharyi, Mergui Arch.), Thailand (Bangkok, Chanthaburi, Chiang Mai, Chiang Rai, Kanchanaburi, Khon Kaen, Krabi, Krung Thep Mahanakhon, Loei, Nakhon Ratchasima, Nakhon Si Thammarat, Narathiwat, Phang Nga, Phuket, Rayong, Sisaket, Sukhothai, Surin, Trang, Ubon Ratchathani, Uttaradit), Cambodia (Kampot, Kampong Chhnang, Oddar Meanchey, Preah Vihear), Laos (Attapu, Borikhan, Champasak, Khammouan, Phongsali, Savannakhet, Vientiane, Xekong, Xiangkhouang), Vietnam (Bac Giang, Bac Kan, Bac Ninh, Binh Phuoc, Cao Bang, Dak Lak, Da Nang, Dong Nai, Gia Lai, Hai Duong, Ha Tay, Ha Tinh, Hoa Binh, Ho Chí Minh, Kien Giang, Kon Tum, Lam Dong, Lang Son, Lao Cai, Nghe An, Phu Tho, Quang Binh, Quang Nam, Quang Ninh, Quang Tri, Son La, Tay Nình, Than Hoa, Thua Thien-Hue, Vinh Phuc, Yen Bai), N West Malaysia (Pinang), Singapore and W Indonesia (Java, SE Kalimantan, Sumatra), NSL–2250 m.

Sources: A.C.L.G. Günther, 1864a, J. Anderson, 1879, Boulenger, 1890a, 1912c, Flower, 1899, Wall, 1908f, 1910a, 1923d, 1925d, 1926, T. Barbour, 1912b, Mell, 1922, 1931a, Brongersma, 1930, M.A. Smith, 1930a, Fan, 1931, Bourret, 1934b, 1936b, 1939d, Rendahl, 1937, Kopstein, 1938, Shaw et al., 1939, Gressitt, 1941, C. Haas, 1941, Bergman, 1956b, E.H. Taylor, 1965, Campden-Main, 1970a, Deuve, 1970, Saint-Girons, 1972a, Romer, 1979b, B.-Q. Hu et al., 1980, Tweedie, 1983, Tian et al., 1986, M.A.R. Khan, 1988, K.K.P. Lim & Chou, 1990, M.J. Cox, 1991b, Stuebing, 1991, I. Das, 1994, David & Vogel, 1996, M.J. Cox et al., 1998, Chan-ard et al., 1999, Schleich & Kästle, 2002, Tiwari & Shah, 2004, Whitaker & Captain, 2004, Zhao, 2006, M.F. Ahmed et al., 2009, V.S. Nguyen et al., 2009, Wangyal, 2012, T. Hartmann et al., 2013 and S.K. Sharma et al., 2013.

Remarks: Records for Ternate and Seram need confirmation *fide* C. Haas (1950: 544). Sulawesi record doubtful *fide* Lang & Vogel (2005: 255).

20. *Rhabdophis swinhonis* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 420, pl. 19, fig. f. (*Tropidonotus swinhonis*)

Synonym: *Tropidonotus swinhoei* Boettger, 1888c *(nomen emendatum).*

Type: Holotype, BMNH 1946.1.12.76, a 635 mm female (R. Swinhoe, 7 June–1 July 1858).

Type locality: "Formosa" [= Taiwan].

Distribution: Taiwan (Chiai, Taichung, Taipei), 40–850 m.

Sources: Boulenger, 1909a, Oshima, 1910, Steindachner, 1913b, Takahashi, 1930, Maki, 1931, Wang & Wang, 1956, Kuntz, 1963, Lue, 1987, 1990, Lue et al., 1989, Ota, 1991, Zhao, 2006 and Xiang & Li, 2009.

21. *Rhabdophis tigrinus* (H. Boie, 1826). Isis von Oken 18(2): 205–207. (*Tropidonotus tigrinus*)

Synonyms: *Amphiesma tigrinum* – A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Tropidonotus lateralis* Berthold, 1859, *Tropidonotus orientalis* A.C.L.G. Günther, 1861i, *Natrix tigrina* – Stejneger, 1907, *Natrix tigrina formosana* Maki, 1931, *Rhabdophis tigrinus multiventralis* G. Stewart, 1970 (*nomen nudum*), and *Rhabdophis tigrina pateralis* – Yao, 2012 *(nomen incorrectum).*

Types: Syntypes (7), RMNHa–g, longest syntype 693 mm (J.C. Blomhoff, 1817–1823).

Type locality: "Decima, Japan, [= Dejima Is., previously in Nagasaki harbor, now part of Nagasaki, Japan, 32°45'N, 129°52'E, elevation 10 m].

Distribution: Eastern Asia. China (Anhui, Fujian, Gansu, Guangxi, Guizhou, Hebei, Heilongjiang, Henan, Hubei, Hunan, Jiangsu, Jiangxi, Jilin, Liaoning, Nei Monggol, Ningxia, Shanxi, Shandong, Sichuan, Xizang, Yunnan, Zhejiang), SE Russia, North Korea (Kangwon, North Hwanghae, North Pyongan, South Pyongan), South Korea (Kangwon, Kyonggi, North Chungchong, South Cholla, South Chungchong, South Kyongsang, Cheju, Jin, Namhae and Yokji Is.), Japan (Honshu, Kyushu, Ryukyus: Mageshima, Takeshima, Tanegashima and Yakujima Is.) and Taiwan (Taichung), NSL–2200 m.

Sources: Temminck & Schlegel, 1838, A.C.L.G. Günther, 1864a, Strauch, 1873, 1876, Hilgendorf, 1880, Nikolsky, 1905, Wall, 1905f, Stejneger, 1907a, Slevin, 1925, Chang & Fang, 1931, Maki, 1931, Boring, 1932, C.H. Pope, 1935, V. Tanner, 1953, Dixon, 1956, Shannon, 1956, Takara, 1962, Nakamura & Ueno, 1969, Bannikov et al., 1977, M. Mori, 1982, Ota & Mori, 1985a, Paik & Yang, 1986, Lue, 1987, 1990, Szyndlar & Hung, 1987, Lue et al., 1989, Toriba, 1992a, Xu, 2001, J.C. Murphy & Schlager, 2003, Zhao, 2006, San & Lee, 2007, Xiang & Li, 2009 and Yao, 2012.

Remarks: Original description reprinted in H. Boie (1827b: 248–252) with type illustrated in Temminck & Schlegel (1838: pl. 4, figs. 1-9). Blomhoff was stationed at Dejima Is., Nagasaki, Japan so that is likely type locality. Schlegel (1837: 315) reported many specimens sent from Japan by Siebold and Bürger. Occurs in N Vietnam *fide* Bourret (1939d: 53) and I. Das (2010: 342). Type locality possibly in error *fide* Siebold *in* Temminck & Schlegel (1838: iii), who mistakenly corrected it to East Indies.

RHABDOPS Boulenger, 1893a (Natricidae)

Synonyms: *Grotea* Theobald, 1868b *(nomen praeoccupatum), Rabdops* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Rhabodops* – Deoras, 1965 *(nomen incorrectum).*

Type species: *Ablables olivaceus* Beddome, 1863a.

Distribution: Southern Asia.

Sources: A.C.L.G. Günther, 1864a, Boulenger, 1890a, 1893a, C.H. Pope, 1935, M.A. Smith, 1943, Murthy, 1986 and Ahmed et al., 2009.

1. *Rhabdops bicolor* (Blyth, 1854a). J. Asiat. Soc. Bengal 23(3): 289. (*Calamaria bicolor*)

Type: Holotype, ZSI 7030 (formerly IMC 7030), a 241 mm specimen (W. Robinson).

Type locality: "Asám, from the Khásya hills, or other upland country" [= probably Khasi Hills, E Meghalaya State, NE India, 25°35'N, 91°38'E, elevation 1370–1675 m].

Distribution: Southern Asia. Northeastern India (Meghalaya), N Myanmar (Kachin) and S China (W Yunnan), 900–1700 m.

Sources: Theobald, 1868a, J. Anderson, 1879, Wall, 1925a, 1926b, B.Q. Hu et al., 1980, Tian et al., 1991 and Zhao & Adler, 1993.

2. *Rhabdops olivaceus* (Beddome, 1863a). Madras Quart. J. Med. Sci. 6: 42. (*Ablabes olivaceus*)

Type: Holotype, BMNH 1946.1.12.44, a 521 mm male (R.H. Beddome, 1857–1863).

Type locality: "Manantoddy, Madras Presidency" [= Mananthavady, the Wynaad, Malabar, N Kerala, ext. SW India, 11°48'N, 76°01'E, elevation 760 m]. Emended to Manantoddy, Wynad *fide* Boulenger (1893a: 301) and Manatoddy, Malabar District *fide* M.A. Smith (1943: 328).

Distribution: Southwestern India (Western Ghats of Karnataka, Kerala, SW Maharashtra), 610–1300 m.

Sources: Wall, 1919b, Soman, 1962, Radhakrishnan, 1997, Whitaker & Captain, 2004, N. Khaire, 2006 and Ganesh et al., 2012a.

RHACHIDELUS Boulenger, 1908 (Xenodontidae)

Synonyms: *Rachidelus* – Phisalix, 1922 *(nomen incorrectum), Rhachedelis* – J.A. Peters & Orejas-Miranda, 1970 *(nomen incorrectum),* and *Rhacidelus* – Marx & Rabb, 1972 *(nomen incorrectum).*

Type species: *Rhachidelus brazili* Boulenger, 1908f.

Distribution: Southern South America.

Sources: Serie, 1915b, Amaral, 1930f, 1977, J.A. Peters & Orejas-Miranda, 1970, Lema et al., 1980, Lema, 1987, J.D. Williams & Francini, 1991, Scrocchi, 1992b, Nogueira, 2001, Fernandes & Passos, 2002, Silveira, 2004, Zaher et al., 2009 and Arruda et al., 2011.

1. *Rhachidelus brazili* Boulenger, 1908f. Ann. Mag. Nat. Hist. (8) 2(7): 31–32.

Type: Holotype, BMNH 1946.1.9.35, a 1320 mm male (V. Brazil, 1897–1908).

Type locality: "near the city of São Paulo, Brazil" [= vicinity of São Paulo, E São Paulo State, SE Brazil, 23°33'S, 46°38'W, elevation 800 m].

Distribution: Southern Brazil (Distrito Federal, Goiás, Mato Grosso, Mato Grosso do Sul, Minas Gerais, Paraná, Rio Grande do Sul, São Paulo), SE Paraguay and ext. NE Argentina (Córdoba, Misiones), 720–800 m.

RHADINAEA Cope, 1863b (Dipsadidae)

Synonyms: *Radinaea* – Sumichrast, 1882 *(nomen incorrectum), Rhadinea* S.W. Garman, 1884 *(nomen emendatum), Rhadinea* Palacky, 1898 *(nomen emendatum), Radianea* – Hilzheimer, 1912 *(nomen incorrectum), Radinoea* – Brazil, 1914 *(nomen incorrectum), Rhadinae* – Serié, 1919 *(nomen incorrectum), Rhadinia* – Briceño-Rossi, 1934 *(nomen incorrectum), Rhadinacea* – Hoge, 1964d *(nomen incorrectum), Rhabdinaea* – Duke, 1967 *(nomen incorrectum), Rhadineae* – W.W. Tanner & Avery, 1982 *(nomen incorrectum), Alexteesus* Hoser, 2012ah *(nomen illegitimum), Barrygoldsmithus* Hoser, 2012ah *(nomen illegitimum), Desmondburkeus* Hoser, 2012ah *(nomen illegitimum), Dudleyserpens* Hoser, 2012ah *(nomen illegitimum), Jockpaullus* Hoser, 2012ah *(nomen illegitimum), Robvalenticus* Hoser, 2012ah *(nomen illegitimum),* and *Wallisserpens* Hoser, 2012ah *(nomen illegitimum).*

Type species: *Taeniophis vermiculaticeps* Cope, 1860e.

Distribution: Southeastern USA and Latin America.

Fossil records: Pleistocene of SE USA.

Sources: J.A. Peters & Orejas-Miranda, 1970, C.W. Myers, 1974, 2011, Cadle, 1984b, C.W. Myers & Cadle, 1994, Zaher et al., 2009 and Mulcahy et al., 2011.

Remarks: The following genera and species have been separated from *Rhadinaea: Rhadinella* (*anachoreta, godmani, hannsteini, hempsteadae, kanalchutchan, kinkelini, lachrymans, montecristi, pegosalyta, pilonaorum, posadasi, rogerromani, schistose, serperaster, tolpanorum*), *Taeniophallus* (*affinis, bilineatus, brevirostris, nebularis, nicagus, occipitalis, persimilis, precilopogon, quadriocellatus*), and *Urotheca* (*decipiens, dumerilii, fulviceps, guentheri, lateristriga, multilineata, myersi, pachyura*).

1. *Rhadinaea bogertorum* C.W. Myers, 1974. Bull. Amer. Mus. Nat. Hist. 153(1): 59–65, figs. 10j, 11g.

Type: Holotype, AMNH 100907, a 448 mm male (M.R. Bogert, 27 Aug. 1967).
Type locality: "10.5 miles (16.8 kilometers) by road north of Cerro Pelón, near km. 123 on Tuxtepec Road, 6650 feet (2027 meters), Sierra de Juárez (part of the Sierra Madre del Sur), Oaxaca, Mexico."
Distribution: Mexico (Sierra de Juárez of N-cen. Oaxaca), 2025–2250 m.
Sources: Casas-Andreu et al., 1996 and Ramírez-Bautista et al., 1998.

2. *Rhadinaea calligaster* (Cope, 1875a). J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 146, pl. 28, fig. 12. (*Contia calligaster*)

Type: Lectotype, USNM 30679 (W.M. Gabb, 1873–1875), designated by C.W. Myers (1974: 155).
Type locality: "Pico Blanco, 5000 to 7000 feet, Limón Prov., Costa Rica" via lectotype selection. Emended to Cerro Utyum *fide* Savage (1970: 282).
Distribution: Costa Rica (Alajuela, Cartago, Heredia, Limón, Puntarenas, San José) and ext. W Panama (Bocas del Toro, Chiriquí), 1220–2440 m.
Sources: A.C.L.G. Günther 1893 *in* 1885–1902, E.H. Taylor, 1951, Savage, 1980a, 2002, N.J. Scott et al., 1983 and Solórzano, 2004.

3. *Rhadinaea cuneata* C.W. Myers, 1974. Bull. Amer. Mus. Nat. Hist. 153(1): 65–68, figs. 10f, 11i.

Type: Holotype, UAZ 26580, a 514 mm female (native via R.L. Bezy & C.J. Cole, 28 Sept. 1966).
Type locality: "Ojo del Aqua, Nacimiento del Río Atoyac, about 10 kilometers (air line) north-northeast of Córdoba,Veracruz, Mexico" [= Ojo de Agua, W-cen. Veracruz State, SE Mexico, 18°59'N, 96°54'W, elevation 1200 m].
Distribution: Southeastern Mexico (Oaxaca, cen. Veracruz), 50–1400 m.
Sources: McCoid & Dixon, 1981, Pérez-Higareda & Smith, 1991 and Casas-Andreu et al., 1996.

4. *Rhadinaea decorata* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 35–36. (*Coronella decorata*)

Synonyms: *Enicognathus vittatus* Jan, 1863a, *Dromicus ignitus* Cope, 1871b, *Erythrolamprus longicaudus* F. Werner, 1903a, and *Erithrolamprus longicaudus* – Briceño-Rossi, 1934 *(nomen incorrectum)*.
Type: Lectotype, BMNH 1946.1.9.4, an adult female (A. Sallé, 1846–1856), designated by C.W. Myers (1974: 68).
Type locality: "Mexico" via lectotype selection. Probably Veracruz or Oaxaca State *fide* A.C.L.G. Günther (1885–1902: vi). Restricted to Potrero Viejo, Veracruz State, Mexico *fide* H.M. Smith & Taylor (1950a: 350).
Distribution: Latin America. Southeastern Mexico (Chiapas, Oaxaca, Puebla, SE San Luis Potosí, Veracruz), Belize (Toledo), N Guatemala (Alta Verapaz, El Petén), E Honduras (Gracias a Dios, Olancho), E Nicaragua (Atlántico Norte, Atlántico Sur, Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Bocas del Toro, Canal Zone, Chiriquí, Coclé, Colón, Darién, Panama, Veraguas, and Barro Colorado and Colón Is.), W Colombia (Cauca) and NW Ecuador (Esmeraldas, Imbabura, Pichincha), NSL–1750 [2000] m.
Sources: Jan & Sordelli, 1866 *in* 1860–1881, A.C.L.G. Günther, 1893 *in* 1885–1902, Bocourt, 1886 *in* Duméril, Bocourt & Mocquard, 1870–1909, H.M. Smith, 1943a, E.H. Taylor, 1951, 1954, L.C. Stuart, 1963, J.C. Lee, 1980, 1996, Savage, 1980a, 2002, Villa, 1983, J.D. Johnson, 1984, 1989, Savage & Villa, 1986, Pérez-Santos & Moreno, 1988, 1991, J.A. Campbell, 1998b, Stafford & Meyer, 2000, McCranie, 2004a, 2011 and Ortega-Andrade et al., 2010.

5. *Rhadinaea flavilata* (Cope, 1871b). Proc. Acad. Nat. Sci. Philadelphia 23(2): 222–223. (*Dromicus flavilatus*)

Type: Holotype, ANSP 5583 (H.C. Yarrow, Nov. 1871), lost *fide* E. Böhlke *in* Malnate (1939: 359).
Type locality: "near Fort Macon, on the coast of North Carolina" [USA]. Emended to Bogue Banks some eight miles S of Fort Macon *fide* Coues & Yarrow (1878: 27) (direction in error *fide* Robertson & Tyson (1950: 137). Corrected to approximately 8 miles westward from Fort Macon, on Bogue Banks, Carteret County, North Carolina, USA *fide* C.W. Myers (1967: 51).
Distribution: Southeastern USA (ext. SW Alabama, Florida, ext. SE Georgia, ext. SE Louisiana, ext. S Mississippi, SE North Carolina, SE South Carolina), NSL–190 m.
Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Florida, Tennessee).
Sources: Malnate, 1939, K.P. Schmidt & Davis, 1941, Carr & Goin, 1955, A.H. Wright & Wright, 1957, C.W. Myers, 1967, Mount, 1975, Ashton & Ashton, 1988, Dundee & Rossman, 1989, Conant & Collins, 1991, Holman, 1995a, 2000a, Palmer & Braswell, 1995, Whiteman et al., 1995, Tennant, 1997 and Walley, 1999.

6. *Rhadinaea forbesi* H.M. Smith, 1942i. Proc. Biol. Soc. Washington 55: 188–189, pl. 3, fig. 3.

Type: Holotype, USNM 110365, an adult male (H.M. Smith, 23 March 1940).
Type locality: "Tequeyutepec, seven miles west of Jalapa, Veracruz, Mexico" [= Tequeyutepec, 7 miles W of

Jalapa Enríquez, Veracruz State, Mexico, 19°32'N, 97°01'W, elevation 1800 m].

Distribution: Eastern Mexico (Sierra Madre Oriental of cen. Veracruz), 520–2590 m.

Sources: H.M. Smith, 1943a, H.M. Smith & Taylor, 1945, E.H. Taylor, 1950a, Pérez-Higareda & Smith, 1991 and Montes de Oca & Mendelson III, 1997.

Remarks: Type locality erroneously listed as 10 mi. NE of Jalapa *fide* H.M.Smith & Taylor (1950b: 11).

7. *Rhadinaea fulvivittis* Cope, 1875a. J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 139–140.

Type: Holotype, USNM 7075, adult female (A.L.J.F. Sumichrast, 1855–1875).

Type locality: "Orizaba, Vera Cruz" [Mexico]. Emended to Alpine region of Cerro Orizaba, Veracruz, Mexico [= lower slopes of Pico de Orizaba or Volcán Citlaltépetl (19°01'N, 97°16'W), W-cen. Veracruz State, E Mexico] *fide* Cochran (1961: 210) and C.W. Myers (1974: 96–97).

Distribution: Southern Mexico (Sierra Madre de Oaxaca of SE Puebla and cen. Veracruz, Sierra Madre del Sur of W Oaxaca), [1740] 2195–3300 m.

Sources: H.M. Smith, 1943a, Pérez-Higareda & Smith, 1991 and Casas-Andreu et al., 1996.

8. *Rhadinaea gaigeae* Bailey, 1937b. Copeia 1937(2): 118–119.

Synonym: *Rhadinaea crassa* H.M. Smith, 1942j.

Type: Holotype, MCZ 24983, a 482 mm male (W.W. Brown, 9 June 1926).

Type locality: "Alvarez, San Luis Potosi, Mexico" [= Alvarez, W San Luis Potosí State, cen. Mexico, 22°03'N, 100°37'W, elevation 2680 m].

Distribution: East-central Mexico (Sierra Madre Oriental of N Hidalgo, Querétaro, E San Luis Potosí, SW Tamaulipas, Sierra Camaron of NE Guanajuato, S-cen. San Luis Potosí), 200–2835 m.

R

Sources: H.M. Smith, 1943a, McCoid & Dixon, 1981, Auth et al., 2000, Farr et al., 2009, Ramírez-Bautista et al., 2010 and Dixon et al., 2011.

9. *Rhadinaea hesperia* Bailey, 1940. Occ. Pap. Mus. Zool., Univ. Michigan (412): 8–10, pl. 2, fig. 3.

Synonyms: *Rhadinaea hesperia baileyi* H.M. Smith, 1942i, and *Rhadinaea hesperia hesperioides* H.M. Smith, 1942i.

Type: Holotype, MCZ 42661, a 264 mm (svl) male (W.W. Brown, 1936).

Type locality: "Omilteme and Sierra de Burro, Guerrero, Mexico." Corrected to Omilteme, Guerrero, Mexico [= Omiltemi, cen. Guerrero State, S Mexico, 17°33'N, 99°41'W, elevation 2150 m] *fide* T. Barbour & Loveridge (1946: 186) and MCZ catalogue. Emended to Omilteme, on the Río Balsas drainage of the Sierra Madre del Sur *fide* C.W. Myers (1974: 81).

Distribution: Western Mexico (SW Aguascalientes, Chihuahua, Colima, N Guanajuato, Guerrero, Jalisco, Michoacán, Morelos, Nayarit, Oaxaca, Puebla, S Sinaloa, S Zacatecas), 100–2560 m.

Sources: H.M. Smith, 1942i, H.M. Smith & Taylor, 1945, W.W. Tanner, 1985, Vázquez-Díaz et al., 1999, Canseco-Marquez et al., 2000, H.M. Smith et al., 2001, Lemos-Espinal et al., 2004c and Díaz & Díaz, 2005.

10. *Rhadinaea laureata* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 419, pl. 19, fig. e. (*Dromicus laureatus*)

Synonym: *Erythrolamprus grammophrys* Dugès, 1888b.

Type: Holotype, BMNH 1946.1.9.2 (formerly BMNH 1868.4.7.9), a 510–533 mm male (H. Doorman).

Type locality: "neighbourhood of the city of Mexico" [= vicinity of Ciudad de Mexico (19°26'N, 99°08'W, elevation 2245 m), Distrito Federal, S-cen. Mexico].

Distribution: Western and S-cen. Mexico (Sierra Madre Occidental of SW Chihuahua, W cen. Durango and Jalisco, Cordillera Volcánica of Distrito Federal, México, cen. Morelos, Michoacán), 1525–3080 m.

Sources: Auth et al., 1999 and R.A. Villa et al., 2012a, c.

Remarks: Probably occurs in Aguascalientes, Mexico *fide* McCranie & Wilson (2001b: 35).

11. *Rhadinaea macdougalli* H.M. Smith & Langebartel, 1950. J. Washington Acad. Sci. (1949) 39(12): 413, fig. 1 (left).

Type: Holotype, UIMNH 3775, a 294 mm male (T.B. MacDougall, 7 March 1949).

Type locality: "near Buena Vista, at crest of Sierra Madre, 4,000–4,500 feet, directly north of Río Grande, 15 miles north of Niltepec, and 1–2 miles downstream from Scarces; 50 miles northeast of Tehuantepec, Oaxaca, Isthmus of Tehuantepec, México" [= Buenavista, E Oaxaca State, ext. S Mexico, ca. 16°45'N, 94°31'W, elevation 1220–1370 m].

Distribution: Extreme S Mexico (Sierra Madre del Sur and Sierra Madre de Chiapas of E Oaxaca and S Veracruz), 900–1500 m.

Sources: Casas-Andreu et al., 1996, Ramírez-Bautista et al., 1998 and Pérez-Higareda et al., 2002.

12. *Rhadinaea marcellae* E.H. Taylor, 1949. Univ. Kansas Sci. Bull. 33(2): 197–198.

Type: Holotype, LSUMZ 270, a 290 mm male (M. Newman [LSU Exped.], 12 June 1947).

Type locality: "Xilitla region, southeastern part of the State of San Luis Potosí a few miles from the border of the State of Hidalgo and equally close to the border of Querétaro, México, between 2,000 and 3,000 feet" [= ca. 21°23'N, 98°58'W, elevation 610–915 m].

Distribution: East-central Mexico (Hidalgo, Puebla, ext. SE San Luis Potosí), 670–2130 m.

Sources: Nieto-Montes de Oca & Mendelson, 1997, Ramírez-Bautista et al., 1998, Canseco-Marquez et al., 2000 and Ramírez-Bautista et al., 2010.

Remarks: E.H. Taylor (1949: 197) erroneously listed the collection date as 12 May 1947. C.W. Myers (1974: 88) pointed out that nearby mountains exceed 2100 m elevation, so the type may have originated well above the altitude of Xilitla (670 m).

13. *Rhadinaea montana* H.M. Smith, 1944a. Field Mus. Nat. Hist. (Zool.) 29(8): 146–148.

Type: Holotype, FMNH 30826, a 580 mm female (H. Hoogstraal et al., 11 Aug. 1938).

Type locality: "Ojo de Agua, Galeana, Nuevo León, México" [= Ojo de Agua, near Galeana (24°49'N, 100°04'W, elevation 1630 m), cen. Nuevo León State, NE Mexico]. Emended to spring located 34 km NNE Galeana at the 14th de Marzo (2134 m), a village at the base of Cerro Potosí *fide* Liner (1996b: 640.2).

Distribution: Northeastern Mexico (cen. Nuevo León and Tamaulipas), 540–2135 m.

Sources: Bailey, 1940, H.M. Smith & Taylor, 1945, Liner, 1996b, Dixon et al., 2011 and García-Vázquez, 2012.

14. *Rhadinaea myersi* Rossman, 1965b. Occ. Pap. Mus. Zool., Louisiana St. Univ. (32): 1–4, fig. 1.

Type: Holotype, LSUMZ 7566 (formerly LCB 1137), a 388 mm male (L.C. Binford, 2 May 1964).

Type locality: "ecotone between pine and cloud forests (5,000 feet) 3 mi. N Pluma Hidalgo, Oaxaca, southern México" [= 3 miles N of Pluma Hidalgo, S-cen. Oaxaca State, S Mexico, ca. 15°57'N, 96°25'W, elevation 1525 m].

Distribution: Extreme S Mexico (Sierra Madre del Sur of S Oaxaca), 1300–2225 m.

Source: Ramirez-Bautista et al., 1998.

Remarks: Casas-Andreu et al., 1996 listed type locality at 1600 m.

15. *Rhadinaea omiltemana* (A.C.L.G. Günther, 1894 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 113, pl. 40, fig. b. (*Dromicus omiltemanus*)

Type: Holotype, BMNH 1946.1.1.7, a 394 mm male (H.H. Smith via F.D. Godman).

Type locality: "Mexico, Omilteme in Guerrero 8000 feet" [= Omiltemi, cen. Guerrero State, S Mexico, 17°33'N, 99°41'W, elevation 2150 m].

Distribution: Southern Mexico (Sierra Madra del Sur of cen. Guerrero), 1900–2440 m.

Remarks: Boulenger (1894a: 178) listed type as female.

16. *Rhadinaea pulveriventris* Boulenger, 1896a. Cat. Snakes Brit. Mus. 3: 635–636.

Type: Holotype, BMNH 1946.1.9.6 (formerly BMNH 1895.7.13.15), a 430 mm female (C.F. Underwood).

Type locality: "Azahar de Cartago, Costa Rica."

Distribution: Central Costa Rica (Cordillera Central of Alajuela, Cartago, Heredia, San José) and W Panama (Cordillera de Talamanca of Bocas del Toro and Chiriquí), 1000–1600 m.

Sources: E.H. Taylor, 1951, Savage, 2002 and Solórzano, 2004.

17. *Rhadinaea quinquelineata* Cope, 1886b. Proc. Amer. Philos. Soc. (1885) 23(122): 277.

Type: Lectotype, USNM 31350, a 435–438 mm female (S. Bernad), designated by Bailey (1940: 11).

Type locality: "State of Hidalgo, Meixico." (sic) Emended to Teziutlán, Puebla, Mexico *fide* USNM catalogue and Bailey (1940: 11) [= Teziutlán, N Puebla State, SE Mexico, 19°49'N, 97°21'W, elevation 1940 m].

Distribution: Mexico (Sierra Madre Oriental of N Oaxaca and Puebla), 1940–2560 m.

Sources: Bailey, 1940, H.M. Smith, 1944a, McCoid & Dixon, 1981, Benitez-Gálvez, 1997 and Dixon et al., 2011.

18. *Rhadinaea sargenti* Dunn & Bailey, 1939. Bull. Mus. Comp. Zool. 86(1): 10–11.

Type: Holotype, MCZ 42788, a 307 mm male (W.M. Sergeant, 1936).

Type locality: "Pequeni-Esperanza ridge near head of Pequeni, 1800 feet, eastern Panama" [= Pequení-Esperanza ridge near head of Río Pequení, W Panamá Prov., cen. Panama, 550 m].

Distribution: Central Panama (Colón, W Panamá), 1000–2460 m.

Source: C.W. Myers & Ibañez, 2012.

19. *Rhadinaea stadelmani* L.C. Stuart & Bailey, 1941. Occ. Pap. Mus. Zool., Univ. Michigan (442): 4–6.

Type: Holotype, UMMZ 89078, a 173 mm female (R. Stadelman, Nov. 1937).

Type locality: "Todos Santos, Huehuetenango, Guatemala, at 8000 feet altitude."

Distribution: Western Guatemala (Sierra de los Cuchumatanes and Montañas del Cuilco of Huehuetenango), 2000–2660 m.

Source: Mendelson & Kizirian, 1995a.

20. *Rhadinaea taeniata* (W.C.H. Peters, 1863c). Mber. Königl. Akad. Wiss. Berlin 1863(6): 275–277. (*Dromicus taeniatus*)

Synonym: *Rhadinaea aemula* Bailey, 1940.

Type: Lectotype, ZMB 2117A, a 505–510 mm male (F. Deppe, Dec. 1824–May 1829), designated by C.W. Myers (1974: 106).

Type locality: "Mexico" via lectotype selection. Restricted to S half of México State *fide* C.W. Myers (1974: 104).

Distribution: Southern Mexico (Cordillera Volcánica of Distrito Federal, S Jalisco, México, Michoacán, Morelos and Sierra Madre del Sur of cen. Guerrero, Oaxaca), 1000–2835 m.

Source: Zaldivar-Riverón & Pérez-Ramos, 2001.

21. *Rhadinaea vermiculaticeps* (Cope, 1860e). Proc. Acad. Nat. Sci. Philadelphia 12(6): 249–250. (*Taeniophis vermiculaticeps*)

Type: Lectotype, ANSP 3535, a 340 mm male (R.W. Mitchell, 1857–1860), designated by C.W. Myers (1974: 163).

Type locality: "Cocuyos de Veraguas, Veraguas Province, Panama" via lectotyype selection. Emended to Cocuyos de Veraguas, a gold mine near the Río Concepción, N Veraguas Province, cen. Panama, ca. 8°45'N, 81°00'W, elevation 100 m *fide* C.W. Myers (1974: 166).

Distribution: Western Panama (Coclé, N Veraguas), 100–840 m.

Remarks: Type locality emendation to Cocuyas de Veraguas, New Granada (Colombia) *fide* Malnate (1971: 373) in error.

RHADINELLA H.M. Smith, 1941a (Dipsadidae)

Synonym: *Rhadinelia* – W.W. Tanner & Avery, 1982 *(nomen incorrectum).*

Type species: *Rhadinella schistosa* H.M. Smith, 1941a.

Distribution: Southern Mexico and upper Central America.

Sources: H.M. Smith, 1941a and C.W. Myers, 1974, 2011.

R

1. *Rhadinella anachoreta* (E.N. Smith & Campbell, 1994). Occ. Pap. Mus. Nat. Hist. Univ. Kansas (167): 2–6, figs. 1–2. (*Rhadinaea anachoreta*)

Type: Holotype, UTA 33051 (formerly ENS 3360), a 251 mm male (E.N. Smith, 26 June 1991).

Type locality: "north slope of Cerro del Aguacate, Aldea Negro Norte, Sierra de Caral, Municipio de Morales, Departamento de Izabal, Guatemala, 1180 m, about 15°20'49" N, 88°40'35"W."

Distribution: Guatemala (Izabal) and Honduras (Cortés, Santa Bárbara), 200–1180 m.

Sources: J.A. Campbell, 1998b, Townsend et al., 2005b, Townsend, 2006 and McCranie, 2007b, 2011a.

2. *Rhadinella godmani* (A.C.L.G. Günther, 1865). Ann. Mag. Nat. Hist. (3) 15(86): 94. (*Dromicus godmani*) (*nomen corrigendum*)

Synonyms: *Dromicus godmanni* A.C.L.G. Günther, 1865 (*nomen incorrigendum*), *Dromicus godmani* A.C.L.G. Günther, 1983 *in* 1885–1902 (*nomen corrigendum*), *Rhadinaea zilchi* Mertens, 1952a, *Rhadinaea altamontana* E.H. Taylor, 1954, and *Rhadinaea binfordi* Rossman, 1965b.

Type: Lectotype, BMNH 1946.1.9.17, a 453–457 mm male (O. Salvin & F.D. Godman, 1861–1863), designated by C.W. Myers (1974: 122).

Type locality: "Dueñas (Guatemala)" [= San Miguel Dueñas, SW Sacatepéquez Dept., S-cen. Guatemala, 14°31'N, 90°48'W, elevation 1430 m]. Emended to between the volcanos of Agua and Fuego, on an offshoot of the table lands, elevated about 4700 feet above the level of the sea *fide* Salvin (1860: 453).

Distribution: Mesoamerica. Southeastern Mexico (ext. SE Oaxaca, Chiapas), S Guatemala (El Progreso, Chimaltenango, Sacatepéquez, San Marcos), W El Salvador (Santa Ana), SW Honduras (Comayagua, Francisco Morazán, Intibucá, La Paz, Ocotepeque, Santa Bárbara, Yoro), Costa Rica (Cartago, Heredia, San José) and ext. W Panama (Chiriquí), 1000–2650 m.

Sources: Bocourt, 1886 *in* Duméril, Mocquard & Bibron, 1870–1909, A.C.L.G. Günther, 1893 *in* 1885–1902, L.C. Stuart & Bailey, 1941, Uzzell & Starrett, 1958, L.D. Wilson et al., 1979, L.D. Wilson & Meyer, 1985, McCranie & Wilson, 1992, Holm & Cruz-Díaz, 1994, Mendelson & Kizirian, 1995a, G. Köhler, 1999b, G. Köhler & McCranie, 1999b, Solórzano, 2004 and McCranie, 2006, 2011.

Remarks: Probably occurs in N Nicaragua *fide* G. Köhler (1999b: 81).

3. *Rhadinella hannsteini* (L.C. Stuart, 1949). Proc. Biol. Soc. Washington 62: 165–167. (*Trimetopon hannsteini*)

Type: Holotype, UMMZ 98756, a 324 mm male (L.C. Stuart, 14 May 1947).

Type locality: "Finca La Paz, (18 kilometers [straight line] due north of Coatepeque), Pacific slopes of southwestern highlands, Departament of San Marcos, Guatemala. Elevation, 1,450 meters" [= Finca La Paz, S San Marcos Dept., ext. SW Guatemala, 14°52'N, 91°52'W, elevation 1450 m].

Distribution: Extreme SE Mexico (SE Chiapas) and SW Guatemala (S San Marcos, Suchitepéquez), 500–2000 m.

Sources: L.C. Stuart, 1963, Landy et al., 1966, Villa et al., 1988, J.A. Campbell & Vannini, 1989 and E.N. Smith & Campbell, 1994.

4. *Rhadinella hempsteadae* (L.C. Stuart & Bailey, 1941). Occ. Pap. Mus. Zool., Univ. Michigan (442): 2–4. (*Rhadinaea hempsteadae*)

Type: Holotype, UMMZ 89080, adult male (L.C. Stuart, 26 May 1940).
Type locality: "cloud forest zone (ca. 5700 feet) above Finca Chichén, Alta Verapaz, Guatemala" [= Finca Chichén, SW Alta Verapaz Dept., cen. Guatemala, 15°23'N, 90°18'W, 1740 m].
Distribution: Central Guatemala (Cordillera de los Cuchumatanes of Huehuetenango and Montañas de Alta Verapaz of Alta Verapaz, Baja Verapaz, El Progreso, Zacapa), 1740–1900 m.
Sources: L.C. Stuart, 1954a, 1963, Holm & Cruz-Díaz, 1994 and Mendelson & Kizirian, 1995a.

5. *Rhadinella kanalchutchan* (Mendelson & Kizirian, 1995a). Herpetologica 51(3): 302–308, figs. 1–3. (*Rhadinaea kanalchutchan*)

Type: Holotype, UTEP 12233, a 490 mm male (J.D. Johnson & C. Harrison, 10 May 1989).
Type locality: "8 km (5 mi.) S San Cristóbal de Las Casas, Chiapas, Mexico" [= 8 km S San Cristóbal de Las Casas (16°44'N, 92°38'W, elevation 2135 m), cen. Chiapas State, SE Mexico].
Distribution: Southern Mexico (Chiapas), 2300–2710 m.

6. *Rhadinella kinkelini* (Boettger, 1898). Kat. Rept. Senck. Mus. 2: 68. (*Rhadinaea kinkelini*)

Synonyms: *Rhadinaea veraepacis* L.C. Stuart & Bailey, 1941, and *Rhadinaea pinicola* Mertens, 1952b.
Type: Holotype, SMF 19062 (formerly SMF-B 8178,1a), a 358 mm female (A. Kinkelin, 1897).
Type locality: "Matagalpa, Nicaragua" [= Matagalpa, cen. Matagalpa Dept., N-cen. Nicaragua, 12°53'N, 85°57'W, elevation 720 m]. Probably the humid forest above the town in the Cordillera Dariense *fide* C.W. Myers (1974: 141).
Distribution: Mesoamerica. Southern Mexico (Chiapas), Guatemala (Alta Verapaz), ext. NW El Salvador (ext. N Santa Ana), W Honduras (Copán, Cortés, Intabucá, Ocotepeque, Olancho, Yoro) and N-cen. Nicaragua (Jinotega, Matagalpa), [700] 900–2200 m.
Sources: L.D. Wilson & Meyer, 1971, 1985, Campbell, 1982, L.D. Wilson, 1983a, Villa et al., 1988, McCranie & Wilson, 1991a, E.N. Smith & Campbell, 1994, Mendelson III & Kizirian, 1995b, G. Köhler & McCranie, 1999a, G. Köhler et al., 2005 and McCranie, 2011a.

7. *Rhadinella lachrymans* (Cope, 1870). Proc. Amer. Philos. Soc. (1869–1870) 11(81): 154. (*Lygophis lachrymans*)

Type: Holotype, ANSP 5539, a 385 mm female (F. Sumichrast, 1855–1869).
Type locality: Unknown. Designated as Orizaba, Mexico *fide* F. Sumichrast *in* Cope (1900: 759) (in error). Probably Chiapas, Mexico *fide* Bailey (1940: 7) and C.W. Myers (1974: 141). Restricted to Cerro Ovando, Chiapas, Mexico *fide* H.M. Smith & Taylor (1950a: 326).
Distribution: Extreme SE Mexico (Sierra Madre of SE Chiapas), SW Guatemala (Sierra Madre of Chimaltenango, Quezaltenango, San Marcos) and Honduras (Olancho), 1050–2635 m.
Sources: A.C.L.G. Günther, 1894 *in* 1885–1902, F. Werner, 1929a, Bailey, 1940, H.M. Smith & Taylor, 1945, L.C. Stuart, 1963, McCranie & Wilson, 2001c and McCranie, 2011a.

8. *Rhadinella montecristi* (Mertens, 1952b). Zool. Anz. 149(5–6): 136–137. (*Rhadinaea montecristi*)

Type: Holotype, SMF 43188, a 408 mm male (A. Zilch, 26–27 Aug. 1951).
Type locality: "Hacienda Monte Cristo. 2200 m. H., Gebirge von Metapan, Dept. Santa Ana, El Salvador" [= Hacienda, Monte Cristo, Cordillera Metapán-Alotepeque, ext. N Santa Ana Dept., ext. NW El Salvador, 14°24'N, 89°35'W, elevation 2200 m].
Distribution: Upper Central America. Guatemala (Zacapa), ext. W Honduras (Comayagua, Copán, Cortés, Lempíra, Ocotepeque) and ext. NW El Salvador (Chalatenango, Santa Ana), 1300–2620 m.
Sources: Mertens, 1952c, Uzzell & Starret, 1958, L.D. Wilson & Meyer, 1985, McCranie & Wilson, 1991b, Holm, 1993, E.N. Smith & Campbell, 1994, G. Köhler, 1996b, G. Köhler et al., 2005, Townsend et al., 2006, L.D. Wilson et al., 2006 and McCranie, 2011a.

9. *Rhadinella pegosalyta* (McCranie, 2006). Proc. Biol. Soc. Washington 119(4): 528–532, figs. 1–2, 4–5. (*Rhadinaea pegosalyta*)

Type: Holotype, USNM 56920, a 355 mm male (F.E. Astañeda, T. Manzanares & J.R. McCranie, 18 June 2005).
Type locality: "near visitor's center of Parque Nacional El Cusuco, 15°31'N, 88°12'W, 1550 m elev., Departamento de Cortés, Honduras."
Distribution: Northwestern Honduras (Cortés). Known only from the vicinity of type locality.
Source: McCranie, 2011a.

10. *Rhadinella pilonaorum* (L.C. Stuart, 1954a). Proc. Biol. Soc. Washington 67: 176–177. (*Trimetopon piloñaorum*)

Type: Holotype, UMMZ 102635, a 300–310 mm female (A. Piloña, 25 July 1947).
Type locality: "Finca La Gloria (about 12 kilometers [straight line] northeast of Chiquimulilla), Department of Santa Rosa, Guatemala at about 950 meters" [=

Finca La Gloria, N Santa Rosa Dept., SE Guatemala, 14°05'N, 90°23'W, elevation 950 m].

Distribution: Southeastern Guatemala (N Santa Rosa) and W El Salvador (La Libertad, San Salvador), 670–1080 m.

Source: G. Köhler et al., 2005.

11. *Rhadinella posadasi* (Slevin, 1936). Proc. California Acad. Sci. (4) 23(4): 79–80. (*Trimetopon posadasi*)

Type: Holotype, CAS 66964, a 257–276 mm male (J.R. Slevin, 8 Aug. 1924).

Type locality: "Southern slope Volcan Zunil, Suchitepequez, Guatemala" [= Volcán Zunil, N Suchitepéquez Dept., SW Guatemala, 14°44'N, 91°27'W].

Distribution: Southwestern Guatemala (Pacific versant of Sierra Madre of Sololá, N Suchitepéquez), 875–1000 [1830] m.

12. *Rhadinella rogerromani* (G. Köhler & McCranie, 1999b). Senck. Biol. 79(2): 244–248, figs. 1–6. (*Rhadinaea rogerromani*)

Type: Holotype, SMF 79156, a 286 mm male (G. Köhler & E. G. Köhler, 13 April 1999).

Type locality: "from S slope of Cerro Saslaya (13°46.0' N, 85°02.3' W), 1450 m elevation, Región Autónoma Atlántico Norte, Nicaragua."

Distribution: Northeastern Nicaragua (Atlántico Norte), 1450 m. Known only from type locality.

Source: McCranie, 2006.

13. *Rhadinella schistosa* H.M. Smith, 1941a. Copeia 1941(1): 7–9, fig. 1.

Type: Holotype, FMNH 100065 (formerly EHT-HMS 23580 & EHT-CC 2116), a 186–187 mm male (E.H. Taylor, Aug. 1940).

Type locality: "Cuautlapan, Veracruz, México" [= Cuautlapán, W-cen. Veracruz State, SE Mexico, 18°52'N, 97°01'W, elevation 1000 m].

Distribution: Mexico (Sierra Madre de Oaxaca of N Oaxaca and W-cen. Veracruz), 1000 m.

Source: Pérez-Higareda & Smith, 1991.

14. *Rhadinella serperaster* (Cope, 1871b). Proc. Acad. Nat. Sci. Philadelphia 23(2): 212–213. (*Rhadinaea serperaster*)

Type: Holotype, ANSP 3739, a 176 mm male (C.H. Van Patten, 1865–1871).

Type locality: "near San José, Costa Rica" [= vicinity of San José (9°56'N, 84°05'W, elevation 1160 m), N San José Prov., cen. Costa Rica].

Distribution: Central Costa Rica (Alajuela, Cartago, Heredia, San José), 1160–2200 m.

Sources: E.H. Taylor, 1951, 1954.

15. *Rhadinella tolpanorum* (Holm & Cruz-Díaz, 1994). Herpetologica 50(1): 17–20, figs. 1–2. (*Rhadinaea tolpanorum*)

Type: Holotype, UNAH 2732, a 381 mm female (G. Dodge, T. Powell & P.A. Holm, 23 May 1991).

Type locality: "0.8 km N and 1.5 km E Cerro San Francisco in the Cordillera Nombre de Dios at 1900 m, Department of Atlántida, Honduras (15°27' N, 87°18' W)."

Distribution: Northwestern Honduras (Atlántida, N Yoro), 1500–1800 m.

Sources: G. Köhler & McCranie, 1999b, McCranie & Castaneda, 2004a and McCranie, 2011a.

RHADINOPHANES C.W. Myers & Campbell, 1981 (Dipsadidae)

Type species: *Rhadinophanes monticola* C.W. Myers & Campbell, 1981.

Distribution: Southwestern Mexico.

Sources: C.W. Myers & Campbell, 1981, Zaher et al., 2009 and Mulcahy et al., 2011.

1. *Rhadinophanes monticola* C.W. Myers & Campbell, 1981. Amer. Mus. Novit. (2708): 5–7, figs. 2, 5, 8a.

Type: Holotype, AMNH 116332, a 357 mm male (J.A. Campbell, 21 May 1974).

Type locality: "1 mile (1.6 km.) north of Puerto del Gallo, at an elevation of approximately 9000 feet (~2750 m.) on Cerro Teótepec, State of Guerrero, Mexico." Also following the above statement is "Puerto del Gallo, at nearly 2500 m elevation, is the site of an abandoned lumber camp on the southwestern slope of Cerro Teótepec, roughly 40 km. by air northwest of Atoyac and 70 km. by air north-northwest of Acapulco; 17°27'N, 100°09'W)."

Distribution: Southern Mexico (Sierra Madre del Sur of cen. Guerrero), 2600–2950 m. Known only from vicinity of type locality.

RHAGERHIS W.C.H. Peters, 1862a (Psammophiidae)

Synonyms: *Rhagerrhis* A.C.L.G. Günther, 1866 *(nomen emendation), Ragerrhis* – W.C.H. Peters, 1880b *(nomen incorrectum), Rhagechis* – Hoffmann, 1890 *(nomen incorrectum), Rhagerris* – Elter, 1981 1890 *(nomen incorrectum),* and *Scutophis* Brandstatter, 1995 (*nomen ineditum*)

Type species: *Coluber moilensis* A. Reuss, 1834.

Distribution: Middle East and N Africa.

R

Sources: Brandstatter, 1995, Vidal et al., 2008 and W. Bohme & Pury, 2011.

Remarks: Previously in the genus *Malpolon*.

1. *Rhagerhis moilensis* (A. Reuss, 1834). Mus. Senck. 1: 142–143, pl. 7, fig. 1a–b. (*Coluber moilensis*)

Synonyms: *Coelopeltis producta* Gervais, 1857, *Malpolon cordofanensis* F. Werner, 1919, ? *Rhamphiophis septentrionalis* Angel, 1923a, and *Malpolon monspessulanus saharatlanticus* Geniez, Cluchier & Haan, 2006.

Type: Holotype, SMF 20017 (formerly SMF-R III.R.1.a & SMF-B 9143c), a 930 mm female (E. Rüppell, 1826).

Type locality: "Arabien, Gegend von Moilah" [= vicinity of Al Muwaylah, Red Sea coast, Al Muqata'ah Ash Shamaliyah Prov., NW Saudi Arabia, 27°41'N, 35°27'E, elevation NSL].

Distribution: Northern Africa and SW Asia. Northern Mauritania (Adrar, Assaba, Dakhlet Nouadhibou, Hodh el Gharbi, Inchiri, Trarza, Zemmour), Western Sahara (Rio de Oro, Saguia El Hamra), S Morocco (Agadir, Ouarzazate, Safi, Tan Tan, Tata, Tiznit), Algeria (Biskra, El Bayadh, M'Sila, Tamanrasset), N Libya (Ajdabiya, Al Jufrah, Az Zawiyah, Banghazi, Surt, Tarabulus, Tripoli), S Tunisia (Ariana, Gabès, Gafsa, Jendouba, Kebili, Medenine, Nabeul, Sidi Bou Zid, Sousse, Tataouine, Tozeur), E Mali (Gao, Kayes, Ségou, Tombouctou), Niger (Agadez, Diffa, Maradi, Zinder), N and E Egypt (Alexandria, Beheira, El-Bahr El-Ahmar, Faiyum, Giza, Ismailia, Matrouh, North Sinai), N Sudan (El-Bahr El-Ahmar, Al Khartum, Ash Shamaliyah, Shamal Darfur), Eritrea (Northern Red Sea), Syria, SE Israel (E Southern), Jordan (Amman, Aqaba, Irbid, Karak, Maan, Mafraq, Tafilah, Zarqa), Saudia Arabia (Eastern, Jazan, Madinah, Makkah, Tabuk), Kuwait, United Arab Emirates (Abu Dhabi, Dubai, Abu Dhabi Is.), Oman (Al Batinah, Dhofar, Muscat, Ash Sharqiyah, Masirah Is.), Yemen (Abyan, Aden, Al Jawf, Hadhramaut, Shabwah), Iraq (Al Basrah, Baghdad, Wasit) and SW Iran (Hormozghan, Khuzestan), NSL–1885 m.

Sources: Anderson, 1898, Doumergue, 1901, Mayet, 1903, Flower, 1933, Angel & Lhote, 1938, Villiers, 1950a, 1975, Chpakowsky & Chnéour, 1954, Domergue, 1959b, Pasteur & Bons, 1960, Kramer & Schnurrenberger, 1963, Corkill & Cochrane, 1966, Mandaville, 1967, Papenfuss, 1969, Y. Werner, 1971, 1973, 1988, Gasperetti, 1988, Gruber, 1989, Gallagher, 1990, Latifi, 1991, Leviton et al., 1992, Schätti & Gasperetti, 1994, Bons & Geneiz, 1996, Brandstätter, 1996, Schleich et al., 1996, Bogaerts, 1998, Chippaux, 1999, 2006, Jongbloed, 2000, Bouskila & Amitai, 2001, Disi et al., 2001, Geniez et al., 2004, J.-F. Trape & Mané, 2006b, Egan, 2007, Largen & Spawls, 2010, Amr & Disi, 2011 and Bar & Haimovitch, 2011.

Remarks: Mertens (1967: 92) listed the type locality as Mohila, Arabia. Two specimens from S Ghana are problematic (Gallagher, 1988: 255).

RHAMNOPHIS A.C.L.G. Günther, 1862b (Colubridae)

Synonyms: *Crypsidomus* A.C.L.G. Günther, 1864c *(nomen substitutum), Chrysidomus* – Matschie, 1893a *(nomen incorrectum), Rhamphophis* – Palacky, 1898 *(nomen incorrectum), Rhamnaethiops* – F. Werner, 1923 *(lapsus calami), Rhamnnophis* – Loveridge, 1924 *(nomen incorrectum), Rhamophis* – Ditmars, 1933 *(nomen incorrectum), Rhamnopis* – Witte, 1941 *(nomen incorrectum),* and *Rhamnophi* – Stucki-Stirn, 1979 *(nomen incorrectum).*

Type species: *Rhamnophis aethiopissa* A.C.L.G. Günther, 1862b.

Distribution: West, cen. and E Africa.

Sources: Sternfeld, 1909a, Loveridge, 1944b, Monard, 1951, Laurent, 1956a, Witte, 1962, Thys van den Audenaerde, 1965, Knoepffler, 1966, Villiers, 1966, J.-F. Trape, 1981, 1985, J.-F. Trape & Roux-Estève, 1995, Broadley & Wallach, 2002, Chippaux, 2006, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

1. *Rhamnophis aethiopissa* A.C.L.G. Günther, 1862b. Ann. Mag. Nat. Hist. (3) 9(49): 129, pl. 10.

Synonyms: *Crypsidomus aethiops* Boettger, 1888e, *Thrasops splendens* Andersson, 1901, *Rhamnophis ituriensis* K.P. Schmidt, 1923, and *Rhamnophis aethiopissa elgonensis* Loveridge, 1929.

Type: Holotype, BMNH 1946.1.4.99, a 933 mm specimen.

Type locality: "West Africa."

Distribution: West, cen. and East Africa. Guinea (Macenta, Nzérékoré), Sierra Leone (Western), Liberia (Montserrado), S Ivory Coast (Abidjan, Lagunes, San Pédro), S Ghana (Accra, Eastern, Volta), S Togo (Centrale, Plateaux), S Nigeria (Akwa Ibom, Bayelsa, Lagos, Rivers), S Cameroon (Est, Centre, Littoral, Nord-Ouest, Sud, Sud-Ouest), Equatorial Guinea (Bioko Is.), Gabon (Moyen-Ogooué, Ngounié, Ogooué-Ivindo, Ogooué-Lolo, Ogooué-Maritime, Woleu-Ntem), S Congo (Brazzaville, Cuvette, Kouilou, Sangha), Central African Republic (Lobaye, Ombella-Mpoko, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), N Angola (Luanda, Lunda Norte), S Uganda (Central, Western), W Kenya (S Rift Valley, Western), cen. Rwanda, W Tanzania (Kigoma, Kagera) and NW Zambia (North-Western), NSL–2000 m.

Sources: Sternfeld, 1909b, K.P. Schmidt, 1923, Loveridge, 1929, Angel, 1933b, Laurent, 1960, Doucet, 1963, Villiers, 1963, Mertens, 1965c, Roux-Estève, 1965, Menzies, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, Hulselmans et al., 1970, Pitman, 1974, Spawls, 1978, Hughes, 1983, Joger, 1990, Spawls et al., 2002, Broadley et al., 2003, Chirio & Ineich, 2006 and Segniagbeto et al., 2011.

Remarks: Probably occurs in Benin *fide* Villiers (1951a: 27) but possibly occurs in Benin *fide* Hughes (2013: 152).

2. *Rhamnophis batesii* (Boulenger, 1908g). Ann. Mag. Nat. Hist. (8) 2(7): 93. (*Thrasops batesii*)

Types: Syntypes (3), BMNH 1946.1.4.63–65, an 1800 mm specimen and two juveniles (G.L. Bates, 1895–1908).
Type locality: "South Cameroon (Efulen and Akok, Kribi River district, and Ja River district)" [= Akok (2°47'N, 10°17'E, elevation 110 m), W Sud Prov., and Efoulan (2°39'N, 12°46'E, elevation 665 m), E Sud Prov., S Cameroon].
Distribution: Central Africa. Southern Cameroon (Est, Centre, Nord-Ouest, Sud, Sud-Ouest), SW Central African Republic (Lobaye), Gabon (Ogooué-Ivindo, Ogooué-Maritime), S Congo (Kouilou) and Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Nord-Kivu, Orientale), 20–1300 m.
Sources: K.P. Schmidt, 1923, Knoepffler, 1966, Stucki-Stirn, 1979 and D. Lawson, 1993.

RHAMPHIOPHIS W.C.H. Peters, 1854 (Psammophiidae)

Synonyms: *Ramphiophis* – J.T. Reinhardt, 1861c *(nomen incorrectum), Rhamphioppis* – Rochebrune, 1884 *(nomen incorrectum), Rhamphophis* – Palacky, 1898 *(nomen incorrectum), Rhamphiopholis* – M.A. Smith, 1930c *(nomen incorrectum), Rhampiophis* – Anthony, 1955 *(nomen incorrectum), Rhamphiopsis* – Thistleton, 1961 *(nomen incorrectum), Rhamphiophs* – Skinner, 1973 *(nomen incorrectum),* and *Raphiophis* – Stucki-Stirn, 1979 *(nomen incorrectum).*
Type species: *Rhamphiophis rostratus* W.C.H. Peters, 1854.
Distribution: Subsaharan Africa.
Fossil record: Pliocene of East Africa.
Sources: Loveridge, 1957a, Pitman, 1974, Chirio & Ineich, 1991, Gravlund, 2001, Vidal & Hedges, 2002, Kelly et al., 2008, 2009, Vidal et al., 2008 and Zaher et al., 2009.
Remarks: Kelly et al., 2008 transferred the species *acutus* to the genus *Psammophylax*.

R

1. *Rhamphiophis maradiensis* Chirio & Ineich, 1991. Bull. Mus. Natl. Hist. Nat. (4) 13A(1–2): 226–229, figs. 1b, d, 2b, d, pl. 1, fig. b.

Type: Holotype, MNHN 1989.2739, a 573 mm female (native, Oct. 1987).
Type locality: "environs de Gari'n Bakwai, 50 km au sud-ouest de Maradi, au Niger" [= vicinity of Gari'n Bakwai, 50 km SW Maradi (13°29'N, 7°06'E, elevation 360 m) near Nigerian border, S Maradi Dept., SW Niger].
Distribution: Southern Niger (SW Maradi), 390 m.
Source: Chippaux, 2006.

2. *Rhamphiophis oxyrhynchus* (J.T. Reinhardt, 1843). Kgl. Danske Vidensk. Selsk. Natur. Math. Afh. 10: 244–246, pl. 1, figs. 10–12. (*Psammophis oxyrhynchus*)

Synonym: *Rhamphiophis connali* H.W. Parker, 1929.
Type: Lectotype, ZMUC 63125, a 462 mm specimen (J.R. Chenon, 1826–1836), designated by F.W. Braestrup *in* Hughes & Barry (1969: 1021).
Type locality: "Guinea" [= coast of Ghana *fide* Hughes & Barry, 1969: 1021] via lectotype selection. Restricted to vicinity of Accra, Ghana *fide* J.B. Rasmussen & Hughes (1997: 14, 16).
Distribution: West Africa. Senegal (Dakar, Fatick, Kaolack, Kolda, Tambacounda, Thiès, Ziguinchor), Guinea, SW Mali (Kayes, Koulikoro, Mopti, Sikasso), Ivory Coast (Daloa), Burkina Faso (Centre, Centre-Est, Centre-Nord, Centre-Ouest, Est, Nord, Hauts-Bassins, Sud-Ouest, Volta-Noire), S Ghana (Accra, Volta), Togo (Kara, Maritime, Savanes), Benin (Alibori, Atakora, Atlantique, Collines, Zou), SW Niger (Dosso, Maradi, Niamey, Tahoua), N Nigeria (Gongola, Kano), N Cameroon (Adamaoua, Extreme-Nord, Nord), S Chad (Kanem, Moyen-Chari) and Central African Republic (Bamingui-Bangoran, Ouham, Ouham-Pende), NSL–1700 m.
Sources: Sternfeld, 1909b, 1910d, Doucet, 1963, Leston & Hughes, 1968, Hughes & Barry, 1969, J Hulselmans & Verheyen, 1970, Hulselmans et al., 1970, 1971, Roman, 1980, Hughes, 1983, 2013, Chirio & Ineich, 1991, Largen & Rasmussen, 1993, J.B. Rasmussen & Hughes, 1997, Spawls et al., 2002, Chippaux, 2006, Chirio & Ineich, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, Ullenburch et al., 2010 and Segniagbeto et al., 2011.
Remarks: Possibly occurs in Sudan *fide* Hughes (1983: 353).

3. *Rhamphiophis rostratus* W.C.H. Peters, 1854. Mber. Königl. Akad. Wiss. Berlin 1854(11): 624.

Synonyms: *Rhagerrhis unguiculata* A.C.L.G. Günther, 1868, and *Coelopeltis porrectus* Jan, 1870 *in* Jan & Sordelli, 1866–1870.
Types: Syntypes (4), ZMB 2484 and ZMB 9994, a 1210 mm, 1210 mm, 430 mm and 380 mm specimen (W.C.H. Peters, June 1843–Aug. 1847).
Type locality: "Tette" [= Tete, Tete Prov., W Mozambique, 16°10'S, 33°36'E, elevation 125 m]. Emended to Mesuril, Quitangonha und bei Tette *fide* W.C.H. Peters (1882d: 124) [= Mossuril District, Quitangonha Is., Nampula Prov., and Tete, Tete Prov., Moazmbique].
Distribution: Eastern Africa. Southern Sudan (Janub Kurdufan), SE South Sudan (Eastern Equatoria), Ethiopia (Awdal, Bale, Gemu Gofa, Hararge, Shoa,

Sidamo), Somalia (Bakool, Bari, Bay, Gedo, Jubbada Dhexe, Jubbada Hoose, Nugaal, Mogadishu, Mudug, Shabeellaha Hoose, Togdheer, Woqooyi Galbreed), Kenya (Central, Coast, Eastern, North-Eastern, Rift Valley, Lamu Is.), Uganda (N Eastern, N Western), E Tanzania (Arusha, Dar es Salaam, Dodoma, Kilimanjaro, Lindi, Morogoro, Mtwara, Mwanza, Piwani, Rukwa, Shinyanga, Tabora, Tanga, Kagera, Zanzibar Is.), SE Democratic Republic of the Congo (Katanga, Orientale, Sud-Kivu), SE Zambia (S Eastern, SE Southern), Malawi (Central, Northern, Southern), Mozambique (Gaza, Inhambane, Sofala, Tete, Quitangonha Is.), Zimbabwe (Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matebeleland North, Matebeleland South), ext. NE Namibia (Caprivi), N Botswana (E Central, North West) and NE South Africa (Limpopo, Mpumalanga), NSL–2135 m.

Sources: W.C.H. Peters, 1882a, Witte, 1933a, 1962, Corkill, 1935, Loveridge, 1936b, 1953, 1955b, Laurent, 1956a, Sweeney, 1961, Broadley, 1971a, Broadley & Cock, 1975, Spawls, 1978, Lanza, 1983a, Hughes, 1983, Pienaar et al., 1983, Auerbach, 1987, Largen & Rasmussen, 1993, Spawls et al., 2002, Broadley et al., 2003, Marais, 2004, Largen & Spawls, 2010 and Broadley & Blaylock, 2013.

Remarks: Original description reprinted in W.C.H. Peters (1855: 53). A subspecies of *R. oxyrhynchus fide* M Griffin (2003: 104). Possibily occurs in Ankole, Uganda *fide* Pitman (1974: 151).

4. *Rhamphiophis rubropunctatus* (J.G. Fischer, 1884a). Jahrb. Hamburg. Wiss. Anst. 1: 7–8, pl. 1, figs. 3a–c. (*Dipsina rubropunctata*)

Type: Holotype, ZMH 4179 (formerly ZMH 1192), a 485 mm specimen (G.A. Fischer [Hamburg Geog. Soc. Exped.], 1884).

Type locality: "bei Aruscha am Fuss des Kilima-Ndjaro, Massai-Gebiete (Ost-Afrika)" [= vicinity of Arusha, base of Mt. Kilimaddjaro, E Arusha Region, NE Tanzania, 3°22'S, 36°40'E, elevation 1400 m].

Distribution: Northeastern Africa. Southeastern South Sudan (Eastern Equatoria), S Ethiopia (Gemu Gofa, Hararge, Illubabor, Kefa, Shoa, Sidamo), W Somalia (Bay, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Shabeellaha Dhexe, Togdheer), E Kenya (Coast, Eastern, North-Eastern, Rift Valley) and NE Tanzania (Arusha, Kilimanjaro, Tanga, Zanzibar Is.), NSL–1455 m.

Sources: Sternfeld, 1908d, Scortecci, 1929, 1939, 1943, H.W. Parker, 1949, Loveridge, 1955, Spawls, 1978, Lanza, 1983a, 1990b, Largen & Rasmussen, 1993, Spawls et al., 2002 and Largen & Spawls, 2010.

Remarks: Figure number in original description misprinted as Fig. 2.

RHINOBOTHRYUM Wagler, 1830 (Colubridae)

Synonyms: *Rhinobothrium* Fitzinger, 1843 *(nomen emendatum), Rhinobotryum* Agassiz, 1844 *(nomen emendatum), Rhinobotrion* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum), Rhinobotryum* – Palacky, 1898 *(nomen incorrectum),* and *Rhinobotrium* – Maass-Berlin, 1933 *(nomen incorrectum).*

Type species: *Coluber lentiginosus* Scopoli, 1788.

Distribution: Lower Central America and N South America.

Sources: J.A. Peters & Orejas-Miranda, 1970, Kornacker, 1999 and Navarrete et al., 2009.

1. *Rhinobothryum bovallii* Andersson, 1916. Medd. Göteborgs Mus. Zool. (9) 17(5): 32–33, fig. 4. (*Rhinobothrium bovallii*)

Type: Holotype, GNM 1221, an 1190 mm specimen (C. Bovallius, 25 Sept. 1882).

Type locality: "Costa Rica, Siquirres" [= Siquirres, cen. Limón Prov., E Costa Rica, 10°06'N, 83°31'W, elevation 100 m].

Distribution: Lower Central America and NW South America. Southern Honduras (El Paraíso), E Costa Rica (NE Alajuela, Cartago, Heredia, Limón), Panama (Colón, Darién, Los Santos, Panamá), Colombia (Antioquia, Boyacá, Caldas, Cesar, Chocó, Córdoba, Risaralda, Santander, Valle del Cauca), NW Venezuela (Zulia) and NW Ecuador (Carchi, Esmeraldas, Imbabura), 70–900 (2250) m.

Remarks: Date of Scopoli universally listed incorrectly as 1785.

RHINOCEROPHIS S.W. Garman, 1881 (Viperidae)

Type species: *Bothrops ammodytoides* Leybold, 1873.

Distribution: Southern South America.

Fossil records: Upper Pleistocene of Argentina.

Sources: J.A. Campbell & Lamar, 2004, Fenwick et al., 2009, Carrasco et al., 2010 and Hoser, 2012d.

Remarks: Taxonomic status questionable *fide* Carrasco et al., 2010. A valid genus *fide* Fenwick et al., 2009.

1. *Rhinocerophis alternatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1512, pl. 82bis, fig. 1–1a. (*Bothrops alternatus*) (*nomen protectum*)

Synonyms: *Craspedocephalus brasiliensis* Gray, 1849a (*nomen oblitum*), *Lachesis alternata* – Boettger, 1898, and *Lachesis inaequalis* Magalhães, 1925.

Types: Syntypes (2), MNHN 7744 (F.L.N.C.L. de Castelnau & E. Deville, June 1843–Aug. 1847), and MNHN 7765 (A.C.V.M.D. d'Orbigny, 27 Dec. 1827–4 Feb. 1828), longest syntype 1150 mm, lost *fide* McDiarmid et al. (1999: 253).

Type locality: "Amérique méridionale" and "Paraguay" [= South America and Paraguay].

Distribution: Southern South America. Southern Brazil (Goiás, S Mato Grosso, Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo), Uruguay (Artigas, Canelones, Cerro Largo, Durazno, Flores, Floridae, Maldonado, Montevideo, Paysandú, Rio Negro, Rivera, Rocha, Salto, San José, Soriano, Tacuarembó, Trienta y Tres), Paraguay (Alto Paraguay, Alto Paraná, Amambay, Asunción, Boquerón, Caaguazú, Caazapá, Canindeyú, Central, Concepción, Cordillera, Guairá, Itapúa, Misiones, Neembucú, Paraguarí, Presidente Hayes, San Pedro) and N Argentina (Buenos Aires, Catamarca. Chaco, Córdoba, Corrientes, Entre Ríos, Formosa, La Pampa, Misiones, Rio Negro, San Luis, Santa Fe, Santiago del Estero, Treinta y Tres, Tucumán), NSL–700 m.

Sources: Hoge & Belluomini, 1964, Hoge, 1966a, Cei, 1994, D.R. Norman, 1994, Moro, 1996, Leynaud & Bucher, 1999, Nogueira & Valdujo, 2001, Scanferla & Nenda, 2005 Carr et al., 2007, Cacciali, 2008, Carrasco et al., 2009 and Prigioni et al., 2011.

Remarks: *Craspedocephalus brasiliensis* Gray, 1849a would be preoccupied by *Craspedocephalus brasiliensis* Lacépède, 1789 but the latter work is invalid *fide* Opinion 1463 (ICZN, 1987). Therefore, in accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Bothrops alternatus* A.-M.-C. Duméril, Bibron & Duméril is designated a *nomen protectum* and *Craspedocephalus brasiliensis* Gray a *nomen oblitum*.

2. *Rhinocerophis ammodytoides* (Leybold, 1873). Pampas Arjent.: 80–81. (*Bothrops ammodytoides*)

Synonyms: *Rhinocerophis nasus* S.W. Garman, 1881, *Bothrops patagonicus* F. Müller, 1885, and *Bothrops burmeisteri* Koslowsky, 1895b.

Type: Holotype, ? MNHNC, a 750 mm specimen (F. Leybold, 18 Feb. 1871).

Type locality: "estancia de Lo-Aguirre, Pampas Arjentinas, Provincia Mendoza, Sud-América" [= Los Aguirre ranch, bet. San Carlos (33°46'S, 69°03W, elevation 960 m) and Tierra Blanca (ca. 34°02'S, 69°05'W, elervation 1300 m) *fide* Leybold map of expedition], San Carlos Dept., W Mendoza Prov., cen. Argentina].

Distribution: Southern Argentina (S Buenos Aires, Catamarca, Chubut, Córdoba, Jujuy, La Pampa, La Rioja, Mendoza, Neugén, Rio Negro, Salta, San Juan, San Luis, Santa Cruz, Tucumán), NSL–2000 [3700] m.

Sources: Cei, 1994, Moro, 1996, J.C. Murphy & Schlager, 2003, Scolaro, 2005, 2006 and Carrasco et al., 2009, 2010.

3. *Rhinocerophis cotiara* (J. Gomés, 1913). Ann. Paul. Med. Cirurg. 1(3): 65–67, pl. 8, figs. 1–6. (*Lachesis cotiara*)

Type: Lectotype, IB 452, an 850–852 mm male (R. da Cunhae-Silva, March 1913), designated by Franco et al. (2005: 76), destroyed by fire 15 May 2010.

Type locality: "Nucleo Colonial Cruz Machado" [= Cruz Machado, S Paraná State, S Brasil, 26°01'S, 51°21'W, elevation 890 m] via lectotype selection

Distribution: Southeastern South America. Southeastern Brazil (Paraná, N Rio Grande do Sul, Santa Catarina, SE São Paulo) and NE Argentina (Misiones), NSL–1800 m.

Sources: Bousek, 1928, Lema, 1960a–b, Hoge & Belluomini, 1964, J.D. Williams & Francini, 1991, Cei, 1994 and Franco et al., 2005.

R

4. *Rhinocerophis fonsecai* (Hoge & Belluomini, 1959). Mem. Inst. Butantan (1957–1958) 28: 195–197, figs. 1–2, 3b, 4b, 5a, 9. (*Bothrops fonsecai*)

Type: Holotype, IB 7896, an 872 mm male (J. Sterce, 2 April 1933), destroyed by fire 15 May 2010.
Type locality: "Santo Antonio do Capivary, Estado do Rio de Janeiro, Brasil."
Distribution: Southeastern Brazil (ext. S Minas Gerais, S Rio de Janeiro, NE São Paulo), 1000–1600 m.
Sources: Hoge & Belluomini, 1964 and Manzani et al., 1997.

5. *Rhinocerophis itapetiningae* (Boulenger, 1907b). Ann. Mag. Nat. Hist. (7) 20(118): 338. (*Lachesis itapetiningae*)

Types: Syntypes (2), BMNH 1946.1.19.49–50 (formerly BMNH 1907.9.12.12–13), two females, longest syntype 400 mm (V. Brasil, 1897–1907).
Type locality: "Itapetininga, a city in the State of São Paulo, Brazil" [= Itapetininga, S São Paulo State, SE Brazil, 23°36'S, 48°03'W, elevation 685 m].
Distribution: South-central Brazil (S Goias, SE Mato Grosso, Mato Grosso do Sul, W Minas Gerais, NE Paraná, São Paulo), 685–1500 m.
Source: Lema, 1962a.
Remarks: Rio Grande do Sul records need verification *fide* J.A. Campbell & Lamar (2004: 389).

6. *Rhinocerophis jonathani* (Harvey, 1994). Proc. Biol. Soc. Washington 107(1): 61–64. (*Bothrops jonathani*)

Type: Holotype, MNK R1000, a 620 mm male (M.B. Harvey, 17 Jan. 1992).
Type locality: "Highway 4, approximately 35 km N (by road) of El Empalme, Provincia Carrasco, Departamento de Cochabamba, Bolivia, approximately 2800 m (17°45'S, 65°00 'W)."
Distribution: Central Bolivia (? Chuquisaca, Cochabamba, Mendez, Santa Cruz, Tarija) and Argentina (Jujuy, Salto), 1960–3220 m.
Sources: Dirksen et al., 1995, Harvey et al., 2003, 2005 and Carrasco et al., 2009.

RHINOCHEILUS Baird & Girard, 1853 (Colubridae)

Synonyms: *Rhinochilus* Yarrow, 1883 *(nomen emendatum), Rhinochilus* – Troschel, 1877 *(nomen incorrectum), Rinochilus* – Amaral, 1930f *(nomen incorrectum), Rhnocheilus* – Briceño-Rossi, 1934 *(nomen incorrectum), Rhnochelus* – Briceño-Rossi, 1934 *(nomen incorrectum), Thnocheilus* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Rhinoceilus* – Meylan, 1982 *(nomen incorrectum).*
Type species: *Rhinocheilus lecontei* Baird & Girard, 1853.
Distribution: Southwestern USA and NW Mexico.
Fossil records: Upper Miocene to upper Pleistocene of SW USA.
Sources: Bocourt, 1887, Klauber, 1941a, Medica, 1975, Stebbins, 1985, Lucas et al., 1995, Degenhardt et al., 1996, Keogh, 1996, P.R. Brown, 1997, Rodríguez-Robles & Greene, 1999, Rodríguez-Robles & Jesús-Escobar, 1999, Bartlett & Tennant, 2000, Holman, 2000a, Werler & Dixon, 2000, Grismer, 2002, Parmley, 2002, Manier, 2004, J.-F. Trape & Mané, 2006b and Cabajal-Márquez et al., 2011b.

1. *Rhinocheilus lecontei* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 120.

Synonyms: *Rhinocheilus lecontei tessellatus* S.W. Garman, 1884, *Rhinocheilus antonii* Dugès, 1886, *Rhnocheilus thenminotii* – Briceño-Rossi, 1934 *(nomen incorrectum), Rhnochelus thominotii* – Briceño-Rossi, 1934 *(nomen incorrectum), Rhinocheilus lecontei clarus* Klauber, 1941a and *Rhinocheilus lecontei etheridgei* Grismer, 1990c.
Type: Holotype, MCZ 137, a 533 mm male (J.L. Le Conte, 1849–1852).
Type locality: "San Diego, Cal." [= San Diego, San Diego Co., S California, USA].
Distribution: Southwestern USA (Arizona, California, SE Colorado, SW Idaho, SW Kansas, Nevada, New Mexico, W Oklahoma, Texas, Utah) and N Mexico (Aguascalientes, Baja California Norte, Baja California Sur, Chihuahua, Coahuila, NE Durango, Jalisco, Nayarit, Nuevo Leon, San Luis Potosí, Sinaloa, Sonora, Tamaulipas, Zacatecas, Cerralvo Is.), NSL–1645 m.
Fossil records: Upper Miocene (Hemingfordian) of USA (Texas), middle Pliocene (Blancan III) of USA (Texas), upper Pliocene (Blancan V) of USA (Kansas, Nebraska), lower/middle Pleistocene (Irvingtonian I) of USA (Texas), and upper Pleistocene (Rancholabrean I, II) of USA (Arizona, California, Nevada, New Mexico, Texas).
Remarks: *Rhinocheilus etheridgei* a valid species *fide* Grismer (1999: 460) and *R. antonii* valid *fide* Lemos-Espinal et al. (2004d: 210).

RHINOLEPTUS Orejas-Miranda, Roux-Estève & Guibé, 1970 (Leptotyphlopidae)

Type species: *Typhlops koniagui* Villiers, 1956b.
Distribution: West Africa.
Sources: Guibé et al., 1967, Orejas-Miranda et al., 1970, Villiers, 1975, Hahn, 1980a, Wallach & Ineich, 1996, Wallach, 1998b, Broadley, 1999, McDiarmid et al., 1999, J.-F. Trape & Mané, 2004, 2006 and Chirio, 2013.

1. *Rhinoleptus koniagui* (Villiers, 1956b). Mém. Inst. Franç. Afr. Noire (48): 151–152, figs. 1–3. (*Typhlops koniagui*)

Type: Holotype, MNHN 8730 (formerly IFAN 1955.9.58), a 460 mm specimen (Denis, Dec. 1955).

Type locality: "Guinée française: Youkounkoun" [= Youkounkoun, Koundara Prefect., N Boké Region, ext. NW Guinea, 12°32'N, 13°07'W, elevation 75 m].

Distribution: West Africa. Southern Senegal (Kédougou, Kolda, Tambacounda, Ziguinchor), N Guinea (Koundara, Kouroussa, Télimélé) and SW Mali (Kayes, Sikasso), 25–380 m.

RHINOPHIS Hemprich, 1820 (Uropeltidae)

Synonyms: *Dapatnaya* Kelaart, 1853, *Morina* Gray, 1858c, *Mitylia* Gray, 1858a, *Mytilia* Gray, 1858c *(nomen emendatum), Dapatnya* Marschall, 1873 *(nomen emendatum), Rhinopsis* – F. Müller, 1878b *(nomen incorrectum), Rinophis* – Bedriaga, 1884 *(nomen incorrectum), Rhinophus* – Wall, 1921g *(nomen incorrectum), Rhiriophis* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Rinophis* – Donoso-Barros, 1965 *(nomen incorrectum).*

Type species: *Anguis oxyrynchus* J.G. Schneider, 1801.

Distribution: Southern India and Sri Lanka.

Sources: W.C.H. Peters, 1861e, A.C.L.G. Günther, 1864a, Beddome, 1886, Wall, 1921g, 1923c, M.A. Smith, 1943, E.H. Taylor, 1950b, Deraniyagala, 1955, Gans, 1966, Murthy, 1973, 1981c, 1982b, 1985, 1986, P. Silva, 1980, Cadle et al., 1990, A. Silva, 1990, McDiarmid et al., 1999, Gower et al., 2005, Somaweera, 2006 and Gower & Maduwage, 2011.

Remarks: Original description of *Mitylia* reprinted in Gray (1858c–d and 1858f).

R

1. *Rhinophis blythii* Kelaart, 1853. J. Ceylon Br. Roy. Asiat. Soc. 22(6): 106–107.

Synonym: *Mytilia templetonii* Gray, 1858c.

Types: Syntypes (3), not designated, longest syntype 406 mm, lost *fide* Gans (1966a: 13).

Type locality: "Mountains of Ceylon...3 or 4 feet below the surface soil of Coffee plantations" [= Sri Lanka mountains].

Distribution: Southern Sri Lanka (Central, Sabaragamuwa, Southern, Uva), 300–1360 m.

Sources: Willey, 1905, Wickramasinghe et al., 2009 and Olori & bell, 2012.

Remarks: Original description reprinted in Kelaart (1854a: 14 and 1854b: 26–27). E.H. Taylor (1947a: 26) discussed dates of Kelaart's "Prodromus."

2. *Rhinophis dorsimaculatus* Deraniyagala, 1941. J. Bombay Nat. Hist. Soc. (1941–1942) 42(4): 800–801, figs. 1a–c, pl. 1, figs. a–c.

Type: Holotype, CMS 86, a 350 mm specimen (Feb. 1938 or March 1941), lost *fide* Gans (1966: 14).

Type locality: "coastal village of Marichchukate, North Western Province, Ceylon" [= Marichchukkaddi, ext. N North-Western Prov., W Sri Lanka, ca. 8°35'N, 79°56'E, elevation NSL].

Distribution: Sri Lanka (North-Western), NSL. Known only from type locality.

3. *Rhinophis drummondhayi* Wall, 1921g. Ophidia Taprobanica: 43–44

Synonym: *Rhinophis drummond-hayi* T. Barbour & Loveridge, 1929a *(nomen illegitimum).*

Types: Syntypes (13), BMNH 1946.1.16.79–81 (formerly BMNH 1920.5.5.1–4) (H.M. Drummond-Hay & Ormiston), and MCZ 14348–49 (formerly BMNH), a 275 mm and 263 mm specimen (H.M. Drummond-Hay, 1896–1921), BNMM and CMS, longest syntype 330 mm female.

Type locality: "Lennock estate in the centre of the Uva Patnas at about 4,000 to 4,200 feet" and "Kalupahani estate, Haldummulle District, about 3,000 feet, Ceylon" [= Lennock Estate (ca. 7°N, 81°E, elevation 1220–1280 m) and Kalupahana Estate (6°46'N, 80°54'E, elevation 915 m), W Uva Prov., SE Sri Lanka].

Distribution: Southern Sri Lanka (Central, Uva), 915–1525 m.

Sources: McDiarmid et al., 1999 and Wickramasinghe et al., 2009.

Remarks: Data tag for MCZ 14348 reads Ceylon, Uva Patnas, 5000'. Gans (1966a: 14) erroneously cited original description as 1921 J. Bombay Nat. Hist. Soc. 28: 43.

4. *Rhinophis erangaviraji* Wickramasinghe, Vidanapathirana, Wickramasinghe & Ranwella, 2009. Zootaxa (2044): 6–17, figs. 3, 4a–12a.

Type: Holotype, NMSL 20080601, a 214 mm (svl) male (D. Vidanapathirana, N. Ranwella & L.J.M. Wickramasinghe, 5 Dec. 2007).

Type locality: "Enselwatte Estate, Sinharaja Division (Army Camp Forest), Rakwana hills, Matara District, Southern Province (N 06º 23', E 080º 36'), 1042 m."

Distribution: Southern Sri Lanka (Southern), 1040 m.

5. *Rhinophis fergusonianus* Boulenger, 1896i. J. Bombay Nat. Hist. Soc. (1895–1897) 10(2): 236, pl.

Type: Holotype, BMNH 1946.1.16.77 (formerly BMNH 1895.7.29.1), a 320 mm specimen (J.S. Sealy).

Type locality: "Cardamon hills, Travancore, Southern India" [= Cardamon Hills, S Western Ghats, SE Kerala Prov., S India]. Emended to the High Distribution [=

High Distribution, Cardamon Hills, South Sahyadri (Western Ghats), S Kerala, ext. SW India, 9°45'N, 77°10'E] *fide* Ferguson (1895: 70).

Distribution: Southwestern India (Western Ghats of SE Kerala). Known only from holotype.

Sources: Ferguson, 1895, Murthy, 1981c, 1982b, 1990d, I. Das, 1996, Aengals, 2009 and Wickramasinghe et al., 2009.

Remarks: A synonym of *R. sanguineus fide* Mahendra (1984: 64).

6. *Rhinophis homolepis* (Hemprich, 1820). Grundr. Naturgesch.: 119. (*Anguis homolepis*)

Synonyms: *Dapatnaya trevelyanii* Kelaart, 1853, *Mitylia gerrardi* Gray, 1858a, *Mytilia gerrardi* Gray, 1858c *(nomen emendatum), Dapatnaya trevalyana* A.C.L.G. Günther, 1864a *(nomen emendatum), Rhinophis trevelyanus* A.C.L.G. Günther, 1864a *(nomen emendatum),* and *Rhinophis trevelyana* I. Das, 1996 *(nomen emendatum).*

Type: Holotype, ZMB 3827.

Type locality: Unknown. Designated as "Zeylania" [= Sri Lanka] *fide* W.C.H. Peters (1861: 14).

Distribution: Southern Sri Lanka (Central, Sabaragamuwa, Uva), 750–950 m.

Sources: Willey, 1905 and Olori & Bell, 2012.

Remarks: A valid species *fide* McDiarmid et al. (1999: 137).

7. *Rhinophis lineatus* Gower & Maduwage, 2011. Zootaxa (2881): 53–56, figs. 2–4.

Type: Holotype CAS 226024, a 286 mm female (L. Jayawickrama, 30 Oct. 1976).

Type locality: "Harasbedda (07º03'N, 80º52'E, alt. 1,460 m), near Ragala, Central Province."

Distribution: Central Sri Lanka (Central), 1460 m. Known only from vicinity of type locality.

8. *Rhinophis oxyrhynchus* (J.G. Schneider, 1801). Hist. Amph. 2: 341–342. (*Anguis oxyrhynchus*) (*nomen corrigendum*)

Synonyms: *Anguis oxyrynchus* J.G. Schneider, 1801 *(nomen incorrigendum), Anguis oxyrrhynchus* Hemprich, 1820 *(nomen emendatum), Rhinophis oxyrhynchos* Wagler, 1830 *(nomen emendatum), Pseudotyphlops oxirhynchus* Schlegel, 1839 in 1837–1844 *(nomen illegitimum), Dapatnaya lankadivana* Kelaart, 1853, *Rhinophis oxyrhincus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen emendatum), Rhinophis oxyrhinchus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen emendatum), Mytilia unimaculata* Gray, 1858c, and *Rhinophis oxyrhynchus* – A.C.L.G. Günther, 1864a *(nomen corrigendum).*

Types: Syntypes (2), ZMB 3825–26, a 455 mm female and 175 mm male (C.R. John via M.E. Bloch).

Type locality: "India orientali" [= E India]. Emended to Sri Lanka *fide* M.A. Smith (1943: 92).

Distribution: Northeastern Sri Lanka (Central, Eastern, Northern, North-Central), NSL–270 m.

Sources: E.H. Taylor, 1950b and Bauer, 1998.

Remarks: This epithet is derived from two Greek terms, *oxys* (sharp) + *rhynchos* (snout), and the original orthography was incorrect.

9. *Rhinophis philippinus* (Cuvier, 1829). Règne Anim., ed. 2, 2: 74. (*Typhlops philippinus*)

Synonym: *Rhinophis planiceps* W.C.H. Peters, 1861h.

Type: Holotype, MNHN 1864.94, a 217–264 mm female.

Type locality: "Philippines" (in error *fide* A.C.L.G. Günther, 1864a: 185). Corrected to Zeylania [= Sri Lanka] *fide* W.C.H. Peters (1861h: 15).

Distribution: Southern Sri Lanka (Central, Sabaragamuwa), 300–900 m.

Sources: J.P. Müller, 1832, Boulenger, 1890a and A. Silva et al., 2005.

Remarks: Holotype possibly illustrated by Jan & Sordelli (1865 *in* 1860–1866) *fide* McDiarmid et al. (1999: 139).

10. *Rhinophis porrectus* Wall, 1921g. Ophidia Taprobanica: 35.

Type: Holotype, BMNH 1946.1.16.70 (formerly BMNH 1920.8.25.1), a 355 mm specimen (A. Willey, Oct. 1903).

Type locality: "on the road between Puttalam and Chilaw, Ceylon" [= between Puttalam (8°02'N, 79°49'E) and Chilaw (7°34'N, 79°47'E), W North-Western Prov., W Sri Lanka, NSL]. Emended to Madurankuli, [7°54'N, 79°49'E] *fide* Willey (1903: 88).

Distribution: Western Sri Lanka (W North-Western), NSL. Known only from holotype.

Sources: Willey, 1903 and A. Silva, 1982.

Remarks: A valid species *fide* E.H. Taylor (1950b: 530), A. Silva (1990: 70) and McDiarmid et al. (1999: 140). A synonym of *R. punctatus* Müller *fide* M.A. Smith (1943: 92), and Gans (1966a: 15).

11. *Rhinophis punctatus* J.P. Müller, 1832. Zeits. Physiol. 4(2): 248–252, pl. 21, figs. 1–3, pl. 22, figs. 1a–f. (*Rhinophis punctata*)

Synonym: *Pseudotyphlops oxyrhynchus* Schlegel, 1837.

Type: Holotype, a 265 mm male, lost *fide* W.C.H. Peters (1861h: 13) and Gans (1966a: 15).

Type locality: "Guiana" [South America, or ? Guinea, W Africa *fide* W.C.H. Peters, 1861h: 13] (in error). Corrected to Zeylania` [= Sri Lanka] by Schlegel *in* W.C.H. Peters (1861h: 13).

Distribution: Central Sri Lanka (Central, North-Western), 300–900 m.

Source: Willey, 1903b.

12. *Rhinophis sanguineus* Beddome, 1863a. Madras Quart. J. Med. Sci. 6: 47, pl. 1, figs. 6–6a.

Synonym: *Rhinophis microlepis* Beddome, 1863a.
Types: Syntypes (2+), BMNH 1946.1.16.54 (formerly BMNH 1864.3.9.2) and BMNH 1946.1.16.76, longest syntype a 457 mm male, location of other syntypes unknown.
Type locality: "Cherambady in the Wynaud, on the Western slopes of the Neilgherries, Madras Presidency" [= Cherambadi, N Kerala State, SW India, 11°32'N, 76°17'E, elevation 1065 m]. Emended to Cherambòdy in the Wynaud (Malabar), elevation 3500 feet *fide* Beddome (1863b: 227).
Distribution: Southwestern India (Western Ghats of W Karnataka, E Kerala, SW Tamil Nadu), 750–1065 m.
Sources: Murthy, 1981c, 1982b, R. Sharma, 2003, 2007 and Aengals, 2009.
Remarks: Original description reprinted in Beddome (1863b: 227). Beddome reported several syntypes but only one was catalogued by the BMNH *fide* Gans (1966a: 15) and M. Lang (*in litt.*).

13. *Rhinophis travancoricus* Boulenger, 1893b. J. Bombay Nat. Hist. Soc. (1892–1893) 7(3): 318, pl.

Type: Holotype, BMNH 1892.10.5.2, a 170 mm specimen (H.S. Ferguson, June 1892).
Type locality: "near Trevandrum, at the 6th mile-stone towards Vambayam, Travancore, S. India" [= vicinity of Thiruvanthapuram (8°29'N, 76°57'E, elevation 20 m), ext. S Kerala, SW India].
Distribution: Southwestern India (Western Ghats of SE Kerala), NSL–1335 m.
Sources: Mahendra, 1938a, Murthy, 1981c, 1982b, Rajendran, 1985 and Aengals, 2009.
Remarks: Supplemental original description in Boulenger (1893a: 143, pl. 9, figs. 3, 3a–3b) [Boulenger 1893b published before 1893a].

R

14. *Rhinophis tricoloratus* Deraniyagala, 1975. Spolia Zeylan. 33(1–2): 535–536, figs. 1a–e. (*Rhinophis tricolorata*)

Type: Holotype, CMS 1978.5.1 (formerly PEPD), a 258 mm specimen.
Type locality: "vicinity of the rain forest of Sinha Raja to the south west of Ratnapura at an elevation of 1,500 feet" [= Sinharaja Forest, S Sabaragamuwa Prov., SW Sri Lanka, 6°23'N, 80°25'E, elevation 455 m].
Distribution: Southern Sri Lanka (Sabaragamuwa), 455 m. Known only from type locality.
Sources: Karunaratne et al., 1981 and A. Silva, 1982.

15. *Rhinophis zigzag* Gower & Maduwage, 2011. Zootaxa (2881): 59–63, figs. 6–8.

Type: Holotype, CAS 226306, a 338 mm male (C. Gans, May 1974).
Type locality: "'Biblegemma Rd.' (ca. 06°54'N, 81°08'E and approximately 1,000 in altitude), near Passara, Province of Uva, Sri Lanka."
Distribution: Central Sri Lanka (Uva), 1000 m. Known only from vicinity of type locality.

RHINOPLOCEPHALUS F. Müller, 1885 (Elapidae)

Synonyms: *Rhinhoplocephalus* Boulenger, 1896a *(nomen emendatum), Riinhoplocephalus* – Briceño-Rossi, 1934 *(nomen incorrectum), Cryptophis* Worrell, 1961c, *Unechis* Worrell, 1961c, *Rhioplocephalus* – Kramer, 1978 *(nomen incorrectum),* and *Rhinocephalus* – Obst, Richter & Jacob, 1984 *(nomen incorrectum).*
Type species: *Rhinoplocephalus bicolor* F. Müller, 1885.
Distribution: New Guinea and Australia.
Sources: Kinghorn, 1929, 1964, Cogger et al., 1983a, Shine, 1985a, Storr, 1985, Longmore, 1986, S.K. Wilson & Knowles, 1988, Gow, 1989, Hoser, 1989, 2012e, Hutchinson, 1990, Cogger, 1992, Keogh et al., 1998, Sanders et al., 2008 and Zaher et al., 2009.

1. *Rhinoplocephalus bicolor* F. Müller, 1885. Verh. Naturf. Ges. Basel (1882–1885) 7(3): 690–692, pl. 9, figs. f–i.

Type: Holotype, NMBA 2190, a 395 mm male.
Type locality: "Australia." Emended to S Australia *fide* Cogger et al. (1983a: 234).
Distribution: Southwestern Australia (SW Western Australia), NSL–320 m.
Sources: Glauert, 1960, Christensen, 1972, Shine, 1986b and Storr et al., 1986.

2. *Rhinoplocephalus boschmai* (Brongersma & Knaap-van Meeuwen, 1964). Zool. Meded. 39: 553–554, figs. a–c. (*Denisonia boschmai*)

Synonym: *Unechis boschmai crutchfieldi* Hoser, 2012ac *(nomen illegitimum).*
Type: Holotype, RMNH 10874, a 439 mm male (A.J.M. Monsanto, 10 April 1959).
Type locality: "Merauke in southern West New Guinea" [= Merauke, ext. SE Papua Prov., ext. E Indonesia, 8°30'S, 140°24'E, elevation NSL].
Distribution: Extreme E Indonesia (E Papua) and NE Australia (ext. NE New South Wales, ext. N Northern Territory, E Queensland), 30–615 m.
Source: O'Shea, 1996.
Remarks: Possibly occurs in SW Papua New Guinea *fide* F. Parker (1972: 14) and Whitaker et al. (1982: 52).

3. *Rhinoplocephalus incredibilis* (Wells & Wellington, 1985). Aust. J. Herp. (Suppl. 1): 49. (*Unechis incredibilis*)

Type: Holotype, AMS, an adult (H.G. Cogger et al.).
Type locality: "Prince of Wales Island, Torres Strait, Queensland," Australia.
Distribution: Australia (Queensland, Prince of Wales Is.), NSL.
Sources: Cameron et al., 1978, Cogger, 1996, 2000 and Shea & Sadlier, 1999.
Remarks: A valid species *fide* Shea & Sadlier (1999: 66) and Cogger (2000: 67) although the type cannot be located in AMS. Possibly occurs on N Cape York Peninsula, Queensland *fide* Wells & Wellington (1985: 49).

4. *Rhinoplocephalus nigrescens* (A.C.L.G. Günther, 1862b). Ann. Mag. Nat. Hist. (3) 9(30): 131, pl. 9, fig. 12. (*Hoplocephalus nigrescens*)

Synonyms: *Alecto melanotus* Jan, 1863b *(nomen nudum), Alecto permixta* Jan, 1863b *(nomen nudum), Alecto permixta* Jan, 1873 *in* Jan & Sordelli, 1870–1881, *Hoplocephalus assimilis* Macleay, 1885b, *Cryptoptis nigrescence* – Khole, 1991 *(nomen incorrectum),* and *Cryptophis edwardsi* Hoser, 2012ac *(nomen illegitimum).*
Type: Holotype, BMNH 1946.1.20.58, a 394 mm male (G. Krefft, 1861–1874).
Type locality: "environs of Sydney" [Australia]. Emended to rocky neighbourhood of Middle Harbour (Port Jackson) [= Port Jackson, E New South Wales, SE Australia, 33°51'S, 151°15'E, elevation NSL] *fide* Krefft (1869b: 69).
Distribution: Eastern Australia (Australian Capital Territory, E New South Wales, E Queensland, E Victoria), NSL–1395 m.
Sources: Krefft, 1869b, Shine, 1984b and Covacevich, 1991.

5. *Rhinoplocephalus nigrostriatus* (Krefft, 1864c). Proc. Zool. Soc. London 32(1): 181–182. (*Hoplocephalus nigrostriatus*) (*nomen corrigendum*)

Synonyms: *Alecto dorsalis* Jan, 1863b (*nomen nudum*), *Hoplocephalus nigro-striatus* Krefft, 1864c *(nomen incorrigendum), Alecto dorsalis* Jan, 1873 *in* Jan & Sordelli, 1870–188l, *Hoplocephalus nigrostriatus* – F. Müller, 1885 *(nomen corrigendum), Denisonia nigrostriata* – Boulenger, 1896a, and *Unechis durhami* Hoser, 2012ac *(nomen illegitimum).*
Type: Holotype, AMS 131705 (formerly AMS 6660), a 279 mm specimen (G. Salting).
Type locality: "North-east Australia, neighbourhood of Rockhampton" [= vicinity of Rockhampton, SE Queensland, E-cen. Australia, 23°23'S, 150°30'E, elevation NSL].
Distribution: Papua New Guinea (Western) and N Australia (E Queensland), NSL–855 m.
Sources: Krefft, 1869b, Covacevich, 1991 and O'Shea, 1996.
Remarks: Original description reprinted in Krefft (1865a: 67). Type locality Queensland, Australia and collector Capt. Hurley *fide* H. Ehmann *in* Shea & Sadlier (1999: 50).

6. *Rhinoplocephalus pallidiceps* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 214. (*Hoplocephalus pallidiceps*)

Type: Lectotype, BMNH 1946.1.20.65, a 610 mm female (Earl of Derby), designated by Wells & Wellington (1985: 45).
Type locality: "Port Essington" [= Port Essington, ext. N Northern Territory, N Australia, 11°10'S, 132°08'E, elevation NSL] via lectotype selection.
Distribution: North-central Australia (N Northern Territory, ext. N Western Australia), NSL–100 m.
Sources: Krefft, 1869, Cogger & Lindner, 1974, L. Smith, 1978, Shine, 1984b and Storr et al., 1986.

RHINOTYPHLOPS Fitzinger, 1843 (Typhlopidae)

Synonyms: *Onychocephalus* A.-M.-C. Duméril & Bibron, 1844, *Onychophis* Gray, 1845, *Onycocephalus* – A.H.A. Duméril, 1856 *(nomen incorrectum), Onychophalus* – Bocage, 1866a *(nomen incorrectum), Onicocephalus* – Amaral, 1930f *(nomen incorrectum), Onyehocephalus* – Tchang, 1932 *(nomen incorrectum),* and *Onchocephalus* – Nussbaum, 1984 *(nomen incorrectum).*
Type species: *Typhlops lalandei* Schlegel, 1839 *in* 1837–1844.
Distribution: Eastern and S Africa.
Sources: Witte, 1962, Pitman, 1974, Roux-Estève, 1974a, Hahn, 1977, 1980a, Broadley, 1983, Wallach, 1993a, c, 1994b, Wallach & Ineich, 1996, McDiarmid et al., 1999 and Broadley & Wallach, 2009.

R

1. *Rhinotyphlops boylei* (V.F.M. FitzSimons, 1932). Ann. Transvaal Mus. 15(1): 38. (*Typhlops boylei*)

Type: Holotype, TMP 14695 (formerly VLKE 805), a 182 male (A.M. Boyle, 28 May 1930).
Type locality: "Gemsbok Pan, Ghanzi District, Kalahari" [= West Kalahari, Botswana, 21º34'S, 21º47'E, elevation 1150 m].
Distribution: Southwestern Africa. Central Namibia (Khomas, Otjozondjupa), SW Botswana (Ghanzi, Kgalagadi) and N South Africa (Northern Cape), 915–1155 m.
Sources: Mertens, 1955, 1971, Wallach, 1994b, Branch, 1998, M. Griffin, 2003 and Broadley & Blaylock, 2013.

2. *Rhinotyphlops lalandei* (Schlegel, 1839 *in* 1837–1844). Abbild. Amph.: 38, pl. 32, figs. 17–20. (*Typhlops lalandei*)

Synonyms: *Onychocephalus delalandii* A.-M.-C. Duméril & Bibron, 1844 *(nomen emendatum), Onychophis fordii* Gray, 1845, *Onychophis franklinii* Gray, 1845, *Onychophis lalandii* Gray, 1845 *(nomen emendatum), Typhlops smithi* Jan 1860 *in* Jan & Sordelli, 1860–1865, *Typhlops lalandei paucisquamosa* Boettger, 1883b, and *Typhlops delalandei* Boettger, 1887b *(nomen emendatum).*

Types: Syntypes (9), MNHN 1492, a 235 mm male, MNHN 3214, a 215 mm male, MNHN 3214A, a 186 mm female, MNHN 6992–92A, and RMNH 3715a–d, (P.A. Delalande & H.B. van Horstolk, 1818–1820).

Type locality: "Vorgebirge der guten Hoffnung" [= Cape of Good Hope, SW Western Cape Prov., SW South Africa *fide* V.F.M. FitzSimons, 1962: 71].

Distribution: Southern Africa. Southern Namibia (Erongo, Hardap, Karas, Khomas, Omaheke), E Botswana (Central, Gaborone, Kweneng, South East), Zimbabwe (Bulawayo, Manicaland, Mashonaland West, Masvingo, Matebeleland North, Matebeleleand South, Midlands), S Mozambique (Gaza), Lesotho, Swaziland and South Africa (Eastern Cape, Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, Northern Cape, North-West, Western Cape), NSL–1670 m.

Sources: Mertens, 1955, 1971, FitzSimons, 1974, Broadley & Cock, 1975, Broadley, 1983, Pienaar et al., 1983, Meirte, 1992, M., Branch, 1998, 2001, Griffin, 2003, Warner & Combrink, 2010b and Broadley & Blaylock, 2013.

Remarks: MNHN 6992–92A not listed as syntypes *fide* Guibé & Roux-Estève (1972: 134).

3. *Rhinotyphlops schinzi* (Boettger, 1887b). Ber. Senck. Naturf. Ges. Freunde Berlin 1886–1887: 154–156, pl. 5, figs. 1a–e, 2. (*Typhlops* [*Onychocephalus*] *schinzi*)

R

Type: Lectotype, SMF 16665 (formerly SMF-B 7047, 1a), ? a 226 mm specimen (H. Schinz, 1884–1885), designated by Mertens (1922: 178).

Type locality: "Noi Xas bei Ghanze, Nord-Kalahari" [= Noixas, between Aus and Keetmanshoop, Great Namaqualand, Ghansi Distr., W Kalahari, Botswana, 21°34'S, 21º47'E, elevation 1155 m] via lectotype selection.

Distribution: Southwestern Africa. Namibia (Karas, Khomas, Kunene, Otjozondjupa), W Botswana (Ghanzi) and South Africa (W Northern Cape), NSL–1670 m.

Sources: Mertens, 1955, 1971, FitzSimons, 1974, Broadley, 1983, Auerbach, 1987, Branch, 1998, M. Griffin, 2003 and Broadley & Blaylock, 2013.

Remarks: Mertens (1922: 178) listed lectotype collection date as 1887, probably referring to date received in Germany.

RHYNCHOCALAMUS A.C.L.G. Günther, 1864d (Colubridae)

Synonyms: *Rhyncocalamus* – Tristram, 1884 *(nomen incorrectum),* and *Rhynocalamus* – Marx & Rabb, 1972 *(nomen incorrectum).*

Type species: *Homalosoma melanocephalum* Jan, 1862b.

Distribution: Southwestern Asia.

Sources: K.P. Schmidt, 1939b, C.A. Reed & Marx, 1959, Gasperetti, 1988 and Olgun et al., 2007.

1. *Rhynchocalamus arabicus* K.P. Schmidt, 1933b. Field Mus. Nat. Hist. (Zool.) 20: 9–10.

Type: Holotype, FMNH 18219, a 278 mm female (A.R.M. Rickards, 1932).

Type locality: "Aden, Arabia" [= W Aden, Yemen, ca. 13°30'N, 45°00'E].

Distribution: Southwestern Yemen (Aden). Known only from holotype.

Sources: Corkill & Cochrane, 1965, Leviton & Aldrich, 1984, Gasperetti, 1988 and Egan, 2007.

2. *Rhynchocalamus barani* Olgun, Avci, Ilgaz, N. Uzum & C.Yilmaz, 2007. Zootaxa (1399): 58–62, figs. 1–5.

Type: Holotype, ZDEU 122/2006, a 403 mm female (A.A. Vic & C. Yilmaz, 1 May 2006).

Type locality: "Amanos Mountain (36º50'N, 36º25'E; altitude 310 m a.s.l.), 34 km E of Dörtyol, Hatay Province, Turkey."

Distribution: Southern Turkey (Hatay), 310 m. Known only from type locality.

3. *Rhynchocalamus melanocephalus* (Jan, 1862b). Arch. Zool. Anat. Fis. 2(1): 34, pl. e, no. 3. (*Homalosoma melanocephalum*)

Synonyms: *Rhynchocalamus melanocephalus* Günther, 1864d *(nomen praeoccupatum), Contia satunini* Nikolsky, 1899, and *Oligodon melanocephalus septentrionalis* F. Werner, 1905.

Type: Lectotype, MHNG 1246.77, a 400 mm female (M. Sordet), designated herein.

Type locality: "Bairut" [= Beirut, Beirut Prov., W Lebanon, 33°53'N, 35°30'E, elevation NSL] via lectotype selection.

Distribution: Southwestern Asia. Southeastern Turkey (Adana, Hatay, Mardin), W Syria (Damascus, Homs, Latakia), Lebanon (Beirut, Mont-Liban, Nabatiye), W Jordan (Amman, Irbid, Jarash, Karak, Maan, Madaba, Mafraq), Israel (Central, Golan Heights, Haifa, Jerusalem, Northern, N Southern, Tel Aviv, West Bank), NE Egypt (South Sinai), SW Armenia, SW Azerbaijan, W Iran (Central, East Azarbaijan, Khuzestan) and N Iraq (Ta'min), 50–1800 m.

Sources: Boettger, 1879a, Tristram, 1884, J. Anderson, 1898, Nikolsky, 1913, 1916, T. Barbour, 1914b, Flower, 1933, Angel, 1936c, Bird, 1936, Bodenheimer, 1944, G. Haas, 1951, G. Haas & Werner, 1969, Darevsky, 1970, Baran, 1976, Bannikov et al., 1977, Basoglu & Baran, 1980, Hraoui-Bloquet, 1981, Latifi, 1991, Gasperetti, 1988, Gruber, 1989, Leviton et al., 1992, Franzen & Bischoff, 1995, Bouskila & Amitai, 2001, Disi et al., 2001, Hraoui-Bloquet et al., 2002, Baha El Din, 2006, Avci et al., 2008, Tuniyev et al., 2009, Amr & Disi, 2011 and Bar & Haimovitch, 2011.

Remarks: Illustration of the MHNG lectotype in Jan & Sordelli (1860–1866, 1[13]: pl. 3, fig. 4). Probably occurs in N Saudi Arabia *fide* Gasperetti (1988: 272).

RHYNCHOPHIS Mocquard, 1897c (Colubridae)

Synonyms: *Rhadinophis* T. Vogt, 1922, *Proboscidophis* Fan, 1931, and *Katrinahoserea* Hoser, 2012r *(nomen illegitimum).*

Type species: *Rhynchophis boulengeri* Mocquard, 1897c.

Distribution: Southeastern Asia.

Remarks: Includes *Rhadinophis frenata* and *R. prasina fide* Zaher et al., 2012.

1. *Rhynchophis boulengeri* Mocquard, 1897c. Bull. Mus. Hist. Nat. 3(6): 215.

Synonym: *Proboscidophis versicolor* Fan, 1931.

Types: Syntypes (6), MNHN 1897.94–99, males and females, longest syntype 1134 mm female (Leichtenfelder).

Type locality: "des îles Norway, de la baie d'Along, dans le golfe de Tonkin" [= Xuy Nong Chao, Ha Long Bay, Gulf of Tonkin, Quang Ninh Prov., N Vietnam, 20°37'N, 107°10'E].

Distribution: Southern China (Guangxi, Hainan) and N Vietnam (Hai Phong, Ha Tay, Ha Tinh, Quang Ninh, Son La, Thai Nguyen, Vinh Phuc, Hon Nor Way Is.), 200–1500 m.

Sources: F. Werner, 1929a, Fan, 1931, Bourret, 1934f, 1935c, 1936b, 139d, C.H. Pope, 1935, M.A. Smith, 1943, Zhao & Adler, 1993, Orlov, 1995, Darevsky, 1999, Orlov et al., 2000, T. Schmidt, 2002, Burbrink & Lawson, 2007, V.S. Nguyen et al., 2009, I. Das, 2010, 2012, Schulz et al., 2011 and Hoser, 2012r.

2. *Rhynchophis frenatus* (Gray, 1853). Ann. Mag. Nat. Hist. (2) 12(72): 390–391. (*Herpetrodryas frenatus*)

Synonyms: *Rhadinophis melli* T. Vogt, 1922, *Gonyosoma caldwelli* K.P. Schmidt, 1925a, and *Chrysopelea ornata lungchuanensis* B. Hu, Huang, He & Wei, 1958.

Type: Holotype, BMNH 1946.1.6.5 (formerly BMNH 1853.8.12.20), adult female (J. Hooker, May–Dec. 1850).

Type locality: "Khassia Mountains, East Bengal" [= Khasi Hills, Meghalaya and Assam States, NE India].

Distribution: Southern Asia. Northeastern India (Assam, Meghalaya), SE China (Anhui, Fujian, Guangdong, Guangxi, Guizhou, Hunan, Sichuan, Zhejiang) and N Vietnam (Lang Son, Lao Cai, Quang Binh, Vinh Phuc), 550–2000 m.

Sources: Boulenger, 1893a, K.P. Schmidt, 1927b, C.H. Pope, 1935, Bourret, 1936b, E.H. Taylor, 1965, B. Hu et al., 1980, Tian et al., 1986, Y. Zhang & Tang, 1990, Schulz, 1991, Zhao & Adler, 1993, Staszko & Walls, 1994, V.S. Nguyen et al., 2009, Xiang & Li, 2009 and I. Das, 2012.

Remarks: Original orthography of *Herpetrodryas* was in error for *Herpetodryas*.

3. *Rhynchophis prasinus* (Blyth, 1854a). J. Asiat. Soc. Bengal 23(3): 291. (*Coluber prasinus*)

Synonym: *Gonyosoma gramineum* A.C.L.G. Günther, 1864a.

Type: Lectotype, BMNH 1946.1.10.22 (formerly IMC 7670 & BMNH 1860.3.19.1155), longest syntype 940 mm (W. Robinson), designated by Cox et al. (2013: 221).

Type locality: "Asám, from the Khásya hills, or other upland territory" [= Khasi Hills, E Meghalaya State, NE India, 25°35'N, 91°38'E, elevation 1370–1675 m].

Distribution: Southeastern Asia. Northeastern India (Andaman & Nicobars, Assam, Arunachal Pradesh, Himachal Pradesh, Manipur, Meghalaya, Nagaland, Sikkin, N West Bengal), N Thailand (Loei), N Myanmar (Chin, Kachin, Karen, Mandalay, Sagaing, Shan), S China (Guanxi, Guizhou, Hainan, Hubei, Sichuan, Yunnan), N Laos (Champasak), Vietnam (Bac Kan, Gia Lai, Lao Cai, Nghe An, Quang Binh, Thai Nguyen, Vinh Phú), Thailand (Loei, Tak) and West Malaysia (Pahang, Perlis, Selangor), 75–2650 m.

Sources: M.A. Smith, 1922b, Bourret, 1936b, Tweedie, 1940a, 1950, Schulz, 1991, Zhao & Adler, 1993, Orlov, 1995, M.J. Cox et al., 1998, Chan-ard et al., 1999, Orlov et al., 2000, 2003, Schleich & Kästle, 2002, Vogel & Pauwels, 2004, Zhao, 2006, Yang, 2008, V.S. Nguyen et al., 2009, Thanh & Ziegler, 2009 and I. Das, 2012.

Remarks: Probably occurs in E Nepal *fide* Schleich & Kästle (2002: 873).

†*RIONEGROPHIS* Albino, 1986 (Boidae)

Type species: †*Rionegrophis madtsoioides* Albino, 1986.

Distribution: Upper Cretaceous of Argentina.

Sources: Albino, 1987b, 2011b.

1. †*Rionegrophis madtsoioides* Albino, 1986. Actas IV Congr. Argent. Paleont. Boiestr. 2: 18–19, fig. 3.

Type: Holotype, MACN-RN 32, one middle trunk vertebra.
Type locality: "Ladera sudoeste del Cerro Cuadrado, noreste de la Ea. Los Alamitos, Arroyo Verde, Dpto. Valcheta, Río Negro, Argentina. Sector medio de la Formación los Alamitos, Campaniano-Maastrichtiano temprano, cretácio tardío" [= SW slope of Cerro Cuadrado, NE of Los Alamitas (41°57'S, 66°21"W), proximal zone of Arroyo Verde (41°55'S, 66°10'W), Valcheta Dept., SE Río Negro Prov., S Argentina; middle section of Los Alamitos formation, early Campanian-Maestrichtian, upper Cretaceous].
Distribution: Upper Cretaceous (Campanian-Maastrichtian: 65.5–83.6 mya) of Argentina. Known only from type locality.

RODRIGUESOPHIS Grazziotin, Zaher, Murphy, Scrocchi, Benavides, Zhang & Bonatto, 2012 (Xenodontidae)

Type species: *Rhinostoma iglesiasi* Gomés, 1915.
Distribution: Northeastern Brazil.

1. *Rodriguesophis chui* (Rodrigues, 1993b). Pap. Avul. Zool. 38(11): 190–191, fig. 3. (*Phimophis chui*)

Type: Holotype, MZUSP 10291 (formerly MTR 90.7212), a 370 mm male (M.T. Rodrigues, 6 Oct. 1990).
Type locality: "Brazil: Bahia: Santo Ignácio" [= Santo Inácio, N Bahia State, NE Brazil, 11°07'S, 42°43'W, elevation 545 m].
Distribution: Northeastern Brazil (N Bahia), 545 m. Known only from type series.

R

2. *Rodriguesophis iglesiasi* (Gomés, 1915). Ann. Paul. Med. Cirurg. 4(6): 126–127, pl. 4, figs. 1–3. (*Rhinostoma iglesiasi*)

Synonym: *Rhinostoma bimaculatum* Lutz & Mello, 1922b.
Type: Holotype, IB 513, a 490 mm female (F. Iglesias), destroyed by fire 15 May 2010.
Type locality: "Estado do Piauhy, Brazil" [= Piauí State, NE Brazil].
Distribution: Eastern Brazil (Bahia, Minas Gerais, Piauí, Tocantins), 300–600 m.
Sources: Hoge et al., 1981, Freitas, 1999 and Recorder et al., 2011.

3. *Rodriguesophis scriptorcibatus* (Rodrigues, 1993b). Pap. Avul. Zool. 38(11): 188–189, figs. 1–2. (*Phimophis scriptorcibatus*)

Type: Holotype, MZUSP 10062 (formerly MTR 88.6299), a 316 mm male (M.T. Rodrigues, 26 Aug. 1988).
Type locality: "Brazil: Bahia: Ibiraba" [= Ibiraba, N Bahia State, NE Brazil, ca. 10°46'S, 42°45'W, elevation 400 m].
Distribution: Northeastern Brazil (N Bahia), 400 m. Known only from type locality.

†*ROTTOPHIS* Szyndlar & Böhme, 1996 (Tropidophiidae)

Type species: †*Tropidonotus atavus* H. Meyer, 1855.
Distribution: Upper Oligocene of Germany.
Sources: Troschel, 1859, H. Meyer, 1860, Rochebrune, 1880, Mlynarski, 1961, Rage, 1984b, 2011, W. Böhme & Lang, 1991, Szyndlar & Böhme, 1996, Szyndlar, 1997, Szyndlar & Rage, 2003 and Szyndlar et al., 2008.

1. †*Rottophis atavus* (H. Meyer, 1855). Neues Jb. Mineral. Geog. Geol. Petrefakt.-Kunde 23: 336–337. (†*Tropidonotus atavus*)

Synonyms: †*Coluber papyraceus* Troschel, 1854 (*nomen nudum*), and †*Coluber papyraceus* J.G. Fischer, 1857.
Type: Holotype, GPIBO Ro 4023 (formerly HvM 9), a nearly complete 520–535 mm skeleton (H. von Dechen, April 1855).
Type locality: "Rheinischen Braunkohle" [= brown coal of Rhine, Germany]. Emended to Braunkohle des Siebengebirges *fide* H. Meyer (1860: 232) and Romeriken-Berge Quarry, Rott near Bonn, North Rhine-Westfalia Prov., W Germany, Upper Oligocene, Arvernian *fide* Rage (1984b: 44).
Distribution: Upper Oligocene (Chattian, MP 25–30: 23.0–28.4) of Germany. Known only from type locality.
Remarks: Supplemental original description in H. Meyer (1860: 232–240, pl. 25, figs. a–c, 1–4). Photograph of holotype in W. Böhme & Koenigswald (1989: fig. 7.5) and Szyndlar & Böhme (1996: pl. 1, fig. b).

†*RUSSELLOPHIS* Rage, 1975a (†Russellophiidae)

Synonym: †*Russelophis* – Rage & Rocek, 1983 *(nomen incorrectum).*
Type species: †*Russellophis tenuis* Rage, 1975a.
Distribution: Lower Eocene of France and India.
Sources: Rage, 1983b, 1984b, 1988c, Auge et al., 1997 and Rage et al., 2008.

1. †*Russellophis crassus* Rage, Folie, Rana, Singh, Rose & Smith, 2008. Acta Palaeont. Polon. 53(3): 394–396, figs. 3a–b.

Type: Holotype, VAS 1039, one middle trunk vertebra.
Type locality: "Vastan Lignite Mine, northeast of Surat, Gujarat, western India; Early Eocene (middle to late Ypresian) continental beds of Cambay Formation."
Distribution: Lower Eocene (Bumbanian: 48.6–55.8 mya) of India. Known only from type locality.

2. †*Russellophis tenuis* Rage, 1975a. C.R. Soc. Géol. France 2: 46–47, figs. 1a–e.

Type: Holotype, MNHN CB 1603, one middle trunk vertebra (D.E. Russell).
Type locality: "Condé-en-Brie (Aisne, France); Yprésien, l'Eocène inférieur" [= Condé-en-Brie, S Aisne Prov., N France, lower Eocene, Ypresian].
Distribution: Lower Eocene (Ypresian, MP 7–10: 48.6–55.8 mya) of France.

S

SALOMONELAPS McDowell, 1970 (Elapidae)

Synonyms: *Salmonelaps* – Dowling *in* Dowling & Duellman, 1978 *(nomen incorrectum),* and *Solomonelaps* – O'Shea, 2007 *(nomen incorrectum).*
Type species: *Hoplocephalus par* Boulenger, 1884b.
Distribution: Papua New Guinea and Solomons.
Sources: Boulenger, 1888b, T. Barbour, 1921a, Kinghorn, 1928a, Burt & Burt, 1932, K.P. Schmidt, 1932c, Loveridge, 1945b, E.E. Williams & Parker, 1964, McDowell, 1970, Keogh, 1992, O'Shea, 1996, Zaher et al., 2009 and Hoser, 2012e.

1. *Salomonelaps par* (Boulenger, 1884b). Proc. Zool. Soc. London 52(2): 210. (*Hoplocephalus par*)

Synonyms: *Hoplocephalus melanurus* Boulenger, 1888b, *Hoplocephalus woodfordi* Boulenger, 1888b, *Denisonia melanura boulengeri*, Waite, 1899, and *Denisonia furva* Brazenor, 1947..
Type: Holotype, BMNH 1946.1.20.66 (formerly BMNH 1884.3.24.94), a 750 mm female (H.B. Guppy).
Type locality: "Faro Island, Solomon Islands."
Distribution: Eastern Papua New Guinea (North Solomons: Buka Is.) and the Solomons (Fauro, Ganongga, Giza, Guadalcanal, Kolombangara, Lavella, Malaita, New Georgia, Rendova, Santa Isabel, Shortland, Simbo, Tetipari, Vangunu and Vella Is.).

SALVADORA Baird & Girard, 1853 (Colubridae)

Synonyms: *Phimothyra* Cope, 1860e *(nomen nudum), Phimothyra* Cope, 1861c *(nomen substitutum), Phimathyra* – W.C.H. Peters, 1870a *(nomen incorrectum), Phymothyra* S.W. Garman, 1884 *(nomen emendatum), Salvador* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Aiselfakharius* Hoser, 2012aL *(nomen illegitimum).*
Type species: *Salvadora grahamiae* Baird & Girard, 1853.
Distribution: Southwestern USA and Mexico.
Fossil records: Miocene and upper Pleistocene of W USA. Fossils unassigned to species include upper Pleistocene (Rancholabrean II) of USA (Arizona, New Mexico, Texas).
Sources: Bogert, 1939a, H.M. Smith, 1939a, 1941d, H.M. Smith & Taylor, 1945, Van Devender & Bradley, 1994, Holman, 1995b, 2000a and Nagy et al., 2004.

1. *Salvadora bairdi* Jan, 1860 *in* Jan & Sordelli, 1860–1866. Icon. Gén. Ophid. 1(1): 1, pl. 3, figs. 2, 2a–c, f–g, h, n, r, v.

Synonym: *Salvadora bogerti* H.M. Smith, 1941d.
Types: Syntypes (2), USTL (A. Westphal-Castelnau), and formerly MSNM, destroyed in 1943 during World War II.
Type locality: "Mexique" [= Mexico]. Restricted to Acambaro, Guanajuato, Mexico *fide* H.M. Smith & Taylor (1950a: 330).
Distribution: Mexico (Aguascalientes, S Chihuahua, S Coahuila, Distrito Federal, Guanajuato, Guerrero, Hidalgo, Jalisco, México, Michoacán, Morelos, Nayarit, Oaxaca, Puebla, Querétaro, Sinaloa, Veracruz, Zacatecas), 1000–3200 m.
Sources: Jan, 1863b, Bocourt, 1888 *in* Bocourt, Duméril & Mocquard, 1870–1909, H.M. Smith, 1943a, Duellman, 1961, McCranie & Wilson, 1984, 2001b, W.W. Tanner, 1985, Pérez-Higareda & Smith, 1991, Camarillo & Smith, 1992 and Benitez-Gálvez, 1997.
Remarks: A synonym of *S. grahamiae fide* Bogert (1939a: 186) and W.W. Tanner (1985: 641–642).

2. *Salvadora deserticola* K.P. Schmidt, 1940. Field Mus. Nat. Hist. (Zool.) 24(12): 146–148, fig. 14. (*Salvadora hexalepis deserticola*)

Synonym: *Salvadora hexalepis celeris* H.M. Smith, 1941d.
Type: Holotype, FMNH 26615, an 854 mm specimen (T. Carney, 1935).
Type locality: "Government Spring, near Chisos Mountains, Brewster County, Texas" [USA].
Distribution: Extreme SW USA (SE Arizona, S New Mexico, W Texas) and N Mexico (Chihuahua, ext. N Coahuila, Sinaloa, E Sonora), 300–1830 m.
Sources: H.M. Smith, 1940, 1943a, Bogert & Oliver, 1945, A.H. Wright & Wright, 1957, Fowlie, 1965, Tennant, 1984, 1985, Dixon, 1987b, Degenhardt et al., 1996, Bartlett & Tennant, 2000 and Werler & Dixon, 2000.

3. *Salvadora grahamiae* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 104–105.

Synonym: *Salvadora lineata* K.P. Schmidt, 1940.
Type: Holotype, USNM 2081, a 698–724 mm male (J.H. Clark [U.S.-Mex. Bound. Surv.], 1851, via J.D. Graham).
Type locality: "Sonora, Mex." (in error). Corrected to south of the Gila River in Santa Cruz or Cochise Co., SE Arizona, USA *fide* Bogert (1939a: 198–199), Stejneger

(1940: 204) and Stickel (1943: 120). Restricted to Huachuca Mountains, Cochise Co., SE Arizona, USA *fide* Bogert (1939a: 186, 199).

Distribution: Extreme SW USA (SE Arizona, New Mexico, SW Texas) and N Mexico (Chihuahua, Coahuila, Durango, Distrito Federal, Nuevo León, Querétaro, San Luis Potosí, ext. NE Sonora, Tamaulipas, Veracruz, Zacatecas), NSL–1980 m.

Sources: A.H. Wright & Wright, 1957, Fowlie, 1965, Van Devender & Lowe, 1977, Tennant, 1984, 1985, Stebbins, 1985, Degenhardt et al., 1996, Bartlett & Tennant, 2000 and Werler & Dixon, 2000.

4. *Salvadora hexalepis* (Cope, 1867a). Proc. Acad. Nat. Sci. Philadelphia (1866) 18(4): 304. (*Phimothyra hexalepis*)

Synonyms: *Salvadora grahamiae virgultea* Bogert, 1935, *Salvadora hexalepis klauberi* Bogert, 1945, and *Salvadora hexalepis mojavensis* Bogert, 1945.

Type: Holotype, USNM 7894, a 240+ mm juvenile (E. Coues [Wheeler Surv.], 1864–1865).

Type locality: "Fort Whipple, Territory of Arizona, near the parallel of 35°" [= Fort Whipple, W Yavapai Co., W Arizona, USA].

Distribution: Southwestern USA (Arizona, S and E California, W Nevada, ext. SW Utah) and NW Mexico (Baja California Norte, Baja California Sur, W Sonora, Espíritu Santo, San Gerónimo, San José, Tiburón and Todos Santos Is.), BSL–2200 m.

Sources: Fowlie, 1965, Stebbins, 1985, Bartlett & Tennant, 2000, Germano, 2001 and Grismer, 2002.

Remarks: Original description reprinted in Coues (1875: 620).

5. *Salvadora intermedia* Hartweg, 1940. Copeia 1940(4): 256–258.

Synonym: *Salvadora intermedia richardi* H.M. Smith, 1941.

Type: Holotype, UMMZ 85733, a male (W.W. Brown, 1932–1940).

Type locality: "vicinity of Chilpancingo, Guerrero, Mexico" [= vicinity of Chilpancingo (17°33'N, 99°30'W, elevation 1270 m), Sierra Madre del Sur, cen. Guerrero State, S Mexico].

Distribution: Southern Mexico (Sierra Madre del Sur of Guerrero, Oaxaca and Puebla), 500–2700 m.

Sources: Davis & Dixon, 1957, Casas-Andreu et al., 1996 and Benitez-Gálvez, 1997 and Canseco-Márquez & Gutiérrez-Mayén, 2010.

6. *Salvadora lemniscata* (Cope, 1895c). Trans. Amer. Philos. Soc. (1895) 18(2): 203. (*Drymobius lemniscatus*)

Synonym: *Salvadora pulchra* K.P. Schmidt, 1943 (*nomen nudum*).

Types: Syntypes (?), MNHN, longest syntype 1610 mm (A.L.J.F. Sumichrast, 1855–1882).

Type locality: "Mexique occidental" [= W part of Isthmus of Tehuantepec, Oaxaca State, S Mexico *fide* Sumichrast, 1880: 162].

Distribution: Southern Mexico (Chiapas, Guerrero, Oaxaca), 50–1200 m.

Source: Bogert, 1939b.

Remarks: Sumichrast (1882: 285) listed *Coluber* sp. nov. ? and *Masticophis* sp. from near Tapana, either of which could be this species. Type locality restriction to Acapulco, Guerrero, Mexico *fide* H.M. Smith & Taylor (1950a: 351) invalid.

7. *Salvadora mexicana* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 695–696. (*Zamenis mexicanus*)

Type: Holotype, MNHN 3585, a 1220 mm specimen (Dubois).

Type locality: "Cap Corrientes (Mexique)" [= Cabo Corrientes, NW Jalisco State, W Mexico, ca. 20°25'N, 105°42'E, elevation NSL].

Distribution: Western Mexico (Colima, Guanajuato, Guerrero, Jalisco, México, Michoacán, Morelos, Nayarit, Oaxaca, Puebla), NSL–1200 m.

Sources: A.C.L.G. Günther, 1863c, Bocourt, 1888 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, L.C. Stuart, 1933, Bogert, 1939b, Duellman, 1961, Camarillo & Smith, 1992, Casas-Andreu et al., 1996 and Benitez-Gálvez, 1997.

8. †*Salvadora paleolineata* Holman, 1973a. Contr. Mus. Paleont., Univ. Michigan 24(12): 132, figs. 5a–b.

Type: Holotype, UMMP V56292, one trunk vertebra (1967–1971).

Type locality: "one mile north of the Niobrara River on the Ranch of Franklin H. Egelhoff in the SE corner of the NE1/4 SW1/4 sec. 29, T 33 N, R 23 W, Keya Paha County, Nebraska, Upper Miocene, lower Valentine formation, Egelhoff local fauna" [= middle Miocene *fide* Holman, 2000: 188].

Distribution: Lower Miocene (Hemingfordian) of USA (Nebraska, South Dakota), lower/middle Miocene (Hemingfordian/Barstovian) of USA (Wyoming), middle Miocene (Barstovian) of USA (Nebraska, South Dakota, Texas), and upper Miocene (Hemphillian) of USA (Nebraska, Texas).

Sources: Holman, 1976a, 1977c, 1977e, 1978, 1979b, 1981a, 1982a, 1987a, 1996a, Green & Holman, 1977, Van Devender & Worthington, 1977, Holman & Sullivan, 1981, Rage, 1984b, Parmley & Holman, 1995 and Holman, 2000a.

†*SANAJEH* J.A. Wilson, Mohabey, Peters & Head, 2010 (†Madtsoiidae)

Type species: †*Sanajeh indicus* J.A. Wilson, Mohabey, Peters & Head, 2010.
Distribution: Upper Cretaceous of India.
Source: J.A. Wilson et al., 2010

1. †*Sanajeh indicus* J.A. Wilson, Mohabey, Peters & Head, 2010. PLoS Biology 8(3), 2–3, figs. 1–4.

Type: Holotype, GSI/GC/2901–2906 (cast in UMMP 14265), nearly complete skull and lower jaws and 72 trunk vertebrae plus ribs from a 3460 mm specimen (D.M. Mohabey, 1984).
Type locality: "infratrapean calcareous sandstones of the Lameta Formation exposed near Dholi village in Gujarat, western India (23º08' N, 73º23' E); Late Cretaceous (Maastrichtian)."
Distribution: Upper Cretaceous (Maastrichtian: 65.5–72.1 mya) of India. Known only from holotype.

†*SANJUANOPHIS* Sullivan & Lucus, 1988 (Boidae)

Type species: †*Sanjuanophis froehlichorum* Sullivan & Lucus, 1988.
Distribution: Lower Eocene of USA.
Sources: Sullivan & Lucas, 1988 and Longrich et al., 2012b.

1. †*Sanjuanophis froehlichorum* Sullivan & Lucus, 1988. J. Paleont. 62(4): 637, figs. 5.1–5.6, 11. (*nomen corrigendum*)

Synonyms: *Sanjuanophis froehlichi* Sullivan & Lucas, 1988 *(nomen incorrigendum),* and *Sanjuanophis froehlichorum* – Morgan & Lucas *in* Lucas, 1999 *(nomen corrigendum).*
Type: Holotype, NMMNH P-9867 (formerly UNM J-105), seven trunk vertebrae, two fragments of trunk vertebrae, and three vertebrae in concretions (P.H. Froehlich, 1984).
Type locality: "UNM 33A, T23N, R2W, San Juan Basin, New Mexico; San José Formation (Regina Member), Almagre local fauna. Early Eocene (Wasatchian)" [= 4 mi. W and 1.75 mi. S Regina, NW Sandoval Co., NW New Mexico, USA]. Emended to Jicarilla Indian Reservation, Sandoval County, New Mexico (L-204), Regina Member, San José Formation, early Eocene (Wasatchian) *fide* Morgan & Lucas *in* Lucas (1999: 255).
Distribution: Lower Eocene (Wasatchian: 50.3–55.4 mya) of USA (New Mexico). Known only from type locality.

SANZINIA Gray, 1849a (Boidae)

Synonyms: *Sganzinia* – W.C.H. Peters, 1880c *(nomen incorrectum),* and *Sanzina* – Auffenberg, 1958 *(nomen incorrectum).*
Type species: *Xiphosoma madagascariensis* A.-M.-C. Duméril & Bibron, 1844.
Distribution: Madagascar.
Sources: Jourdran, 1904, Guibé, 1949a, 1958, Genest-Villard, 1966, Stimson, 1969, Branch, 1980, 1986, Kluge, 1991, Wall, 1998a, Henkel & Schmidt, 2000, Vences et al., 2001, Vences & Glaw, 2003, A. Mori et al., 2006 and Glaw & Vences, 2007.

1. *Sanzinia madagascariensis* (A.-M.-C. Duméril & Bibron, 1844). Erpét. Gén. 6: 549–552. (*Xiphosoma madagascariense*)

Synonyms: *Boa manditra* Kluge, 1991 (*nomen substitutum*), and *Sanzinia madagascariensis volontany* Vences & Glaw, 2003.
Types: Syntypes (3), MNHN 43, MNHN 7329, and ? ZMB 6400 (formerly MNHN), longest syntype 1450 mm (V. Sganzin, 1831–1832, C.A.C.J. Bernier, 1831–1836, and L. Rousseau, 1841).
Type locality: "íle de Madagascar" [= Madagsascar]. Restricted to Nosy Be Is., W coast of Madagascar *fide* A.-M.-C. Duméril & Duméril (1851: 219).
Distribution: Madagascar (Antsiranana, Antananarivo, Fianarantsoa, Mahajanga, Toamasina, S Toliara, Nosy Be, Nosy Boraha and Nosy Mangabe Is.), NSL–1350 m.
Remarks: Original description listed three syntypes. ZMB 6400 possibly a syntype *fide* Bauer et al. (2002: 171).

SAPHENOPHIS C.W. Myers, 1973 (Xenodontidae)

Type species: *Dromicus boursieri* Jan, 1867 *in* Jan & Sordelli, 1866–1870.
Distribution: Northwestern South America.
Sources: C.W. Myers, 1969b, 1973, J.A. Peters & Orejas-Miranda, 1970, Pérez-Santos & Moreno, 1988 and Zaher et al., 2009.

1. *Saphenophis antioquiensis* (Dunn, 1943). Caladasia 2(8): 307–308. (*Rhadinaea antioquiensis*)

Type: Holotype, MLS 386, a 665–678 mm female (Dec. 1939), destroyed by fire 9–10 April 1948.
Type locality: "San Pedro, Antioquia, Colombia, alt. 2560 m" [= San Pedro, cen. Antioquia Dept., NW Colombia, 6°28'N, 75°33'W, elevation 2560 m].
Distribution: Northwestern Colombia (Antioquia), 2560 m. Known only from type locality.

Remarks: Photographs of holotype and illustration of hemipenis in C.W. Myers (1969b: figs. 1a–b, 2a–b, 3 and 1973: fig. 2a).

2. *Saphenophis atahuallpae* (Steindachner, 1901). Anz. Akad. Wiss. Wien, Math.-Naturwiss. Kl. 38(18): 195–196. (*Liophis atahuallpae*)

Type: Holotype, ZSM 106/1926 (formerly PTB 68), a 600 mm specimen (T. von Bayern, 1898).

Type locality: "unterhalb Las Palmas am Westabhange der Anden auf dem Wege von Babahoyo nach Guaranda, West-Ecuador" [= below Las Palmas on W slope of Andes, between Babahoyo (1°49'S, 79°31'W), S Los Rías Prov., and Guaranda (1°36'S, 79°00'W), Bolívar Prov., cen. Ecuador, elevation 2500 m]. Emended to ca. 2500 m *fide* Steindachner (1902: 105).

Distribution: Central Ecuador (Bolívar), 2500 m. Known only from type locality.

Source: Pérez-Santos & Moreno, 1991.

Remarks: Supplemental original description in Steindachner (1902: 105, pl. 1, figs. 4–4a).

3. *Saphenophis boursieri* (Jan, 1867 *in* Jan & Sordelli, 1866–1870). Icon. Gén. Ophid. 2(25): 4, pl. 2, figs. 2, 2a–c, c–e, f–g, g, p, r, v, y. (*Dromicus boursieri*)

Synonym: *Coronella whymperi* Boulenger, 1882.

Type: Holotype, MNHN 858, a 590 mm female.

Type locality: "Quito" [Ecuador] (probably in error, possibly the shipping site).

Distribution: Extreme SW Colombia (Nariño) and NE Ecuador (Napo, Pastaza, Pichincha), [300] 1000–1890 m.

Sources: H.W. Parker, 1935, J.A. Peters, 1960a, 1963, C.W. Myers 1966b and Pérez-Santos & Moreno, 1988, 1991.

Remarks: Photographs of holotype in C.W. Myers (1973: figs. 5a, 6a–b). Possibly occurs in Loreto, Peru *fide* Myers (1973: 33). Lowland record from E Ecuador needs confirmation *fide* C.W. Myers (1973: 12).

S

4. *Saphenophis sneiderni* C.W. Myers, 1973. Amer. Mus. Novit. (2522): 22–26, figs. 5c, 9a–b.

Type: Holotype, NHR 3129a, a 422 mm female (K. von Sneidern, 1935–1936).

Type locality: "El Tambo, Department of Cauca, Colombia, about 21 kilometers westward from Popayán, between the headwaters of the Río Cauca and the Río Patía, on the eastern slopes of the Cordillera de Occidental, at an elevation of 1745 meters" [= El Tambo, cen. Cauca Dept., SW Colombia, ca. 2°45'N, 77°00'W, elevation 1745 m].

Distribution: Southwestern Colombia (cen. Cauca), 1745 m. Known only from type locality.

5. *Saphenophis tristriatus* (Rendahl & Vestergren, 1940). Arkiv Zool. 33A(1): 5–6. (*Rhadinaea tristiata*)

Type: Holotype, NHR 3119, a 655–660 mm female (G. Gerring, 1938).

Type locality: "Colombia, Cauca" [= Cauca Dept., SW Colombia].

Distribution: Southwestern Colombia (Cauca), 3200 m.

Remarks: Photograph of holotype and illustration of hemipenis in C.W. Myers (1969b: figs. 4, 7 and 1973: figs. 4b, 5b).

SCAPHIODONTOPHIS E.H. Taylor & Smith, 1943 (Sibynophiidae)

Synonyms: *Scaphiodontopsis* – Beltrán, 1953 *(nomen incorrectum), Scaphiondontophis* – K.P. Schmidt & Inger, 1957 *(nomen incorrectum),* and *Scaphodontophis* – Alvarez del Toro, 1960 *(nomen incorrectum).*

Type species: *Enicognathus annulatus* A.-M.-C. Duméril, Bibron & Duméril, 1854a.

Distribution: Latin America.

Sources: E. Morgan, 1973, R.W. Henderson, 1984, Savage & Slowinski, 1996, McCranie et al., 2006 and McCranie, 2006c, 2011a.

Remarks: Pyron et al., 2011, placed this genus in the Scaphiodontophiinae.

1. *Scaphiodontophis annulatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 335–336, pl. 80. (*Enicognathus annulatus*)

Synonyms: *Ablabes annulata* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Henicognathus sumichrasti* Bocourt, 1886 *in* A.H.A. Duméril, Mocquard & Bocourt, 1870–1909 *(nomen rejiciendum), Henicognathus annulata cyclura* Cope *in* Ferrari-Pérez, 1886, *Sibynophis annulatus hondurensis* K.P. Schmidt, 1936, *Scaphiodontophis albonuchalis* E.H. Taylor & Smith, 1943, *Scaphiodontophis carpicinctus* E.H. Taylor & Smith, 1943, *Scaphiodontophis cyclurus* E.H. Taylor & Smith, 1943, and *Scaphiodontophis nothus* E.H. Taylor & Smith, 1943.

Type: Holotype, MNHN 7283, a 590+ mm male.

Type locality: "Coban (Huate-Vera-Paz)" [= Cobán, Alta Verapaz Dept., Guatemala, 15°28'N, 90°22'W, elevation 1325 m].

Distribution: Mexico and upper Central America. Southern Mexico (Chiapas, Colima, Distrito Federal, Oaxaca, Puebla, Quintana Roo, Tabasco, ext. S Tamaulipas, Veracruz, Yucatán), Belize (Belize, Cayo, Orange Walk, Stann Creek, Toledo), Guatemala (Alta Verapaz, Escuintla, Petén), El Salvador (La Libertad, San Salvador, Sonsonate) and NE Honduras (Atlántida, Comayagua, Cortés, Francisco Morazán, Gracias a Dios, Lempira, Olancho, Santa Bárbara, Yoro), NSL–1550 m.

Sources: K.P. Schmidt, 1941, E.H. Taylor & Smith, 1943, L.C. Stuart, 1948, 1963, E.H. Taylor, 1951, 1954, Mertens, 1952c, R.W. Henderson & Hoevers, 1975, J.C. Lee, 1980, 1996, N.J. Scott et al., 1983, J.D. Johnson, 1984, L.D. Wilson & Meyer, 1985, H.M. Smith et al., 1986, Casas-Andreu et al., 1996, Lamar, 1997b, J.A. Campbell, 1998b, Canseco-Marquez et al., 2000 and G. Köhler et al., 2006.

Remarks: Savage & Slowinski (1996: 151) erroneously listed holotype as MNHN 7823.

2. *Scaphiodontophis venustissimus* (A.C.L.G. Günther, 1894 *in* 1885–1902). Biol.-Cent. Amer., Rept.: 144, pl. 51, fig. c. (*Henicognathus venustissimus*)

Synonyms: *Sibynophis zeteki* Dunn, 1930, and *Scaphiodontophis dugandi* Roze, 1969.

Type: Lectotype, BMNH 1946.1.136, a 430 mm male (E. Rothschuh), designated by Savage & Slowinski (1996: 151).

Type locality: "Nicaragua: Matagalpa: Jérico" [= coffee plantation Hacienda Las Lajas, NE of San Ramón (12°55'N, 85°50'W), W Mataglapa Dept., cen. Nicaragua, ca. 13°N, 85°41'W, elevation 990 m] via lectotype selection.

Distribution: Lower Central America and Colombia. Extreme SE Honduras (Gracias a Dios), Nicaragua (Atlántico Sur, Managua, Matagalpa), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Bocas del Toro, Chiriquí, Colón, Darién, Panamá) and NW Colombia (Antioquia, Boyaca, Santander), 30–990 m.

Sources: Roze, 1969, Nicéforo-María, 1970, Villa, 1983, Pérez-Santos, 1986, Savage & Villa, 1986, Pérez-Santos & Moreno, 1988, Villa et al., 1988, Savage, 2002 and McCranie, 2006c.

Remarks: Type locality of Hacienda de Jerico described by A.C.L.G. Günther, 1902 via pers. comm. to A. Voglin (10 July 1966) *fide* Mayorga (1967: 75).

SCAPHIOPHIS W.C.H. Peters, 1870b (Colubridae)

Synonym: *Scahphiophis* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type species: *Scaphiophis albopunctatus* W.C.H. Peters, 1870b.

Distribution: West, cen. and E Africa.

Sources: Loveridge, 1936c, 1955a, 1957a, Broadley, 1994 and Spawls et al., 2002.

1. *Scaphiophis albopunctatus* W.C.H. Peters, 1870b. Mber. Königl. Akad. Wiss. Berlin 70(8): 645–646, pl. 1, figs. 4, 4a–c.

Type: Holotype, ZMB 6945, a 352 mm specimen (Jahn).

Type locality: "Keta (Guinea)" [= Keta, ext. S Volta Region, ext. SE Ghana, 5°55'N, 0°59'E, elevation NSL].

Distribution: Central Africa. Guinea, Sierra Leone, S Ghana (Volta), S Togo (Plateau), Benin (Alibori, Atlantique, Borgou, Collines, Zou), Nigeria (Bauchi, Enugu, Kaysina, Kwara, Plateau), S Chad (Mayo-Kebbi Ouest), South Sudan (SW Eastern Equatoria), Cameroon (Adamaoua, Est, Centre, Extreme-Nord, Nord, Ouest, Sud, Sud-Ouest), Central African Republic (Bangui, Kemo-Grébizi, Ombella-Mpoko, Vakaga), Gabon, Congo (Brazzaville, Plateau), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa), SE Uganda (Eastern), S Burundi, N Tanzania (Dodoma, Mbeya, Mtwara, Mwanza, Rukwa, Shinayanga, Tabora), SE Kenya (Coast, S Eastern), ext. N Mozambique (N Niassa), N Angola (Lunda Norte) and N Zambia (Luapula, Northern), NSL–1475 m.

Sources: J.G. Fischer, 1885a, Rochebrune, 1885, Bocage, 1887, Mocquard, 1887c, Sternfeld, 1910d, Boulenger, 1915, Chabanaud, 1917b, K.P. Schmidt, 1923, Scortecci, 1930, Angel, 1933b, Laurent, 1950c, Villiers, 1951b, 1952b, 1963, 1965, 1966, 1975, Witte, 1953, 1962, 1966, Vesey-FitzGerald, 1958, 1975, Perret, 1961, Doucet, 1963, Thys van den Audenaerde, 1965, Bourgeois, 1968, Leston & Hughes, 1968, Hughes & Barry, 1969, Broadley, 1971d, 1994, Spawls, 1978, Stucki-Stirn, 1979, J.-F. Trape, 1981, Joger, 1982, 1990, N. Hedges, 1983, Hughes, 1983, 2013, Roman, 1984, Largen & Rasmussen, 1993, J.-F. Trape & Roux-Estève, 1995, Broadley et al., 2003, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008, Ullenburch et al., 2010 and Segniagbeto et al., 2011.

Remarks: Loveridge (1936c: 255) erroneously listed the type locality as Kita, Guinea, as clarified by Hughes & Barry (1969: 1018). Occurs in Mali *fide* Loveridge (1957a: 264) and Senegal and Gambia *fide* Rochebrune (1885: 163), and Guinea and Sierra Leone *fide* Chirio & LeBreton (2007: 546).

2. *Scaphiophis raffreyi* Bocourt, 1875. Ann. Sci. Nat. (Zool.) (6) 2(3): 1.

Synonym: *Scaphiophis calciatii* Scortecci, 1928.

Type: Holotype, MNHN 4331 (M.J.A. Raffray, 1874–1875).

Type locality: "Devatabar (Abyssimie), à une altitude d'environ 2500 mètres" [= Debere Tabor, Ethiopia, 11°51'N, 38°01'E, elevation 2500 m]

Distribution: Northeastern Africa. Southeastern South Sudan (Eastern Equatoria), W Eritrea (Anseba, Gash-Barka), W Ethiopia (Gemu Gofa, Gondar, Illubabor, Shoa, Wollega), NW Kenya (Rift Valley) and NE Uganda (Northern), 515–1760 (2500) m.

Sources: Scortecci, 1928, H.W. Parker, 1949, Pitman, 1974, Largen & Rasmussen, 1993, Spawls et al., 2002 and Largen & Spawls, 2010.

Remarks: Type locality (2500 m) might represent where it was dispatched rather than where it was captured *fide* Spawls et al. (2002: 369).

SCHWARTZOPHIS Zaher, Grazziotin, Cadle, Murphy, Moura-Leite & Bonatto, 2009 (Xenodontidae)

Type species: *Natrix callilaema* Gosse, 1851.
Distribution: Jamaica.
Sources: A. Schwartz & R.W. Henderson, 1991, R.W. Henderson & Powell, 2009 and Zaher et al., 2009.
Remarks: A valid genus *fide* Grazziotin et al., (2012:) but a synonym of *Hypsirhynchus fide* Hedges et al. (2009: 9) and *Darlingtonia fide* Crother, 1989.

1. *Schwartzophis callilaemum* (Gosse, 1851). Nat. Sojourn Jamaica: 384–385. (*Natrix callilaema*)

Type: Lectotype, BMNH 1946.1.5.90, a 157 mm specimen, designated by Buden (1966: 2).
Type locality: "Bluefields, Westmoreland Parish, Jamaica" [= vicinity of Bluefields (18°10'N, 78°01'W, elevation 125 m), Westmoreland Par., W Jamaica] via lectotype selection.
Distribution: Jamaica (Clarendon, Kingston & St. Andrews, Manchester, Portland, St. Catherine, St. Elizabeth, St. James, St. Mary, St. Thomas, Trelawny, Westmoreland), NSL–1000 m.
Source: Buden, 1966.

2. *Schwartzophis funereum* (Cope, 1862b). Proc. Acad. Nat. Sci. Philadelphia 14(1): 77. (*Alsophis funereus*)

Type: Neotype, USNM 12372 (formerly USNM 5778, paratype), a 378 mm male (C.B. Adams), designated by Buden (1966: 5).
Type locality: "Jamaica" via neotype selection.
Distribution: Jamaica (Clarendon, Hanover, Kingston & St. Andrews, Manchester, St. Ann, St. Catherine, St. Elizabeth, St. James, St. Mary, Trelawny, Westmoreland), NSL–610 m.
Source: Buden, 1966.
Remarks: Holotype (USNM 5779, Jamaica, C.B. Adams) lost *fide* Grant (1940: 125).

3. *Schwartzophis polylepis* (Buden, 1966). Breviora (238): 7–8. (*Dromicus polylepis*)

Type: Holotype, MCZ 81020 (formerly ASFS 13122), a 387 mm male (native collector, 19 June 1961).
Type locality: "Port Antonio, Portland Parish, Jamaica."
Distribution: Eastern Jamaica (Portland, Kingston & St. Andrews, St. Thomas), NSL–210 m.

SCOLECOPHIS Fitzinger, 1843 (Colubridae)

Synonym: *Scoleophis* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum).*
Synonyms: *Pseudoelaps* Fitzinger, 1826a *(nomen oblitum), Pseudelaps* Agassiz, 1847 *(nomen emendatum), Platycranion* Jan, 1863b, and *Pseudaelaps* – Senna, 1886 *(nomen incorrectum).*
Type species: *Calamaria atrocincta* Schlegel, 1837.
Distribution: Central America.
Sources: Jan & Sordelli, 1865 *in* 1860–1866, Salvin, 1860, 1861, Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, A.C.L.G. Günther, 1895 *in* 1885–1902, E.H. Taylor, 1951, Mertens, 1952c, L.C. Stuart, 1963, J.A. Peters & Orejas-Miranda, 1970, N.J. Scott et al., 1983, L.D. Wilson, 1983c, L.D. Wilson & Meyer, 1985, Savage & Villa, 1986, L.D. Wilson et al., 1986, Villa et al., 1988, Campbell & Vannini, 1989, G. Köhler, 1999b, 2001a–b, 2008, Savage, 2002, L.D. Wilson & Williams, 2002, Solórzano, 2004, G. Köhler et al., 2005, Kolby & Fraser, 2009, Lovich et al., 2010 and McCranie, 2011a.
Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Scolecophis* Fitzinger is designated a *nomen protectum* and *Pseudoelaps* Fitzinger a *nomen oblitum.*

1. *Scolecophis atrocinctus* (Schlegel, 1837). Essai Phys. Serp. 1: 134, 2: 47–48. (*Calamaria atrocincta*)

Synonym: *Elaps zonatus* Hallowell, 1854e.
Type: Holotype, MNHN 519, a 418–441 mm male (C. Gay, 1828–1837).
Type locality: "Chilé," (in error *fide* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909: 578). Corrected to Central America *fide* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard (1870–1909: 578).
Distribution: Central America. Guatemala (Baja Verapaz, Sacatepéquez), El Salvador (Ahuachapán, La Libertad, San Salvador, Santa Ana, Sonsonate), SW Honduras (Comayagua, Cortés, El Paraíso, Francisco Morazán, Lempira), W Nicaragua (Boaco, Estelí, Granada, Managua, Rivas, Ometepe Is.) and NW Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Puntarenas, San José), NSL–1140 m.
Remarks: Two syntypes sent from Chile by Gay *fide* Duméril, Bibron & Duméril (1854b: 864). L.C. Stuart (1963: 115) questioned the application of this name to the Central American taxon.

SEMINATRIX Cope, 1895b (Natricidae)

Type species: *Contia pygaea* Cope, 1871b.
Distribution: Southeastern USA.

Sources: Dowling, 1950, Martof, 1956, Rossman, 1956, Mount, 1975, Martof et al., 1980, Ashton & Ashton, 1988, Ernst & Barbour, 1989, Conant & Collins, 1991, Price, 1991, Dodd, 1993, Palmer & Braswell, 1995, Tennant, 1997, Dorcas et al., 1998, Alfaro & Arnold, 2001, Gibbons & Dorcas, 2004, Zaher et al., 2009 and Rheubert et al., 2010.

1. *Seminatrix pygaea* (Cope, 1871b). Proc. Acad. Nat. Sci. Philadelphia 23(2): 223–224. (*Contia pygaea*)

Synonyms: *Seminatrix pygaea cyclas* Dowling, 1950, and *Seminatrix pygaea paludis* Dowling, 1950.
Type: Holotype, ANSP 3533, a 226–229 mm male (E. Tatnall).
Type locality: "Volusia, Florida" [= National Gardens, Volusia County, NE Florida, elevation 10 m *fide* Carr & Goin, 1942: 48].
Distribution: Southeastern USA (ext. S cen. Alabama, Florida, SE Georgia, ext. E North Carolina, E South Carolina), NSL–150 m.

SENTICOLIS Dowling & Fries, 1987 (Colubridae)

Synonym: *Senclicolis* – Schulz, 1992e *(nomen incorrectum).*
Type species: *Coluber triaspis* Cope, 1866.
Distribution: Southwestern USA and Mesoamerica.
Sources: Bocourt, 1888 *in* A.H.A. Duméril, Bibron & Mocquard, 1870–1909, K.P. Schmidt & Andrews, 1936, L.C. Stuart, 1948, 1963, E.H. Taylor, 1951, Mertens, 1952c, Dowling, 1960, Webb, 1960, H. Campbell & Howell, 1965, Duellman, 1965, J.C. Lee, 1980, 1996, Stebbins, 1985, L.D. Wilson & Meyer, 1985, Savage & Villa, 1986, Dowling & Fries, 1987, Villa et al., 1988, Pérez-Higareda & Smith, 1991, Price, 1991, Garrett & Painter, 1992, Schulz, 1992d, Staszko & Walls, 1994, Degenhardt et al., 1996, Schultz, 1996, J.A. Campbell, 1998b, G. Köhler, 1999b, Rodrígues-Robles & Jesús-Escobar, 1999, Bartlett & Tennant, 2000, McCranie & Wilson, 2001b, Lemos-Espinal et al., 2004c, G. Köhler et al., 2005, Burbrink & Lawson, 2007, Dixon & Lemos-Espinal, 2010, Lovich et al., 2010, Ramírez-Bautista et al., 2010, McCranie, 2011a and Morales-Capellan et al., 2011.

1. *Senticolis triaspis* (Cope, 1866). Proc. Acad. Nat. Sci. Philadelphia 18(2): 128. (*Coluber triaspis*)

Synonyms: *Pityophis intermedius* Boettger, 1883b, *Coluber mutabilis* Cope, 1885a, *Coluber chlorosoma* A.C.L.G. Günther, 1894 *in* 1885–1902, and *Coluber polylepis* F. Werner, 1896c.
Type: Holotype, USNM 24903, a 451–455 mm male (D.B. Parsons).
Type locality: "Belize." Restricted to the vicinity of Belize [= Belize city, E Belize District, NE Belize, 17°30'N, 88°12'W, elevation NSL] *fide* H.M. Smith & Taylor (1950a: 316)
Distribution: Southwestern USA and Mesoamerica. Extreme SW USA (SE Arizona, ext. SW New Mexico), Mexico (Aguascalientes, Campeche, Chiapas, SW Chihuahua, Colima, Durango, Guerrero, Hidalgo, Jalisco, México, Michoacán, Morelos, Nayarit, Oaxaca, Puebla, Querétaro, Quintana Roo, San Luis Potosí, Sinaloa, E Sonora, S Tamaulipas, Veracruz, Yucatán, Zacatecas), Belize (Belize, Toledo), Guatemala (Alta Verapaz, Petén, Santa Rosa), Honduras (Choluteca, Colón, Cortés, El Paraíso, Francisco Morazán, Intibucá, Lempira, Ocotepeque, Yoro), W El Salvador (Ahuachapán, Cuscatlán, La Libertad, Santa Ana, Sonsonate), Nicaragua (Estelí, Granada, Managua, Matagalpa) and Costa Rica (Alajuela, NW Cartago, Guanacaste, Heredia, Puntarenas, San José), NSL–2425 m.
Remarks: Official Specific Name no. 2106 *fide* Opinion 745 (ICZN, 1965).

SIAGONODON W.C.H. Peters, 1881b (*nomen substitutum*) (Leptotyphlopidae)

Synonyms: *Catodon* A.-M.-C. Duméril & Bibron, 1844 *(nomen praeoccupatum), Catadontus* – Hoffmann, 1890 *(nomen incorrectum), Siagondon* – Bogert, 1930 *(nomen incorrectum),* and *Evanwhittonus* Hoser, 2012am *(nomen illegitimum).*
Type species: *Anguis septemstriatus* J.G. Schneider, 1801.
Distribution: South America.
Sources: J.A. Peters & Orejas-Miranda, 1970, Hahn, 1980a, Wallach, 1998b and McDiarmid et al., 1999.

1. *Siagonodon acutirostris* Pinto & Curcio, 2011. Copeia 2011(1): 58–61, figs. 5–6.

Type: Holotype, CHUNB 35648, a 216 mm female (22 Feb. 2004).
Type locality: "Brazil, state of Tocantins, municipality of Almas, 11°31'00"S, 47°09'00"W, ca. 397 m elevation."
Distribution: Central Brazil (E Tocantins), 400–590 m.

2. *Siagonodon borrichianus* (Degerbøl, 1923). Vidensk. Medd. Dansk Naturhist. Foren. København 76: 113–114, 3 figs. (*Glauconia borrichiana*)

Type: Holotype, ZMUC R539, a 185 mm specimen (Jensen-Haarup, 1905).
Type locality: "Santa Rosa, Mendoza, Argentina" [= Santa Rosa, N Mendoza Prov., cen. Argentian, 32°54'S, 68°46'W, elevation 700 m].
Distribution: West-central Argentina (La Pampa, La Rioja, Mendoza, Río Negro, San Juan), 240–770 m.

Sources: Freiberg, 1951, Miranda & Tio-Vallejo, 1985, Cei, 1986, J.D. Williams & Francini, 1991, Scolaro, 2006 and Pinto, 2010.

3. *Siagonodon cupinensis* (Bailey & Carvalho, 1946). Bol. Mus. Nac., Zool. (2) (52): 1–3, figs. 1–3. (*Leptotyphlops cupinensis*)

Type: Holotype, MNRJ 387, a 128 mm specimen (A.L. de Carvalho, Jan. 1940).

Type locality: "near the mouth of the Tapirapé River (tributary to the Araguaya), northeastern Mato Grosso" [= vicinity of Río Tapirapé and Río Araguaia junction, E Mato Grosso State, cen. Brazil, 14°07'S, 50°51'W, elevation 250 m].

Distribution: Northeastern South America. Northeastern Brazil (Amapa, NE Mato Grosso, N Rondônia) and Suriname (Marowijne), NSL–600 m.

Sources: Amaral, 1955b, Orejas-Miranda, 1966b, 1967, Hoogmoed, 1977 and Abuys, 2003.

Remarks: Holotype listed as MNRJ 377 *fide* Orejas-Miranda (1966c: 1).

4. *Siagonodon septemstriatus* (J.G. Schneider, 1801). Hist. Amph. 2: 341. (*Anguis septemstriatus*)

Synonyms: *Stenostoma septemstriatum* Jan & Sordelli, 1860 *in* 1860–1866, *Leptotyphlops septemstriata* Amaral, 1930e, *Leptotyphlos septemstriata* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Leptotyphlops tatacua* Briceño-Rossi, 1934.

Type: Holotype, ZMB 3876 (formerly MLH) (J.B. Lampe).

Type locality: Unknown. Designated as Suriname *fide* Hoogmoed (1977: 114).

Distribution: Northern South America. Southeastern Venezuela (Amazonas, Bolívar, Zulia), Guyana (Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Potaro-Siparuni), Suriname (Brokspondo, Marowijne, Nickerie, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), N Brazil (Amazonas, Maranhao, Pará, Rondônia, Roraima) and Bolivia (Tarija), 20–850 m.

Sources: Mertens, 1925, Amaral, 1955b, 1977, Roze, 1966a, Orejas-Miranda, 1967, Hoogmoed, 1977, Cunha & Nascimento, 1978, 1993, Fugler & Riva, 1990, Gorzula & Señaris, 1998, Starace, 1998, Kornacker, 1999, Bauer et al., 2002, Abuys, 2003, Börschig, 2007 and C.J. Cole et al., 2013.

Remarks: Type locality erroneously listed as Río Negro, Amazonia, Brasil *fide* Orejas-Miranda (1967: 426) and holotype erroneously listed in RMNH *fide* McDiarmid et al. (1999: 43). The holotype came from Lampe's collection, was donated by Gravenhorst to the Breslau Museum, which sent it to ZMB *fide* Hoogmoed (1977: 113).

5. *Siagonodon unguirostris* (Boulenger, 1902c). Ann. Mag. Nat. Hist. (7) 9(53): 338. (*Glauconia unguirostris*)

Type: Holotype, BMNH 1946.1.11.52 (formerly BMNH 1902.5.22.21), a 180 mm female (P.O. Simons, 1899–1901).

Type locality: "Cruz del Eje, Prov. Cordova, Argentina" [= Cruz del Eje, Córdoba Prov., Argentina, 30°43'S, 64°49'W, elevation 465 m].

Distribution: Northern Argentina (Buenos Aires, Catamarca, Chaco, Córdoba, Corrientes, Formosa, La Pampa, La Rioja, Río Negro, Salta, San Juan, San Luis, Santiago del Estero) and S Paraguay (Boquerón, Chaco), 75–1215 m.

Sources: Seríe, 1915, Abalos et al., 1964, Hulse, 1977, Laurent, 1984, Miranda & Tio-Vallejo, 1985, Cei, 1986, 1994, J.D. Williams & Francini, 1991, Kretzschmar, 1996, Leynaud & Bucher, 1999, Giraudo, 2001, Cabrera, 2004, Passos et al., 2006, Scolaro, 2006, Börschig, 2007 and Pinto & Curcio, 2011.

Remarks: Possibly occurs in Bolivian Chaco *fide* Leynaud & Bucher (1999: 11).

SIBON Fitzinger, 1826a (Dipsadidae)

Synonyms: *Sibynon* Fitzinger, 1843, *Sybinon* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum), Sibynum* Agassiz, 1847 *(nomen emendatum), Petalognathus* A.-M.-C. Duméril Bibron & Duméril, 1854a, *Mesopeltis* Cope, 1867b, *Pethalognathus* Marschall, 1873 *(nomen emendatum),* and *Asthenognathus* Bocourt, 1884 *(nomen rejiciendum).*

Type species: *Coluber nebulatus* Linnaeus, 1758.

Distribution: Latin America.

Sources: J.A. Peters, 1965, J.A. Peters & Orejas-Miranda, 1970, Kofron, 1980, 1985a, Cadle, 1984b, Villa et al., 1988, Savage & McDiarmid, 1992, Wallach, 1995b, McCranie, 2006, Cadle, 2007, Harvey et al., 2009, Zaher et al., 2009, Mulcahy et al., 2011 and Rovito et al., 2012.

1. *Sibon annulatus* (A.C.L.G. Günther, 1872b). Ann. Mag. Nat. Hist. (4) 9(49): 30. (*Leptognathus annulatus*)

Synonym: *Leptognathus pictiventris* Cope, 1875a.

Type: Holotype, BMNH 1946.1.20.81 (formerly BMNH 1871.11.22.14), a 440–445 mm specimen (native, 1871).

Type locality: "elevated country of Costa Rica, near Cartago" [= vicinity of Cartago (9°51'N, 83°55'W, elevation 1375 m), W Cartago Prov., cen. Costa Rica].

Distribution: Lower Central America and NW South America. Eastern Honduras (Colón, Gracias a Dios), N Nicaragua (Jinotega), E Costa Rica (Alajuela, E Cartago, Heredia, Limón, NW Puntarenas), Panama

(Bocas del Toro, Coclé, Darién,Veraguas) and Colombia (César), 15–1250 m.

Sources: A.C.L.G. Günther, 1894 *in* 1885–1902, Savage & Villa, 1986, Kofron, 1990, Savage & McDiarmid, 1992, G. Köhler, 1998b, 1999b, G. Köhler & Seipp, 1998, Savage, 2002, McCranie et al., 2003, 2007, G. Köhler et al., 2010, Moreno-Arias, 2010 and McCranie, 2011a.

Remarks: A synonym of *S. dimidiata* (Günther) *fide* Kofron (1990: 209).

2. *Sibon anthracops* (Cope, 1868b). Proc. Acad. Nat. Sci. Philadelphia 20(2): 108. (*Leptognathus anthracops*)

Synonym: *Sibynomorphus ruthveni* T. Barbour & Dunn, 1921.

Type: Holotype, ANSP 10135, a 499 mm female (R. Bridges via E.D. Cope).

Type locality: "Central America."

Distribution: Central America. Guatemala (Baja Verapaz), El Salvador (Cuscatlán, San Salvador), N Honduras (Francisco Morazán, Yoro), W Nicaragua (Carazo, Estelí, Managua) and NW Costa Rica (Alajuela, Guanacaste, N Puntarenas, San José), NSL–1300 m.

Sources: A.C.L.G. Günther, 1894 *in* 1885–1902, E.H. Taylor, 1954, Heyer, 1967, J.R. Meyer & Wilson, 1971, 1983, Hidalgo, 1979, N.J. Scott et al., 1983, L.D. Wilson & Meyer, 1985, Kofron, 1987, Savage, 2002, McCranie, 2007, 2011a and G. Köhler et al., 2010.

Remarks: Supplemental original description in Cope (1868c: 136). Holotype listed as ANSP 10134 *fide* Kofron (1987: 220). Colombia (Valle) record doubtful *fide* Harvey & Embert (2008: 105).

3. *Sibon argus* (Cope, 1875a). J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 130, pl. 27, fig. 1, pl. 28, fig. 7. (*Leptognathus argus*)

Type: Holotype, USNM 30656, a 345 mm male (W.M. Gabb, 1873–1875).

Type locality: "Sipurio, Costa Rica" [= Sipurio, SE Limón Prov., SE Costa Rica, 9°32'N, 82°55'W, elevation 200 m].

Distribution: Southeastern Costa Rica (Cartago, S Limón) and Panama (Coclé, Darién), NSL–800 m.

Sources: T. Barbour & Dunn, 1921, Kofron, 1987, Savage & McDiarmid, 1992, Savage, 2002, Solórzano, 2004 and G. Köhler et al., 2010.

Remarks: A synonym of *S. dimidiata* (A.C.L.G. Günther) *fide* Kofron (1990: 209).

4. *Sibon carri* (Shreve, 1951). Copeia 1951(1): 52. (*Tropidodipsas carri*)

Type: Holotype, MCZ 49797, a 411+ mm male (A.F. Carr, Jr., 16 Aug. 1945).

Type locality: "Escuela Agricola Panamericana, near Tegucigalpa, Honduras." Emended to Escuela Agricola Panamericana at El Zamorano, 66.5 km S of Tegucigalpa, S Francisco Morazán, S Honduras [14°01'N, 87°02'W, elevation 865 m] *fide* Hahn (1971: 111).

Distribution: Upper Central America. Guatemala (Baja Verapaz, Guastatoya, El Progreso, Zacapa), El Salvador (Cuscatlán, San Salvador) and S Honduras (Choluteca, Francisco Morazán, Intibucá, Valle), NSL–1200 m.

Sources: Mertens, 1952c, Hahn, 1971, J.R. Meyer & Wilson, 1971, L.D. Wilson, 1983c, Kofron, 1985b, L.D. Wilson & Meyer, 1985, G. Köhler, 1996b, G. Köhler et al., 2005 and McCranie, 2011a.

5. *Sibon dimidiatus* (A.C.L.G. Günther, 1872b). Ann. Mag. Nat. Hist. (4) 9(1): 31. (*Leptognathus dimidiatus*)

Synonyms: *Petalognathus multifasciatus* Jan *in* Bocourt, 1884, and *Leptognathus grandoculis* F. Müller, 1887.

Type: Holotype, BMNH 1946.1.20.97, a 432 mm female (1868–1871).

Type locality: "Mexico."

Distribution: Southern Mexico and Central America. Southern Mexico (Chiapas, Oaxaca, S Veracruz), Belize (Cayo, Toledo), Guatemala (Izabal, Petén, San Marcos, Suchitepéquez), El Salvador (Morazán), W Honduras (Copán, Cortés, Francisco Morazán, Gracias a Dios, Olancho, Yoro), cen. Nicaragua (Matagalpa) and W Costa Rica (Alajuela, Cartago, Guanacaste, Limón, Puntarenas, San José), NSL–1600 m.

Sources: A.C.L.G. Günther, 1894 *in* 1888–1902, L.C. Stuart, 1935b, H.M. Smith, 1943a, L.D. Wilson, 1983c, L.D. Wilson & Meyer, 1985, J.A. Campbell & Vannini, 1989, Kofron, 1990, Pérez-Higareda & Smith, 1991, Savage & McDiarmid, 1992, J.C. Lee, 1996, J.A. Campbell, 1998b, Savage, 2002, McCranie, 2007, 2011a, G. Köhler et al., 2010 and Marczak et al., 2010

6. *Sibon dunni* J.A. Peters, 1957b. Copeia 1957(2): 110–111.

Type: Holotype, UMMZ 92068, a 402 mm male (P. Hershkovitz, 10 June 1934).

Type locality: "Pimanpiro, San Nicholas, Province of Imbabura, Ecuador" [= Pimampiro, E Imbabura, N Ecuador, 0°23'N, 77°56'W, elevation 2150 m].

Distribution: Northern Ecuador (Cordillera Oriental of E Imbabura), 2150 m. Known only from type locality.

Sources: Duellman, 1979 and Kofron, 1990.

Remarks: Photograph of holotype in J.A. Peters (1960: pl. 7, fig. d).

7. *Sibon lamari* Solórzano, 2001. Rev. Biol. Trop. 49(3–4): 1111–1118, figs. 1–2.

Type: Holotype, UCR 13983, a 589 mm male (M. Solano & N. Solano, 7 Aug. 1998).

Type locality: "Guayacán de Siquirres, al noreste de la provincia de Limón (83°32'30"N y 10°02'10"NE), Costa Rica."
Distribution: Northeastern Costa Rica (Limón) and Panama (Boca del Toro, Colón), NSL–650 m.
Sources: Solórzano, 2004, McCranie, 2007, Jaramillo et al., 2008 and G. Köhler et al., 2010.

8. *Sibon linearis* Pérez-Higareda, López-Luna & Smith, 2002. Bull. Maryland Herp. Soc. 38(2): 62–64, figs. 1–4.

Type: Holotype, UNAM-LT 1796, a 311 mm female (G. Pérez-Higareda, Aug. 1983).
Type locality: "Balzapote, municipality of San Andrés Tuxtla, Veracruz, Mexico, 100 m" [= Balzapote, city of San Andres Tuxtla, S Veracruz, E Mexico, 18°27'N, 95°13'W, elevation 100 m].
Distribution: Eastern Mexico (S Veracruz), 100 m. Known only from type locality.
Source: McCranie, 2007.

9. *Sibon longifrenis* (Stejneger, 1909). Proc. U.S. Natl. Mus. 36(1681): 457–458. (*Mesopeltis longifrenis*)

Synonym: *Dipsas costaricensis* E.H. Taylor, 1951.
Type: Holotype, USNM 38750, a 488 mm female (F.E. Read).
Type locality: "Bocas del Toro, on a small island at one of the entrances to the Bay of Chiriqui, on the Atlantic side and near the western extremity of the Republic of Panama" [= Bocas del Toro Is., NW Bocas del Toro Prov., W Panama, ca. 9°23'N, 82°15'W, elevation NSL].
Distribution: Lower Central America. Honduras (Colón, Gracias a Dios, Olancho), Nicaragua (Jinotega), E Costa Rica (Alajuela, Cartago, Heredia, Limón) and Panama (Bocas del Toro, Coclé, Darién), NSL–800 m.
Sources: E.H. Taylor, 1951, Kofron, 1990, Savage & McDiarmid, 1996, McCranie et al., 2001, Savage, 2002, Solórzano, 2004, McCranie, 2006, 2011a, G. Köhler et al., 2010 and Travers et al., 2011.
Remarks: A synonym of *S. dimidiata* (A.C.L.G. Günther) *fide* Kofron (1990: 209).

10. *Sibon manzanaresi* McCranie, 2007a. Herpetologica 63(2): 213–216, figs. 1–2.

Type: Holotype, USNM 563364, a 407 mm male (T. Manzanares & J.R. McCranie, 27 May 2005).
Type locality: "San San Hil, 14°56.809'N, 84°30.715'W, 300 m elevation, Departamento de Gracias a Dios, Honduras."
Distribution: Northeastern Honduras (Gracias a Dios), 40–300 m.
Source: McCranie, 2011a.

S

11. *Sibon merendonensis* Rovito, Papenfuss & Vásquez-Almazán, 2012. Zootaxa (3206): 65–67, figs. 2–3.

Type: Holotype, MVZ 263880, a 687 mm female (S.M. Rovito & T.J. Papenfuss, 16 Jan. 2008).
Type locality: "Finca la Bendición, 4.0 km SE (by road) of soccer field at junction with road to Pinalito, then 7.6 km E (by road) of La Trementina, 14.93042ºN, 89.4167ºW (WGS84 Datum), 1364 m, Departamento Zacapa, Guatemala."
Distribution: Eastern Guatemala (Zacapa), 1365 m. Known only from holotype.

12. *Sibon miskitus* McCranie, 2006. J. Herp. 40(1): 16–18.

Type: Holotype, UF 142076, a 477 mm female (T. Manzanares & J.R. McCranie, 14 May 2004).
Type locality: "Warunta Tingni Kiamp, 14°55.559'N, 84°41.471'W, 150 m elevation, Departamento de Gracias a Dios, Honduras."
Distribution: Northeastern Honduras (Gracias a Dios), 35–300 m.
Source: McCranie, 2007, 2011a.

13. *Sibon nebulatus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 222. (*Coluber nebulatus*)

Synonyms: *Coluber sibon* Linnaeus, 1758, *Coluber variegatus* Hallowell, 1845a, *Leptognathus brevis* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Leptognathus affinis* J.G. Fischer, 1879, *Leptognathus leucomelas* Boulenger, 1896b, *Sibon nebulata hartwegi* J.A. Peters, 1960b, and *Sibon nebulata popayanensis* J.A. Peters, 1960b.
Type: Lectotype, NHR Lin-60 (formerly MAFR), a 640 mm specimen (Mus. Drottn.), designated by Andersson (1899: 19).
Type locality: "America" via lectotype selection. Restricted to Jicaltepec, Veracruz, Mexico *fide* H.M. Smith & Taylor (1950a: 349).
Distribution: Latin America. Southern Mexico (Campeche, Chiapas, Colima, Guerrero, Jalisco, México, Michoacán, Nayarit, Oaxaca, Quintana Roo, Tabasco, Veracruz, Yucatán), Guatemala (Alta Verapaz, Petén), Belize (Belize, Cayo, Orange Walk, Stann Creek, Toledo), El Salvador (Ahuachapán, Santa Ana), N Honduras (Atlántida, Copán, Cortés, Gracias a Dios, Olancho, Yoro), E Nicaragua (Atlántico Norte, Atlántico Sur, Boaco, Jinotega, Matagalpa, Río San Juan, Great Corn Is.), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Bocas del Toro, Chiriquí, Coclé, Colón, Darién, Panamá, Veraguas), Colombia (Antioquia, Bolívar, Boyaca, Cauca, Chocó, Cundinamarca, Magdalena, Meta, Nariño, Norte de Santander, Risaralda, Santander, Tolima, Valle, Vaupés), Venezuela (Amazonas, Anzoátegui, Apure, Aragua,

Barinas, Bolívar, Carabobo, Cojedes, Delta Amacuro, Distrito Federal, Falcón, Guárico, Lara, Mérida, Miranda, Monagas, Nueva Esparta, Portuguesa, Sucre, Táchira, Trujillo, Yaracuy, Vargas, Zulia, Margarita Is.), Trinidad and Tobago (Huevos, Tobago, Trinidad), Guyana (Barimi-Waini, Demerara-Mahaica, Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Demerara-Berbice), Suriname (Para, Paramaribo, Saramacca, Suriname), French Guiana (Cayenne), NW Ecuador (Carchi, Esmeraldas, Guayas, Imbabura, Los Rios, Napo, Pichincha) and N Brazil (Alagoas, Amapá, Amazonas, Bahia, Ceará, Maranhão, Pará, Roraima), NSL–2630 m.

14. *Sibon noalamina* Lotzkat, Hert & G. Köhler (2012). Zootaxa (3485): 27–32, figs. 1a–c, 2a–c, 3a–b.

Type: Holotype, SMF 91539 (formerly SL 775), a 546 mm male (A. Hertz & S. Lotzkat, 10 Aug. 2010).

Type locality: "headwaters of Río Chiriquí Malí, approximately 6.4 km NW Fortuna dam (8.7891°N, 82.2155°W, 1050 m), Bosque Palo Seco, Comarca Ngöbe-Buglé (formerly province of Bocas del Toro), Panama."

Distribution: Western Panama (Bocas del Toro, Veraguas), 1050–1260 m.

15. *Sibon perissostichon* G. Köhler, Lotzkat & Hertz, 2010. Herpetologica 66(1): 81–83, figs. 1–4.

Type: Holotype, SMF 88716, a 668 mm female (S. Lotzkat, 14 May 2008).

Type locality: "near Lost and Found Ecohostel, Reserva Forestal La Fortuna, 8º40.47' N, 82º12.97' W, 1434 m elevation, western Panama."

Distribution: Western Panama (Chiriquí), 1435 m.

16. *Sibon sanniolus* (Cope, 1867b). Proc. Acad. Nat. Sci. Philadelphia (1866) 18(4): 318. (*Mesopeltis sanniolus*)

Synonym: *Sibon neilli* R.W. Henderson, Hoevers & Wilson, 1977.

Type: Holotype, USNM 6564, a 279 mm (svl) male (A.C.V. Schott, 1865–1866).

Type locality: "Yucatan, Mexico."

Distribution: Yucanán Peninsula. Southeastern Mexico (N Campeche, E Quintana Roo, Yucatán), Belize (Belize, Corozal, Cayo, Toledo) and NE Guatemala (E Petén), NSL–750 m.

Sources: H.M. Smith, 1943c, Duellman, 1965a, R.W. Henderson & Hoevers, 1975, J.C. Lee, 1980, Kofron, 1983, C.J. McCoy, 1986, J.A. Campbell & Vannini, 1989, Weyer, 1990, J.A. Campbell, 1998b, Stafford & Meyer, 2000 and McCranie, 2007.

SIBYNOMORPHUS Fitzinger, 1843 (Dipsadidae)

Synonyms: *Anholodon* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Cochliophagus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Cochleophagus* – Marschall, 1873 *(nomen incorrectum), Pseudopareas* Boulenger, 1896a, *Sybinomorphus* – Amaral, 1926 *(nomen incorrectum), Pseudoparcas* – Gee, 1930 *(nomen incorrectum), Pseudopares* – Briceño-Rossi, 1934 *(nomen incorrectum), Sibinomorphus* – Briceño-Rossi, 1934 *(nomen incorrectum), Sibonnymorphus* – Dunn, 1944 *(nomen incorrectum),* and *Sibonomorphus* – Mattison, 1986 *(nomen incorrectum).*

Type species: *Dipsas mikanii* Schlegel, 1837.

Distribution: South America.

Sources: Ihering, 1911, J.A. Peters, 1960b, J.A. Peters & Orejas-Miranda, 1970, Carillo de Espinoza, 1974, Orcés & Almendáriz, 1989a, Scrocchi et al., 1993, Cadle, 2007, Harvey et al., 2009 and Zaher et al., 2009.

S

1. *Sibynomorphus inaequifasciatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 480–482. (*Cochliophagus inaequifasciatus*)

Type: Holotype, MNHN 3436, a 445 mm specimen (J.P. Verreaux, 1823–1854).

Type locality: "Amérique méridionale," possibly "provenant du Brésil" [= South America, possibly Brazil]. MNHN catalogue entry reads Amérique du Sud [= South America].

Distribution: South America (? Brazil). Known only from holotype.

Sources: Jan, 1863 and Jan & Sordelli, 1870–1881.

Remarks: Ihering (1911: 334) and J.A. Peters (960b: 147) suggested the type was an aberrant *S. mikani* (Schlegel) or *S. vagrans* Dunn.

2. *Sibynomorphus lavillai* Scrocchi, Porto & Rey, 1993. Rev. Brasil. Biol. 53(2): 200–204, figs. 1, 2b–c, 3a, 4a.

Type: Holotype, FML 2053 (formerly PT 441), a 554 mm female (F. Cruz, G. Perotti, O. Donadío & L. Fitzgerald, 16 Jan. 1988).

Type locality: "10 kilómetros al norte de Joaquín V. Gonzálezy 14.7 kilómetros al este del cruce de la ruta nacional 16 y la ruta provincial 30, sobre ruta 30. Departamento Anta. SALTA. Argentina" [= NE of Joaquín V. González, cen. Salta prov., N Argentina, ca. 25°02'S, 64°04'W, elevation 375 m].

Distribution: Southern South America. Brazil (Mato Grosso do Sul), Bolivia (Santa Crux, Tarija), N Paraguay (Alto Paraguay, Boquerón) and N Argentina (Chaco, Formosa, Jujuy, Salta, Santiago del Estero), 100–1190 m.

Sources: Lions & Alvarez, 1996a, Leynaud & Bucher, 1999, Cacciali, 2006 and Ferreira & Ávila, 2009.

Remarks: Probably occurs in Chaco of Paraguay *fide* Leynaud & Bucher (1999: 34).

3. *Sibynomorphus mikanii* (Schlegel, 1837). Essai Phys. Serp. 1: 162, 2: 277–278. (*Dipsas mikanii*)

Synonyms: *Leptognathus garmani* Cope, 1887c, and *Sibynomorphus mikani septentrionalis* Cunha, Nascimento & Hoge, 1980.

Type: Lectotype, NMW, specimen with 167 V + 46 SC (J. Natterer, 1817–1835), designated by J.A. Peters (1960b: 153).

Type locality: "Brésil" [= Brazil]. Restricted to SE Brazil *fide* J.A. Peters (1960b: 153).

Distribution: Southeastern Brazil (Bahia, Goiás, Maranhão, Mato Grosso, Minas Gerais, Pará, Paraná, Rio Grande do Norte, Rio Grande Grande do Sul, São Paulo), E Paraguay (Alto Paraná, Amambay) and NE Argentina (Misiones), 200–600 m.

Sources: Amaral, 1930a, 1977, Rosenberg, 1955, Barth, 1957, Hoge et al., 1975, 1981b, Cunha et al., 1980, Laporta-Ferreira et al., 1986, Lema, 1987, Freitas, 1999, Franca, 2003 and Cacciali, 2006, 2008.

S

4. *Sibynomorphus neuwiedi* (Ihering, 1911). Rev. Mus. Paulista 8: 333. (*Cochliophagus mikani neuwiedi*)

Synonym: *Sibynomorphus mikanii fasciatus* Amaral, 1930a.

Type: Holotype, not designated, MPSP.

Type locality: "Est. S. Paulo, Piquete, São Sebastião; Est. Espírito Santo, Rio Doce, Brazil" [= Piquete (22°37'S, 45°11'W, elevation 640 m) and São Sebastião (23°46'S, 45°25'W, elevation 40 m) E São Paulo State, and Rio Doce (21°06'S, 41°32'W, elevation 270 m) S Espírito Santo State, SE Brazil].

Distribution: Southeastern Brazil (Bahia, Espírito Santo, Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo, Cananéia, Cardoso, Grande, Santo Amaro, São Sebastião and São Vicente Is.), NSL–640 m.

Sources: Cunha et al., 1980, Hoge et al., 1981b, Laporta-Ferreira et al., 1986, Lema, 1987 and Cicchi et al., 2007.

5. *Sibynomorphus oligozonatus* Orcés & Almendáriz, 1989a. Politecnica, Biol. 14(3): 63–66, fig. 3.

Type: Holotype, EPN 3612, a 358 mm male (A. Almendáriz and field party).

Type locality: "Comuna Zhila (2.250 m.s.n.m.) (79°17' 26" W; 03°39'45" S.), parroquia Oña, Cantón Girón, provincia Azuay, Ecuador."

Distribution: Southwestern Ecuador (Azuay, Loja) and N Peru (Piura), 1440–2250 m.

Sources: Cadle, 2005, 2007.

Remarks: Possibly a synonym of *S. vagrans* (Dunn) *fide* Scrocchi et al. (1993: 205).

6. *Sibynomorphus oneilli* Rossman & Thomas, 1979. Occ. Pap. Mus. Zool., Louisiana St. Univ. (54): 1–5, figs. 1 (upper), 2 (upper).

Type: Holotype, LSUMZ 33736 (formerly JPO 5224), a 233 mm male (J.P. O'Neill, 8 Aug. 1975).

Type locality: "semiarid brushland (*ca*. 1645 m) NNE Balsas on the road to Abra Chanchillo, Departamento de Amazonas, Perú" [= between Balsas and Abra Chanchille, S Amazonas, NW Peru, ca. 6°50'S, 78°01'W, elevation 1645 m].

Distribution: Northwestern Peru (S Amazonas, Ancash, Cajamarca, La Libertad), 900–3500 m.

Sources: Rossman & Kizirian, 1993 and Cadle, 2005, 2007.

7. *Sibynomorphus petersi* Orcés-V. & Almendáriz, 1989a. Politecnica, Biol. 14(3): 58–62, fig. 1.

Type: Holotype, EPN 2659, a 763 mm male (A. Almendáriz et al.).

Type locality: "la comuna Zhila (2.250 m.s.n.m.,) 79°17'26" W, 03°39'45" S), perteneciente a la parroquia Oña, cantón Girón provincia Azuay, Ecuador."

Distribution: Southwestern Ecuador (Azuay, Loja) and N Peru (Ancash, Cajamarca), 1250–3120 m.

Sources: Cadle, 2005, 2007.

8. *Sibynomorphus turgidus* (Cope, 1868c). Proc. Acad. Nat. Sci. Philadelphia 20(2): 108, 136–137. (*Leptognathus turgida*)

Synonyms: ? *Leptognathus atypicus* Cope, 1874b, and *Tropidodipsas spilogaster* L.E. Griffin, 1916.

Types: Syntypes (2), USNM 5815a–b, 406 mm and 408 mm males (T.J. Page, Nov.–Dec. 1853).

Type locality: "Northern part of the Paraguay river" [= upper Paraguay River, Paraguay]. Emended to boundary of Brazil and Paraguay *fide* Cochran (1961: 192) and Paraguay *fide*

USNM catalogue and data tags [= upper Paraguay River, Presidente Hayes and Alto Paraguay Dept., N Paraguay, 20–24°S, 58°W, elevation 60–90 m].

Distribution: Southern South America. Bolivia (Cochabamba, La Paz, Santa Cruz, Tarija), S Brazil (S Mato Grosso, S Minas Gerais, Rio de Janeiro, Rio Grande do Sul, São Paulo), Paraguay (Alto Paraguay, Amambay, Boquerón, Caazapá, Central, Concepción, Itapúa, Paraguarí, Presidente Hayes, San Pedro, Modesto and Yacyretá Is.), N Argentina (Chaco, Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, Misiones, Salta, Santa Fe, Santiago del Estero, Tucumán) and NW Uruguay (Artigas, Paysandú, Rio Negro, Salto), 50–300 m.

Sources: Peracca, 1897, 1904a, Berg, 1898, 1901, Boulenger, 1898h, Koslowsky, 1898a, Lönnberg, 1902, Amaral, 1926, 1977, Serie, 1936, Freiberg, 1939, Vanzolini, 1948, Barth, 1957, Orejas-Miranda, 1958, Achaval, 1976, Fabián-Beurmann, 1977, Melgarejo, 1980, Meneghel & Melgarejo, 1984, Lema & Lema, 1987, Cabrera & Merlini, 1989, J.D. Williams & Francini, 1991, D.R. Norman, 1994, Yanosky et al., 1996, Leynaud & Bucher, 1999, Leynaud & Silmara-Carvantes, 2004, Carreira-Vidal et al., 2005 and Cacciali, 2006, 2008.

Remarks: Page Exped. traveled up the Parana as far as Corumba, Brazil (19°S, 57°45'W). *Leptognathus atypicus* Cope, 1874b is listed as *incertae sedis fide* Cadle (see 2007: 255–257 for discussion).

9. *Sibynomorphus vagrans* (Dunn, 1923b). Proc. Biol. Soc. Washington 36: 187–188. (*Pseudopareas vagrans*)

Type: Holotype, MCZ 17284, a 557–560 mm female (G.K. Noble [Harvard Peru. Exped.], 19–29 Sept. 1916).

Type locality: "Bellavista, in the low, broad and arid valley of the Marañon River, northwestern Peru" [= Bellavista, N Cajamarca Dept., NW Peru, 5°40' S, 78°41' W, elevation 500 m].

Distribution: Northwestern Peru (N Cajamarca), 500 m. Known only from type locality.

Sources: Duellman, 1979, Rossman & Thomas, 1979 and Cadle, 2005, 2007.

Remarks: Type locality listed as 1900 m *fide* Duellman (1979: 456).

10. *Sibynomorphus vagus* (Jan, 1863b). Elenco Sist. Ofidi: 101. (*Leptognathus vagus*)

Type: Holotype, formerly MSNM, a female, destroyed in 1943 during World War II.

Type locality: "Hong Kong" [China] (in error). Restricted to South America *fide* Cope (1868c: 136). Restricted to NW South America *fide* Dunn (1923b: 187).

Distribution: Northwestern Peru (Cajamarca, Lima, E Piura), 1810–1980 [3270] m.

Sources: Jan & Sordelli, 1870 *in* 1870–1881, Dunn, 1923b, Rossman & Thomas, 1979, Rossman & Kizirian, 1993, Aguilar et al., 2007 and Cadle, 2007.

Remarks: Holotype illustrated in Jan & Sordelli (1870 in 1870–1881, 3[37]: pl. 6, fig. 2).

11. *Sibynomorphus ventrimaculatus* (Boulenger, 1885b). Ann. Mag. Nat. Hist. (5) 16(92): 87–88. (*Leptognathus ventrimaculatus*)

Synonyms: *Leptognathus intermedius* Steindachner, 1903b, and *Heterorhachis poecilolepis* Amaral, 1923 & 1926a.

Types: Syntypes (2), BMNH 1946.9.7.29–30 (formerly BMNH 1885.6.26.32–33), a male and female, longest syntype 450 mm (H.F.I. von Ihering, 1880–1885).

Type locality: "S. Lorenzo, on the southern border of the Lagoa dos Patos, Province Rio Grande do Sul, Brazil." Emended to colony of São Lorenzo, Serra dos Tapes, Río Grande do Sul Province, Brazil [= São Lourengo do Sul, SE Rio Grande do Sul, ext. S Brazil, 31°22'S, 51°58'W, elevation NSL] *fide* J.A. Peters (1960b: 165). BMNH catalogue entry reads "San Lorenzo" and "Rio Grande do Sul."

Distribution: Southern South America. Southern Brazil (S Mato Grosso, Paraná, Rio Grande do Sul, São Paulo), S Paraguay (Amambay, Alto Paraná, Central, Cordillera, Itapúa, Misiones, Yacyretá Is.) and N Argentina (Corrientes, Formosa, Misiones, Santa Fe), NSL–630 m

Sources: Berg, 1901, Steindachner, 1903b, Bertoni, 1913, Amaral, 1930, 1977, Lema & Fabián-Beurmann, 1977, Lema, 1987, J.D. Williams & Francini, 1991, Lions & Alvarez, 1996b, Fernandes et al., 1998, Giraudo, 1999 and Cacciali, 2006, 2008.

12. *Sibynomorphus williamsi* Carrillo de Espinoza, 1974. Publ. Mus. Hist. Nat. Javier Prado, Zool. (24): 3–5, figs. 1–7.

Synonym: *Sibynomorphus williamsi* Carrillo-Tarazona, 1973 *(nomen ineditum)*.

Type: Holotype, MHNJP 2170 (formerly OF 492), a 530–545 mm male (A. Hoempler, 3 June 1969).

Type locality: "Jicamarca, Radio-Observatorio, Distrito Lurigancho, la región árida de la costa central, en la lomas cercanas, Provincia Lima, Departamento Lima, Peru, a una altitud de 300-500 m. sobre el nivel del mar" [= Jicamarca, cen. Lima Prov., W Peru, 11°57'S, 76°52'W, elevation 510 m].

Distribution: West-central Peru (Ancash, Lima), 300–2990 m.

Sources: Cadle, 2005, 2007.

Remarks: Photograph of holotype in Cadle (2007: fig. 40).

SIBYNOPHIS Fitzinger, 1843 (Sibynophiidae)

Synonyms: *Sybinophis* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum), Enicognathus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen praeoccupatum), Henicognathus* Cope, 1868 *(nomen praeoccupatum), Polyodontophis* Boulenger, 1890a *(nomen substitutum), Polyofontophis* – Sollas, 1906 *(nomen incorrectum), Sibonophis* – Steindachner, 1913b *(nomen incorrectum), Sibinophis* – Ditmars, 1931 *(nomen incorrectum), Polydontophis* – Maass-Berlin, 1933 *(nomen incorrectum), Sibynophys* – Ochomogo, 1957 *(nomen incorrectum), Enicognatus* – Guibé, 1958 *(nomen incorrectum), Sybynophis* – Picado, 1976 *(nomen incorrectum),* and *Sybynophis* – Nutaphand, 1991b *(nomen incorrectum).*

Type species: *Coluber geminatus* H. Boie, 1826.

Distribution: Southern, SE and E Asia and the East Indies.

Sources: Bourret, 1936b, M.A. Smith, 1943, Leviton & Munsterman, 1956, Morgan, 1973 and I. Das, 2010, 2012.

1. *Sibynophis bistrigatus* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 417–418. (*Ablabes bistrigatus*)

Type: Holotype, BMNH 1946.1.15.61, a 267 mm male (W. Theobald, Jr., 1862–1873).

Type locality: “Pegu” [= Bago, S Bago Div., S Myanmar, 17°20’N, 96°30’E, elevation 15 m].

Distribution: Eastern India (Andaman & Nicobars: Nicobar Is.) and S Myanmar (Bago), 15–300 m.

Sources: Theobald, 1868b, Boulenger, 1890a, Sclater, 1891b, Annandale, 1905a, Wall, 1923d, Biswas & Sanyal, 1980 and I. Das, 1994, 1999.

Remarks: Nicobar Is. record requires confirmation *fide* I. Das (2010: 300).

S

2. *Sibynophis bivittatus* (Boulenger, 1894d). Ann. Mag. Nat. Hist. (6) 14(80): 82–83. (*Polyodontophis bivittatus*)

Types: Syntypes (2), BMNH 1946.1.1.48–49, two males, longest syntype 490 mm (A.H. Everett, Nov. 1877–Jan. 1878).

Type locality: “Palawan” [= Palawan Is., SW Philippines].

Distribution: Southwestern Philippines (Busuanga, Culion, Dumaran, Palawan).

Sources: Boettger, 1898, L.E. Griffin, 1909b, 1911, J.C. Thompson, 1913a, E.H. Taylor. 1922a, Leviton, 1964a, Alcala, 1986 and Schoppe & Cervancia, 2009.

3. *Sibynophis chinensis* (A.C.L.G. Günther, 1889). Ann. Mag. Nat. Hist. (6) 4(21): 220–221. (*Ablabes chinensis*)

Synonyms: *Henicognathus sumichrasti* Bocourt, 1886 *(nomen suppressum), Ablabes sinensis* Boulenger, 1893 *(nomen emendatum), Polyodontophis grahami* Boulenger, 1904a, *Sibynophis hainanensis* K.P. Schmidt, 1925a, *Sibynophis collaris formosensis* Maki, 1931, *Sibynophis collaris parkeri* Mell, 1931a, and *Sibynophis chinensis miyiensis* Zhao & Kou *in* Zhao, 1987a.

Type: Holotype, not designated, a 500 mm specimen (A.E. Pratt, 1887–1889), location unknown.

Type locality: “Ichang, Upper Yangtsze-Kiang” [= Yichang, W Hubei Prov., cen. China, 30°42’N, 111°17’E, elevation 95 m].

Distribution: Southeastern Asia. Southern China (Anhui, Fujian, S Gansu, Guangdong, Guangxi, Guizhou, Hainan, Henan, Hong Kong, Hubei, Hunan, Jiangsu, Jiangxi, Shaanxi, Sichuan, Yunnan, Zhejiang, Lantau Is.), ext. S South Korea (Cheju Is.), Taiwan (Chiai, Pingtung, Taichung, Taipei) and N Vietnam (Bac Kan, Cao Bang, Gia Lai, Hoa Binh, Lao Cai, Ninh Binh, Quang Tri, Vinh Phuc), 95–2000 m.

Sources: Maki, 1931–b, Wu et al., 1985, Chen, 1991, Karsen et al., 1998, Lue et al., 1999, Orlov et al., 2000, Zhao, 2002, Captain et al., 2004, Zhao, 2006, San & Lee, 2007, Yang, 2008, V.S. Nguyen et al., 2009, Xiang & Li, 2009, Zhang, 2009, Li, 2011 and Yao, 2012.

Remarks: Official Specific Name no. 2092 fide Opinion 744 (ICZN, 1965b). A synonym of *S. collaris fide* Morgan (1973: 36).

4. *Sibynophis collaris* (Gray, 1853). Ann. Mag. Nat. Hist. (2) 12(72): 390. (*Psammophis collaris*)

Synonym: *Coluber colubrinus* Blyth *in* Sclater, 1891 (*nomen nudum*),

Type: Lectotype, BMNH 1946.1.1.51A (formerly BMNH 1853.8.12.34), an adult male (J.D. Hooker, May–Dec. 1850), designated by Kramer (1977: 747).

Type locality: “Khasi Hills” [= Khasi Hills, Meghalaya State, NE India, ca. 25°30’N, 92°00’E, elevation 1370–1675 m] via lectotype selection.

Distribution: Southeastern Asia. Southwestern China (Guangdong, SE Xizang, Yunnan), N India (Arunachal Pradesh, Assam, Himachal Pradesh, Manipur, Meghalaya, Nagaland, Sikkim, West Bengal), Nepal (Chitwan, Ilam, Kaski, Kathmandu, Makwanpur, Mustang, Myagdi, Sankhuwasabha), Bhutan, Myanmar (Bago, Rakhine, Sagaing, Shan, Yangon), Cambodia, N Laos (Houaphan, Phongsali, Xiangkhouang), S Vietnam (Bac Kan, Dien Bien, Dong Nai, Gia Lai, Ha Tinh, Lam Dong, Nghe An, Ninh Binh, Quang Binh, Quang Tri, Son Lai, Thua Thien-Hue), Thailand (Chiang Mai, Kanchanaburi, Loei, Nakhon Ratchasima, Phetchaburi, Trat, Udon Thani, Koh Chang Is.) and West Malaysia (N Pahang), NSL–3280 m.

Cox et al., 1998, Zug et al., 1998, Orlov et al., 2000, Schleich & Kästle, 2002, Ao et al., 2004, Captain et al., 2004, 2007, Whitaker & Captain, 2004, Yang, 2008, V.S. Nguyen et al., 2009, Li et al., 2010, Li, 2011 and Wangyal, 2011.

Remarks: Record from Hokkaido, Japan (Morgan, 1973) needs confirmation. Some of the above geographic records may belong to *S. chinensis* and/or *S. triangularis*.

5. *Sibynophis geminatus* (H. Boie, 1826). Isis von Oken 19(2): 211. (*Coluber geminatus*)

Synonyms: *Sibynophis geminatus maculatus* Angel, 1941.

Types: Syntypes (3), MNHN 3392–93, two males, and RMNH 687, a female (H. Kuhl & J.C. van Hasselt, Dec. 1820–Sept. 1823).

Type locality: "Java" [SW Indonesia]. Restricted to region of Mt. Pangerango and Mt. Salak, West Java, Indonesia *fide* Brongersma (1948b: 14). Emended to Tjihandjawar, at the foot of Mt. Pangerango, W. Java [= Cihanyawar, Nagrak, Jawa Barat, W Java, SW Indonesia, 07°03'S, 108°40'E] *fide* Brongersma (1950: 1499).

Distribution: Southwestern Indonesia (Bali, Java, Lombok, SE Sumatra), NSL–1300 m.

Sources: Gaulke, 1993a, 1994, David & Vogel, 1996 and McKay, 2006.

Remarks: Original description reprinted in H. Boie (1827b: 21–22).

6. *Sibynophis melanocephalus* (Gray, 1835 *in* Gray & Hardwicke, 1830–1835). Illust. Indian Zool. 2(19–20): pl. 83, fig. 2. (*Lycodon melanocephalus*)

Synonyms: *Lycodon catenatus* Gray, 1835 *in* Gray & Hardwicke, 1830–1835, *Herpetodryas prionotus* Cantor, 1839b, *Enicognathus javanicus* Bleeker, 1859b, *Enicognathus ornatus* Jan, 1863a, *Ablabes flaviceps* A.C.L.G. Günther, 1866, and *Sibynophis geminatus insularis* Mertens, 1927b.

Type: Holotype, BMNH 1946.1.17.76, a male (T. Hardwicke, 1756–1823).

Type locality: Unknown. Designated as Singapore ? *fide* Boulenger (1893a: 186) and Singapore *fide* Morgan (1973: 22).

Distribution: Southeast Asia and East Indies. Laos, Vietnam (Gia Lai), peninsular Thailand (Narathiwat, Pattani, Phang Nga), West Malaysia (Melaka, Pahang, Perak, Selangor, Terengganu, Tioman Is.), Singapore, East Malaysia (Sabah, Sarawak), Brunei, W Indonesia (Bulan, Bangka, Belitung, W Java, Natuna Arch., Nias, Siberut, S Sumatra, W Kalamantan, Weh) and ext. SW Philippines (Tawitawi), 100–1300 m

Sources: Flower, 1899, Ridley, 1899, T. Barbour, 1912, Rooij, 1917, M.A. Smith, 1926b, 1930a, Chasen & Smedley, 1927, Mertens, 1930, Bourret, 1935b, 1936b, 1939c, d, C. Haas, 1950, B.L. Lim, 1955, 1956, E.H. Taylor, 1965, Tweedie, 1983, K.F.L. Lim & Lee, 1989, K.K.P. Lim & Chou, 1990, M.J. Cox, 1991b, Stuebing, 1991, K.K.P. Lim & Lim, 1992, Gaulke, 1993a, David & Vogel, 1996, M.J. Cox et al., 1998, Malkmus et al., 2002, J.L. Grismer et al., 2003a, Orlov et al., 2003, Dehling, 2006 and V.S. Nguyen et al., 2009.

Remarks: Type locality designation by A.C.L.G. Günther (1858: 28) in error.

7. *Sibynophis sagittarius* (Cantor, 1839b). Proc. Zool. Soc. London 7(1): 49. (*Calamaria sagittaria*)

Synonym: *Enicognathus braconnieri* Jan, 1863b.

Type: Lectotype, BMNH 1860.3.19.1268, a male, designated by Kramer (1977: 747).

Type locality: "Tirhoot, Bengal" [= Tirhut, Muzaffarpur, N Bihar State, NE India, 26°07'N, 85°23'E, elevation 60 m] via lectotype selection.

Distribution: Southern Asia. Pakistan (Jammu & Kashmir), N India (Andhra Pradesh, Bihar, Himachal Pradesh, Kerala, Madhya Pradesh, Maharashtra, Orissa, Kerala, Tamil Nadu, Uttar Pradesh, West Bengal), Bhutan, Nepal (Bardiya, Chitwan, Dang, Mahottari, Nawalparasi, Parsa, Rupandehi) and Bangladesh, NSL–500 m.

Sources: A.C.L.G. Günther, 1864a, Wall, 1907d, 1921g, 1924, Swan & Leviton, 1962, Murthy, 1972c, 1985, 1986, 1990, Kramer, 1977, Murthy & Sharma, 1977b, M.A.R. Khan, 1988, Malhotra & Davis, 1991, Das & Palden, 2000, M.S. Khan, 2002, Captain et al., 2004, Whitaker & Captain, 2004 and Ahsan et al., 2009.

Remarks: Morgan (1973: 63) listed holotype as BMNH 1947.3.6.53 from Pinang, India.

8. *Sibynophis subpunctatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erp. Gén. 7(1): 58–59. (*Oligodon subpunctatum*)

Synonyms: *Coluber humberti* H. Boie in Schlegel, 1826a *(nomen nudum), Coluber humberti* Schlegel, 1826b *(nomen nudum), Oligodon spinaepunctatus* Jan, 1862b, *Enicognathus humberti* Jan, 1863b, *Enicognathus grayi* Jan, 1866 *in* Jan & Sordelli, 1860–1877, and *Sibynophis subpunctatus ceylonicus* P. Silva, 1969.

Type: Holotype, MNHN 3240 (J.-J. Dussumier, 1816–1840).

Type locality: "Malabar" [= India].

Distribution: Southern India (Andhra Pradesh, Madhya Pradesh, Maharashtra) and Sri Lanka (Central, Eastern, North-Western, Sabaragamuwa, Southern, Uva, Western), NSL–500 m.
Sources: K.P. Schmidt, 1926b, Deraniyagala, 1955, P. Silva, 1969, 1980a, A. Silva, 1990b, 2001, 2009, Captain et al., 2004, Whiatker & Captain, 2004, N. Khaire, 2006, Somaweera, 2006, Nande & Deshmukh, 2007 and Ahsan et al., 2009.
Remarks: A synonym of *S. sagittarius fide* Morgan (1973: 63). A valid species *fide* Captain et al. (2004: 92). Occurs in Bangladesh fide Ahsan et al. (2009: 148).

9. *Sibynophis triangularis* E.H. Taylor & Ebel, 1958. Univ. Kansas Sci. Bull. 31(13): 1130–1134, fig. 23. (*Sibynophis collaris triangularis*)

Type: Holotype, KU 33520, a 327 mm specimen (B. Lekagul, 18 Aug. 1953).
Type locality: "Nongko (village), Siracha (district), Chon Buri (province), Thailand."
Distribution: Eastern Thailand (Chanthaburi, Chaiyaphum, Chon Buri, Nakhon Ratchasima, Phetchaburi, Saraburi) and Cambodia (Mandolkiri), 500 m.
Sources: Captain et al., 2004, B.L. Stuart et al., 2006 and I. Das, 2010.

†*SIMOLIOPHIS* Sauvage, 1880b (†Pachyophiidae)

Synonyms: †*Symoliophis* Rochebrune, 1880 *(nomen emendatum),* †*Siniliophis* – Sauvage, 1880b *(nomen incorrectum),* †*Symoliopis* – Hoffmann, 1890 *(nomen incorrectum),* †*Symoliopsis* – Cope, 1898 *(nomen incorrectum),* †*Symoleophis* – Williston, 1925 *(nomen incorrectum),* †*Cimoliophis* Hoffstetter, 1960a *(nomen emendatum),* and †*Kimoliophis* Hoffstetter, 1960a *(nomen emendatum).*
Type species: †*Simoliophis rochebrunei* Sauvage, 1880a.
Distribution: Upper Cretaceous of Egypt, France, Libya, Morocco, Portugal and Spain.
Sources: Rage, 1984b, 1987, Nessov et al., 1998, Rage & Escuillié, 2003a–b, Bardet et al., 2008 and Vullo et al., 2011.
Remarks: Probably marine.

1. †*Simoliophis libycus* Nessov, Zhegallo & Averianov, 1998. Ann. Paléont. 84(3–4): 5, fig. 2, pl. 1, fig 2a–e.

Type: Holotype, ZIN PC 2/31, middle trunk vertebra.
Type locality: "Draa Ubari at the southern border of the Hamada Al-Khamra, southeast of the Gadames Oasis in western Libya. 'Unnamed' beds between the Thala and Mazuzah Members of the Mizdah Formation, Upper Cretaceous, Santonian-Campanian."
Distribution: Upper Cretaceous (Cenomanian: 93.9–100.5 mya) of Libya.
Source: Bardet et al., 2008.
Remarks: Probably Cenomanian age *fide* Rage & Cappetta, 2002.

2. †*Simoliophis rochebrunei* Sauvage, 1880a. C.R. Acad. Sci. 91: 672.

Synonym: †*Simoliophis delgadoi* Sauvage, 1898.
Type: Holotype, several middle trunk vertebrae from a 3000 mm specimen (T. de Rochebrune), lost *fide* Rage (1984b: 11).
Type locality: "île d'Aix, dans la Charente; l'étage carentonien, l'époque cénomanienne" [= Aix Island, W Charente-Maritime Prov., W France; upper Cretaceous, Cenomanian].
Distribution: Upper Cretaceous (Cenomanian: 93.9–100.5 mya) of France and Portugal.
Source: Vullo et al., 2011.
Remarks: Original description reprinted in Sauvage (1880b: 313 and 1881: 206). Vertebra illustrated in Vullo et al. (2011: figs. 6a–e).

SIMOPHIS W.C.H. Peters, 1860d (Colubridae)

Type species: *Heterodon rhinostoma* Schlegel, 1837.
Distribution: Brazil and Paraguay.
Sources: Bertoni, 1915, J.A. Peters & Orejas-Miranda, 1970 and Cacciali et al., 2009.

1. *Simophis rhinostomus* (Schlegel, 1837). Essai Phys. Serp. 1: 141, 2: 100–103, pl. 3, figs. 17–19. (*Heterodon rhinostoma*)

Synonyms: *Rhinostoma proboscidea* Fitzinger, 1826a (*nomen rejiciendum), Rhinostoma proboscidea* Fitzinger, 1843 (*nomen rejiciendum), Rhinostoma schlegelii* A.C.L.G. Günther, 1858, *Rhinaspis probocideus* Jan, 1863a, and *Rhinaspis rohdei* Boettger, 1885a.
Type: Holotype, ZMB 10602 (formerly MPB 249), a 935 mm specimen (J. Natterer, 1817–1835).
Type locality: "intérieur du Brésil" [= cen. Brazil].
Distribution: Southeastern Brazil (Bahia, Distrito Federal, Goiás, Mato Grosso, Mato Grosso do Sul, Minas Geráis, São Paulo, São Sebastião Is.) and Paraguay (Alto Paraná, Caaguazú), 180–1065 m.
Sources: Koslowsky, 1898, Vanzolini, 1948, P. Müller, 1968a, Amaral, 1978, Santos-Jordão & Fernandes-Bizerra, 1996, Argôlo, 1998c and Freitas, 1999.
Remarks: Official Specific Name no. 1970 *fide* Opinion 698 (ICZN, 1964). Holotype erroneously listed as ZISP 6658 *fide* Cacciali et al. (2009: 699). Cacciali et al., 2009 synonymized *S. rohdei* with *S. rhinostomus.*

SIMOSELAPS Jan, 1859a (Elapidae)

Synonyms: *Rhynchoelaps* Jan, 1858 (*nomen nudum*), *Rhynchelaps* Boulenger, 1896a *(nomen emendatum), Rhynchaelaps* – Longman, 1930 *(nomen incorrectum), Rimchelaps* – Briceño-Rossi, 1934 *(nomen incorrectum), Melwardia* Worrell, 1960, *Narophis* Worrell, 1961c, and *Simonelaps* – Mattison, 1986 *(nomen incorrectum).*
Type species: *Elaps bertholdi* Jan, 1859a.
Distribution: Australia.
Sources: Thomson, 1934, Kinghorn, 1964, Storr, 1968, 1985, 1986, Cogger et al., 1983a, Shine, 1984a, 1985a, Golay, 1985, Longmore, 1986, Scanlon & Shine, 1988, S.K. Wilson & Knowles, 1988, Gow, 1989, Hoser, 1989, 2012e, Hutchinson, 1990, Cogger, 1992, Clarke & How, 1995, Horner, 1998, Keogh et al., 1998, How & Shine, 1999, Scanlon & Lee, 2004, Sanders et al., 2008 and Zaher et al., 2009.

1. *Simoselaps anomalus* (Sternfeld, 1919). Senckenbergiana (1918) 1(3): 77–78. (*Rhynchelaps anomalus*)

Synonym: *Simoselaps anomala* – Hutchinson, 1990.
Type: Lectotype, SMF 20557 (formerly SMF-B 9362, 1a) (M. von Leonhardi, 1908), designated by Mertens (1922: 182).
Type locality: "Hermannsburg Central-Australien" [= Hermannsburg Mission, upper Finke River S of Maconnell Distributions, S Northern Territory, cen. Australia, 23°57'S, 132°46'E, elevation 575 m].
Distribution: Western Australia (SW Northern Territory, NW South Australia, N Western Australia), NSL–790 m.
Sources: Sternfeld, 1925, Waite, 1928, Thomson, 1934 and Storr, 1968, 1979.

2. *Simoselaps bertholdi* (Jan, 1859a). Rev. Mag. Zool. (2) 11: 123. (*Elaps* [*Simoselaps*] *bertholdi*)

Synonyms: *Elaps bertholdi* Jan, 1858b *(nomen nudum), Elaps mattozoi* Bethencourt-Ferreira, 1891, and *Furina robusta* De Vis, 1905.
Type: Holotype, ZMG 191A, a 200 mm specimen.
Type locality: "Australie" [= Australia]. Emended to Ile Adélaïde (Australie méridionale) [= Adelaide, SE South Australia, SE Australia, 34°56'S, 138°36'E, elevation NSL] *fide* Jan (1858: 518) and Perth, Western Australia (31°57'S, 115°51'E, elevation 15 m) *fide* Storr (1968: 82–83).
Distribution: Southwestern Australia (ext. S Northern Territory, South Australia, S Western Australia, Wallabi Is.), NSL–810 m.
Sources: Storr, 1965, 1979, Bush et al., 1995, 2007, Storr et al., 2002 and Bush & Maryan, 2011.
Remarks: Supplemental original description in Jan (1859e: pl. b, fig. no. 7).

3. *Simoselaps bimaculatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1240–1241. (*Furina bimaculata*) (*nomen corrigendum*)

Synonyms: *Furina bimaculata* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Furina bi-maculata* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen incorrigendum), Furina bimaculata* – A.-M.-C. Duméril, Bibron & Duméril, 1854c *(nomen corrigendum),* and *Brachysoma bimaculatum* – A.C.L.G. Günther, 1858.
Type: Holotype, MNHN 3942, a 340 mm specimen (J.P. Verreaux, 1844).
Type locality: "Tasmanie" [= Tasmania, Australia] (in error *fide* Storr, 1968: 85). Corrected to Perth, Australia *fide* Storr (1968: 85). Restricted to W Australia *fide* Boulenger (1896a: 407).
Distribution: Southwestern Australia (W South Australia, S Western Australia), 120–205 m.
Sources: Bush et al., 1995 and Storr et al., 2002.
Remarks: Basal sister taxon to *Brachyurophis* and *Simoselaps fide* Metzger et al. (2010: 409).

4. *Simoselaps littoralis* (Storr, 1968). J. Roy. Soc. West. Aust. (1967) 50(3): 84. (*Vermicella bertholdi littoralis*)

Type: Holotype, WAM 12770, a 110–199 mm male (R. Vollprecht, 16 Jan. 1958).
Type locality: "coastal dunes 7 miles south of Geraldton, Western Australia, in 28° 52' S, 114° 38' E, Australia."
Distribution: Extreme W Australia (ext. W Western Australia, Bernier, Dorre, Dirk Hartog, East Wallabi, Faure and West Wallabi Is.), NSL–220 m.
Sources: Storr, 1968 and Storr et al., 2002.

5. *Simoselaps minimus* (Worrell, 1960). West. Aust. Nat. 7(5): 132–133, figs. 1, 2a–c. (*Melwardia minima*)

Type: Holotype, AMS 16494 (formerly MW), a 175 mm specimen (M. Ward, 1945).
Type locality: "Broome in Western Australia" [= Broome, NW Western Australia, NW Australia, 17°57'S, 122°14'E, elevation NSL].
Distribution: Extreme NW Australia (NW Western Australia), 10–20 m.
Source: Storr, 1979.

SINOMICRURUS Slowinski, Boundy & Lawson, 2001 (Elapidae)

Synonym: *Funkelapidus* Hoser, 2012n *(nomen illegitimum).*
Type species: *Elaps macclellandi* J.T. Reinhardt, 1844.
Distribution: Southeastern and E Asia.

Sources: Shrestha & Majupuria, 1977, Golay et al., 1993, David & Ineich, 1999, Slowinski et al., 2001, Castoe et al., 2007a, Zaher et al., 2009 and Hoser, 2012e, n.

1. *Sinomicrurus hatori* (Takahashi, 1930). Terr. snakes Japan: 139–141 (unnumbered), 1 fig., col. pl. for species 65. (*Calliophis hatori*)

Type: Holotype, not designated, (formerly "Taiwan Library"), a 550 mm specimen (J. Hatori, 1905), lost *fide* Oshima (1920: 2).
Type locality: "Giran, Formosa" [= Yilan, Yilan Co., NE Taiwan, 24°45'N, 121°45'E, elevation 10 m].
Distribution: Northern and E Taiwan (Yilan), 10–1500 m.
Sources: J. Hatori, 1905, Oshima, 1920, Maki, 1931–b, Ota et al., 1999 and Xiang & Li, 2009.

2. *Sinomicrurus japonicus* (A.C.L.G. Günther, 1868). Ann. Mag. Nat. Hist. (4) 1(6): 428, pl. 17, fig. c. (*Callophis japonicus*)

Synonyms: *Callophis boettgeri* Fritze, 1894, and *Hemibungarus japonicus takarai* Ota, Ito & Lin, 1999.
Type: Holotype, BMNH 1946.1.17.97, a 241 mm specimen (Whitely).
Type locality: "Nagasaki" [Japan] (in error *fide* Boulenger, 1896a: 395). Corrected to Ryukyu Is. *fide* Stejneger (1907: 389).
Distribution: Southern Japan (Ryukyus: Akajima, Amamioshima, Amurojima, Fukajijima, Gerumajima, Gishifujima, Gushikawajima, Gusukujima, Hatejima, Iejima, Iheyajima, Izenajima, Kakeromajima, Kerumajima, Korijima, Kubajima, Kumejima, Kuroshima, Maejima, Nakajima, Nohojima, Okinawajima, Tokashikijima, Tokunoshima, Tonakijima, Ukejima, Yaguchijima, Yakabijima, Yanahajima, Yorojima and Zamamijima Is.).
Sources: Stejneger, 1907a, Maki, 1931, Takara, 1962, Nakamura & Ueno, 1963, Ota, 1991, Ota et al., 1999, Uchiyama et al., 2002 and Goris & Maeda, 2004.

S

3. *Sinomicrurus kelloggi* (C.H. Pope, 1928a). Amer. Mus. Novit. (320): 6. (*Hemibungarus kelloggi*)

Synonyms: *Calliophis wongii* Fan, 1931, and *Calliophis wongi tonkinensis* Bourret, 1935c.
Type: Holotype, AMNH 33744, a 774 mm female (C.H. Pope, 12 June–20 July 1925).
Type locality: "Kuatun, a village in the mountains of Ch'ungan Hsien, northwest Fukien Province, China" [= Guadun, in Wuyishan Mtns., ext. N Fujian Prov., SE China, 27°45'N, 117°50'E, elevation 900–1200 m].
Distribution: Southeastern China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Jiangxi, Sichuan), N Laos and N Vietnam (Cao Bang, Hai Duoag, Lai Chau, Lang Son, Son La, Vinh Phuc), 300–1500 m.
Sources: Zhao, 1998, 2006, Orlov et al., 2000, 2003, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.
Remarks: Supplemental original description in C.H. Pope (1929: 466–467, fig. 19).

4. *Sinomicrurus macclellandi* (J.T. Reinhardt, 1844). Calcutta J. Nat. Hist. 4: 532–534. (*Elaps macclellandi*)

Synonyms: *Elaps personatus* Blyth, 1854a, *Elaps univirgatus* A.C.L.G. Günther, 1858, *Calliophis annularis* A.C.L.G. Günther, 1864, *Callophis macclellandi nigriventer* Wall, 1909k, *Callophis macclellandi gorei* Wall, 1910c, *Callophis formosensis* J.C. Thompson, 1912, *Calliophis swinhoei* Van Denburgh, 1912a, *Calliophis macclellandi concolor* Wall, 1925d, *Calliophis macclellandi formosensis* Maki, 1931, *Calliophis macclellandi iwasakii* Maki, 1935, *Calliophis maclellandii univirgatus* – Kramer, 1977 *(nomen incorrectum), Calliophis macclellandi nepalensis* Shrestha & Majupuria, 1977, and *Calliophis maccellandi* – Shrestha & Majupuria, 1977 *(nomen incorrectum).*
Type: Holotype, ZMUC 65339, a 637 mm female (J. McClelland, 1835–1836).
Type locality: "Assam" [= Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram or Nagaland State, NE India].
Distribution: Northeastern India (Arunachal Pradesh, Assam, Himachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, North Bengal, Sikhim, West Bengal), Nepal (Chitwan, Ilam, Kaski, Kathmandu), Bhutan, Bangladesh (Sylhet), Myanmar (Bago, Kachin, Mandalay, Yangon), Thailand (Chachaengsao, Chiang Mai, Loei, Nakhon Ratchasima, Tak), Laos, Vietnam (Cao Bang, Dong Nai, Hai Duong, Ha Tay, Ha Tinh, Kon Tum, Lam Dong, Lao Cai, Phu Tho, Quang Binh, Quang Tri, Son Lai, Thanh Hoa, Thua Thien-Hue, Vinh Phuc), S China (Fukien, Gansu, Guangdong, Guangxi, Hainan, Hong Kong, Jiangsu, Jiangxi, Shaanxi, Lantau Is.), Taiwan, ext. S Japan (Ryukyus: Iriomotejima, Ishigakijima and Kohamajima Is.), 45–2485 m.
Sources: Stejneger, 1907a, Wall, 1918c, Takara, 1962, Kuntz, 1963, Nakamura & Ueno, 1963, E.H. Taylor, 1965, Deuve, 1970, Kramer, 1977, J. Lin, 1982, Karsen et al., 1986, 1998, M.J. 5. *Sinomicrurus sauteri* (Steindachner, 1913a). Anz. Akad. Wiss. 50(12): 219. (*Oligodon sauteri*)

Synonym: *Hemibungarus matsudai* Oshima, 1920.
Type: Holotype, NMW 23456, a 510 mm specimen (H. Sauter, 1912).

Type locality: "Formosa" [= Taiwan]. "Suishario" [= Shui-she-liao] *fide* Steindachner (1913b: 338) and NMW catalogue.
Distribution: Southern and cen. Taiwan, 180–300 m.
Sources: Maki, 1931–b, Wang & Wang, 1956, Kuntz, 1963, Tiedemann et al., 1994, Lue et al., 1998, Zhao, 1998, 2006, Ota et al., 1999 and Xiang & Li, 2009.

SINONATRIX Rossman & Eberle, 1977 (Natricidae)

Type species: *Tropidonotus annularis* Hallowell, 1856a.
Distribution: Southeastern Asia.
Sources: Stejneger, 1925, C.H. Pope, 1935, Rossman & Eberle, 1977, Hu et al., 1980, Tian et al., 1986, Zhao & Adler, 1993, Rao & Yang, 1998, Zhao, 1998, 2006 and I. Das, 2010, 2012.

1. *Sinonatrix aequifasciata* (T. Barbour, 1908). Bull. Mus. Comp. Zool. 51(12): 317. (*Natrix aequifasciata*)

Types: Syntypes (2), MCZ 7101a–b (A. Owston, 1906 via T. Barbour).
Type locality: "Mt. Wuchi, central Hainan" [= Mt. Wuzhishan, S Hainan Is., Hainan Prov., S China, 18°54'N, 109°42'E, elevation 1000–1800 m].
Distribution: Southern China (Fujian, Guangdong, Guangxi, Guizhou, Hainan, Hong Kong, Hunan, Jiangxi, Yunnan, Zhejiang), Myanmar, Laos (Bolikhamxay, Khammouan) and Vietnam (Bac Giang, Cao Bang, Ha Giang, Ha Tinh, Lang Son, Lao Cai, Naghe An, Vinh Phuc), 40–2000 m.
Sources: Stejneger, 1925, K.P. Schmidt, 1927, C.H. Pope, 1929, Fan, 1931, Bourret, 1936b, Romer, 1978, 1979a, Hu et al., 1980, Karsen et al., 1986, Tian et al., 1986, Huang et al., 1991, Ziegler & Quang, 2005, Bain et al., 2007, B.L. Stuart & Heatwole, 2008, V.S. Nguyen et al., 2009 and I. Das, 2010.
Remarks: Supplemental original description in T. Barbour (1909: 66–67, pl. 7, figs. 1–4).

2. *Sinonatrix annularis* (Hallowell, 1856a). Proc. Acad. Nat. Sci. Philadelphia (1856–1857) 8(4): 151–152. (*Tropidonotus annularis*)

Synonyms: *Tropidonotus chinensis* Jan *in* Berthold, 1859, *Tropidonotus semifasciatus* Berthold, 1859, and *Tropidonotus habereri* F. Werner, 1903a.
Type: Holotype, ANSP 6640, a 775 mm specimen (D.B. McCartee, 1844–1856).
Type locality: "Ningpo, China" [= Ningbo, E Zhejiang Prov., E China, 29°52'N, 121°33'E, elevation 10 m].
Distribution: Southeastern Asia. Myanmar, SE China (Anhui, Fujian, Guangdong, Guangxi, Hainan, Hebei, Hubei, Hunan, Jiangsu, Jiangxi, Hainan, Sichuan, Zhejiang) and Taiwan (Taichung, Taoyuan, Tainan, Taipei, Taitung), 10–1000 m.
Sources: A.C.L.G. Günther, 1864a, Wall, 1903, Stejneger, 1907a, Maki, 1931–b, Wang & Wang, 1956, Kuntz, 1963, B. Li, 1987, Lue, 1987, 1990, Lue et al., 1989, Zhao, 2006, Xiang & Li, 2009 and I. Das, 2010.
Remarks: Publication date Dec. 1856 *fide* Proc. ANSP, 1857, vol. 9(1) *contra* Malnate (1971: 362) and Zhao & Adler (1993: 374) who cited 1857.

3. *Sinonatrix percarinata* (Boulenger, 1899b). Proc. Zool. Soc. London 67(1): 163–164, pl. 17, fig. 2. (*Tropidonotus percarinatus*)

Synonym: *Natrix suriki* Maki, 1931.
Type: Holotype, BMNH 1946.1.15.15, a 500 mm male (J.D. La Touche, spring 1896 or 1898).
Type locality: "Kuatun, a village about 270 miles from Foochow, in the mountains at the North-west of the Province of Fokien, at an altitude of 3000 to 4000 feet or more, China" [= Guadun, in Wuyishan Mtns., ext. N Fujian Prov., SE China, 27°45'N, 117°50'E, elevation 900–1200 m].
Distribution: Eastern Asia. Northeastern India (Arunachal Pradesh), N Myanmar (Kachin), N Thailand (Chiang Mai, Loei), Laos (Bolikhamsai, Champasak, Huaphan, Phongsali, Xekong) Vietnam (Bac Giang, Bac Kan, Bac Ninh, Cao Bang, Dong Nai, Gia Lai, Ha Tinh, Hoa Binh, Lao Cai, Ha Giang, Lang Son, Phu Tho, Quang Binh, Quang Ninh, Son La, Thai Nguyen, Thua Thien-Hue, Vinh Phuc), SE China (Anhui, Fujian, S Gansu, Guangdong, Guangxi, Guizhou, Hainan, Henan, Hong Kong, Hubei, Hunan, Jiangsu, Jiangxi, Shaanxi, Sichuan, Yunnan, Zhejiang) and Taiwan (Pingtung), 90–2000 m.
Sources: Wall, 1903, Mell, 1922, M.A. Smith, 1923a, 1940, 1943, H.W. Parker, 1925a, Fan, 1931, Maki, 1931, Chang, 1932, 1934, Bourret, 1934a, 1934f, 1935b–c, 1936b, 1937a–b, 1939a–d, 1941b, 1944, Mao, 1965a, E.H. Taylor, 1965, Romer, 1974a, 1979a, Lue, 1987, 1990, Lue et al., 1989, M.J. Cox, 1991b, Captain & Patel, 1998, B.L. Stuart & Heatwole, 2008, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2012 and Yao, 2012.

4. *Sinonatrix yunnanensis* Rao & Yang, 1998. Russ. J. Herp. 5(1): 70–71, fig. 1.

Type: Holotype, KIZ 75II0191, a 440–498 mm specimen (native, 11 May 1975).
Type locality: "Dingpa of Jingdong County, Yunnan, altitude 1700 m, China."
Distribution: Southeastern Asia. Northern Myanmar (Kachin), N Thailand (Chiang Rai) and S China (Yunnan), 450–2000 m.
Sources: Pauwels et al., 2009 and I. Das, 2010, 2012.

SINOVIPERA P. Guo & Wang, 2011 (Viperidae)

Type species: *Sinovipera sichuanensis* P. Guo & Wang, 2011.

Distribution: China.

1. *Sinovipera sichuanensis* P. Guo & Wang, 2011. Zootaxa (2918): 9–12, figs. 3, 4a–c.

Type: Holotype, YBU 71077, an 1080 mm female (native, Aug. 2007).

Type locality: Hejiang County, Sichuan Province, China. It was collected near a small river in the forest, elevation 1000 m."

Distribution: Southwestern China (Sichuan), 1000 m. Known only from type locality.

Remarks: Probably occurs in Chongquing and Guizhou, China *fide* P. Guo & Wang (2011: 12).

SIPHLOPHIS Fitzinger, 1843 (Xenodontidae)

Synonyms: *Lycodon* H. Boie *in* F. Boie, 1827 (*nomen praeoccupatum*), *Tripanurgos* Fitzinger, 1843, *Siphlopis* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum), Trypanurgos* Tschudi, 1845 *(nomen emendatum), Tripanurgus* Agassiz, 1847 *(nomen emendatum), Lycognathus* A.-M.-C. Duméril, 1853, *Lycognatus* – Rochebrune, 1885 *(nomen incorrectum), Tympanurgas* – Palacky, 1898 *(nomen incorrectum), Tympanurgos* – Palacky, 1898 *(nomen incorrectum), Licognathus* – Briceño-Rossi, 1934 *(nomen incorrectum), Tripanurgo* – Briceño-Rossi, 1934 *(nomen incorrectum), Callopistria* Amaral, 1935a, *Alleidophis* Prado, 1940a, *Calliopistria* – Hoge, 1964c *(nomen incorrectum), Lycognthus* – Hoge, 1964c *(nomen incorrectum), Lyucognathus* – Hoge, 1964c *(nomen incorrectum), Sophlophis* – Hoge, 1964c *(nomen incorrectum),* and *Syphlophis* – Leviton, 1965 *(nomen incorrectum).*

Type species: *Coronella cervina* Laurenti, 1768.

Distribution: Lower Central America and South America.

Sources: Hoge, 1964c, Bailey *in* J.A. Peters & Orejas-Miranda, 1970, Zaher & Prudente, 1999, Costa-Prudente et al., 1998 and Zaher et al., 2009.

Remarks: *Tripanurgos* a valid genus *fide* Vidal et al., 2000.

S

1. *Siphlophis cervinus* (Laurenti, 1768). Synop. Rept.: 88. (*Coronella cervina*)

Synonyms: *Coluber zeylonicus* Gmelin, 1789, *Coluber audax* Daudin, 1803c, *Coluber maximiliani* Merrem, 1820, *Natrix pardalis* Wagler, 1825 (*nomen ineditum*), *Lycognathus scolopax* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Clelia euprepa* L.E. Griffin, 1916, and *Drepanodon attenuatus* T. Barbour & Noble, 1921.

Type: Lectotype, specimen described and illustrated by Seba (1735: 84, pl. 79, fig. 3), designated herein.

Type locality: "America" via lectotype selection.

Distribution: Panama and N South America. Eastern Panama (Canal Zone, Colón, Darién, Panamá, Barro Colorado Is.), Colombia (Amazonas, Chocó, Vaupés), Trinidad and Tobago (Trinidad), SE Venezuela (Amazonas, Bolívar), Guyana (Demerara-Mahaica), Suriname (Brokopondo, Saramacca), French Guiana (Cayenne), Brazil (Amapá, Amazonas, W Maranhão, Mato Grosso, Pará, Rondônia, Roraima, São Paulo), E Ecuador (Napo, Pastaza, Sucumbios), E Peru (Cusco, Loreto, Madre de Dios) and E Bolivia (Santa Cruz), NSL–915 m.

2. *Siphlophis compressus* (Daudin, 1803c). Hist. Nat. Rept. 6: 247–248. (*Coluber compressus*)

Synonym: *Coluber leucocephalus* Mikan, 1820 *in* 1820–1825.

Type: Holotype, MNHN 3730.

Type locality: "la colonie hollandaise de Suriname" [= Suriname].

Distribution: Lower Central America and Amazonia. Costa Rica (Puntarenas, San José), Panama (Canal Zone, Chiriquí), Trinidad and Tobago (Trinidad), Colombia (Amazonas, Boyacá, Casanare, Cauca, Chocó, Meta, Putumayo, Santander, Valle de Cauca, Vaupés), Venezuela (Amazonas, Anzoátegui, Bolívar, Delta Amacuro, Monagas, Sucre), Guyana (Barima-Waini, Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Demerara-Berbice), Suriname (Para), SE French Guiana (S Cayenne), Ecuador (Esmeraldas, Napo), Brazil (Amapá, Amazonas, Bahia, Espinto Santo, Mato Grosso, Pará, Rio de Janeiro, Rondônia, Roraima, São Paulo, Sergipe), Peru (Amazonas, Loreto, Madre de Dios, San Martin) and Bolivia (Santa Cruz), NSL–190 m.

Cole et al., 2013.

Remarks: Transferred from *Tripanurgos fide* Zaher & Prudente, 1999.

3. *Siphlophis leucocephalus* (A.C.L.G. Günther, 1863a). Ann. Mag. Nat. Hist. (3) 11(61): 23. (*Leptodira leucocephala*)

Type: Holotype, BMNH 1946.9.7.25, a 796 mm male (O.E.H. Wucherer, 1859–1860).
Type locality: "Bahia" [= Salvador, E Bahia, E Brazil, 12°59'S, 38°31'W, elevation NSL].
Distribution: Eastern Brazil (Bahia, Goiás, Minas Gerais), NSL–10 m.

4. *Siphlophis longicaudatus* (Andersson, 1901). Bihang Kon. Svenska Vet.-Akad. Handl. (4) 27(5): 17–18, pl. 2, figs. 9–11. (*Tropidodipsas longicaudata*)

Synonym: *Siphlophis cinereus* Lema, 1964.
Type: Holotype, NHR, a 920 mm female (Touzet, 1862 via Hyltén-Cavallius).
Type locality: "Brasilia" [= Brazil].
Distribution: Southeastern Brazil (Espírito Santo, Minas Gerais, E Rio de Janeiro, Rio Grande do Sul, E São Paulo), 65–900 m.
Sources: Marques et al., 2001, 2004 and Prudente & Feio, 2001.

5. *Siphlophis pulcher* (Raddi, 1820). Mem. Math. Fis. Soc. Ital. Sci. Modena 18(2): 337–338. (*Coluber pulcher*)

Synonyms: *Lycognathus geminatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Oxyrhopus rhombeatus* W.C.H. Peters, 1863c, and *Callopistria rubrovertebralis* Amaral, 1935a.
Type: Holotype, IRMC (G. Raddi, 1817–1818).
Type locality: "vicinanze di Rio-Janeiro, Brasile" [= Rio de Janeiro, S Rio de Janeiro State, SE Brazil, 22°54'S, 43°13'W, elevation 15 m].
Distribution: Southeastern Brazil (Bahia, S Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, E São Paulo, Búzios, Cannanéia, Grande, Santo Amaro, São Sebastião and São Vicente Is.), NSL–50 m.
Sources: Amaral, 1935a, 1977, Freitas, 1999, Marques et al., 2001, 2004, Duarte Roche & Van Sluys, 2006 and Cicchi et al., 2007.

6. *Siphlophis worontzowi* (Prado, 1940a). Mem. Inst. Butantan (1939) 13: 5–6, pl., 4 figs. (*Alleidophis worontzowi*)

Type: Holotype, IB 10062, an 885 mm male (C. Worontzow, Feb. 1937), destroyed by fire 15 May 2010.
Type locality: "rio Amana, na confluencia deste com o rio Parauarí, a sudeste do Estado do Amazonas, Brasil" [= Amana River, near its confluence with the Parauarí River (4°23'S, 57°35'W, elevation 25 m), E Amazonas, N Brazil].
Distribution: Northwestern Brazil (Amazonas, Mato Grosso, Pará, Rondônia), 25–240 m.
Sources: A.P. Santos, 2003 and Costa et al., 2010a.

SISTRURUS S.W. Garman, 1884 (Viperidae)

Synonyms: *Crotalophorus* Gray, 1825, *Caudisona* Fitzinger, 1826a, †*Neurodromicus* Cope, 1873, *Crotolophorus* – W.H. Smith, 1882 *(nomen incorrectum), Systrurus* – Cope, 1887c *(nomen incorrectum),* †*Neurodromus* – Hoffmann, 1890 *(nomen incorrectum), Sistruras* – Crouse, 1902 *(nomen incorrectum),* and *Sisturus* – Gharpurey, 1962 *(nomen incorrectum).*
Type species: *Crotalus miliarius* Linnaeus, 1766.
Distribution: Central and E North America and N Mexico.
Fossil records: Upper Miocene to upper Pleistocene of E USA. Fossils unassigned to species include upper Miocene (Clarendonian) of USA (Nebraska).
Sources: Gloyd, 1940, Brattstrom, 1964, Klauber, 1972, Harris & Simmons, 1978b, Stille, 1987, J.A. Campbell & Lamar, 1989, Maes, 1989, Minton, 1992, A. Knight et al., 1993, Rubio, 1998, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Holman, 2000a, Castoe & Parkinson, 2006, Parmley & Holman, 2007, Parmley & Hunter, 2010, Ernst & Ernst, 2011, Kubatko et al., 2011 and Hoser, 2012f.
Remarks: *Sistrurus ravus* is now in the genus *Crotalus.*

1. *Sistrurus catenatus* (Rafinesque-Schmaltz, 1818b). Amer. Month. Mag. Crit. Rev. 4(1): 41. (*Crotalinus catenatus*)

Synonyms: *Crotalus tergeminus* Say *in* E. James, 1823, *Crotalophorus edwardsii* Baird & Girard, 1853, *Crotalophorus consors* Baird & Girard, 1853, †*Neurodromicus dorsalis* Cope, 1873, and *Caudisona tergemina* – Cope, 1875c.
Type: Neotype, USNM 526, an 830 mm specimen, designated by Crother et al. (2011a: 273) in petition to ICZN.
Type locality: "Poland, Mahoning County, Ohio, USA" via neotype selection.
Distribution: Western and S USA (ext. SE Arizona, SE Colorado, SW Iowa, Kansas, N and E Missouri, SE Nebraska, S New Mexico, cen. Oklahoma, Texas) and ext. NE Mexico (N Coahuila, S Nuevo León), NSL–1650 m.
Fossil records: Middle Pliocene (Blancan II, III) of USA (Kansas, Texas), upper Pliocene (Blancan V) of USA (Kansas, Nebraska), middle Pleistocene (Irvingtonian II) of USA (Nebraska), middle/upper Pleistocene (Irvingtonian II) of USA (West Virginia), and upper Pleistocene (Rancholabrean I) of USA (Kansas).
Sources: Gloyd, 1955a, P. Anderson, 1965, Fowlie, 1965, Webb, 1970, Stebbins, 1985, B. Johnson & Menzies, 1993, Hammerson, 1999, Werler & Dixon, 2000, Holycross et al., 2008, C.D. Anderson et al., 2009, Gibbs et al., 2011 and Kubatko et al., 2011.

Remarks: Holotype lost *fide* Holycross et al. (2008: 421). Type locality restrictions to vicinity of Kansas City, Missouri [USA] by K.P. Schmidt (1953a: 226) and to "flood plains of the Missouri River, between the mouth of the Platte River and Nebraska City, Nebraska," *fide* Holycross et al. (2008: 422–423) invalid. Possibly occurs in NE Sonora, Mexico *fide* Bogert and Oliver (1945: 417) and NW Chihuahua and N Tamaulipas, Mexico *fide* Minton (1983: 332.1). Durango, Mexico record needs confirmation *fide* Campbell & Lamar (1989: 374).

2. *Sistrurus messasaugus* (Kirtland *in* Mather, 1838). Second Ann. Rep. Geol. Surv. State Ohio: 190. (*Crotalus messasaugus*)

Synonyms: *Crotalophorus kirtlandi* Holbrook, 1842a, and *Crotalus messaugus* – Golay, Smith, Broadley, Dixon, McCarthy, Rage, Schätti & Toriba, 1993 *(nomen incorrectum).*
Type: Holotype, not designated, a 665 mm specimen, location unknown.
Type locality: "Ohio" [USA].
Distribution: Extreme SE Canada (SE Ontario), cen. and NE USA (Illinois, N Indiana, E Iowa, Michigan, ext. SE Minnesota, W and cen. New York, N and cen. Ohio, ext. W Pennsylvania, S Wisconsin), NSL–1650 m.
Sources: B. Wright, 1941, Breckenridge, 1944, Logier & Toner, 1961, P.W. Smith, 1961, P. Anderson, 1965, H.M. Smith et al., 1965, Froom, 1972, Minton, 1972, 1983, R.C. Vogt, 1981, Cook, 1984, Ernst & Barbour, 1989, Harding, 1997 and Gibbs et al., 2011.

3. *Sistrurus miliarius* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 372. (*Crotalus miliarius*)

Synonyms: *Crotalus miliaris* Palisot de Beauvois, 1799 *(nomen emendatum), Caudisona miliaria* – Fitzinger, 1826a, *Sistrurus miliarius barbouri* Gloyd, 1935, and *Sistrurus miliarius streckeri* Gloyd, 1935.
Type: Holotype, a male (A. Garden, 1760–1761), lost *fide* Palmer (1978: 220.1).
Type locality: "Carolina" [USA]. Restricted to vicinity of Charleston, South Carolina *fide* Klauber (1948: 6).
Distribution: Southeastern and S cen. USA (Alabama, Arkansas, Florida, Georgia, ext. SW Kentucky, Louisiana, Mississippi, S Missouri, S and SE North Carolina, E Oklahoma, South Carolina, W Tennessee, E Texas), NSL–500 m.
Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Florida).
Sources: Martof, 1956, Mount, 1975, Palmer, 1978, Christman, 1980, Martof et al., 1980, T.R. Johnson, 1987, 2000, Ashton & Ashton, 1988, Dundee & Rossman, 1989, Ernst & Barbour, 1989, Conant & Collins, 1991, Palmer & Braswell, 1995, Werler & Dixon, 2000, Kubatko et al., 2011 and Snellings, 2012.

S

Remarks: *Sistrurus barbouri* possibly a valid species *fide* Kubtko et al., 2011.

†*SIVAOPHIS* Head, 2005 (Colubridae)

Type species: †*Sivaophis downsi* Head, 2005.
Distribution: Miocene of Pakistan.
Source: Head, 2005.

1. †*Sivaophis downsi* Head, 2005. Palaeont. Electron. 8(1): 20–21, figs. 10a.1–5.

Type: Holotype, H-GSP 49661, one trunk vertebra (E.H. Linday & W.R. Downs III).
Type locality: "Y-227 (9.29 Ma), Potwar Plateau of north-central Pakistan; Dhok Pathan Formation, Winnewala, Miocene."
Distribution: Middle Miocene (6.3–13.6 mya) of Pakistan.

SONORA Baird & Girard, 1853 (Colubridae)

Synonym: *Procinura* Cope, 1879.
Type species: *Sonora semiannulata* Baird & Girard, 1853.
Distribution: Southwestern USA and N Mexico.
Fossil records: Upper Pleistocene and Holocene of SW USA.
Sources: Stickel, 1943, H.M. Smith & Taylor, 1945, Heringhi, 1966, Frost & Van Devender, 1979, Holman, 1995b, 2000a and C.L. Cox et al., 2012.
Remarks: *Procinura* a synonym of *Sonora fide* C.L. Cox et al., 2012.

1. *Sonora aemula* (Cope, 1879). Proc. Amer. Philos. Soc. (1878–80) 18: 262. (*Procinura aemula*)

Type: Holotype, ANSP 11641, a 364 mm male (E. Wilkinson, Jr., 1873–1875).
Type locality: "Batopilas, in Southern Chihuahua, on the western side of the water shed of the Cordilleras on the upper waters of a tributary of the Rio Fuerte" [= Batopilas, SW Chihuahua, NW Mexico, 27°01'N, 107°44'W, elevation 575 m].
Distribution: Northwestern Mexico (ext. SW Chihuahua, Sinaloa, SE Sonora), NSL–1680 m.
Sources: Bogert & Oliver, 1945, Zweifel & Norris, 1955, McDiarmid et al., 1976, Webb, 1984 and H.M. Smith et al., 2006.
Remarks: This species should be in the genus *Procinura fide* Lemos-Espinal et al., 2004b.

2. *Sonora michoacanensis* (Dugès *in* Cope, 1885b). Proc. Amer. Philos. Soc. (1884) 22: 178–179. (*Contia michoacanensis*)

Synonym: *Sonora erythrura* E.H. Taylor, 1937b.

Type: Neotype, BMNH 1946.1.14.65 (formerly BMNH 1903.3.21), a 195 mm male (A.A.D. Dugès, 1853–1885), designated by Stickel (1943: 113).
Type locality: "Michoacan, Mexico," via neotype selection. Restricted to Apatzingán, Michoacán, Mexico *fide* H.M. Smith & Taylor (1950a: 335).
Distribution: Southwestern Mexico (Colima, Guerrero, Michoacán, Morelos, Puebla), NSL–2500 m.
Sources: E.H. Taylor, 1937b, Zweifel, 1959b, Duellman, 1961, Echternacht, 1973, Benitez-Gálvez, 1997 and Lamar, 1997b.
Remarks: Holotype lost *fide* H.M. Smith & Necker (1943: 185).

3. *Sonora mutabilis* Stickel, 1943. Proc. Biol. Soc. Washington 56: 116–17. (*Sonora michoacanensis mutabilis*)

Synonym: *Sonora aequalis* H.M. Smith & Taylor, 1945.
Type: Holotype, FMNH 105257 (formerly EHT-HMS 4661), a male (H.M. Smith, 29 July 1935)
Type locality: "near Magdalena, Jalisco, Mexico" [= Magdalena, N Jalisco State, W Mexico. 20°55'N, 103°59'W, elevation 1380 m].
Distribution: Mexico (Aguacalientes, Jalisco, Nayarit, S Zacatecas, ext. S Sinaloa), 400–1800 m.
Sources: E.H. Taylor, 1937b and C.L. Cox et al., 2012.

4. *Sonora semiannulata* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 117.

Synonyms: *Lamprosoma episcopum* Kennicott *in* Baird, 1859a, *Contia isozona* Cope, 1867a, *Contia episcopa torquata* Cope, 1880, *Contia taylori* Boulenger, 1894a, *Contia nuchalis* Schenkel, 1901, *Sonora semiannulata blanchardi* Stickel, 1938, *Sonora semiannulata gloydi* Stickel, 1938, *Sonora miniata miniata* Stickel, 1938, *Sonora miniata linearis* Stickel, 1938, *Sonora mosaueri* Stickel, 1938, and *Sonora bancroftae* Klauber, 1943a.
Type: Holotype, USNM 2109, a 241–243 mm male (J.H. Clark [U.S.-Mex. Bound. Surv.], 1851, via J.D. Graham).
Type locality: "Sonora, Mex." [= Sonora State, Mexico] (in error). Corrected to south of the Gila River in Santa Cruz or Cochise Co., SE Arizona, USA *fide* Bogert (1939a: 198–199) and Stejneger (1940: 204). Restricted to the vicinity of the Santa Rita Mountains, Santa Cruz Co., SE Arizona, USA by Stickel (1943: 119).
Distribution: Western USA (ext. NW Arkansas, Arizona, SE California, SE Colorado, SW Idaho, S Kansas, SW Missouri, New Mexico, Oklahoma, ext. SE Oregon, W Texas, ext. SW Utah) and N Mexico (Baja California Norte, Baja California Sur, Chihuahua, Coahuila, NE Durango, Nuevo León, ext. N Sonora, N Tamaulipas, San José and San Marcos Is.), NSL–2080 m.
Fossil records: Upper Pleistocene (Rancholabrean I, II) of USA (Arizona, Kansas, New Mexico, Texas).
Sources: Klauber, 1943a, Kassing, 1961, Frost & Van Devender, 1979, Frost, 1983, Stebbins, 1985, Van Devender & Bradley, 1994, H. Brown et al., 1995, Degenhardt et al., 1996, P.R. Brown, 1997, Bartlett & Tennant, 2000, Werler & Dixon, 2000, Grismer, 2002, Trauth et al., 2004 and Milanovich et al., 2005.

SORDELLINA Procter, 1923a (Xenodontidae)

Type species: *Xenodon punctatus* W.C.H. Peters, 1880a.
Distribution: Southern Brazil.
Sources: F. Werner, 1909b, Procter, 1923a, Amaral, 1926a, 1930, 1936, 1977, Hoge, 1958a, J.A. Peters & Orejas-Miranda, 1970, Hoge & Romano-Hoge, 1978b, Marques et al., 2001, Cicchi et al., 2007, Zaher et al., 2009 and Miranda & Fernandes, 2012.

1. *Sordellina punctata* (W.C.H. Peters, 1880a). Mber. Königl. Akad. Wiss. Berlin 1880(2): 221–222, pl., fig. 3. (*Xenodon punctatus*)

Synonyms: *Liophis rehi* F. Werner, 1909b, *Sordellina brandonjonesii* Procter, 1923a, and *Sordellina pauloensis* Amaral, 1923 & 1926a.
Type: Holotype, ZMB 9647, a 170 mm specimen (Baden).
Type locality: "Brasilien" [= Brazil]. Restricted to Poá, São Paulo State, Brazil *fide* Hoge & Romano (1978b: 64).
Distribution: Southern Brazil (E Paraná, E Santa Catarina, E São Paulo, Comprida Is.), NSL–960 m.
Remarks: Type locality erroneously restricted to São Bento, São Paulo, Brazil *fide* Hoge (1958a: 52). Mato Grosso record in error *fide* Miranda & Fernandes (2012: 7).

SPALEROSOPHIS Jan *in* Filippi, 1865a (Colubridae)

Synonyms: *Chilolepis* Fitzinger, 1843 *(nomen rejiciendum), Sphalerosophis* – Jan *in* Filippi, 1865 *(nomen incorrectum), Sphalerosophis* Jan, 1867 *in* Jan & Sordelli, 1866–1870 *(nomen rejiciendum), Loxodon* Jan, 1867 *in* Jan & Sordelli, 1866–1870 *(nomen substitutum)*, *Toxodon* Jan, 1867 *in* Jan & Sordelli, 1866–1870 *(nomen incorrectum)*, *Spalerophis* – Cope, 1887c *(nomen incorrectum), Spelaerosophis* – Loveridge, 1957 *(nomen incorrectum), Sphaerosophis* – Leviton, 1959a *(nomen incorrectum), Spalesorophis* – Majupuria, 1981 *(nomen incorrectum), Sphaelerosophis* – Hughes, 1983 *(nomen incorrectum),* and *Spalersophis* – Yaron, 1985 *(nomen incorrectum).*
Type species: *Spalerosophis microlepis* Jan *in* Filippi, 1865a.
Distribution: North Africa, Arabia and SW Asia.

Sources: M.A. Smith, 1943, Marx, 1959, Lanza, 1964, Minton, 1966, Marx et al., 1982, Sahi & Duda, 1986, Schätti & McCarthy, 1987, Schätti, 1993a, Nagy et al., 2004, Baig & Masroor, 2008, Baig et al., 2008 and Schätti et al., 2009.

Remarks: Official Generic Name no. 1741 *fide* Opinion 794 (ICZN, 1966c). *Spalerosophis* consists of six species (*i.e*., *arenarius, atriceps, cliffordii, diadema, josephscortecci, microlepis*) with *dolichosphilus* a subspecies of *S. cliffordii fide* Ratagat Masroor (pers. comm., unpub. data).

1. *Spalerosophis arenarius* (Boulenger, 1890a). Fauna Brit. India, Rept. Batr.: 329. (*Zamenis arenarius*)

Type: Lectotype, BMNH 1946.1.14.62, head and anterior body of a 1200 mm specimen (J.A. Murray, 1871–1886), designated by Marx (1959: 356).

Type locality: "Karachi" [= Karachi, SW Sindh, S Pakistan, 24°54'N, 67°02'E, elevation 25 m] via type locality restriction.

Distribution: Southeastern Pakistan (ext. S Balochistan, S Punjab, S Sindh) and NW India (N Gujaret, S Jammu and Kashmir, Rajasthan), NSL–1650 m.

Sources: Boulenger, 1893a, K.P. Schmidt, 1930, Mertens, 1969a, M.S. Khan, 1982a–b, 2002, Whitaker & Captain, 2004 and Baig & Masroor, 2008.

2. *Spalerosophis atriceps* (J.G. Fischer, 1885b). Jahrb. Hamburg. Wiss. Anst. 2: 102–103. (*Zamenis diadema atriceps*)

Synonym: *Zamenis diadema melanoides* Wall, 1914f.

Type: Holotype, SMF 41134 (formerly NMB 7796), a 1475 mm female (F. Krüger).

Type locality: "Himalaya" [= Himalaya Mtns. of NE Pakistan, N India, Nepal or Bhutan].

S

Distribution: Pakistan (Balochistan, Gilgit-Baltistan, Jammu & Kashmir, Khyber Pakhtunkhwa, Punjab, Sindh) and N India (Delhi, Gujarat, Haryana, Hamadral Pradesh, Jammu and Kashmir, Rajasthan, Uttar Pradesh) and Nepal (Chitwan, Kathmandu, Saptari), NSL–2000 m.

Sources: Wall, 1914f, Sharma, 1974, Vyas, 1989, M.S. Khan, 2002, Schleich & Kästle, 2002, Tiwari & Shah, 2004, Whitaker & Captain, 2004 and Masroor, 2012.

Remarks: A valid species *fide* Baig & Masroor, 2008 and Masroor (2012: 140). *Spalerosophis melanoides* (Wall) possibly a valid species *fide* Sharma (1974: 22) A synonym of *S. diadema* (Schlegel) *fide* M.A. Smith (1943: 173), Mertens (1969a: 69) and M.S. Khan (1982b: 237). *Spalerosophis atriceps* an ontogenetic phase of *S. diadema fide* Mahendra (1984: 293).

3. *Spalerosophis cliffordii* (Schlegel, 1837). Essai Phys. Serp. 1: 148–149, 2: 163–164, pl. 6, figs. 13–14. (*Coluber cliffordii*) (*nomen protectum*)

Synonyms: *Coluber guttatus* Forskal *in* Niebuhr 1775 (*nomen oblitum*), *Coluber cahirinus* Gmelin, 1789 (*nomen oblitum*), *Coluber versicolor* Wagler, 1830 *(nomen praeoccupatum), Periops parallelus* A.-M.-C. Duméril, Bibron & Duméril, 1854a

Type: Lectotype, RMNH 467, an 888 mm female (J.H.F. Clifford), designated by L.D. Brongersma *in* Kramer & Schnurrenberger (1963: 524).

Type locality: "États barbaresques" [= North African countries of Morocco, Algeria, Tunisia and Libya] via lectotype selection. Restricted to Tripoli, Libya *fide* Marx (1959: 350).

Distribution: North Africa and Middle East. Southern Morocco (Tan Tan), N Western Sahara (Saguia El Hamra), W Mauritania (Adrar, Tiris Zemmour, Trarza), NW Senegal, Mali (Mopti, S Tombouctou), Algeria (Adrar, Béchar, Biskra, Ouargla, S Tamanrasset), Niger (W Agadez, Maradi, Niamey, S Tahoua, Tamanrasset, Zinder), Tunisia (Gabès, Gafsa, Kasserine, Kebili, Medenine, Sidi Bou Zid, Tatahouine, Tozeur, Tunis), Libya (Ajdabiya, Al Fatih, Al Khums, Al Kurfah, Al Nuqat Al Khams, Al Wahah, Awbari, Banghazi, Damah, Murzuq, Sabha, Sawfajjin, Surt, Tarabulus, Tarhunah), N Chad, N Sudan (El-Bahr El-Ahmar, Al Khartum, An Nil Al Azraq, Ash Shamaliyah, Ash Shaqiyah, Sennar, Shamal Kurdufan), E Egypt (Alexandria, Assiut, Aswan, Beheira, Beni Suef, Cairo, El-Bahr El-Ahmar, Faiyum, Giza, Ismailia, Matrouh, Menufia, Minya, New Valley, North Sinai, Port Said, Qena, Sharkeya, Sohag, South Sinai, Suez), S Israel (Central, Gaza Strip, Jerusalem, Southern, West Bank), cen. Syria (Homs), SW Jordan (Amman, Aqaba, Irbid, Karak, Maan, Mafraq, Tafilah), Saudi Arabia (Asir, Bahah, Eastern, Ha'il, Jazan, Makkah, Northern, Qasim, Riyadh, Tabuk), Kuwait, E United Arab Emirates (Ras al Khaimah), Oman (Ad Dakhiliyah, Ad Dhahirah, Al Batinah, Dhofar, Muscat), Yemen (Abyan, Aden, Hadhramaut, Hajjah, Sana'a, Shabwah), Iraq (Babil, Baghdad, Dhi Qar, Maysan, Ninawa), ext. SE Turkey (Adryaman, Sanliurfa, Urfa) and ext. W Iran (Bushehr, Central, Fars, Kerman, Khuzestan, Razavi Khorasan, Semnan, Sistan va Baluchestan, Zanjhan), NSL–2400 m.

Remarks: A valid species *fide* Latifi, 1991. *Coluber guttatus* Forskal and *Coluber cahirinus* Gmelin are *nomina oblita* according to Article 23.9.2 of the Code (ICZN

1999) *fide* Schätti et al. (2009: 43). Possibly occurs in Sahrawi Republic *fide* Monteil (1951: 82) and Lebanon *fide* Gruber (1989: 149).

4. *Spalerosophis diadema* (Schlegel, 1837). Essai Phys. Serp. 1: 146, 2: 148. (*Coluber diadema*)

Synonyms: *Natrix oppelii* Wagler, 1825 (*nomen ineditum*), *Coluber geoffroyii* Gray *in* Griffith & Pidgeon, 1831, *Coluber oppellii* Blyth, 1854a *(nomen nudum), Periops parallelus schirasiana* Jan 1863b, and *Spalerosophis maximus* Clark & Inger, 1942 (*nomen nudum*).

Type: Lectotype, a 1016 mm specimen described and illustrated by P. Russell (1801: 34–35, pl. 30) (Bruce via Scott), designated herein.

Type locality: "environs de Bombay" [India] (in error) via lectotype selection. Specified as Buchier, [= Bushehr, W Bushehr Prov., SW Iran, 28°59'N, 50°50'E, elevation NSL] *fide* P. Russell (1801: 35, 56).

Distribution: Southwestern Asia. Iran (Bushehr, Central, Fars, Kerman, Khuzestan, Razavi Khorasan, Semnan, Sistan va Baluchestan, Zanjhan), SW Kazakhstan, Uzbekistan, S Turkmenistan, Krygyzstan, Tadzhikistan, Afghanistan (Helmand, Nangarhar, Nimruz), Pakistan (Balochistan, Khyber Pakhtunkhwa, Punjab, Sindh) and NW India, NSL–2400 m.

Khan, 1982a–b, 2002, Daniel, 1983, Murthy, 1985, 1986, Gasperetti, 1988, Osman & El Sir, 1988, Gruber, 1989, Gallagher, 1990, Latifi et al., 1992, Leviton et al., 1992, Szczerbak, 1994, Lamar, 1997b, Franzen, 1999, Disi et al., 2001, Baker et al., 2004 and Baran et al. 2004.

Remarks: *Spalersophis diadema schirasianus* a synonym *fide* Baig & Masroor (2008: 113) but a valid species *fide* M.S. Khan (2002: 125) and possibly valid *fide* Schätti et al. (2009: 131).

5. *Spalerosophis dolichospilus* (F. Werner, 1923a). Ann. Naturhist. Mus. Wien 36: 166 (*Zamenis diadema dolichospila*)

Synonym: *Coluber choumowitchi* Domergue, 1954.

Type: Holotype, NMW 23418, a 1020 mm male (Schönbrunn).

Type locality: "Indien" [= India] (in error). Corrected to Ain Sefra, Heimat die westalgerische (und wohl auch die marokkanische) Sahara [= Ain Sefra, Naama Wilaya, NW Algeria, 32°45'N, 0°35'W, elevation 1080 m] *fide* Werner (1929b: 7).

Distribution: Northwestern Africa. Northern Western Sahara (Saguia El Hamra), Morocco (Agadir, Al Hoceima, Boulemane, Fes, Kaar Es Souk, Khenitra, Ouarzazate, Tan Tan, Tata), Algeria (Naama, Souk Ahras, Tamanrasset) and W Tunisia (Chott el Gharsa), 80–1800 m.

Source: Geniez et al., 2004.

Remarks: A valid species *fide* Pasteur (1967: 444) and Geneiz et al. (2004: 150). A subspecies of *S. cliffordii* *fide* Ratagat Masroor (pers. comm., unpublished data).

6. *Spalerosophis josephscorteccii* Lanza, 1964. Monit. Zool. Ital. 72(1–2): 47–54, figs. 1, 2a–d, 3a–d, 4a–g. (*Sphalerosophis josephscorteccii*)

Type: Holotype, MZUF 2587, a 998 mm male (G. Scortecci, autumn 1953).

Type locality: "L'oasi di Gàlgalo (49°03'E X 11°00'N) circa a 35 km a SSW di Bosaso (Bender Cassim), sulle montagne calcaree dell'Ahl Medò, ad un'altitudine approssimativa di 875 m (Somalia settentrionale)" [= Gàlgalo Oasis, NW Bari Region, NE Somalia, 10°58'N, 49°05'E, elevation 875 m].

Distribution: Northeastern Somalia (NW Bari), 875 m.

Source: Lanza, 1983a.

7. *Spalerosophis microlepis* Jan *in* Filippi, 1865a. Viaggio Persia 1: 356–357.

Synonym: *Spalerosophis macrolepis* – Elter, 1982 (*nomen incorrectum*).

Type: Lectotype, MZUT 1843 (formerly MZUT 4024), a 1230 mm female (G. Doria, 1862–1864), designated by Kramer & Schnurrenberger (1963: 526), lost *fide* Schätti et al. (2009: 122).

Type locality: "Laristan, Persia meridionale" [= Larestan region, W Hormozghan Prov., SW Iran, ca. 27°25N, 5606'°E] via lectotype selection.

Distribution: Southwestern Iran (Central, Esfahan, Fars, Hamadan, Hormozghan, Khuzestan, Lorestan), 1530–2400 m.

Sources: Jan & Sordelli, 1867 *in* 1866–1870, K.P. Schmidt, 1939b, Latifi, 1991, Leviton et al., 1992 and Schätti et al., 2009.

Remarks: Official Specific Name no. 2176 *fide* Opinion 794 (ICZN, 1966c). Original generic orthography *Spalerosophis* and *Sphalerosophis,* the former selected by Marx (1959: 348) as first reviewer. Possibly occurs in Zagros Mountains, Iraq *fide* Leviton et al. (1992: 104).

SPILOTES Wagler, 1830 Colubridae)

Synonyms: *Spiletes* Swainson, 1839 *(nomen emendatum), Agriotes* Jan, 1863b, *Agriotis* – F. Werner, 1909b

S

(nomen incorrectum), Spilote – Briceño-Rossi, 1934 *(nomen incorrectum), Spillotes* – Tomas-Rodas, 1938 *(nomen incorrectum),* and *Spilotus* – Moonen, Eriks & Deursen, 1979 *(nomen incorrectum).*

Type species: *Coluber pullatus* Linnaeus, 1758.

Distribution: Latin America.

Source: Amaral, 1930g.

1. *Spilotes megalolepis* A.C.L.G. Günther, 1865. Ann. Mag. Nat. Hist. (3) 15(86): 93–94.

Type: Holotype, BMNH 1946.1.13.2, a 2362 mm female.

Type locality: "South America."

Distribution: Western Ecuador (W Carchi, E Esmeraldas, El Oro, Pichinicha), 100–500 m.

Sources: Boulenger, 1894a, Miyata, 1980, Orcés & Almendáriz, 1989b and Almendáriz, 1991.

2. *Spilotes pullatus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 225–226. (*Coluber pullatus*)

Synonyms: *Cerastes coronatus* Laurenti, 1768, *Cerastes mexicanus* Laurenti, 1768, *Natrix humana* Laurenti, 1768, *Coluber novae-hispaniae* Gmelin, 1789 *(nomen incorrigendum), Coluber variabilis* Merrem, 1790, *Coluber plutonius* Daudin, 1803c, *Natrix caninana* Merrem, 1820, *Coluber variabilis kuhii* Wied-Neuwied, 1825, *Natrix mycthemera* Wagler, 1825 (*nomen ineditum*), *Spilotes pullatus auribundus* Cope, 1861e, *Spilotes salvini* A.C.L.G. Cole et al., 2013.

Remarks: Original description based on Seba (1735: 21, pl. 20, fig. 1), Linnaeus (1746: 581 & 1749: 35, pl. 20, fig.

3), and Gronovius (1756: 56), the latter all citing Seba. Amaral (1930g: 277) incorrectly listed type locality as Tojuquá Is., Río de Prata based on Seba (1735: pl. 105, fig. 4), which Linnaeus did not cite.

STEGONOTUS A.-M.-C. Duméril, Bibron & Duméril, 1854a (Colubridae)

Synonyms: *Lielaphis* A.C.L.G. Günther, 1863f, *Zamenophis* A.C.L.G. Günther, 1872b, *Liclaphis* – Marschall, 1873 *(nomen incorrectum), Pseudolycodon* W.C.H. Peters, 1876b, *Herbertophis* Macleay, 1884a, and *Stegonothus* – Obst, Richter & Jacob, 1984 *(nomen incorrectum).*

Type species: *Stegonotus muelleri* A.-M.-C. Duméril, Bibron & Duméril, 1854a.

Distribution: Sino-Australia.

Sources: Rooij, 1917, C. Haas, 1950, McDowell, 1972b, F. Scott et al., 1977, Whitaker et al., 1982 and Hoser, 2012s.

1. *Stegonotus batjanensis* (A.C.L.G. Günther, 1865). Ann. Mag. Nat. Hist. (3) 15(86): 93, pl. 2, fig. a. (*Coluber batjanensis*)

Synonym: *Leptophis batjanensis* Bleeker, 1857a *(nomen nudum).*

Type: Holotype, BMNH 1946.1.11.36, a 1549 mm female (J.G.T. Bernelot-Moens via P. de Bleeker).

Type locality: "Batjan" [= Bacan Is., Maluku, E Indonesia, bet. 0°18–52'S and 127°17–54'E].

Distribution: Eastern Indonesia (Malukus: Ambon, Bacan, Batanta, Halmahera, Morotai, Salawati, Ternate).

Source: V.M. Tanner, 1950.

Remarks: Source of type listed as Bleeker *fide* A.C.L.G. Günther (1865: 93) and Boulenger (1893a: 368). Possibly a synonym of *S. cucullatus* (A.-M.-C. Duméril, Bibron & Duméril) *fide* McDowell (1972b: 22).

2. *Stegonotus borneensis* Inger, 1967. Fieldiana: Zool. 51(5): 82–83, fig. 1.

Type: Holotype, FMNH 164746, a 955 mm female (F.W. King, 24 May 1963).

Type locality: "Nanga Tekalit, Kapit District, Third Division, Sarawak, Borneo (1°38'N, 113°35'E)."

Distribution: East Malaysia (Sabah, Sarawak), 1370–1800 m.

Sources: Malkmus, 1987, 1989, 1992, Malkmus et al., 2002 and I. Das, 2006, 2010–2012.

Remarks: Possibly occurs in S Thailand *fide* Das (2011: 302 & 2012: 147).

3. *Stegonotus cucullatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 376. (*Lycodon cucullatum*)

Synonyms: *Zamenophis australis* A.C.L.G. Günther, 1872b, *Lycodon magnus* A.B. Meyer, 1874, *Lycodon keyensis* G. Doria, 1875, *Lycodon darnleyensis* Macleay, 1877, *Herbertophis plumbeus* Macleay, 1884a, and *Stegonotus reticulatus* Boulenger, 1895b.

Type: Holotype, MNHN 3412, a 1051 mm specimen (P. Garnot & R.-P. Lesson [Coquille or Astrolabe Voy.], 1822–1829).

Type locality: "Nouvelle Guinée" [= New Guinea]. Emended to Dore, Japen Is., Indonesia by Cogger et al. (1983: 213). [= Doré, Yapen Is., N West Papua Prov., E Indonesia, 1°40'S, 136°12'E, elevation 30 m].

Distribution: Austro-Papua. Eastern Indonesia (West Papua, Biak and Yapen Is.), Papua New Guinea (Central, Chimbu, Eastern Highlands, East Sepik, Gulf, Madang, Milne Bay, Morobe, Northern, Western Highlands, West Sepik, Bougainville, Daru, Fergusson, Karkar, Rossel, Samarai and Woodlark Is.) and N Australia (N Northern Territory, N Queensland, Darnley, Groote Eylandt, Melville, Morington and Murray Is.), NSL–1220 m.

Sources: Worrell, 1963c, Kinghorn, 1964, F. Parker, 1982, Cogger et al., 1983a, McDowell, 1984, S.K. Wilson & Knowles, 1988, Gow, 1989, Hoser, 1989, Cogger, 1992, O'Shea, 1996, Kraus & Allison, 2004 and Trembath & Lloyd, 2005.

Remarks: Bougainville record needs confirmation *fide* McDowell (1972: 23).

4. *Stegonotus diehli* Lindholm, 1905b. Jahrb. Nassau. Ver. Naturk. 58: 236–237.

Synonyms: *Stegonotus dorsalis* F. Werner, 1924a, and *Stegonotus adelynhoserae* Hoser, 2012s *(nomen illegitimum).*

Type: Holotype, MWNH 1244 (formerly SMW) (W. Diehl, July 1905).

Type locality: "Bogadjim an der Astrolabe Bai (Deutsch-Neuguinea)" [= Bogadjim, Astrolabe Bay, Madang Distr., NE Papua New Guinea, 5°26'S, 145°44'E, elevation NSL].

Distribution: New Guinea. Eastern Indonesia (West Papua, Mansinam Is.) and Papua New Guinea (East Sepik, Central, Chimbu, Gulf, Madang, Milne Bay, Morobe, Northern, Western, West Sepik, Daru and Fak-Fak Is.), NSL–1100 m.

Sources: Jong, 1927, Loveridge, 1948, F. Parker, 1982 and McDowell, 1984.

5. *Stegonotus florensis* (Rooij, 1917). Rept. Indo-Aust. Arch. 2: 110–111, figs. 46–47. (*Lycodon florensis*)

Synonym: *Stegonotus sutteri* Forcart, 1953.

Type: Holotype, ZMA 4080, a 568 mm specimen (G.A.J. van der Sande, 14 July 1908).

Type locality: "Flores (near Kotting!)." Emended to near Kotting along upper Maumeri River, Flores, Indonesia, altitude 220 m [= vicinity of Koting along upper Manumere River, E Flores, Lesser Sundas, S Indonesia, ca. 8° 40'S, 122°12'E, elevation 200 m] *fide* Daan & Hillenius (1966: 138).
Distribution: Lesser Sundas of S Indonesia (Flores, Sumba), 200–800 m.
Sources: Mertens, 1930, Forcart, 1954 and Lang, 2011.
Remarks: Photographs of holotype in Lang (2011: figs. 75–77).

6. *Stegonotus guentheri* Boulenger, 1895b. Ann. Mag. Nat. Hist. (6) 16(91): 31.

Types: Syntypes (3), BMNH 1946.1.11.37–39, two females and one male, longest syntype 1150 mm (A.S. Meek, 1894–1895).
Type locality: "Ferguson Island, D'Entrecasteaux Group, British New Guinea" [= Fergusson Island, Milne Bay Distr., SE Papua New Guinea, bet. 9°20–43'S and 150°26–57'E].
Distribution: Southeastern Papua New Guinea (Milne Bay, Fergusson, Goodenough, Kiriwina, Kitava and Normanby Is.).
Source: O'Shea, 1996.

7. *Stegonotus heterurus* Boulenger, 1893a. Cat. Snakes Brit. Mus. 1: 367, pl. 25, fig. 1.

Types: Syntypes (3), BMNH 1946.1.14.95 and 1946.1.15.10, two females (G. Brown) and 1946.1.14.91 (formerly Mus. Godeffroy), a female.
Type locality: "Duke of York Island" and "New Britain" [= Duke of York Is., East New Britain Distr., 4°10'S, 152°28'E, and New Britain Is., West or East New Britian Distr., E Papua New Guinea].
Distribution: Northeastern Papua New Guinea (East New Britain, New Ireland, E New Britain, New Ireland and Duke of York Is.), NSL–60 m.
Sources: F. Werner, 1899b, Wandolleck, 1911 and O'Shea, 1996.
Remarks: Probably a subspecies of *S. modestus* (Schlegel) *fide* McDowell (1972b: 16).

8. *Stegonotus modestus* (Schlegel, 1837). Essai Phys. Serp. 1: 143, 2: 119–120, pl. 4, figs. 16–17. (*Lycodon modestus*)

Synonyms: *Alopecion annulifer* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Lycodon lividum* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Lycodon modestum* – A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Ablabes greineri* Bleeker, 1860, *Coronella rosenbergii* Bleeker, 1860e, *Coluber holochrous* A.C.L.G. Günther, 1863f, *Lycodon aruensis* G. Doria, 1875, and *Stegonotus lenihoseri* Hoser, 2012s *(nomen illegitimum).*
Type: Lectotype, RMNH 324, a 910 mm female (S. Müller, Feb. 1828–Nov. 1829), designated by A.-M.-C. Duméril, Bibron & Duméril (1854a: 381) via type locality restriction.
Type locality: "Amboine" [= Ambon Is., cen. Maluku, E Indonesia, 3°40'S, 128°10'E] via type locality restriction.
Distribution: New Guinea. Eastern Indonesia (N Papua, Ambon, Aru Arch., Buru, Gag, Kai Arch., Misool, Nusa Laut, Salawati, Samao, Seram, Supiori Biak) and N Papua New Guinea (East Sepik, Madang, Manus, West Sepik, Manus Is.), NSL–460 m.
Source: O'Shea, 1996.

9. *Stegonotus muelleri* A.-M.-C. Duméril, Bibron & Duméril, 1854a. Erpét. Gén. 7(1): 682–683. (*nomen corrigendum*)

Synonyms: *Stegonotus müllleri* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen incorrigendum), Spilotes samarensis* W.C.H. Peters, 1861c, and *Stegonotus muelleri* – Boulenger, 1896a *(nomen corrigendum).*
Type: Holotype, MNHN 848 (formerly RMNH), a 1032 mm specimen (S. Müller via RMNH, 1845).
Type locality: "Java" [W Indonesia] (in error). Corrected and restricted to Samar Is., Philippines [bet. 10°54'–12°36'N and 124°15'–125°51'E] *fide* Leviton (1959b: 586).
Distribution: Southern Philippines (Leyte, Mindanao, Samar), 10–590 m.
Sources: L.E. Griffin, 1911, E.H. Taylor, 1922a, Leviton, 1959b, Inger, 1967, Alcala, 1986 and B.E. Smith, 1993.
Remarks: Possibly a synonym of *S. cucullatus* (Duméril, Bibron & Duméril) *fide* McDowell (1972b: 23). Lectotype designation via type locality restriction by Leviton (1959b: 586) invalid (unpublished).

10. *Stegonotus parvus* (A.B. Meyer, 1874). Mber. Königl. Akad. Wiss. Berlin 1874(2): 137. (*Lycodon parvus*)

Synonym: *Stegonotus sammacdowelli* Hoser, 2012s *(nomen illegitimum).*
Types: Syntypes (2), MTKD 876a–b (A.B. Meyer, 1873), destroyed 13–14 Feb. 1945 during World War II.
Type locality: "Neu-Guinea, Jobi" [= Yapen Is., West Papua Prov., E Indonesia, bet. 1°37–58'S and 135°26'–136°54'E].
Distribution: Austro-Papua. Eastern Indonesia (West Papua, Yapen Is.), Papua New Guinea (East New Britain, East Sepik, Eastern Highlands, Madang, Morobe, Western, Western Highlands, West New Britain, West Sepik, Daru, Duke of York, Manam and New Britrain Is.) and ext. N Australia (ext. N Queensland, Murray Is.), 460–915 m.
Sources: F. Parker, 1982, McDowell, 1984 and O'Shea, 1996.

S

Remarks: Publication date 1875 *fide* McDowell (1972b: 16). Duke of York, East New Britain and West New Britain, Papua New Guinea population possibly an undescribed species *fide* McDowell (1972: 18–19).

STENOPHIS Boulenger 1896a (Pseudoxyrhophiidae)

Synonyms: *Parastenophis* Domergue, 1995, and *Phisalixella* Domergue, 1995.
Type species: *Dipsas gaimardii* Schlegel, 1837.
Distribution: Madagascar.
Sources: Domergue, 1995, Hallermann, 2000, Nagy et al., 2005, Glaw & Vences, 2007, Vidal et al., 2008, Kelly et al., 2009 and Zaher et al., 2009.
Remarks: A synonym of *Lycodryas fide* Zaher et al., 2012.

1. *Stenophis arctifasciatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1176–1677. (*Heterurus arctifasciatus*) (*nomen corrigendum*)

Synonyms: *Heterurus arctifasciatus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Heterurus arcti-fasciatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen incorrigendum), Heterurus arctifasciatus* – Jan, 1871 *in* Jan & Sordelli, 1870–1881 *(nomen corrigendum),* and *Stenophis jaosoloa* Domergue, 1995.
Type: Holotype, MNHN 3870, a 431 mm specimen (J.R.C. Quoy & J.P. Gaimard, 1817–1829).
Type locality: "Madécasse" [= Madagascar].
Distribution: Eastern Madagascar (Antananarivo, Antsiranana, Toamasina, SE Toliara, Nosy Be Is.), NSL–1285 m.
Sources: Raxworthy, 1988 and Henkel & Schmidt, 2000.

2. *Stenophis betsileanus* (A.C.L.G. Günther, 1880b). Ann. Mag. Nat. Hist. (5) 6(33): 238. (*Dipsas betsileana*)

Type: Holotype, BMNH 1946.1.2.51, a 394–400 mm specimen (? J. Kirk & C.E. Bewsher).
Type locality: "S.E. Betsileo, Madagascar" [= N Fianarantsoa Prov., cen. Madagascar].
Distribution: Eastern Madagascar (Antananarivo, Antsiranana, Fianarantsoa, E SE Toliara, Nosy Mangabe Is.), 80–1325 m.
Source: Boulenger, 1896a.

3. *Stenophis carleti* Domergue, 1995. Arch Inst. Pasteur Madagascar (1994) 61(2): 121.

Type: Holotype, MNHN 1988.321, a 770+ mm specimen.
Type locality: "Côte sud-est de Manakara à Tolagnaro, Madagascar."
Distribution: Southeastern Madagascar (SE Toliara), NSL–570 m.
Remarks: Taxonomic status uncertain *fide* Glaw & Vences (2007: 414).

4. *Stenophis citrinus* Domergue, 1995. Arch. Inst. Pasteur Madagascar (1994) 61(2): 122.

Type: Holotype, MNHN 1978.2790, a 415 mm specimen.
Type locality: "forêt caducifolée d'Analabe-Beroboka, dans le Menabe, à mi-distance entre Morondava et Belo-sur-Tsirbihina, Madagascar."
Distribution: Western Madagascar (S Mahajanga, N Toliara), 125–380 m.

5. *Stenophis gaimardii* (Schlegel, 1837). Essai Phys. Serp. 1: 165, 2: 293–294. (*Dipsas gaimardii*)

Type: Holotype, MNHN 3868, a 550–565 mm male (J.R.C. Quoy & J.P. Gaimard [Coquille or Astrolabe Voy.], 1817–1829).
Type locality: "Madagascar."
Distribution: Madagascar (Antananarivo, Antsiranana, Nosy Be, S Toliara).

6. *Stenophis granuliceps* (Boettger, 1877). Abh. Senckenb. Naturf. Ges. 11: 14–16, pl. 1, fig. 3. (*Dipsas* [*Heterurus*] *gaimardi granuliceps*)

Synonym: *Stenophis capuroni* Domergue, 1995.
Type: Lectotype, SMF 19612 (formerly SMF-B 9041, a), a 1011 mm female (A. Stumpff, 1877), designated by Mertens (1922: 181),
Type locality: "Nossibé (= Nosy Bé), Madagascar" [= Nosy Be Is., N Antsiranana Prov., ext. N Madagascar] via lectotype selection.
Distribution: Northern Madagascar (Antsiranana, Nosy Be Is.), 400–800 m.

7. *Stenophis guentheri* Boulenger, 1896a. Cat. Snakes Brit. Mus. 3: 40–41, pl. 4, fig. 1.

Type: Holotype, BMNH 1946.1.2.53, a 435 mm female (Last).
Type locality: "S.W. Madagascar."
Distribution: Southern Madagascar (S Fianarantsoa, Toliara), 130–1345 m.

8. *Stenophis iarakaensis* Domergue, 1995. Arch. Inst. Pasteur Madagascar (1994) 61(2): 122.

Type: Holotype, MNHN 1988.320, a 295 mm juvenile.
Type locality: Madagascar. Emended to Iaraka, Madagascar [= Maroantsetra, N Toamasina Prov., NE Madagascar, 15°26'S, 49°44'E, elevation NSL] *fide* Glaw & Vences (1994: 346).
Distribution: Madagascar (ext. N Toamasina), NSL. Known only from holotype.

9. *Stenophis inopinae* Domergue, 1995. Arch. Inst. Pasteur Madagascar (1994) 61(2): 122.

Type: Holotype, MNHN 1950.160, a 620 mm specimen.
Type locality: Madagascar. Emended to Antongonbato, Madagascar *fide* Glaw & Vences (1994: 346).
Distribution: Extreme N Madagascar (N Antsiranana), 180–500 m.

10. *Stenophis inornatus* Boulenger, 1896a. Cat. Snakes Brit. Mus. 3: 42.

Type: Holotype, BMNH 1946.1.7.9, a 550 mm male (Last).
Type locality: "Madagascar."
Distribution: Extreme S Madagascar (S Toliara), 140 m.

11. *Stenophis pseudogranuliceps* Domergue, 1995. Arch. Inst. Pasteur Madagascar (1994) 61(2): 121–122.

Type: Holotype, MNHN 1978.42, a 733 mm specimen.
Type locality: "forêts caducifolées de la région ouest, entre l'Ankarafantsika et Toliara, Madagascar."
Distribution: Western and S Madagascar (Mahajanga, Toliara), 100–200 m.
Source: A. Mori et al., 2006.

12. *Stenophis variabilis* Boulenger, 1896a. Cat. Snakes Brit. Mus. 3: 43–44, pl. 4, figs. 3–3a.

Synonym: *Stenophis tulearensis* Domergue, 1995.
Types: Syntypes (2), BMNH 1946.1.7.10–11, a 1098–1100 mm male and a juvenile.
Type locality: "Madagascar."
Distribution: Western and S Madagascar (Antsiranana, Mahajanga, Toliara), NSL–800 m.
Sources: A. Mori et al., 2006 and Sajdak, 2010.

S

STENORRHINA A.-M.-C. Duméril, 1853 (Colubridae)

Synonyms: *Stenorhina* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen emendatum), Microphis* Hallowell, 1854b, *Bergenia* Steindachner, 1867a, *Sthenorhina* – Alvarez del Toro, 1972 *(nomen incorrectum).*
Type species: *Calamaria degenhardtii* Berthold, 1845.
Distribution: Latin America.
Sources: E.H. Taylor & Smith, 1939, H.M. Smith, 1943a, H.M. Smith & Taylor, 1945, E.H. Taylor, 1951, L.C. Stuart, 1963, J.A. Peters & Orejas-Miranda, 1970, J.C. Lee, 1980, 1996, L.D. Wilson & Meyer, 1985, Villa et al., 1988, Pérez-Higareda & Smith, 1991, J.A. Campbell, 1998b, G. Köhler, 1999b, Stafford & Meyer, 2000, Savage, 2002 and McCranie, 2011a.

1. *Stenorrhina degenhardtii* (Berthold, 1845). Nachr. Georg-Augusts-Univ. Königl. Ges. Wiss. Göttingen (3): 39–40, pl. 1, figs. 3–4. (*Calamaria degenhardtii*)

Synonyms: *Stenorrhina ventralis* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Stenorhina ventralis* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Stenorhina kennicottiana* Cope, 1860c, *Bergenia mexicana* Steindachner, 1867a, and *Stenorhina degenhardti ocellata* Jan, 1876 *in* Jan & Sordelli, 1870–1881.
Type: Holotype, ZFMK 36828 (formerly ZIMG 44/256), a 200 mm specimen (C. Degenhardt, 1839–1845).
Type locality: "Provinz Popayan, Etwa 2°N.B. und 301° L., Colombien, Neu-Granada" [= W Colombia, probably on the Pacific versant *fide* C.W. Myers & Böhme, 1996: 17].
Distribution: Southeastern Mexico (Chiapas, Oaxaca, Veracruz), N Guatemala (Alta Verapaz, Péten), Belize (Cayo), El Salvador (Ahuachapán, Cuscatlán, La Libertad, Morazán, San Miguel, San Salvador, Santa Ana, Sonsonate, Usulután), W Honduras (Atlántida, Comayagua, Copán, Cortés, Francisco Morazán, Lempira, Ocotepeque, Olancho, Santa Bárbara, Yoro), Nicaragua (Chontales, Jinotega, Matagalpa), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Canal Zone: Barro Colorado Is.; Chiriquí, Colón, Darién, Panamá, Veraguas), W Colombia (Antioquia, Atlántico, Bolívar, Boyacá, Cauca, Chocó, Cundinamarca, La Guajira, Nariño, Norte de Santander, Tolima, Valle), W Ecuador (Esmeraldas, Guayas, Manabí) and NW Venezuela (Aragua, Barinas, Carabobo, Distrito Federal, Falcón, Miranda,Táchira, Yaracuy), NSL–2410 (2750) m.
Sources: A.C.L.G. Günther, 1895 *in* 1885–1902, E.H. Taylor, 1954, Roze, 1966a, J.D. Johnson, 1976, Lancini., 1986, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, 1991, Casas-Andreu et al., 1996, Stafford, 1996, J.C. Lee, 2000, Barrio-Amorgós & Calcaño, 2001, G. Köhler et al., 2005, Navarrete et al., 2009 and McCranie & Orellana, 2011.
Remarks: Supplemental original description in Berthold (1846: 8–9, pl. 1, figs. 3–4). See C.W. Myers & Böhme, 1996 for summary of Berthold papers. Type locality designation of near Popayán, Cauca Dept., Colombia, 2°27'N, 76°37'W, elevation 1800 m *fide* Dunn & Stuart (1951: 56) in error *fide* C.W. Myers & Böhme (1996: 17).

2. *Stenorrhina freminvillei* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 868–869 & 1854d [Atlas]: pl. 70, figs. 1–2. (*Stenorhina freminvillei*) (*nomen corrigendum*)

Synonyms: *Stenorhina freminvillei* A.-M.-C. Duméril, 1853 *(nomen nudum), Stenorhina freminvillii* A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen incorrigendum), Microphis quinqueliniatus* Hallowell, 1854b, *Stenorhina lactea* Cope, 1861e, *Stenorhina degenhardtii apiata* Cope, 1875a, and

Geophis multitorques yucatanicus T. Barbour & Cole, 1906.

Type: Holotype, MNHN 816, a 463 mm specimen (C.P. de la Poix Chevalier de Fréminville, 1824–1831).

Type locality: "Mexique" [= Mexico]. Restricted to Totalapán, Oaxaca Mexico *fide* H.M. Smith & Taylor (1950: 341).

Distribution: Latin America. Southern Mexico (Chiapas, Campeche, Guerrero, Michoacán, Oaxaca, Quintana Roo, Yucatán), Belize (Belize, Cayo, Corozal, Orange Walk), Guatemala (Petén), Honduras (Choluteca, Comayagua, Copán, Cortés, El Paraíso, Francisco Morazán, Gracias a Dios, Intibucá, Lempira, Santa Bárbara, Valle, Yoro), Nicaragua (Atlántico Norte, Chinandega, Granada, Madriz, Managua, Matagalpa, Rivas: Ometepe Is.), Costa Rica (Alajuela, E Cartago, Guanacaste, Limón, Puntarenas, NW San José), W Panama (Chiriquí) and Colombia (Boyacá), NSL–2200 m.

Sources: Duméril, Bocourt & Mocquard, 1870–1909, R.W. Henderson & Hoevers, 1975, Weyer, 1991, J.C. Lee, 2000, J.D. Johnson & Webb, 2001 and Hernández-Roz, 2005.

Remarks: This taxon was named in honor of Capt. Fréminville; since A.-M.-C. Duméril (1853: 490) and A.-M.-C. Duméril, Bibron & Duméril (1854c: 359) used the orthography of *freminvillei* the A.-M.-C. Duméril, Bibron & Duméril (1854b: 868) usage of *freminvillii* is considered a *nomen incorrigendum*. Probably occurs in Veracruz *fide* Pérez-Higareda & Smith (1991: 44).

STOLICZKIA Jerdon, 1870 (Xenodermatidae)

Synonyms: *Stoliczkaia* Boulenger, 1890a *(nomen praeoccupatum), Stolickaia* – Palacky, 1898 *(nomen incorrectum), Stolickaja* – Palacky, 1898 *(nomen incorrectum), Estoliczkaia* – Briceño-Rossi, 1934 *(nomen incorrectum), Stolzickia* – Taub, 1967 *(nomen incorrectum),* and *Stoliczkai* – Murthy & Pillai *in* Majupuria, 1986 *(nomen incorrectum).*

Type species: *Stoliczkia khasiensis* Jerdon, 1870.

Distribution: Southeastern Asia.

Source: Zaher et al., 2009.

1. *Stoliczkia borneensis* Boulenger, 1899c. Ann. Mag. Nat. Hist. (7) 4(24): 452. (*Stoliczkaia borneensis*)

Type: Holotype, BMNH 1946.1.15.58 (formerly RM), a 750 mm female (R. Hanitsch, March 1899).

Type locality: "Mount Kina Balu, 4200 feet, North Borneo" [= Mt. Kinabalu, N Sabah, NE East Malaysia, 6°05'N, 116°33'E, elevation 1280 m].

Distribution: East Malaysia (Sabah, Sarawak), 800–1800 m.

Sources: C. Haas, 1950, Stuebing, 1991, Malkmus et al., 2002 and I. Das, 2006, 2010–2012.

Remarks: Supplemental original descripation in Boulenger *in* Hanitsch (1900: 71–72, pl. 1, fig. 2).

2. *Stoliczkia khasiensis* Jerdon, 1870. Proc. Asiatic Soc. Bengal 1870(3): 81–82.

Type: Holotype, BMNH 1946.1.15.67, a 670–673 mm female (T.C. Jerdon, 1836–1852).

Type locality: "Khasi hills" [= Khasi Hills, E Meghalaya State, NE India, 25°35'N, 91°38'E, elevation 1370–1675 m].

Distribution: Northeastern India (Meghalaya), 1370–1675 m.

Sources: Boulenger, 1890a, Annandale, 1904, Wall, 1923d and M.A. Smith, 1938, 1943.

STORERIA Baird & Girard, 1853 (Natricidae)

Synonyms: *Ischnognathus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Stoneria* – Wied-Neuwied, 1865 *(nomen incorrectum),* and *Hemigenius* Dugès, 1888a.

Type species: *Coluber dekayi* Holbrook, 1839.

Distribution: Eastern North America and Mesoamerica.

Fossil records: Middle Pliocene to upper Pleistocene of E USA. Fossils unassigned to species include middle Pliocene (Blancan II) of USA (Nebraska), middle Pleistocene (Irvingtonian II) of USA (Nebraska), middle/upper Pleistocene (Irvingtonian II) of USA (Kansas, Maryland, Texas, West Virginia), and upper Pleistocene (Rancholabrean II) of USA (Alabama, Missouri, West Virginia).

Sources: Trapido, 1944, H.M. Smith & Taylor, 1945, Conant, 1951, A.H. Wright & Wright, 1957, Ernst & Barbour, 1989, Rossman & Myers, 1990, Conant & Collins, 1991, Holman, 1995b, 2000a, Palmer & Braswell, 1995, Alfaro & Arnold, 2001, Zaher et al., 2009 and Ernst, 2012.

S

1. *Storeria dekayi* (Holbrook, 1839). No. Amer. Herp. 1 [Second version]: 121–122, pl. 25. (*Coluber dekayi*)

Synonyms: *Coluber dorsalis* De Kay *in* Holbrook, 1839 (*nomen nudum*), *Storeria tropica* Cope, 1885a, *Storeria dekayi anomala* Dugès, 1888a, *Storeria victa* Hay, 1892b, *Storeria dekayi temporalineata* Trapido, 1944, *Storeria dekayi texana* Trapido, 1944, *Storeria dekayi wrightorum* Trapido, 1944, and *Storeria dekayi limnetes* P.K. Anderson, 1961.

Type: Lectotype, ANSP 5832, a 382 mm female (C.F. Pickering, 1825–1826), designated by Trapido (1944: 47).

Type locality: "Massachusetts" via lectotype selection. Restricted to Cambridge, Massachusetts, USA *fide* K.P. Schmidt (1953a: 165).

Distribution: Eastern North America and Mesoamerica. Extreme SE Canada (SE Ontario, SW Quebec), E USA (Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida: Big Pine, Little Torch, Middle Torch, No Name and Sugarloaf Is.; Georgia, Illinois, Indiana, Iowa, E Kansas, Kentucky, Louisiana, S Maine, Maryland, Massachusetts, Michigan, S Minnesota, Mississippi, Missouri, SE Nebraska, New Hampshire, New Jersey, New York: Long Island; North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, E Texas, Vermont, Virginia, West Virginia, Wisconsin), E Mexico (Chiapas, Hidalgo, Nuevo León, Oaxaca, Puebla, Tamaulipas, Veracruz), Guatemala (Alta Verapaz, Péten) and W Honduras (Cortés, Francisco Morazán, Yoro), NSL–2035 m.

Fossil records: Upper Pleistocene (Rancholabrean I, II) of USA (Florida, Georgia, Kansas, Pennsylvania, Tennessee, Texas, Virginia).

Sources: Ditmars, 1936, 1939, McCauley, 1945, L.C. Stuart, 1954a, Carr & Goin, 1955, P.K. Anderson, 1961, P.W. Smith, 1961, Fouquette & Rossman, 1963, Sabath & Sabath, 1969, Minton, 1972, Lazell, 1976, Martof et al., 1980, Christman, 1982, Tennant, 1984, L.D. Wilson & Meyer, 1985, Green & Pauley, 1987, Ashton & Ashton, 1988, Dundee & Rossman, 1989, Allen, 1992, Collins, 1993, J.C. Lee, 1996, Harding, 1997, Tennant, 1997, J.A. Campbell, 1998b, Fitch, 1999, Werler & Dixon, 2000 and McCranie, 2011a.

Remarks: Official Specific Name no. 1816 *fide* Opinion 632 (ICZN, 1962). Original description reprinted in Holbrook (1842b: 53–55, pl. 14). Original plate mislabeled as pl. 25 (correct in text as pl. 24). The specimen in Holbrook (1838: pl. 14), was collected by De Kay on Long Island, New York *fide* Adler (1976: xxxiii). Malnate (1971: 365) erroneously referred to ANSP 5832 as a holotype. Type locality restriction of north coast of Long Island *fide* Christman (1982: 2) invalid.

S

2. *Storeria hidalgoensis* E.H. Taylor, 1942. Herpetologica 2(2): 78.

Type: Holotype, UIMNH 25061 (formerly EHT-HMS 16145 & EHT-CC 3082), a 282 mm specimen (E.H. Taylor, 13 Aug. 1938).

Type locality: "near Zacualtipan, Hidalgo, Mexico" [= vicinity of Zacualtipan, Hidalgo State, Mexico, 20°39'N, 98°39'W, elevation 1990 m].

Distribution: Northeastern Mexico (Coahuila, Hidalgo, México, Nuevo León, Querétaro, San Luis Potosí, Tamaulipas), 200–3500 m.

Sources: Dixon & Lemos-Espinal, 2010 and Ramírez-Bautista et al., 2010.

3. *Storeria occipitomaculata* (Storer, 1839). Rept. Massachusetts: 230. (*Coluber occipitomaculatus*) (*nomen corrigendum*)

Synonyms: *Coluber leberis* Linnaeus, 1758 *(nomen rejiciendum), Coluber occipito-maculatus* Storer, 1839 *(nomen incorrigendum), Coluber venustus* Hallowell, 1847, *Storeria occipitomaculata* – S.W. Garman, 1884 *(nomen corrigendum), Storeria occipitomaculata obscura* Trapido, 1944, and *Storeria occipitomaculata pahasapae* H.M. Smith, 1963a.

Type: Holotype, not designated, a 267 mm specimen (Adams), lost *fide* Trapido (1944: 21).

Type locality: "Amherst, Massachusetts,"[USA].

Distribution: Eastern North America. Southeastern Canada (ext. SE Alberta, S Manitoba, New Brunswick, Nova Scotia, S Ontario, S Quebec, ext. SE Saskatchewan, Prince Edward Is.) and E USA (Alabama, Arkansas, Connecticut, Delaware, District of Columbia, N Florida, Georgia, ext. E Kansas (a relic population in W), Kentucky, Illinois, Indiana, Iowa, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, cen. Nebraska, New Hampshire, New Jersey, New York, North Carolina, E North Dakota, Ohio, E Oklahoma, Pennsylvania, Rhode Island, South Carolina, ext. W and ext. E South Dakota, Tennessee, ext. E Texas, Vermont, Virginia, West Virginia, Wisconsin, ext. NE Wyoming). NSL–1500 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Pennsylvania, Virginia).

Sources: Hay, 1902, Fowler, 1907, Blanchard, 1937, Breckenridge, 1944, Bleakney, 1958, Logier & Toner, 1961, H.M. SUTA Worrell, 1961c (Elapidae)

Type species: *Hoplocephalus sutus* W.C.H. Peters, 1863a.

Distribution: Australia.

Sources: Cogger et al., 1983a, Mengden, 1985a, Schwaner et al., 1985, Shine, 1985a, 1988, Wallach, 1985, Longmore, 1986, Storr et al., 1986, S.K. Wilson & Knowles, 1988, Gow, 1989, Hutchinson, 1990, Cogger, 1992, Keogh et al., 1998, Sanders et al., 2008, Zaher et al., 2009 and Hoser, 2012e.

1. *Suta fasciata* (Rosén, 1905). Ann. Mag. Nat. Hist. (7) 15(86): 179. (*Denisonia fasciata*)

Type: Lectotype, ZMUL 129, longest syntype 410 mm (N. Holst, 1897), designated by Wells & Wellington (1985: 45).

Type locality: "West Australia" [= Western Australia, Australia].

Distribution: Western Australia (W Western Australia), NSL–790 m.

Source: L.A. Smith, 1980.

2. *Suta ordensis* (Storr, 1984a). Rec. West. Aust. Mus. 11(3): 254–256. (*Denisonia ordensis*)

Type: Holotype, WAM 58877, a 385–662 mm (svl) specimen (W.H. Butler, 9 Jan. 1972).

Type locality: "Argyle Downs, W.A., in 16°17'S, 128°47'E."

Distribution: Northern Australia (ext. NW Northern Territory, ext. NE Western Australia), 75–395 m.

3. *Suta punctata* (Boulenger, 1896a). Cat. Snakes Brit. Mus. 3: 341–342, pl. 18, fig. 4. (*Denisonia punctata*)

Synonym: *Rhinoplocephalus punctatus* – Storr, 1984a.

Type: Holotype, BMNH 1946.1.20.7, a 350 mm female (Beckett).

Type locality: "Port Walcott, north-western Australia" [= Port Walcott, W Western Australia, W Australia, 20°35'S, 117°11'E, elevation NSL].

Distribution: Northwestern Australia (Northern Territory, W Queensland, N Western Australia), NSL–760 m.

Sources: L.A. Smith, 1980, Shine, 1983b and Covacevich, 1991.

4. *Suta suta* (W.C.H. Peters, 1863a). Mber. Königl. Akad. Wiss. Berlin 1863(4): 234. (*Hoplocephalus sutus*)

Synonyms: *Hoplocephalus frenatus* W.C.H. Peters, 1870b, *Hoplocephalus carpentariae* Macleay, 1887a, *Hoplocephalus frontalis* Ogilby, 1890b, *Hoplocephalus stirlingi* Lucas & Frost, 1896, *Denisonia frontalis propinqua* De Vis, 1905, and *Denisonia forresti* Boulenger, 1906c.

Type: Holotype, ZMB 4715, a 325 mm specimen (R.H. Schomburgk, 1849–1863).

Type locality: "aus Buchsfelde bei Adelaide in Südaustralien" [= vicinity of Adelaide (34°56'S, 138°36'E, elevation 45 m), SE South Australia, S Australia]. Emended to Loos, near Gawler [34°36'S 138°45'E, elevation 55 m], South Australia *fide* Bauer et al. (1995: 76).

Distribution: Australia (New South Wales, Northern Territory, Queensland, South Australia, N Victoria, E Western Australia), NSL–895 m.

Sources: Coventry, 1971, L.A. Smith, 1978, Shine, 1983b, Storr, 1984a, Hoser, 1989 and Covacevich, 1991.

SYMPHIMUS Cope, 1870 (Colubridae)

Synonyms: *Symphymus* – Hoffmann, 1890 *(nomen incorrectum),* and *Symphinus* F. Werner, 1929a *(nomen emendatum).*

Type species: *Symphimus leucostomus* Cope, 1870.

Distribution: Southern Mexico.

Sources: Rossman & Schaefer, 1974, Cundall, 1981 and G. Köhler, 2001, 2008.

1. *Symphimus leucostomus* Cope, 1870. Proc. Amer. Philos. Soc. (1869–1870) 11(81): 150.

Type: Lectotype, USNM 30310 (formerly SMI 240), a 799–803 mm male (A.L.J.F. Sumichrast, 1855–1869), designated by H.M. Smith & Taylor (1945: 133).

Type locality: "Chihuitan, Tehuantepec, Western Mexico" [= Santo Domingo Chihuitán, SE Oaxaca, SE Mexico, 16°35'N, 95°10'W] via lectotype selection.

Distribution: Southern Mexico (W Chiapas, Colima, Jalisco, Michoacán, E Oaxaca), 200–1000 m.
Sources: Hartweg & Oliver, 1940, Casas-Andreu et al., 1996 and Reyes-Velasco et al., 2009.

2. *Symphimus mayae* (Gaige, 1936). Publ. Carnegie Inst. (457): 300–301. (*Eurypholis mayae*)

Type: Holotype, UMMZ 73082, a 314 mm specimen (A.S. Pearse & E. Creaser, 3 July 1932).
Type locality: "Dzitas-Chichen Itza road, Dzitas, Yucatan, Mexico" [= between Dzitás (20°51'N, 88°31'W) and Chichén Itzá (20°40'N, 88°34'W), E Yucatán State, ext. SE Mexico]. Emended to NE Dzitás in UMMZ catalogue *fide* Kluge (984: 57).
Distribution: Yucatán Peninsula. Southeastern Mexico (Quintana Roo, Yucatán) and Belize (Belize, Orange Walk), NSL–300 m.
Sources: J.C. Lee, 1980, 1996, 2000, J.A. Campbell, 1998b and Stafford & Meyer, 2000.
Remarks: Collection date of type 13 July 1932 *fide* Kluge (1984: 57).

SYMPHOLIS Cope, 1862a (Colubridae)

Synonyms: *Cheilorhina* Filippi *in* Jan, 1862b, and *Chilorhina* Cope, 1887c *(nomen emendatum).*
Type species: *Sympholis lippiens* Cope, 1862a.
Distribution: Western Mexico.
Sources: H.M. Smith & Taylor, 1945, Humphrey & Shannon, 1958, Zweifel, 1959b, Hensley, 1966, Hardy & McDiarmid, 1969, W.W. Tanner, 1985 and Lemos-Espinal et al., 2004c.

1. *Sympholis lippiens* Cope, 1862a. Proc. Acad. Nat. Sci. Philadelphia (1861) 13: 524.

Synonyms: *Cheilorhina villarsii* Jan, 1862b, and *Sympholis lippiens rectilimbus* Hensley, 1966.
Types: Syntypes (3), USNM 6092, and USNM 31345–46, two females, longest syntype 527 mm (J.J. Major), 6092 lost *fide* Zweifel (1959b: 3).
Type locality: "Guadalaxara, Mexico" [= Guadalajara, N-cen. Jalisco, mid-western Mexico, 20°40'N, 103°20'W].
Distribution: Western Mexico (ext. SW Chihuahua, cen. Jalisco, Nayarit, Sinaloa, S Sonora), 435–915 (1585) m.

S

SYNOPHIS Peracca, 1896d (Dipsadidae)

Synonym: *Sinophis* – Briceño-Rossi, 1934 *(nomen incorrectum).*
Type species: *Synophis bicolor* Peracca, 1896d.
Distribution: Colombia and Ecuador.
Sources: Nicéforo-Maria, 1950, Bogert, 1964, J.A. Peters & Orejos-Miranda, 1970, Hillis, 1990, Pérez-Santos & Moreno, 1991, Sheil, 1998, Sheil & Grant, 2001 and Zaher et al., 2009.

1. *Synophis bicolor* Peracca, 1896d. Boll. Mus. Zool. Anat. Comp. Univ. Torino 11(266): 1–2, 1 fig.

Type: Holotype, MZUT 257, a juvenile (1887).
Type locality: "America meridionale" [= South America].
Distribution: Colombia (Antioquia) and N Ecuador (Chimborazo, Cotopaxi, Pastaza, Pichincha), 1200–2000 m.
Sources: Nicéforo-Miria, 1970 and Sheil & Grant, 2001.
Remarks: Possibly two invariable allopatric species *fide* Sheil & Grant (2001: 208).

2. *Synophis calamitus* Hillis, 1990. Occ. Pap. Mus. Nat. Hist., Univ. Kansas (135): 2–4, fig. 1.

Type: Holotype, KU 197107, a 223 mm female (D.M. Hillis, 2 April 1984).
Type locality: "4 km SE Tandayapa, Pichincha Province, Ecuador, elevation 1890 m" [= 4 km SE Tandayapa (0º01'S, 78º46'W), NE Pichincha Prov., NW Ecuador, elevation 1890 m].
Distribution: Northwestern Ecuador (Pichincha), 1890–2150 m.

3. *Synophis lasallei* (Nicéforo-Maria, 1950). Rev. Acad. Colomb. Cienc. Exec. Fis. Nat. 7(28): 517, figs. 1–2, pl. (*Diaphorolepis lasallei*)

Type: Holotype, MLS (formerly CSJP), a 470 mm male.
Type locality: "Paraje situado al norte de albán, Cundinamarca, Cordillera Oriental (vertiente occidental), a unos 2.200 metros de altitud y aproximadamente a 60 kilómetros al noroeste de Bogotá" [= N of Albán (4º53N, 74º27'W), cen. Cundinamarca Dept., cen. Colombia, elevation 2200 m].
Distribution: Central Colombia (Cundinamarca, Meta) and E Ecuador (Morona-Santiago, Napo, Pastaza), 460–2200 m.
Sources: J.A. Peters, 1960a and Pérez-Santos & Moreno, 1988.
Remarks: Bogert (1964: 518) and Pérez-Santos & Moreno (1988: 320) listed type locality as northwest of Albán.

4. *Synophis plectovertebralis* Sheil & Grant, 2001. J. Herp. 35(2): 204–207, figs. 1–2a–b.

Type: Holotype, UV 11858, a 272.3 mm female (L.A. Ortega, 31 March 1995).
Type locality: "Hacienda San Pedro, about 6 km south El Queremal, Municipio Dagua, Departamento del Valle del Cauca, Colombia, 03º29'N, 76º42'W,

at 1800 m on the Pacific versant of the Cordillera Occidental."

Distribution: Western Colombia (Valle del Cauca), 1800 m. Known only from type locality.

†*SZYNDLARIA* Rage & Augé, 2010 (Tropidophiidae)

Type species: †*Szyndlaria aureomontensis* Rage & Augé, 2010.

Distribution: Middle Eocene of France.

Source: Rage & Augé. 2010.

1. †*Szyndlaria aureomontensis* Rage & Augé, 2010. Géobios 43: 260–262, fig. 3, no. 1.

Type: Holotype, MHNL Li 331, one middle trunk vertebra.

Type locality: "near the village of Lissieu ("department" or administrative region, of Rhône), central eastern France; MP 14, middle Eocene."

Distribution: Middle Eocene (Lutetian, MP 14: 37.2–42.7 or 48.6 mya) of France. Known only from type locality.

Remarks: Type locality no longer exists as the fissure was mined out by end of the 19th Century *fide* Rage & Augé (2010: 254).

T

TACHYMENIS Wiegmann, 1834 (Xenodontidae)

Synonyms: *Tachymenes* – Girard, 1855 (*nomen incorrectum*), *Zacholomorphus* Fitzinger, 1861, *Tachydermis* – A.C.L.G. Günther, 1881 (*lapsus calami*), *Colubellus* Philippi, 1899 (*nomen nudum*), *Aspidula* Philippi *in* Quijada, 1916, *Colubellus* Philippi *in* Quijada, 1916, Trachymenis– Escomel, 1929 (*nomen incorrectum*), *Tachymensis* – Maass-Berlin, 1933 (*nomen incorrectum*), *Tachymeris* – Neave, 1940b (*nomen incorrectum*), *Tachimenus* – Vuletin, 1960 (*nomen incorrectum*), and *Tachymenys* – Shine *in* Cogger & Zweifel, 1992 (*nomen incorrectum*).

Type species: *Tachymenis peruviana* Wiegmann, 1834a.

Distribution: Southern South America.

Sources: W. Walker, 1945, Donoso-Barros, 1966, J.A. Peters & Orejas-Miranda, 1970, Zaher et al., 2009 and Vidal et al., 2010.

Remarks: Congeneric with *Thamnodynastes fide* Bailey & Thomas, 1991.

1. *Tachymenis affinis* Boulenger, 1896a. Cat. Snakes Brit. Mus. 3: 119, pl. 7, fig. 1.

Type: Holotype, BMNH 1946.1.2.80, a 520 mm male (W. Davis).

Type locality: "Muña, Peru." Restricted to the upper Río Huallaga, Huanuco, Peru *fide* W. Walker (1945: 22).

Distribution: Southern Peru (Cuzco, Huanuco), 2000–2500 m.

2. *Tachymenis attenuata* W. Walker, 1945. Bull. Mus. Comp. Zool. 96(1): 24–25, pl. 2, fig. 3, pl. 4, figs. 13–15.

Synonym: *Tachymenis attenuata boliviana* W. Walker, 1945.

Type: Holotype, FMNH 40071 (formerly UADZ), a 582 mm male (J. Perea).

Type locality: "Peru." Restricted to Madre de Dios Dept. *fide* W. Walker (1945: 24).

Distribution: Southern Peru (Madre de Dios) and Bolivia (Cochabamba, La Paz), 2500–4115 m.

Source: Harvey & Muñoz, 2004.

3. *Tachymenis chilensis* (Schlegel, 1837). Essai Phys. Serp. 1: 136, 2: 70. (*Coronella chilensis*)

Synonyms: *Zacholomorphus brevicaudatus* Fitzinger, 1861, *Zaccholomorphus chilensis* Fitzinger, 1861, *Tachymenis peruviana catenata* F. Werner, 1898c, *Tachymenis peruviana coronellina* F. Werner, 1898c, *Tachymenis peruviana vittata* F. Werner, 1898c, *Coronella leucognatha* Philippi, 1899 (*nomen nudum*), *Aspidula celeris* Philippi *in* Quijada, 1916 (*nomen nudum*), *Aspidula vittata* Philippi *in* Quijada, 1916 (*nomen nudum*), *Coronella atrovittata* Philippi *in* Quijada, 1916 (*nomen nudum*), *Coronella campestris* Philippi *in* Quijada, 1916 (*nomen nudum*), *Coronella concolor* Philippi *in* Quijada, 1916 (*nomen nudum*), *Coronella lepida* Philippi *in* Quijada, 1916 (*nomen nudum*), *Coronella melanogastra* Philippi *in* Quijada, 1916 (*nomen nudum*), *Coronella plumbea* Philippi *in* Quijada, 1916 (*nomen nudum*), and *Coronella montana* Philippi *in* Quijada, 1916 (*nomen nudum*).

Types: Syntypes (2), RMNH 150a–b (formerly MNHPB), a 450 mm and 388 mm specimen (R.-P. Lesson & P. Garnot [Coquille Voy.], Aug. 1822–March 1825).

Type locality: "Chilé."

Distribution: Central Chile (Aconcagua, Arauco, Atacama, Bio-Bio, Cautin, Chiloe, Colchagua, Concepción, Coquimbo, Llanquihue, Malleco, Nuble, Osorno, Santiago, Talca, Valdivia) and cen. Argentina (Chubut, Neuquén, Río Negro), NSL–2000 m.

Sources: Donoso-Barros, 1966, Ortiz, 1973, Troncoso & Ortiz, 1987, J.D. Williams & Francini, 1991, Valenzuela-Dellarossa et al., 2010 and Avila et al., 2012.

Remarks: The subspecies *chilensis* and *coronellina* possibly sympatric and possibly represent separate species *fide* Valenzuela-Dellarossa et al., 2010.

4. *Tachymenis elongata* Despax, 1910. Bull. Mus. Hist. Nat., Paris 16(7): 373–374.

Type: Holotype, MNHN 1906.254, a 450 mm specimen (P. Rivet, 1902–1906).

Type locality: "Tablazo de Paita (Pérou)" [Dept. Piura, Peru]. Corrected to Tablazo de Payta (30 m) *fide* Despax (1911: 34).

Distribution: Coastal Peru (Ancash, Lima, Piura), 30–155 m.

Source: Carrillo de Espinoza & Icochea, 1995.

Remarks: Original description reprinted in Despax (1911: 33–35, pl. 1, figs. 2–2a).

5. *Tachymenis peruviana* Wiegmann, 1834a. Nova Acta Acad. Caesar. Leop.-Carol. 17(1): 252–253, pl. 20, fig. 1.

Synonyms: *Ophis peruana* Tschudi, 1945 (*nomen nudum*), *Psammophylax assimilis* Jan, 1863a, *Tachymenis peruviana dorsalis* F. Werner, 1901c, *Leimadophis andicolus* T. Barbour, 1915b, *Tachymenis chilensis melanura* W. Walker, 1945, and *Tachymenis peruviana yutoensis* Miranda & Couturier, 1981.

Type: Holotype, ZMB, probably a female (F.J.F. Meyen, 1830–1832).

Type locality: Not stated. "Peru" by implication. Restricted to Puno, Puno Dept., Peru *fide* W. Walker (1945: 15).

Distribution: Peru (Ancash, Arequipa, Ayachucho, Cuzco, Huancavelica, Huanuco, Junin, La Libertad, Lima, Madre de Dios, Moquegua, Puno, Tacana), Bolivia (Cochabamba, La Paz, Oruro, Potosi, Santa Cruz), NW Argentina (Jujuy) and Chile (Aconcaqua, Antofagasta, Atacama, Coquimbo, Santiago, Tarapaca), 900–4250 m.

Sources: Carrillo de Espinoza, 1970, Ortiz, 1973, Pefaur et al., 1978, Henle & Ehrl, 1991, J.D. Williams & Francini, 1991, Cei, 1994, Lehr & G. Köhler, 2000, Harvey & Muñoz, 2004 and Valenzuela-Dellarossa et al., 2010.

6. *Tachymenis tarmensis* W. Walker, 1945. Bull. Mus. Comp. Zool. 96(1): 21–22, pl. 4, figs. 10–11.

Type: Holotype, FMNH 5698, a 393 mm female (M.P. Anderson, 19 May 1914).

Type locality: "Tarma in the departament of Junin, Peru."

Distribution: Central Peru (Junin). Known only from type locality.

TAENIOPHALLUS Cope, 1895c (Xenodontidae)

Type species: *Lygophis nicagus* Cope, 1868c.

Distribution: South America.

Sources: C.W. Myers, 1974, C.W. Myers & Cadle, 1994, Schargel et al., 2005, Zaher et al., 2009 and Vidal et al., 2010.

1. *Taeniophallus affinis* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 128–129. (*Dromicus affinis*)

Synonyms: *Enicognathus melanocephalus* A.-M.-C. Duméril, Bibron & Duméril, 1854a (*partim*), and *Coronella iheringii* Boulenger, 1885a.

Type: Lectotype, BMNH 1946.1.5.80, a juvenile male (G. Busk), designated by C.W. Myers (1974: 197).

Type locality: "Rio de Janeiro, Brazil" [= Rio de Janeiro, Rio de Janeiro State, SE Brazil, 22°54'S, 43°14'W, elevation NSL] via lectotype selection.

Distribution: Southeastern Brazil (Alagoas, Bahia, Ceará, Espírito Santo, SE Minas Gerais, Paraná, Rio de Janeiro, N and NE Rio Grande do Sul, Santa Catarina, São Paulo), NSL–940 m.

Sources: Prado, 1943, Di-Bernardo & Lema, 1988, Argólo, 1998b, Freire & Silva, 2000, Loebmann, 2008a and Paula et al., 2011.

Remarks: Head and body pattern of holotype illustrated in C.W. Myers (1974: figs. 45f (upper), 46a).

2. *Taeniophallus bilineatus* (J.G. Fischer, 1885b). Jahrb. Hamburg. Wiss. Anst. 2: 98–99, pl. 3, figs. 5a–c. (*Enicognathus bilineatus*)

Type: Holotype, BMNH 1946.1.5.77 (formerly JGF 858 & BMNH 1886.5.15.19), a 325 mm male (commercial dealer).

Type locality: "Santos" [Brazil] [= Santos, E São Paulo State, SE Brazil, 23°57'S, 46°20'W, elevation 15 m].

Distribution: Southeastern Brazil (Espírito Santo, S Minas Gerais, Paraná, S Rio de Janeiro, NE Rio Grande Do Sul, Santa Catarina, São Paulo, Cardoso Is.), 15–1075 m.

Sources: Di-Bernardo & Lima, 1991, Hiert, 2006 and Cicchi et al., 2007.

3. *Taeniophallus brevirostris* (W.C.H. Peters, 1863c). Mber. Königl. Akad. Wiss. Berlin 1863(6): 280–281. (*Dromicus brevirostris*)

Synonyms: *Enicognathus taeniolatus* Jan, 1863a, and *Dromicus viperinus* A.C.L.G. Günther, 1868.

Type: Holotype, ZMB 3869, a 315 mm specimen (purchased), lost *fide* G. Peters in C.W. Myers (1974: 202) but extant *fide* Bauer et al. (1995: 71).

Type locality: "Quito" [Ecuador] (in error). Probably lowland locality in Ecuador *fide* J.A. Peters (1955: 347), but considered unknown *fide* C.W. Myers (1974: 202).

Distribution: Northern South America. Southern Colombia (Amazonas, Putumayo, Vaupés), ext. W Venezuela (Zulia), Guyana, French Guiana (Cayenne), Suriname (Brokopondo, Para), E Ecuador (Chimborazo, Morona-Santiago, Napo, Pastaza, Sucumbios, Tungurahua, Zamora-Chinchipa), E Peru (Amazonas, Cuzco, Huánuco, Loreto, Madre de Dios, San Martín), N Brazil (Acre, Amapá, Amazonas, Pará, Rondônia) and N Bolivia (Beni, La Paz), 30–1500 (2000) m.

Sources: Boettger, 1888b, Shreve, 1934, H.W. Parker, 1935, Hoge & Belluomini, 1960, Cunha & Nascimento, 1978, 1993, Duellman, 1978, Hoogmoed, 1979, Gasc & Rodrigues, 1980, Abuys, 1986a, Lancini, 1986, Pérez-Santos, 1986, Chippaux, 1987, Pérez-Santos & Moreno, 1988, 1991, Duellman & Mendelson, 1995, Starace, 1998 and Yuki, 1999.

4. *Taeniophallus nebularis* Schargel, Rivas-Fuenmayor & Myers, 2005. Amer. Mus. Novit. (3484): 4–11, figs. 1–6.

Type: Holotype, MHNLS 15743, a 492 mm male (G. Rivas, C.L. Barrio-Amorgós, & W.S. Schargel, 2 June 2002).

Type locality: "trail between Las Melenas and Cerro Humo, 800 m elevation (10°39'N, 62°34'W), Peninsula de Paria, Estado Sucre, Venezuela."

Distribution: Northeastern Venezuela (Sucre), 800 m. Known only from type locality.

Source: Navarrete et al., 2009.

5. *Taeniophallus nicagus* (Cope, 1868c). Proc. Acad. Nat. Sci. Philadelphia 20(2): 132–133. (*Lygophis nicagus*)

Type: Holotype, MNHN 55, a 367 mm male.

Type locality: "Neotropical" [region]. Brazil *fide* Jan and Sordelli (1866 *in* 1860–1866: 11).

Distribution: Northern South America. Suriname, Guyana and N Brazil (Amapá).

Remarks: Holotype illustrated in Jan & Sordelli, 1866 *in* 1860–1866(16): pl. 1, fig. 4.

6. *Taeniophallus occipitalis* (Jan, 1863a). Arch. Zool. Anat. Fis. 2(2): 266–267. (*Enicognathus occipitalis*)

Synonyms: *Dromicus wuchereri* A.C.L.G. Günther, 1863f, and *Dromicus miolepis* Boettger, 1891.

Type: Lectotype, ZMH 4423, a 340 mm specimen (Schramm, 1861), designated herein.

Type locality: "Bahia" [= Bahia State, NE Brazil] via lectotype selection.

Distribution: South America. Southeastern Colombia (Amazonas), NE Peru (Loreto, Madre de Dios), E Brazil (Bahia, Ceará, Distrito Federal, Goiás, Pará, Paraiba, Paraná, Piauí, Rio Grande do Sul, Rondônia, São Paulo, Sergipe), Bolivia (Beni, La Paz, Santa Cruz, Tarija), Paraguay (Alto Paraguay, Boquerón, Central, Concepción, Neembucú, Presidente Hayes), Uruguay (Artigas, Cerro Largo, Paysandú, Rivera, Salto, Treinta y Tres) and N Argentina (Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, Misiones, Salta, Santiago del Estero, Tucumán), NSL–600 m.

Sources: Bertoni, 1913, Devincenzi, 1925, Amaral, 1934b, Prado, 1946a, Vaz-Ferreira & Sierra de Soriano, 1960, Achaval, 1976, Lema & Fabián-Beurmann, 1977, Dixon & Soini, 1986, Fugler, 1986, Pérez-Santos, 1986, Pérez-Santos & Moreno, 1988, Duellman & Salas, 1991, J.D. Williams & Francini, 1991, Cunha & Nascimento, 1993, Reati, 1996, Yanosky et al., 1996, Fugler et al., MS, Leynaud & Bucher, 1999, Nogueira, 2001, Giraudo & Scrocchi, 2002, A.P. Santos & Lema, 2004, Carreira-Vidal et al., 2005, Duellman, 2005, Cacciali, 2008, Santos, et al., 2008, Morato et al., 2011 and Prigioni et al., 2011.

Remarks: ZMH 4423, which was illustrated in Jan & Sordelli, 1866 *in* 1860–1866(16): pl. 1, fig. 1, would "make the best lectotype" *fide* C.W. Myers (1974: 209).

7. *Taeniophallus persimilis* (Cope, 1869b). Proc. Acad. Nat. Sci. Philadelphia (1868) 20: 308. (*Liophis persimilis*)

Synonyms: *Liophis insignissimus* Amaral, 1926a, and *Rhadinaea beui* Prado, 1944b.

Type: Holotype, MCZ 436, a 286 mm specimen (J.L.R. Agassiz, April 1865–June 1866), lost *fide* T. Barbour & Loveridge (1929a: 297) and E.E. Williams *in* C.W. Myers (1974: 212).

Type locality: "Rio de Janeiro, Brazil" [Rio de Janeiro, Rio de Janeiro State, SE Brazil, 22°54'S, 43°14'W, elevation NSL].

Distribution: Southeastern Brazil (Espírito Santo, Paraná, Rio de Janeiro, Santa Catarina, São Paulo).

Source: Di-Bernardo & Lema, 1986.

Remarks: Possibly occurs in NE Rio Grande do Sul *fide* Di-Bernardo & Lema (1986: 114).

8. *Taeniophallus poecilopogon* (Cope, 1863b). Proc. Acad. Nat. Sci. Philadelphia 15(3): 100–101. (*Rhadinaea poecilopogon*)

Synonyms: *Enicognathus elegans* Jan, 1863a (*nomen oblitum*), and *Dromicus melanocephalus* W.C.H. Peters, 1863.

Type: Holotype, USNM 31278, a 1008 mm male (H.W. Kennedy).

Type locality: "Paysondu, Uraguay" [= Paysandú, ext. SW Paysandú Dept., W Uruguay, 32°19'S, 58°05'W, elevation 25 m].

Distribution: Southeastern South America. Southern Brazil (S Mato Grosso, S Minas Gerais, Paraná, Rio Grande do Sul, Santa Catarina, São Paulo), Uruguay (Cerro Largo, Montevideo, Paysandú, Rocha, Treinta y Tres), S Paraguay (Asunción) and ext. NE Argentina (Buenos Aires, Corrientes, Entre Ríos, La Paz, Misiones), 25–65 m.

Sources: Di-Bernardo & Lema, 1987, J.D. Williams & Francini, 1991, Carreira-Vidal et al., 2005, Etchepare & Zaracho, 2009, Nenda & Di Pietro, 2009 and Falcione et al., 2010.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Rhadinaea poecilopogon* Cope is designated a *nomen protectum* and *Enicognathus elegans* Jan a *nomen oblitum*.

9. *Taeniophallus quadriocellatus* Santos, Di-Bernardo & Lema, 2008. J. Herp. 42(3): 420–423, figs. 1–2.

Type: Holotype, MPEG 20144, a 434 mm male (E.F. Santos, 11 Feb. 2002).

Type locality: "Floresta Nacional de Caxiulanã, Estação Cientifica Ferreira Penna (01°42'30"S and 51°31'45"W), Melgaço municipality, Pará, Brazil."
Distribution: Northeastern Brazil (Pará, Marajó Is.).

†*TALLAHATTAOPHIS* Holman & Case, 1988 (Boidae)

Type species: †*Tallahattaophis dunni* Holman & Case, 1988.
Distribution: Lower Eocene of USA.
Sources: Holman & Case, 1988 and Holman, 2000a.

1. †*Tallahattaophis dunni* Holman & Case, 1988. J. Vert. Paleont. 8(3): 329–331, figs. 3a–e.

Type: Holotype, MSUVP 1189, one trunk vertebra (W.E. Dunn & G. Ziegenhine).
Type locality: "Point 'A' Dam Site, about 123–182 m south of the McWilliams Power Plant at the Dam, Conecuh River, 1.6 km west of Andalusia, Covington County, Alabama, NW1/4, SW1/4, Sec. 35, T5N, R15E. (Early Middle Eocene (Bridgerian); Claiborne Group, Tallahatta formation."
Distribution: Lower Eocene (Bridgerian: 46.2–50.3 mya) of USA (Alabama). Known only from type locality.

TANTALOPHIS Duellman, 1958b (Dipsadidae)

Type species: *Leptodeira discolor* A.C.L.G. Günther, 1860g.
Distribution: Southern Mexico.
Sources: A.C.L.G. Günther, 1885–1902, A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, E.H. Taylor, 1938, H.M. Smith & Taylor, 1945, Duellman, 1958a–b, C.W. Myers & Campbell, 1981, Casas-Andreu et al., 1996, Zaher et al., 2009 and Mulcahy et al., 2011.

1. *Tantalophis discolor* (A.C.L.G. Günther, 1860g). Proc. Zool. Soc. London 28(1): 317–318. (*Leptodeira discolor*)

Types: Syntypes (2), BMNH 1946.1.23.67–68, a 535 mm and 509–536 mm and male (A. Sallé, 1846–1856).
Type locality: "Oaxaca (Mexico)."
Distribution: Southern Mexico (Sierra Madre del Sur of W Oaxaca), 2400–2520 m.

T

TANTILLA Baird & Girard, 1853 (Colubridae)

Synonyms: *Homalocranion* A.-M.-C. Duméril, 1853, *Lioninia* Hallowell, 1861, *Homalocranium* A.C.L.G. Günther, 1863c (*nomen emendatum*), *Homolocranium* – Dugès, 1869 (*nomen incorrectum*), *Tortilla* – Westphal-Castelnau, 1870 (*nomen incorrectum*), *Microdromus* A.C.L.G. Günther, 1872b, *Homulocranion* – Locard, 1875 (*nomen incorrectum*), *Homolacranion* – Velasco, 1890b (*nomen incorrectum*), *Pogonaspis* Cope, 1894d, *Hamalocranion* – E.B. Branson, 1904 (*nomen incorrectum*), *Pagonaspis* – Amaral, 1930f (*nomen incorrectum*), and *Tortix* – Marcus, 1937 (*nomen incorrectum*).
Type species: *Tantilla coronata* Baird & Girard, 1853.
Distribution: Southern USA and Latin America.
Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), middle/upper Pleistocene (Irvingtonian II) of USA (Texas), and upper Pleistocene (Rancholabrean I, II) of USA (California, Kansas, New Mexico, Texas).
Sources: F. Werner, 1924c, H.M. Smith & Taylor, 1945, J.A. Peters & Orejas-Miranda, 1970, L.D. Wilson, 1982a–b, 1999, Villa et al., 1988, Flores-Villela, 1993, L.D. Wilson & McCranie, 1999 and Holman, 2000a.

1. *Tantilla albiceps* T. Barbour, 1925. Occ. Pap. Boston Soc. Nat. Hist. (1921–1931) (5): 156.

Type: Holotype, MCZ 20600, a 212 mm male (Indian boy via T. Barbour, Feb. 1925).
Type locality: "near the laboratory building, Barro Colorado Island, Gatun Lake, Canal Zone of Panama."
Distribution: Central Panama (Canal Zone), 100–160 m.
Source: L.D. Wilson, 1985g.

2. *Tantilla alticola* (Boulenger, 1903b). Ann. Mag. Nat. Hist. (7) 12(69): 353. (*Homalocranium alticola*)

Synonyms: *Homalocranium coralliventre* Boulenger, 1913d, and *Tantilla costaricensis* E.H. Taylor, 1954.
Types: Syntypes (3), BMNH 1946.1.8.63–65, (formerly BMNH 1898.10.27.7–9), first two males, third a juvenile female, longest syntype 330 mm (A.E. Pratt, 1891–1901).
Type locality: "Santa Rita, north of Medellin, Colombia, altitude 9000 feet" [= Antioquia Dept.].
Distribution: Lower Central America and ext. NW South America. Nicaragua (Jinotega, Matagalpa), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Puntarenas), Panama (Chiriquí) and NW Colombia (Antioquia, Chocó, Nariño), 50–2745 m.
Sources: L.D. Wilson, 1986b, 1987c, Castillo et al., 1990, Solis, 1991, G. Köhler, 1999b, Solórzano, 2004 and Mueses-Cisneros & Cepeda Quilindo, 2006.

3. *Tantilla andinista* L.D. Wilson & Mena, 1980. Mem. San Diego Soc. Nat. Hist. (11): 21–22, figs. 7, 12a.

Type: Holotype, KU 135209, a 285 mm female (T.H. Fritts, 9 June 1970).
Type locality: "5 km E Alausí, Prov. Chimborazo, Ecuador, elevation 2600–2750 m."

Distribution: Central Ecuador (Chimborazo), 2600–2750 m. Known only from holotype.
Sources: L.D. Wilson, 1985i, 1987c.

4. *Tantilla armillata* Cope, 1875a. J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 143.

Type: Holotype, ANSP 5363 (C.H. Van Patten, 1865–1875).
Type locality: "Middle Costa Rica."
Distribution: Central America. Guatemala (Sacatepéquez, Santa Rosa), El Salvador (San Salvador), Honduras (Choluteca, Comayagua, Francisco Morazán, Gracias a Dios, Olancho, Valle, Yoro), Nicaragua (Chontales, Managua, Matagalpa, Rivas), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José) and possibly W Panama, NSL–1400 m.
Sources: Savage, 2002, Solórzano, 2004, G. Köhler et al., 2005 and McCranie, 2011a.
Remarks: A valid species *fide* Savage (2002: 692–693) but see Remarks under *T. melanocephala* and *T. ruficeps*.

5. *Tantilla atriceps* (A.C.L.G. Günther, 1895 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 146–147, pl. 52, fig. b. (*Homalocranium atriceps*)

Types: Syntypes (2), BMNH 1946.1.8.81–82 (formerly BMNH 1889.7.3.36–37), a 173 mm and 168 mm male, respectively (W. Taylor, 1889).
Type locality: "Mexico, Nuevo Leon."
Distribution: Southern USA (S Texas) and N Mexico (SE Chihuahua, S Coahuila, Durango, NW Nuevo León, San Luis Potosí, Tamaulipas, NE Zacatecas), 150–2400 m.
Sources: Cole & Hardy, 1981, 1983a, Conant & Collins, 1998, Werler & Dixon, 2000, Gotte & Wilson, 2005 and Lazcano-Villarreal et al., 2010.

6. *Tantilla bairdi* L.C. Stuart, 1941b. Occ. Pap. Mus. Zool., Univ. Michigan (452): 1–3.

Type: Holotype, UMMZ 89223, a 342 mm female (L.C. Stuart, 17 May 1940).
Type locality: "Two km. northeast of Finca Chichén (10 km. south of Cobán [straight line]) on Chamelco trail, Alta Verapaz, Guatemala. Altitude, about 1550 m."
Distribution: Northern Guatemala (Alta Verapaz, Baja Verapaz), 1350–1750 m.
Sources: L.D. Wilson, 1985a, k.

7. *Tantilla bocourti* (A.C.L.G. Günther, 1895 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 149. (*Homalocranium bocourti*)

Type: Lectotype, BMNH 1946.1.8.70 (formerly MNHN 3694 & BMNH 1894.10.2.1), a 241 mm male (A.A.D. Dugès), designated by Boulenger (1896a: 224).
Type locality: "Guanajuato" [= Guanajuato, Guanajuato State, cen. Mexico, 20°55'N, 101°10'W, elevation 2000 m] via lectotype selection.
Distribution: Mexico (Aguacalientes, Colima, Distrito Federal, S Durango, Guanajuato, Guerrero, Hidalgo, Jalisco, México, Michoacán, Morelos, Nayarit, Oaxaca, Puebla, S Querétaro, NE Sinaloa, cen. Veracruz, W Zacatecas, María Cleofas Is.), (400) 1500–2510 m.
Sources: McDiarmid et al., 1976, McDiarmid & Folke, 1991, McDiarmid, 1992, Benitez-Gálvez, 1997, L.D. Wilson, 1999 and Ponce-Campos & Huerta-Ortega, 2000.

8. *Tantilla boipiranga* Sawaya & Sazima, 2003. Herpetologica 59(1): 119–124, figs. 1a, 2–3 (left).

Type: Holotype, ZUEC 1840, a 375 mm male (J.R. Meyer & R.J. Sawaya, 4 May 1995).
Type locality: "'the serrote' in montane fields ("campos rupestres") of the Serra do Cipó (19°17' S; 43°36' W; approximate elevation 1200 m), Santana do Riacho, Minas Gerais, southeastern Brazil."
Distribution: Southeastern Brazil (Minas Gerais), 450–1300 m.
Sources: Cassimiro, 2003 and Lema, 2004.

9. *Tantilla brevicauda* Mertens, 1952b. Zool. Anz. 149(5–6): 137–138.

Type: Holotype, SMF 43243, a 182 mm female (A. Zilch, 12 Nov. 1951).
Type locality: "El Grito, Finca Los Angeles, 1510 m. H., Cumbre de Jayaque, Dept. La Libertad, El Salvador."
Distribution: El Salvador (Ahuachapán, La Libertad, Morazán, San Salvador, Morazán, La Libertad, San Vicente) and S Guatemala (Chimaltenango), 750–1750 m.
Sources: L.D. Wilson, 1988a, L.D. Wilson et al., 1999 and G. Köhler et al., 2005.

10. *Tantilla briggsi* Savitzky & Smith, 1971. J. Herp. 5(3–4): 167–169, fig. 1.

Type: Holotype, UCM 40000, a 301 mm male (T. MacDougall, July –Sept. 1968).
Type locality: "12 de Julio, an ejido 3 leagues west of Donají (formerly Tolosa) on the trans-isthmus railway, Caribbean drainage, Oaxaca, Mexico."
Distribution: Southern Mexico (S Oaxaca), 90–500 m. Known only from holotype.
Sources: L.D. Wilson, 1985b, Casas-Andreu et al., 1996 and L.D. Wilson et al., 1999.

11. *Tantilla calamarina* Cope, 1867b. Proc. Acad. Nat. Sci. Philadelphia (1866) 18(4): 320.

Synonyms: *Tantilla bimaculata* Cope, 1875a, *Tantilla martindelcampoi* E.H. Taylor, 1937a, and *Geophis gertschi* Bogert & Porter, 1966a.
Type: Holotype, USNM 6600, a 196 mm female (J.J. Major).

Type locality: "Guadalaxara, Mexico" [= Guadalajara, Jalisco, Mexico, 20°40'N, 103°21'W, elevation 1550 m] (probably in error *fide* J.A. Peters (1954: 31). Corrected to Colima State, Mexico *fide* Zweifel (1959a: 6).
Distribution: Mexico (Colima, Distrito Federal, cen. Guerrero, Jalisco, Michoacán, Morelos, Nayarit, ? Puebla, Sinaloa, María Madre Is.), NSL–1655 m.
Sources: E.H. Taylor, 1937a, H.M. Smith, 1942b, J.A. Peters, 1954, Zweifel, 1960, Duellman, 1965b, L. Hardy & McDiarmid, 1969, McDiarmid et al., 1976, L.D. Wilson & Meyer, 1981, L.D. Wilson, 1988b, H.M. Smith et al., 1993, 1997, García & Ceballos, 1994, Ramirez-Bautista, 1994, Benitez-Gálvez, 1997, L.D. Wilson & Campbell, 2000 and Canseco-Márquez et al., 2007.
Remarks: Cope (1867b: 320) incorrectly reported the collector of the type as I.I. Major.

12. *Tantilla capistrata* Cope, 1875b. J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 181.

Type: Holotype, ANSP 11581, an 136 mm female (J. Orton, 1867–1877).
Type locality: "Valley of Jequetepeque, Peru" [= La Libertad Dept.].
Distribution: Southern Ecuador (El Oro, Loja, Zamora-Chinchipe) and W Peru (Cajamarca, La Libertad, Lima, Piura), NSL–1830 m.
Sources: Lema, 1978c, L.D. Wilson & Mena, 1980, L.D. Wilson, 1990a, Pérez-Santos & Moreno, 1991 and Aguilar et al., 2007.

13. *Tantilla cascadae* L.D. Wilson & Meyer, 1981. Milwaukee Pub. Mus. Contr. Biol. Geol. (42): 13–15, figs. 4, 5a.

Type: Holotype, AMNH 107389, a female (D.F. Brand, June 1939).
Type locality: "Tzaráracua Falls (= Cascada la Tzaráracua), S of Uruapán [10.5 km south, according to Duellman, 1961], Michoacán, Mexico."
Distribution: Southwestern Mexico (Michoacán), 1430 m. Known only from holotype.
Sources: L.D. Wilson, 1988e and L.D. Wilson & Campbell, 2000.
Remarks: Length of type not determined due to dessication *fide* L.D. Wilson & Meyer (1981: 13).

T

14. *Tantilla ceboruca* Canseco-Marquez, Smith, Ponce-Campos, Flores-Villela & Campbell, 2007. J. Herp. 41(2): 221–223, figs. 1–2.

Type: Holotype, MZFC 17048, a 195 mm male (E.N. Smith, P. Ponce-Campos & J. Malone, 17 July 2003).
Type locality:"Volcán Ceboruco, Nayarit, Mexico. Carretera Jala-Cerro microhonI. Das, 2094 m. (21.13199°N, 104.50462°W)."
Distribution: Western Mexico (Colima, Nayarit), 1700–2095 m.
Source: Reyes-Velasco et al., 2012.

15. *Tantilla coronadoi* Hartweg, 1944. Occ. Pap. Mus. Zool., Univ. Michigan (486): 4–5.

Type: Holotype, UMMZ 85697, adult ? female (W.W. Brown, 1932–1944).
Type locality: "vicinity of Chilpancingo, Guerrero" [= vicinity of Chilpancingo [17°33'N, 99°30'W, elevation 1270 m], Sierra Madre del Sur, Guerrero, Mexico].
Distribution: Southwestern Mexico (cen. Guerrero), 1400–1525 m.
Sources: W. Davis & Dixon, 1959, L.D. Wilson & Meyer, 1981, L.D. Wilson, 1990f, L.D. Wilson & Campbell, 2000 and Reyes-Velasco et al., 2012.

16. *Tantilla coronata* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 131.

Synonyms: *Homalocranium wagneri* Jan, 1862b, and *Tantilla coronata mitrifer* A. Schwartz, 1953.
Type: Holotype, USNM 1875, a 222 mm female (D.C. Lloyd).
Type locality: "Kemper Co., Miss." [Mississippi, USA].
Distribution: Southeastern USA (Alabama, NW Florida, Georgia, ext. S Indiana, W Kentucky, SE Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, S Virginia), NSL–460 m.
Sources: A. Schwartz, 1953, Telford, 1966, 1982, Mount, 1975, Christman, 1980, Ernst & Barbour, 1989, Ashton & Ashton, 1988, Aldridge, 1992, Aldridge & Semlitsch, 1992a–b, J.C. Mitchell, 1994, Palmer & Braswell, 1995, Tennant, 1997, Conant & Collins, 1998 and Werler & Dixon, 2000.
Remarks: Holotype erroneously listed as USNM 1876 *fide* Telford (1966: 262, 285).

17. *Tantilla cucullata* Minton, 1956. Fieldiana: Zool. 34(39): 449–452, fig. 98.

Synonym: *Tantilla diabola* Fouquette & Potter, 1961.
Type: Holotype, FMNH 74384, a 336 mm male (S.A. Minton, Jr., 1 July 1955).
Type locality: "six miles south-southeast of Alpine, Brewster County, Texas" [USA].
Distribution: Southern USA (SW Texas).
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Texas).
Sources: Dixon et al., 2000 and Werler & Dixon, 2000.
Remarks: Elevated to species status *fide* Werler & Dixon (2000: 20).

18. *Tantilla cuniculator* H.M. Smith, 1939b. Field Mus. Nat. Hist. (Zool.) 24(3): 32–34. (*Tantilla moesta cuniculator*)

Type: Holotype, FMNH 19408, a 101 mm female (E. Blackburn & E.W. Andrews, 1934).

Type locality: "Mérida, Yucatán, México."
Distribution: Southeastern Mexico (Quintana Roo, Yucatán), N Belize (Belize, Orange Walk) and N Guatemala (Petén), NSL–200 m.
Sources: L.D. Wilson, 1985d, J.C. Lee, 1980, 1996, 2000, J.A. Campbell, 1998b, L.D. Wilson et al., 1999, Stafford & Meyer, 2000 and Stafford, 2004.

19. *Tantilla deppii* (Bocourt, 1883) *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909. Miss. Sci. Mex. Amér. Cen., Rept. 3(9): 584–585, pl. 36, figs. 11, 11a–d. (*Homalocranion deppii*)

Type: Lectotype, MNHN 54, a 198 mm male (A.B. Ghiesbreght), designated by L.D. Wilson & Meyer (1981: 18).
Type locality: "México" via lectotype selection. Restricted to vicinity of Huitzilac, Morelos, Mexico *fide* W. Davis & Smith (1953: 138).
Distribution: Southern Mexico (Guerrero, N Morelos, NW Oaxaca), 1525–2440 m.
Sources: L.D. Wilson & Meyer, 1981, L.D. Wilson, 1988f, Flores-Villela & Hernandez-García, 1989, Flores-Villela et al., 1991, L.D. Wilson & Campbell, 2000 and Canseco-Márquez et al., 2007.

20. *Tantilla flavilineata* H.M. Smith & Burger, 1950. Herpetologica 6(5): 117–119.

Type: Holotype, UIMNH 6321, a 300 mm female (J. Burger & W.L. Burger, 23 Aug. 1949).
Type locality: "8 miles southeast of Nochixtlan, Oaxaca, Mexico" [= 13 km SE Nochixtlan, Oaxaca State, Mexico, 17°25'N, 97°11'W, elevation 2090 m].
Distribution: Southern Mexico (cen. Oaxaca), 2190–2340 m.
Sources: L.D. Wilson & Meyer, 1971, L.D. Wilson, 1985e, Casas-Andreu et al., 1996 and L.D. Wilson et al., 1999.

21. *Tantilla gracilis* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 132.

Synonym: *Tantilla hallowelli* Cope, 1860d.
Type: Holotype, USNM 2040, a 184 mm specimen (J.H. Clark [U.S.-Mex. Bound. Surv.], 1850–1852, via J.D. Graham), lost *fide* Gotte & Wilson (2005: 597–599).
Type locality: "Indianola, Texas" [USA].
Distribution: Central USA (Arkansas, ext. SW Illinois, E Kansas, N Louisiana, Missouri, Oklahoma, Texas) and N Mexico (NE Coahuila), NSL–610 m.
Sources: Baird, 1859, Kirn et al., 1941, Webb, 1970, Cole & Hardy, 1981, Tennant, 1984, T. R. Johnson, 1987, 2000, Dundee & Rossman, 1989, Ernst & Barbour, 1989, Trauth, 1991b, Collins, 1993, Conant & Collins, 1998, Fitch, 1999, Werler & Dixon, 2000 and Gotte & Wilson, 2005.
Remarks: UMMZ 3781 (formerly USNM 4500) erroneously listed as holotype *fide* Kirn et al. (1949: 240), J.A. Peters (1952: 51), and Kluge (1984: 74).

22. *Tantilla hendersoni* Stafford, 2004. J. Herp. 38(1): 44–47, figs. 1, 2 (upper), 3.

Type: Holotype, BMNH 2002.3, a 272 mm female (P. Stafford, S. McMurry & T. Rainwater, 13 Sept. 2002).
Type locality: "0.5 km east of Las Cuevas on trail to Monkey Tail River, Cayo District (GR 1643'95"N, 8859'17"W), Belize."
Distribution: Southern Belize (Cayo), 580 m. Known only from type locality.
Source: Stafford et al., 2010.
Remarks: Holotype possibly a juvenile *T. impensa* and additional material should demonstrate *T. hendersoni* is a synonym of *T. impensa fide* Stafford et al. (2010: 385).

23. *Tantilla hobartsmithi* E.H. Taylor, 1937a. Trans. Kansas Acad. Sci. (1936) 39: 340–342, fig. 2.

Synonym: *Tantilla utahensis* Blanchard, 1938.
Type: Holotype, UIMNH 25066 (formerly EHT-HMS 4558 & EHT-CC 326), adult male (E.H. Taylor, 3 July 1934).
Type locality: "near La Posa, 10 mi. northwest of Guaymas, Sonora" [Mexico]. Further specified as two miles north of La Posa, back of the first low Distribution on the bank of a dry stream bed at night *fide* E.H. Taylor (1938: 497).
Distribution: Southwestern USA (Arizona, S California, ext. W-cen. Colorado, SW Nevada, S New Mexico, SW Texas, S Utah) and N Mexico (E Chihuahua, N Coahuila, W Sonora), 150–1980 m.
Sources: W.W. Tanner & Banta, 1962b, Fowlie, 1965, Cole & Hardy, 1981, 1983b, Tennant, 1984, Van Devender & Bradley, 1994, M. Williamson et al., 1994, Degenhardt et al., 1996, P.R. Brown, 1997, Hammerson, 1999, Bartlett & Tennant, 2000, Werler & Dixon, 2000, Gotte & Wilson, 2005 and Lazcano-Villarreal et al., 2010.

24. *Tantilla impensa* J.A. Campbell, 1998a . Sci. Pap. Nat. Hist. Mus., Univ. Kansas (7): 6–9, fig. 3.

Type: Holotype, UTA 38196 (formerly ENS 5199), a 642 mm female (E.N. Smith, 2 July 1994).
Type locality: "Aldea San Miguelito, Sierra de Caral, Municipio de Morales, Izabal, Guatemala, 460 m (15°22' N, 88°43'W)."
Distribution: Southern Mexico and upper Central America. Southeastern Mexico (Chiapas), E Guatemala (Alta Verapaz, Huehuetenango, Izabal) and W Honduras (Copán, Cortés), 10–1600 m.
Sources: L.D. Wilson & McCranie, 1999, Stafford, 2004, Stafford et al., 2010 and McCranie, 2011a.
Remarks: Possibly includes *T. hendersoni fide* Stafford et al., (2010: 385).

25. *Tantilla insulamontana* L.D. Wilson & Mena, 1980. Mem. San Diego Soc. Nat. Hist. (11): 24–25, figs. 10, 12d.

Type: Holotype, KU 152207, a 249 mm male (A.C. Echternacht, 12 June 1971).
Type locality: "Río Minas, 15.1 km W Santa Isabel, Prov. Azuay, Ecuador, elevation ~ 1250 m."
Distribution: Southern Ecuador (Azuay), 1250–2100 m.
Sources: L.D. Wilson, 1987c, 1990g and Pérez-Santos & Moreno, 1991.

26. *Tantilla jani* (A.C.L.G. Günther, 1895 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 148, pl. 52, fig. d. (*Homalocranium jani*)

Synonym: *Tantilla cuesta* L.D. Wilson, 1982a.
Type: Lectotype, BMNH 1946.1.8.68, a 241 mm female (possibly G.C. Champion, 1879–1883, via F.D. Godman), designated by H.M. Smith (1942b: 37).
Type locality: "Guatemala" via lectotype selection.
Distribution: Southeastern Mexico (S Chiapas, E Oaxaca) and S Guatemala (San Marcos, Suchitepéquez), 100–1050 m.
Sources: L.C. Stuart, 1963, L.D. Wilson & Meyer, 1971, L.D. Wilson, 1982a, 1985b–c, f, Casas-Andreu et al., 1996, J.A. Campbell, 1998b and L.D. Wilson et al., 1999.
Remarks: L.D. Wilson & Meyer (1971: 25) examined both *T. jani* syntypes and confirmed H.M. Smith's (1942d: 32) selection of the lectotype, as the status of other syntype (BMNH 1946.1.8.71) is uncertain. If it eventually proves to be *T. jani,* the Distribution would include Nicaragua (Matagalpa).

27. *Tantilla johnsoni* L.D. Wilson, Vaughan & Dixon, 1999. J. Herp. 33(1): 1–3, figs. 1–2.

Type: Holotype, CM 51741, a 337 mm male (E.C. Welling, 11 Aug. 1968).
Type locality: "Musté, Municipio Motozintla, Chiapas, México, approximate elevation 450 m."
Distribution: Extreme SE Mexico (SE Chiapas), 450 m.
Remarks: Locality and elevation of the holotype questioned *fide* J.D. Johnson et al., 2010.

T

28. *Tantilla lempira* L.D. Wilson & Mena, 1980. Mem. San Diego Soc. Nat. Hist. (11): 25–26, figs. 11, 12e.

Type: Holotype, LSUMZ 26093, a 258 mm female (E.A. Liner, 3 June 1968).
Type locality: "41 km NW Tegucigalpa, Depto. Francisco Morazán, Honduras."
Distribution: Southern Honduras (Comayagua, El Paraíso, Francisco Morazán, La Paz), 1450–1730 m.
Sources: L.D. Wilson, 1982a, 1990b, L.D. Wilson & Meyer, 1985 and McCranie, 2011a.

29. *Tantilla marcovani* Lema, 2004. Acta Biol. Leopold. 26(2): 269–271, figs. 1–2.

Type: Holotype, MNRJ 6525, a 283+ mm male (M. Porto, 14 April 1990).
Type locality: "Pico do Jabre, highest point of Paraiba State, Brazil at 50 km SW from Teixeira city (7.13 S; 37.15 W), Maturéia locality. The region is located in highlands within Caatinga, with 1090 m of altitude."
Distribution: Extreme E Brazil (Paraiba), 1090 m. Known only from type locality.

30. *Tantilla melanocephala* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 218. (*Coluber melanocephalus*)

Synonyms: *Coluber capiteniger* Lacépède, 1789 (*nomen rejiciendum*), *Elaps melanocephalus* Wagler *in* Spix, 1824, *Homalocranion semicinctum* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Elapomorphus mexicanus* A.C.L.G. Günther, 1862a, *Homolocranion melanocephalum fuscum* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Tantilla pallida* Cope, 1887b, *Homalocranium melanocephalum fraseri* A.C.L.G. Günther, 1895 *in* 1885–1902, *Homalocranium melanocephalum pernambucense* A.C.L.G. Günther, 1895 *in* 1885–1902, *Homalocranium longifrontale* Boulenger, 1896b, *Homalocranium hoffmanni* F. Werner, 1909b, *Elapomorphus nuchalis* T. Barbour, 1914d, and *Tantilla equatoriana* L.D. Wilson & Mena, 1980.
Type: Lectotype, NHR Lin-86 (formerly MAFR), a 210 mm specimen (Mus. Drottn.), designated by Andersson (1899: 10–11).
Type locality: "America" via lectotype selection.
Distribution: Panama and South America. Panama (Chiriquí, Coclé, Colón, Darién, Panamá, Veragua, Barro Colorado Is.), Trinidad and Tobago (SE Tobago, Trinidad), Colombia (Amazonas, Antioquia, Atlántico, Bolívar, Caldas, Cauca, Chimborazo, Chocó, Cundinamarca, Loreto, Magdalena, Meta, Morona, Napo, Nariño, Pastaza, Putamayo, Santander, Santiago, Valle, Vaupés, Gorgona Is.), Venezuela (Amazonas, Anzoátegui, Aragua, Barinas, Bolívar, Carabobo, Cojedes, Distrito Federal, Falcón, Lara, Merída, Miranda, Monagas, Portuguesa, Sucre, Zulia) Guyana (Barima-Waini, Essequibo Islands-West Demerara, Upper Demerara-Berbice, Upper Takutu-Upper Essequibo), Suriname (Suriname), French Guiana (Cayenne, Saint-Laurent-du-Maroni), Ecuador (Cotopaxi, Esmeraldas, Guayas, Inbabura, Loja, Morena-Santiago, Napo, Pastaza, Pichincha), E Peru (Amazonas, Ayacucho, Cuzco, Huanuco, Junín, Loreto, Madre de Dios, Pasco, San Martin), Brazil (Amazonas, Bahia, Ceara, Goiás, Mato Grosso, Pará, Rio Grande do Norte, São Paulo, Tocantins), Bolivia (Cochabamba, La Paz, Santa Cruz), Uruguay (Artigas, Maldonado, Rivera, Salto, Tacuarembó), Paraguay (Cordillera) and N Argentina (Corrientes, Entre Ríos, Misiones), NSL–3080 m.

Sources: Roze, 1966a, Achaval & Vaz-Ferreira, 1974, Emsley, 1977, Cunha & Nascimento, 1978, 1993, L.D. Wilson & Mena, 1980, Vanzolini et al., 1980, L.D. Wilson & Meyer, 1985, Lancini, 1986, Chippaux, 1987, L.D. Wilson, 1987c, f, 1988g, 1992a, Peréz-Santos & Moreno, 1988, 1991, Lancini & Kornacker, 1989, Duellman & Salas, 1991, Gorzula & Señaris, 1998, Montanelli & Alvarez, 1998, Marques & Puorto, 1998, Starace, 1998, Freitas, 1999, Schaeffer & Alvarez, 2000, Giraudo & Scrocchi, 2002, Sawaya & Sazima, 2003, Greenbaum et al., 2004, Lema, 2004, Carreira-Vidal et al., 2005, Duellman, 2005, G. Köhler et al., 2005, Rivas-Fuenmayor & Barrio-Amorás, 2005, R.W. Henderson & Powell, 2006, 2009, Rojas-Runjaic et al., 2007, Navarrete et al., 2009 and C.J. Cole et al., 2013.

Remarks: Population in Panama questionable *fide* by L.D. Wilson (pers. comm.) and a review of *T. armillata, T. melanocephala,* and *T. ruficeps* of lower Central America is needed. Records for Mustique and Union Is., St Vincent & Grenadines, are probable introductions from Trinidad *fide* R.W. Henderson & Powell (2006: 501).

31. *Tantilla miyatai* L.D. Wilson & Knight *in* L.D. Wilson, 1987c. Milwaukee Pub. Mus. Contr. Biol. Geol. (68): 12–15, fig. 7.

Type: Holotype, MCZ 166541, a 375 mm male (G. Onore, Sept. 1983).

Type locality: "Puerto Quito (0°10'N, 79°16'W), Prov. Pichincha, Ecuador."

Distribution: Northern Ecuador (Pichincha), 750 m. Known only from type locality.

Sources: L.D. Wilson, 1987c, 1990c.

32. *Tantilla moesta* (A.C.L.G. Günther, 1863c). Ann. Mag. Nat. Hist. (3) 12(71): 352. (*Homalocranium moestum*)

Type: Holotype, BMNH 1946.1.9.74 (formerly BMNH 1864.1.26.119), a 322 mm female (O. Salvin & F.D. Godman, 1861–1863).

Type locality: "Province of Peten" [Guatemala]. Restricted to Flores, El Petén, Guatemala *fide* H.M. Smith & Taylor (1950a: 318).

Distribution: Southeastern Mexico (Quintana Roo, Yucatán) and N Guatemala (N Petén), NSL–200 m.

Sources: J.C. Lee, 1980, 1996, 2000, L.D. Wilson, 1982a, 1988h, J.A. Campbell, 1998 and Canseco-Márquez et al., 2002.

33. *Tantilla nigra* (Boulenger, 1914b). Proc. Zool. Soc. London 84(3): 816, pl. 2, figs. 2–2a. (*Homalocranium nigrum*)

Type: Holotype, BMNH 1946.1.8.69, a 171–175 mm female (H.G.F. Spurrell, 1912–1913).

Type locality: "near Peña Lisa, Condoto, Choco, Colombia" [= vicinity of Peña Lisa, Río Condoto, Chocó Dept., W Colombia, 5°06'N, 76°37'W, elevation 90 m].

Distribution: Northwestern Colombia (Antioquia, Chocó), 90–1970 m.

Sources: L.D. Wilson, 1987c, 1992b, Pérez-Santos & Moreno, 1988 and H. Sanchez, et al., 1995.

34. *Tantilla nigriceps* Kennicott, 1860. Proc. Acad. Nat. Sci. Philadelphia 12(8): 328.

Synonyms: *Scolecophis fumiceps* Cope, 1861a, *Homalocranion praeoculum* Bocourt, 1883 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, and *Tantilla kirnia* Blanchard, 1938.

Type: Neotype, UTEP 1349, a 257 mm male (A.J. Ward, E. Rogers & B. Kinniburgh, 15 June 1971), designated by Gotte & Wilson (2005: 600).

Type locality: "on Hueco Tanks [State Park] Road (Farm Road 2775), 0.25 miles [= 0.4 kilometers] N junction with United States highway 62–180" via neotype selection.

Distribution: South-central USA (SE Arizona, E Colorado, Kansas, SW Nebraska, W Oklahoma, New Mexico, Texas, E Wyoming) and N Mexico (E Chihuahua, ext. NW Coahuila, N Durango, NE Nuevo León, N Tamaulipas), NSL–2285 m.

Sources: Fowlie, 1965, Webb, 1970, Cole & Hardy, 1981, Tennant, 1984, W. Tanner, 1985, Hammerson, 1986, 1999, Collins, 1993, M. Williamson et al., 1994, Degenhardt et al., 1996, Conant & Collins, 1998, Nevárez, 1999, L.D. Wilson, 1999, Bartlett & Tennant, 2000, Werler & Dixon, 2000, Gotte & Wilson, 2005, Lazcano-Villarreal et al., 2010 and H.M. Smith et al., 2005.

Remarks: Photographs of neotype in Gotte & Wilson (2005: figs. 1–2). Syntypes (USNM 2046 & 4491) lost *fide* Gotte *in* L.D. Wilson (1999: 12). One syntype erroneously listed as USNM 2040 *fide* H.M. Smith & Taylor (1945: 140). Type locality restriction of Fort Bliss, El Paso Co., Texas *fide* H.M. Smith & Taylor (1950a: 362) invalid.

35. *Tantilla oaxacae* L.D. Wilson & Meyer, 1971. Herpetologica 27(1): 26–27, fig. 3, 7b.

Type: Holotype, UIMNH 40910, a 216 mm male (T. MacDougall, Feb. 1965).

Type locality: "Santo Tomas Teipan, Oaxaca, México" [= Santo Tomás Teipan, Oaxaca State, S Mexico, 17°06'N, 96°44'W, 1720 m]."

Distribution: Southern Mexico (S Oaxaca), 1720–1745 m.

Sources: L.D. Wilson, 1990h, Casas-Andreu et al., 1996 and L.D. Wilson et al., 1999.

36. *Tantilla oolitica* Telford, 1966. Bull. Florida St. Mus. (Biol. Sci.) 10(7): 281–282, fig. 7b.

Type: Holotype, UF 17326, a 215 mm male (D.R. Paulson, April 1955).
Type locality: "Miami, Dade County, Florida in a vacant lot on southwest 27th Avenue near 24th Street" [USA].
Distribution: Extreme SE USA (ext. S Florida, Grassy Key and Key Largo Is.), NSL–10 m.
Sources: Porras & Wilson, 1979, Christman, 1980, Telford, 1980a, Ashton & Ashton, 1988, Ernst & Barbour, 1989, Lazell, 1989, H. Campbell & Moler *in* Moler, 1992, Tennant, 1997, Conant & Collins, 1998 and Hines, 2011.

37. *Tantilla petersi* L.D. Wilson, 1979. Herpetologica 35(3): 274–275, figs. 1–2.

Type: Holotype, UMMZ 92074, a 443 mm female (P. Hershkovitz, 10 June 1934).
Type locality: "San Nicolás (this is probably one of several haciendas San Nicolás in the vicinity of Pimampiro) Pimanpiro (= Pimampiro, 0°26'N, 77°58'W), Provincia Imbabura, Ecuador."
Distribution: Northern Ecuador (E Imbabura), ca. 2100–2150 m.
Sources: L.D. Wilson, 1987c, 1991a and Pérez-Santos & Moreno, 1991.
Remarks: L.D. Wilson (1997: 274) erroneously reported the collecting date as 15 April 1934.

38. *Tantilla planiceps* (Blainville, 1835). Nouv. Ann. Mus. Hist. Nat. Paris (3) 4(3): 294–295, pl. 27, figs. 3, 3a–b. (*Coluber planiceps*)

Synonyms: *Tantilla eiseni* Stejneger, 1896, and *Tantilla eiseni transmontana* Klauber, 1943b.
Type: Holotype, MNHN 818, a 238–240 mm male (M.P.E. Botta, 1827–1829).
Type locality: "La Californie" [= Baja California, Mexico]. Restricted to Cabo San Lucas, Baja California Sur, Mexico *fide* H.M. Smith & Taylor (1950a: 322).
Distribution: Extreme SW USA (SW California) and NW Mexico (Baja California Norte, Baja California Sur, Carmen Is.), NSL–840 m.
Sources: Cole & Hardy, 1981, 1983c, R.W. Murphy & Ottley, 1984, Stebbins, 1985, P.R. Brown, 1997, Bartlett & Tennant, 2000 and Grismer, 2002.

39. *Tantilla psittaca* McCranie, 2011b. Zootaxa (3037): 38–40, figs. 1–3.

Type: Holotype, USNM 578389, a 354 mm male (J.R. McCranie, 15 July 2008).
Type locality: "Rawa Kiamp (15º06'N, 84º26'W, 60 m) along Rio Siksatingni, department of Gracias a Dios, Honduras."
Distribution: Northeastern Honduras (Colón, Gracias a Dios), NSL–420 m.

T

40. *Tantilla relicta* Telford, 1966. Bull. Florida St. Mus. (Biol. Sci.) 10(7): 270–271, fig. 7c.

Synonyms: *Tantilla relicta neilli* Telford, 1966, and *Tantilla relicta pamlica* Telford, 1966.
Type: Holotype, UF 12421, a 171 mm female (S.R. Telford, Jr., 26 Dec. 1960).
Type locality: "south side of Babson Park, Polk County, Florida" [USA].
Distribution: Southeastern USA (cen. Florida, S Georgia), NSL–45 m.
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Florida).
Sources: Telford, 1966, 1980b, Christman, 1980, Ashton & Ashton, 1988, Ernst & Barbour, 1989, Holman, 1996c, 2000a, Tennant, 1997, Conant & Collins, 1998, Elliott & McGhee, 2000 and Holman, 2000a.

41. *Tantilla reticulata* Cope, 1860d. Proc. Acad. Nat. Sci. Philadelphia 12(2): 77.

Synonyms: *Microdromus virgatus* A.C.L.G. Günther, 1872b, and *Homalocranion sexfasciatum* J.G. Fischer, 1882.
Type: Holotype, ANSP 3361, a 254 mm specimen (R.W. Mitchell, 1857–1860), lost *fide* E.V. Malnate *in* L.D. Wilson (1982a: 47).
Type locality: "Cocuyas de Veraguas, New Grenada" [= Cocuyas de Veraguas, a gold mine near the Río Concepción, N Veraguas Prov., cen. Panama, ca. 8°45'N, 81°00'W, elevation 100 m].
Distribution: Lower Central America and Colombia. Extreme SE Nicaragua (SE Río San Juan), NE Costa Rica (Alajuela, Cartago, Heredia, Limón, Puntarenas), cen. Panama (Panamá, Veraguas) and W Colombia (Chocó, Nariño), NSL–1430 m.
Sources: E.H. Taylor, 1951, L.D. Wilson & Meyer, 1971, Savage, 1980a, 2002, L.D. Wilson, 1982a, 1985g, 1987c, Pérez-Santos & Moreno, 1988 and L.D. Wilson et al., 1999.

42. *Tantilla robusta* Canseco-Márquez, Mendelson & Gutiérrez-Mayén, 2002. Herpetologica 58(4): 493–495, figs. 1–2.

Type: Holotype, EBUAP 1031, a 426 female (natives, 4 March 1998).
Type locality: "Octimaxal Norte, 930 m, Municipio de Cuetzalan del Progreso, Sierra Norte de Puebla, Puebla, Mexico (20° 02.743' N, 97° 30.103' W)."
Distribution: Southern Mexico (Puebla), 930 m. Known only from type locality.

43. *Tantilla rubra* Cope, 1875a. J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 144.

Synonyms: *Tantilla miniator* Cope, 1863b, *Homalocranium boulengeri* A.C.L.G. Günther, 1895 *in* 1885–1902, and *Tantilla morgani* Hartweg, 1944.

Type: Holotype, USNM 26500, a 310 mm (svl) specimen (A.L.J.F. Sumichrast, 1855–1869).

Type locality: "Japana, Tehuantepec" [= San Pedro Tapanatepec, Oaxaca State, Mexico, 16°22'N, 94°12'W, elevation 55 m].

Distribution: Eastern and S Mexico (Chiapas, Hidalgo, México, S Nuevo León, cen. Oaxaca, Puebla, Querétaro, San Luis Potosí, Tamaulipas, cen. Veracruz) and SW Guatemala (Huehuetenango), 55–2200 m.

Sources: H.M. Smith, 1942b, L.C. Stuart, 1963, H.M. Smith & Werler, 1970, Van Devender & Bradley, 1994, Casas-Andreu et al., 1996, Auth et al., 1997b, Conant & Collins, 1998, Auth et al., 2000, Dixon et al., 2000, Werler & Dixon, 2000, Canseco-Márquez et al., 2002, Lazcano-Villarreal et al., 2010 and Ramírez-Bautista et al., 2010.

Remarks: Petition to conserve the name *rubra* Cope, 1875 has been sent to ICZN *fide* Dixon et al. (2000: 141).

44. *Tantilla ruficeps* (Cope, 1894d). Proc. Acad. Nat. Sci. Philadelphia 46: 204–205. (*Pogonaspus ruficeps*)

Type: Holotype, (MNCR 141), a 223 mm (svl) specimen (A. Faro).

Type locality: "Jimenez, Costa Rica" [= Jiménez, Limón Prov., E Costa Rica, 10°13'N, 83°45'W, elevation 230 m].

Distribution: Costa Rica (Alajuela, Cartago, Heredia, Limón, Puntarenas, San José) and W Panama, NSL–1600 m.

Sources: Savage, 2002, Solórzano, 2004 and Sunver & G. Köhler, 2005.

Remarks: Holotype not in ANSP or USNM. A valid species *fide* Savage (2002: 694–695) but L.D. Wilson (pers. comm.) believes that status in Panama and relationship to Costa Rican material needs review.

45. *Tantilla schistosa* (Bocourt 1883) *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909. Miss. Sci. Mex. Amér. Cen., Rept. 3(9): 584, pl. 36, figs. 10, 10a–e. (*Homalocranion schistosum*)

Synonyms: *Tantilla phrenitica* H.M. Smith, 1942b, and *Tantilla schistosa taylori* H.M. Smith, 1962.

Type: Lectotype, MNHN 1883.506, a 191 mm specimen (M. F. Bocourt, 1864–1866), designated by H.M. Smith (1942b: 39).

Type locality: "Alta Vera Paz, Guatemala" via lectotype selection.

Distribution: Mesoamerica. Southeastern Mexico (Oaxaca, Quintana Roo, Veracruz), Guatemala (Alta Verapaz, Petén, Quiché), Belize (Belize, Cayo, Orange Walk), NW Honduras (Copán, Cortés, Olancho, Santa Bárbara, Yoro), cen. Nicaragua (Matagalpa), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José) and Panama (Chiriqui, Cocle, Darién, Panamá), 40–1700 m.

Sources: E.H. Taylor, 1951, 1954, H.M. Smith, 1962, L.C. Stuart, 1963, R.W. Henderson & Hoevers, 1975, L.D. Wilson & Meyer, 1985, L.D. Wilson, 1987a, J.C. Lee, 1996, 2000, J.A. Campbell, 1998b, Stafford & Meyer, 2000, Canseco-Márquez et al., 2002, Savage, 2002, Solórzano, 2004, Luja, 2006, Pérez-Higareda et al., 2007, McCranie, 2011a and McCranie & Orellana, 2011.

46. *Tantilla semicincta* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 862–363. (*Homalocranion semicinctum*) (*nomen corrigendum*)

Synonyms: *Elapsoïdes pleii* A.-M.-C. Duméril, Bibron & Duméril, 1854b (*nomen nudum*), *Homalocranion semicinctum* A.-M.-C. Duméril, Bibron & Duméril, 1854b (*nomen incorrigendum*), *Homalocranium laticeps* A.C.L.G. Günther, 1860f, *Homalocranion semicinctum* – Jan, 1862b (*nomen corrigendum*), *Homalocranion lineatum* J.G. Fischer, 1883, and *Homalocranium senicintum* – Briceño-Rossi, 1934 (*nomen incorrectum*).

Types: Syntypes (2), MNHN 3695, a 404 mm female, and RMNH 77 (A. Plée, 1823–1825).

Type locality: "Colombie" [= Colombia] and "Martinique," (in error *fide* L.D. Wilson, 1976: 44), respectively.

Distribution: Northern Colombia (Atlántico, Bolívar, César, Magdalena, Norte de Santander) and NW Venezuela (Aragua, Carabobo, Distrito Federal, Falcón, Mérida, Trujillo, Zulia), NSL–455 m.

Sources: Roze, 1966a, L.D. Wilson, 1976, 1987c, 1990d, Pérez-Santos & Moreno, 1988, Lancini & Kornacker, 1989 and Navarrete et al., 2009.

Remarks: MNHN 3695 erroneously listed as holotype *fide* L.D. Wilson (1976: 44). Designation of type locality as Colombia by J.A. Peters & Orejas-Miranda (1970) erroneously considered unjustified *fide* L.D. Wilson (1987c: 19). Unconfirmed records from Panama and Ecuador *fide* Roze (1966: 226).

47. *Tantilla sertula* L.D. Wilson & Campbell, 2000. Proc. Biol. Soc. Washington 113(3): 821–823, fig. 1.

Type: Holotype, UTA 38145, a 99 mm female (J.A. Campbell, July 1978).

Type locality: "0.8 km NNE of the junction of Mexico highway 200 on the road to La Unión (17°59'N, 101°49'W), Guerrero, México, approximate elevation slightly above 150 m."

Distribution: Southwestern Mexico (Guerrero, Nayarit), 150 m.

Source: Canseco-Márquez et al., 2007.

48. *Tantilla shawi* E.H. Taylor, 1949. Univ. Kansas Sci. Bull. 33(2): 207–209.

Type: Holotype, LSUMZ 306, a 369 mm specimen (C. Shaw, 28 Aug. 1947).

Type locality: "Xilitla (Miramar), San Luis Potosí, Mexico."

Distribution: Eastern Mexico (ext. SE San Luis Potosí, N Veracruz), 670–1400 m.

Sources: L.D. Wilson, 1991b and J.A. Campbell et al., 1995.

49. *Tantilla slavensi* Pérez-Higareda, Smith & Smith, 1985. J. Herp. 19(2): 290–291, figs. 1–2.

Type: Holotype, UNAM-LT 1668, a 346 mm female (G. Pérez-Higareda, 17 April 1983).

Type locality: "Cerro Chochobi, elevation 800 m, El Acuyal area, 8 km NW Catemaco, Veracruz, Mexico."

Distribution: Southeastern Mexico (S Veracruz), 50–800 m.

Sources: Pérez-Higareda & Smith, 1991, L.D. Wilson et al., 1999 and Pérez-Higareda et al., 2007.

50. *Tantilla striata* Dunn, 1928a. Amer. Mus. Novit. (314): 3.

Type: Holotype, AMNH 19745, adult male (P.D.R. Rüthling).

Type locality: "Mixtequillo, Oaxaca, Mexico" [= Santa María Mixtequilla, Oaxaca State, S Mexico, 16°22'N, 95°16'W, elevation 55 m].

Distribution: Southern Mexico (S Oaxaca), NSL–1000 m.

Sources: H.M. Smith, 1942b, L.D. Wilson & Meyer, 1971, L.D. Wilson, 1990i, Casas-Andreu et al., 1996 and L.D. Wilson et al., 1999.

51. *Tantilla supracincta* (W.C.H. Peters, 1863c). Mber. Königl. Akad. Wiss. Berlin 1863(6): 272–273. (*Homalocranion supracinctum*)

Synonym: *Tantilla annulata* Boettger, 1892b.

Type: Holotype, ZMB 4791, a 530 mm female (C. Reiss, 1860).

Type locality: "Umgebung von Guayaquil" [Ecuador] [= vicinity of Guayaquil, Guayas Prov., SW Ecuador, 2°12'S, 78°54'W, elevation 10 m].

Distribution: Lower Central America and N South America. Southeastern Nicaragua (Río San Juan), Costa Rica (Alajuela, Cartago, probably Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Chiriquí, Coclé, Colón, Darién, Panamá), Ecuador (Esmeraldas, Guayas) and Venezuela (Mérida), NSL–900 m.

Sources: E.H. Taylor, 1951, J.A. Peters, 1960a, L.D. Wilson, 1982a, 1985j, 1987c, Pérez-Santos & Moreno, 1991, Esqueda & La Marca, 1999, Savage, 2002 and Solórzano, 2004.

T

52. *Tantilla taeniata* (Bocourt, 1883) *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909. Miss. Sci. Mex. Amér. Cen., Rept. 3(9): 587, pl. 37, figs. 3, 3a–e. (*Homalocranion taeniatum*)

Synonym: *Homalocranium trivittatum* F. Müller, 1885.

Type: Holotype, MNHN 1666, a 341–356 mm male (A. Bouvier).

Type locality: "Guatemala."

Distribution: Mexico and upper Central America. Southern Mexico (S Oaxaca), Guatemala (Guatemala, Santa Rosa), El Salvador (La Union, Sonsonate, Usulután), Honduras (Atlântida, ? Colón, Cortés, El Paraíso. Francisco Morazán, Olancho, Yoro) and Nicaragua (Matagalpa), 650–1600 m.

Sources: L.C. Stuart, 1963, Savitzky & Smith, 1971, L.D. Wilson & Meyer, 1971, 1985, L.D. Wilson, 1982a, 1983b, 1985a, J.A. Campbell, 1998b, L.D. Wilson & McCranie, 1999, L.D. Wilson et al., 1999, Stafford, 2004, G. Köhler et al., 2005, McCranie et al., 2006, McCranie, 2011a–b and McCranie et al., 2012a.

Remarks: *Tantilla taeniata* may represent one or more undescribed species *fide* McCranie (2011b: 42).

53. *Tantilla tayrae* L.D. Wilson, 1983a. J. Herp. 17(1): 54–57, fig. 1.

Type: Holotype, MVZ 159203, a 317 mm male (R.L. Seib, 30 July 1978).

Type locality: "Finca San Jerónimo, 7.5 km N (by rd.) Cacaohatán [= Cacahoatán or Cacahuatán], elevation 760 m, Volcán Tacaná, Municipio de Unión Juárez, Chiapas, México."

Distribution: Southeastern Mexico (Volcán Tacaná of Chiapas), 760–960 m. Known only from vicinity of type locality.

Sources: J.D. Johnson, 1984, L.D. Wilson, 1990e and L.D. Wilson et al., 1999.

Remarks: Closely related to *T. jani:* additional specimens needed to clarify its status *fide* J.A. Campbell (1998: 10–11).

54. *Tantilla tecta* J.A. Campbell & Smith, 1997. Proc. Biol. Soc. Washington 110(3): 333–337, figs. 1–2.

Type: Holotype, UTA 41160 (formerly UVG 1742), a 222 mm female (C. Granizo, 29 June 1992).

Type locality: "slope flanking the NE side of Laguna Yaxhá, Petén, Guatemala (17°03'43"N, 89°23'12"W), at about 220 m."

Distribution: Northeastern Guatemala (Petén), 220 m. Known only from type locality.

Sources: L.D. Wilson et al., 1999, J.C. Lee, 2000 and Stafford, 2004.

55. *Tantilla trilineata* (W.C.H. Peters, 1880a). Mber. Königl. Akad. Wiss. Berlin 1880(2): 221, pl., figs. 2, 2a–c. (*Leptocalamus trilineatus*)

Type: Holotype, ZMB 9648, a 230 mm female (H. Boeckmann).
Type locality: "Brasilien" [= Brazil] (in error *fide* Savitzky & Smith, 1971: 170).
Distribution: Unknown. Known only from the holotype.
Sources: F. Werner 1925, Amaral, 1929, Savitzky & Smith, 1971, L.D. Wilson & Meyer, 1971, L.D. Wilson, 1974, 1999 and L.D.Wilson & McCranie, 1999.
Remarks: Status of this taxon is unclear *fide* L.D. Wilson (pers. comm.).

56. *Tantilla triseriata* H.M. Smith & Smith, 1951. Proc. Biol. Soc. Washington 64: 97–99.

Type: Holotype, UIMNH 20198, a 203 mm female (T. MacDougall, 9 Oct. 1949).
Type locality: "Coatlán, Oaxaca, slopes of the Isthmus of Tehuantepec, Mexico" [= Coatlán, Oaxaca State, S Mexico, 16°18'N, 96°46'W, elevation 1725 m].
Distribution: Southern Mexico (Oaxaca), 1635–1725 m.
Source: H.M. Smith et al., 1998.

57. *Tantilla tritaeniata* H.M. Smith & Williams, 1966c. Southwest. Nat. 11(4): 483–485, fig. 1.

Type: Holotype, BMNH 1894.12.28.23, a 273 mm female (? Gaumer via F.D. Godman).
Type locality: "Bonacca Island, Bay Islands, Honduras."
Distribution: Northern Honduras (Islas de la Bahía: Guanaja Is.), NSL.
Sources: L.D. Wilson & McCranie, 1999, McCranie et al., 2005 and McCranie, 2011a.

58. *Tantilla vermiformis* (Hallowell, 1861). Proc. Acad. Nat. Sci. Philadelphia (1860) 12(11): 484. (*Lioninia vermiformis*)

Type: Lectotype, USNM 32338 (formerly USNM 5792), a 129 mm female (C. Wright [No. Pacific Explor. Exped.], 1853–1856), designated by R.W. Van Devender & Cole (1977: 2).
Type locality: "Nicaragua" via lectotype selection.
Distribution: Central America. El Salvador (San Salvador), W Nicaragua (León, Managua) and NW Costa Rica (Guanacaste), 50–700 m.
Sources: R.W. Van Devender & Cole, 1977, L.D. Wilson, 1982a, 1987b, L.D. Wilson et al., 1999, L.D. Wilson & Campbell, 2000, Dueñas et al., 2000, G. Köhler et al., 2005 and Canseco-Márquez et al., 2007.

59. *Tantilla vulcani* J.A. Campbell, 1998a. Sci. Pap. Mus. Nat. Hist. Univ. Kansas (7): 11–13, figs. 4–5.

Type: Holotype, UTA 21772 (formerly JAC 12410), a 211 mm female (C. Mirón, April–May 1986).
Type locality: "Finca El Carmen, Km 197.5 on Ca-2, 518 m, Quezaltenango, Guatemala."
Distribution: Southern Mexico (Oaxaca) and S Guatemala (Escuintla, Quezaltenango, San Marcos, Suchitepéquez), NSL–610 m.

60. *Tantilla wilcoxi* Stejneger, 1902b. Proc. U.S. Natl. Mus. 25: 156–157.

Synonyms: *Tantilla deviatrix* T. Barbour, 1916b, and *Tantilla wilcoxi rubricata* H.M. Smith, 1942b.
Type: Holotype, USNM 19674, a 184+ mm male (T.E. Wilcox, 1892).
Type locality: "Fort Huachuca, Arizona" [= Huachuca Mtns., Cochise Co., USA].
Distribution: Extreme SW USA (ext. SE Arizona) and N Mexico (W Chihuahua, ext. SE Coahuila, Durango, S Nuevo León, W San Luis Potosí, NE Sinaloa, E Sonora, Tamaulipas, Zacatecas), 915–2440 m.
Sources: H.M. Smith, 1942b, Fowlie, 1965, C. Shaw & Campbell, 1974, Cole & Hardy, 1981, Liner, 1983, Stebbins, 1985, McDiarmid, 1992, H.M. Smith & Smith, 1993, Bartlett & Tennant, 2000, Farr et al., 2009 and Lazcano-Villarreal et al., 2010.

61. *Tantilla yaquia* H.M. Smith, 1942b. Zoologica 27(7): 41.

Synonym: *Tantilla bogerti* Hartweg, 1944.
Type: Holotype, MCZ 43274, a 240 mm female (H.S. Gentry, Aug. 1936).
Type locality: "Guasaremos, Río Mayo, Chihuahua, Mexico" [= Guasaremos (27°40'N, 108°42'W, elevation 880 m), Río Mayo, ext. W Chihuahua State, NW Mexico].
Distribution: Southwestern USA (SE Arizona, ext. SW New Mexico) and NW Mexico (ext. W Chihuahua, Nayarit, Sinaloa, E Sonora), 60–1585 m.
Sources: Fowlie, 1965, McDiarmid, 1968, 1977, Cole & Hardy, 1981, W.W. Tanner, 1985, M. Williamson et al., 1994, Degenhardt et al., 1996, Bartlett & Tennant, 2000, Lemos-Espinal et al., 2004b and Bogan et al., 2009.

TANTILLITA H.M. Smith, 1941f (Colubridae)

Type species: *Tantilla lintoni* H.M. Smith, 1940.
Distribution: Mesoamerica.
Sources: H.M. Smith, 1941f, H.M. Smith & Taylor, 1945, J.A. Peters & Orejas-Miranda, 1970, Villa et al., 1988, L.D. Wilson, 1988i and J.A. Campbell & Vannini, 1989.

1. *Tantillita brevissima* (E.H. Taylor, 1937a). Trans. Kansas Acad. Sci. (1936) 39: 344–345, fig. 4. (*Tantilla brevissima*)

Synonym: *Tantilla excubitor* L.D. Wilson, 1982a.

Type: Holotype, UIMNH 25075 (formerly EHT-HMS 4557 & EHT-CC 4623), a 151 mm specimen (E.H. Taylor, 27–28 Aug. 1935).

Type locality: "Tonalá, Chiapas (on top of low mountain near the city)" [= mountaintop near Tonalá (16°05'N, 93°45'W, elevation 50 m), Chiapas State, SE Mexico].

Distribution: Southeastern Mexico (Chiapas, SE Oaxaca) and S Guatemala (Escuintla). 200–1700 m.

Sources: L.D. Wilson, 1982a, 1988j and J.D. Johnson, 1984, 1989.

2. *Tantillita canula* (Cope, 1875a). J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 144. (*Tantilla canula*)

Synonym: *Homalocranium breve* A.C.L.G. Günther, 1895 *in* 1885–1902.

Types: Syntypes (2), USNM 24881–82, a male and female, longest syntype 172 mm (A.C.V. Schott, 1865–1866).

Type locality: "Yucatan" [Mexico]. Restricted to Chichén Itzá, Yucatán *fide* H.M. Smith & Taylor (1950a: 352).

Distribution: Mesoamerica. Southeastern Mexico (Campeche, Quintana Roo, Yucatán), Guatemala (Petén) and Belize (Cayo, Orange Walk), NSL–300 m.

Sources: R.W. Van Devender & Cole, 1977, L.D. Wilson, 1982a, 1986a, 1988c, H.M. Smith et al., 1993, J.C. Lee, 1996, 2000 and Stafford & Meyer, 2000.

3. *Tantillita lintoni* (H.M. Smith, 1940). Proc. Biol. Soc. Washington 53: 61–62, fig. 1. (*Tantilla lintoni*)

Synonym: *Tantillita lintoni rozellae* Pérez-Higareda, 1985.

Type: Holotype, USNM 108603 (formerly HMS 7460), a 207 mm female (H.M. Smith, 24 May 1939).

Type locality: "Piedras Negras, Guatemala, at a locality some 45 miles by trail from Tenosique, Tabasco, Mexico, on the bank of Usumacinta River" [= ext. NW Petén, Guatemala, 17°19'N, 91°17'W, elevation 70 m].

Distribution: Southeastern Mexico (Tabasco, Quintana Roo, S Veracruz), N Guatemala (Petén), Belize (Toledo), NW Honduras (Atlántida, Cortés, Gracias a Dios, Islas de la Bahía, Santa Bárbara and Utila Is.) and N Nicaragua (Jinotega), NSL–900 m.

Sources: L.C. Stuart, 1963, L.D. Wilson, 1982a, Pérez-Higareda, 1985, L.D. Wilson & Meyer, 1985, J.C. Lee, 1996, 2000, J.A. Campbell, 1998b, G. Köhler, 1999a, López-Luna & Torres-Laranca, 2000, Stafford & Meyer, 2000, Cedeño-Vázquez et al., 2003, Martinez, 2011 and McCranie, 2011a.

T

TAPHROMETOPON Brandt, 1838 (Psammophiidae)

Synonyms: *Chorisodon* A.-M.-C. Duméril, 1853, *Monodiastema* Bibron *in* A.-M.-C. Duméril, Bibron & Duméril, 1854, *Phayrea* Theobald, 1868b, *Taphrometopum* Blanford, 1876 (*nomen emendatum*), *Tafrometopon* – Palacky, 1898 (*nomen incorrectum*), *Mike* F. Werner, 1924a, *Taphrometopom* – Briceño-Rossi, 1934 (*nomen incorrectum*), *Tephrometopon* – Terent'ev & Chernov, 1965 (*nomen incorrectum*), and *Rayhammondus* Hoser, 2012u (*nomen illegitimum*).

Type species: *Coluber lineolatus* Brandt, 1838.

Distribution: Africa and Asia.

Sources: M.A. Smith, 1943, Leviton & Anderson, 1970a, M.S. Khan, 2002, 2006, Whitaker & Captain, 2004 and Hoser, 2012u.

Remarks: A valid genus *fide* Zaher et al., 2012; previously a synonym of *Psammophis*. Arrangement of Hoser, 2012u, who used the name *Phayrea*.

1. *Taphrometopon condanarum* (Merrem, 1820). Syst. Amph.: 107. (*Coluber condanarus*)

Synonyms: *Leptophis bellii* Jerdon, 1854, *Psammophis taeniata* A.C.L.G. Günther, 1862b, *Psammophis indicus* Beddome, 1863a, *Phayrea isabellina* Theobald, 1868b, *Psammophis sibilans quadrilineata* Jan, 1863b (*nomen nudum*), *Psammophis sibilans quadrilineata* Jan, 1870 *in* Jan & Sordelli, 1866–1870, and *Mike elegantissima* F. Werner, 1924a.

Type: Lectotype, a 724 mm specimen described and illustrated in P. Russell (1796: 32–33, pl. 27) (Snodgrass, Oct. 1788), designated herein.

Type locality: "Ganjam" [= Ganjam, Ganjam Distr., E Orissa State, E India, 19°23'N, 85°03'E, elevation NSL] via lectotype selection.

Distribution: Southern Asia. Eastern Pakistan (Khyber Pakhtunkhwa, Punjab, Sindh), N India (Andhra Pradesh, Bihar, Gujarat, Himachal Pradesh, Karnataka, Madhya Pradesh, Maharashtra, Orissa, Punjab, Uttaranchal, Uttar Pradesh, S West Bengal) and Nepal (Chitwan, Sunsari), NSL–2000 m.

Sources: J. Anderson, 1871a, Murray, 1884, Boulenger, 1890a, Wall, 1911a, 1924a, Minton, 1966, Kramer,1977, Murthy, 1986, Prasad, 1992, Sanyal et al., 1993, M.S. Khan, 2002, 2006, Tiwari & Shah, 2004, Whitaker & Captain, 2004 and N. Khaire, 2006.

Remarks: Original description based on P. Russell (1796: 32–33, pl. 27).

2. *Taphrometopon crucifer* (Daudin, 1803d). Hist. Nat. Rept. 7: 189–190. (*Coluber crucifer*)

Type: Holotype, not designated, a 236 mm specimen, location unknown.

Type locality: "Indes orientales" [= Southern Asia and East Indies] (in error). Corrected to South Africa *fide* V.F.M. FitzSimons (1962a: 239).

Distribution: Southern Africa. Eastern Zimbabwe (Manicaland), S Mozambique (W Manica), NW Swaziland, W Lesotho and South Africa (Eastern Cape, Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, W Northern Cape, North West, Western Cape), NSL–2300 m.

Sources: V.F.M. FitzSimons, 1962a, 1974, Broadley & Cock, 1975, De Waal, 1978, Branch, 1988, Boycott & Culverwell, 1992, Broadley, 2002, Marais, 2004, Cottone & Bauer, 2010 and Broadley & Blaylock, 2013.

Remarks: Description based on Merrem (1790: 13, pl. 3) from "Ostindien." Forms a basal sister clade to *Taphrometopon fide* Kelly et al. (2008: 1049).

3. *Taphrometopon indochinensis* (M.A. Smith, 1943). Fauna Brit. India, Rept. Amph. 3: 365. (*Psammophis candanarus indochinensis*)

Types: Syntypes (9), BMNH 1868.4.3.26–29, BMNH 1914.5.11.9–10, and BMNH 1969.1920–22 (M.A. Smith).

Type locality: "Indo-China south of lat. 21° (Taungyi, Pegu, Lopburi, Bangkok, Phan-rang in Annam)" [= Taungyi (SW Shan Div., 20°47'N, 97°02'E, elevation 1415 m) and Bago (Bago Div., 17°25'S, 96°40'E, elevation 10 m), S Myanmar; Lopburi (Lop Buri Prov., 15°03'N, 100°53'E, elevation 95 m) and Bangkok (Bangkok Prov., 13°45'N, 100°30'E, elevaton NSL), S Thailand; Phan Rang (Ninh Thuan Prov., 11°35'N, 108°59'E, elevation NSL), S Vietnam].

Distribution: Southeast Asia. S Myanmar (Bago, Irawaddy, Magwe, Mandalay, Sagaing, S Shan), Thailand (Bangkok, Chaiyaphum, Chiang Mai, Krung Thep Mahanakhon, Lop Buri, Nakhon Sawan, Phra Nakhon Si Ayutthaya, Ratchaburi, Saraburi), Laos (Champasak), Cambodia, S Vietnam (Binh Thuan, Ninh Thuan) and Indonesia (Bali, Java), NSL–2000 m.

Sources: M.A. Smith, 1943, Bourret, 1936b, E.H. Taylor, 1965, Campden-Main, 1970a, M.J. Cox et al., 1998, Hughes, 1999, Chan-ard et al., 1999, Orlov et al., 2003, Teynié & David, 2007, Stuart & Heatwole, 2008, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

Remarks: A valid species *fide* Hughes (1999: 65). BMNH 77 listed as type *fide* Cox et al. (2013: 522).

4. *Taphrometopon leithii* (A.C.L.G. Günther, 1869). Proc. Zool. Soc. London 37(1): 505–506, pl. 39. (*Psammophis leithii*)

Type: Holotype, BMNH 1946.1.2.82, a 650 mm male (A.H. Leith).

Type locality: "Sindh" [= Sindh Prov., SE Pakistan].

Distribution: Southern Asia. Eastern Afghanistan (Nangarhar), Pakistan (Balochistan, Khyber Pakhtunkhwa, Punjab, Sindh) and NW India (Gujarat, Jammu and Kashmir, Maharashtra, Punjab, Rajasthan, Uttar Pradesh, Dwarka Is.), NSL–800 m.

Sources: Boulenger, 1890a, Wall, 1907e, 1911d, 1924b, M.A. Smith, 1943, Leviton, 1959a, Minton, 1966, Král, 1969, Leviton & Anderson, 1970a, M.S. Khan, 1982, 2006, R.C. Sharma, 1982, Murthy, 1986, Sahi & Duda, 1986, Whitaker & Captain, 2004 and N. Khaire, 2006.

5. *Taphrometopon lineolatum* (Brandt, 1838). Bull. Acad. Imp. Sci. St. Pétersbourg (1837) 3(16): 243–244. (*Coluber* [*Taphrometopon*] *lineolatus*)

Synonyms: *Coluber caspius* Lichtenstein, 1823 (*nomen praeoccupatum*), *Chorisodon sibericum* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Chorisodon sibericum* A.-M.-C. Duméril, Bibron & Duméril, 1854, *Psammophis doriae* Jan *in* Filippi, 1865, and *Psammophis triticeus* Wall, 1912b.

Type: Holotype, ZISP 2042, a 584 mm specimen (G.S. Karelin, 1837).

Type locality: "côte orientale de la mer Caspienne, dans la Turcomanie et dans le nord de la Perse, notamment dans les environs d'Astrabad" [= eastern shore of Caspian Sea, within Turkey and northern Iran, notably the vicinity of Gorgan, Golestan Prov., N Iran]. Restricted to region of Krasnovodsk, W Turkmenistan *fide* Strauch (1873: 193).

Distribution: Central Asia. Extreme S Azerbaijan, ext. NW Iran (East Azarbaijan, West Azarbaijan), Kazakhstan (Barsakel'mes Is.), Kyrgyzstan, W Tadzhikistan, Turkmenistan, Uzbekistan (Vozrozhdenya Is.), NW China (Gansu, Nei Monggol, Ningxia, Xingjiang), S Mongolia (Bayan Hongar, Dornogovi, Dundgovi, Govi-Altay, Hovd, Omnigovi, Suhbaatar), E Iran (Central, Esfahan, Fars, Kerman, Khuzestan, Lorestan, Manzandaran, Razavi Khorasan, Sennan, Sistan va Baluchestan), Afghanistan (Balkh, Farah, Faryab, Helmand, Herat, Jowzjan, Kabul, Kunduz, Nangarhar) and Pakistan (Balochistan, SW Punjab), 150–2440 m.

6. *Taphrometopon longifrons* (Boulenger, 1890a). Fauna Brit. India, Rept. Batr.: 366–367. (*Psammophis longifrons*)

Type: Holotype, BMNH 1946.1.8.44, head and neck of a 1200 mm specimen (R.H. Beddome, 1857–1882).

Type locality: "Cuddapah Hills, British India" [= Kadapa, S Andhra Pradesh State, S India, 14°28'N, 78°49'E,

elevation 135 m] (in error *fide* Wall, 1924a: 875 & 601 and M.A. Smith, 1943: 366).

Distribution: Central India (Gujarat, Madhya Pradesh, Maharashtra), NSL–310 m.

Sources: Dreckmann, 1893, Gleadow, 1894, Abreu, 1913, 1916, Wall, 1924a, M.A. Smith, 1943, Gharpurey, 1962, Whitaker, 1978a, Murthy, 1986, R.C. Sharma, 2003, 2007, Whitaker & Captain, 2004 and N. Khaire, 2006.

Remarks: Authorship erroneously attributed to Boulenger, 1896a.

†*TAUNTONOPHIS* Parmley & Walker, 2003 (Colubridae)

Type species: †*Tauntonophis morganorum* Parmley & Walker, 2003.

Distribution: Pliocene of USA.

Source: Parmley & Walker, 2003.

1. †*Tauntonophis morganorum* Parmley & Walker, 2003. J. Herp. 37(2): 240–242, fig. 2a–e.

Type: Holotype, BMUW 87325, one trunk vertebra.

Type locality: "Taunton Fossil Site, 0.5 km east of Taunton, Adams Co., Washington. Ringold Formation: Pliocene (Blancan Land Mammal Age), at 2.85–2.95 MYBP" [USA].

Distribution: Upper Pliocene (Blancan: 2.85–2.95 mya) of USA (Washington). Known only from type locality.

TELESCOPUS Wagler, 1830 (Colubridae)

Synonyms: *Tarbophis* Fleischmann, 1831, *Trigonophis* Eichwald, 1831, *Ailurophis* Fitzinger *in* Bonaparte, 1837, *Ailurops* Michahelles *in* Bonaparte, 1837, *Aelurophis* Agassiz, 1847 (*nomen emendatum*), *Aelurops* Agassiz, 1847 (*nomen emendatum*), *Tarbophus* – Briceño-Rossi, 1934 (*nomen incorrectum*), *Tarbophys* – Buresch & Zonkow, 1934 (*nomen incorrectum*), *Tharbophis*– Scortecci, 1934 (*nomen incorrectum*), *Migiurtinophis* Scortecci, 1935, *Tarborhis* – Chernov, 1939 (*nomen incorrectum*), *Torborhis* – Chernov, 1939 (*nomen incorrectum*), *Torbophis* – Radovanovic & Martino, 1950 (*nomen incorrectum*), *Pseudotarbophis* Domergue, 1955, *Tarbophia* – Stanek, 1962 (*nomen incorrectum*), *Tlescopus* – Baran, 1976 (*nomen incorrectum*), and *Telescopis* – Mahendra, 1984 (*nomen incorrectum*).

Type species: *Coluber obtusus* A. Reuss, 1834.

Distribution: Africa, SE Europe, Middle East, Arabia and SW Asia.

Fossil records: Lower Miocene to middle Pleistocene of Europe. Fossils unassigned to species include lower Miocene (Orleanian, MN 4–5: 13.7–16.9 mya) of Czech Republic and Germany, upper Miocene (Turolian, MN 13: 4.9–7.3 mya) of Hungary and Italy, and middle Pleistocene (Ionian: 0.13–0.78 mya) of Bulgaria.

Sources: W. Böhme, 1977b, Zinner, 1977, J.B. Rasmussen, 1979, Szyndlar, 1991a, 2005, 2009, Broadley, 1994a, Venczel & Sen, 1994, Venczel, 1998 and Delfino, 2002.

1. *Telescopus beetzii* (T. Barbour, 1922). Proc. Biol. Soc. Washington 35: 230. (*Tarbophis beetzii*)

Type: Holotype, MCZ 16728, a 251 mm specimen (W. Beetz)

Type locality: "Kolmanskop, about seventy miles south of Lüderitzbucht, Southwest Protectorate (formerly German Southwest Africa), Africa" [= Kolmanskop, W Karas Distr., SW Namibia, 26°42'S, 15°14'W, elevation 165 m].

Distribution: Southern Namibia (Hardap, Karas) and W South Africa (W Free State, Northern Cape, N Western Cape), 165–1040 m.

Sources: Mertens, 1955, 1971, FitzSimons, 1962, De Waal, 1978 and Broadley, 1983.

2. †*Telescopus bolkayi* Szyndlar, 2005. Palaeontogr. Ital. (2004) 90: 36–37, figs. 4d–h.

Synonym: †*Telescopus bolkayi* Szyndlar, 2000 (*nomen nudum*).

Type: Holotype, GIH V.22182, one trunk vertebra.

Type locality: Rudabánya (locality R3), northeast Hungary; Late Miocene, early Vallesian (biozone MN 9)."

Distribution: Upper Miocene (Vallesian, MN 9: 9.7–11.1 mya) of Hungary and Italy. Known only from type locality.

Source: Szyndlar, 2012.

Remarks: Closely related to *T. fallax fide* Szyndlar (2005: 38).

3. *Telescopus dhara* (Forskal *in* Niebuhr, 1775). Descr. Anim.: 14. (*Coluber dhara*)

Synonyms: *Dipsas aegypticus* Schlegel, 1837, *Tarbophis guentheri* J. Anderson, 1895, and *Tarbophis obtusus nubamontana* F. Werner, 1919.

Type: Holotype, none designated, a 450 mm specimen (P.S. Forskal, Dec. 1762–July 1763), lost *fide* M. Andersen *in* Crochet et al. (2008: 37).

Type locality: "Yemen."

Distribution: Egypt, Middle East and Arabia. Northeastern Egypt (South Sinai), W Jordan (Aqaba, Balqa, Karak, Maan, Madaba), E Israel (S Northern, E Southern, West Bank), Saudi Arabia (Asir, Bahah, Jawf, Jazan, Madinah, Makkah, Riyadh, Tabuk), United Arab Emirates, Oman (Al Batinah, Al Dakhiliyah, Al Hudaydah, Al Wusta, Dhofar, Musandam, Muscat, Ash Sharqiyah, Masirah Is.) and Yemen (Abyan, Ad Dali', Aden, Hadhramaut, Ibb, Lahij, Sana'a), 400 m BSL–2100 m.

T

Remarks: A valid, clearly diagnosable, allopatric taxon *fide* Crochet et al. (2008: 38).

4. *Telescopus fallax* (Fleischmann, 1831). Dalmatiae Nova Serp. Gen.: 18–24, pl. 1, figs. a–e. (*Tarbophis fallax*)

Synonyms: *Coluber vivax* Fitzinger, 1826a (*nomen nudum*), *Trigonophis iberus* Eichwald, 1831, *Coluber carneus* Dwigubski, 1832, *Ailurophis vivax* Bonaparte, 1837 *in* 1832–1841, *Tarbophis vivax syriaca* Boettger, 1880b, *Tarbophis savignyi* Boulenger, 1896a, *Tarbophis fallax cyprianus* T. Barbour & Amaral, 1927, *Tarbophis fallax mcewani* K.P. Schmidt, 1939b, *Tarbophis barnumbrowni* Bogert, 1940, *Telescopus fallax pallidus* Stepanek, 1944, *Telescopus fallax rhodicus* Wettstein, 1953a, *Telescopus fallax multisquamatus* Wettstein, 1953a, *Telescopus fallax christianus* Buchholz, 1955, and *Telescopus intermedius* Gruber, 1974.

Type: Holotype, none designated, an 864 mm specimen, location unknown.

Type locality: "Dalmatiae, Istriae agrique Tergestinensis muris et petris" [= Istria Peninsula, Croatia, Slovenia and Italy]. Restricted to Trieste Prov., Italy *fide* Mertens & Müller (1928: 50).

Distribution: Southeastern Europe, Middle East and SW Asia. Extreme NE Italy (Friuli-Venezia Giulia, Trieste), Slovenia, Croatia (Ada, Arbe, Brac, Cres, Hvar, Korcula, Kornat, Krk, Pag, Rab and Silba, Svetac, Solta and Vis Is.), extr. S Bosnia-Herzegovina, S Montenegro, Bosnia-Herzegovina, W Albania, Macedonia, SW Bulgaria (Blagoevgrad, Haskovo), Greece (Aitolia and Akarnania, Andros, Amorgós, Antikithira, Antiparos, Arkadhia, Akhaia, Argolis, Arta, Attica, Despotikó, Drama, Elasa, Evritania, Evros, Euboia, Florina, Fokis, Fthiotis, Gávdos, Grevena, Ilia, Imathia, Ioannina, Kéalymnos, Kardhitsa, Kássos, Kastoria, Kéa, Kefaloniá, Kerkira, Khalkidhiki, Kilkis, Kíthira, Kithnos, Korinthia, Koufoníssi, Kozani, Kristiani, Lakonia, Larisa, Lesvos, Levkas, Magnisia, Messinia, Míkonos, Milos, Náxos, Páros, Pella, Pieria, Preveza, Rodhopi, Santorini, Serrai, Sérifos, Skiros, Spétses, Strofádes, Thesprotia, Thessaloniki, Thíra, Thirassia, Tinos, Trikala, Voiotia, Xanthi, Zákinthos), Crete, Cyprus, Malta, Rhodes, Turkey (Adana, Alyon, Aydin, Balikesir, Bursa, Denizli, Eskisehir, Famagusta, Gaziantep, Hatay, Icel, Isparta, Istanbul, Izmir, Konya, Manisa, Maras, Mugla, Nicosia, Sanliurfa, Siirt, Urfa, Usak), N Syria (Homs), Lebanon (S Beqaa, Mont-Liban, Nabatiye), N Israel (Central, Gaza, Haifa, Jerusalem, Northern, Tel Aviv, West Bank), NE Egypt (Sinai), SW Russia (Dagestan), S Georgia, S Armenia, Azerbaijan, Turkmenistan, Iraq and Iran (Central, East Azarbaijan, Esfahan, Hamadan, Semnan, Sistan va Baluchestan, West Azarbaijan, Zanjhan), NSL–2000 m.

Sources: A.C.L.G. Günther, 1880a, Wettstein, 1953a, Bannikov et al., 1977, Bruno & Magueri, 1977, Kock, 1979, Basoglu & Baran, 1980, Hraoui-Bloquet, 1981, Bruno, 1984, Ilani, 1983a, Disi et al., 1988, Bruno & Maugeri, 1990, J.B. Rasmussen, 1990, Latifi, 1991, Leviton et al., 1992, Valakos & Mylonas, 1992, Ferri, 1994, Gasc et al., 1997, Bouskila & Amitai, 2001, Beshkov & Nanev, 2002, Demetropoulos & Ioannides, 2002, Hraoui-Bloquet et al., 2002, Ananjeva et al., 2004, Dimaki, 2004, Sindaco et al., 2006, Göçman et al., 2007, Kreiner, 2007, Trapp, 2007, Franzen et al., 2008, Valakos et al., 2008, Baier et al., 2009, Tuniyev et al., 2009, Arakelyan et al., 2011, Bar & Haimovitch, 2011 and Stojanov et al., 2011.

Remarks: Type locality restriction to southern Syria and adjacent Lower Egypt *fide* T. Barbour & Amaral (1927: 27) invalid but restriction to Trieste *fide* Mertens & Müller (1928: 50) valid because Trieste was a part of Dalmatia in 19th century. Introduced into Malta *fide* Arakelyan et al. (2011: 97). Population from mainland Greece forms separate clade from those of the E Aegean islands, Cyprus, Turkey and Jordan *fide* Poulakakis et al. (2013: 625).

5. *Telescopus gezirae* Broadley, 1994a. J. Afr. Zool. 108(2): 205–206, fig. 3.

Type: Holotype, NMZB 11807, a 500 mm male (G.R.C. Van Someren, late 1966).

Type locality: "Blue Nile, 30 km North from Sennar, Sudan" [= Blue Nile River, 30 km N Sennar, N Sennar Prov., SE Sudan, 13°47'N, 33°35'E, elevation 415 m].

Distribution: Southeastern Sudan (Al Jazirah, N Sennar), 400–415 m.

Source: Crochet et al., 2008.

Remarks: Photographs of holotype in Crochet et al. (2008: fig. 7a).

6. *Telescopus hoogstraali* K.P. Schmidt & Marx, 1956. Fieldiana: Zool. 39(4): 33–34, figs. 5–6.

Type: Holotype, FMNH 72027, a 993 mm male (H. Hoogstraal, 15 May 1953).

Type locality: "Wadi el Sheikh, St. Catherine's Monastery area, Sinai Peninsula. Collected at about 5,000 feet altitude, among rocks on a hillside" [= Wadi el Sheikh, South Sinai Govern., NE Egypt, 28°33'N, 33°59'E, elevation 1585 m].

Distribution: Africa and Middle East. Northeastern Egypt (North Sinai, South Sinai), S Israel (Southern, West Bank) and W Jordan (Amman, Maan), 50–1585 m.

Sources: Zinner, 1977, Y. Werner, 1983, Bouskila & Amitai, 2001, Disi et al., 2001, Baha El Din, 2006, Amr & Disi, 2011 and Bar & Haimovitch, 2011.

Remarks: A valid species *fide* Y. Werner, 1983; a subspecies of *T. fallax fide* Zinner, 1977.

7. *Telescopus nigriceps* (Ahl, 1924). Arch. Naturg. 90A(5): 246. (*Tarbophis nigriceps*)

Type: Holotype, ZMB 23787, a 482 mm specimen (von Oppenheim), lost *fide* R. Günther *(in litt.)*.
Type locality: "Central-Mesopotamien" [= central Iraq].
Distribution: Southwestern Asia. Southeastern Turkey (Homs, Kilis, Sanliurfa), S Syria (Homs, Suweida), Lebanon, W Jordan (Amman, Irbid, Jarash, Karak, Maan) and Iraq (Al Anbar, Baghdad), 300–1000 m.
Sources: Disi et al., 1988, 2001, Leviton et al., 1992, Amr & Disi, 2011 and Ilgaz et al., 2007.
Remarks: A valid species *fide* K.P. Schmidt, 1939b, J.B. Rasmussen, 1979, Martens, 1993, Göçmen et al., 2007b and Amr & Disi, 2011. Occurs in Israel *fide* Amr & Disi (2011: 233). Two taxa masquerading in Jordan under *T. nigriceps fide* Disi et al. (2001: 315).

8. *Telescopus obtusus* (A. Reuss, 1834). Mus. Senck. 1: 137–139. (*Coluber obtusus*)

Synonyms: *Coluber geoffr.* Wagler, 1830 (*nomen illegitimum*), *Telescopus geoffroanus* Fitzinger, 1843, and *Telescopus geoffreanus* A.-M.-C. Duméril, Bibron & Duméril, 1854b (*nomen emendatum*).
Type: Lectotype SMF 19664 (formerly SMF-R III.V.10.a & SMF-B 9053, a), a female (E. Rüppell, 1832), designated by Mertens (1922: 181).
Type locality: "Ägypten" [= Egypt] via lectotype selection.
Distribution: Northeastern Africa. Egypt (Aswan, Assiut, Beheira, Beni Suef, Cairo, S El-Bahr El-Ahmar, Giza, Ismailia, Matrouh, Minya, Qena, Sohag, Suez), Eritrea, Djibouti (Djibouti, Obock), Ethiopia (Bale, Gemu Gofa, Gondar, Harerge, Kefa, Sidamo), Somalia (Bakool, Bay, Galguduud, Gedo, Hiraan, Jubbada Dhexe, Jubbada Hoose, Mogadishu, Mudug, Nugaal, Shabeellaha Dhexe, Shabeellaha Hoose, Togdheer, Woqooyi Galbeed), Sudan (El-Bahr El-Ahmar, Janub Darfur), E South Sudan (Eastern Equatoria, Jonglei), NE Uganda (E Northern), Kenya (Coast, Eastern, North-Eastern, Rift Valley) and NE Tanzania (Arusha, Kilimanjaro), NSL–1400 m.
Sources: Lanza, 1983a, 1990, W. Böhme et al., 1989, Broadley, 1994, Leviton et al., 1996, Schleich et al., 1996, Spawls et al., 2002, Crochet et al., 2008, and Largen & Spawls, 2010.
Remarks: A valid, clearly diagnosable, allopatric taxon *fide* Crochet et al. (2008: 39). A valid species fide Broadley (1994: 207) and Schleich et al. (1996: 524) but a subspecies of *T. dhara fide* Gasperetti (2008: 281), Leviton et al. (1992: 107), and Baha El Din (2006: 274).

T

9. *Telescopus pulcher* (Scortecci, 1935). Ann. Mus. Civ. Stor. Nat. 'Giacomo Doria,' Genova (1935–1937) 59: 2–5, 3 figs. (*Migiurtinophis pulcher*)

Type: Holotype, MSNG, a 410 mm male (N.M. Bronzi, 28 June 1930).
Type locality: "Migiurtinia (località imprecisata)" [= Bari and E Nugaal Region, NE Somalia].
Distribution: Northern Somalia (Bari, Nugaal, Togdheer) and E Ethiopia (E Harerge), 1065–1100 m.
Sources: H.W. Parker, 1949, Lanza, 1983a, 1990, Largen & Rasmussen, 1993 and Largen & Spawls, 2010.
Remarks: Holotype was supposed to be returned to MSNG from Prof. O. De Beaux *fide* Scortecci but apparently was not as it is not listed by Capoccacia, 1961.

10. *Telescopus rhinopoma* (Blanford, 1874). Ann. Mag. Nat. Hist. (4) 14(79): 34. (*Dipsas rhinopoma*)

Synonym: *Dipsadomorphus jollyi* Wall, 1914d.
Types: Syntypes (2), BMNH 1946.1.5.10, a 1207 mm male (W.T. Blanford), and ZSI 3500 (formerly IMC).
Type locality: "Carmania, Persia" [= Kerman Prov., SE Iran]. Restricted to Kerman, Kerman Prov., S Iran *fide* W. Böhme (1977a: 203, fig. 1.4).
Distribution: Southwestern Asia. Southern Turkmenistan, S Iran (Central, Fars, Razavi Khorasan, Semnan, Sistan va Baluchestan), SW Afghanistan (Qandahar) and S Pakistan (Balochistan, Sindh), 985–1985 m.
Sources: M.A. Smith, 1943, Mertens, 1969a, Bannikov et al., 1977, W. Böhme, 1977b, Rai, 1978, Mahendra, 1984, Kudrjavtsev & Mamet, 1989a, Latifi, 1991, Leviton et al., 1992, Szczerbak, 1994, M.S. Khan, 2002, 2006 and Ananjeva et al., 2004.
Remarks: W. Böhme (1977b: 203) indicated that *T. rhinopoma* and *T. fallax* may represent a cline and thus be conspecific.

11. *Telescopus semiannulatus* A. Smith, 1849 *in* 1838–1849. Illust. Zool. So. Africa, Rept.: pl. 72, figs. a–c, 2 pp.

Synonyms: *Tarbophis semiannulatus meridionalis* F. Werner, 1898d, and *Telescopus semiannulatus polystictus* Mertens, 1954b.
Type: Holotype, BMNH 1946.1.2.55 (formerly BMNH 1871.4.21.1), a 743–749 mm specimen (A. Smith, 1825–1837).
Type locality: Not stated. Designated as Loanda, South Africa [= La Locanda, E Western Cape Prov., SW South Africa, 33°51'S, 22°31'E, elevation 350 m] by inference *fide* Loveridge (1957a: 270).
Distribution: Southeastern Africa. Southern Democratic Republic of the Congo (Bandundu, Bas-Congo, Katanga, Kinshasa), NW Angola (Luanda), SE Kenya (Coast, Eastern), Tanzania (Dodoma, Iringa, Lindi, Mbeya, Morogoro, Mtwara, E Piwani, Rukwa, Ruvuma, Singida, Tabora, E Tanga), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Malawi (Central, Northern, Southern), Mozambique (Gaza, Inhambane, Manica, Maputo, Sofala, Tete), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North,

Matabeleland South, Midlands), Botswana (Central, Gaborone, Ghanzi, Kgalagadi, Kweneng, North West, North East, South East, Southern, Tuli), Namibia (Caprivi, Erongo, Hardap, Karas, Khomas, Kunene, Okavango, Oshikoto, Otjozondjupa), Swaziland and South Africa (Eastern Cape, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, Northern Cape, North West), NSL–1700 m.

Sources: Mertens, 1954b, 1955, 1971, Sweeney, 1961, FitzSimons, 1962a, 1974, Witte, 1962, Thys van den Audenaerde, 1965, Broadley, 1983, Pienaar et al., 1983, Auerbach, 1987, Branch, 1988, Clauss & Clauss, 2002, Spawls et al., 2002, Broadley et al., 2003, M. Griffin, 2003, Marais, 2004 and Broadley & Blaylock, 2013.

Remarks: Holotype not in BMNH or RSM *fide* V.F.M. FitzSimons (1937: 262). Record from East London, South Africa needs confirmation *fide* Broadley, 1983.

12. *Telescopus somalicus* (H.W. Parker, 1949). Zool. Verh. (6): 88. (*Tarbophis dhara somalicus*)

Type: Lectotype, BMNH 1946.1.23.52 (formerly BMNH 1893.11.21.64), a male (J.W. Gregory, 1892–1893), designated by Crochet et al. (2008: 40).

Type locality: "Ngatana, Kenya" via lectotype selection. Further specified as the old village Ngatana on the lower Tana River valley in Coast Prov., Kenya, ca. 1.7 km NW of the new village Wema (2°11'S, 40°12'E, elevation 15 m) and 36 km NW Witu (2°23'S, 40°26'E, elevation 20 m) *fide* Broadley & Wallach (2007a: 28) and Crochet et al. (2008: 40).

Distribution: Southern Somalia (Jubbada Dhexe) and Kenya (Coast, S Rift Valley), NSL–600 m.

Sources: Spawls et al., 2002 and Crochet et al., 2008.

Remarks: A valid, clearly diagnosable, allopatric taxon *fide* Crochet et al. (2008: 40).

13. *Telescopus tessellatus* (Wall, 1908i). J. Bombay Nat. Hist. Soc. (1907–1908) 18(4): 802–803. (*Tarbophis tessellatus*)

Synonym: *Tarbophis martini* K.P. Schmidt, 1939b.

Type: Holotype, BNHS 2665, ca. 457 mm specimen in five pieces (A.T. Wilson, 10 July 1908).

Type locality: "Maidan Mihaftan 30 m. E. of Shushtar in S.W. Persia" [= Maidan-e-Naftun, Khuzistan Prov., SW Iran, 31°59'N, 49°19'E, elevation 300 m *fide* Schätti et al., 2009b: 121].

Distribution: Southwestern Iran (Central, Esfahan, Hamadan, Khuzestan, Kordestan) and Iraq (Bagdad), 20–2245 m.

Sources: W. Böhme, 1977b, Latifi, 1991 and Leviton et al., 1992.

14. *Telescopus tripolitanus* (F. Werner, 1909a). Zool. Jahrb. (Abt. Syst. Ökol. Geog. Tiere) 27(6): 619–620. (*Leptodira tripolitana*)

Synonyms: *Tarbophis guidimakaensis* Chabanaud, 1916b, *Tarbophis gabesi* Domergue, 1955, and *Pseudotarbophis gabesiensis,* Domergue, 1959 (*nomen emendatum*).

Type: Holotype, NMW, a 740 mm male (R. Storch via W. Schlüter), lost *fide* Kramer & Schnurrenberger (1963: 528).

Type locality: "Tripolis" [= Tripoli, Tripoli Govern., NW Libya, 32°53'N, 13°11'E, elevation 20 m]. Specified as NW Libya or S Tunisia *fide* Crochet et al. (2008: 35).

Distribution: North Africa. Morocco (Agadir, Meknes, Ouarzazate, Tan Tan, Tata), Algeria (Tamanrasset, Tindouf), S Tunisia (Gabès, Gafsa), Libya (Nalut), Western Sahara (NE Rio de Oro, Saguia El Hamra), Mauritania (Guidimaka, Tagant, Trarza), N Senegal (Fatick, Kaolack, Louga, Matam, Saint-Louis, Tambacounda, Thiès), Mali (Gao, Koulikoro, Mopti, Tombouctou), Niger (S Agadez, Dosso, Maradi, Niamey, Tahoua, Zinder), N Burkina Faso (Nord, Sahel), N Nigeria (Bauchi, Sokoto), Central African Republic (Vakaga) and Sudan (Shamal Kurdufan), NSL–1135 m.

Sources: Kramer & Schnurrenberger, 1963, Domergue, 1966, Roman, 1980, W. Böhme & Nikolaus, 1989, W. Böhme et al., 1989, Geniez et al., 2004, Chippaux, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007 and Crochet et al., 2008.

Remarks: *Telescopus guidimakaensis* a valid species *fide* Geniez et al. (2004: 155). Probably occurs in ext. N Cameroon *fide* Chirio & LeBreton (2007: 548).

15. *Telescopus variegatus* (J.T. Reinhardt, 1843). Kgl. Danske Vidensk. Selsk. Natur. Math. Afh. 10: 249–251, pl. 1, figs. 15–17. (*Dipsas variegata*)

Synonym: *Leptodira pobequini* Mocquard, 1902b.

Type: Holotype, ZMUC 63126, a 588 mm specimen (J.R. Chenon, 1826–1836).

Type locality: "Guinea" [= coast of Ghana *fide* Hughes & Barry, 1969: 1027]. Restricted to vicinity of Accra, Ghana *fide* J.B. Rasmussen & Hughes (1997: 14, 16).

Distribution: West Africa. Southern Senegal (Dakar, Kédougou, Tambacounda), Gambia (Western), Guinea (Kouroussa), S Mali (Kayes, Koulikoro), Sierra Leone (Northern), Ivory Coast (Bouna, Daloa, Toumodi), Burkina Faso (Centre-Est, Centre-Nord, Centre-Ouest, Est, Hauts-Bassins, Nord, Sud-Est, Volta-Noire), N Ghana (Upper East, Upper West), S Togo (Centrale, Plateaux), Benin (Alibori, Atakora, Collines), Nigeria (Gongola, Kwara), S Niger (Niamey, Tahoua), SW Chad (Chari-Baguirmi, Mayo-Kebbi), N Cameroon (Extreme-Nord, Nord) and N Central African Republic (Ouham, Vakaga), 270–1000 m.

Sources: Doucet, 1963, Leston & Hughes, 1968, Hughes & Barry, 1969, Papenfuss, 1969, Roman, 1977, Roman, 1980, Hughes, 1983, 2013, Rödel et al., 1995, Greenbaum

& Carr, 2005, Chippaux, 2006, Chirio & Ineich, 2006, J.-F. Trape & Mané, 2006b, Chirio & LeBreton, 2007, Ullenbruch et al., 2010 and Segniagbeto et al., 2011.

TERETRURUS Beddome, 1886 (Uropeltidae)

Type species: *Plectrurus sanguineus* Beddome, 1867.
Distribution: Southwestern India.
Sources: M.A. Smith, 1943, Constable, 1949, Gans, 1966, Murthy, 1981c, 1982b, Cadle et al., 1990, McDiarmid et al., 1999 and Pradhan, 2002.

1. *Teretrurus sanguineus* (Beddome, 1867). Madras Quart. J. Med. Sci. 11: 14, pl. 1, fig. 2. (*Plectrurus sanguineus*)

Synonyms: *Platyplectrurus hewstoni* Beddome, 1876, *Plectrurus scabricauda* Theobald, 1876, and *Teretrurus travancoricus* Beddome, 1886.
Types: Syntypes (12), BMNH 1946.1.16.57–62 (R.H. Beddome, 1857–1867), MNHN 1895.116a–c (R.H. Beddome, 1857–1867), and NMW 2161.1–3 (R.H. Beddome, 1857–1867, via F. Steindachner, 1883).
Type locality: "Anamallay forests; 4,000 feet elevation, Madras Presidency" [= Anamalai Hills, S Western Ghats, E Kerala /W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E, 1220 m].
Distribution: Southwestern India (Western Ghats of E Kerala, SW Tamil Nadu), 220–2800 m.
Remarks: Type locality above Ponachi *fide* BMNH catalogue. Only a single specimen described originally so one syntype is lectotype (with 144 V + 7 SC).

TETRACHEILOSTOMA Jan, 1861b (Leptotyphlopidae)

Synonym: *Eucephalus* Fitzinger, 1843.
Type species: *Typhlops bilineatus* Schlegel, 1839 *in* 1837–1844.
Distribution: Lesser Antilles.
Sources: Hedges, 2008 and R.W. Henderson & Powell, 2009.

T

1. *Tetracheilostoma bilineata* (Schlegel, 1839 *in* 1837–1844). Abbild. Amph.: 36, pl. 32, figs. 5–8. (*Typhlops bilineatus*)

Synonyms: *Stenostoma bilineatum* A.-M.-C. Duméril & Bibron, 1844, *Glauconia bilineata* Boulenger, 1893a, and *Leptotyphlops bilineatus* Hahn, 1980a.
Types: Syntypes (3), RMNH 3704a–b and MNHN 3234, longest syntype 101 mm (A. Plée, 1823–1825).
Type locality: "Martinique" [= Lesser Antilles, West Indies].
Distribution: Martinique and Chancel Is., NSL–90 m.
Sources: Barbour, 1915a, R. Thomas, 1965a, Hahn, 1980a, R. Thomas et al., 1985, A. Schwartz & R.W. Henderson, 1991, Wallach, 1998b, McDiarmid et al., 1999, Breuil, 2003 and Hedges, 2008.
Remarks: Guadeloupe record doubtful, but see Lazell *in* Thomas (1965a: 5).

2. *Tetracheilostoma breuili* (Hedges, 2008). Zootaxa (1841): 9–11, figs. 1b, 2a (middle), 2b (middle). (*Leptotyphlops breuili*)

Type: Holotype, USNM 564810 (formerly SBH 267731), a 102–113 mm male (S.B. Hedges & C.A. Hass, 13 June 2006).
Type locality: "north slope of Maria Major Island, St. Lucia, 60 m (13º 43.430' N, 60º 55.897' W)."
Distribution: St Lucia (Maria Major Is.), NSL–60 m.

3. *Tetracheilostoma carlae* (Hedges, 2008). Zootaxa (1841): 5–7, figs. 1a, 2a (lower), 2b (right). (*Leptotyphlops carlae*)

Type: Holotype, USNM 564819 (formerly SBH 267708), a 93–104 mm female (S.B. Hedges & C.A. Hass, 9 June 2006).
Type locality: "near Bonwell, St. Joseph Parish, Barbados, 280 m (13º 11.196' N, 59º 32.445' W)."
Distribution: Barbados (St. John, St. Joseph), 100–280 m.
Source: Emsley, 1966.

TETRALEPIS Boettger, 1892a (Colubroidea *incertae sedis*)

Type species: *Tetralepis fruhstorferi* Boettger, 1892a.
Distribution: Western Indonesia.
Sources: Hodges, 1993 and I. Das, 2010, 2012.
Remarks: This genus unassignable to family *fide* Zaher et al. (2009: 132).

1. *Tetralepis fruhstorferi* Boettger, 1892a. Ber. Offenb. Ver. Naturk. (1887–1891) 29–32: 125–126.

Type: Lectotype, SMF 17891 (formerly SMF-B 7320, a), a 502 mm female (H. Fruhstorfer, May 1891), designated by Mertens (1922: 179).
Type locality: "Tengger-Gebirge, 1200 m H., Ost-Java" [= Tengger Mtns., E Java, W Indonesia, elevation 1200 m] via lectotype selection.
Distribution: Western Indonesia (E Java), 1200 m. Known only from type series.

†*TEXASOPHIS* Holman, 1977b (Colubridae)

Type species: †*Texasophis fossilis* Holman, 1977b.

Distribution: Middle Oligocene to middle/upper Miocene of W Europe and lower Oligocene to upper Miocene of cen. USA. Fossils unassigned to species include lower Miocene (Arikareean) of USA (Nebraska), and upper Miocene (Clarendonian) of USA (Nebraska).

Sources: Holman, 1979b, 1984a, 1984b, 2000a, Rage, 1984b and Parmley & Hunter, 2010.

Remarks: *Texasophis* might represent an extant Asian genus *fide* Szyndlar (1994: 33).

1. †*Texasophis bohemiacus* Szyndlar, 1987. J. Vert. Paleont. 7(1): 62–64, fig. 7a–e.

Type: Holotype, CUP 1238, one trunk vertebra.

Type locality: "Lower Miocene (early Orleanian or Ottnangian; European Land Mammalian Biozone MN 4 = upper Hemingfordian in North America) locality of Dolnice near to the town of Cheb in westernmost Bohemia (Czechoslovakia)." [= Czech Republic].

Distribution: Lower Oligocene (Rupelian, MP 22: 28.4–33.9 mya) of Germany, and lower Miocene (Orleanian, MN4: 16.0–16.9 mya) of Czech Republic.

Sources: Szyndlar, 1994 and Szyndlar, 2012.

2. †*Texasophis fossilis* Holman, 1977b. Herpetologica 33(4): 397–398, figs. 9a–b.

Type: Holotype, SMPSMU 63691, one trunk vertebra.

Type locality: "Town Bluff site, eastern-central Tyler County Texas" [= Fleming Formation, Early Barstovian, middle Miocene].

Distribution: Lower Miocene (Hemingfordian: 16.3–20.6 mya) of USA (Colorado), and middle Miocene (Barstovia: 13.6–16.3 mya) of USA (Texas).

Sources: Holman, 2000a, 2003.

3. †*Texasophis galbreathi* Holman, 1984a. J. Vert. Paleont. 3(4): 223–225, fig. 1.

Type: Holotype, MSUVP 1038, one trunk vertebra (E.C. Galbreath).

Type locality: "Flats Area; SW 1/4 sec. 12, T. 11 N., R. 54 W., Logan County, Colorado. Scenic member of Brule Formation, White River Group; Orella Land Mammal Age, middle Oligocene." Emended to Flats, E. 1/2 Sec. 12, T11N, R54W, Logan Co., Colorado, Scenic Member of the Brule Formation. White River Group: early Orellan to Whitneyan age; middle to late Oligocene *fide* E.C. Galbreath *in* Sullivcan & Holman (1996: 366).

Distribution: Lower Oligocene (Orellan: 33.3–33.9 mya) of USA (Colorado). Known only from type locality.

Sources: Sullivan & Holman, 1996 and Holman, 2000a.

4. †*Texasophis hecki* M. Böhme, 2008. Cour. Forsch.-Inst. Senck. (260): 170, figs. 3a–c, pl. 4, figs. 10a–e.

Type: Holotype, SMF 5014, one trunk vertebra.

Type locality: "Oberleichtersbach, Rhön Mountains, Northern Bavaria, Germany; uppermost Oligocene, MP 30."

Distribution: Upper Oligocene (Chattian, MP 30: 23.0–28.4 mya) of Germany. Known only from type locality.

5. †*Texasophis meini* Rage & Holman, 1984. Géobios 17(1): 91–93, figs. 2a–e.

Type: Holotype, UCBL 285002, one trunk vertebra.

Type locality: "La-Grive-Saint-Alban (Isère) fissure M, Sansan, France, zone MN 7, Astaracien" [= French Miocene].

Distribution: Lower to middle Miocene (Orleaniain-Astaracian, MN 4–8: 11.1–16.9 mya) of France, Germany, Hungary and Ukraine.

Sources: Holman, 1984b, Augé & Rage, 2000 and Szyndlar, 1987, 1991, 2012.

Remarks: Congeneric with *Boiga fide* Zerova, 1987.

6. †*Texasophis wilsoni* Holman, 1984b. Copeia 1984(3): 660–661, fig. 1.

Type: Holotype, FHSC 3640, one trunk vertebra (R.J. Zakrzewski).

Type locality: "Ogallala Formation, middle or late Clarendonian Age (late medial Miocene) near Wakeeney, Trego County, Kansas" [= middle or upper Miocene].

Distribution: Middle/upper Miocene (Clarendonian: 10.3–13.6 mya) of USA (Kansas).

Source: Holman, 2000a.

THALASSOPHINA M.A. Smith, 1926a (Elapidae)

Synonyms: *Thalassiophis* – A.-M.-C. Duméril, Bibron & Duméril, 1854b (*nomen incorrectum*), *Praescutata* Wall, 1921g (*nomen ineditum*), *Praescuta* – Deraniyagala, 1949 (*nomen incorrectum*), *Praecutata* – Nutapahnd & Tumvipart, 1982 (*nomen incorrectum*), and *Thalasophina* – W.W. Tanner & Avery, 1982 (*nomen incorrectum*).

Type species: *Thalassophis viperina* P. Schmidt, 1852.

Distribution: Marine waters of South, SE and E Asia, including Andaman Sea, Arabian Sea, Bay of Bengal, Gulf of Oman, Gulf of Thailand, Hainan Strait, Indian Ocean, Java Sea, Persian Gulf, Strait of Malacca and South China Sea.

Sources: Wall, 1909a, 1921g, Rooij, 1917, M.A. Smith, 1926a, 1943, Cochran, 1930, Tchang, 1932, Bourret, 1934g, C.H. Pope, 1935, Volsoe, 1939, C. Haas, 1950, Deraniyagala, 1955, E.H. Taylor, 1965, Minton, 1966, 1975, Barme, 1968, Halstead, 1970, McDowell, 1972a, Murthy, 1977b, 1986, Voris, 1977, J.D. Romer, 1979a, M.S. Khan, 1982b, 2002, Tweedie, 1983, Joger, 1984, Kharin, 1984d, Zhou, 1985, Tian et al., 1986, Gasperetti,

1988, A.R. Rasmussen, 1989a–b, K.K.P. Lim & Chou, 1990, B.L. Lim, 1991, Stuebing, 1991, Leviton et al., 1992, Golay et al., 1993, Zhao & Adler, 1993, Xiang & Li, 2009, Zaher et al., 2009, I. Das, 2010, 2012, A.R. Rasmussen et al., 2011, A. Silva et al., 2011 and Hoser, 2012e.

Remarks: *Praescutata* was not proposed *fide* errata sheet in Wall, 1921g (Golay & McCarthy *in* Golay et al., 1993: 247). A synonym of *Lapemis fide* McDowell *in* Golay et al. (1993: 247) or *Hydrophis fide* Sanders et al., 2013.

1. *Thalassophina viperina* (P. Schmidt, 1852). Abh. Geb. Naturw. Ver. 2(2): 79–81, pl. 3. (*Thalassophis viperina*)

Synonyms: *Disteira praescutata* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Disteira praescutata* A.-M.-C. Duméril, Bibron & Duméril, 1854, *Hydrophis doliata* J.G. Fischer, 1856a (*nomen praeoccupatum*), *Hydrophis nigra* J. Anderson, 1872, *Hydrophis obscurus* Jan, 1859b (*nomen praeoccupatum*), *Hydrophis jayakari* Boulenger, 1887d, *Hydrophis plumbea* Murray, 1887, *Hydrophis viperinus* – Boettger, 1888c, *Thallassophina viperina* – Corkill, 1932 (*nomen incorrectum*), *Thalassophinae viperina* – Maegraith, 1958 (*nomen incorrectum*), *Praescutata viperine* – Sayed, 1972 (*nomen incorrectum*), *Paraescutata viperina* – M.S. Khan, 1982 (*nomen incorrectum*), *Enhydrus plumbea* – Culotta & Pickwell, 1993 (*lapsus calami*), and *Thalassophina veperina* – Culotta & Pickwell, 1993 (*nomen incorrectum*).

Type: Holotype, ZMH 404, a 650 mm male (Meyer & Werner, 1847), destroyed in July 1943 during World War II.

Type locality: "Küste von Java" [= coast of Java, Greater Sundas, SW Indonesia].

Distribution: Asia. United Arab Emirates (Sir Abu Nu'ayr Is.), Oman (Muscat), S Iran (Hormozghan, Sistan va Baluchestan), Pakistan (Balochistan, Sindh), India (Karnataka, Kerala, Maharashtra, Orissa, Tamil Nadu, West Bengal), Sri Lanka (Northern, North-Western, Vaduga Bank, Western), Myanmar (Tanintharyi, Yangon), S Thailand (Pattani, Phatthalung, Phuket, Prachuap Khiri Khan, Singgora, Songkhla, Trat, Phuket Is.), Cambodia (Koh Kong Is.), Vietnam (Dong Nai, Thuan Hai), West Malaysia, Singapore, East Malaysia (Sarawak), W Indonesia (Java, Sumatra), SE China (Fujian, Guangdong, Guangxi, Hainan, Hong Kong) and Taiwan.

THALASSOPHIS P. Schmidt, 1852 (Elapidae)

Synonyms: *Thalassiophis* – A.-M.-C. Duméril, Bibron & Duméril, 1854 (*nomen incorrectum*), *Thallassophis* – Sleen, 1932 (*nomen incorrectum*), *Thallassophis* – Maass-Berlin, 1933 (*nomen incorrectum*), *Talassophis* – Boquet, 1964 (*nomen incorrectum*), and *Thalosophis* – B.L. Lim & Sawai, 1975 (*nomen incorrectum*).

Type species: *Thalassophis anomala* P. Schmidt, 1852.

Distribution: Marine waters of SE Asia and Indonesia.

Sources: M.A. Smith, 1926a, C.P.J. Haas, 1950, Bergman, 1954, E.H. Taylor, 1965, B.L. Lim & Sawai, 1975, Tweedie, 1983, Golay et al., 1993, A.R. Rasmussen, 1997, David & Ineich, 1999, Zaher et al., 2009, I. Das, 2010, 2012, A.R. Rasmussen et al., 2011 and Hoser, 2012e.

1. *Thalassophis anomalus* P. Schmidt, 1852. Abh. Geb. Naturw. Ver. Hamburg 2(2): 81–82, pl. 4, figs. 1–5. (*Thalassophis anomala*)

Synonym: *Thalassophis anomalous* – Culotta & Pickwell, 1993 (*nomen incorrectum*).

Type: Holotype, ZMH 3342 (formerly ZMH 402), a 720 mm male (Meyer & Werner, 1847).

Type locality: "auf der Rhede von Samarang, an der Küste von Java" [= off the port of Semarang (6°58'S, 110°25'E), north coast of Java, Indonesia].

Distribution: Southeast Asia and Indonesia. Thailand, Cambodia, Vietnam, West Malaysia (Johore, Pahang), East Malaysia (Sabah, Sarawak) and Indonesia (Java, Moluccas, Sumatra).

THAMNODYNASTES Wagler, 1830 (Xenodontidae)

Synonyms: *Dryophylax* Wagler, 1830, *Dryophilax* Bonaparte, 1831 (*nomen emendatum*), *Dryophilas* A.-M.-C. Duméril & Bibron, 1844 (*nomen emendatum*), *Thamnodynaster* – Rüppell, 1845 (*nomen incorrectum*), *Dryiophylax* – A.-M.-C. Duméril, Bibron & Duméril, 1854b (*nomen incorrectum*), *Mesotes* Jan, 1863a, *Dryophyllax* – Hoffmann, 1890 (*nomen incorrectum*), *Tamnodynastes* – Brazil, 1914 (*nomen incorrectum*), *Dryophylar* – Amaral, 1935a (*nomen incorrectum*), and *Thamnodinastes* – Abalos & Bucher, 1970 (*nomen incorrectum*).

Type species: *Coluber pallidus* Linnaeus, 1758.

Distribution: South America.

Sources: Amaral, 1944i, Bailey *in* J.A. Peters & Orejas-Miranda, 1970, Pérez-Santos & Moreno, 1988, Franco et al., 2003, Bailey et al., 2005, Zaher et al., 2009 and Vidal et al., 2010.

Remarks: A *Thamnodynastes* sp. is listed for Trinidad by Boos, 2001. A specimen listed as *Thamnodynastes* by Salles et al., 2010, is likely a new species.

1. *Thamnodynastes almae* Franco & Ferreira, 2003. Phyllomedusa 1(2): 60–62, figs. 1–2.

Type: Holotype, IB 52135, a 657 mm male (CHESF, 20 April 1988), destroyed by fire 15 May 2010.

Type locality: "Usina Hidroelétrica Luiz Gonzaga (entre 09°06'S - 38°20'W, 280 m e 08°51'S - 38°45'W, 300 m), no rio São Francisco, municipio de Rodelas, estado da Bahia, Brasil."
Distribution: Eastern Brazil (Alagoas, E Bahia, Ceará, Paraíba, Pernambuco, Rio Grande do Norte), 135–300 m.
Sources: Roberto et al., 2009a, Guedes, 2010 and Jorge & Freire, 2011.

2. *Thamnodynastes ceibae* Bailey & Thomas, 2007. Mem. Fund. La Salle Cien. Nat. (2006) 166: 16–17, figs. 8a–b.

Type: Holotype, UMMZ 218579 (formerly MBUCV 8165), a 583 mm male (J. Racenis & J.A. Roze, 19 May 1963).
Type locality: "La Ceiba, Trujillo State, Venezuela, near sea level."
Distribution: Western Venezuela (Trujillo), NSL. Known only from type locality.
Source: Navarrete et al., 2009.

3. *Thamnodynastes chaquensis* Bergna & Alvarez, 1993. Facena 10: 7–11, fig. 2a, pl. 1, figs. 1a–b.

Type: Holotype, UNNE-CHC 339, a 480 mm male (S. Bergna, 15 Nov. 1992).
Type locality: "Colonia Las Mercedes, Departamento San Fernando, Chaco, nordeste Argentino."
Distribution: Southern South America. Central Brazil (Mato Grosso), Bolivia (Santa Cruz, Tarija), SW Paraguay (Central, Misiones, Neembucú, S Presidente Hayes), Uruguay (Colonia) and NE Argentina (Chaco, NW Corrientes, Formosa, E Salta, N Santa Fe), 50–1300 m.
Sources: Giraudo, 1996, Leynaud & Bucher, 1999, Carreira-Vidal, 2003, Cacciali, 2008 and Jensen, 2008.

4. *Thamnodynastes chimanta* Roze, 1958c. Acta Biol. Venez. 2(25): 305–307.

Type: Holotype, FMNH 74042, a 340 mm male (J.A. Steyermark & J. Wurdack, 10 Feb. 1955).
Type locality: "Chimantá Tepui, Estado Bolivar, Venezuela. Colectado sobre elsuelo en la sabana de la cumbre Apacara Tepui; 2.200 metros de altura."
Distribution: Eastern Venezuela (Bolívar), 1900–2600.
Sources: Lancini, 1986, C.W. Myers & Donnelly, 1996, Gorzula & Señaris, 1998 and Navarrete et al., 2009.

5. *Thamnodynastes corocoroensis* Gorzula & Ayarzagüena, 1996. Publ. Asoc. Amigos Doñana (1995) (6): 6–8, fig. 1.

Type: Holotype, MHNLS 11376, a 258 mm female (S. Gorzula, 10 Nov. 1987).
Type locality: "Tepuy Corocoro, Estado Bolívar, Venezuela (05°46'N-66°11'W), 2.150 m.n.s.m.," (partly in error). Corrected to in Estado Amazonas *fide* Gorzula & Señaris (1998: 180, 255) (locality H-017).
Distribution: Southern Venezuela (N Amazonas/W Bolívar), 2150 m. Known only from type locality.
Sources: Gorzula & Señaris, 1998, C.W. Myers & Donnelly, 2001 and Navarrete et al., 2009.

6. *Thamnodynastes dixoni* Bailey & Thomas, 2007. Mem. Fund. La Salle Cien. Nat. (2006) 166: 13–16, figs. 5a–b, 6–7.

Type: Holotype, TCWC 44896, a 432 mm female (J.R. Dixon & M.A. Staton, 17 Oct. 1973).
Type locality: "Hato La Guanota, 4 km west of San Fernando, Apure State, Venezuela."
Distribution: Southern Venezuela (Amazonas, Apure, Bolívar, Guárico) and SE Colombia (Arauca), NSL–500 m.

7. *Thamnodynastes duida* C.W. Myers & Donnelly, 1996. Amer. Mus. Novit. (3172): 48–51, figs. 29a, 30a, 31a.

Type: Holotype, AMNH 36608, a 455 mm male (Sidney F. Tayler Jr. [Duida Exped.], 27 Jan. 1929).
Type locality: "the south end of the summit of Cerro Duida, valley between peaks 7 and 16, about 6610 ft. (2015m) elevation, Amazonas, Venezuela."
Distribution: Southern Venezuela (Amazonas), 2015 m. Known only from type locality.
Sources: C.W. Myers & Donnelly, 2001 and Navarrete et al., 2009.

8. *Thamnodynastes gambotensis* Pérez-Santos & Moreno, 1989b. Boll. Mus. Reg. Sci. Nat. Torino 7(1): 1–4, figs. 1–4.

Type: Holotype, MNCN 11187, a 505 mm male (C. Pérez-Santos, 11 July 1987).
Type locality: "2 km de Gambote sobre la carretera de Cartagena de Indias, Dep. de Bolivar, Colombia." Elevation 5 m *fide* García-Díez & González-Fernández (2013: 57).
Distribution: Northern Colombia (Atlántico, Bolívar, Cesar), NSL–150 m.
Source: Bailey & Thomas, 2007.
Remarks: Photographs of holotype in García-Díez & González-Fernández (2013: figs. 3 left–right).

9. *Thamnodynastes hypoconia* (Cope, 1860e). Proc. Acad. Nat. Sci. Philadelphia 12(6): 247–248. (*Tachymenis hypoconia*)

Type: Holotype, ANSP 3747 (A. Kennedy).
Type locality: "Buenos Ayres" [= Buenos Aires, Buenos Aires Prov., NE Argentina, 34°36'S, 58°23'W, elevation 15 m].

Distribution: Southern South America. Southern Brazil (Goiás, Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo, Tocantins), Uruguay (Canelones, Colonia, Durazno, Flores, Florida, Lavalleja, Maldonado, Montevideo, Rivera, Rocha, San José, Treinta y Tres), Paraguay (Alto Paraguay, Alto Paraná, Amambay, Asunción, Caaguazú, Caazapá, Canindeyú, Central, Concepción, Cordillera, Guairá, Itapúa, Misiones, Neembucú, Paraguarí, Presidente Hayes, San Pedro) and Argentina (Buenos Aires, Córdoba, Santa Fe), NSL–650 m.

Sources: J.D. Williams & Francini, 1991, Bergna & Alvarez, 1993, Bellagamba & Vega, 1996, Cacivio, 1997, Leynaud & Bucher, 1999, Marques et al., 2001, Carreira-Vidal et al., 2005, Cacciali, 2008, Farlani et al., 2010 and Bellini et al., 2013.

10. *Thamnodynastes lanei* Bailey, Thomas & Silva, 2005. Phyllomedusa 4(2): 93–95, figs. 14a–b.

Type: Holotype, UMMZ 109081, a 648 mm male (J.R. Bailey, 24 Jan. 1941).

Type locality: "Salobra, Mato Grosso do Sul, Brazil" [= Salobra, W Mato Grosso do Sul State, SW Brazil, 21°14'S, 57°08;'W, elevation 200 m].

Distribution: Central South America. Brazil (Alagoas, Mato Grosso, Mato Grosso do Sul, Pará), N and E Bolivia (Beni, Santa Cruz), Peru (Loreto), Paraguay (San Pedro) and N Argentina (Formosa), NSL–200 m.

11. *Thamnodynastes longicaudus* Franco, Ferreira, Marques & Sazima, 2003. Zootaxa (334): 2–5, figs. 1–3.

Type: Holotype, IB 59545, a 574 mm male (M.D. Galanta, 22 Dec. 1998), destroyed by fire 15 May 2010.

Type locality: "Brazil, São Paulo, São Lourenço da Sena, (23°51'S—46°56'W, 690 m a.s.l.)."

Distribution: Southeastern Brazil (Espírito Santo, Rio de Janeiro, São Paulo), 520–905 m.

Source: Lima-Silveira, 2006.

T

12. *Thamnodynastes marahuaquensis* Gorzula & Ayarzagüena, 1996. Publ. Asoc. Amigos Doñana (1995) (6): 8–11, fig. 2.

Type: Holotype, MHNLS 12507, a 396 mm female (J. Serrano, 11 Dec. 1992).

Type locality: "Tepuy Marahuaca Norte, Estado Amazonas, Venezuela (3°45'N-65°30'W), 2.500 m n.s.m."

Distribution: Southern Venezuela (Amazonas), 2500 m. Known only from type locality.

Sources: C.W. Myers & Donnelly, 2001 and Navarrete et al., 2009.

13. *Thamnodynastes pallidus* (Linnaeus, 1758). Syst. Nat., ed. 10 1: 221. (*Coluber pallidus*)

Synonyms: *Coluber strigilis* Thunberg, 1787, and *Natrix punctatissima* Wagler *in* Spix, 1824, *Coluber lineolatus* Wied-Neuwied, 1825c, *Coluber nattereri* Mikan, 1828, *Thamnodynastes puntatissimus* – A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Mesotes obstrusus* Jan, 1863a, *Mesotes obstrusus plataensis* Jan, 1863a (*nomen nudum*), *Mesotes obstrusus plataensis* Jan, 1866 *in* Jan & Sordelli, 1866–1870, and *Thamndodynastes nattereri laevis* Boulenger, 1885a.

Type: Neotype, ZMUU 292, a 509 mm male, designated by Bailey et al. (2005: 87).

Type locality: Unknown via neotype selection.

Distribution: Northwesrtern South America. Colombia (Atlántico, Guajira, Magdalena), S Venezuela (Amazonas, Apure, Bolívar, Cojedes, Delta Amacuro, Zulia), N Guyana (Essequibo Islands-West Demerara), N Suriname (Commewijne, Paramaribo, Wanica), N French Guinea (N Cayenne), Ecuador, Brazil (Bahia, Pará, Rio de Janeiro, São Paulo, Comprida and Grande Is.) and Peru, NSL–500 m.

Sources: Roze, 1966a, Lancini, 1986, Vanzolini et al., 1980, Chippaux, 1987, Bailey & Thomas, 1991, Cunha & Nascimento, 1993, Reati, 1996, Yanosky et al., 1996, C.W. Myers & Donnelly, 1997, Gorzula & Señaris, 1998, Starace, 1998, Freitas, 1999, Abuys, 2003, Franco & Ferreira, 2003, Harvey & Muñoz, 2004, Bailey et al., 2005, Duarte Roche & Van Sluys, 2006, Navarrete et al., 2009 and C.J. Cole et al., 2013.

Remarks: Photographs of neotype in Bailey et al. (2005: figs. 2a–c). Type lost *fide* Andersson (1896: 25).

14. *Thamnodynastes paraguanae* Bailey & Thomas, 2007. Mem. Fund. La Salle Cien. Nat. (2006) 166: 9–12, figs. 1a–b.

Type: Holotype, MBUCV 1468, a 477 mm male (Toledo, 21 Nov. 1964).

Type locality: "Norte de Paraguaná, Falcón State, Venezuela."

Distribution: Extreme N Colombia (La Guajira) and W Venezuela (Falcón, Lara, Zulia), NSL–50 m.

Source: Navarrete et al., 2009.

15. *Thamnodynastes ramonriveroi* Manzanilla & Sánchez, 2005. Mem. Fund. La Salle Cien. Nat. (2004) 161–162: 63–71, figs. 1a–c, 2.

Type: Holotype, EBRG 3957, a 469 mm male (J. Manzanilla & D. Sánchez, 25 Sept. 1999).

Type locality: "Cerro La Laguna (10°01'27"N-64°07'0) macizo del Turimiquire, municipio Freites, Estado Anzoátegui, Venezuela, 2130 m s.n.m."

Distribution: Northern South America. Venezuela (Anzoátegui, Bolívar, Delta Amacuro, Monagas, Sucre), Trinidad and Tobago (Trinidad), Guyana (Essequibo Islands-West Demerara, Upper Demerara-Berbice),

Suriname (Nickeria, Paramaribo) and W Brazil (Acre), NSL–2130 m.

Sources: Bailey & Thomas, 2007, Navarrete et al., 2009 and C.J. Cole et al., 2013.

16. *Thamnodynastes rutilus* (Prado, 1942b). Ciencia 3(7): 204, figs. 1–2. (*Dryophylax rutilus*)

Type: Holotype, IB 10337, adult female (T. Beu, 8 April 1942), destroyed by fire 15 May 2010.

Type locality: "Galia, S. Paulo" [= Gália, São Paulo State, SE Brazil, 22°17'S, 49°33'W, elevation 550 m].

Distribution: Southeastern Brazil (São Paulo), 550 m.

17. *Thamnodynastes sertanejo* Bailey, Thomas & Silva, 2005. Phyllomedusa 4(2): 90–92, figs. 8a–b, 9–11.

Type: Holotype IB 26401, a 544 mm female, destroyed by fire 15 May 2010.

Type locality: "Caraiba (Mina Caraiba in the original record), at the head of the Rio Curaçá, Bahia, Brazil" [= Caraiba, N Bahia State, E Brazil, 9°30'S, 38°55'W, elevation 425 m].

Distribution: Eastern Brazil (Bahia, Ceará, Minas Gerais, Pernambuco), 425 m.

Sources: Silveira & Cottu, 2006 and Roberto et al., 2009b.

18. *Thamnodynastes strigatus* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 52–53. (*Tomodon strigatus*)

Type: Holotype, BMNH 1946.1.2.70, a 584 mm female (Warwick).

Type locality: "India," (in error). Corrected to South America *fide* Hoge (1953a: 159).

Distribution: Southern South America. Southeastern Brazil (Paraná, Rio de Janeiro, Santa Catarina, São Paulo), Paraguay (Alto Paraná, Itapúa), Uruguay (Artigas, Cerro Largo, Colonia, Rio Negro, Salto, Treinta y Tres) and Argentina (Buenos Aires, NE Corrientes, Entre Ríos, Misiones, Treinta y Tres), NSL–1000 m.

Sources: Hoge, 1953a, Carreira-Vidal et al., 2005, Harvey & Muñoz, 2004, Cacciali, 2008 and Prigioni et al., 2011.

19. *Thamnodynastes yavi* C.W. Myers & Donnelly, 1996. Amer. Mus. Novit. (3172): 41–45, fig. 26, fig. 27 (upper right).

Type: Holotype, EBRG 3124 (formerly CWM 19665), a 340 mm female (AMNH-Terramar Exped., 19 Feb. 1995).

Type locality: "summit of Cerro Yavi, 2150 m elevation, Amazonas, Venezuela."

Distribution: Southern Venezuela (Amazonas), 2150 m. Known only from type locality.

Sources: C.W. Myers & Donnelly, 2001 and Navarrete et al., 2009.

THAMNOPHIS Fitzinger, 1843 (Natricidae)

Synonyms: *Eutainia* Baird *in* Baird & Girard, 1853, *Eutaenia* Baird, 1854 (*nomen emendatum*), *Eutania* – Kennicott, 1855 (*nomen incorrectum*), *Prymnomiodon* Cope, 1861c, *Tamnophis* – Fitzinger, 1967 (*nomen incorrectum*), *Eulainia* – Higgins, 1873 (*nomen incorrectum*), *Prymniodon* Marschall, 1873 (*nomen emendatum*), *Chilopoma* Cope, 1875c (*nomen nudum*), *Chilopoma* Cope *in* Yarrow, 1875, *Eutaemia* – A.M. 1. *Thamnophis atratus* (Kennicott *in* J.G. Cooper, 1860). Rep. Explor. Surv. Railroad, 47th & 49th Par. 12(2): 296, pl. 15, fig. 1. (*Eutainia atrata*)

Synonyms: *Eutaenia infernalis vidua* Cope, 1892a, *Thamnophis ordinoides hydrophila* Fitch, 1936, *Thamnophis elegans aquaticus* W. Fox, 1951a, and *Thamnophis atratus zaxanthus* Boundy, 1999.

Type: Lectotype, USNM 970A, a 629 mm male (R.D. Cutts [Pacific Railroad Exped.], 1854), designated by Fitch (1940: 89).

Type locality: "San Francisco, California" [USA] via lectotype selection. Corrected to Santa Cruz Mtns. or S San Francisco Peninsula *fide* Boundy (1999: 330).

Distribution: Northwestern USA (coastal cen. California, SW Oregon), NSL–1920 m.

Sources: Bellemin & Stewart, 1977, Fitch, 1984, Stebbins, 1985, Rossman & Stewart, 1987, H. Brown et al., 1995, P.R. Brown, 1997, Boundy, 1999 and Bartlett & Tennant, 2000.

Remarks: Elevated to specific status *fide* Rossman & Stewart (1987: 19), who also suggested that *T. aquaticus* and *T. hydrophilus* are valid subspecies.

2. *Thamnophis bogerti* Rossman & Burbrink, 2005. Occ. Pap. Mus. Nat. Sci., Louisiana St. Univ. (79): 22–24, fig. 8.

Type: Holotype, AMNH 93239, a 396 mm male (C.M. Bogert, 11 Oct. 1964).

Type locality: "Mexico, Oaxaca, El Tejocote, 2377 m elevation" [= El Tejocote, Oaxaca State, S Mexico, 17°21'N, 98°09'W,elevation 2375 m].

Distribution: Southern Mexico (Mesa del Sur of Oaxaca), 2195–2745 m.

Source: Casas-Andreu et al., 1996.

3. *Thamnophis brachystoma* (Cope, 1892b). Amer. Nat. 26: 964–965, 1 fig. (*Eutaenia brachystoma*)

Type: Holotype, ANSP 10751, a 286 mm male (A.M. Brown, 1894).

Type locality: "near Franklin, Venango County, Pennsylvania, on the Alleghany River" [USA].

Distribution: Northeastern USA (S New York, NW Pennsylvania), 270–730 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Pennsylvania, West Virginia).

Sources: Bothner, 1976, Ernst & Barbour, 1989, Conant & Collins, 1991, J.H. Harding, 1997 and Holman, 2000a.

4. *Thamnophis butleri* (Cope, 1889b). Proc. U.S. Natl. Mus. (1888–1889) 11(729): 399–400. (*Eutaenia butleri*)

Type: Holotype, PUL 264, lost *fide* Minton (1980: 258.1).

Type locality: "Richmond, Ind." [Indiana, USA].

Distribution: South-central Canada (S Ontario) and N-cen. USA (NE Indiana, E Michigan, NW Ohio, SE Wisconsin), 150–460 m.

Sources: Conant, 1950, Minton, 1980, Ernst & Barbour, 1989, Conant & Collins, 1991 and J.H. Harding, 1997.

5. *Thamnophis chrysocephalus* (Cope, 1885a). Proc. Amer. Philos. Soc. (1884) 22: 173–174. (*Eutaenia chrysocephala*)

Synonym: *Thamnophis eburatus* E.H. Taylor, 1940a.

Type: Holotype, USNM 30494, a 430 mm specimen (A.L.J.F. Sumichrast, 1855–1882).

Type locality: "Orizaba, Vera Cruz" [= Orizaba, cen. Veracruz State, E Mexico, 18°51'N, 97°06'W, elevation 1235 m].

Distribution: Mexico (E Guerrero, Oaxaca, SE Puebla, cen. Veracruz), 1220–3080 m.

6. *Thamnophis conanti* Rossman & Burbrink, 2005. Occ. Pap. Mus. Nat. Sci., Louisiana St. Univ. (79): 29–31, fig. 12.

Type: Holotype, LSUMZ 75985 (formerly USL 23933), a 415 mm female (T. Hardaway, 15 Aug. 1975).

Type locality: "Mexico, Puebla-Veracruz state line at Mexico Highway 125 [number in error; it is Highway 150 that extends north from Tehuacan, Puebla, to the state line at Puerto del Aire]."

Distribution: Mexico (interface of Mesa Central and Sierra Madre Oriental in Puebla), 2135–2900 m.

Source: Canseco-Márquez & Gutiérrez-Mayén, 2010.

7. *Thamnophis couchii* (Kennicott *in* Baird, 1859b). Explor. Railroad Rte. Sacramento Val.-Columbia Riv. (1855) 10: 10–11. (*Eutaenia couchii*)

Type: Holotype, USNM 866, an adult female (J.S. Newberry [Pacific Railroad Exped.], 1855).

Type locality: "Bank of Pit river, California." Specified as near mouth of Hat Creek *fide* Fitch (1940: 59).

Distribution: Western USA (E California, W Nevada), 90–2440 m.

Sources: Lawson & Dessauer, 1979, Fitch, 1984, Stebbins, 1985, Rossman & Stewart, 1987, Blaustein et al., 1995, P.R. Brown, 1997 and Bartlett & Tennant, 2000.

8. *Thamnophis cyrtopsis* (Kennicott, 1860). Proc. Acad. Nat. Sci. Philadelphia 12(8): 333–334. (*Eutaenia cyrtopsis*)

Synonyms: *Thamnophis cyrtopsis cyclides* Cope, 1861e, *Tropidonotus collaris* Jan, 1863b (*nomen nudum*), *Tropidonotus collaris* Jan, 1865c, *Eutaenia cyrtopsis ocellata* Cope, 1880, *Eutaenia aurata* Cope, 1892a, *Thamnophis vicinus* H.M. Smith, 1942h, and *Thamnophis sumichrasti salvini* H.M. Smith, Nixon & Smith, 1950.

Type: Holotype, USNM 8067 (formerly SIM 930), a 622–626 mm male (D.N. Couch and/or Webb, 1853).

Type locality: "Rinconada Coahuila, Mexico," (in error). Corrected to just across Coahuila state line in Nuevo León, ca. 33 km NE Ramos Arizpe [= Rinconada, ext. W-cen. Nuevo León, NE Mexico, 25°39'N, 00°46'W, elevation 1250 m] *fide* Conant *in* Webb (1966: 58).

Distribution: Southwestern USA and Mesoamerica. Southwestern USA (Arizona, ext. S Colorado, New Mexico, SW and S Texas, SE Utah), Mexico (Aguascalientes, Chiapas, Chihuahua, Coahuila, Colima, Distrito Federal, W Durango, Guanajuato, Guerrero, Hidalgo, Jalisco, México, Michoacán, Morelos, Nayarit, Nuevo León, Oaxaca, Puebla, Querétaro, San Luis Potosí, Sinaloa, Sonora, SW Tamaulipas, Tlaxcala, W Veracruz, S Zacatecas) and SW Guatemala, NSL–2700 m.

Fossil records: Upper Pleistocene (Rancholabrean II) of USA (New Mexico, Texas).

Sources: Milstead, 1953, Duellman, 1961, Webb, 1966, 1978, 1980, J.D. Johnson, 1984, Stebbins, 1985, Villa et al., 1988, Rossman, 1992, 1996, Van Devender & Bradley, 1994, Degenhardt et al., 1996, Auth et al., 2000, Bartlett & Tennant, 2000, Holman, 2000a, Werler & Dixon, 2000, McCranie & Wilson, 2001b and Persons & Rosen, 2001.

Remarks: Collector listed as Webb on specimen tag *fide* Conant (1969: 85).

9. *Thamnophis elegans* (Baird & Girard, 1853). Cat. Rept. No. Amer., Serp. 1: 34–35. (*Eutainia elegans*)

Synonyms: *Eutainia vagrans* Baird & Girard, 1853, *Tropidonotus trivittatus* Hallowell, 1853a, *Eutaenia biscutata* Cope, 1883d, *Eutaenia henshawi* Yarrow, 1883a, *Eutaenia vagrans plutonia* Yarrow, 1883a, *Eutaenia elegans brunnea* Cope, 1892a, *Eutaenia elegans lineolata* Cope, 1892a, *Thamnophis ordinoides hueyi* Van Denburgh & Slevin, 1923, *Thamnophis elegans nigrescens* M. L. Johnson, 1947, *Thamnophis elegans terrestris* W. Fox, 1951a, *Coluber nutkensis* Mociño & Maldonado *in* Arias-Divito, 1968 (*nomen nudum), Thamnophis elegans arizonae* W.W. Tanner & Lowe, 1989, and *Thamnophis elegans vascotanneri* W.W. Tanner & Lowe, 1989.

Type: Holotype, USNM 882, a 597 mm male (C.C. Boyle).

Type locality: "El Dorado Co., Cal." [= California, USA].

Distribution: Western North America and NW Mexico. Western Canada (Alberta, British Colombia, SW Saskatchewan, Vancouver Is.), W USA (N Arizona, N California, Colorado, Idaho, Montana, W Nebraska, Nevada, New Mexico, ext. W Oklahoma, Oregon, W South Dakota, Utah, Washington, Wyoming) and NW Mexico (Baja California Norte, NW Chihuahua), NSL–3660 m.

Fossil records: Middle/upper Pleistocene (Irvingtonian II) of USA (Colorado).

Sources: Webb, 1976, Bellemin & Stewart, 1977, Lawson & Dessauer, 1979, Rossman, 1979, Fitch, 1980a, 1983, McCoy & Flores-Villela, 1988, W.W. Tanner & Lowe, 1989, H. Brown et al., 1995, Degenhardt et al., 1996, P.R. Brown, 1997, Bartlett & Tennant, 2000, Holman, 2000a, Bronikowski & Arnold, 2001, Grismer, 2002 and Lemos-Espinal et al. , 2004.

Remarks: Elevation of 3990 m possibly erroneous *fide* Wise et al. (2008: 360).

10. *Thamnophis eques* (A. Reuss, 1834). Mus. Senck. 1: 152–155, pl. 8, figs. 2a–b. (*Coluber eques*)

Synonyms: *Coluber subcarinata* Gray *in* Richardson et al., 1839, *Eutaenia macrostemma* Kennicott, 1860, *Eutaenia megalops* Kennicott, 1860, *Eutaenia flavilabris* Cope, 1867a, *Eutaenia insigniarum* Cope, 1885a, *Thamnophis stejnegeri* McLain, 1899, *Thamnophis eques virgatenuis* Conant, 1963b, *Thamnophis eques carmenensis* Conant, 2003, *Thamnophis eques cuitzeoensis* Conant, 2003, *Thamnophis eques diluvialis* Conant, 2003, *Thamnophis eques insperatus* Conant, 2003, *Thamnophis eques obscurus* Conant, 2003 (*nomen praeoccupatum*), *Thamnophis eques patzcuaroensis* Conant, 2003, *Thamnophis eques scotti* Conant, 2003, and *Thamnophis eques kiwi* Boundy, 2007 (*nomen substitutum*).

Type: Lectotype, SMF 17179 (formerly SMF-R III.O.9.a & SMF-B 7209, a), 615 mm specimen (F.A. Dillenburger, 1832), designated by Mertens (1922: 179).

Type locality: "Mexico." Restricted to El Limón, Totalco, Veracruz, Mexico by H.M. Smith & Taylor (1950a: 351).

Distribution: Southwestern USA (S Arizona, Nevada, SW New Mexico) and Mexico (Aguascalientes, Chihuahua, ext. SW Coahuila, Distrito Federal, Durango, Guanajuato, Hidalgo, Jalisco, N Michoacán, México, Morelos, Nayarit, S Nuevo León, cen. Oaxaca, Puebla, Querétaro, San Luis Potosí, NE Sonora, Tlaxcala, W-cen. Veracruz, Zacatecas), 55–2590 m.

Sources: H.M. Smith, 1951, Conant, 1961, 1963b, 2000, 2003, W.W. Tanner, 1985, Degenhardt et al., 1996, Queiroz & Smith, 1996, Benitez-Gálvez, 1997, Auth et al., 2000, Bartlett & Tennant, 2000, McCranie & Wilson, 2001b, Lemos-Espinal et al., 2004 and Blo, 2012.

Remarks: A 1911 Nevada record probably represents occurrence in Nevada and possibly Arizona where now extinct *fide* Queiroz & Smith (1996: 155).

11. *Thamnophis errans* H.M. Smith, 1942h. Zoologica 27: 112–113. (*Thamnophis ordinoides errans*)

Type: Holotype, USNM 46336, a 545 mm female (E.W. Nelson & E.A. Goldman, July 1899).
Type locality: "Colonia Garcia, Chihuahua" [= Colonia García, NW Chihuahua State, NW Mexico, 29°58'N, 108°21'W, elevation 2240 m].
Distribution: Northwestern Mexico (W Chihuahua, W Durango, ext. N Nayarit, ext. SW Zacatecas), 1860–2545 m.
Sources: Webb, 1976, Fitch, 1980a and Queiroz & Lawson, 1994.

12. *Thamnophis exsul* Rossman, 1969. Occ. Pap. Mus. Zool., Louisiana St. Univ. (39): 1–2, fig. 1.

Type: Holotype, USNM 166423, a 411 mm female (M.D. Sabath & R.W. Axtell, 6 July 1961).
Type locality: "dry pine forest (ca. 9,100 feet), 11 mi. E, 3.5 mi. S San Antonio de las Alazanas, Coahuila, northern México" [= 18 km E and 6 km S San Antonio de las Alazanas (25°16'N, 100°33'W, elevation 2275 m), ext. SE Coahuila State, NE Mexico].
Distribution: Northeastern Mexico (SE Coahuila, SE Nuevo León, SW Tamaulipas), 2275–3240 m.
Sources: Rossman et al., 1989, Liner, 1992 and Farr et al., 2007.

13. *Thamnophis fulvus* (Bocourt, 1893) *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909. Miss. Sci. Mex. Rept. (13): 777–778, pl. 57, figs. 2, 2a–d. (*Eutaenia cyrtopsis fulvus*)

Type: Holotype, MNHN 94, a 475 mm male (Comm. Sci. Haute Vera Paz, Mex.).
Type locality: "département de la Haute Vera Paz (Guatemala)" [= Alta Verapaz Dept., N Guatemala]. Restricted to vicinity of Cobán, Alta Verapaz, Guatemala *fide* L.C. Stuart (1948: 91–92). Restricted to Cobán *fide* H.M. Smith & Taylor (1950a: 317).
Distribution: Southeastern Mexico (Chiapas), Guatemala (Alta Verapaz), N El Salvador (Chalatenango) and SW Honduras (Francisco Morazán, Intibucá, Ocotepeque), 1410–3355 m.
Sources: L.C. Stuart, 1948, Rossman, 1965b, Webb, 1982, L.D. Wilson & Meyer, 1985, Villa et al., 1988, G. Köhler et al., 2005 and McCranie, 2011a.
Remarks: Holotype listed as MNHN 94.94 *fide* L.C. Stuart (1963: 120).

T

14. *Thamnophis gigas* Fitch, 1940. Univ. California Publ. Zool. 44(1): 69–73. (*Thamnophis ordinoides gigas*)

Type: Holotype, MVZ 5428, an adult female (H.C. Bryant, 16 May 1914).
Type locality: "Gadwall, Merced County, California" [USA].
Distribution: Western USA (cen. California), NSL–120 m.
Sources: Rossman & Stewart, 1987, Brode, 1988, P.R. Brown, 1997, Bartlett & Tennant, 2000 and Halstead et al., 2010.
Remarks: Elevated to specific status *fide* Rossman & Stewart (1987: 19). Extiprated in southern part of the Distribution *fide* Rossman & Stewart, 1987.

15. *Thamnophis godmani* (A.C.L.G. Günther, 1894 *in* 1885–1902). Biol. Cen.-Amér., Rept. Batr.: 133. (*Tropidonotus godmani*)

Type: Lectotype, BMNH 1946.1.21.81, a 555 mm female (H.H. Smith), designated by Rossman & Burbrink (2005: 20–21).
Type locality: "Mexico, Omilteme" [= Omiltemi, cen. Guerrero State, SW Mexico, 17°33'N, 99°41'W, elevation 2185 m] via lectotype selection.
Distribution: Southwestern Mexico (cen. Guerrero), 1770–2440 m.
Source: Rossman & Burbrink, 2005.

16. *Thamnophis hammondii* (Kennicott, 1860). Proc. Acad. Nat. Sci. Philadelphia 12(8): 332. (*Eutaenia hammondii*)

Synonym: *Tropidonotus digueti* Mocquard, 1899.
Type: Lectotype, USNM 894, a male (J.F. Hammond), designated herein.
Type locality: "San Diego, San Diego Co., California, USA" via lectotype selection.
Distribution: Southwestern USA (SW California) and NW Mexico (NW Baja California Norte, Baja California Sur), NSL–2130 m.
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (California).
Sources: Rossman & Stewart, 1987, McGuire & Grismer, 1993, P.R. Brown, 1997, Bartlett & Tennant, 2000, Holman, 2000a and Grismer, 2002.
Remarks: Elevated to specific status *fide* Rossman & Stewart (1987: 19). Three syntypes collected by J. Xantus from Fort Tejon (USNM 5496a–b and ANSP 6522) are identified as *T. couchii fide* Rossman & Stewart (1987: 16).

17. *Thamnophis lineri* Rossman & Burbrink, 2005. Occ. Pap. Mus. Nat. Sci., Louisiana St. Univ. (79): 25–29, fig. 10 (left).

Type: Holotype, UTA 12482, a 404 mm male (J.A. Campbell, 8 June 1983).

Type locality: "Mexico, Oaxaca, Llano de las Flores, 2786 m elevation."

Distribution: Southern Mexico (Mesa del Sur of Oaxaca), 2670–3050 m.

18. *Thamnophis marcianus* (Baird & Girard, 1853). Cat. No. Amer. Rept., Serp. 1: 36–37. (*Eutainia marciana*)

Synonyms: *Eutaenia nigrolateris* A. Brown, 1889, *Eutaenia praeocularis* Bocourt, 1892b, *Thamnophis arabdotus* Andrews, 1937, *Thamnophis ruthveni* Hartweg & Oliver, 1938, *Thamnophis bovallii* Dunn, 1940a, and *Thamnophis rozellae* H.M. Smith, 1940.

Type: Holotype, USNM 844, an 864 mm specimen (R.B. Marcy [Red River Louisiana Exped.], 20 May 1852).

Type locality: "Red River, Ark.," [USA] (partially in error). Specified as between Camp 5 and Red River, on the open prairie *fide* Marcy (1854: 221). Restricted to vicinity of Slough Creek, east of Hollister, Tillman Co., Oklahoma *fide* Mittleman (1949: 243). Further specified as Indian Territory between Camp 5 and Red River, Tillman Co., near Hollister, Oklahoma *fide* H.A. Dundee *in* Cochran (1961: 182) and specimen label of holotype.

Distribution: Southwestern USA and Mesoamerica. Southwestern USA (S Arizona, ext. SE California, ext. SW Kansas, New Mexico, W Oklahoma, Texas), Mexico (ext. NE Baja California Norte, Campeche, Chihuahua, Coahuila, N Durango, Hidalgo, Nuevo León, SE Oaxaca, Quintana Roo, ext. N San Luis Potosí, Sonora, Tabasco, Tamaulipas, Veracruz, Yucatán), Belize (Belize, Cayo), Guatemala (Izabal), Honduras (Atlântida, Cortés, Santa Bárbara), Nicaragua (Chontales, Granada, Managua, Masaya, Rivas) and Costa Rica (N Alajuela, Limón), NSL–1640 m.

Fossil records: Middle Pliocene (Blancan III) of USA (Texas), and upper Pleistocene (Rancholabrean II) of USA (Texas).

Sources: Mittleman, 1949, Shreve & Gans, 1958, Rossman, 1971, Stebbins, 1985, L.D. Wilson & Meyer, 1985, Villa et al., 1988, Degenhardt et al., 1996, J.C. Lee, 1996, 2000, P.R. Brown, 1997, Hollingsworth & Prosser, 1997, J.A. Campbell, 1998b, Bartlett & Tennant, 2000, Holman, 2000a, Stafford & Meyer, 2000, Werler & Dixon, 2000, Grismer, 2002, Ramírez-Bautista et al., 2010, McCranie, 2011a and McCranie et al., 2012b.

Remarks: G.B. McClellan also listed as collector in original description. Type locality suggested as Cache Creek, Oklahoma *fide* Ruthven (1908: 58).

19. *Thamnophis melanogaster* (W.C.H. Peters, 1864b). Mber. Königl. Akad. Wiss. Berlin 1864(6): 389–390. (*Tropidonotus melanogaster*)

Synonyms: *Tropidonotus melanogaster* Deppe, 1830 (*nomen nudum*), *Tropidonotus mesomelanus* Jan, 1863b (*nomen oblitum*), *Tropidonotus mesomelanus* Jan, 1865c, *Tropidonotus baronis mülleri* – Troschel *in* J.W. Müller, 1865 (*nomen incorrigendum*), *Thamnophis melanogaster canescens* H.M. Smith, 1942b, *Thamnophis melanogaster linearis* H.M. Smith, Nixon & Smith, 1950, and *Thamnophis melanogaster chihuahuaensis* W.W. Tanner, 1959.

Types: Syntypes (2), ZMB 1946 and ZMB 1996, two females.

Type locality: "Mexico." Restricted to Xochimilco, Distrito Federal, Mexico *fide* H.M. Smith & Taylor (1950a: 330).

Distribution: Mexico (Aguascalientes, SW Chihuahua, ext. SW Coahuila, Distrito Federal, Durango, Guanajuato, Hidalgo, Jalisco, W México, N Michoacán, Morelos, Nayarit, Queretaro, SW San Luis Potosí, Zacatecas), (435) 850–2830 m.

Sources: H.M. Smith et al., 1950, W.W. Tanner, 1959, Conant, 1963b, Auth et al., 2000, McCranie & Wilson, 2001b, H.M. Smith & Chiszar, 2001a, Webb, 2002, Lemos-Espinal et al., 2004 and González Hernández et al., 2011.

Remarks: Type locality Amerika in ZMB catalogue *fide* R. Günther *(in litt)*.

20. *Thamnophis mendax* C. F. Walker, 1955. Copeia 1955(2): 110–111, fig. 1 (middle).

Type: Holotype, UMMZ 104044, a 368 mm male (W.Z. Lidicker, 28 July 1951).

Type locality: "near La Joya de Salas, Tamaulipas, ± 6,000 ft." [= Joya de Salas, S Tamaulipas State, NE Mexico, 23°12'N, 99°17'W, elevation 1700 m].

Distribution: Northeastern Mexico (S Tamaulipas), 1050–2120 m.

Sources: Dowling et al., 1983 and Rossman, 1992.

21. *Thamnophis nigronuchalis* F.G. Thompson, 1957. Occ. Pap. Mus. Zool., Univ. Michigan (584): 1–3, figs. 1 (right), 2 (right).

Type: Holotype, UMMZ 113611, a 543 mm female (R. Parker, 22 July 1955).

Type locality: "San Luis, Durango, 9000 feet elevation" [= San Luis, S Durango State, NW Mexico, 24°03'N, 104°35'W, elevation 2745 m].

Distribution: Northwestern Mexico (Aguascalientes, SW Durango), 2195–2745 m.

Sources: W.W. Tanner, 1985, Rossman, 1995 and Wood et al., 2011.

Remarks: A valid species *fide* Wood et al., 2011.

22. *Thamnophis ordinoides* (Baird & Girard, 1852c). Proc. Acad. Nat. Sci. Philadelphia (1852–1853) 6(5): 176. (*Tropidonotus ordinoides*)

Synonyms: *Eutainia leptocephala* Baird & Girard, 1853, *Eutainia cooperi* Kennicott, 1859 (*nomen nudum & nomen ineditum*), *Eutainia cooperi* Kennicott *in* J.G. Cooper, 1860, *Thamnophis leptocephala olympia* Meek *in* Meek & Elliot, 1899, and *Thamnophis rubristriata* Meek *in* Meek & Elliot, 1899.

Type: Holotype, none designated (C. Wilkes [U.S. Explor. Exped.], 1841), lost *fide* Kirk, (1979: 233.1).

Type locality: "Puget Sound, Western coast of America" [Washington, USA].

Distribution: Extreme SW Canada (SW British Columbia, Vancover Is.) and NW USA (ext. NW California, W Oregon, W Washington), NSL–1500 m.

Sources: Fitch, 1940, W. Fox, 1948, Kirk, 1979, K. Lawson & Dessauer, 1979, Stebbins, 1985, H. Brown et al., 1995, P.R. Brown, 1997 and Bartlett & Tennant, 2000.

Remarks: A neotype should be designated in next systematic revision *fide* Kirk (1979: 233.2).

23. *Thamnophis postremus* H.M. Smith, 1942g. Zoologica 27(3–4): 109–110. (*Thamnophis eques postremus*)

Type: Holotype, FMNH 120235 (formerly EHT-HMS 5275), a 575 mm female (H.M. Smith).

Type locality: "El Sabino, Michoacán, Mexico" [= El Sabino, N Michoacán, SW Mexico, 20°04'N, 101°44'W, elevation 1750 m].

Distribution: Southwestern Mexico (N Michoacán), 235–1065 m.

Sources: Milstead, 1953, Duellman, 1961, Webb, 1978 and Rossman, 1992.

24. *Thamnophis proximus* (Say *in* E. James, 1823). Exped. Pittsburgh Rocky Mts. 1: 187. (*Coluber proximus*)

Synonyms: *Tropidonotus trivittatus* Deppe, 1830 (*nomen nudum*), *Eutainia faireyi* Baird & Girard, 1853, *Eutaenia rutiloris* Cope, 1885b, *Thamnophis proximus alpinus* Rossman, 1963a, *Thamnophis proximus diabolicus* Rossman, 1963a, *Thamnophis proximus orarius* Rossman, 1963a, and *Thamnophis proximus rubrilineatus* Rossman, 1963a.

Type: Holotype, none designated, ? ANSP, a 794 mm specimen (T. Say [Long Rocky Mtn. Exped.], Sept. 1819–June 1820), lost *fide* H.M. Smith & Taylor (1945: 166).

Type locality: "stone quarry below Camp Missouri" [= Nebraska stone quarry on W side Missouri River, 5 km above mouth of Boyers River, Iowa *fide* H.M. Smith & Taylor (1945: 166), ca. 5 km ENE Fort Calhoun, Washington Co., Nebraska *fide* Rossman (1963a: 109), or 8.5 km S of Fort Calhoun, Nebraska *fide* Dundee, 1996: 79].

Distribution: Central USA and Mesoamerica. Central USA (Arkansas, ext. SE Colorado, Kansas, Illinois, Indiana, E Iowa, ext. W Kentucky, Louisiana, W Mississippi, Missouri, ext. S and E Nebraska, E New Mexico, Oklahoma, Texas, S Wisconsin), Mexico (Campeche, Chiapas, E Coahuila, S Guerrero, Hidalgo, Nuevo León, E Oaxaca, Quintana Roo, San Luis Potosí, Tabasco, Tamaulipas, Veracruz, Yucatán), Central America: Guatemala (Petén and SE coast), Belize (Belize, Orange Walk, Stann Creek, Toledo), El Salvador (Cabañas, La Paz, La Unión, Usulután), Honduras (Choluteca, Comayagua, Francisco Morazán, Gracias a Dios, Valle), Nicaragua (Managua, Masaya, Matagalpa) and Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Puntarenas, San José), NSL–2440 m.

Fossil records: Middle/upper Pliocene (Blancan V) of USA (Kansas), upper Pliocene (Blancan V) of USA (Nebraska), lower/middle Pleistocene (Irvingtonian I) of USA (Kansas), middle Pleistocene (Irvingtonian II) of USA (Nebraska), and upper Pleistocene (Rancholabrean I, II) of USA (Kansas, Missouri, New Mexico, Texas).

Sources: Rossman, 1962, 1963a, 1970a, Stebbins, 1985, L.D. Wilson & Meyer, 1985, Holman, 1987b, Villa et al., 1988, Ernst & Barbour, 1989, Degenhardt et al., 1996, J.C. Lee, 1996, 2000, Harding, 1997, J.A. Campbell, 1998b, G. Köhler, 1999b, Bartlett & Tennant, 2000, Holman, 2000a, Stafford & Meyer, 2000, Werler & Dixon, 2000, Savage, 2002, Solórzano, 2004, G. Köhler et al., 2005, Ramírez-Bautista et al., 2010 and McCranie, 2011a.

Remarks: Rossman (1963: 109) erroneously cites original description as p. 339.

25. *Thamnophis pulchrilatus* (Cope, 1885a). Proc. Amer. Philos. Soc. 22(118): 174. (*Eutaenia pulchrilatus*)

Type: Holotype, USNM 9899, a 465 mm specimen (A.A. Dugès, 1853–1885).

Type locality: "probably Guanajuato" [Mexico].

Distribution: Southern Mexico (Aguascalientes, Distrito Federal, S Durango, Guanajuato, E Hidalgo, S Jalisco, México, E Michoacán, Morelos, Nayarit, SE Nuevo León, N Oaxaca, NE Pueblo, N Querétaro, SW Tamaulipas, Tlaxcala, W-cen. Veracruz, S Zacatecas), 1370–2805 m.

Sources: Webb, 1966, Rossman, 1992 and García-Vázquez, 2008.

26. *Thamnophis radix* (Baird & Girard, 1853). Cat. No. Amer. Rept., Serp. 1: 34. (*Eutainia radix*)

Synonyms: *Eutainia haydenii* Kennicott, 1860, *Tropidonotus glaphyros* Jan, 1863b, *Tropidonotus kennicotti* Jan, 1863b, *Eutaenia radix twiningi* Coues &

T

Yarrow, 1878, and *Eutaenia radix melanotaenia* Cope, 1889b.

Type: Holotype, USNM 719, a 578 mm specimen (P.R. Hoy).

Type locality: "Racine, Wisconsin" [USA].

Distribution: Southwestern Canada (S Alberta, S Manitoba, S Saskatchewan) and USA (Arkansas [MCZ 58891], E Colorado, Illinois, NW Indiana, Iowa, Kansas, Minnesota, N Missouri, Montana, Nebraska, NE New Mexico, North Dakota, N Ohio, ext. W Oklahoma, South Dakota, ext. N Texas, S Wisconsin, ext. E Wyoming), 120–2290 m.

Fossil records: Middle Pliocene (Blancan II) of USA (Nebraska), upper Pliocene (Blancan V) of USA (Nebraska), lower/middle Pleistocene (Irvingtonian I) of USA (Kansas), middle Pleistocene (Irvingtonian II) of USA (Nebraska), and upper Pleistocene (Rancholabrean I, II) of USA (Kansas, Oklahoma).

Sources: A.G. Smith, 1949, Conant, 1950, P.W. Smith, 1961, Bullock & Tanner, 1966, Stebbins, 1985, Ernst & Barbour, 1989, Conant & Collins, 1991, Degenhardt et al., 1996, J. Harding, 1997, Holman, 2000a, Werler & Dixon, 2000, Walley et al., 2003 and Hallmen, 2004a.

Remarks: Type locality not in error as suggested by K.P. Schmidt (1953: 172) *fide* Tekiela (2004a: 57) and Rossman (pers. comm.) so restriction to vicinity of Chicago, Illinois *fide* K.P. Schmidt (1953a: 172) invalid.

27. *Thamnophis rossmani* Conant, 2000. Occ. Pap. Mus. Nat. Sci, Louisiana St. Univ. (76): 2–3.

Type: Holotype, LSUMZ 30390, a 643 mm male (D.A. Rossman, W.G. Eberle, D. Morizot & A. Varkey, 26 May 1969).

Type locality: "open roadside ditch 1.4 km NW of the small settlement of San Cayetano, Nayarit, Mexico" [= 1.4 km NW San Cayetano, S Nayarit, W Mexico, 21°27'N, 104°49'W, elevation 950 m].

Distribution: Western Mexico (S Nayarit), 950 m.

28. *Thamnophis rufipunctatus* (Cope *in* Yarrow, 1875). Rep. Geog. Geol. Expl. Surv. W 100th Mer. 5: 544, pl. 20, figs. 1–1a. (*Chilopoma rufipunctatum*)

Synonyms: *Chilopoma rufopunctatum* Cope, 1875c (*nomen nudum*), and *Atomarchus multimaculatus* Cope, 1883c.

Type: Holotype, USNM 8600 (formerly SIM 1097), a 257 mm specimen (H.W. Henshaw, Oct. 1874).

Type locality: "Southern Arizona," USA.

Distribution: Southwestern USA (cen. Arizona, SW New Mexico), 600–2430 m.

Sources: Ruthven, 1908, Lowe, 1955, F.G. Thompson, 1957, Conant, 1963b, Van Devender & Lowe, 1977, W.W. Tanner, 1985, 1990, P.C. Rosen & Schwalbe, 1988, Rossman, 1995, Degenhardt et al., 1996, H.M. Smith & Chiszar, 2003 and Wood et al., 2011.

Remarks: Collection date of type Sept., 1874 *fide* Cochran (1961: 164).

29. *Thamnophis sauritus* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 385. (*Coluber saurita*)

Synonyms: *Eutaenia sackenii* Kennicott, 1859a, *Prymnomiodon chalceus* Cope, 1861c, *Eutaemia saurita* – A.M. Ross, 1878 (*nomen incorrectum*), *Thamnophis sauritus nitae* Rossman, 1963a, and *Thamnophis sauritus septentrionalis* Rossman, 1963a.

Type: Neotype, FMNH 73119 (formerly CMR 53.136.5), a 590 mm female (J. Quinby, 20 July 1953), designated by K.P. Schmidt & Conant (1956: 191).

Type locality: "15 miles northeast of Charleston, Berkeley County, South Carolina" [USA] via neotype selection.

Distribution: Southeastern Canada (Nova Scotia, SE Ontario) and E USA (Alabama, Conneticut, Delaware, Florida, Georgia, Kentucky, SE Illinois, Indiana, ext. SE Louisiana, S Maine, Maryland, Massachusetts, Michigan, Mississippi, S New Hamshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, W Tennessee, S Vermont, Virginia, Washington D.C., West Virginia, E Wisconsin), NSL–610 m.

Fossil records: Lower Pleistocene (Irvingtonian I) of USA (Florida), and upper Pleistocene (Rancholabrean II) of USA (Georgia, Pennsylvania, Virginia).

Sources: K.P. Schmidt & Conant, 1956–1957, A.H. Wright & Wright, 1957, Rossman, 1963a, 1970b, Christman, 1980, Ernst & Barbour, 1989, Conant & Collins, 1991, Palmer & Braswell, 1995, J. Harding, 1997, Tennant, 1997, Buckner & Franz, 1998a and Holman, 2000a.

Remarks: Official Specific Name No. 677 *fide* Opinion 385 (ICZN, 1956a). Photograph of neotype in K.P. Schmidt & Conant (1956: pl. 2). Introduced in the Bahama Is. (New Providence) *fide* Buckner & Franz (1998a: 55). Holotype lost *fide* K.P. Schmidt & Conant (1956: 191) and Rossman (1963: 145).

30. *Thamnophis scalaris* Cope, 1861a. Proc. Acad. Nat. Sci. Philadelphia (1860) 12: 369.

Type: Neotype, ANSP 11694, a 335 mm male, designated by Rossman & Lara-Gongora (1997: 11).

Type locality: "Jalapa, Veracruz, México" [= Jalapa, Veracruz State, E Mexico, 19°33'N, 96°55'W, elevation 1450 m] via neotype selection.

Distribution: Central Mexico (Distrito Federal, SE Hidalgo, SW Jalisco, México, N-cen. Michoacán, N Morelos, N Puebla, Querétaro, Tlaxcala, W-cen. Veracruz), 1450–4275 m.

Sources: H.M. Smith, 1942h, Rossman & Lara-Gongora, 1997, Rossman, 1992, Casas-Andreu et al., 1996 and Benítez-Gálvez, 1997.

Remarks: Holotype lost *fide* H.M. Smith & Taylor (1945: 167).

31. ***Thamnophis scaliger*** **(Jan, 1865c). Arch. Zool. Anat. Fis. 3(2): 214. (*Tropidonotus* [*Eutainia*] *scaliger*)**

Synonym: *Tropidonotus scaliger* Jan, 1863b (*nomen nudum*).

Type: Neotype, MZFC 2001, a 490 mm female, designated by Rossman & Lara-Gongora (1997: 11).

Type locality: "Pedregal de San Angel, Ciudad Universitaria, Delegación Coyoacán, Distrito Federal, Mexico" via neotype selection.

Distribution: Central Mexico (Aguascalientes, Distrito Federal, cen. Guanajuato, Hidalgo, ext. NE Jalisco, México, N Michoacán), 1800–3400 (3800) m.

Sources: Lara-Gongora, 1991, Rossman & Lara-Gongora, 1997, Quintero-Díaz et al., 1999, Mociño-Deloya et al., 2009 and Ramírez-Bautista et al., 2010.

Remarks: Type locality designated as Mexico City *fide* H.M. Smith & Taylor (1950a: 325).

32. ***Thamnophis sirtalis*** **(Linnaeus, 1758). Syst. Nat., ed. 10, 1: 222. (*Coluber sirtalis*)**

Synonyms: *Coluber ordinatus* Linnaeus, 1766, *Coluber taenia* Schöpf, 1788, *Coluber terordinatus* Lacépède, 1789 (*nomen rejiciendum*), *Coluber borealis* Suckow, 1798, *Coluber quincuncialis* Suckow, 1797, *Coluber terordinatus* Latreille, 1801, *Coluber ibibe* Daudin, 1803d, *Coluber gravitate* Rafinesque-Schmaltz, 1819b, *Coluber trivittata* Rafinesque-Schmaltz, 1819b, *Coluber kentuckensis* Rafinesque-Schmaltz, 1820, *Coluber pennanti* Merrem, 1820, *Coluber similis* Rafinesque-Schmaltz, 1820, *Natrix pennanti* Merrem, 1820, *Coluber parietalis* Say *in* E. James, 1823, *Coluber infernalis* Blainville, 1835, *Tropidonotus bipunctatus* Schlegel, 1837, *Tropidonotus concinnus* Hallowell, 1852b, *Eutaenia dorsalis* Baird & Girard, 1853, *Eutainia pickeringii* Baird & Girard, 1853, *Tropidonotus jauresi* A.-M.-C. Duméril, Bibron & Duméril, 1854, *Eutaenia ornata* Baird, 1859a, *Eutaenia sirtalis obscura* Cope *in* Yarrow, 1875, *Eutaenia sirtalis tetrataenia* Cope *in* Yarrow, 1875, *Coluber lineatus* Mellish, 1876, *Eutaenia imperialis* Coues & Yarrow, 1878 (*nomen nudum*), *Eutaenia sirtalis graminea* Cope, 1889b, *Eutaenia sirtalis melanota* Smith *in* Higley, 1889, *Eutaenia sirtalis trilineata* Cope, 1892a, *Eutaenia sirtalis semifasciata* Cope, 1892a, *Thamnophis sirtalis pallidula* Allen, 1899, *Tropidonotus obalskii* Mocquard, 1903, *Thamnophis sirtalis annectens* B. Brown, 1950, *Thamnophis sirtalis fitchi* W. Fox, 1951, *Thamnophis sirtalis similis* Rossman, 1965a (*nomen praeoccupatum*), and *Thamnophis sirtalis lowei* W.W. Tanner, 1988.

Type: Holotype, not designated, ANSP, a 686 mm specimen, now lost.

Type locality: "Pennsylvania" [USA].

Distribution: North America. Canada (Alberta, British Columbia, S Manitoba, New Brunswick, ext. S Northern Territories, Nova Scotia, S Ontario, Prince Edward Island, S Quebec, S Saskatchewan, Vancouver Is.), USA (Alabama, ext. SE Alaska, Arkansas, California, NE Colorado, Conneticut, Delaware, District of Colombia, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusets, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, NW Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, E Texas, NE Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, E Wyoming) and N Mexico (N Chihuahua), NSL–2540 m.

Fossil records: Middle Pliocene (Blancan II, III) of USA (Nebraska, Texas), upper Pliocene (Blancan V) of USA (Nebraska), lower Pleistocene (Irvingtonian I) of USA (South Dakota), lower/middle Pleistocene (Irvingtonian I) of USA (Kansas), middle Pleistocene (Irvingtonian II) of USA (Nebraska), middle/upper Pleistocene (Irvingtonian II) of USA (Arkansas, Colorado), and upper Pleistocene (Rancholabrean II) of USA (Alabama, California, Florida, Georgia, Missouri, Ohio, Pennsylvania, Tennessee, Texas, Virginia, West Virginia).

Sources: Inger, 1946, K.P. Schmidt & Conant, 1956–1957, Fitch & Maslin, 1961, Fitch, 1965, 1980b, Conant, 1975, Chiras, 1978, Benton, 1980ab, Christman, 1980, Stebbins, 1985, W.W. Tanner, 1988, Ernst & Barbour, 1989, Conant & Collins, 1991, H. Brown et al., 1995, Palmer & Braswell, 1995, Boundy & Rossman, 1995, Gregory & Larsen, 1996, P.R. Brown, 1997, J. Harding, 1997, Lamar, 1997b, Tennant, 1997, Fitch, 1999, Holman, 2000a, Werler & Dixon, 2000, J.C. Murphy & Schlager, 2003, Hallmen, 2004b, 2007, Placyk et al., 2007 and Mooi et al., 2011.

Remarks: Official Specific Name no. 676 *fide* Opinion 385 (ICZN, 1956a). Neotype selection of FMNH 73660 (formerly ROM 7167, a 498 mm male, G.M. Bureau, 1942) by K.P. Schmidt & Conant (1956: 228) rejected *fide* Opinion 771 (ICZN, 1966b). Type locality restriction of vicinity of Quebec *fide* Inger (19846: 254) and Quebec, Canada *fide* K.P. Schmidt (1953: 174) invalid. Photograph of neotype in K.P. Schmidt & Conant (1956: pl. 1). Record from the Bahama Is. (Abaco) possibly introduced *fide* Buckner & Franz (1998b: 55).

33. ***Thamnophis sumichrasti*** **(Cope, 1867a). Proc. Acad. Nat. Sci. Philadelphia (1866) 18: 306. (*Eutaenia sumichrasti*)**

Synonyms: *Eutaenia phenax* Cope, 1868c, and *Thamnophis halophilus* E.H. Taylor, 1940a.

Types: Syntypes (2), USNM 26501–02 (formerly SIM 45) (A.L.J.F. Sumichrast, 1855–1867).

Type locality: "Orizava, Mexico" [= Orizaba, cen. Veracruz, E Mexico, 18°51'N, 97°06'W, elevation 1235 m].

Distribution: Central Mexico (N Hidalgo, Jalisco, E Puebla, N Querétaro, SE San Luis Potosí, cen. Veracruz), 1235–2400 m.
Sources: Conant, 1965, Rossman, 1965c, 1966, 1992 and Casas-Andreu et al., 1996.

34. *Thamnophis unilabialis* W.W. Tanner, 1985. Great Basin Nat. 45(4): 648–649. (*Thamnophis rufipunctatus unilabialis*)

Type: Holotype, BYU 14217, a 508 mm female (W.W. Tanner & W.G. Robison, 11 July 1958).
Type locality: "from .5 mi SW of Bocoyna, Chihuahua, Mexico."
Distribution: Central Mexico (Chihuahua, ext. SW Coahuila, NE Durango, ext. E-cen. Sonora), (700) 1200–2530 m.
Source: Woods et al., 2011.
Remarks: Elevated to specific status *fide* Woods et al., 2011.

35. *Thamnophis validus* (Kennicott, 1860). Proc. Acad. Nat. Sci. Philadelphia 12(8): 334–335. (*Regina valida*)

Synonyms: *Tropidonotus celaeno* Cope, 1860f, *Tropidonotus tephropleura* Cope, 1860f, *Tropidonotus quadriserialis* J.G. Fischer, 1879, *Natrix valida isabelleae* Conant, 1953, and *Natrix valida thamnophisoides* Conant, 1961.
Type: Holotype, USNM 1309, an adult female (D.N. Couch, 1846–1854).
Type locality: "Durango, Mexico," (in error). Corrected to Río Presidio or coastal plain of southern Sonora, Mexico *fide* Conant (1969: 83).
Distribution: Western Mexico (ext. S Baja California Sur, ext. SW Chihuahua, Colima, W Guerrero, W Jalisco, ext. SW Michoacán, Nayarit, ext. SW Sonora, Sinaloa), NSL–1200 m.
Sources: Conant, 1946a, 1953, 1961, 1969, R. Lawson, 1987, McCranie & McAllister, 1988, Queiroz & Lawson, 1994, Grismer, 2002 and Lemos-Espinal et al., 2002a.

THAMNOSOPHIS Jan, 1863b (Pseudoxyrhophiidae)

Synonym: *Bibilava* Glaw, Nagy, Franzen & Vences, 2007.
Type species: *Leptophis lateralis* A.-M.-C. Duméril, Bibron & Duméril, 1854a.
Distribution: Madagascar.
Sources: Glaw et al., 2007, 2009, Cadle & Ineich, 2008 and Zaher et al., 2009.

1. *Thamnosophis epistibes* (Cadle, 1996a). Bull. Mus. Comp. Zool. 154(5): 384–391, fig. 7. (*Liopholidophis epistibes*)

Synonym: *Leptophis lateralis* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(partim)*.
Type: Holotype, MCZ 180322 (formerly JEC 11460), a 753 mm female (J.E. Cadle, 20–26 Dec. 1991).
Type locality: "Talatakely, Ranomafana National Park, 950–1,000 m, Fivondronana Ifanadiana, Fianarantsoa Province, Madagascar [21°16'S, 47°25'E]."
Distribution: Southeastern Madagascar (Fianarantsoa), 950–1000 m.

2. *Thamnosophis infrasignatus* (A.C.L.G. Günther, 1882). Ann. Mag. Nat. Hist. (5) 9(52): 263–264, 1 fig. (*Ptyas infrasignatus*)

Synonyms: *Dromicus baroni* Boulenger, 1888a, and *Liopholidophis thieli* Domergue, 1973.
Type: Lectotype, BMNH 1946.1.7.57 (formerly BMNH 1882.2.25), a 920 mm female (W.D. Cowan, 1874–1881), designated by Cadle (1996a: 424).
Type locality: "Arkafana, eastern Betsileo" via lectotype selection.
Distribution: Eastern Madagascar (Antsiranana, Fianarantsoa, Toamasina, Toliara), 100–1600 m.
Source: Henkel & Schmidt, 2000.
Remarks: Photographs of lectotype in Cadle (1996a: figs. 27–28). Type locality corrected to Ankafana, Betsileo *fide* Boulenger (1893a: 247).

3. *Thamnosophis lateralis* (A.-M.-C. Duméril, Bibron & Duméril, 1854a). Erpét. Gén. 7(1): 544–545. (*Leptophis lateralis*)

Synonym: *Dromicus madagascariensis* A.C.L.G. Günther, 1872b.
Type: Lectotype, MNHN 1999.8232, a 791 mm female, designated by Cadle & Ineich (2008: 287).
Type locality: "Madagascar" via lectotype selection.
Distribution: Madagascar (Antsiranana, Atananarivo, Fianarantsoa, Mahajanga, Toamasina, Toliara), NSL–1565 m.
Remarks: Photographs of lectotype in Cadle & Ineich (2008: fig. 1 upper & lower).

4. *Thamnosophis martae* (Glaw, Franzen & Vences, 2005). Salamandra 41(1–2): 84–89, figs. 1–3. (*Liopholidophis martae*)

Type: Holotype, ZSM 253/2004 (formerly FGZC 492), an 847 mm male (F. Glaw, M. Pruente & R.D. Randrianiaina, 23 Feb. 2004).
Type locality: "Montagne des Français (12°19'34"S, 49°20'09"E, ca. 300 m above sea level), Antsiranana Province, northern Madagascar."

Distribution: Northern Madagascar (Antsiranana, Mahajanga), 170–500 m.

5. *Thamnosophis mavotenda* Glaw, Nagy, G. Köhler, Franzen & Vences, 2009. Organ. Divers. Evol. 9: 15–18, figs. 2–3, 4a–b, 5a, 6.

Type: Holotype, ZSM 127/2006, an 846 mm male (F. Glaw, J.G. Köhler, F. Bora & H. Enting, 26 March 2006).
Type locality: "western Madagascar, Mahajanga Province, Tsingy de Bemaraha National Park, Bendrao forest, 18º47'04"S, 44º51'37"E, 427 m a.s.l."
Distribution: Western Madagascar (Mahajanga), 425 m. Known only from type locality.

6. *Thamnosophis stumpffi* (Boettger, 1881a). Zool. Anz. 4(87): 358. (*Dromicus stumpffi*)

Synonym: *Liophidium gracile* Mocquard, 1908.
Type: Lectotype, SMF 17576 (formerly SMF-B 7242, a), a 502–750 mm female (A. Stumpff, 1881), designated by Mertens (1922: 179).
Type locality: "Nossibé" [=Nosy Be Is., W Antsiranana Prov., ext. NW Madagascar, bet. 13°12'–25'S and 48°10'–22'E, elevation < 225 m] via lectotype selection.
Distribution: Northern Madagascar (Antsiranana, Nosy Be Is.), NSL–360 m.
Source: Boettger, 1881d.

†*THAUMASTOPHIS* Rage, Folie, Rana, Singh, Rose & Smith, 2008 (Caenophidia *incertae sedis*)

Type species: †*Thaumastophis missiaeni* Rage, Folie, Rana, Singh, Rose & Smith, 2008.
Distribution: Eocene of India.
Source: Rage et al., 2008.

1. †*Thaumastophis missiaeni* Rage, Folie, Rana, Singh, Rose & Smith, 2008. Acta Palaeontol. Pol. 53(3): 399–400, figs. 5a (1–8).

Type: Holotype, GU/RSR/VAS 1017, one middle trunk vertebra.
Type locality: "Vastan Lignite Mine, northeast of Surat, Gujarat, western India; Early Eocene (middle to late Ypresian) continental beds of Cambay Formation."
Distribution: Lower Eocene (Ypresian, MP 8–10: 48.6–55.8 mya) of India. Known only from type locality.

T

THELOTORNIS A. Smith, 1849 *in* 1838–1849 (Colubridae)

Synonyms: *Cladophis* A.H.A. Duméril, 1859, *Theletornis* – Phisalix, 1922 (*nomen incorrectum*), *Thelotormis* – Briceño-Rossi, 1934 (*nomen incorrectum*), *Thelotomis* – Hedges, 1983 (*nomen incorrectum*), and *Theltornis* – Carpenter, 1986 (*nomen incorrectum*).
Type species: *Thelotornis capensis* A. Smith, 1849 *in* 1838–1849.
Distribution: Central S and E Africa.
Sources: Loveridge, 1957a, V.F.M. FitzSimons, 1962a, Witte, 1962, Pitman, 1974, Broadley, 1979, 2001 and Broadley & Wallach, 2002.

1. *Thelotornis capensis* A. Smith, 1849 *in* 1838–1849. Illust. Zool. So. Africa, Rept. (App.): 19–20.

Synonym: *Dryiophis oatesii* A.C.L.G. Günther, 1881c.
Type: Holotype, not designated, a 940 mm female, lost *fide* Broadley (2001: 60).
Type locality: "Kaffirland and the country towards Port Natal" [= KwaZulu-Natal, South Africa *fide* Loveridge, 1944b: 161]. Restricted to vicinity of Durban, KwaZulu-Natal Prov., South Africa *fide* David & Ineich (1999: 100).
Distribution: Southern Africa. Southern Angola (Lunda Norte, Lunda Sul), SE Democratic Republic of the Congo (Katanga), Malawi (Central, Northern, Southern), Mozambique (Gaza, Inhambane, Manica, Maputo, Tete, Zambézia), Zambia (Central, Copperbelt, Eastern, Luapula, Lusaka, Northern, North-Western, Southern, Western), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), Namibia (Caprivi, Kunene, Okavango, Omaheke, Oshikoto, Otjozondjupa), E Botswana (Central, Gaborone, Kweneng, North East, North West, South East), Swaziland and NE South Africa (Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga), NSL–1830 m.
Sources: Sweeney, 1961, Laurent, 1954a, 1964a, Mertens, 1955, 1971, Branch, 1982, 1988, Broadley, 1983, Buys & Buys, 1983, Pienaar et al., 1983, Clauss & Clauss, 2002, Spawls et al., 2002, Broadley et al., 2003, M. Griffin, 2003, Marais, 2004, Alexander & Marais, 2007 and Broadley & Blaylock, 2013.
Remarks: Holotype not in RSM or BMNH *fide* V. FitzSmons (1937: 274).

2. *Thelotornis kirtlandii* (Hallowell, 1844a). Proc. Acad. Nat. Sci. Philadelphia (1844–1845) 2: 62. (*Leptophis kirtlandii*)

Synonyms: *Tragops rufulus* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Dryophis kirtlandi* Hallowell, 1854c, *Oxybelis lecomtei* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Tragops rufulus* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Dryiophis pelii* Lichtenstein, 1856, *Oxybelis violacea* J.G. Fischer, 1856b, and *Thelotomis kirtlandi* – Khole, 1991 (*nomen incorrectum*).

Type: Holotype, ANSP 5271, a 657 mm specimen (E. Blanding via W. Blanding).

Type locality: "Liberia, W. Africa."

Distribution: West and cen. Africa. Guinea-Bissau (Bubaque Is.), Guinea (Macenta, Nzérékoré, Télimélé), Sierra Leone (Eastern, Southern, Western), Liberia (Bong, Grand Bassa, Montserrado, Margibi), S Ivory Coast (Abidjan, Dalao, Guiglo, Lagunes, San Pédro, Tabou, Toumodi), S Ghana (Ashanti, Eastern), Togo (Plateaux), S Benin (Atakora, Atlantique, Plateau), S Nigeria (Akwa Ibom, Bayelsa, Cross River, Lagos, Ondo, Rivers), S Cameroon (Est, Centre, Littoral, Nord-Ouest, Sud, Sud-Est), Equatorial Guinea (Bioko Is.), Gabon (Estuaire, Haut-Ogooué, Ngounié, Ogooué-Lolo, Ogooué-Maritime, Woleu-Ntem, Elobey Is.), Congo (Brazzaville, Cuvette, Kouilou, Lekoumou, Likouala, Pool, Sangha), SW Central African Republic (Haute-Sangha, Kemo-Gribingui, Lobaye, Mbomou, Ombella-Mpoko, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Katanga, Kinshasa, Maniema, Nord-Kivu, Orientale, Sud-Kivu), N Angola (Cuanza Norte, Cuanza Sul, Lunda Norte, Bena-Mai Is.) SE South Sudan (Eastern Equatoria), SW Uganda (Central, Western, Sese Is.), W Rwanda, NW Burundi, S Tanzania (Iringa, Kigoma) and W Zambia (North-Western), NSL–2200 m.

Sources: Villiers, 1951, Mertens, 1955, 1964a, E.H. Taylor & Weyer, 1958, Doucet, 1963, Laurent, 1964a, Menzies, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, J Roux-Estève, 1969, Leston, 1970, V.F.M. FitzSimons, 1974, Pitman, 1974, J.A. Remarks: Edmund Blanding, William Blanding's brother, was a missionary in Liberia.

3. *Thelotornis mossambicanus* (Bocage, 1895). Herp. Angola Congo:119–120. (*Dryiophis kirtlandii mossambicana*)

Synonym: *Thelotornis capensis schilsi* Derleyn, 1978.

Type: Lectotype, MBL 1843 (A. Ennes), designated by Broadley (1979: 129), destroyed by fire 18 March 1978.

Type locality: "Manica, Mozambique" [= Mozambique], via lectotype selection.

Distribution: Eastern Africa. Southern Somalia (Jubbada Dhexe, Jubbada Hoose, Mogadishu, Alessandra Is.), SE Kenya (Coast), SE Tanzania (Arusha, Dodoma, Iringa, Kigoma, Lindi, Manyara, Mbeya, Morogoro, Mtwara, Piwani, Rukwa, Ruvuma, Tanga), SE Burundi, Morogoro, Mtwara, Mwanza, Pwani, Rukwa, Tanga, Mafia Is.), cen. Mozambique (Inhambane, Manica, Niassa, Sofala, Zambézia, Bazaruto and Benguela Is.), Malawi (Central, Northern, Southern), NE Zambia (Northern) and E Zimbabwe (Manicaland), NSL–1500 m.

Sources: Barros e Cunha, 1935, Derleyn, 1978, Broadley, 1990b, Broadley et al., 2003 and Broadley & Blaylock, 2013.

4. *Thelotornis usambaricus* Broadley, 2001. Afr. J. Herp. 50(2): 58–59, fig. 1.

Type: Holotype, NMZB 16182 (formerly KMH 16325), a 1060 mm male (Frontier-Tanzania team, 18 Feb. 1999).

Type locality: "Amani Nature Reserve (Kwan Koro/ Kwemsambia Forest Reserve), East Usambara Mountains (05° 07' S; 38° 39' E)" [= Tanga Prov., Tanzania].

Distribution: Northeastern Tanzania (Usambara Mtns. of Tanga) and SE Kenya (S Coast), 135–1715 m.

THERMOPHIS Malnate, 1953 (Xenodontidae)

Synonym: *Fhermophis* – E.-M. Zhao, 1980 (*nomen incorrectum*).

Type species: *Tropidonotus baileyi* Wall, 1907b.

Distribution: Central Asia.

Sources: Zaher et al., 2009 and X. Sun et al., 2011.

1. *Thermophis baileyi* (Wall, 1907b). J. Bombay Nat. Hist. Soc. (1906–1907) 17(3): 617–618, pl., 6 figs. (*Tropidonotus baileyi*)

Type: Lectotype, BNHS 1602 A (formerly BNHS 90 or BNHS 91), an 840 mm male (F.M. Bailey, 15 May 1906), designated by Malnate (1953: 94).

Type locality: "Tibet, at about 14,000 feet elevation" [= Xizang Prov., SW China, elevation 4265 m] via lectotype selection.

Distribution: Southwestern China (Xizang), 3660–4400 m.

Sources: Malnate, 1953, HU et al., 1980, Zhao & Adler, 1993, Zhao et al., 1998, Sung et al., 2002, Zhao, 2006, P. Guo et al., 2009, Huang et al., 2009, and Li et al., 2010.

2. *Thermophis zhaoermii* P. Guo, Liu, Feng & He, 2008. Sichuan J. Zool. 27(3): 321, 1 pl.

Type: Holotype, SCUM 44804, an adult female (native, Aug. 2004).

Type locality: "Litang County, Sichuan, China. Elevation 3700 m."

Distribution: China (W Sichuan), 3700 m. Known only from type locality.

Source: P. Guo et al., 2009a.

THRASOPS Hallowell, 1857b (Colubridae)

Synonyms: *Tharsops* – J.A. Butler & Reid *in* Rocek, 1986 (*nomen incorrectum*), and *Trasops* – J.D. Williams & Francini, 1991 (*nomen incorrectum*).
Type species: *Dendrophis flavigularis* Hallowell, 1852b.
Distribution: West and cen. Africa.
Sources: Loveridge, 1944b, 1957a, Pitman, 1974, Hughes, 1983 and Broadley & Wallach, 2002.

1. *Thrasops flavigularis* (Hallowell, 1852b). Proc. Acad. Nat. Sci. Philadelphia (1852–1853) 6(5): 205. (*Dendrophis flavigularis*)

Synonyms: *Hapsidophrys niger* A.C.L.G. Günther, 1872b, *Thrasops pustulatus* Buchholz & Peters *in* W.C.H. Peters, 1875, and *Thrasops flavigularis stirnensis* Stucki-Stirn, 1979.
Type: Holotype, ANSP 5243, a 1925 mm specimen (H.A. Ford), lost *fide* Malnate (1971: 366).
Type locality: "Liberia, Western Africa," (in error). Corrected to Gabon *fide* Loveridge (1944b: 132).
Distribution: Central Africa. Extreme SE Nigeria (Cross River), S Cameroon (Adamaoua, Est, Centre, Littoral, Nord-Ouest, Ouest, Sud, Sud-Ouest), Equatorial Guinea (Bioko Is.), SW Central African Republic (Sangha), Gabon (Estuaire, Haut-Ogoouée, Ogouué-Ivindo, Ogooué-Maritime), S Congo (Bouenza, Brazzaville, Kouilou, Lekoumou, Niari, Pool), Democratic Republic of the Congo (Bandundu, Bas-Congo, Kasai Occidental, Kasai Oriental, Kinshasa, Orientale) and N Angola, NSL–2000 m.
Sources: Witte, 1962, Mertens, 1965c, J.A. Butler & Reid, 1986, Lawson, 1993, J.-F. Trape & Roux-Estève, 1995, Villiers & Condamin, 2005, Chippaux, 2006, Chirio & Ineich, 2006, Chirio & LeBreton, 2007 and Pauwels & Vande weghe, 2008.

2. *Thrasops jacksonii* A.C.L.G. Günther, 1895a. Ann. Mag. Nat. Hist. (6) 15(90): 528–529.

Synonyms: *Thrasops rothschildi* Mocquard, 1905b, and *Thrasops mossambicus* Uthmoller, 1941a (*nomen nudum*).
Type: Holotype, BMNH 1946.1.4.8, a 1651 mm skin (F.J. Jackson).
Type locality: "Kavirondo" [= S Western and Nyanza Prov., SW Kenya].
Distribution: Central Africa. Southern Cameroon (Centre, Est, Ouest), Central African Republic (Haut-Mbomou, Lobaye, Mbomou, Nana-Mambere, Ombella-Mpoko, Ouaka, Ouham, Sangha), S Congo (Brazzaville, Lekoumou, Pool), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Oriental, Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), S Uganda (Central, Eastern, Western), W Rwanda, S Kenya (Eastern, Nairobi, S Rift Valley, Western), NW Tanzania (Mwanza, Kagera, Rubondo Is.) and N Zambia (North-Western), 200–2400 m.
Sources: Witte, 1953, 1962, J.-F. Trape & Roux-Estève, 1995, Spawls et al., 2002, Broadley et al., 2003, Chippaux, 2006, Chirio & Ineich, 2006 and Chirio & LeBreton, 2007.

3. *Thrasops occidentalis* H.W. Parker, 1940. Ann. Mag. Nat. Hist. (11) 5(27): 273, figs. 1, 2a.

Type: Holotype, BMNH 1946.1.5.66 (formerly BMNH 1911.6.30.2), a 1488 mm female (W.P. Lowe).
Type locality: "Axim, Gold Coast" [= Axim, S Western Prov., SW Ghana, 4°52'N, 2°13'W, elevation 25 m].
Distribution: West Africa. Southwestern Senegal (Ziguinchor), Guinea-Bissau (Bubaque Is.), Guinea (Dalaba, Labé, Macenta, Mali, Nzérékoré, Télimélé), Sierra Leone (Northern, Southern), Liberia (Montserrado), Ivory Coast (Abidjan, Adiopodoumé, Daloa, Ferkéssédougou, Guiglo, Lagunes, Tabou), S Ghana (Ashanti, Central, Eastern, Western), S Togo (Plateau), SW Nigeria (Oyo) and W Cameroon (Northwest), 25–1135 m.
Sources: Villiers, 1950, 1951, 1963, Doucet, 1963, Menzies, 1966, Leston & Hughes, 1968, Hughes & Barry, 1969, Leston, 1970, Roux-Estève, 1969, Hulselmans et al., 1970, Stucki-Stirn, 1979, Hughes, 1983, Chippaux, 2006, J.-F. Trape & Mané, 2006b, W. Böhme et al., 2011, Segniagbeto et al., 2011, Auliya et al., 2012 and Chirio, 2013.
Remarks: Total length erroneously listed as 1085 mm *fide* Loveridge (1944b: 132). Possibly occurs in Benin *fide* Hughes (2013: 152).

4. *Thrasops schmidti* Loveridge, 1936a. Proc. Biol. Soc. Washington 49: 63–64. (*Thrasops jacksonii schmidti*)

Type: Holotype, MCZ 9276, a 1065 mm male (G.M. Allen, 21–26 Aug. 1909).
Type locality: "Meru Forest, northeast of Mount Kenya, Kenya Colony."
Distribution: Central Kenya (Eastern, Nairobi), 1600–2000 m.
Sources: Loveridge, 1957, Spawls, 1978 and Broadley & Wallach, 2002.

†*TITANOBOA* Head, Bloch, Hastings, Bourque, Cadena, Herrera, Polly & Jaramillo, 2009 (Boidae)

Type species: †*Titanoboa cerrejonensis* Head, Bloch, Hastings, Bourque, Cadena, Herrera, Polly & Jaramillo, 2009.
Distribution: Upper Paleocene of Colombia.
Source: Head et al., 2009.

1. †*Titanoboa cerrejonensis* Head, Bloch, Hastings, Bourque, Cadena, Herrera, Polly & Jaramillo, 2009. Nature 457(7230): 715–716, figs. 1a–d.

Type: Holotype, INIGM (formerly UF/IGM 1), one trunk vertebra (A. Rincon, M. Carvalho, J.I. Bloch, A.K. Hastings, E.A. Cadena, F.A. Herrera & Jaramillo, 2003–2008).

Type locality: "La Puente Pit, Cerrejón Coal Mine, Guajira Peninsula, northeastern Colombia (palaeolatitude 5.5ºN); middle segment of the Cerrejón Formation, middle-late Paleocene epoch (58-60 Myr ago), palynological zone Cu-02."

Distribution: Upper Paleocene (58.0–60.0 mya) of Colombia. Known only from type locality.

TOMODON A.-M.-C. Duméril, 1853 (Xenodontidae)

Synonyms: *Machirodon* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Opisthoplus* W.C.H. Peters, 1883, *Aproterodon* Vanzolini, 1947, and *Tomadon* – Auffenberg, 1958 (*nomen incorrectum*).

Type species: *Tomodon dorsatum* A.-M.-C. Duméril, Bibron & Duméril, 1854b.

Distribution: Southern South America.

Sources: Hoge, 1959a, Bailey, 1967, J.A. Peters & Orejas-Miranda, 1970, Giraudo & Scrocchi, 2002, Harvey & Muñoz, 2004 and Zaher et al., 2009.

1. *Tomodon dorsatum* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 934–936.

Synonyms: *Tomodon dorsatum* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Opisthoplus degener* W.C.H. Peters, 1883, and *Aproterodon clementei* Vanzolini, 1947.

Type: Holotype, MNHN 3737 (formerly MHNMF), a 620 mm specimen.

Type locality: "Américaine," probably "Brésil" [= America, probably Brazil]. Amérique Meridionale [= South America] *fide* MNHN catalogue.

Distribution: Southern South America. Central and SE Brazil (Espírito Santo, Paraná, Rio Grande do Sul, Santa Catarina, São Paulo, Cananéia, Cardoso, Porchat and São Vicente Is.), Uruguay (Cerro Largo, Rocha), Paraguay (Itapúa) and N Argentina (Misiones), NSL–250 m.

Sources: Zanini-Cechin, 1989, Giraudo, 1997, Starace, 1998, Harvey & Muñoz, 2004, Carreira-Vidal & Lumbardo, 2006, Cicchi et al., 2007, and Carreira-Vidal et al., 2012b.

2. *Tomodon ocellatus* A.-M.-C. Duméril, Bibron & Duméril, 1854b. Erpét. Gén. 7(2): 938–940. (*Tomodon ocellatum*)

Synonym: *Tomodon dorsatum* A.-M.-C. Duméril, 1853 (*nomen nudum*).

Type: Holotype, ? RMNH, a 425 mm specimen.

Type locality: "Brésil" [= Brazil].

Distribution: Southern South America. Southern Brazil, Paraguay (Itapúa), Uruguay (Artigas, Canelones, Cerro Largo, Colonia, Durazino, Flores, Lavalleja, Montevideo, Paysandú, Rio Negro, Salto, San José, Soriano, Treinta y Tres) and Argentina (Buenos Aires, Córdoba, Corrientes, Entre Ríos, La Pampa, Santa Fe), NSL–190 m.

Sources: Gallardo, 1972, Aquino et al., 1996, Tiranti & Avila, 1997 and Carreira-Vidal et al., 2005.

Remarks: Holotype not in MNHN. Misiones, Argentina record in error *fide* Giraudo & Scrocchi (2002: 40).

3. *Tomodon orestes* Harvey & Muñoz, 2004. Herpetologica 60(3): 365–369, figs 1–2.

Type: Holotype, CBF 2316 (formerly AM-S 400), a 515 mm male (J. Muñoz S., Jan. 2000).

Type locality: "close to the Río Erquis, Reserva de Sama, Méndez province, Tarija, Bolivia, 2754 m (21° 28' 56" S, 64° 50' 32" W)."

Distribution: Southern Bolivia (Chuquisaca, Cochabamba, Tarija) and Argentina (Salto), 1705–3300 m.

Source: Akmentins & Vaira, 2010.

†*TOTLANDOPHIS* Holman & Harrison, 1998b (Boidae)

Type species: †*Totlandophis thomasae* Holman & Harrison, 1998b.

Distribution: Upper Eocene of United Kingdom, and lower Oligocene of USA.

Sources: Holman & Harrison, 1998b, 2001.

1. †*Totlandophis americanus* Holman & Harrison, 2001. Acta Zool. Cracov. 44(1): 26–29, figs. 1–3.

Type: Holotype, UF 190844, one trunk vertebra (UF field crews, 1966–1967).

Type locality: "I-75 Local Fauna (Florida Natural History Museum Locality AL018), 1.5 km WSW Gainesville, Alachua County, Florida; Early Oligocene (Whitneyan)" [USA].

Distribution: Lower Oligocene (Whitneyan: 30.8–33.3 mya) of USA (Florida).

2. †*Totlandophis thomasae* Holman & Harrison, 1998b. Acta Zool. Cracov. 41(1): 30–33, figs. 1–2.

Type: Holotype, MSUVP 1458, one trunk vertebra (D.L. Harrison, 1994).

Type locality: "Hordle Cliff, Hampshire, England. Rodent Bed in upper part of Totland Bay member, MP17, of the Headon Hill Formation (Upper Eocene)."

Distribution: Upper Eocene (Priabonian, MP 17: 33.9–37.2 mya) of United Kingdom (England).

TOXICOCALAMUS Boulenger, 1896e (Elapidae)

Synonyms: *Apistocalamus* Boulenger, 1898, *Pseudapistocalamus* Lönnberg, 1900, *Vanapina* De Vis, 1905, *Apisthocalamus* Boulenger, 1896a (*nomen emendatum*), *Pseudapisthocalamus* Boulenger, 1896a (*nomen emendatum*), *Ultrocalamus* Sternfeld, 1913b, *Opistocalamus* – Boquet, 1948 (*nomen incorrectum*), *Pseudopistocalamus* – Boquet, 1948 (*nomen incorrectum*), *Tocicocalamus* – McDowell, 1967 (*nomen incorrectum*), *Utocalamus* – J.H. Brown, 1973 (*nomen incorrectum*), and *Ultocalamus* – W.W. Tanner & Avery, 1982 (*nomen incorrectum*).

Type species: *Toxicocalamus longissimus* Boulenger, 1896e.

Distribution: New Guinea and adjacent islands.

Sources: Loveridge, 1946, McDowell, 1967, 1969a, O'Shea, 1996, Keogh, 1998, David & Ineich, 1999, Scanlon & Lee, 2004, Sanders et al., 2008, Zaher et al., 2009 and Hoser, 2012e.

1. *Toxicocalamus buergersi* (Sternfeld, 1913b). Sitz. Ges. Naturf. Freunde Berlin 1913(8): 388–389. (*Ultrocalamus bürgersi*)

Synonym: *Ultrocalamus latisquamatus* Schüz, 1929.

Type: Holotype, ZMB 25232, a 365 mm specimen (Bürgers).

Type locality: "Deutsch-Neuguinea" [= German New Guinea, now Papua New Guinea].

Distribution: Papua New Guinea (East Sepik, West Sepik), NSL–300 m.

T

2. *Toxicocalamus grandis* (Boulenger, 1914d). Trans. Zool. Soc. London 20(5): 265, pl. 30, figs. 3–3a. (*Apistocalamus grandis*)

Type: Holotype, BMNH 1946.1.18.34, a 940–960 mm female (A.F.R. Wollaston [2nd Wollaston Exped.], 1912).

Type locality: "Launch Camp, Setekwa R., Dutch New Guinea" [= Launch Camp, Setekwa River, Papua Prov., E Indonesia].

Distribution: Eastern Indonesia (S Papua). Known only from holotype.

3. *Toxicocalamus holopelturus* McDowell, 1969a. J. Zool. London 159: 467–469, figs. 1b, 3b, pl. 2.

Type: Holotype, AMNH 76660, a 620 mm male (R.F. Peterson & L.J. Brass).

Type locality: "Mount Rossel at 700 m, Rossel Island, Milne Bay Division, Territory of Papua" [= Rossel Is., E Milne Bay Prov., SE Papua New Guinea, bet. 11°18'–26'S and 153°58'E–154°17'E].

Distribution: Southeastern Papua New Guinea (Milne Bay: Rossel Is.), 700 m. Known only from holotype.

4. *Toxicocalamus longissimus* Boulenger, 1896e. Ann. Mag. Nat. Hist. (6) 18(104): 152.

Synonym: *Vanapina lineata* De Vis, 1905.

Type: Lectotype, BMNH 1946.1.18.93 (formerly BMNH 1896.7.8.18), a 650 mm female (A.S. Meek), designated by McDowell (1969a: 473).

Type locality: "Woodlark Island, Territory of Papua New Guinea" via lectotype selection.

Distribution: Southeastern Papua New Guinea (Milne Bay: Fergusson and Woodlark Is.).

Sources: Boulenger, 1903c and Ingram, 1989.

5. *Toxicocalamus loriae* (Boulenger, 1898i). Ann. Mus. Civ. Stor. Nat. Genova (2) 18(38): 705–706, pl. 8, fig. 1. (*Apistocalamus loriae*)

Synonyms: *Pseudapistocalamus nymani* Lönnberg, 1900, *Apistocalamus pratti* Boulenger, 1904b, *Apisthocalamus loennbergii* Boulenger, 1908c, and *Apisthocalamus lamingtoni* Kinghorn, 1928b.

Type: Holotype, MSNG 29141, a 580 mm male (L. Loria, 1889–1892).

Type locality: "Haveri, British New Guinea" [= Papua New Guinea].

Distribution: New Guinea. Eastern Indonesia (Papua) and Papua New Guinea (Central, Eastern Highlands, Madang, Milne Bay, Morobe, Oro, Simbu, Southern Highlands, Western, Western Highlands, West Sepik, Fergusson, Karkar and Normanby Is.), NSL–1490 m.

Sources: McDowell, 1984 and Kraus & Allison, 2004.

6. *Toxicocalamus misimae* McDowell, 1969a. J. Zool. London 159: 470–473, figs. 3c, 7.

Type: Holotype, AMNH 76684, a 468 mm male (R.F. Peterson & L.J. Brass [5th Archbold New Guinea Exped.], 14 July–13 Aug. 1956).

Type locality: "Misima Island, Milne Bay Division, Territory of Papua, New Guinea" [= Papua New Guinea].

Distribution: Papua New Guinea (Central, Milne Bay: Misima Is.).

7. *Toxicocalamus preussi* (Sternfeld, 1913b). Sitz. Ges. Naturf. Freunde Berlin 1913(8): 388, figs. 1–2. (*Ultrocalamus preussi*)

Synonym: *Ultrocalamus preussi angusticinctus* Bogert & Matalas, 1945.
Type: Holotype, ZMB 23948, a 600 mm specimen (P. Preuss, 1903).
Type locality: "Insel Seleo (bei Berlinhafen)" [= Seleo Is., West Sepik Prov., NW Papua New Guinea, 3°09'S, 142°30'E, elevation NSL–15 m].
Distribution: New Guinea. Eastern Indonesia (N Papua) and Papua New Guinea (East Sepik, Gulf, Southern Highlands, Western, West Sepik, Seleo Is.), NSL–850 m.
Source: Bogert & Matalas, 1945.

8. *Toxicocalamus spilolepidotus* McDowell, 1969a. J. Zool. London 159: 464–465, pl. 1.

Type: Holotype, AMNH 85745, a 770 mm female (L.J. Brass & H.M. van Deusen [6th Archbold New Guinea Exped.], 25 Sept. 1959).
Type locality: "Purosa (near Okapa), Eastern Highlands Division, Territory of New Guinea" [= Purosa camp, 27 km by road SSW Okapa Patrol Post, Eastern Highlands Prov., E Papua New Guinea, 6°33'S, 145°37'E, elevation 1950 m].
Distribution: Central Papua New Guinea (Eastern Highlands), 1500–1950 m.

9. *Toxicocalamus stanleyanus* Boulenger, 1903c. Proc. Zool. Soc. London 1903: 128–129, pl. 13, fig. 3.

Type: Holotype, BMNH 1946.1.7.55 (formerly BMNH 1903.3.10.18), a 610 mm female (A.E. Pratt, 1902–1903).
Type locality: "Dinawa, Owen Stanley Distribution, 4000 feet, British New Guinea" [= Papua New Guinea].
Distribution: New Guinea. Eastern Indonesia (ext. West Papua) and Papua New Guinea (Central, Gulf, Madang, Southern Highlands, Western, West Sepik), 100–1300 m.
Sources: De Rooij, 1917, Bogert & Matalas, 1945, Loveridge, 1948, McDowell, 1967 and Kraus, 2010.

TOXICODRYAS Hallowell, 1857b (Colubridae)

Synonyms: *Toxicordryas* – Welch, 1982 (*nomen incorrectum*) and *Toxidryas* – Broadley, 1983 (*nomen incorrectum*).
Type species: *Dipsas blandingii* Hallowell, 1844c.
Distribution: West and cen. Africa.
Sources: Witte, 1962, Laurent, 1964a, Leston & Hughes, 1968, Hughes & Barry, 1969, Hughes, 1983, 2013, J.B. Rasmussen, 1997, Chippaux, 2006, Chirio & LeBreton, 2007, Pauwels & Vande weghe, 2008, W. Böhme et al., 2011 and Segniagbeto et al., 2011.
Remarks: A valid genus *fide* Wallach (unpubl. data).

1. *Toxicodryas blandingii* (Hallowell, 1844c). Proc. Acad. Nat. Sci. Philadelphia 2: 170–171. (*Dipsas blandingii*)

Synonyms: *Triglyphodon fuscum* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Dipsas fasciata* J.G. Fischer, 1856, *Dipsas globiceps* J.G. Fischer, 1856 *Dipsas valida* J.G. Fischer, 1856, *Dipsas fischeri* Jan *in* A.H.A. Duméril, 1859, *Triglyphodon fuscum obscurum* A.H.A. Duméril, 1861, *Dipsas regalis* Jan, 1871 *in* Jan & Sordelli, 1871–1881, *Dipsas globiceps tumboensis* F. Müller, 1885, *Boiga blandingii occidentalis* Stucki-Stirn, 1979, and *Boiga blandingi subfulva* Stucki-Stirn, 1979.
Type: Holotype, not designated (formerly ? ANSP), a 1670 mm specimen (E. Blanding via W. Blanding), lost *fide* Hughes & Barry (1969: 1021).
Type locality: "Liberia, West Africa."
Distribution: West and cen. Africa. Southwestern Senegal (Ziguinchor), Guinea (Nzérékoré), Guinea Bissau (Biombo, Bissau, Bubaque and Soga Is.), Guinea (Kouroussa, Macenta, Nzérékoré, Télimélé), Sierra Leone (Eastern, Northern, Southern, Western, Sherbo Is.), Liberia (Bong, Gbarpolu, Loffa, Montserrado, Margibi, Nimba), Ivory Coast (Abidjan, Agnebi, Bouaflé, Bouaké, Bouna, Daloa, Guiglo, Lagunes, Tabou, Toumodi), Ghana (Brong-Ahafo, Eastern), Togo (Kara, Maritime, Plateaux), S Benin (Atlantique, Plateau, Zou), Nigeria (Akwa Ibom, Bayelsa, Cross River, Delta, Kaduna, Kwara, Niger, Rivers), S Cameroon (Est, Centre, Littoral, Nord-Ouest, Ouest, Sud, Sud-Ouest), Equatorial Guinea (Bioko Is.), Central African Republic (Bamingui-Bangoran, Haut-Mbomou, Haute-Sangha, Lobaye, Ombella-Mpoko, Ouaka, Sangha), Gabon (Estuaire, Haut-Ogooué, Moyen-Ogooué, Ngounié, Ogooué-Ivindo, Ogooué-Lolo, Ogooué-Maritime, Woleu-Ntem), Congo (Brazzaville, Kouilou, Pool, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Maniema, Nord-Kivu, Orientale, Sud-Kivu), NE Angola (Lunda Norte), S South Sudan (SW Eastern Equatoria), S Uganda (Central, Western), W Kenya (Western), W Tanzania (Kigoma, Kagera, Rubondo Is.) and N Zambia (Northern), NSL–2200 m.
Sources: Villiers, 1951, Doucet, 1963, Mertens, 1965c, Menzies, 1966, J.A. Butler & Reid, 1986, Luiselli et al., 1998b, Spawls et al., 2002, Broadley et al., 2003, Greenbaum & Carr, 2005, Chippaux, 2006, J.-F. Trape & Mané, 2006b, W. Böhme et al., 2011, Auliya et al., 2012 and Chirio, 2013.
Remarks: Edmund Blanding, William Blanding's brother, was a missionary in Liberia.

2. *Toxicodryas pulverulentus* (J.G. Fischer, 1856b). Abh. Ges. Naturw. Ver. Hamburg 3: 81–83, pl. 3, figs. 1a–c. (*Dipsas pulverulenta*)

Synonym: *Dipsadomorphus boueti* Chabanaud, 1917a.

Type: Lectotype, ZMH 4376 (formerly ZMH 339), a 790 mm specimen (Davis), designated herein.
Type locality: “Edina, Grand Bassa County in Liberia (West-Afrika)” [= Edina, Grand Bassa Co., Liberia, 5°55’N, 10°05’W, elevation 10 m] (in error *fide* Ladiges *in* Hughes & Barry, 1969: 1020). Corrected to São Tomé Is., São Tomé and Príncipe, Gulf of Guinea *fide* Ladiges *in* Hughes & Barry (1969: 1020).
Distribution: West and cen. Africa. Southeastern Guinea (Guéckédou, Macenta, Nzérékoré), Sierra Leone (Northern, Southern, Liberia, S Ivory Coast (Abidjan, Daloa, Guiglo, Lagunes, Tabou), Ghana (Eastern, Volta), Togo (Centrale, Plateaux), S Benin (Cotonou, Plateau), S Nigeria (Cross River, Delta), S Cameroon (Est, Centre, Littoral, Nord-Ouest, Sud, Sud-Ouest), Gabon (Moyen-Ogooué, Ogooué-Ivindo, Ogooué-Maritime), Equatorial Guinea, São Tomé and Príncipe, Central African Republic (Bamingui-Bangoran, Haute-Sangha, Lobaye, Ombella-Mpoko), Congo (Brazzaville, Cuvette, Kouilou, Lekoumou, Sangha), Democratic Republic of the Congo (Bandundu, Bas-Congo, Equateur, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa, Nord-Kivu, Orientale, Sud-Kivu), S Uganda (Central, Western), SW Kenya (Western) and N Angola, NSL–1050 m.
Sources: Doucet, 1963, Menzies, 1966, J.A. Butler & Reid, 1986, Spawls et al., 2002 and Chippaux, 2006.
Remarks: Second syntype lost *fide* Hallermann (1998: 202).

TRACHISCHIUM A.C.L.G. Günther, 1858 (Colubroidea *incertae sedis*)

Synonyms: *Trachyschium* Marschall, 1873 (*nomen emendatum*), *Trachyischium* Berg, 1901 (*nomen emendatum*), *Eminophis* F. Werner, 1924a, and *Erninophis* – A.S. Romer, 1956 (*nomen incorrectum*).
Type species: *Calamaria fusca* Blyth, 1854a.
Distribution: Southern Asia.
Sources: Boulenger, 1890a, 1893a, M.A. Smith, 1943, Kramer, 1977, R.C. Sharma, 2003, Shah & Tiwari, 2004 and Zaher et al., 2009.

T

1. *Trachischium fuscum* (Blyth, 1854a). J. Asiat. Soc. Bengal 23(3): 288. (*Calamaria fusca*)

Synonyms: *Calamaria fusca* Blyth, 1854a, *Calamaria obscuro-striata* Blyth, 1854a (*nomen incorrigendum*), *Trachischium rugosum* A.C.L.G. Günther, 1858, *Calamaria obscurostriata* – A.C.L.G. Günther, 1864a (*nomen corrigendum*), *Ablabes gilgiticus* Annandale, 1905b, and *Eminophis lineolata* F. Werner, 1924a.
Type: Lectotype, ZSI 7044, a 305 mm specimen (W.S. Sherwill, 1843–1854), designated by Talukdar et al. (1980: 94).
Type locality: “Darjeeling (Darjeeling District, West Bengal, India)” [= 27°02’N, 88°16’E, elevation 1600–2250 m] via lectotype selection.
Distribution: Southern Asia. Northeastern Pakistan (Gilgit-Balistan), India (Arunachal Pradesh, Kashmir, Sikkim, Uttar Pradesh, West Bengal), Nepal (Bhojpur, Dolakha, Ilam, Kaski, Kathmandu, Panchthar, Sankhuwasabha, Taplejung, Tehrathum) and Bhutan border (Teesta; MCZ 7514), 920–2590 m.
Sources: J. Anderson, 1871a, M.A. Smith, 1928b, Talukdar et al., 1980, Nanhoe & Ouboter, 1987, Schleich & Kästle, 2002, Tiwari & Shah, 2004, Ahmed et al., 2009 and Agarwal et al., 2010.
Remarks: Photographs of lectotype in Talukdar et al. (1980: pl. 2, figs. a–c). Myanmar record probably in error *fide* Dowling & Jenner (1988: 11).

2. *Trachischium guentheri* Boulenger, 1890a. Fauna Brit. India, Rept. Batr.: 285–286.

Types: Syntypes (4), BMNH 1946.1.12.29, male (V. Schlagintweit), BMNH 1946.1.12.36, juvenile (R.H. Beddome), and BMNH 1946.1.12.49 and 1946.1.12.50, male and female, one is 280 mm (W.T. Blanford).
Type locality: “Sikhim” [= Sikkim State, NE India].
Distribution: Southern Asia. Northern India (West Bengal), cen. Nepal (Kathmandu) and Bhutan, 1400–2500 m.
Sources: Bauer & Günther, 1992, Schleich & Kästle, 2002, Tiwari & Shah, 2004 and Chettri et al., 2009.
Remarks: Occurs in Bangladesh *fide* Ahsan et al. (2009: 149).

3. *Trachischium laeve* Peracca, 1904b. Rev. Suisse Zool. 12(3–4): 665–666.

Synonym: *Trachischium quinquelabialis* Wall, 1911h.
Types: Syntypes (2), MHNG 667.46, a 502 mm female (H. de Saussure), and NHMB 911, a 337 mm male.
Type locality: “Indes orientales” [= Southern Asia and East Indies].
Distribution: Southern Asia. Northern India (Uttar Pradesh), cen. Nepal (Kaski) and Bhutan, 1540–2700 m.
Sources: Tillack & Shah, 2002, Tiwari & Shah, 2004, Whitaker & Captain, 2004 and Wangyal, 2011.
Remarks: Photograph of syntype, mislabeled as MHNG 677.40, in Tillack & Shah (2002: fig. 5).

4. *Trachischium monticola* (Cantor, 1839b). Proc. Zool. Soc. London 1839(7): 50. (*Calamaria monticola*)

Synonyms: *Cyclophis rubriventris* Jerdon, 1870, and *Ablabes albiventer* A.C.L.G. Günther, 1875.
Type: Holotype, BMNH 1946.1.12.32 (T.E. Cantor, 1834–1839).
Type locality: “Naga Hills in Asám” [= Naga Hills, Nagaland State, NE India].
Distribution: Northern India (Arunachal Pradesh, Assam, West Bengal) and SW China (Xizang), 600–2000 m.
Sources: Zhao & Adler, 1993, Zhao, 2006, Agarwal et al., 2010 and Li et al., 2010.

Remarks: Occurs in Bangladesh *fide* Ahsan et al. (2009: 149) and Nepal *fide* Tiwari & Shah, 2004.

5. *Trachischium tenuiceps* (Blyth, 1854a). J. Asiat. Soc. Bengal 23(3): 288. (*Calamaria tenuiceps*)

Type: Holotype, ZSI 7181 (formerly IMC), a 355 mm specimen (W.S. Sherwill, 1843–1854).
Type locality: "vicinity of Darjiling" [= vicinity of Darjeeling (27°02'N, 88°16'E), West Bengal State, NE India, elevation 1600–2250 m].
Distribution: Southern Asia. Northern India (Arunachal Pradesh, Sikkim, West Bengal) Bangladesh, Nepal (Bhaktapur, Dolakha, Ilam, Kathmandu, Kavre, Makwanpur, Nuwakot, Panchthar) and SW China (Xizang), 800–2440 m.
Sources: Schleich & Kästle, 2002, Tiwari & Shah, 2004, Zhao, 2006, Ahsan et al., 2009, Agarwal et al., 2010 and Li et al., 2010.

TRACHYBOA W.C.H. Peters, 1860b (Tropidophiidae)

Synonyms: *Trachiboa* – Senna, 1886 (*nomen incorrectum*), and *Xrachyboa* – Briceño-Rossi, 1934 (*nomen incorrectum*).
Type species: *Trachyboa gularis* W.C.H. Peters, 1860b.
Distribution: Panama and NW South America.
Sources: Brongersma, 1951, Stimson, 1969, Zaher, 1994, Walls, 1998a and McDiarmid et al., 1999.

1. *Trachyboa boulengeri* Peracca, 1910. Ann. Mus. Zool. Univ. Napoli (2) 3(12): 1–2, 1 fig.

Type: Holotype, not designated, a 371 mm specimen, location unknown.
Type locality: "regioni tropicali del Sud America" [= tropical South America].
Distribution: Eastern Panama (Darien), W Colombia (Magdalena) and NW Ecuador (Esmeraldas), NSL–750 m.
Sources: Dunn & Bailey, 1939, H.M. Smith, 1958, Lehmann, 1970, 1974, 1993a–b, Pérez-Santos, 1986, Villa et al., 1988 and Cisneros-Heredia, 2004d.
Remarks: Holotype not in SZN *fide* Andreone & Gavetti (2009: 94).

2. *Trachyboa gularis* W.C.H. Peters, 1860b. Mber. Königl. Akad. Wiss. Berlin 1860(4): 200–202, pl., figs. 1, 1a–d.

Synonym: *Trachyboa gularis multimaculata* Rosén, 1905.
Types: Syntypes (3), ZMB 3770–71 and ZMB 4494, longest syntypes 395 mm and 285 mm (C. Reiss, 1860).
Type locality: "Guayaquil" [Ecuador].
Distribution: Southwestern Ecuador (Guayas), 10–50 m.
Remarks: A possible syntype = RMNH 1297 (ZMB exchange), a 289 mm male. Possibly occurs in Brazil *fide* J.A. Peters & Orejas-Miranda (1970: 305) but doubtful *fide* McDiarmid et al. (1999: 215).

†*TREGOPHIS* Holman, 1975 (Boidae)

Type species: †*Tregophis brevirachis* Holman, 1975.
Distribution: Middle-upper Miocene of USA.
Sources: Holman, 1975, 1979b, 2000a, Rage, 1984b and Parmley & Hunter, 2010.

1. †*Tregophis brevirachis* Holman, 1975. Univ. Michigan Paps. Paleont. (12): 61, fig. 2f.

Type: Holotype, MSUVP 783, one trunk vertebra (J.A. Holman, 1969–1973).
Type locality: "locality UM-K6-59 on the Lowell Hillman Ranch 2350–2550 ft S and 75 ft E of the NW corner, Sec. 22, R. 22W, T.11 S, elevation 2255 ft., Wakeeney, Kansas" [Gallala formation, Clarendonian, lower or middle Miocene].
Distribution: Midddle Miocene (Clarendonian: 10.3–13.6 mya) of USA (Kansas, Nebraska).
Remarks: Revised diagnosis in Holman (2000a: 92–93).

TRETANORHINUS A.-M.-C. Duméril, Bibron & Duméril, 1854a (Dipsadidae)

Synonyms: *Tretanorhinos* – Jan, 1857 (*nomen incorrectum*), *Tretanorhine* – Marschall, 1873 (*nomen incorrectum*), *Tetranorhinus*– Senna, 1886 (*nomen incorrectum*), *Tretatorhinus* – Hoffmann, 1890 (*nomen incorrectum*), and *Tretanorphinus* – Grant, 1946a (*nomen incorrectum*).
Type species: *Tretanorhinus variabilis* A.-M.-C. Duméril, Bibron & Duméril, 1854a.
Distribution: Latin America and West Indies.
Sources: Dunn, 1939a, J.A. Peters & Orejas-Miranda, 1970, Villa et al., 1988, Pinou & Dowling, 1994 and Zaher et al., 2009.

1. *Tretanorhinus mocquardi* Bocourt, 1891. Naturaliste (2) 13(101): 122.

Types: Syntypes (5), ANSP 11656 and MNHN 3675a–b, longest syntype 730 mm (Criado), location of other syntypes unknown.
Type locality: "Amérique intertropicale" [= America between Tropics of Cancer and Capricorn, i.e. 23.5°N and 23.5°S]. Restricted to Panama *fide* Bocourt (1895: 798–799, pl. 52, fig. 5 *in* A.H.A. Duméril et al., 1870–1909) and specimen label. Further restricted to Panama City, Panama *fide* Dunn (1939a: 214).

Distribution: Panama (Panama, Colon) and Ecuador (Esmeraldas), NSL–50 m.
Sources: A.H.A. Duméril et al., 1870–1909, Dunn, 1939a and Cisneros-Heredia, 2005b.
Remarks: Five syntypes originally *fide* Bocourt (1895: 799 *in* A.H.A. Duméril et al., 1870–1909).

2. *Tretanorhinus nigroluteus* Cope, 1861e. Proc. Acad. Nat. Sci. Philadelphia 13(7): 298–299.

Synonyms: *Tretanorhinos mexicanus* Jan, 1857 (*nomen nudum*), *Helicops agassizi* Jan, 1863b, *Helicops bifrenatus* Bocourt, 1884, *Tretanorhinus lateralis* Bocourt, 1891, *Tretanorhinus intermedius* Rosén, 1905, *Tretanorhinus nigroluteus mertensi* H.M. Smith & Gillespie *in* H.M. Smith, 1965, *Tretanorhinus nigroluteus dichromaticus* Villa, 1969, and *Tretanorhinus nigroluteus obscurus* Villa, 1969.
Type: Holotype, USNM 5568 (formerly SIM), a 635 mm (svl) specimen (probably J. Rowell, 1857).
Type locality: "Greytown, Nicaragua," (in error *fide* Dunn, 1939a: 216). Corrected to Aspinwall, Panama *fide* USNM catalogue (Dunn, 1939a: 216 & Cochran, 1961: 220).
Distribution: Mesoamerica. Southeastern Mexico (Campeche, Oaxaca, Quintana Roo, Tabasco, Veracruz), N Guatemala (Alta Verapaz, Petén), Belize (Belize, Cayo, Orange Walk, Stann Creek), Honduras (Atlántica, Colón, Cortés, Francisco Morazán, Gracias a Dios, Islas de la Bahía, Olancho, Yoro, Guanaja, Roatán and Utila Is.), Nicaragua (Atlántico Norte, Atlántico Sur, Jinotega, Matagalpa, Rio San Juan, Zelaya, Corn Is.), Costa Rica (Heridia, Limón), Panama and Colombia (Atlántico), NSL–1260 m.
Sources: Villa, 1968, 1970a, Alarcón-Pardo, 1978, R.W. Henderson & Hoevers, 1979, L.D, Wilson & Meyer, 1985, Pérez-Santos & Moreno, 1988, J.C. Lee, 1996, 2000, G. Köhler, 1996a, 1999, J.A. Campbell, 1998b, Auth et al., 2000, Stafford & Meyer, 2000, Savage, 2002, McCranie et al., 2005, McCranie, 2011a and Travers et al., 2011.
Remarks: Collector (Dr. Caldwell) of type and its locality in error *fide* Dunn (1939a: 216).

T

3. *Tretanorhinus taeniatus* Boulenger, 1903b. Ann. Mag. Nat. Hist. (7) 12(69): 350.

Type: Holotype, BMNH 1946.1.15.40, a 570 mm female (W.F.H. Rosenberg, 1896–1903).
Type locality: "Rio Sapayo, N.W. Ecuador, altitude 450 feet."
Distribution: Western Colombia (Valle del Cauca) and NW Ecuador (Esmeraldas), NSL–150 m.
Sources: Pérez-Santos & Moreno, 1988, 1991.

4. *Tretanorhinus variabilis* A.-M.-C. Duméril, Bibron & Duméril, 1854a. Erpét. Gén. 7(1): 349–351, pl. 80, fig. 4.

Synonyms: *Helicops wagleri* Jan, 1863b, *Tretanorhinus variabilis adnexus* Jan, 1863b (*nomen nudum*), *Tretanorhinus variabilis adnexus* Bocourt, 1895 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Tretanorhinus variabilis cubanus* Bocourt, 1895 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Tretanorhinus insulaepinorum* T. Barbour, 1916a, *Tretanorhinus variabilis lewisi* Grant, 1940c, *Tretanorhinus gaigeae* Grant, 1946a, and *Tretanorhinus variabilis binghami* A. Schwartz & Ogren, 1956.
Types: Syntypes (2), MNHN 7161 and MNHN 7346, longest syntype 511 mm.
Type locality: Unknown.
Distribution: Cuba (Camagüey, Cienfuegos, Ciego de Aviula, Granma, Guantánamo, Habana, Las Tunas, Matanzas, Pinar del Río, Sancti Spíritus, Villa Clara, Juventad Is.) and Cayman Is. (Grand Cayman).
Sources: Petzold, 1967, A. Schwartz & R.W. Henderson, 1988, 1991, Seidel & Franz, 1994, Rodríguez-Robles & Greene, 1996, Rodríguez-Schettino, 2003 and R.W. Henderson & Powell, 2009.

TRICERATOLEPIDOPHIS Ziegler, Herrmann, David, Orlov & Pauwels, 2001 (Viperidae)

Type species: *Triceratolepidophis sieversorum* Ziegler, Herrmann, David, Orlov & Pauwels, 2001.
Distribution: Indo-China.
Sources: Ziegler et al., 2001, Herrmann et al., 2002, 2004, Orlov et al., 2003, 2009, Gumprecht et al., 2004, Shiryaev et al., 2007 and V.S. Nguyen et al., 2009.

1. *Triceratolepidophis sieversorum* Ziegler, Herrmann, David, Orlov & Pauwels, 2001. Russ. J. Herp. (2000) 7(3): 201–206, figs. 1–8.

Type: Holotype, ZFMK 71262, a 1255 mm male (native, Jan.–June 1999).
Type locality: "Phong Nha (village), Nature Reserve, Quang Binh Province, Vietnam, ~100 m a.s.l."
Distribution: Central Laos (Khammouan) and cen. Vietnam (Quang Binh), 100–210 m.

TRICHEILOSTOMA Jan & Sordelli, 1860 *in* 1860–1866 (Leptotyphlopidae)

Synonym: *Guinea* Hedges, Adalsteinsson & Branch *in* Adalsteinsson, Branch, Trape, Vitt & Hedges, 2009.
Type species: *Stenostoma bicolor* Jan & Sordelli, 1860 *in* 1860–1866.
Distribution: West Africa.
Sources: Hahn, 1980a, Wallach, 1998b and McDiarmid et al., 1999.

1. *Tricheilostoma bicolor* (Jan & Sordelli, 1860 *in* 1860–1866). Icon. Gén. Ophid. 1(1): 1, pl. 5, figs. 15a–b, f, x. (*Stenostoma bicolor*)

Synonyms: *Stenosoma gracile* Jan & Sordelli, 1860 *in* 1860–1866, *Stenostoma brevicauda* Bocage, 1887a, *Glauconia bicolor gruveli* Chabanaud, 1917a, and *Leptotyphlops brevicaudus* Hahn, 1980a.

Type: Holotype, RMNH 3682, a 100 mm specimen.

Type locality: "Boutry, Côte-d'Or" [= Butre, Western Region, SW Ghana, 04°49'N, 01°55'W, elevation 5 m].

Distribution: West Africa. Southern Mali (Koulikoro, Mopti, Sikasso), Burkina Faso (Centre, Centre-Nord, Centre-Ouest, Est, Hauts-Bassins, Sud-Ouest, Volta-Noire), SW Niger (Dosso, Niamey), SW Chad (Mayo Kebbi), Guinea (Kouroussa), Ivory Coast (Ferkéssédougou, Katiola, Tiassalé, Toumodi), Ghana (Ashanti, Eastern, Northern, Upper East, Western), S Togo (Centrale, Kara, Maritime, Plateaux), Benin (Alibori, Atlantique, Plateau) and Nigeria (Benue, Kano, Kwara, Oyo, Plateau), NSL–690 m.

Sources: Jan, 1864, Bocage, 1887b, Boulenger, 1893a, 1920c, Angel, 1933, Leeson, 1950, Villiers, 1951a–b, 1952b, 1965, Doucet, 1963, Roussel & Villiers, 1965, Leston & Hughes, 1968, Hughes & Barry, 1969, Papenfuss, 1969, Roux-Estève, 1969, Leston, 1970, Roman, 1980, 1984, Hughes, 1983, 2013, 1988, Hallermann & Rödel, 1995, Wallach & Hahn, 1997, Hahn & Wallach, 1998, LeBreton, 1999, Wallach & Boundy, 2005, J.-F. Trape & Mané, 2006b, Chirio, 2009 and Segniagbeto et al., 2011.

Remarks: Hughes & Barry (1969: 1008) listed holotype as RMNH 3682; Hahn & Wallach (1998: 58) listed a pair of syntypes (RMNH 3683). Possibly occurs in Cameroun *fide* Hughes (1983: 350).

2. *Tricheilostoma broadleyi* (Wallach & Hahn, 1997). Afr. J. Herp. 46(2): 104–106, fig. 1. (*Leptotyphlops broadleyi*)

Type: Holotype, MNHN 1977.103, a 110 mm specimen (M. Lamotte, 1961–1969).

Type locality: "vicinity of the Tropical Ecology station, Lamto, 300 m North of the Bandama River, Toumodi Department, Ivory Coast, 6°13' N, 5°02' W, ca. 300 m elevation."

Distribution: Central Ivory Coast (Toumodi), 300 m. Known only from vicinity of type locality.

Source: Wallach & Boundy, 2005.

3. *Tricheilostoma dissimilis* (Bocage, 1886). J. Sci. Math. Phys. Nat., Lisboa 11(43): 174. (*Stenostoma dissimile*)

Type: Holotype, MBL, a 104 mm specimen (Peteani de Steinberg), destroyed by fire in 18 March 1978.

Type locality: "Afrique centrale, Nil-blanc" [= White Nile, An Nil Al Abyad Prov., SE Sudan].

Distribution: Southeastern Sudan (An Nil Al Abyad). Known only from type locality.

Sources: Corkill, 1935, Hahn, 1978 and Broadley & Wallach, 2007a.

Remarks: *Incertae sedis fide* Broadley & Wallach (2007a: 49); possibly related to *L. bicolor* and/or *L. broadleyi*.

4. *Tricheilostoma greenwelli* (Wallach & Boundy, 2005). Ann. Carnegie Mus. 74(1): 39–42, figs. 1a–c. (*Leptotyphlops greenwelli*)

Type: Holotype, CM 92653, a 91 mm specimen (R.R. Golding, 19 Feb. 1965).

Type locality: "Vicinity of University of Ibadan Zoological Garden, city of Ibadan, Ibadan Province, Oyo State, Western Region, southwestern Nigeria, 7°23'N, 3°54'E, elevation ca. 150 m."

Distribution: Southwestern Nigeria (Western), 150 m. Known only from type locality.

5. *Tricheilostoma sundewalli* (Jan, 1861b). Arch. Zool. Anat. Fis. 1(2): 191. (*Stenostoma sundewalli*)

Synonyms: *Glauconia sundevallii* Boulenger, 1890d *(nomen emendatum), Glauconia gestri* Boulenger, 1906f, and *Leptotyphlops sundevalli* – Villiers, 1950.

Type: Holotype, formerly MSNM, destroyed in 1943 during World War II.

Type locality: Unknown. Designated as West Africa *fide* Jan & Sordelli (1861 *in* 1860–1866: 2).

Distribution: West Africa. Ghana, Togo (Plateaux), SE Cameroon (Est, Sud), Equatorial Guinea (Bioko Is.) and SW Central African Republic (Kemo-Gribingui, Lobaye, Ombella-Mpoko, Ouham, Sangha), 300–1200 m.

Sources: Jan & Sordelli, 1861 *in* 1860–1866, Boulenger, 1893a, 1920c, Sternfeld, 1909b, Angel, 1933, Leeson, 1950, Villiers, 1951a, Perret, 1961, Mertens, 1965c, Roux-Estève, 1965, Hughes & Barry, 1969, Hughes, 1983, 1988, Roman, 1984, Joger, 1990, Hallermann & Rödel, 1995, Hahn & Wallach, 1998, LeBreton, 1999, Herrmann et al., 2004a, Wallach & Boundy, 2005, Chirio & Ineich, 2006, Chirio & LeBreton, 2007 and Segniagbeto et al., 2011.

Remarks: Records for Burkina Faso and Chad need verification. Possibly occurs in Benin *fide* Hughes (2013: 152).

TRILEPIDA Hedges, 2011 (Leptotyphlopidae)

Type species: *Stenostoma macrolepis* W.C.H. Peters, 1857b.

Distribution: South America.

Sources: Hahn, 1980a, Wallach, 1998b, McDiarmid et al., 1999, Hedges, 2011 and Pinto & Fernandes, 2012.

1. *Trilepida anthracina* (Bailey, 1946). Occ. Pap. Mus. Zool., Univ. Michigan (492): 1–5. (*Leptotyphlops anthracinus*)

Type: Holotype, UMMZ 90816, a 214–246 mm female (W. Clarke-MacIntyre, Aug. 1939).
Type locality: "at an elevation of 1800 meters near Baños, in eastern Ecuador" [= Baños de Agua Santa, Provincia Tungurahua, E Ecuador, 01°24'S, 78°25'W, elevation 1800 m].
Distribution: Ecuador (Azuay, Bolívar, Guayas, Pastaza, Tungurahua, Zamora-Chinchipe), 1000–1800 m.
Sources: J.A. Peters, 1955, 1960, Orejas-Miranda, 1967, Miyata, 1982, Cisneros-Heredia, 2008, Pinto, 2010 and Salazar-Valenzuela et al., 2010.
Remarks: Pinto (2010: 164) corrected the sex of the holotype.

2. *Trilepida brasiliensis* (Laurent, 1949). Bull. Inst. Roy. Sci. Nat. Belgique 25(9): 4–5, figs. 7–9. (*Leptotyphlops brasiliensis*)

Type: Holotype, IRSNB 2049 (formerly IG 12594 & IRSNB 2081), a 253–255 mm specimen (Abbaye de Saint André don. [= Saint Andrews Abbey, Bruges], 16 July 1939).
Type locality: "Brésil" [= Brazil]. Restricted to Barreiras, W Bahía State, Brazil *fide* Wallach (1996a: 10).
Distribution: Southeastern Brazil (W Bahía, Ceará, Goiás, Maranhão, Mato Grosso, Mato Grosso do Sul, W Minas Gerais, SE Piauí, Tocantins), 85–850 m.
Sources: Vanzolini et al., 1980, Lang, 1990, Rodrigues & Puorto, 1994, Curcio et al., 2002, Borges-Nojosa et al., 2009, Pinto, 2010, Silveira, 2010 and Pinto & Curcio, 2011.
Remarks: IRSNB 12594 erroneously cited as holotype number *fide* Rodrigues & Puorto (1994: 93) and Curcio et al. (2002:101).

3. *Trilepida brevissima* (Shreve, 1964). Breviora (211): 1–4. (*Leptotyphlops brevissima*)

Synonym: *Leptotyphlops brevissimus* J.A. Peters & Orejas-Miranda, 1970.
Type: Holotype, MLS 1311, a 66–68 mm male (H. Nicéforo-María, 10 Feb. 1951).
Type locality: "Florencia, Departamento de Caquetá, Colombia" [= 01°37'N, 75°37'W, elevation 560 m].
Distribution: Colombia (Antioquia, W Caquetá, Distrito Capital), 560–2800 m.
Sources: Orejas-Miranda, 1967, Pérez-Santos & Moreno, 1988, Passos et al., 2005, Pinto, 2010 and Pinto et al., 2010.

4. *Trilepida dimidiata* (Jan, 1861b). Arch. Zool. Anat. Fis. 1(2): 188. (*Stenostoma dimidiatum*)

Synonyms: *Glauconia dimidiata* Boulenger, 1893a, and *Leptotyphlops dimidiatus* Orejas-Miranda, 1967.
Type: Neotype, IB 24011, a 222 mm female (A.R. Hoge, 27 May 1964), designated by Pinto & Fernandes (2012: 38).
Type locality: "Brazil, State of Roraima, Boa Vista Municipality, São Marcos, 03°05' N, 60°25' W, elevation 75 m" via neotype selection.
Distribution: Northern South America. Southeastern Venezuela, Guyana (Demerara-Mahaica, Upper Takutu-Upper Essequibo), Suriname (N Brokopondo, Para, Suriname), French Guiana (Cayenne) and N Brazil (Minas Gerais, Roraima, Maracá Is.), 15–1100 m.
Sources: Jan & Sordelli, 1861 *in* 1860–1866, Orejas-Miranda, 1967, Amaral, 1978, Hoogmoed, 1977, Lancini & Kornacker, 1989, Kornacker, 1999, Abuys, 2003, Silveira et al., 2004b, Passos et al., 2005, 2006, Lima-Silveira, 2007b, Pinto, 2010, Pinto & Fernandes, 2012 and C.J. Cole, et al., 2013.
Remarks: The holotype, MSNM (Voyage de M. Peteani de Steinberg), was destroyed in 1943 during World War II. Neotype selection based upon type locality restriction of Peters & Orejas-Miranda (1970: 169) of "São Marcos, near confluence of Rios Uriracuera and Tacutu, both tributaries of Rio Branco, Territorio de Roraima, Brazil." Occurrence in Venezuela needs confirmation (Pinto & Fernandes, 2012 and Rivas-Fuenmayor et al., 2012).

5. *Trilepida dugandi* (Dunn, 1944c). Caldasia 3(11): 52–53. (*Leptotyphlops dugandi*)

Type: Holotype, CBB (unnumbered), a 143–165 mm male (H. Hildeberto), lost *fide* Pinto et al. (2010: 15).
Type locality: "Juanmina, 20 m. alt., about 11 km. S. W. of Barranquilla (Departamento del Atlántico), Colombia" [= Juan Mina, Barranquilla, Atlántico Dept., Colombia, 10°57'N, 74°53'W, elevation 30 m].
Distribution: Northern Colombia (Atlántico, Magdalena), NSL–30 m.
Sources: Pérez-Santos & Moreno, 1988, Passos et al., 2006 and Pinto, 2010.

6. *Trilepida fuliginosa* (Passos, Caramaschi & Pinto, 2006). Amphibia-Reptilia 27(3): 351–355, figs. 3a–b, 4a–c. (*Leptotyphlops fuliginosus*)

Type: Holotype, MNRJ 10034, a 256 mm female (R. Carvalho, Jr., 18 July 2003).
Type locality: "in the Rio Preto during the fauna rescue of the Queimados Hydroelectric Plant, between Municipalities of Luziânia (16°15'S, 46°57'W), State of Goiás, and Unaí (16°21'S, 46°54'W), State of Minas Gerais, Brazil" [elevation ca. 850 m].
Distribution: Southeastern Brazil (Bahia, Goiás, W Minas Gerais, Tocantis), 190–975 m.
Source: Pinto, 2010.

Remarks: Type locality coordinates are 16°15'S, 47°56'W, elevation 855 m (Luziânia) and 16°21'N, 46°55'W, elevation 595 m (Unaí) *fide* Google Earth.

7. *Trilepida guayaquilensis* (Orejas-Miranda & Peters, 1970). Mitt. Zool. Mus. Berlin (1969) 46(2): 439–441, fig. 1. (*Leptotyphlops guayaquilensis*)

Type: Holotype, ZMB 4508, a 170 mm specimen (C. Reiss, 1860).
Type locality: "Guayaquil an der Pazifikküste von Ecuador" [= Guayaquil, Guayas, Ecuador, 02°10'S, 79°54'W, elevation 10 m].
Distribution: Western Ecuador (Guayaquil), 10 m.
Sources: Miyata, 1980, 1982, Pérez-Santos & Moreno, 1991, Cisneros-Heredia, 2008 and Pinto, 2010.
Remarks: Ecuadorian specimens from El Oro, Esmeraldas, Guayas and Manabí provinces possibly referrable to this species (Cisneros-Heredia, 2008: 179).

8. *Trilepida jani* (Pinto & Fernandes, 2012). Copeia, 2012(1), 40–45, figs. 3–4. (*Tricheilostoma jani*)

Type: Holotype, MNRJ 4263, a 187 mm male (G. Kisteumacher, 1985).
Type locality: "Brazil, State of Minas Gerais, Belo Horizonte Municipality, Parque das Mangabeiras, 19° 55' S, 43° 56' W, elevation ca. 1000 m."
Distribution: Southeastern Brazil (Minas Gerais), 1000–1750 m.
Source: Pinto, 2010.

9. *Trilepida joshuai* (Dunn, 1944c). Caldasia 3(11): 53, figs. 9–10. (*Leptotyphlops joshuai*)

Type: Holotype, MLS 13, a 259–270 mm male, destroyed by fire 9–10 April 1948.
Type locality: "Jericó, Departamento de Antioquia (1967 m.), Colombia" [= Jericó, Antioquia Dept., Colombia, 05°48'N, 75°47'W, elevation 1965 m].
Distribution: Colombia (Antioquia, Caldas, Quindío, Risaralda, Valle del Cauca), 1600–2835 m.
Sources: Pérez-Santos & Moreno, 1988, Passos et al., 2006, Pinto, 2010, Pinto et al., 2010, Rojas-Morales & González-Durán, 2011 and Rojas-Morales, 2012b.

10. *Trilepida koppesi* (Amaral, 1955c). Mem. Inst. Butantan (1954) 26: 203–204, figs. 4–6. (*Leptotyphlops koppesi*)

Type: Holotype, IB 8883, a 144–145 mm male (S.J. Koppes, 10 Oct. 1934), destroyed by fire 15 May 2010.
Type locality: "Terenos, Mato Grosso, Brasil" [= Municipality of Terenos, Mato Grosso do Sul, SE Brazil, 20°26'S, 54°51'W, elevation 400 m].
Distribution: Brazil (Goiás, Mato Grosso, Mato Grosso do Sul, Minas Gerais, São Paulo, Tocantins), 270–880 m.
Sources: Amaral, 1978, Nogueira, 2001, Valdujo & Nogueiro, 2001, Sousa & Silva, 2002b, Passos et al., 2005, 2006 and Pinto, 2010.

11. *Trilepida macrolepis* (W.C.H. Peters, 1857b). Mber. Kønigl. Akad. Wiss. Berlin 1857(8): 402. (*Stenostoma macrolepis*)

Synonyms: *Stenostoma affine* Boulenger, 1884a, *Glauconia affinis* – Boulenger, 1893a, *Leptotyphlops affinis* – Amaral, 1930f, *Leptotyphlops ihlei* Brongersma, 1933a, and *Leptotyphlops afinis* – Briceño-Rossi, 1934 (*nomen incorrectum*).
Type: Lectotype, ZMB 1434, a 280 mm specimen (C.F. Appun), designated via restriction by Orejas-Miranda (1967: 430).
Type locality: "Puerto Cabello" [= Município do Puerto Cabello, Carabobo State, Venezuela, 10°28'N, 68°01'W, elevation 10 m], by type locality restriction and designation.
Distribution: Northern South America. Panamá (Panamá), Colombia (Antioquia, Boyacá, Caldas, Chocó, Córdoba, Huila, La Guajira, Magdalena, Norte de Santander, Santander, Tolima, Valle del Cauca, Vaupés), Venezuela (Acosta, Aragua, Carabobo, Cojedes, Distrito Federal, Falcón, Mérida, Miranda, Portuguesa, Táchira, Vargas, Yaracuy, Zulia), Guyana (Potaro-Siparuni, Upper Takutu-Upper Essequibo), Suriname (Brokopondo, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), N Brazil (Amazonas, Bahia, Maranhão, Pará, Rio de Janeiro, Rondônia) and E Perú (Loreto), NSL–1930 (2000) m.
Sources: Boulenger, 1893a, Nicéforo María, 1942, Shreve, 1964, Roze, 1966a, Orejas-Miranda, 1967, Amaral, 1978, Hoogmoed, 1977, Cunha & Nascimento, 1978, 1993, Gasc & Rodrigues, 1980, Chippaux, 1987, Pérez-Santos & Moreno, 1988, Lancini & Kornacker, 1989, Cunha & Nascimento, 1993, Bauer et al., 1995, Starace, 1998, Freitas, 1999, 2003, Kornacker, 1999, Markezich, 2002, Abuys, 2003, Argôlo, 2004, Rivas-Fuenemayer & Barrio-Amorgós, 2005, Passos et al., 2005, 2006, Navarrete et al., 2009, Pinto, 2010 and Pinto et al., 2010 and C.J. Cole et al., 2013.
Remarks: *Stenostoma affine* Boulenger is a synonym *fide* Pinto (2010: 121).

12. *Trilepida nicefori* (Dunn, 1946b). Caladasia 4(17): 121–122. (*Leptotyphlops nicefori*)

Type: Holotype, MLS 17, a 90 mm male (H. Nicéforo-María), destroyed by fire 9–10 April 1948.
Type locality: "Mogotes, Santander, Colombia, 1746 m. elevation" [= Mogótes, Santander Dept., NE Colombia, 06°29'N, 72°58'W, elevation 1685 m].
Distribution: Northeastern Colombia (Santander), 1685–1825 m.
Sources: Pinto, 2010 and Pinto et al., 2010.

13. *Trilepida salgueiroi* (Amaral, 1955c). Mem. Inst. Butantan (1954) 26: 203, figs. 1–3. (*Leptotyphlops salgueiroi*)

Type: Holotype, IB 8876, a 297–301 mm female (W.S. Salgueiro, 30 Nov. 1934), destroyed by fire 15 May 2010.

Type locality: "Itá, Espírito Santo, Brasil" [= Baixo Guandu, State of Espírito Santo, SE Brazil, 20º26'S, 54º51'W, elevation 75 m].

Distribution: Southeastern Brazil (S Bahia, Espírito Santo, E Minas Gerais, Rio de Janeiro), 20–515 m.

Sources: Amaral, 1978, Bilate & Ribeiro-Costa, 2005, Passos et al., 2005, Costa et al., 2009, Pinto, 2010 and Figueiredo-de-Andrade et al., 2011.

Remarks: Pinto (2010: 198) corrected the sex of the holotype.

TRIMERESURUS Lacépède, 1804 (Viperidae)

Synonyms: *Trimeresura* Fleming, 1822 (*nomen emendatum*), *Trimesurus* Jarocki, 1822 (*nomen emendatum*), *Trimereresurus* – Meckel, 1829 (*nomen incorrectum*), *Trimensurus* – J. Müller, 1832 *(nomen incorrectum)*, *Bothrophis* Fitzinger, 1843, *Cryptelytrops* Cope, 1860b, *Tremeresurus* – Kulagin, 1888 (*nomen incorrectum*), *Botrophis* – Hoffmann, 1890 (*nomen incorrectum*), *Cryptelythrops* – Hoffmann, 1890 (*nomen incorrectum*), *Trimaesurus* – Stanley, 1917 (*nomen incorrectum*), *Trimererusus* – Takahashi, 1930 *(nomen incorrectum*), *Trineresurus* – Horikawa, 1941 (*nomen incorrectum*), *Trimerasurus* – Leviton, 1961b (*nomen incorrectum*), *Trimersurus* – H.-F. Huang, Chen, Min & Ho, 1965 (*nomen incorrectum*), *Ttimeresurus* – Deuve, 1970 (*nomen incorrectum*), *Trimerusurus* – Frith, 1977 (*nomen incorrectum*), *Trimetresurus* – Murthy, 1977c (*nomen incorrectum*), *Trimeresus* – Majupuria, 1981 (*nomen incorrectum*), *Trimcresurus* – Murthy & Pillai *in* Majupuria, 1986 (*nomen incorrectum*), *Trimerisurus* – Cogger & Zweifel, 1992 (*nomen incorrectum*), and *Adelynhoserea* Hoser, 2012o *(nomen illegitimum)*.

Type species: *Trimeresurus insularis* Kramer, 1977.

Distribution: Asia and Indonesia.

Sources: Maslin, 1942, M.A Smith, 1943, Maslin, 1945, Klemmer, 1963, Leviton, 1964d, W. Burger, 1971, Kramer, 1977, Hoge & Romano-Hoge, 1981a, Malhotra & Davis, 1991, Golay et al., 1993, Zhao & Adler, 1993, Kraus et al., 1996, David & Vogel, 1998, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Malhotra & Thorpe, 1997, 2000, 2004c, Ziegler et al., 2001, Giannasi et al., 2001a, G. Peng & Fuji, 2001, David et al., 2002, 2009, 2011, Gumprecht et al., 2004c, Castoe & Parkinson, 2006, Grismer et al., 2006a, 2008b, Sanders et al., 2006, Dawson et al., 2008, Ganesh et al., 2008, Orlov et al., 2008, 2009, I. Das, 2010, 2012, David et al., 2011c, P. Guo & Wang, 2011, Sumontha et al., 2011 and Hoser, 2012d, o.

Remarks: The following genera and species have been separated from *Trimeresurus,* based on Malhotra & Thorpe 2004: *Craspedocephalus (gramineus, andalasensis, borneensis, brongersmai, malabaricus, puniceus, strigatus, trigonocephalus, wiroti), Garthius (chaseni), Himalayophis (tibetanus), Ovophis (convictus, gracilis, monticola, okinavensis, tonkinensis, zayuensis), Parias (flavomaculatus, hageni, malcolmi, mcgregori, schultzei, sumatranus), Peltopelor (macrolepis), Popeia (barati, buniana, fucata, inornata, nebularis, popeorum, sabahi), Protobothrops (cornutus, elegans, flavoviridis, jerdonii, kaulbacki, mucrosquamatus, tokarensis trungkhanensis, xiangchengensis), Triceratolepidophis (sieversorum), Tropidolaemus (huttoni, laticinctus, wagleri), Viridovipera (gumprechti, medoensis, stejnegeri, truongsonensis, vogeli, yunnanensis), and Zhaoermia (mangshanensis)*, David et al., 2011c, relegated these genera to subgenera of *Trimeresurus.*

1. *Trimeresurus albolabris* Gray, 1842b. Zool. Misc. 2(May): 48. (*nomen corrigendum*)

Synonyms: *Trimesurus albolabris* Gray, 1842b (*nomen incorrigendum*), *Trimeresurus purpureomaculatus bicolor* Boulenger, 1890 (*nomen praeoccupatum*), and *Trimeresurus albolabris* – C.H. Pope & Pope, 1933 (*nomen corrigendum*).

Type: Lectotype, BMNH 1946.1.19.85 (formerly BMNH I.2.2b), a juvenile male (J. Reeves), designated by Regenass & Kramer (1981: 168).

Type locality: "China." Restricted to Hong Kong, China *fide* Iskandar & Colijn (2001: 157).

Distribution: Southeastern Asia. Southern China (Fukien, Guangdong, Guangxi, Hainan, Hong Kong, Hunan, Jiangxi, Nan Ao Is.), Macau (Coloane Is.), NE India (Assam, Arunachal Pradesh, Meghalaya, Nagaland, North Bengal, Sikkim), Bhutan (Sarpang), Thailand (Bangkok, Buriram, Chachoengsao, Chaiyaphum, Chiang Mai, Chiang Rai, Chon Buri, Chumphon, Kalasin, Kamphang Phet, Kanchanaburi, Khiri Khan, Khon Kaen, Krabi, Loei, Lop Buri, Maha Sarakham, Nakhon Nayok, Nakhon Pathom, Nakhon Phanom, Nakhon Ratchasima, Nakhon Sawan, Nakhon Si Thammarat, Nan, Nong Khai, Nonthaburi, Phet Buri, Phetchabun, Phetchaburi, Phitsanulok, Prachin Buri, Prachuap Khiri Khan, Rayong, Roi Et, Sakhon Nakhon, Samut Sakhon, Saraburi, Satun, Sisaket, Songkhla, Surat Thani, Surin, Trang, Ubon Ratchathani, Udon Thani), Myanmar (Bago, Kachin, Mandalay, Mon), Cambodia (Kampot, Koh Kong, Mondulkiri), Laos (Xiangkhouang) and S Vietnam (Bac Giang, Bac Kan, Binh Phuoc, Ca Mau, Cao Bang, Dak Lak, Da Nang, Dong Nai, Gia Lai, Hai Duong, Hao Binh, Ha Tay, Ha Tinh, Khanh Hoa, Kien Giang, Lam Dong, Lang Son, Lao Cai, Nghe An, Quang Binh, Quang Nam, Quang Tri, Son La, Tay Ninh, Thai Nguyen, Thanh Hoa, Thua Thien-Hue, Vinh-Phu, Cat Ba Is.) and W Indonesia (Sumatra), 50–3050 m.

Sources: C.H. Pope & Pope, 1933, C.H. Pope, 1935, E.H. Taylor, 1965, Saint-Girons, 1972a, Regenass & Kramer, 1981, Zhang & Zhao, 1990, M.J. Cox, 1991b, Easton & Leung-Va, 1993, Zhao & Adler, 1993, Malhotra & Thorpe, 1997, Orlov, 1997, M.J. Cox et al., 1998, David & Vogel, 1998, Karsen et al., 1998, Chan-ard et al., 1999, Darebsky, 1999, Lazell, 1999, David & Gernot, 2000, Malhotra & Thorpe, 2000, Giannasi et al., 2001b, G. Peng & Fuji, 2001, Gumprecht, 2004f, B.L. Stuart & Emmett, 2006, B.L. Stuart et al., 2006, Vijayakumar & David, 2006, Zhao, 2006, Ziegler et al., 2007, Datong, 2008, M.F. Ahmed et al., 2009, V.S. Nguyen et al., 2009, I. Das, 2012 and Wangyal, 2012.

Remarks: C.H. Pope & Pope (1933: 10) erroneously credited with lectotype designation but they did not meet the requirements of Art. 74.6. *Trimeresurus albolabris* not included in Hainan fauna *fide* Shi, 2011. Malaysia, Borneo and Andaman & Nicobar Is. records rejected *fide* David & Ineich (1999: 281) and Das (1994: 48). Presence on Sumatra (Indonesia) confirmed *fide* David & Vogel (2000: 225).

2. *Trimeresurus andersoni* Theobald, 1868b. J. Asiat. Soc. Bengal (1866) 37: 75–76.

Type: Holotype, ZSI 3057.

Type locality: Unknown. Designated as Andaman Is., Andaman & Nicobars, E India *fide* Regenass & Kramer (1981: 195).

Distribution: Eastern India (Andaman & Nicobars: Little Andaman, Car Nicobar, Cinque, Long, Nicobar, Preparis and South Andaman Is.).

Sources: Biswas & Sanyal, 1980, Malhotra & Thorpe, 1997, I. Das, 1994, 1996, Whitaker & Captain, 2004, Vijayakumar & David, 2006 and Harikrishnan et al., 2012.

Remarks: A synonym of *T. purpureomaculatus fide* McDiarmid et al. (1999: 342).

3. *Trimeresurus cantori* Blyth, 1846. J. Asiat. Soc. Bengal 15(173): 377.

Synonym; *Trimeresurus cantoris* Stoliczka, 1870c–d (*nomen emendatum*).

Type: Lectotype, ZSI 2959, a 762 mm specimen (Lewis & Barbe), designated by Sclater (1891: 71).

Type locality: "Nicobar Islands,"[Andaman & Nicobars, E India, Bay of Bengal].

Distribution: Eastern India (Andaman & Nicobars: Nicobar Is.).

Sources: Biswas & Sanyal, 1980, Malhotra & Thorpe, 1997 and Whitaker & Captain, 2004.

Remarks: Original description included a 762 mm adult and a 394 mm juvenile. Andaman Is. record needs confirmation *fide* Whitaker & Captain (2007: 448).

4. *Trimeresurus cardamomensis* (Malhotra, Thorpe, Mrinalini & Stuart, 2011). Zootaxa (2757), 3–8, fig. 3. (*Cryptelytrops cardamomensis*)

Type: Holotype, FMNH 259191, a 347 mm female (B.L. Stuart and S. Platt, 25 Aug. 2000).

Type locality: "Phnom Chan Mountain, Cardamom Mountains, Sre Ambei District, Koh Kong Province, Cambodia (11.44 N, 103.79 E), 100–200 m elevation."

Distribution: Southeastern Thailand (Chantaburi) and SW Cambodia (Koh Kong), NSL–800 m.

Remarks: Probably occurs on offshore islands like Koh Chang *fide* Malhotra et al. (2011: 9).

5. *Trimeresurus erythrurus* (Cantor, 1839a). Proc. Zool. Soc. London 7(1): 31–32. (*Trigonocephalus erythrurus*)

Synonym: *Trimesurus bicolor* Gray, 1853.

Type: Holotype, BMNH 1946.1.19.99 (formerly BMNH 1894.6.25.15), a juvenile female illustrated in colored sketch of (T.E. Cantor (1834–1837: no 17) *fide* M.A. Smith (1943: 522).

Type locality: "Delta Gangeticum" [= Ganges Delta, Bangladesh and West Bengal State, NE India].

Distribution: Southern Asia. Northeastern India (Arunachal Pradesh, Assam, Manipur, ? Meghalaya, ? Mizoram, Nagaland, Sikkim, West Bengal), cen. Nepal (Kaski), Bangladesh and Myanmar (Kachin, Rakhine, Yangon), 25–2500 m.

Sources: C.H. Pope & Pope, 1933, E.H. Taylor, 1965, Regenass & Kramer, 1981, Toriba et al., 1990, G. Vogel, 1990, Toriba, 1994, Malhotra & Thorpe, 1997, David & Vogel, 1998, Zug et al., 1998, Leviton et al., 2003, Ao et al., 2004, Tiwari & Shah, 2004 and Whitaker & Captain, 2004.

Remarks: Old holotype number listed as BMNH 94.6.25.5 *fide* Regenass & Kramer (1981: 179).

6. *Trimeresurus fasciatus* (Boulenger, 1896d). Ann. Mag. Nat. Hist. (6) 18(103): 63–64. (*Lachesis fasciatus*)

Type: Holotype, BMNH 1896.4.29.46, a 455 mm female (A.H. Everett, 1896).

Type locality: "Jampea Island" [= Tanahjampea Island, SE Indonesia, bet. 7°00'–09'S and 120°36'–47'E]. Specified as Jampea Island, between Celebes [= Sulawesi] and Flores *fide* BMNH catalogue.

Distribution: Southern Indonesia (Tanahjampea Is.).

Sources: Auffenberg, 1980, David et al., 2003 and Koch, 2012.

Remarks: Photograph of holotype in David et al. (2003: fig. 1).

7. *Trimeresurus honsonensis* (Grismer, Ngo & Grismer, 2008b). Zootaxa (1715): 61–64, fig. 2 (upper). (*Cryptelytrops honsonensis*)

Type: Holotype, UNS 353, a 648 mm female (V.T. Ngo, 29 July 2007).

Type locality: "Hon Son island in the Kien Hai District of the Kien Giang Province, Vietnam, 09º 47' 95.2" N, 104º 37' 85.6" E at 100 m a.s.l."

Distribution: Vietnam (Kien Giang: Hon Son Is.), 100 m. Known only from type locality.

Source: V.S. Nguyen et al., 2009.

8. *Trimeresurus insularis* Kramer, 1977. Rev. Suisse Zool. 84(3): 755. (*Trimeresurus albolabris insularis*)

Synonym: *Trimeresurus viridis* Lacépède, 1804 (*nomen oblatum*).

Type: Holotype, MHNG 12773, a 532 mm male (A. Bühler, 1935).

Type locality: "Soe, Timor" [= Soe, cen. Timor, SE Indonesia, 9°52'S, 124°17'E, elevation 800 m].

Distribution: Lesser Sundas of S Indonesia (Adonara, Alor, Bali, Flores, Java, Kisar, Komodo, Lembata, Lomblem, Lombok, Padar, Pantar, Rinca, Romang, Roti, Semau, Sumba, Sumbawa, Timor, Wetar) and Timor-Leste, NSL–1200 m.

Sources: David & Vogel, 1996, Giannasi et al., 2001b, David et al., 2003, 2011c, Vijayakumar & David, 2006, I Das, 2010, Kaiser et al., 2011, Lang, 2011 and O'Shea et al., 2012.

Remarks: Previously considered a subspecies of *T. albolabris*. *Trimeresurus viridis* Lacépède is type species of *Trimeresurus fide* David et al. (2011c: 35) and a *nomen oblitum fide* Art. 23.9.2 of the Code (ICZN, 1999). Sulawesi record doubtful *fide* Lang & Vogel (2005: 264).

9. *Trimeresurus kanburiensis* M.A. Smith, 1943. Fauna Brit. India, Rept. Amph. 3: 519.

T

Type: Holotype, BMNH 1946.1.8.91 (formerly BMNH 1927.8.10.1), a 405 mm female (M.A. Smith).

Type locality: "limestone hills near Kanburi, southwestern Siam" [= vicinity of Kanchanaburi (14°40'N, 99°01'E, elevation 525 m), Kanchanaburi Prov., W-cen. Thailand].

Distribution: Central Thailand (Kanchanaburi), 200–1000 m.

Sources: E.H. Taylor, 1965, M.J. Cox 1991b, 1991, Vogel, 1991, Warrell et al., 1992, Malhotra & Thorpe, 1997, 2004a, M.J. Cox et al., 1998, Chan-ard et al., 1999, Orlov et al., 2003, 2004 and David et al., 2004.

Remarks: Type locality listed as "S.W. China" *fide* BMNH catalogue. Probably occurs in adjacent Myanmar.

10. *Trimeresurus labialis* Fitzinger *in* Steindachner, 1867a. Reise Öster. Novara 1: 86–87, pl. 3, figs. 1–2.

Synonyms: *Vipera acontia* Laurenti, 1768 (*nomen oblitum*), *Bothrophis labialis* Fitzinger, 1861 (*nomen nudum*), and *Trimeresurus mutabilis* Stoliczka, 1870a–d.

Types: Syntypes (3), NMW 18813.1–3 (G. von Frauenfeld [Novara Exped.], 23 Feb.–26 Mar. 1858).

Type locality: "Nikobaren" [= Nicobar Is., Andaman & Nicobars, E India, Bay of Bengal].

Distribution: Eastern India (Andaman & Nicobars: Nicobar Is.).

Sources: Biswas & Sanyal, 1980, David & Vogel, 1998, Whitaker & Captain, 2004 and Vijayakumar & David, 2006.

Remarks: McDiarmid et al. (1999: 337–338) gives Steindachner as author of this name, but Steindachner in the citation on the plates clearly indicates Fitzinger (*in litt.*). A single record from the Andaman Is. needs confirmation *fide* Whitaker & Captain (2007: 466). In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Trimeresurus labialis* Fitzinger is designated a *nomen protectum* and *Vipera acontia* Laurenti a *nomen oblitum*.

11. *Trimeresurus macrops* Kramer, 1977. Rev. Suisse Zool. 84(3): 757, pl. 5, figs. 27–29.

Type: Holotype, MHNG 1400.85, a 639–761 mm male.

Type locality: "Bangkok (Thailand)" [= Bangkok, Bangkok Prov., Thailand, 13°43'N, 100°29'E, elevation NSL].

Distribution: Indo-China. Thailand (Ang Thong, Ayutthaya, Bangkok, Chaiyaphum, Chiang Mai, Kanchanaburi, Khan Kaen, Lampang, Nakhon Phanom, Nonthaburi, Ratchasima, Pathon Thani, Samut Prakan), Laos (Bolikhamxai, Champasak, Khammouan) and ext. N Cambodia (Kampot, Koh Kong, Mondulkiri, Stung Treng), NSL–800 m.

Sources: Regenass & Kramer, 1981, M.J. Cox, 1991b, M.J. Cox et al., 1998, Chan-ard et al., 1999, Orlov et al., 2003, B.L. Stuart & Emmett, 2006, B.L. Stuart et al., 2006, Teynié & David, 2007, V.S. Nguyen et al., 2009 and Malhotra et al., 2011b.

12. *Trimeresurus purpureomaculatus* (Gray, 1832 *in* Gray & Hardwicke, 1830–1835). Illust. Indian Zool. 1(10): pl. 81. (*Trigonocephalus purpureomaculatus*) (*nomen corrigendum*)

Synonyms: *Trigonocephalus purpureo-maculatus* Gray, 1832 *in* Gray & Hardwicke, 1830–1835 (*nomen incorrigendum*), *Trimesurus carinatus* Gray, 1842b, *Trimesurus purpureus* Gray, 1842b (*nomen substitutum*), *Trimeresurus porphyraceus* Blyth, 1860, *Trimeresurus obscurus* Theobald, 1868, *Trimeresurus purpureomaculatus* – Boulenger, 1896a (*nomen*

corrigendum), and *Trimeresurus acutimentalis* F. Werner, 1927.

Type: Holotype, BMNH 1946.1.19.54 (formerly BMNH I.2.4a & BMNH 1894.6.25.15), an 820 mm female illustrated by Hardwicke (1756–1823, 1: fig. 158) (T. Hardwicke, 1756–1823).

Type locality: "Singapore."

Distribution: Southeastern Asia and W Indonesia. India (West Bengal), Bangladesh, S Myanmar (Mon, Karen, Tanintharyi), Singapore, Thailand (Kanchanaburi, Ko Surin, Nakhon Si Thammarat, Phang Nga, Phuket, Ranong, Trang, Koh Surin and Phuket Is.), West Malaysia (Johore, Perak, Pinang, Pangkor Is.) and Indonesia (Sumatra, Bengkalis and Riau Arch.), NSL–1500 m.

Sources: C.H. Pope & Pope, 1933, E.H. Taylor, 1965, Whitaker, 1978a, 1978c, Regenass & Kramer, 1981, Tweedie, 1983, M.J. Cox, 1991b, Lim & Lim, 1992, David & Vogel, 1996, Malhotra & Thorpe, 1996, 1997, 2000, M.J. Cox et al., 1998, Chan-ard et al., 1999, Leviton et al., 2003 and Onn et al., 2010.

Remarks: Original color sketch of holotype of Hardwicke (1756–1823) (1: fig. 158) in BMNH. Date of publication 1829 *fide* Regenass & Kramer (1981: 195).

13. *Trimeresurus septentrionalis* Kramer, 1977. Rev. Suisse Zool. 84(3): 755–756, pl. 5, figs. 24–26. (*Trimeresurus albolabris septentrionalis*)

Type: Holotype, MHNG 1404.31, a 773 mm male (H. Schnurrenberger, 1962–1964).

Type locality: "Nepal 83° 55' 28° 15' 1500 m (Nähe Pokhara)" [= vicinity of Pokhara, Kaski District, Western Region, Nepal, 28°15'E, 83°55'N, elevation 1500 m].

Distribution: Southern Asia. Northern India (Arunachal Pradesh, Meghalaya, Nagaland, Sikkim, West Bengal), Bangladesh and Nepal (Baglung, Chitwan, Dadeldhura, Dhading, Kaski, Kathmandu, Lalitpur, Lamjung, Manang, Mustang, Myagdi, Rasuwa, Sankhuwasabha, Sindhupalchok), 200–3050 m.

Sources: Nanhoe & Ouboter, 1987, Giannasi et al., 2001b, Shah & Tiwari, 2004, Whitaker & Captain, 2004, Vijayakumar & David, 2006, Ahmed et al., 2009, Ahsan et al., 2009 and S.K. Sharma et al., 2013.

14. *Trimeresurus venustus* Vogel, 1991. Sauria 13(1): 23–26, 2 figs. (paratype), 1 fig. (hemipenis).

Type: Holotype, ZMB 48045, a 580 mm male.

Type locality: "Thung Song, Provinz Nakhon Si Thammarat, Süd-Thailand" [= Thung Song, Nakhon Si Thammarat Prov., S Thailand, 8°10'N, 99°41'E, elevation 70 m].

Distribution: Peninsular Thailand (Krabi, Nakhon Si Thammarat, Surat Thani), 70–700 m.

Sources: David et al., 2004, Malhotra & Thorpe, 2004a, Orlov et al., 2004 and Ziegler et al., 2006.

TRIMETOPON Cope, 1885a (Dipsadidae)

Synonym: *Trimepodon* – Amaral, 1930f (*nomen incorrectum*).

Type species: *Ablabes gracilis* A.C.L.G. Günther, 1872b.

Distribution: Lower Central America.

Sources: Dunn, 1937b, E.H. Taylor, 1951, 1954, J.A. Peters & Orejas-Miranda, 1970, C.W. Myers, 1974, Villa et al., 1988, Savage, 2002, Solórzano, 2004 and Zaher et al., 2009.

1. *Trimetopon barbouri* Dunn, 1930. Occ. Pap. Boston Soc. Nat. Hist. (1921–1931) (5): 331–332.

Type: Holotype, MCZ 23877, a 260 mm male (Canal Zone Health Dept).

Type locality: "Pedro Miguel, Canal Zone, Panama" [= Pedro Miguel, Canal Zone, cen. Panama, 9°01'N, 79°37'W, elevation 25 m].

Distribution: Central Panama (Canal Zone, Barro Colorado Is.), NSL–60 m.

Source: H.M. Smith & Grant, 1958b.

2. *Trimetopon gracile* (A.C.L.G. Günther, 1872b). Ann. Mag. Nat. Hist. (4) 9(49): 18, pl. 3, fig. d. (*Ablabes gracilis*)

Type: Holotype, BMNH 1946.1.1.1 (formerly BMNH 1871.11.22.19 or 20), a 290–305 mm male.

Type locality: "elevated country of Costa Rica, near Cartago" [= vicinity of Cartago, Cartago Prov., cen. Costa Rica, 9°51'N, 83°55'W, elevation 1435 m].

Distribution: Central Costa Rica (Cartago, Heredia, Puntarenas), 1250–2285 m.

Remarks: Although Günther stated "one specimen," Boulenger (1894a: 185) and Dunn (1937: 214) reported two male syntypes.

3. *Trimetopon pliolepis* Cope, 1894d. Proc. Acad. Nat. Sci. Philadelphia 46: 201–202.

Type: Holotype, AMNH 17302 (formerly MNCR 451), a 287 mm specimen (P. Biolley, 1890–1894).

Type locality: "San José, Costa Rica" [= San José, San José Prov., cen. Costa Rica, 9°56'N, 84°05'W, elevation 1160 m].

Distribution: Costa Rica (Cartago, Heredia, Limón, Puntarenas, San José, Bonita Is.), 60–1600 m.

4. *Trimetopon simile* Dunn, 1930. Occ. Pap. Boston Soc. Nat. Hist. (1921–1931) (5): 331.

Type: Holotype, MCZ 15263 (formerly MNCR), a 155 mm specimen.

Type locality: "Reventazon, Costa Rica (= La Junta)" [= Junta, Río Reventazon, cen. Limón Prov., E Costa Rica,

10°07'N, 83°32'W, elevation 100 m] (possibly in error). Probably Siquirres [= cen. Limón Prov., E Costa Rica, 10°06'N, 83°31'W, elevation 100 m] *fide* Dunn (1937: 21).
Distribution: Costa Rica (Cartago, Limón, N Puntarenas), 60–1500 m.

5. *Trimetopon slevini* Dunn, 1940b. Proc. Acad. Nat. Sci. Philadelphia 92: 117–118.

Type: Holotype, CAS 78938, a 220 mm male (J.R. Slevin, 20 July 1939).
Type locality: "Near Boquete, Chiriquí Prov., Panama, altitude 4000 feet" [= vicinity of Boquete, N Chiriquí Prov., W Panama, 8°46'N, 82°26'W, elevation 1090 m].
Distribution: Costa Rica (Cartago, Heredia, Puntarenas) and W Panama (Chiriquí), 120–1825 m.

6. *Trimetopon viquezi* Dunn, 1937b. Copeia 1937(4): 215.

Type: Holotype, ERD (formerly MNCR), a 209 mm male (C. Viquez-Segrada).
Type locality: "Siquirres, Costa Rica" [= Siquirres, Limón Prov., E-cen. Costa Rica, 10°06'N, 83°31'W, elevation 60 m].
Distribution: Eastern Costa Rica (Limón), 60 m. Known only from type locality.
Remarks: Possibly occurs in Heredia, Costa Rica *fide* Savage (2002: 640).

TRIMORPHODON Cope, 1861e (Colubridae)

Synonyms: *Trimorphon* – Boulenger, 1896a (*nomen incorrectum*), *Trimopbodon* – Dugès, 1897b (*nomen incorrectum*), *Trimorphondon* – Woodbury, 1931 (*nomen incorrectum*), and *Mimorphodon* – Anthony, 1955 (*nomen incorrectum*).
Type species: *Lycodon lyrophanes* Cope, 1860f.
Distribution: Southwestern USA and Mesoamerica.
Fossil records: Pleistocene of SW USA.
Sources: E.H. Taylor, 1939a, Klauber, 1940b, H.M. Smith, 1940o, Gehlbach, 1971, N.J. Scott & McDiarmid, 1984a–b, Casas-Andreu et al., 1996, Devitt, 2006 and Devitt et al., 2008.

1. *Trimorphodon biscutatus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1153–1154. (*Dipsas biscutata*)

Synonyms: *Trimorphodon major* Cope, 1870, and *Trimorphodon biscutatus semirutus* H.M. Smith, 1943a
Type: Holotype, MNHN 5900, a 580 mm specimen.
Type locality: "Mexique" [= Mexico]. Restricted to Tehuantepec, Oaxaca State, Mexico *fide* H.M. Smith & Taylor (950a: 340)
Distribution: Southwestern Mexico (Chiapas, Colima, Guerrero, Jalisco, Michoacán, Oaxaca, Puebla), NSL–1500 (2400) m.
Sources: N.J. Scott & McDiarmid, 1984b and Holman, 2000a.

2. *Trimorphodon lambda* Cope, 1886b. Proc. Amer. Philos. Soc. (1885) 23(122): 286–287.

Type: Holotype, USNM 13487, a 304 mm specimen (H.F. Emerich, 1883).
Type locality: "Guaymas, Sonora" [= Guaymas, Sonora State, Mexico, 27°55'N, 110°54'W, elevation 20 m].
Distribution: Southwestern USA (Arizona, SE California, S Nevada, SW New Mexico, ext. SW Utah) and NW Mexico (W Chihuahua, N Sinaloa, Sonora), NSL–800 m.
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Arizona, New Mexico).
Sources: Klauber, 1928, Davis & Dixon, 1957, N.J. Scott & McDiarmid, 1984b, Stebbins, 1985, Degenhardt et al., 1996, P.R. Brown, 1997, Bartlett & Tennant, 2000, Holman, 2000a and Ernst & Ernst, 2003.

3. *Trimorphodon lyrophanes* (Cope, 1860f). Proc. Acad. Nat. Sci. Philadelphia 12(8): 343–344. (*Lycodon lyrophanes*)

Synonym: *Trimorphodon vandenburghi* Klauber, 1924.
Types: Syntypes (4), USNM 4680a–b, a male and female, longest syntype 711 mm, broken in half and partially macerated, ANSP 10146 (formerly USNM 4680c), and ANSP (formerly USNM 4680d) (J. Xantus, May 1859), both ANSP types lost *fide* Malnate *in* N.J. Scott & McDiarmid (1984b: 353.2).
Type locality: "Cape St. Lucas, Lower California" [= Cabo San Lucas, ext. S Baja California Sur State, NW Mexico, 22°53'N, 109°55'W, elevation 25 m].
Distribution: Southwestern USA (SW California) and NW Mexico (Baja Californnia Norte, Baja California Sur, Cerralvo, Danzante, San José, San Marcos and Tiburon Is.), NSL–1800 m.
Sources: R.W. Murphy & Ottley, 1984, N.J. Scott & McDiarmid, 1884b, Mahrdt & Grismer, 1995, Hollingsworth et al., 2000 and Grismer, 2002.

4. *Trimorphodon paucimaculatus* E.H. Taylor, 1938. Univ. Kansas Sci. Bull. (1936) 24(26): 527–529, pl. 46, fig. 1.

Type: Holotype, UIMNH 25072 (formerly EHT 709), an 880 mm specimen (E.H. Taylor, 24 July 1934).
Type locality: "Mazatlan, Sin., Mexico" [= Mazatlan, S Sinaloa State, NW Mexico, 23°14'N, 106°25'W, elevation 10 m].
Distribution: Northwestern Mexico (Jalisco, Nayarit, Sinaloa), NSL–800 m.
Sources: Davis & Dixon, 1957 and N.J. Scott & McDiarmid, 1884b.

T

5. *Trimorphodon quadruplex* H.M. Smith, 1941o. Proc. U.S. Natl. Mus. 91(3130): 157–159. (*Trimorphodon biscutatus quadruplex*)

Type: Holotype, USNM 89476, a female (J.H. Ivy, 1932).
Type locality: "Esteli, Nicaragua" [= Estelí, Estelí Dept., cen. Nicaragua, 13°07'N, 86°25'W, elevation 830 m].
Distribution: Central America. Southeastern Guatemala (Huehuetenango), El Salvador (Ahuachapán, Cuscatlán, La Libertad, La Unión, San Miguel, San Salvador, San Vicente, Sonsonate), Honduras (Choluteca, Comayagua, Copán, Francisco Morazán, Valle, Yoro). Nicaragua (Carazo, Chinandega, Chontales, Estelí, Granada, Managua, Matagalpa, Nueva Segovia) and Costa Rica (Alajuela, Guanacaste, Puntarenas), NSL–1500 m.
Sources: E.H. Taylor, 1951, L.D. Wilson & Meyer, 1985, Villa et al., 1988, G. Köhler, 1999b, Savage, 2002, G. Köhler et al., 2005, N. Herrera et al., 2007, Jadin & Smith, 2010 and McCranie, 2011a.

6. *Trimorphodon tau* Cope, 1870. Proc. Amer. Philos. Soc. (1869–1870) 11(81): 151–152.

Synonyms: *Dipsas biscutata latifascia* W.C.H. Peters, 1870a, *Trimorphodon upsilon* Cope, 1870, *Trimorphodon collaris* Cope, 1875a, *Trimorphodon forbesi* H.M. Smith, 1941o, and *Trimorphodon fasciolata* H.M. Smith, 1941o.
Type: Holotype, USNM 30338 (formerly SIM 236), a 236 mm specimen (A.L.J.F. Sumichrast, 1855–1870).
Type locality: "western part of the Isthmus of Tehuantepec, Mexico," (in error *fide* McDiarmid & Scott, 1970: 29). Designated as near Quiotepec [= Coyotepec, cen. Oaxaca State, S Mexico, 16°57'N, 96°42'W, elevation 1530 m], between Tehuacán and Oaxaca, Oaxaca State, Mexico *fide* Sumichrast (1892: 44).
Distribution: Mexico (Aguascalientes, ext. SW Chihuahua, Colima, Distrito Federal, Durango, Guanajuato, Guerrero, Hidalgo, Jalisco, México, Michoacán, Morelos, Nayarit, Nuevo León, Oaxaca, Puebla, Querétaro, San Luis Potosí, Sinaloa, Sonora, Tamaulipas, cen. Veracruz, Zacatecas), 50–2600 m.
Sources: E.H. Taylor, 1939a, Davis & Dixon, 1957, McDiarmid & Scott, 1970, N.J. Scott & McDiarmid, 1984c, Benítez-Gálvez, 1997, Dundee & Liner, 1997, Auth et al., 2000, McCranie & Wilson, 2001b, Lemos-Espinal et al., 2004a–b, H.M. Smith et al., 2005 and Lemos-Espinal & Smith, 2007a.
Remarks: Type locality listed as Tuiatepec, Mexico *fide* USNM catalogue.

7. *Trimorphodon vilkinsonii* Cope, 1886b. Proc. Amer. Philos. Soc. (1885) 23(122): 285–286.

Synonym: *Trimorphodon wilkinsonii* Cope, 1887c (*nomen emendatum*).
Type: Holotype, USNM 14268, a 272 mm male (E. Wilkinson).
Type locality: "City of Chihuahua" [= vicinity of Chihuahua, Chihuahua State, NW Mexico, 28°38'N, 106°04'W, elevation 1440 m].
Distribution: Southwestern USA (S New Mexico, SW Texas) and N Mexico (N Chihuahua), 900–1850 m.
Sources: Gehlbach, 1971, Degenhardt et al., 1996, Werler & Dixon, 2000, LaDuc & Johnson, 2003 and Lemos-Espinal & Smth, 2007a.
Remarks: Probably occurs in NW Coahuila, Mexico *fide* Lemos-Espinal & Smith (2007a: 377).

TROPIDECHIS A.C.L.G. Günther, 1863c (Elapidae)

Synonyms: *Trophidechis* – De Vis, 1911 (*nomen incorrectum*), *Tropidechia* – Maass-Berlin, 1933 (*nomen incorrectum*), and *Tropedechis* – Boquet, 1948 (*nomen incorrectum*).
Type species: *Hoplocephalus carinatus* Krefft, 1863.
Distribution: Eastern Australia.
Sources: Beard, 1979, Cogger et al., 1983a, Hutchinson, 1990, Cogger, 1992, David & Ineich, 1999, Hoser, 2003c, 2012e, Sanders et al., 2008 and Zaher et al., 2009.

1. *Tropidechis carinatus* (Krefft, 1863). Proc. Zool. Soc. London 31(1): 86, 3 figs. (*Hoplocephalus carinatus*)

Synonyms: *Tropidechis carinata* – A.C.L.G. Günther, 1863c, and *Tropidechis sadlieri* Hoser, 2003c (*nomen illegitimum*).
Type: Holotype, a 965 mm specimen, (J.J. Wilcox), lost *fide* Cogger et al. (1983: 237).
Type locality: "near Grafton, in the Clarence River District" [= vicinity of Grafton, NE New South Wales, Australia, 29°42'S, 152°56'E, elevation NSL].
Distribution: Eastern Australia (ext. NE New South Wales, ext. SE Queensland), NSL–1395 m.
Sources: Shine & Charles, 1982 and Covacevic & Couoper, 1991.

TROPIDOCLONION Cope, 1860d (Natricidae)

Synonyms: *Microps* Hallowell, 1856c (*nomen praeoccupatum*), *Tropidoclonium* Cope, 1864d (*nomen emendatum*), *Tropidoclonio* – A.H. Wright & Wright, 1952 (*nomen incorrectum*), and *Tropidocloniom* – Marx & Rabb, 1972 (*nomen incorrectum*).
Type species: *Microps lineatus* Hallowell, 1856c.
Distribution: North and central USA
Fossil records: Upper Miocene to upper Pleistocene of USA. Fossils unassigned to species include upper Miocene (Clarendonian) of USA (Nebraska).
Sources: Bocourt, 1892a, Ramsey, 1953, P.W. Smith & Smith, 1963, Ernst & Barbour, 1989, Conant & Collins,

1991, H.M. Smith & Chiszar, 1994, Degenhardt et al., 1996, Fitch, 1999, Holman, 1984c, 2000a, Werler & Dixon, 2000, Alfaro & Arnold, 2001, Ernst & Ernst, 2003, Zaher et al., 2009 and Parmley & Hunter, 2010.

1. *Tropidoclonion lineatum* (Hallowell, 1856c). Proc. Acad. Nat. Sci. Philadelphia 8(5): 241. (*Microps lineatus*)

Synonyms: *Tropidoclonion lineatum iowae* Call, 1891, *Tropidoclonion lineatum annectens* Ramsey, 1953, *Tropidoclonion lineatum texanum* Ramsey, 1953, and *Tropidoclonion lineatum mertensi* H.M. Smith, 1965.
Type: Holotype, ANSP 5922, a 230 mm specimen (W.A. Hammond, 1847–1856).
Type locality: "Kansas" [USA]. Restricted to vicinity of Kansas City, Kansas, USA *fide* K.P. Schmidt (1953a: 176) and to the vicinity of Fort Leavenworth, Kansas, USA *fide* L.W. Ramsay (1953: 9).
Distribution: Central USA (E Colorado, cen. Illinois, Iowa, Kansas, ext. SW Minnesota, Missouri, E Nebraska, E New Mexico, Oklahoma, SE South Dakota, Texas), NSL–2015 m.
Fossil records: Lower/middle Pleistocene (Irvingtonian I) of USA (Texas), middle/upper Pleistocene (Irvingtonian II) of USA (Texas), and upper Pleistocene (Rancholabrean I, II) of USA (Kansas, Texas).

TROPIDODIPSAS A.C.L.G. Günther, 1858 (Dipsadidae)

Synonyms: *Galedon* Jan, 1863b, *Tropidogeophis* F. Müller, 1878a, *Dipeltophis* Cope, 1887c, *Geatractus* Dugès, 1898a, *Tropidodipsa* – Briceño-Rossi, 1934 (*nomen incorrectum*), *Exelencophis* H.M. Smith, 1942b, and *Excelencophis* – Obst, Richter & Jacob, 1984 (*nomen incorrectum*).
Type species: *Tropidodipsas fasciata* A.C.L.G. Günther, 1858.
Distribution: Mesoamerica.
Sources: Cadle, 1984b, 2007, Kofron, 1980, 1985a, 1987, 1988b, Wallach, 1995b, Harvey et al., 2008 and Zaher et al., 2009.

T

1. *Tropidodipsas annulifera* Boulenger, 1894a. Cat. Snakes Brit. Mus. 2: 297, pl. 14, fig. 1.

Synonyms: *Geophis tecpanecus* Dugès, 1898a–b, *Tantilla nelsoni* Slevin, 1926, and *Tropidodipsas malacodryas* Shannon & Humphrey, 1959b.
Type: Holotype, BMNH 1946.1.6.44, a 430 mm male (Zool. Soc. London).
Type locality: Unknown. Designated as W Mexico *fide* N.J. Scott (1967: 283).
Distribution: Western Mexico (Colima, Guerrero, Jalisco, Michoacán, Nayarit, Sinaloa, María Madre Is.), NSL–2000 m.
Sources: H.M. Smith& Taylor, 1945, H. Campbell & Simmons, 1962, Greer, 1965, N.J. Scott, 1967, Hardy & McDiarmid, 1969 and Reyes-Velasco et al., 2008.

2. *Tropidodipsas fasciata* A.C.L.G. Günther, 1858. Cat. Colub. Snakes Brit. Mus.: 181.

Synonyms: *Leptognathus subannulatus* F. Müller, 1887, and *Tropidodipsas guerreroensis* E.H. Taylor, 1939.
Type: Lectotype, BMNH 1946.1.23.66, a 610 mm female (Zool. Soc. London), designated by A.C.L.G. Günther (1894: 139).
Type locality: "Central America," (in error) via lectotype selection. Unknown *fide* Boulenger (1894a: 295). Restricted to Chichén Itzá, Yucatán, Mexico *fide* H.M. Smith & Taylor (1950a: 352).
Distribution: Eastern Mexico (Campeche, Chiapas, Guerrero, Nuevo León, Oaxaca, Quintana Roo, San Luis Potosí, Tamaulipas, Veracruz, Yucatán) and Guatemala, NSL–2000 m.
Sources: Kofron, 1987, J.C. Lee, 1996, Auth et al., 2000 and Farr et al., 2009.

3. *Tropidodipsas fischeri* Boulenger, 1894a. Cat. Snakes Brit. Mus. 2: 296. (*nomen substitutum*)

Synonyms: *Virginia fasciata* J.G. Fischer, 1885b (*nomen praeoccupatum*), *Tropidoclonion annulatum* Bocourt, 1892a (*nomen praeoccupatum*), and *Tropidodipsas kidderi* L.C. Stuart,1942.
Types: Syntypes (2), BMNH 1946.1.1.81 (formerly SMNS 2454b), a 540 mm male (F.C. Sarg, 1867–1894), and SMNS 2454a, the latter destroyed 25 Aug. 1940–19 April 1945 during World War II.
Type locality: "Guatemala." Restricted (by implication) to Tecpam, Guatemala *fide* Dunn & Saxe (1951: 61).
Distribution: Mesoamerica. Southern Mexico (Chiapas, Oaxaca), S Guatemala, W El Salvador (Santa Ana) and SW Honduras (Intibucá, Ocotepeque), 1000–3800 m.
Sources: Kofron, 1985b, L.D. Wilson & Meyer, 1985, Casas-Andreu et al., 1996, G. Köhler et al., 2006 and McCranie, 2011a.
Remarks: Type locality restriction of Volcán Atitlán, Sololá Dept., Guatemala *fide* H.M. Smith & Taylor (1950a: 319) rejected *fide* Dunn & Saxe (1951: 60).

4. *Tropidodipsas philippii* (Jan, 1863b). Elenco Sist. Ofidi: 101. (*Leptognathus philippii*)

Synonyms: *Leptognathus albocinctus* J.G. Fischer, 1885b, *Tropidodipsas occidentala* Oliver, 1937, and *Tropidodipsas freiae* Shannon & Humphrey, 1959b.
Types: Syntypes (2), MSNM and ZMH, both destroyed in 1943 during World War II.
Type locality: "Chili" [= Chile] (in error) and "Mazatlan" [= Mazatlan, S Sinaloa State, NW Mexico, 23°14’N, 106°25’W, elevation 10 m].

Distribution: Western Mexico (Jalisco, W Michoacán, Nayarit, W Oaxaca, Sinaloa), NSL–1100 m.
Sources: N.J. Scott, 1962, Hardy & McDiarmid, 1969, Kofron, 1987 and García & Ceballos, 1994.

5. *Tropidodipsas repleta* H.M. Smith, Lemos-Espinal, Hartman & Chiszar, 2005. Bull. Maryland Herp. Soc. 41(1): 39–40.

Type: Holotype, UBIPRO 11635, a 383 mm male (J.A. Lemos-Espinal & D. Hartman, 29 Sept. 2003).
Type locality: "km 236.2 hwy 16 Chihuahua-Hermosillo in Sonora (28°26'12.5"N, 109°10'5.7"W), 1643 m."
Distribution: Northwestern Mexico (SW Chihuahua, SE Sonora), 1500–1645 m.
Sources: H.M. Smith & Lemos-Espinal, 2006c and Lemos-Espinal & Smith, 2007a.

6. *Tropidodipsas sartorii* Cope, 1863b. Proc. Acad. Nat. Sci. Philadelphia 15(3): 100.

Synonyms: *Leptognathus dumerili* Jan, 1863b, *Galedon annularis* Jan, 1863b, *Geophis annulatus* W.C.H. Peters, 1870b, *Leptognathus leucostomus* Bocourt, 1884, *Leptognathus semicinctus* Bocourt, 1884, *Leptognathus sexscutatus* Bocourt, 1884, *Leptognathus bernoullii* F. Müller, 1887, *Leptognathus cuculliceps* F. Müller, 1887, and *Tropidodipsas macdougalli* H.M. Smith, 1943c.
Type: Holotype, USNM (formerly SIM 20), a 1422 mm specimen (C. Sartorius), lost *fide* H.M. Smith & Taylor (1945: 152).
Type locality: "Mirador, Vera Cruz" [= Mirador, Veracruz, E Mexico, 20°57'N, 97°27'W, elevation 35 m].
Distribution: Mesoamerica. Eastern Mexico (Campeche, Chiapas, Hidalgo, Nuevo León, Oaxaca, Puebla, Quintana Roo, Querétaro, San Luis Potosí, Tabasco, Tamaulipas, Veracruz, Yucatán), Belize (Cayo, Corozal, Orange Walk, Stann Creek, Toledo), Guatemala (Petén), El Salvador (La Libertad, Morazán, San Salvador, Santa Ana), Honduras (Atlántida, Comayagua, Copán, Cortés, Gracias a Dios, Santa Bárbara, Yoro), Nicaragua (Atlántico Norte, Managua) and NW Costa Rica (N Guanacaste), NSL–2440 m.
Sources: Lara & Flores Villeto, 1978, Hidalgo, 1981a, L.D. Wilson & Meyer, 1985, Casas-Andreu et al., 1996, J.C. Lee, 1996, 2000, J.A. Campbell, 1998b, G. Köhler, 1999b, Auth et al., 2000, Marineros, 2000, Stafford & Meyer, 2000, Solórzano, 2004, G. Köhler et al., 2006, McCranie, 2006, 2011a and Travers et al., 2011.

7. *Tropidodipsas zweifeli* Liner & Wilson, 1970. Copeia 1970(4): 787. (*nomen susbstitutum*)

Synonym: *Chersodromus annulatus* Zweifel, 1954a (*nomen praeoccupatum*).
Type: Holotype, MVZ 45030, a 477 mm male (W.W. Brown, Aug. 1942–Aug. 1943).
Type locality: "near Chilpancingo, Guerrero, México" [= vicinity of Chilpancingo, Guerrero State, S Mexico, 17°33'N, 99°30'W, elevation 1260 m].
Distribution: Southern Mexico (Guerrero, Morelos), 1020–1800 m.
Source: Zweifel, 1954a.

TROPIDODRYAS Fitzinger, 1843 (Xenodontidae)

Synonyms: *Galeophis* Berthold, 1859, *Geleophis* Berthold, 1859 (*nomen incorrectum*), *Teleolepis* Cope, 1870, and *Teleolapsis* – Osborn, 1930 (*nomen incorrectum*).
Type species: *Herpetodryas serra* Schlegel, 1837.
Distribution: Southeastern Brazil.
Sources: R.A. Thomas & Dixon, 1977, Cicchi et al., 2007, Zaher et al., 2009 and Vidal et al., 2010.
Remarks: Previously a synonym of *Philodryas*.

1. *Tropidodryas serra* (Schlegel, 1837). Essai Phys. Serp. 1: 150–151, 2: 180–181, pl. 7, figs. 1–2. (*Herpetodryas serra*)

Synonyms: *Geleophis jani* – Berthold, 1859 (*nomen incorrectum*), *Galeophis jani* Berthold, 1859, and *Philodryas serra laevis* Jan, 1863b (*nomen nudum*).
Type: Lectotype, RMNH 624, an adult female (G.H. von Langsdorff, 1822–1828), designated by R.A. Thomas & Dixon (1977: 7).
Type locality: "Brésil" [= Brazil] via lectotype selection.
Distribution: Southeastern Brazil (Bahia, Espírito Santo, Minas Gerais, Paraná, Rio de Janeiro, Santa Catarina, São Paulo, Cardoso and Santo Amaro Is.), NSL–100 m.
Sources: Argôlo, 1999b and Marques et al., 2001.
Remarks: RMNH catalogue cards indicate the collector of the lectotype to be H. Boie.

2. *Tropidodryas striaticeps* (Cope, 1870). Proc. Amer. Philos. Soc. (1869–1870) 11(81): 153–154. (*Teleolepis striaticeps*)

Synonym: *Philodryas pseudo-serra* Amaral, 1939a (*nomen incorrigendum*).
Type: Holotype, MCZ 2909, a 295–300 mm female (G. Sceva [Thayer Exped.], 1864–1865).
Type locality: "Brazil."
Distribution: Southeastern Brazil (Bahia, Espírito Santo, Minas Gerais, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo, Cardoso and Santo Amaro Is.), 235–1050 m.
Sources: Barbour & Loveridge, 1929, Argôlo, 1999c, Freitas, 1999, Hofstadler-Deiques et al., 2004, Hamdan & Lira-da-Silva, 2007 and Guedes & Marques, 2011.
Remarks: Holotype erroneously listed as MCZ 909 *fide* Cope (1870: 154).

TROPIDOLAEMUS Wagler, 1830 (Viperidae)

Synonyms: *Tropidolesmus* – A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrectum), Tropidolepius* – Chenu & Desmarest, 1857 *(nomen incorrectum), Tropidolamus* – Cope, 1862c *(nomen incorrectum), Tropidolemus* – Senna, 1886 *(nomen incorrectum),* and *Tropidolenus* – Senna, 1886 *(nomen incorrectum).*

Type species: *Cophias wagleri* H. Boie *in* F. Boie, 1827.

Distribution: India, Malay Peninsula and East Indies.

Sources: Maslin, 1942, Brattstrom, 1964, Leviton, 1964d, E.H. Taylor,1965, W. Burger, 1971, Hoge & Romano-Hoge, 1981a, Tweedie, 1983, K.F.L. Lim & Lee, 1989, Maes, 1989, M.J. Cox, 1991b, Gaulke, 1994b, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Malhotra & Thorpe, 2000, Ziegler et al., 2001, Gumprecht et al., 2004. Koch et al., 2007, Vogel et al., 2007 and Hoser, 2012d.

Remarks: At least two more revisions of the genus in progress *fide* Vogel et al. (*in litt.*).

1. *Tropidolaemus huttoni* (M.A. Smith, 1949). J. Bombay Nat. Hist. Soc. 48(3): 596. (*Trimeresurus huttoni*)

Synonym: *Trimeresurus huttoni* Hutton, 1949 (*nomen nudum*).

Type: Holotype, BMNH 1948.1.8.75, a 136–138 mm specimen (A.F. Hutton, 1946–1948).

Type locality: "High Wavy Mountains, Madura District, South India, altitude 5,200 feet."

Distribution: Southwestern India (Maharashtra, Tamil Nadu), 1585 m.

Sources: David & Vogel, 1998, Boundy, 2008 and Hutton & David, 2009.

Remarks: Photographs of holotype in David & Vogel (1998: figs. 1–3).

2. *Tropidolaemus laticinctus* Koch, Gumprecht & Melaun, 2007. Zootaxa (1446): 3–17, figs. 1–5, 6a, 7a.

Type: Holotype, BMNH 1896.12.9.80, a 416 mm male (P. Sarasin & F. Sarasin, 1893–1896).

Type locality: "between L. Posso and Tomini Bay, Celebes" [= between Lake Poso and Tomini Bay, North Sulawesi Prov., E Indonesia].

Distribution: Eastern Indonesia (Sulawesi), NSL–100 m.

Sources: Koch, 2008a, 2012.

T

3. *Tropidolaemus philippensis* (Gray, 1842b). Zool. Misc. 2(Mar.): 48. (*Trimesurus philippensis*)

Synonyms: *Tropidolaemus hombroni* Guichenot *in* Jacquinot & Guichenot, 1853, *Tropidolaemus hombronii* A.-M.-C. Duméril, 1853 *(nomen nudum), Tropidolaemus philippinensis* W.C.H. Peters, 1861 *(nomen emendatum), Tropidolaemus schlegeli* Theobald, 1868b *(nomen nudum),* and *Bothrops philippinensis* Maslin, 1942 *(nomen emendatum).*

Type: Holotype, BMNH 1946.1.17.67 (H. Cuming, 1836–1840).

Type locality: "Philippine Islands."

Distribution: Southern Philippines (Mindanao), 195 m.

Remarks: Photographs of holotype of *T. philippensis* in Vogel et al. (2007: figs. 25–26) and photographs of holotype of *T. hombroni* in Vogel et al. (2007: figs. 27–30).

4. *Tropidolaemus subannulatus* (Gray, 1842b). Zool. Misc. 2(Mar.): 48. (*Trimesurus subannulatus*)

Synonyms: *Trigonocephalus wagleri celebensis* Gray, 1849a, *Tropidolaemus schlegelii* Bleeker, 1859b (*nomen nudum), Trimeresurus subannulatus immaculatus* W.C.H. Peters, 1872d, and *Trimeresurus wagleri alboviridis* E.H. Taylor, 1917.

Types: Syntypes (2), BMNH 1946.1.19.32–33, a female and juvenile (H. Cuming, 1836–1840).

Type locality: "The Philippines."

Distribution: East Indies. East Malaysia (Sabah, Sarawak), Brunei, cen. Indonesia (Belitung, Buton, Kalimantan, Sangihe Arch., Sulawesi) and Philippines (Balabac, Basilan, Bohol, Dinagat, Jolo, Leyte, Luzon, Mindanao, Negros, Palawan, Panay, Samar, Sibutu, Tumindao), NSL–100 m.

Sources: Card, 1994, Vogel, 2006, Kuch et al., 2007, I. Das, 2010, 2012 and Koch, 2012.

Remarks: Photographs of syntypes in Vogel et al. (2007: figs. 12–16). This species is a complex under study *fide* Kuch et al., (2007: 2).

5. *Tropidolaemus wagleri* (H. Boie *in* F. Boie, 1827). Isis von Oken 20(6): 561. (*Cophias wagleri*)

Synonyms: *Cophias wagleri* H. Boie, 1826 (*nomen nudum*), *Trimesurus maculatus* Gray, 1842b, *Trimeresurus sumatranus* Gray, 1842b, *Trigonocephalus wagleri sumatrenis* Gray, 1849a, and *Trimesurus formosus* Gray, 1849a,

Type: Neotype, MNHN 5784 (formerly MNHN 1879.708), an adult female (Rochet), designated by Vogel et al. (2007: 8).

Type locality: "Deli: rivière de Bedagei River (about 3°30'N, 99°13'E), Sumatra Barat Province, Sumatra, Indonesia" via neotype selection.

Distribution: Southeast Asia and W Indonesia. Thailand (Nakhon Si Tammarat, Narathiwat, Pattani, Phang Nga, Surat Thani, Yala), Vietnam (Minh Hai, Song Be), West Malaysia (Pahang, Perak, Perlis, Pinang, Selangor, Aceh Is.), Singapore and W Indonesia (Bangka, Durian, Mentawai Arch., Natuna, Riau Arch., Sumatra), NSL–1300 m.

Sources: Card, 1994, Inger & Tan, 1996, M.J. Cox et al., 1998, Chan-ard et al., 1999, Ferner et al., 2001,

Malkmus et al., 2002, Orlov et al., 2003, Gumprecht & Toenjes, 2007, V.S. Nguyen et al., 2009, I. Das, 2010, 2012 and Grismer, 2011.

Remarks: Original syntypes based on specimen figured in Seba (1735, pl. 68, fig. 4) and RMNH 1518 and RMNH 1522 (2 specimens) and perhaps RMNH 5667, subsequently described and illustrated by Schlegel, 1837 *fide* McDiarmid et al. (1999: 351). Photographs of neotype in Vogel et al. (2007: figs. 4–7).

TROPIDONOPHIS Jan, 1863b (Natricidae)

Synonyms: *Styporhynchus* W.C.H. Peters, 1863d, *Katophis* Macleay, 1877, *Macropophis* Boulenger, 1893a, *Styporhinchus* – Capocaccia, 1961 *(nomen incorrectum), Alanbrygelus* Hoser, 2012ag *(nomen illegitimum), Desburkeus* Hoser, 2012ag *(nomen illegitimum), Kirnerea* Hoser, 2012ag *(nomen illegitimum),* and *Oxynatrix* Hoser, 2012ag *(nomen illegitimum).*

Type species: *Tropidonotus picturatus* Schlegel, 1837.

Distribution: East Indies and Australasia.

Sources: McDowell, 1961, Malnate & Underwood, 1988, Kraus & Allison, 2004a and Zaher et al., 2009.

1. *Tropidonophis aenigmaticus* Malnate & Underwood, 1988. Proc. Acad. Nat. Sci. Philadelphia 140(1): 165–166, fig. 30.

Type: Holotype, AMNH 76633, a 506 mm male.

Type locality: "between Agamoia and Ailuluai, Fergusson Island, D'Entrecasteaux Islands, Milne Bay District, Papua New Guinea."

Distribution: Papua New Guinea (E Eastern Highlands, Milne Bay, Morobe, Fergusson, Goodenough, Misima, Normanby and Trobriand Is.), 700–1705 m.

Source: O'Shea, 1996.

Remarks: Holotype listed as AMNH 76638 in Malnate & Underwood (1988: Fig. 30).

2. *Tropidonophis dahlii* (F. Werner, 1899b). Zool. Anz. 22(596): 373. (*Tropidonotus* [*Macropophis*] *dahlii*)

Synonym: *Tropidonotus melanocephalus* F. Werner, 1925.

Type: Lectotype, NMW 23488, an 820–882 female (K.T.F. Dahl, 1896–1897), designated by Malnate & Underwood (1988: 169).

Type locality: "Herbertshöhe, Neu-Pommern [New Britain]" [= Kokopo, N East New Britain, Bismarck Arch., NE Papua New Guinea, 4°21'S, 152°16'E, elevation 50 m] via lectotype selection.

Distribution: Northeastern Papua New Guinea (East New Britain, West New Britain, New Britain Is.), 45–1070 m.

Source: O'Shea, 1996.

Remarks: F. Werner's (1900c: 85) report of holotype in ZMB erroneous *fide* G. Peters *in* Malnate & Underwood (1988: 169).

3. *Tropidonophis dendrophiops* (A.C.L.G. Günther, 1883). Ann. Mag. Nat. Hist. (5) 11(62): 136–137, 1 fig. (*Tropidonotus dendrophiops*)

Type: Holotype, BMNH 1946.1.15.41 (formerly BMNH 1882.11.25.13), a 914 mm female (H.M.S. Challenger Voy. [Stn. 201 or 212], 23–25 Oct. 1874 or 30 Jan.–5 Feb. 1875).

Type locality: "Zamboanga (Philippine Islands)" [= Zamboanga, SW Mindanao Is., Philippines, 7°01'N, 122°11'E, elevation 10 m].

Distribution: Philippines (Basilan, Bohol, Camiguin, Dinagat, Leyte, Mindanao, Samar), NSL–825 m.

Sources: Alcala, 1986, Ross & Lazell, 1991 and B.E. Smith, 1993.

Remarks: Possibly occurs on Luzon, Philippines *fide* Iskandar & Colijn (2001: 106).

4. *Tropidonophis dolasii* Kraus & Allison, 2004a. Proc. Biol. Soc. Washington 117(3): 303–306, figs. 1a–b, 2.

Type: Holotype, BPBM 16539 (formerly FK 6118), an 1145 mm female (D. Salepuna, 23 Aug. 2002).

Type locality: "E slope of Oya Tabu (Mt. Kilkerran), 9.4555°S, 150.7857°E, 1090 m, Fergusson Island, Milne Bay Province, Papua New Guinea."

Distribution: Southeastern Papua New Guinea (Milne Bay: Fergusson and Goodenough Is.), 900–1090 m.

5. *Tropidonophis doriae* (Boulenger, 1898i). Ann. Mus. Civ. Stor. Nat. Genova (2) 18(38): 704. (*Tropidonotus doriae*)

Synonym: *Tropidonophis doriae desburkei* Hoser, 2012ag *(nomen illegitimum).*

Types: Syntypes (18), BMNH 1946.1.12.84 (formerly BMNH 1897.12.10.116), a female [Moroka], 1946.1.12.61–62 (formerly BMNH 1897.12.10.117–118), two males [Haveri], MSNG CE 36101a–c [Haveri], and MSNTO 946a–b (formerly MZUT 2561a–b), longest syntype 990 mm (L. Loria, 1889–1892), location of other syntypes unknown.

Type locality: "Haveri, Moroka, Bartholomew Distribution, 2300 feet, South-Eastern British New Guinea" [= Haveri, 700 m, and Moroka, 1280 m, Bartholomew Mtns., Central Prov., SE Papua New Guinea]. Restricted to Haveri, SE Papua New Guinea *fide* Haas (1950: 539).

Distribution: New Guinea. Eastern Indonesia (Papua, Aru Is.: Kobroor) and Papua New Guinea (Central, Gulf, Morobe, Western, Western Highlands, West Sepik), NSL–1300 m.

Sources: F. Parker, 1982 and O'Shea, 1996.

Remarks: Malnate & Underwood (1988: 102) listed just three syntypes from BMNH and erroneously cited collection date as 1893. Eight syntypes are known; perhaps Boulenger's (1898i: 704) listing of 18 was a typo for 8?

6. *Tropidonophis elongatus* (Jan, 1865c). Arch. Zool. Anat. Fis. 3(2): 228. (*Tropidonotus picturatus elongatus*)

Synonyms: *Tropidonotus picturatus elongatus* Jan, 1863b (*nomen nudum*), *Coryphodon carinatus* Bleeker *in* Boulenger, 1893a *(nomen ineditum)*, and *Tropidonophis alanbrygeli* Hoser, 2012ag *(nomen illegitimum), Tropidonophis alanbrygeli sammywatsonae* Hoser, 2012ag *(nomen illegitimum),* and *Tropidonophis smythi* Hoser, 2012ag *(nomen illegitimum).*

Type: Holotype, RMNH 1085, a 1651 mm female (E.A. Forsten, 1838–1843).

Type locality: "Molucche" [= Maluku, E Indonesia]. Restricted to Ambon, *fide* Malnate & Underwood (1988: 96).

Distribution: Eastern Indonesia (Papua, Ambon, Biak, Halmabera, Noemfor, Salawati, Seram), 90–500 m.

Source: O'Shea, 1996.

7. *Tropidonophis halmahericus* (Boettger, 1895a). Zool. Anz. 18(479): 130–131. (*Tropidonotus halmahericus*)

Type: Lectotype, SMF 17750 (formerly SMF-B 7264, 1a), an 1102–1294 mm male (W. Kükenthal, 1894), designated by Mertens (1922: 179).

Type locality: "Soa Konorra, Nord-Halmaheira, Molukken" [= Soa Konora, N Halmahera, E Indonesia].

Distribution: Eastern Indonesia (Maluku: Batjan, Halmahera, Ternate).

Remarks: Lectotype listed as SMF-B 7264, 1a *fide* SMF catalogue and Mertens (1922: 179) but SMF-B 7264, 1b *fide* Boettger (1898: 28). SMF-B 7264, 1b is paralectotype SMF 17751.

T

8. *Tropidonophis hypomelas* (A.C.L.G. Günther, 1877). Proc. Zool. Soc. London 45(1): 130–131, fig. 1. (*Tropidonotus hypomelas*)

Type: Holotype, BMNH 1946.1.7.59 (formerly BMNH 1872.2.24.24), a 813 mm male (G. Brown).

Type locality: "Duke of York Island" [= Bismarck Arch., NE Papua New Guinea].

Distribution: Papua New Guinea (East New Britain, New Ireland, Umboi, West New Britain, Didao of Yoda Is.), 950 m.

Source: O'Shea, 1996.

9. *Tropidonophis mairii* (Gray *in* Grey, 1841b). J. Two Exped. Australia 2: 442. (*Tropidonotus mairii*)

Synonyms: *Tropidonotus australis* Gray, 1842c, *Tropidonotus semicinctus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Kalophis plumbea* Macleay, 1877, *Tropidonotus angusticeps* Macleay, 1884a, *Tropidonotus ater* Macleay, 1885b, and *Tropidonophis mairii brongersmai* Malnate & Underwood, 1988.

Type: Neotype, BMNH 1946.1.13.52, a 605 mm male (J. Gilbert, 1838–1841), designated by Malnate & Underwood (1988: 110).

Type locality: "Port Essington, Northern Territory, Australia" [= ruins at tip of Cobourg Peninsula, N Northern Territory, N Australia, ca. 11°09'N, 132°00'E, elevation NSL] via neotype selection.

Distribution: Austro-Papua. Eastern Indonesia (SE Papua), Papua New Guinea (Central, Western) and N Australia (ext. NE New South Wales, N Northern Territory, N and E Queensland, ext. N Western Australia, Bathurst, Croker, Groote Eylandt, Melville, Milingimbi, Mornington, Prince of Wales and Wessel Marchinbar Is.), NSL–1500 m.

Sources: F. Parker, 1982, Cogger et al., 1983a, Hoser, 1989, Shea, 1990, Cogger, 1992, O'Shea, 1996, Greer, 1997, Storr et al., 2002 and Swan et al., 2004.

Remarks: Holotype (FPM 39) destroyed during World War II *fide* Malnate & Underwood (1988: 110).

10. *Tropidonophis mcdowelli* Malnate & Underwood, 1988. Proc. Acad. Nat. Sci. Philadelphia 140(1): 142–145, fig. 23.

Type: Holotype, BMNH 1913.11.1.100, a 650 mm male (Wollaston Exped., 1910–1913).

Type locality: "Camp III, Otakwa River, Irian Jaya, 2500 feet (767 meters)" [E Indonesia].

Distribution: New Guinea. Eastern Indonesia (Papua) and Papua New Guinea (East Sepik, West Sepik), 580–1885 m.

Sources: O'Shea, 1996 and Kraus & Allison, 2006.

11. *Tropidonophis montanus* (Lidth de Jeude, 1911b). Nova Guinea (Zool.) 9(2): 271. (*Tropidonotus montanus*)

Synonym: *Natrix polytaenia* Laurent, 1948.

Type: Holotype, RMNH 4704 (formerly RMNH 323), an 800 mm male (H.A. Lorentz [First Dutch New Guinea Exped.], 14 Oct. 1909).

Type locality: "Biwak V. (1360 m.), Nova Guinea" [= Bivak V., Hellwig Mtns., on Lorentz River, S Papua Prov., E Indonesia, ca. 4°32'S, 138°41'E, elevation 1360 m].

Distribution: Eastern Indonesia (Papua, Biak, Numfor, Salawati), 1260–2200 m.

Sources: F. Parker, 1982, McDowell, 1984 and O'Shea, 1996.

12. *Tropidonophis multiscutellatus* (Brongersma, 1948a). Proc. Kon. Ned. Akad. Wetensch. 51(3): 372–378. (*Natrix mairii multiscutellata*)

Synonym: *Tropidonophis multiscutellatus cottoni* Hoser, 2012ag *(nomen illegitimum).*
Type: Holotype, RMNH 8669, a male (H.A. Lorentz [Second Dutch New Guinea Exped.], 1909).
Type locality: "Alkmaar, Lorentz River, Dutch New Guinea" [= Camp Alkmaar, on Lorentz River, S Irian Jaya, E Indonesia, 4°40'S, 138°42'E, elevation 215 m].
Distribution: New Guinea. Eastern Indonesia (Papua, Batanta, Biak, Salawati) and Papua New Guinea (Central, Eastern Sepik, Gulf, Madang, Milne Bay, Morobe, Northern, Western Sepik, Western, Western Highlands, Karkar, Liki and Manam Is.), 15–1440 m.
Sources: Brongersma, 1948a, McDowell, 1984 and O'Shea, 1996.
Remarks: Malnate & Underwood (1988: 120) listed the reprint pagination for original description (p. 3).

13. *Tropidonophis negrosensis* (E.H. Taylor, 1917). Philippine J. Sci. 12D(6): 356–358, fig. 1. (*Natrix dendrophiops negrosensis*)

Type: Holotype, CM 2261 (formerly EHT 128), a 730 mm male (E.H. Taylor, Dec. 1915).
Type locality: "Canlaon Volcano, Occidental Negros P.I." [= Philippine Islands].
Distribution: Central Philippines (Cebu, Masbate, Mindoro, Negros, Panay, Pan de Azucar, Sicogen), NSL–1200 m.
Sources: Leviton, 1963b and Ferner et al., 2001.
Remarks: Holotype illustrated in Malnate & Underwood (1988: fig. 1).

14. *Tropidonophis novaeguineae* (Lidth de Jeude, 1911b). Nova Guinea (Zool.) 9(2): 271. (*Tropidonotus novaeguineae*) (*nomen corrigendum*)

Synonyms: *Tropidonotus novae-guineae* Lidth de Jeude, 1911b *(nomen incorrigendum), Natrix novaeguineae* – C.P.J. Haas *(nomen corrigendum),* and *Tropidonophis novaeguineae trioani* Hoser, 2012ag *(nomen illegitimum).*
Type: Holotype, RMNH 4702, a 600 mm female (H.A. Lorentz [Second New Guinea Exped.], 17 Dec. 1909).
Type locality: "Alkmaar, Nova Guinea" [= Camp Alkmaar, on Lorentz River, S Irian Jaya, E Indonesia, 4°40'S, 138°42'E, elevation 215 m].
Distribution: New Guinea. Eastern Indonesia (Papua, Misol) and Papua New Guinea (Central, Chimbu, Gulf, Western), 75–1065 m.
Sources: F. Parker, 1982 and O'Shea, 1996.

15. *Tropidonophis parkeri* Malnate & Underwood, 1988. Proc. Acad. Nat. Sci. Philadelphia 140(1): 161–162, fig. 28.

Type: Holotype, CAS 139588, a 504 mm male (F.S. Parker).
Type locality: "Wahgi River (specific collection site unknown), Eastern Highlands Province, Papua New Guinea," (partially in error). Corrected to Wahgi River, Western Highlands or Chimbu provinces *fide* F.S. Parker, *in litt.*
Distribution: Central Papua New Guinea (Chimbu, Western Highlands), 1065–2135 m.
Source: O'Shea, 1996.

16. *Tropidonophis picturatus* (Schlegel, 1837). Essai Phys. Serp. 2: 314–315, pl. 12, figs. 8–9. (*Tropidonotus picturatus*)

Synonym: *Tropidonophis picturatus pillotti* Hoser, 2012ag *(nomen illegitimum).*
Type: Lectotype, RMNH 1076, a female (S. Müller & H. Macklot, Aug. 1828), designated by Malnate & Underwood (1988: 135).
Type locality: "Lobo Bay, Netherlands New Guinea [Irain Jaya]" [E Indonesia] via lectotype selection.
Distribution: New Guinea. Eastern Indonesia (Papua, Misol, Salawati, Weigeau) and Papua New Guinea (Central, Chimbu, Milne Bay, Morobe, Western, West Sepik), 200–1545 m.
Sources: F. Parker, 1982 and O'Shea, 1996.

17. *Tropidonophis punctiventris* (Boettger, 1895a). Zool. Anz. 18(471–472): 129–130. (*Tropidonotus punctiventris*)

Type: Holotype, SMF 17195 (formerly SMF-B 7216a), a 342 mm male (W. Kükenthal, 1894).
Type locality: "Soa Konorra, Nord-Halmaheira, Molukken" [E Indonesia.].
Distribution: Eastern Indonesia (Maluku: N Halmahera). Known only from type locality.
Remarks: Holotype illustrated in Malnate & Underwood (1988: fig. 7).

18. *Tropidonophis statisticus* Malnate & Underwood, 1988. Proc. Acad. Nat. Sci. Philadelphia 140(1): 155–156, fig. 27.

Type: Holotype, MCZ 142422, a 514 mm male (F.S. Parker, 8 July 1964).
Type locality: "Orumba, Eastern Highlands Province, Papua New Guinea."
Distribution: New Guinea. Eastern Indonesia (SE Papua) and Papua New Guinea (Central, Eastern Highlands, East Sepik, Enga, Milne Bay, Morobe, Chimbu, Southern Highlands, Western, Western Highlands), 500–2135 m.

Sources: O'Shea, 1996 and Kraus & Allison, 2004.

19. *Tropidonophis truncatus* (W.C.H. Peters, 1863d). Mber. Königl. Akad. Wiss. Berlin 1863(10): 399–403. (*Styporhynchus truncatus*)

Types: Syntypes (2), ZMB 4883a–b, two females, longest syntype 425 mm (K.E. von Martens, March 1862–Dec. 1864).
Type locality: "der mitte der Insel Djololo" [= Dodinga, Jailolo, Halmahera Is., North Maluku State, Indonesia, 1°04'N, 127°28'E, elevation 15 m].
Distribution: Eastern Indonesia (Papua, Batjan, Halmahera, Ternate, Salawati), NSL–15 m.
Remarks: Syntype illustrated in Malnate & Underwood (1988: fig. 6).

TROPIDOPHIS Bibron, 1840 *in* Ramón de la Sagra, 1838–1843 (Tropidophiidae)

Synonyms: *Leionotus* Bibron *in* Ramón de la Sagra, 1840 *in* 1838–1843, *Ungalia* Gray, 1842a, *Erycopsis* Fitzinger, 1843, ? *Tropidophis* A.-M.-C. Duméril & Bibron, 1844, *Notophis* Hallowell, 1856b, *Notopholis* – J.T. Reinhardt & Lütken, 1862 *(nomen incorrectum), Lionotus* W.C.H. Peters, 1864b *(nomen emendatum), Ungualia* Cope, 1868c *(nomen emendatum), Leionothus* – Hoffmann, 1890 *(nomen incorrectum), Tripidophis* – Briceño-Rossi, 1934 *(nomen incorrectum), Trophidophis* – H.W. Parker, 1963 *(nomen incorrectum),* and *Tropilophis*– W.W. Tanner & Avery, 1982 *(nomen incorrectum).*
Type species: *Boa melanura* Schlegel, 1837.
Distribution: West Indies and N South America.
Fossil record: Pleistocene of Cayman Is. and USA (Florida).
Sources: Stull, 1928, Bailey, 1937c, Brongersma, 1951, A. Schwartz & Marsh, 1960, Stimson, 1969, A. Schwartz & Thomas, 1975, Hedges & Garrido, 1992b, 2002, Tolson & R.W. Henderson, 1993, Meylan, 1995, R.M. Burger, 1996, Rodríguez-Robles & Greene, 1996, Walls, 1998a, Hedges et al., 1999, McDiarmid et al., 1999, Holman, 2000b, Hedges, 2002, Rodríguez-Schettino, 2003, M.S.Y. Lee et al., 2007 and R.W. Henderson & Powell, 2009.

T

1. *Tropidophis battersbyi* Laurent, 1949. Bull. Inst. Roy. Sci. Nat. Belg. 25(9): 6–7, figs. 10–12.

Type: Holotype, IRSNB 2050 (formerly IG 3701 & IRSNB Reg. no. 739), a 347 mm male (de Ville, 20 Nov. 1875).
Type locality: "Equateur" [= Ecuador, or equatorial South America].
Distribution: Unknown, possibly Ecuador. Known only from holotype.
Source: Curcio et al., 2012.
Remarks: Photographs of holotype in Curcio et al. (2012: figs. 2a–b, 3a–d). Type locality probably Ecuador, through which the Equator extends.

2. *Tropidophis bucculentus* (Cope, 1868c). Proc. Acad. Nat. Sci. Philadelphia 20(2): 129. (*Ungalia pardalis bucculenta*)

Types: Syntypes (4), USNM 12377a–c (formerly SIM), a 635–655 mm female, 399 mm male and 342 mm male, and USNM 12370 (W.J. Rasin), the latter rotted and destroyed 9 April 1958 *fide* Powell (1999: 10).
Type locality: "Navassa Id" [= Navassa Is., West Indies, bet. 18°24'–25'N & 75°00'–02'W, elevation NSL–80 m].
Distribution: Navassa Island, < 80 m.
Sources: Bailey, 1937, R. Thomas, 1966c, Powell, 1999, 2002 and Hedges, 2002.
Remarks: ANSP 10281 was questionably considered a syntype *fide* Bailey (1937: 45) but it has no data and E.R. Dunn's label reads "probably the type of *sanctícrucis* Cope" plus the fourth of Cope's syntypes is more likely to have been USNM 12370. A valid species *fide* Powell (1999: 10); previously a subspecies of *T. melanurus*. Probably extinct *fide* Powell (1999: 11) and Hedges (2002: 88).

3. *Tropidophis canus* (Cope, 1868c). Proc. Acad. Nat. Sci. Philadelphia 20(2): 129. (*Ungalia cana*)

Types: Syntypes (6), USNM 7111a–e (formerly SIM) (T. Blain), and USNM 26763 (formerly SIM), longest syntype 349 mm.
Type locality: "Bahama Island of Inagua" [= Great Inagua Is., Bahamas, West Indies]. Designated as S side of Inagua *fide* Stimson (1969: 33).
Distribution: Bahamas (Great Inagua Is.).
Source: Tolson & R.W. Henderson, 1993.

4. *Tropidophis caymanensis* Battersby, 1938. Ann. Mag. Nat. Hist. (11) 1(5): 558–559. (*Tropidophis melanurus caymanensis*)

Type: Holotype, BMNH 1946.1.1.53 (formerly BMNH 1912.7.18.1), a 448 mm female (T.M. Savage).
Type locality: "Grand Cayman Island" [Cayman Islands, West Indies].
Distribution: Caymans (Grande Cayman and Little Cayman Is.).
Sources: R. Thomas, 1963 and Seidel & Franz, 1994.

5. *Tropidophis celiae* Hedges, Estrada & Diaz, 1999. Copeia 1999(3): 376–379, figs. 1–2.

Type: Holotype, MNHNCU 4474, a 385 mm female (A.R. Estrada & L.M. Diaz, 7 June 1996).
Type locality: "northern (coastal) side of Loma Canasi, at the mouth of Río Canasi, Santa Cruz del Norte

Municipality, La Habana Province, Cuba, 3 m elevation, 23°08'37"N, 81°46'40"W."
Distribution: Northwestern Cuba (Habana), NSL.
Source: Hedges et al., 2001.

6. *Tropidophis curtus* (S.W. Garman, 1887b). Proc. Amer. Philos. Soc. 24(126): 279. (*Ungualia curta*)

Synonyms: *Tropidophis pardalis androsi* Stull, 1928, and *Tropidophis pardalis barbouri* Bailey, 1937c.
Type: Holotype, MCZ 6114.
Type locality: "Cuba" [Greater Antilles] (in error *fide* Stull, 1928: 31).
Distribution: Bahamas (Andros, Bimini, Eleuthera, Eleuthera Cays, Exuma, Gun Cay, New Providence, South Bimini, Cat, Cay Sal, Long, New Providence, Ragged).
Source: Hedges, 2002.
Remarks: A. Schwartz & Thomas (1975: 192) reported a specimen (AMNH 2946) from Camagüey, Cuba, either a waif or support for S.W. Garman's type locality.

7. *Tropidophis feicki* A. Schwartz, 1957. Amer. Mus. Novit. (1839): 3–6, fig. 1 (upper).

Type: Holotype, AMNH 76224 (formerly JRF 1267), a 474 mm female (J.R. Feick, 20 Dec. 1956).
Type locality: "Cueva de los Indios, San Vicente, Pinar del Río Province, Cuba."
Distribution: Western Cuba (Habana, Mantanzas, Pinar del Río), NSL–125 m.
Sources: Hedges & Garrido, 1999 and J.C. Murphy & Schlager, 2003.
Remarks: Record from Granma Prov., Cuba needs confirmation *fide* A. Schwartz & Henderson (1991: 633).

8. *Tropidophis fuscus* Hedges & Garrido, 1992b. Copeia 1992(3): 820–823, figs. 1, 3 (middle).

Type: Holotype, MNHNCU 2705 (formerly SBH 190300), a 338 mm female (S.B. Hedges, 27 July 1989).
Type locality: "Minas Amores (21.7 km NW, 7.7 km SE Baracoa, by road), Guantánamo Province, Cuba, 76 m."
Distribution: Extreme E Cuba (NE Guantánamo), 75–700 m.
Sources: Fong, 2002, 2005.

9. *Tropidophis galacelidus* A. Schwartz & Garrido, 1975. Proc. Biol. Soc. Washington 88(9): 81–82. (*Tropidophis pilsbryi galacelidus*)

Type: Holotype, CZACC 4.3435 (formerly IZAC 4052), a 213 mm male (P. Alayo, 9 July 1973).
Type locality: "near Cafetal de Gaviña, Sierra de Trinidad, Las Villas Province, Cuba" [= SW Sancti Spíritus Prov., cen. Cuba].
Distribution: Central Cuba (S Sancti Spíritus), 500 m.
Sources: Hedges & Garrido, 2002 and Chamizo-Lara et al., 2005.
Remarks: A valid species *fide* Hedges & Garrido (2002: 160).

10. *Tropidophis grapiuna* Curcio, Sales-Nuñes, Suzart-Argôlo, Skuk & Rodrigues, 2012. Herpetol. Monogr. (26): 86–91, figs. 4a–b, 5a–h.

Type: Holotype, MNRJ 19593 (formerly CZGB 3820), a 324 mm female (J.R. Martins, 15 June 1995).
Type locality: "'Serra de Pedra Lascada', region of Itajuípe, state of Bahia, Brazil."
Distribution: Northeastern Brazil (Bahia), 725–750 m.

11. *Tropidophis greenwayi* T. Barbour & Shreve, 1936. Proc. New England Zool. Club 16: 2. (*Tropidophis pardalis greenwayi*)

Synonym: *Tropidophis greenwayi lanthanus* A. Schwartz, 1963.
Type: Holotype, MCZ 42051, a 359 mm male (G. Greenway, March 1936).
Type locality: "Ambergris Cay, Caicos Islands, Bahamas."
Distribution: Turks and Caicos (Ambergris Cay, Big Ambergris Cay, Long Cay, Middle Caicos, Middleton Cay, North Caicos, South Caicos), NSL.
Sources: A. Schwartz, 1963, Iverson, 1986, R. Burger, 1997 and Reynolds et al., 2010.
Remarks: Probably occurs on Providencia *fide* Iverson (1986: 192).

12. *Tropidophis haetianus* (Cope, 1879). Proc. Amer. Philos. Soc. 18(104): 273. (*Ungualia haetiana*)

Synonyms: *Tropidophis conjunctus* J.G. Fischer, 1888c, *Tropidophis haetianus hemerus* A. Schwartz, 1975, and *Tropidophis haetianus tiburonensis* A. Schwartz, 1975.
Types: Syntypes (3), USNM 10164, a 680–690 mm specimen (J.J. Brown) [Port-au-Prince], USNM 10169, ca. 400 mm specimen broken into several pieces (J.J. Brown) [Gonave], and USNM 10275, a 410 mm specimen (C.A. Fraser, 1878) [Puerto Plata].
Type locality: "Port-au-Prince and Gonave Island" [= Port-au-Prince and Gonave Is., Ouest Dept., SW Haiti] and "Puerto Plata, Santo Domingo" [= Dominican Republic].
Distribution: Haiti (Artibonite, Centre, Grande'Anse, Nord, Nord Ouest, Ouest, Sud, Sud-Est, Gonâve and Tortue Is.), Dominican Republic (Azua, Barahona, Dajabón, Distrito Nacional, Duarte, El Seibo, Espaillat, Hato Mayor, Independencia, La Altagracia, La Vega, María Trinidad Sánchez, Monseñor Nouel, Monte Cristi, Monte Plata, Pedernales, Puerto Plata, Salcedo, Samaná, San Cristóbal, San Juan, Santiago, Santiago Rodríguez) and E Cuba (Oriente), NSL–820 m.
Sources: A. Schwartz, 1975 and Hedges & Garrido, 2002.

Remarks: Stimson (1969: 35) and A. Schwartz (1975:308) listed only two syntypes (USNM 10164 & 10169).

13. *Tropidophis hardyi* A. Schwartz & Garrido, 1975. Proc. Biol. Soc. Washington 88(9): 86–87. (*Tropidophis nigriventris hardyi*)

Type: Holotype: USNM 138510, a 351 mm male (J.D. Hardy, 5–10 Sept. 1956).
Type locality: "10 mi (16 km) W Trinidad, Las Villas Province, Cuba" [= SW Sancti Spíritus Prov., cen. Cuba].
Distribution: Central Cuba (Cienfuegos, S Sancti Spíritus), NSL–90 m.
Source: Domínguez et al., 2006.
Remarks: A valid species *fide* Hedges & Garrido (2002: 160).

14. *Tropidophis hendersoni* Hedges & Garrido, 2002. J. Herp. 36(2): 158–159, fig. 1.

Type: Holotype, MCZ 47896, an 287 mm (svl) specimen (W.J. Clench & Alayo, 14 Aug. 1945).
Type locality: "Guarda la Vaca, Holguín Province, Cuba, 21°07'35"N, 77°49'55"W, probably at sea level."
Distribution: Eastern Cuba (N Holguín), NSL. Known only from type locality.

15. *Tropidophis jamaicensis* Stull, 1928. Occ. Pap. Mus. Zool. Univ. Michigan (195): 12–13. (*Tropidophis maculatus jamaicensis*)

Type: Holotype, MCZ 12090, a female (M. Graham & T. Barbour, 1917).
Type locality: "Kingston, Jamaica" [= Kingston, St. Andrew Parish, Jamaica, 18°00'N, 76°48'W, elevation 55 m].
Distribution: Southern Jamaica (Manchester, St. Andrews, St. Catherine, St. Elizabeth, St. Thomas), 55 m.
Source: Hedges & Garrido, 2002.
Remarks: T. Barbour & Loveridge (1929: 353) misspelled collector of type as M. Garbham.

T

16. *Tropidophis maculatus* (Bibron, 1840 *in* Ramón de la Sagra, 1838–1843). Hist. Fís. Polít. Nat. Cuba 2(2): 127–128, pl. 24. (*Leionotus maculatus*)

Synonyms: *Tropidophis distinctus* Jan, 1863b, and *Ungalia dipsadina* Cope, 1868c.
Type: Holotype, MNHN 7184, a 472 mm specimen (D. Ramón de la Sagra, 1824–1835).
Type locality: "Cuba."
Distribution: Western Cuba (Habana, Matanzas, Pinar del Río, Juventud Is.).
Source: Hedges & Garrido, 1999.
Remarks: Original description reprinted in Bibron, 1840 *in* Ramón de la Sagra (1841–1843: 212–214, pl. 25).

17. *Tropidophis melanurus* (Schlegel, 1837). Essai Phys. Serp. 1: 177, 2: 399–401. (*Boa melanura*)

Synonyms: *Notophis bicarinatus* Hallowell, 1856b, *Tropidophis melanurus dysodes* A. Schwartz & Thomas, 1960, and *Tropidophis melanurus ericksoni* A. Schwartz & Thomas, 1960.
Types: Syntypes (2), MNHN 1325 and MNHN 3284, longest syntype 480 mm (Ricord via D. Ramón de la Sagra), lost *fide* A. Schwartz & Thomas (1975: 194),
Type locality: "île de Cuba" [Greater Antilles].
Distribution: Cuba (Camagüey, Cienfuegos, Ciego de Aviula, Granma, Guantánamo, Habana, Holguín, Las Tunas, Matanzas, Pinar del Río, Sancti Spíritus, Santiago de Cuba, Villa Clara, Juventud Is.), 10–800 m.
Sources: Hallowell, 1857c, A. Schwartz & Thomas, 1960, R. Thomas, 1966c, Estrada, 1994 and Estrada, 1998.
Remarks: Holotype erroneously listed as ANSP 10308 (= *Notophis bicarinatus* Hallowell type) *fide* Rodriguez-Schettino (2000: 25).

18. *Tropidophis morenoi* Hedges, Garrido & Diaz, 2001. J. Herp. 35(4): 615–617.

Type: Holotype, CZACC 2943 (formerly IBAC 2943), a 337 mm female (J. Salas, 1969).
Type locality: "Dolinas de Cueva de Humboldt, Caguanes, Villa Clara Province, Cuba, 22°50'04"N, 80°12'02"W, 25 m.
Distribution: Central Cuba (Ciego de Ávila, Cocokey, Sabina-Camagüey Arch., Sancti Spíritus, Villa Clara), 25 m.
Sources: Chamizo-Lara et al., 2005 and Domínguez & Parada, 2009.

19. *Tropidophis nigriventris* Bailey, 1937c. Proc. New England Zool. Club 16: 45–46.

Type: Holotype, UMMZ 70888, a 232 mm female (A. Greenhall, 30 July 1931).
Type locality: "six miles east of Marti, Camaguey, Cuba."
Distribution: Eastern Cuba (E Camagüey).
Source: A. Schwartz & Garrido, 1975.
Remarks: A. Schwartz & Garrido (1975: 89) erroneously listed the holotype as UMMZ 70889.

20. *Tropidophis pardalis* (Gundlach, 1840). Arch. Naturg. 6(1): 359–361. (*Boa pardalis*)

Types: Syntypes (2), none designated, a 523 mm and 270 mm specimen (Ricord, 1839), lost *fide* Stimson (1969: 37) and Rodríguez-Schettino (2000: 24).
Type locality: "Cuba."
Distribution: Cuba (Camaguey, Ciego de Avila, Cienfuegos, Holguín, Habana, Matanas, Pinar del Río, Santiago de Cuba, Villa Clara, Cayo Coco, Cayo Parédon Grande and Juventud Is.), NSL–130 m.
Sources: Estrada, 1998 and Domínguez et al., 2006.

Remarks: Holotype not ZMB 8043 *fide* A. Schwartz & Thomas (1975: 195).

21. *Tropidophis parkeri* Grant, 1940c. Bull. Inst. Jamaica (Sci.) (2): 44–46.

Type: Holotype, formerly CG 2596, a 385+ mm female (C. Grant, 10 April 1938), location unknown.
Type locality: "Little Cayman, Cayman Islands."
Distribution: Caymans (Little Cayman Is.).
Source: Hedges, 2002.

22. *Tropidophis paucisquamis* (F. Müller *in* Schenkel, 1901). Verh. Naturf. Ges. Basel (1901–1902) 13(1): 154. (*Ungalia paucisquamis*)

Synonym: *Ungalia brasiliensis* Andersson, 1901.
Type: Holotype, NMBA 426, a 330 mm male.
Type locality: "Continent von trop. Amerika" [= tropical Mesoamerica or South America]. Restricted to EBB, municipality of Salesópolis, state of São Paulo, Brazil *fide* Curcio et al. (2012: 93).
Distribution: Southeastern Brazil (Espírito Santo, Rio de Janeiro, São Paulo), 500–1250 m.
Sources: Amaral, 1930k and Curcio et al., 2012.
Remarks: Photographs of holotype in Curcio et al. (2012: figs. 8a–b, 9a–d). Record from Peru doubtful *fide* Walls (1998a: 242).

23. *Tropidophis pilsbryi* Bailey, 1937c. Proc. New England Zool Club 16: 42–43. (*Tropidophis maculatus pilsbryi*)

Type: Holotype, ANSP 20822, a 243 mm male (H.A. Pilsbry, July 1928).
Type locality: "Cayo del Rey, near Miranda, Oriente Province, Cuba" [= Lomas de Cayo del Rey, Santiago de Cuba Prov., E Cuba, 20°25'N, 75°55'W, elevation 115 m.]
Distribution: Eastern Cuba (Guantánamo, Holguín, Santiago de Cuba), 115–800 m.
Sources: A. Schwartz & Garrido, 1975 and Estrada, 1994.

24. *Tropidophis preciosus* Curcio, Sales-Nuñes, Suzart-Argôlo, Skuk & Rodrigues, 2012. Herpetol. Monogr. (26): 101–108, figs. 15a–b, 16a–h, 19.

Type: Holotype, MZUSP 17957, a 429 mm female (G. Skuk, Sept. 1989).
Type locality: "Conselheiro Mata, small village at approximately 40 km east from the municipality of Diamantina, state of Minas Gerais, Brazil."
Distribution: Southeastern Brazil (E Minas Gerais), 980–1100 m.

25. *Tropidophis schwartzi* R. Thomas, 1963. Breviora (195): 3–6, figs. 1, 3. (*Tropidophis caymanensis schwartzi*)

Type: Holotype, MCZ 69618, a 435 mm male (native via A. Schwartz, 25 Aug. 1961).
Type locality: "The Creek, 8 mi. NE of West End, Cayman Brac" [Cayman Islands].
Distribution: Caymans (Cayman Brac), NSL–35 m.
Source: Hedges, 2002.

26. *Tropidophis semicinctus* (Gundlach & Peters *in* W.C.H. Peters, 1864b). Mber. Königl. Akad. Wiss. Berlin 1864(6): 388. (*Ungalia maculata semicincta*)

Synonym: *Tropidophis moreletii* Bocourt, 1885.
Types: Syntypes (2), ZMB 5076a–b (J.C. Gundlach, 1839–1864).
Type locality: "Cuba."
Distribution: Western Cuba (Cienfuegos, Habana, Matanzas, Pinar del Río, Sacti Spíritus, Villa Clara).
Sources: F. Werner, 1901b, Petzold, 1969, A. Schwartz & Garrido 1975, Hedges & Garrido, 1999 and Hedges et al., 2001.

27. *Tropidophis spiritus* Hedges & Garrido, 1999. J. Herp. 33(3): 436–440, figs. 1a–b, 3a.

Type: Holotype, MNHNCU 4085, a 351 mm male (O. Jíminez, Feb. 1993).
Type locality: "Canal Zaza, Cacerio Chorrera Brava, Sancti Spíritus Province, Cuba, 21°47'07"N, 79°21'38"W."
Distribution: Central Cuba (S Sancti Spíritus).
Source: Hedges et al., 2001.

28. *Tropidophis stejnegeri* Grant, 1940a. Jamaica To-Day: 157. (*Tropidophis pardalis stejnegeri*)

Type: Holotype, MCZ 44769 (formerly CG 770), a 273 mm female (C. Grant, 29 April 1937).
Type locality: "north slope, Jamaica." Specified as Boston Bay, Jamaica *fide* Grant (1940b: 119).
Distribution: Northern Jamaica (Portland, St. Ann, N St. Elizabeth, St. James, Trelawny, Westmoreland).
Source: Hedges, 2002.
Remarks: Original description reprinted in Grant (1940b: 119–120).

29. *Tropidophis stullae* Grant, 1940a. Jamaica To-Day: 157. (*Tropidophis maculatus stullae*) (*nomen corrigendum*)

Synonyms: *Tropidophis maculatus stulli* Grant, 1940a *(nomen incorrigendum),* and *Tropidophis haetianus stullae* – Schwartz & Thomas, 1975 *(nomen corrigendum).*

Type: Holotype, MCZ 44870 (formerly CG 384), a 318 mm male (C. Grant, 20 April 1937).
Type locality: "Portland Point, Jamaica" [= S Clarendon Parish, S Jamaica].
Distribution: Southern Jamaica (ext. S Clarendon).
Source: Hedges, 2002.
Remarks: Original description reprinted in Grant (1940b: 121–122).

30. *Tropidophis taczanowskyi* (Steindachner, 1880a). Sitz. Akad. Wiss. Wien, Math.-Natur. Kl. (1879) 80(1): 522–525, pl., figs. 1, 1a–c, 2a–b. (*Ungalia taczanowskyi*)

Type: Lectotype, NMW 14858, a 321 mm female (Stolzmann, 1880), designated by Curcio et al. (2012: 116).
Type locality: "Tambillo, department of Cajamarca, Peru" [= Tambillo, Cajamarca Dept., cen. Peru, 6°10'S, 78°45'W, elevation 1770 m] via lectotype selection.
Distribution: Southern Ecuador (Loja, Zamora-Chinchipe) and N Peru (Cajamarca, Ucayali), 840–2900 m.
Sources: J.A. Peters, 1960a and Curcio et al., 2012.
Remarks: Photographs of lectotype in Curcio et al. (2012: figs. 20a–b, 21a–d), who listed authorship as Steindachner, 1870. Records from Guayaquil, Ecuador and Amazonas, Brazil need confirmation *fide* Curcio et al. (2012: 117).

31. *Tropidophis wrighti* Stull, 1928. Occ. Pap. Mus. Zool., Univ. Michigan (195): 38–39, pl. 2, fig. 7.

Type: Holotype, USNM 12420, a 348 mm male.
Type locality: "East Cuba."
Distribution: Eastern Cuba (Camagüey, Granma, Sancti Spíritus, Santiago de Cuba), 300–730 m.
Sources: Estrada, 1994, Hedges & Garrido, 1999 and Hedges et al., 2001.

32. *Tropidophis xanthogaster* Domínguez, Moreno & Hedges, 2006. Amphibia-Reptilia 27(3): 427–429, fig. 1a.

Type: Holotype, CZACC 4.9465, a 279 mm male (A. Rodríguez & R. Alonso, 4 May 2000).
Type locality: "Las Perlas Cave, La Bajada, Guanahacabibes Peninsula, Pinar del Río Province (21°55'53.38"N 84°28'48.90"W), Cuba."
Distribution: Western Cuba (Pinar del Río), NSL–15 m.

†*TUSCAHOMAOPHIS* Holman & Case, 1992 (Alethinophidia *incertae sedis*)

Type species: †*Tuscahomaophis leggetti* Holman & Case, 1992.
Distribution: Upper Paleocene of USA.
Sources: Holman & Case, 1992 and Holman, 2000a.

1. †*Tuscahomaophis leggetti* Holman & Case, 1992. Ann. Carnegie Mus. 61(3): 198–201, figs. 1a–e.

Type: Holotype, CM 47872, one trunk vertebra (K.C. Beard, A.R. Tabrum, C.R. Case, & J.J. Leggett, April 1990).
Type locality: "site CM loc. 517 (coordinates on file at CM), Meridian, Lauderdale County, Mississippi; Latest Paleocene, Tuscahoma Formation" [USA].
Distribution: Upper Paleocene (Clarkforkian: 55.4–56.8 mya) of USA (Mississippi). Known only from type series.

TYPHLOPHIS Fitzinger, 1843 (Anomalepididae)

Synonyms: *Cephalolepis* A.-M.-C. Duméril & Bibron, 1844, *Typhlopis* – Palacky, 1898 *(nomen incorrectum),* and *Thlophis* – Briceño-Rossi, 1934 *(nomen incorrectum).*
Type species: *Typhlops squamosus* Schlegel, 1839 *in* 1837–1844.
Distribution: Northern South America.
Sources: Hahn, 1980a and McDiarmid et al., 1999.

1. *Typhlophis squamosus* (Schlegel, 1839 *in* 1837–1844). Abbild. Amph.: 36, pl. 32, figs. 9–12. (*Typhlops squamosus*)

Synonyms: *Cephalolepis leucocephalus* A.-M.-C. Duméril & Bibron, 1844, and *Typhlophis ayarzaguenai* Señaris, 1998.
Type: Holotype, RMNH 3685, a 145 mm specimen (1835).
Type locality: "Cayenne" [= Cayenne, N Cayenne Dept., N French Guiana, 04°55'N, 52°20'W, elevation 10 m].
Distribution: Eastern Venezuela (Bolívar), Guyana (Cuyuni-Mazaruni), Surinam (Nickerie), French Guiana (Cayenne, Saint-Laurent-du-Maroni) and N Brazil (Amazonas, Pará), NSL–650 m.
Sources: J.A. Peters & Orejas-Miranda, 1970, Cunha & Nascimento, 1978, 1993, Chippaux, 1987, Señaris, 1998, Starace, 1998, Abuys, 2003, Kok & Rivas-Fuenmayor, 2008, Navarrete et al., 2009 and C.J. Cole et al., 2013.
Remarks: Hahn (1980a: 5) erroneously reported the type to be lost from MNHN.

TYPHLOPS Oppel, 1811a (Typhlopidae)

Synonyms: *Tiphlops* Rafinesque-Schmaltz, 1815 *(nomen emendatum), Typhlus* Koch *in* Sturm, 1828 *(nomen emendatum), Typhlos* Bonaparte, 1831 *(nomen emendatum), Ophthalmidion* A.-M.-C. Duméril & Bibron, 1844, *Argyrophis* Gray, 1845, *Meditoria* Gray, 1845, *Typhylops* – Bianconi, 1848 *(nomen incorrectum),*

Thyphlops Gistel, 1849a *(nomen emendatum), Ophtalmidion* – Bianconi, 1849c *(nomen incorrectum), Diaphorotyphlops* Jan, 1860 *in* Jan & Sordelli, 1860–1866, *Diophorotyphlops* – Jan, 1861a *(nomen incorrectum), Tychlpos* – Steindachner, 1867a *(nomen incorrectum), Tyophlops* – Cope, 1887c *(nomen incorrectum), Cyphlops* – Cardew, 1897 *(nomen incorrectum), Typlops* – Bertoni, 1915 *(nomen incorrectum), Tychlops* – Sternfeld, 1917 *(nomen incorrectum), Typhops* – M.A. Smith, 1922b *(nomen incorrectum), Typhlopus* – Nakamura, 1938 *(nomen incorrectum), Ophthalmidium* Loveridge, 1957a *(nomen emendatum), Typhtoelps* – B.D. Sharma & Sharma, 1976 *(nomen incorrectum), Typhlophs* – R.C. Sharma, 1976 *(nomen incorrectum), Typlhops* – J.T.F. Chen & Yu, 1984 *(nomen incorrectum), Tyhhlops* – Mahendra, 1984 *(nomen incorrectum), Tylops* – L.D. Wilson & Meyer, 1985 *(nomen incorrectum), Typholops* – Bhamrah & Juneja, 1989 *(nomen incorrectum), Typhlop* – Nutaphand, 1991a *(nomen incorrectum), Acetyphlops* Hoser, 2012am, *(nomen illegitimum), Altmantyphlops* Hoser, 2012am *(nomen illegitimum), Arnoldtyphlops* Hoser, 2012am *(nomen illegitimum), Carrytyphlopea* Hoser, 2012am *(nomen illegitimum), Copelandtyphlops* Hoser, 2012am *(nomen illegitimum), Crottytyphlops* Hoser, 2012am *(nomen illegitimum), Cyrilhoserus* Hoser, 2012am *(nomen illegitimum), Dannytyphlops* Hoser, 2012am *(nomen illegitimum), Edwardstyphlops* Hoser, 2012am *(nomen illegitimum), Eilliotttyphlopea* Hoser, 2012am *(nomen illegitimum), Freudtyphlops* Hoser, 2012am *(nomen illegitimum), Goldsteintyphlops* Hoser, 2012am *(nomen illegitimum), Katrinahosertyphlops* Hoser, 2012am *(nomen illegitimum), Lenhosertyphlops* Hoser, 2012am *(nomen illegitimum), Mosestyphlops* Hoser, 2012am *(nomen illegitimum), Nintyphlops* Hoser, 2012am *(nomen illegitimum), Rentontyphlops* Hoser, 2012am *(nomen illegitimum), Rolyburrellus* Hoser, 2012am *(nomen illegitimum), Ronhoserus* Hoser, 2012am *(nomen illegitimum), Smythtyphlops* Hoser, 2012am *(nomen illegitimum), Swiletyphlops* Hoser, 2012am *(nomen illegitimum),* and *Woolftyphlops* Hoser, 2012am *(nomen illegitimum).*

Type species: *Anguis lumbricalis* Linnaeus, 1758.

Distribution: Mexico, Latin America, West Indies, SE Europe, Africa, Madagascar, S Asia and East Indies.

Fossil records: Oligocene of USA, Miocene of USA, upper Miocene of Hungary, lower Miocene of Spain; upper Pliocene of Greece, Pleistocene of Bahamas, Cayman Is. and Greece, and Holocene of Antigua and Jamaica. Records for Scolecophidia indet. are listed in Wallach (2002: 114).

Sources: Jan, 1861a, 1864c, de Rooij, 1917, E.H. Taylor, 1922a, F. Werner, 1921a, M.A. Smith, 1943, Roux-Estève, 1974a, 1974b, R. Thomas, 1976, Dixon & Hendricks, 1979, Mahendra, 1984, Hahn, 1980a, Wallach & Ineich, 1996, M.S. Khan, 1999b, McDiarmid et al., 1999, Wallach, 2004, R.W. Henderson & Powell, 2009, Wallach & Glaw, 2009 and Vidal et al., 2010.

Remarks: See Zhao & Adler (1993: 219) and McDiarmid et al. (1999: 89-90) for authorship of the generic name *Typhlops*. The following genera and species have been separated from *Typhlops: Acutotyphlops (banaorum, infralabialis kunuaensis, solomonis, subocularis), Afrotyphlops (angeli, angolensis, bibronii, blanfordii, congestus, elegans, fornasini, gierrai, kaimosae, liberiensis, lineolatus, manni, nanus, nigrocandidus, punctatus, rondoensis, schmidti, steinhausi, tanganicanus, usambaricus), Anilios (affinis, ammodytes, aspina, australis, batillus, bicolor, bituberculatus, broomi, centralis, chamodracaena, diversus, endoterus, erycinus, ganei, grypus, guentheri, hamatus, howi, kimberleyensis, leptosomus, leucoproctus, ligatus, longissimus, margaretae, micrommus, minimus, nema, nigrescens, nigricaudus, nigroterminatus, pilbarensis, pinguis, polygrammus, proximus, robertsi, silvia, splendidus, tovelli, troglodytes, unguirostris, waitii, wiedii, yampiensis, yirrikalae), Grypotyphlops (acutus), Letheobia (acutirostrata, ataeniata, caeca, crossii, debilis, decorosa, episcopus, erythraea, feae, gracilis, graueri, jubana, kibarae, largeni, leucosticta, lumbriciformis, newtoni, obtusus, pallida, pauwelsi, pembana, praeocularis, rufescens, scorteccii, simoni, somalica, stejnegeri, sudanensis, swahilica, toritensis, uluguruensis, unitaeniata, wittei), Megatyphlops (anomalus, brevis, mucruso, schlegelii), Ramphotyphlops (acuticaudus, albiceps, angusticeps, becki, braminus, cumingii, depressus, exocoeti, flaviventer, lineatus, lorenzi, macrurus, mansuetus, marxi, multilineatus, olivaceus, ozakiae, similis, suluensis, supranasalis, willeyi),* and *Xenotyphlops (grandidieri).*

1. *Typhlops agoralionis* R. Thomas & Hedges, 2007. Zootaxa (1400): 9–10, fig. 3c.

Type: Holotype, USNM 564777 (formerly USNM-FN 191925), a 139–193 mm specimen (S.B. Hedges, M. Leal, N. Plummer & R. Thomas, 28 May 1991).

Type locality: "8.0 km S Marché Léon, 435 m, Dépt. de la Grande Anse, Haiti."

Distribution: Extreme SW Haiti (Grand'Anse), 435 m. Known only from type locality.

Source: R.W. Henderson & Powell, 2009.

2. *Typhlops albanalis* Rendahl, 1918. Arkiv. Zool. 11(17): 3–5, figs. 4–6.

Type: Holotype, NHR 2574 (formerly NRM ex. A), a 276 mm specimen (W. Kauden, Nov. 1906).

Type locality: "Kaplande" [= South Africa] (in error). Corrected to Madagascar *fide* V.F.W. FitzSimons (1962: 63).

Distribution: Unknown (not Africa or Madagascar), but possibly Indonesia.

Remarks: A synonym of *Typhlops ocularis fide* Roux-Estève (1974: 250). Based upon Kaudern's label, which came from his collection in Madagascar in 1906, it was

assumed the origin was Madagascar. However, neither Andersson, 1911, who reported on Kaudern's Malagasy snake collection from 1906–1907, nor Kaudern, 1922, who reported on his 1906–07 and 1911–12 Malagasy collections, mentioned this species.

3. *Typhlops amoipira* Rodrigues & Junca, 2002. Pap. Avul. Zool. 42(13): 327–330, figs. 1–3.

Type: Holotype, MZUSP 12298 (formerly MZUSP-FN 200170), a 208 mm specimen (F.A. Juncá, 5 March 2000).

Type locality: "sand-dune area of the left bank of Río São Francisco, Ibiraba (10º48'S, 42º50'W): state of Bahía: Brazil," (partly in error). Corrected to 11º06'06"S, 43º09'07"W, elevation 435 m *fide* Fernandes et al. (2010: 268).

Distribution: Eastern Brazil (W Bahía, NW Minas Gerais), 425–550 m.

Source: Fernandes et al., 2010.

4. *Typhlops anchaurus* R. Thomas & Hedges, 2007. Zootaxa (1400): 22–23, fig. 8j.

Type: Holotype, MNHNCU 4553 (formerly USNM-FN 190563), a 240 mm specimen (R. Thomas, 31 July 1989).

Type locality: "within 1 km of Cueva de Agua (2.5 km airline NW Maisi), Guantánamo Province, Cuba" [= 20º15'N, 74º10'W, elevation 10 m].

Distribution: Extreme E Cuba (Guantánamo), NSL–10 m. Known only from type locality.

Source: Domínguez & Moreno, 2009.

5. *Typhlops andasibensis* Wallach & Glaw, 2009. Zootaxa (2294): 24–28, fig. 3, figs. 1–2, 4 (paratype).

Type: Holotype, ZSM 54/2005, a 325 mm female, (NGO "Mitsinjo" & R. Dolch, 23–26 Feb. 2005).

Type locality: "near Andasibe (= Perinet), 18º56.169'S, 48º24.734'E, 939 m elevation, central eastern Madagascar."

Distribution: Eastern Madagascar (Toamasina), 940 m. Known only from type locality.

T

6. *Typhlops annae* Breuil, 1999. Bull. Mens. Soc. Linn. Lyon 68(2): 32–34, fig. 1.

Type: Holotype, MNHN 1997.6058, a 110 mm specimen (M. Breuil, 12 Aug. 1996).

Type locality: "sud du Morne Vitet, à 100 m à l'ouest du point de vue, à 5 m au-dessus du niveau de la mer, Saint-Barthélemy, département de la Guadeloupe, Petites Antilles" [= S of Morne de Vitet, Saint Barthélemy Is., Lesser Antilles, 17º54'N, 62º48'W, elevation 5 m].

Distribution: Lesser Antilles (Guadeloupe: St-Barthélemy Is.), NSL. Known only from type locality.

Sources: Breuil, 2002, 2003.

7. *Typhlops anousius* R. Thomas & Hedges, 2007. Zootaxa (1400): 20, fig. 8g, 9c.

Type: Holotype, MNHNCU 4550 (formerly USNM-FN 191295), a 109–197 mm female (S.B. Hedges, R. Thomas & D. McCallister, 28 June 1990).

Type locality: "3.5 km E Tortuguilla, Guantánamo Province, Cuba, 10 meters elevation" [= 19º59'N, 74º56'W].

Distribution: Extreme E Cuba (Guantánamo), 10 m. Known only from type locality.

Source: Domínguez & Moreno, 2009.

8. *Typhlops arator* R. Thomas & Hedges, 2007. Zootaxa (1400): 19–20, figs. 8f, 9b.

Type: Holotype, MNHNCU 191, a 460 mm female (R. Regalado & C. Wotzkow, 20 April 1988).

Type locality: "'at El Narigon and La India', near Puerto Escondido, La Habana, Province, Cuba" [= 23º09'N, 81º43'W, elevation NSL].

Distribution: Northwestern Cuba (Habana), NSL. Known only from type locality.

Source: Domínguez & Moreno, 2009.

9. *Typhlops arenarius* (Grandidier, 1872). Ann. Sci. Nat. (Zool.) (5) 15(20): 9. (*Onychocephalus arenarius*)

Type: Holotype, MNHN 1895.216, a 180 mm specimen (A. Grandidier, 1870).

Type locality: "Mouroundava, Madagascar" [= Morondava, Toliara Prov., SW Madagascar, 20º17'S, 44º19'E, elevation 5 m].

Distribution: Western Madagascar (Mahajanga, Toliara), NSL–985 m.

Sources: Guibe, 1958, Glaw & Vences, 1994, A. Mori et al., 2006 and Wallach & Glaw, 2009.

10. *Typhlops biminiensis* Richmond, 1955. Amer. Mus. Novit. (1734): 2–4, fig. 1.

Type: Holotype, CM 32604, a 257 mm specimen (M.G. Netting & N.D. Richmond, 27 March 1954).

Type locality: "near Nixon's Harbor, along trail to 'Buck Lands', South Bimini Islands, Bahama Islands" [= between Nixon's Harbor and "Black Lands," South Bimini Is., Bahamas, ca. 25º43'N, 79º18'W, elevation NSL].

Distribution: Bahamas (Andros, Berry, Elbow Cay, Little Ragged, New Providence, North Bimini, South Bimini), NSL–70 m.

Sources: R. Thomas, 1968, A. Schwartz & R.W. Henderson, 1991 and R. Thomas & Hedges , 2007.

11. *Typhlops bipartitus* Sauvage, 1879. Bull. Soc. Philom. Paris (7) 3: 59–60.

Types: Syntypes (2), MNHN 1878.214–15, a 250 and 175 mm specimen (M.J.A. Raffray & M. Maindron, Dec. 1876).
Type locality: "'ile de Tidore, Nouvelle-Guinée" [= Tidore Is., Maluku, Indonesia, 00º41'N, 127º24'E].
Distribution: Eastern Indonesia (Maluku: Tidore). Known only from type locality.
Sources: Boulenger, 1993a and Rooij, 1917.
Remarks: Possibly a synonym of *Ramphotyphlops polygrammicus fide* Wallach *in* McDiarmid et al. (1999: 93). Possibly occus in Papua, Indonesia *fide* Iskandar & Colijn (2001: 17).

12. *Typhlops boettgeri* Boulenger, 1893a. Cat. Snakes Brit. Mus. 1: 39, pl. 2, figs. 6a–c.

Types: Syntypes (6), BMNH 1946.1.11.98–99 and BMNH 1946.1.12.1–4 (formerly BMNH 1892.11.26.1–6), longest syntype 220 mm (Last).
Type locality: "S. W. Madagascar."
Distribution: Southwestern Madagascar (Toliara), NSL–1040 m.
Sources: Guibe, 1958 and Wallach & Glaw, 2009.
Remarks: Previously considered a synonym of *T. arenarius*.

13. *Typhlops bothriorhynchus* A.C.L.G. Günther, 1864a. Rept. Brit. India: 174, pl. 16, fig. g.

Type: Holotype, BMNH 1946.1.11.59 (formerly BMNH 1860), a 180 mm specimen (T. Cantor, 1834–1855).
Type locality: "Pinang" [= Penang Is., Pinang State, West Malaysia, 05º22'N, 100º14'E].
Distribution: Southeastern Asia. Northeastern India (Assam), N Myanmar (Shan), West Malaysia (Pinang) and W Indonesia (Java), NSL–1510 m.
Sources: Boulenger, 1893a, Wall, 1923c, I. Das, 1996 and Schleich & Kästle, 2002.
Remarks: Type locality listed as Pinang, Malaya *fide* BMNH catalogue but Wall (1923c: 350) and I. Das (2012: 153) questioned type locality. Possibly occurs in Nepal *fide* Schleich & Kästle, 2002.

14. *Typhlops brongersmianus* Vanzolini, 1976. Pap. Avul. Zool. 29(24): 247. (*nomen substitutum*)

Synonyms: *Typhlops brongersmai* Vanzolini, 1972 *(nomen praeoccupatum), Altmantyphlops kirnerae* Hoser, 2012am *(nomen illegitimum),* and *Altmantyphlops kirnerae wellingtoni* Hoser, 2012am *(nomen illegitimum).*
Type: Holotype, MZUSP 5218, a 214 mm specimen (E.E. Williams & P.E. Vanzolini, 14 Dec. 1968).
Type locality: "Barra de Itaipe, Ilheus, Bahia, Brasil" [= Barra de Itaipe, Bahia Prov., E Brazil, 14º49'S, 39º02'W, elevation NSL].
Distribution: South America. Southeastern Colombia (Amazonas, Meta, Santa Sophia Is.), Venezuela (Delta Amacuro, Monagas, Sucre), Trinidad and Tobago (N Trinidad), Guyana (Upper Demerara-Berbice), Suriname (Saramacca), Brazil (Bahia, Ceará, Espírito Santo, Goias, Mato Grosso, Mato Grosso do Sul, Minas Gerais, Pará, Paraíba, Pernambuco, Rio de Janeiro, Rio Grande do Sul, São Paulo, Sergipe), Ecuador, NE Peru (Loreto), Bolivia (Beni, La Paz, Potosí, Santa Cruz), Paraguay (Alto Paraná, Amambay, Asunción, Caaguazú, Caazapá, Canindeyú, Central, Concepción, Cordillera, Guairá, Itapúa, Misiones, Neembucú, Paraguarí, Presidente Hayes, San Pedro) and Argentina (Buenos Aires, Chaco, Córdoba, Corrientes, Entre Ríos, Formosa, Misiones, Salta, Santa Fe, Tucumán), NSL–835 m.
Sources: Vanzolini, 1972, Dixon & Hendricks, 1979, Lema, 1982, Dixon et al., 1993, Cunha & Nascimento, 1993, Fugler et al., 1995, J.C. Murphy, 1997, Freitas, 1999, Leynaud & Bucher, 1999, Boos, 2001, Giraudo, 2001, Giraudo & Scrocchi, 2002, Cacciali, 2008, Loebmann, 2008b, Navarrete et al., 2009, Martins et al., 2010, Arruda et al., 2011, Caicedo-Portilla, 2011 and Morato et al., 2011 and C.J. Cole et al., 2013.
Remarks: Original description in Vanzolini (1972: 27–29). La Rioja, Argentina record rejected *fide* Giraudo & Scrocchi (2002: 4).

15. *Typhlops calabresii* Gans & Laurent, 1965. Ann. Mus. Roy. Afr. Cen., Tervuren (134): 54–55, pl. 6. (*Typhlops cuneirostris calabresii*)

Type: Holotype, MCZ 74465, a 147 mm specimen (C.F. Hemming, Dec. 1961).
Type locality: "56 miles from Hargeisa, on Berbera road, Northern Territory, Somalia Republic" [= mile 56 on Hargeisa-Berbera road, Woqooyi Galbeed Region, NW Somalia, 44°35'E, 09°52'N, elevation 945 m].
Distribution: Northeastern Africa. Southeastern Ethiopia (Bale, Hararage, Sidamo), Somalia (Bay, Mudug, Woqooyi Galbeed), and Kenya (Coast, North-Eastern), NSL–1065 m.
Sources: Spawls et al., 2002, Broadley & Wallach, 2009 and Largen & Spawls, 2010.

16. *Typhlops canlaonensis* E.H. Taylor, 1917. Philippine J. Sci. 12D(6): 354–355.

Type: Holotype, CM 2666 (formerly EHT 241), a 122 mm specimen (E.H. Taylor, 25 Dec. 1915).
Type locality: "Canlaon Volcano, Negros, P. I; elevation about 750 meters" [= Mt. Kanlaon, Negros Occidental Prov., Negros Is., Philippines, 10º25'N, 123º08'E, elevation 750 m].
Distribution: Central Philippines (Negros), 750 m.

17. *Typhlops capitulatus* Richmond, 1964. Breviora (202): 2–3, fig. 1.

Synonym: *Typhlops capitulata* R. Thomas, 1966a.
Type: Holotype, MCZ 62636, a 205 mm specimen (A.S. Rand & J. D. Lazell, 10 Aug. 1960).
Type locality: "Manneville, Haiti, at the northwest end of Lake Saumâtre" [= Ouest Dept., SW Haiti, 18°39'N, 72°03'W, elevation 15 m].
Distribution: Southwestern Haiti (Ouest, Sud), NSL–40 m.
Sources: Richmond, 1964, R. Thomas, 1965b, 1974b, 1989, A. Schwartz & R.W. Henderson, 1988, 1991 and R. Thomas & Powell, 1995a.

18. †*Typhlops cariei* Hoffstetter, 1946. Bull. Mus. Natl. Hist. Nat. (2) 18(3): 313–314, fig. 2.

Types: Syntypes (7), MNHN MAU 1000, seven trunk vertebrae (P. Carié).
Type locality: "la Mare aux Songes (Ile Maurice), subfossile" [= La Mare aux Songes, Mon Trésor Sugar Estate, SE Mauritius Is., Indian Ocean].
Distribution: Holocene (0.001–0.01 mya) of Mauritius. Known only from type locality.
Source: Rage, 1984a.

19. *Typhlops castanotus* Wynn & Leviton, 1993. Proc. Biol. Soc. Washington 106(1): 35–41, figs. 1–2.

Type: Holotype, CAS-SU 27940 (formerly SU 27940), a 224 mm male (A.C. Acala & crew, 23 May 1967).
Type locality: "8 km west of Pulupandan, Inampulugan Island, Negros Occidental Province, Philippines."
Distribution: Central Philippines (Borocay, Inampulugan, Negros, Panay), NSL–175 m.
Source: Ferner et al., 2001.

20. *Typhlops catapontus* R. Thomas, 1966b. Rev. Biol. Trop. (1965) 13(2): 190–191, fig. 4d (paratype). (*Typhlops richardi catapontus*)

Type: Holotype, MCZ 77220, a 265 mm specimen (R. Thomas, 18 Aug. 1964).
Type locality: "island of Anegada, British Virgin Islands, in the vicinity of the Settlement" [= Anegada Is., British Virgin Is., 18°43'N, 64°19'W, elevation NSL].
Distribution: British Virgin Islands (Anegada, Necker), NSL–245 m.
Source: Lazell, 2006.

21. *Typhlops caymanensis* Sackett, 1940b. Not. Nat. (48): 1–2.

Synonym: *Typhlops richardi capapontus* – Hahn, 1980a *(nomen incorrectum).*
Type: Holotype, ANSP 22123, a 180 mm specimen (J.T. Sackett, 26 Feb. 1940).
Type locality: "between Pedro Point and North Sound, Grand Cayman Island, West Indies" [= ca. 19°18'N, 81°14'W, elevation NSL].
Distribution: Caymans (Grand Cayman Is.), NSL.
Sources: R. Thomas, 1968, A. Schwartz & R.W. Henderson, 1991 and R. Thomas & Hedges, 2007.

22. *Typhlops coecatus* Jan, 1863b. Elenco Sist. Ofidi: 10.

Synonyms: *Typhlops caecatus* Jan, 1861b *(nomen nudum),* and *Typhlops caecatus* Jan, 1864 *(nomen emendatum).*
Type: Holotype, NMBA 310.
Type locality: "Costa d'oro" [= Gold Coast, presumably Ghana].
Distribution: Southern Ghana (Eastern, Volta) and S Ivory Coast (Aboisso, Dabakala, Toumodi), NSL–590 m.
Sources: Angel, 1933, Leston & Hughes, 1968, Hughes & Barry, 1969, Roux-Estève, 1974, Kramer, 1978, Hughes, 1983 and Wallach, 1993b.
Remarks: For disscussion of the name *coecatus* see McDiarmid et al. (1999: 96).

23. *Typhlops collaris* Wynn & Leviton, 1993. Proc. Biol. Soc. Washington 106(1): 41–44, fig. 3.

Type: Holotype, UF 55123, a 226 mm male (W. Auffenberg, 29 July 1982).
Type locality: "Anuling Mt. (150 m elev.), Caramoan Municipality, Camarines Sur, Luzon Island, Philippines."
Distribution: Northern Philippines (SE Luzon), 150–250 m.
Source: Auffenberg, 1988.

24. *Typhlops comorensis* Boulenger, 1889b. Ann. Mag. Nat. Hist. (6) 4(23): 361–362.

Type: Holotype, BMNH 1946.1.11.92 (formerly BMNH 1879.11.12.7), a 245 mm male (J. Kirk, Feb.–Nov. 1861).
Type locality: "Comoro Islands" [= ca. 11°42'S, 43°20'E, Indian Ocean].
Distribution: Comoros (Grande Comore Is.).
Sources: Boulenger, 1983a, Wallach, 1993b, 2009 and Wallach & Glaw, 2009.

25. *Typhlops conradi* W.C.H. Peters, 1874b. Mber. Kønigl. Akad. Wiss. Berlin 1874(2): 162–163, pl., fig. 1a–c.

Synonym: *Typhlops conradti* – Boulenger, 1897g *(nomen incorrectum).*
Type: Holotype, ZMB 7934, a 175 mm specimen (Conrad via Mus. Godeffroy).
Type locality: "Nord-Celebes" [= N Sulawesi, cen. Indonesia].
Distribution: Central Indonesia (ext. NE Sulawesi).
Sources: McDowell, 1974a, Bosch & Ineich, 1994, Wallach, 1993b, Bauer et al., 2002, Lang & Vogel, 2005 and Koch, 2012.

T

Remarks: Holotype illustrated in Bosch & Ineich (1994: fig. 3), who incorrectly listed holotype as ZMB 7834.

26. *Typhlops contorhinus* R. Thomas & Hedges, 2007. Zootaxa (1400): 21–22, figs. 8i, 9f.

Type: Holotype, MNHNCU 4552 (formerly USNM-FN 191296), a 316 mm male (R. Thomas, S. B. Hedges, E. Alfaro & D. McCallister, 29 June 1990).

Type locality: "4.9 km S La Tinta, Guantánamo Province, Cuba, 5 meters elevation" [= 20º05'N, 74º20'W].

Distribution: Extreme SE Cuba (Oriente), NSL. Known only from type locality.

Source: Domínguez & Moreno, 2009.

27. *Typhlops costaricensis* Jiménez & Savage, 1963. Rev. Biol. Trop. (1962) 10(2): 199–201.

Type: Holotype, LACM 26767 (formerly MNCR 1960), a 369 mm specimen (J. Walter, 6–13 March 1960).

Type locality: "Quaker colony at Monteverde, Sierra de Tilarán, Provincia de Puntarenas, Costa Rica, elevation 1500 m" [= 10º18'N, 84º48'W].

Distribution: Central America. Southern Honduras (Francisco Morazán, Gracias a Dios), Nicaragua (Chontales, Matagalpa) and N Costa Rica (Alajuela, Puntarenas), 150–1600 m.

Sources: Dixon & Hendricks, 1979, Vanzolini, 1986, Villa, 1988b, Villa et al., 1988, Savage, 2002, Solórzano, 2004, McCranie et al., 2006, Townsend et al., 2008 and McCranie, 2011a.

Remarks: Holotype is on permanent loan to LACM. Hahn (1980a: 55) erroneously reported the type on permanent loan to USC.

28. *Typhlops cuneirostris* W.C.H. Peters, 1879. Mber. Königl. Akad. Wiss. Berlin 1879(8): 775–776, pl., figs. 4, 4a–4c.

Type: Holotype, ZMB 9531, a 146 mm specimen (G.A. Fischer).

Type locality: "Barawa im Somalilande" [= Brava, Shabeellaha Hoose Region, S Somalia, 01º07'N, 44º02'E, elevation 15 m].

Distribution: Southern Somalia (Mogadishu, Shabeellaha Hoose), NSL–200 m.

Sources: Lanza, 1983a, 1990b and Broadley & Wallach, 2009.

29. *Typhlops decorsei* Mocquard, 1901. Bull. Mus. Hist. Nat., Paris 7(6): 255.

Type: Holotype, MNHN 1901.242, a 455 mm specimen (G.-J. Decorse, 1898–1901).

Type locality: "Ambovombé, Madagascar" [= Ambovombe, SE Toliara Prov., S Madagascar, 25º11'S, 46º05'E, elevation 130 m].

Distribution: Western and S Madagascar (Mahajanga, Toliara), 10–200 m.

Sources: Guibé, 1958, Glaw & Vences, 1994, A. Mori et al., 2006 and Wallach & Glaw, 2009.

30. *Typhlops diardii* Schlegel, 1839 *in* 1837–1844. Abbild. Amph.: 39.

Synonyms: *Argyrophis horsfieldii* Gray, 1845, *Typhlops striolatus* W.C.H. Peters, 1861e, *Typhlops barmanus* Stoliczka, 1872c, *Typhlops kapaladua* Annandale, 1906, *Typhlops tephrosoma* Wall, 1908c, *Typhlops diardi cinereus* Wall, 1909f *(nomen praeoccupatum)*, *Typhlops labialis* Waite, 1918a, and *Typhlops diardi platyventris* M.S. Khan, 1998.

Type: Holotype, MNHN 1065, a 372–420 mm specimen (P.-M. Diard, 1824–1825).

Type locality: "Cochinchina" [= S Vietnam]. Designated as Indes orientales [= Southern Asia and East Indies] *fide* A.-M.-C. Duméril & Bibron (1844: 301).

Distribution: Southeastern Asia. Northeastern Pakistan (Jammu & Kashmir), India (Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, Orissa, Tripura, Uttar Pradesh, West Bengal), S China (Hainan, Yunnan), S Nepal (Bardiya, Chitwan), Bangladesh, N Myanmar, Thailand (Chaiyaphum, Chanthaburi, Chiang Mai, Chon Buri, Krung Thep Mahanakhon, Loei, Nakhon Panom, Nakhon Ratchasima, Narathiwat, Prachin Buri, Tak, Trang, Uthai Thani), Laos (Houaphan, Xiangkhouang), Cambodia (Pursat) and N Vietnam (Bac Giang, Gia Lai, Ha Tinh, Lam Dong, Nghe An, Quang Binh, Quang Nak, Quang Ninh, Tay Ninh, Thanh Hoa, Cu Lao Ba Mun and Cu Lao Cham Is.), 140–1525 m.

Sources: Wall, 1918a, E.H. Taylor, 1965, Deuve. 1970, McDowell, 1974a, Tweedie, 1983, Zhao & Adler, 1993, M.J. Cox et al., 1998, M.S. Khan, 1998, 2002, 2006, Chan-ard et al., 1999, Darevsky, 1999, Nabhitabhata, 2000, Wallach, 2001, 2004, Schleich & Kästle, 2002, Shah & Tiwari, 2004, Whitaker & Captain, 2004, Ao et al., 2005, Nabhitabhata & Chan-ard, 2005, Grismer et al., 2008a, M.F. Ahmed et al., 2009, V.S. Nguyen et al., 2009, I. Das, 2010, 2012 and Haitao, 2011.

Remarks: BMNH 1946.1.11.50 from India listed as type *fide* Cox et al. (2013: 19) and BMNH catalogue.

31. *Typhlops domerguei* Roux-Estève, 1980. Bull. Mus. Natl. Hist. Nat. (4) 2A(1): 321–323, fig. 1.

Type: Holotype, MNHN 1977.1650 (Brunhes, Feb. 1967).

Type locality: "Ranomafana (47°26'E-21°18'S), village situé à 50 km à l'est de Fianarantsoa sur la route de Fianarantsoa à Mananjary, Madagascar" [Fianarantsoa Prov., elevation 625 m].

Distribution: Eastern Madagascar (Fianarantsoa), 455–625 m.

Sources: Glaw & Vences, 1994, Wallach, 1993b and Wallach & Glaw, 2009.

32. *Typhlops dominicanus* Stejneger, 1904. Rep. U.S. Natl. Mus. 1902: 687. (*Typhlops dominicana*)

Synonym: *Typhlops platycephalus* Boulenger, 1893a *(nomen praeoccupatum).*
Types: Syntypes (10), BMNH 1865.5.4.177, BMNH 1898.8.14.1–1898.8.14.1–8 (G.A. Ramage, June 1889), and BMNH 1891.5.11.2 (H A.A. Nichols).
Type locality: "island of Dominica" [Lesser Antilles].
Distribution: Dominica (Saint David, Saint Joseph, Saint Mark, Saint Patrick, Saint Peter).
Sources: Boulenger, 1893a, Richmond, 1966, A. Schwartz & R.W. Henderson, 1991, Malhotra & Thorpe, 1999, Breuil, 2002 and Rudman & Powell, 2010.
Remarks: Record from Barbados is doubtful *fide* Richmond (1966: 1310).

33. *Typhlops epactius* R. Thomas, 1968. Copeia 1968(4): 715–717, fig. 2c. (*Typhlops biminiensis epactia*)

Type: Holotype, MCZ 92048, a 209 mm male (R. Thomas, 24 March 1967).
Type locality: "5.4 miles E of West End, southern coastal platform, Cayman Brac, British West Indies" [= ca. 19°43'N, 79°48'W, elevation NSL],
Distribution: Caymans (Cayman Brac), NSL.
Sources: Richmond, 1955, R. Thomas, 1989, A. Schwartz & R.W. Henderson, 1991 and R. Thomas & Hedges, 2007.
Remarks: A valid species *fide* R. Thomas (1989: 409).

34. *Typhlops eperopeus* R. Thomas & Hedges, 2007. Zootaxa (1400): 12–13, figs. 3e, 4b.

Type: Holotype, USNM 564785 (formerly USNM-FN 266250), a 140–281 mm female (R. Thomas, 30 July 1999).
Type locality: "3.9 km airline SSW Barahona (4.5 km S Barahona along coast road and 2.8 km inland), 18°9.854' N, 71°5.497' W, 305 m."
Distribution: Southwestern Dominican Republic (Barahona, Independencia), NSL–700 m.

T

35. *Typhlops etheridgei* Wallach, 2002. Hamadryad 27(1): 109–111, fig. 1.

Type: Holotype, MHNG 1326.62 (formerly EK 11443), a 220 mm female (J. Garzoni, 1967).
Type locality: "Between Atar (20°31'N, 13°03'W) and Choûm (21°20'N, 12°59'W) along Route Nationale 1, a distance of ca. 85 air km through the Amsâga region, western Adrar Region, west-central Mauritania, elevation ca. 200 m."
Distribution: Western Mauritania (Adrar), 200 m. Known only from type locality.

36. *Typhlops exiguus* Jan, 1864 *in* Jan & Sordelli. 1860–1866. Icon. Gén. Ophid. 1(3): 3, pl. 4, fig. 11, pl. 5, figs. 11a–c, g, n, p, r, u, x.

Synonym: *Typhlops exignus* – F. Werner, 1921a *(nomen incorrectum).*
Type: Holotype, SMNS, a 135 mm specimen, destroyed in Sept. 1944 during World War II.
Type locality: "Indies orientales" [Southern Asia and East Indies].
Distribution: Southwestern India (Karnataka), 765 m.
Sources: Jan, 1854c and Wallach, 2004.

37. *Typhlops filiformis* A.-M.-C. Duméril & Bibron, 1844. Erpét. Gén. 6: 307–309.

Type: Holotype, MNHN 929, a 121–135 mm specimen.
Type locality: Unknown.
Distribution: Probably Asia.
Source: Jan, 1864.
Remarks: Listed as *incertae sedis* by Hahn (1980a: 76) and McDiarmid et al. (1999: 125). Either a valid member of the *Typhlops porrectus* group or a senior synonym of *T. porrectus* (Wallach, unpubl. data). Currently being studied by A.H. Wynn.

38. *Typhlops fuscus* (A.-M.-C. Duméril & A.H.A. Duméril, 1851). Cat. Méth.: 203. (*Ophthalmidion fuscum*)

Type: Holotype, MNHN 1062, a 210–214 mm specimen (S. Müller, 1825–1827 or 1831–1832).
Type locality: "Java" [SW Indonesia].
Distribution: Indonesia (Java, Maluku).
Source: Bleeker, 1858f.
Remarks: A valid species *fide* Wallach (unpubl. data). A synonym of *Typhlops platycephalus* (= *T. dominicana*) *fide* Boulenger (1893a: 30). Hahn (1980a: 76) and McDiarmid et al. (1999: 126) listed as *incertae sedis.*

39. *Typhlops geotomus* R. Thomas, 1966a. Proc. Biol. Soc. Washington 79: 260–261. (*Typhlops monastus geotomus*)

Type: Holotype, MCZ 81115, a 196 mm specimen (R. Thomas, 8 Aug. 1965).
Type locality: "Approximately 1 mi. N Carlisle, St. Mary's Parish, Antigua, British West Indies" [ca. 17°02'N, 61°50'W, elevation 50 m].
Distribution: Lesser Antilles. Antigua (Saint George, Saint Mary, Saint Paul, Great Bird Is.), Barbuda, St. Kitts & Nevis (Nevis: Christ Church Nichola Town, Saint Thomas Middle Island, St. Kitts: Saint George Gingerland, Saint James Windward), NSL–50 m.
Sources: Malhotra & Thorpe, 1999 and R.W. Henderson & Powell, 2009.

40. *Typhlops giadinhensis* Bourret, 1937b. Bull. Gén. Instr. Pub. Hanoi 5(4): 68–69, figs. 7a–c.

Type: Holotype, MNHN 1938.118 (formerly RLB M.559) (Inst. Pasteur de Saigon).
Type locality: "Giadinh, (Colchinchine)" [= Ho Chi Minh City, Ho Chi Minh City Prov., S Vietnam, 10º48'N, 106º38'E, elevation NSL].
Distribution: Southern Vietnam (Ho Chi Minh City), NSL. Known only from type locality.
Source: Wallach, 2001.
Remarks: A synonym of *Typhlops diardii fide* V.S. Nguyen (2007: 28) and V.S. Nguyen et al. (2009: 281); however, it differs from *T. diardii* in having 22 scale rows (vs. 24–48), a narrow rostral 0.3 head width (vs. 0.4–0.5), an L/W ratio of 26 (vs. 29–48), and a pair of longitudinal dorsal stripes (vs. unstriped).

41. *Typhlops golyathi* Domínguez & Moreno, 2009. Zootaxa (2028): 61–63, fig.. 1.

Type: Holotype CZACC 4.5385, a 371 mm male (R. Alonso, April 2003).
Type locality: "Valle de San Vicente, Viñales Municipality, Pinar del Río Prov., Cuba, 83º43'00" N, 22º41'00" W, 112 m elevation."
Distribution: Western Cuba (Pinar del Río), 110 m.

42. *Typhlops gonavensis* Richmond, 1964. Breviora (202): 3–4, fig. 2.

Type: Holotype, YPM 3003, a 189 mm specimen (P.S. Humphrey & S. Van Vleek, 9 April 1959).
Type locality: "Point à Raquette, on the south shore of Gonave Island, Haiti" [= 18º47'N, 73º04'W, elevation 18 m].
Distribution: Western Haiti (Gonâve Is.), NSL. Known only from type locality.
Sources: R. Thomas, 1989 and R. Thomas & Powell, 1995b.
Remarks: Previously considered a subspecies of *T. capitulatus*.

43. *Typhlops granti* Ruthven & Gaige, 1935. Occ. Pap. Mus. Zool., Univ. Michigan (307): 2–3, fig. 1 (paratype).

Type: Holotype, UMMZ 76669, a 154 mm specimen (C. Grant, 20 April 1931).
Type locality: "Caja de Muertos (eight miles off Ponce, Puerto Rico)" [= 17º54'N, 66º31'W, elevation NSL].
Distribution: Southwestern Puerto Rico (Lajas, Ponce, Caja de Muertos Is.).
Sources: Hedges & R. Thomas, 1991 and Rivero, 1998.

44. †*Typhlops grivensis* Hoffstetter, 1946. Bull. Mus. Natl. Hist. Nat., Paris (2) 18(3): 311–313, fig. 1.

Types: Syntypes (3), MNHN LGA 53–55, three trunk vertebrae (R. Hoffstetter).
Type locality: "le Vindobonien moyen de la Grive-Saint-Alban (Isère), France," Astaraciàn, middle Miocene."
Distribution: Middle Miocene (Astaracian, MP 6–8: 11.1–13.7 mya) of France. Known only from type series.
Sources: Rage, 1984 and Wallach, 2002.

45. *Typhlops guadeloupensis* Richmond, 1966. Herpetologica 22(2): 129–130, fig. 1.

Synonym: *Typhlops cinereus* J.G. Schneider, 1801.
Type: Holotype, CM 41216 (formerly ASFS X4988), a 162 mm specimen (A. Schwartz, 19 Jan. 1963).
Type locality: "Guadelupe, from Grandterre part of the island, 2 km. SW Port-Blanc" [= 16º14'N, 61º27'W, elevation 50–75 m].
Distribution: Lesser Antilles. Guadeloupe, 50–75 m.
Source: Breuil, 2002.

46. *Typhlops hectus* R. Thomas, 1974a. Proc. Biol. Soc. Washington 87(2): 12–14.

Type: Holotype, MCZ 81149 (formerly ASFS V9145), a 192 mm specimen (R. Thomas, 12 March 1966).
Type locality: "Martineau, ca. 9 km (airline) W Jérémie, Dépt. du Sud, Haiti" [= Grand'Anse Dept., ca. 18º39'N, 74º07'W, elevation 10 m].
Distribution: Southern Haiti (Grand'Anse, Sud, Gônave Is.), NSL–870 m.
Sources: R. Thomas, 1976, 1989, R. Thomas & Powell, 1992 and R. Thomas & Hedges, 2007.

47. *Typhlops hypogius* Savage, 1950. Proc. California Zool. Club 1(10): 52–53, figs. 1 a–c. (*Typhlops hypogia*)

Type: Holotype, CAS-SU 12347 (formerly SU 12347), a 176 mm specimen (A.W. Herre, 23 Aug. 1940).
Type locality: "Cebu, Cebu, Philippine Islands" [= Cebu City, Cebu Is., cen. Philippines, 10º22'N, 123º52'E, elevation 370 m].
Distribution: Central Philippines (Cebu), 370 m.
Sources: McDowell, 1974b, Alcala, 1986 and Ferner et al., 2001.
Remarks: Illustrations of holotype mislabeled as figs. 2a–c in Savage (1950: 49) (but corrected in reprint).

48. *Typhlops hypomethes* Hedges & Thomas, 1991. Herpetologica 47(4): 452–454, figs. 4b, 6 (upper left, lower right).

Type: Holotype, USNM 300574, a 201 mm female (R. Thomas, 19 Nov. 1986).

Type locality: "the University of Puerto Rico Campus (faculty housing), Río Piedras, San Juan, Puerto Rico" [= 18º24'N, 66º03'W, elevation 25 m].
Distribution: Eastern Puerto Rico (Arecibo, Barceloneta, Cataño, Cidra, Fajardo, Guayama, Loiza, Manati, Maulnabo, Río Grande, San Juan, Santa Isabel, Vega Baja, Palominos, Piñeros and Vieques Is.), NSL–435 m.
Sources: Hedges & Thomas, 1991 and Rivero, 1998.

49. *Typhlops hypsobothrius* F. Werner, 1917a. Mitt. Zool. Mus. Hamburg (1916) 34: 34–35.

Types: Syntypes (2), ZMH, longest syntype 285 mm, destroyed in July 1943 during World War II.
Type locality: "Sumatra" [W Indonesia].
Distribution: Western Indonesia (Sumatra). Known only from syntypes.
Sources: Haas, 1950, David & Vogel, 1996 and Manthey & Grossmann, 1997.

50. *Typhlops jamaicensis* (G. Shaw, 1802). Gen. Zool., Amph. 3(2): 588, pl. 133. (*Anguis jamaicensis*)

Synonyms: *Meditoria nasuta* Gray, 1845, and *Anilios leachii* Gray, 1845.
Type: Holotype, not designated, location unknown.
Type locality: "Jamaica" [Greater Antilles, West Indies].
Distribution: Jamaica (Clarendon, Kingston and St. Andrews, Manchester, St. Ann, St. Elizabeth, St James, St. Mary, St. Thomas, Portland, Trelawny, Westmoreland), NSL–700 m.
Sources: Barbour, 1910, Ruthven & Gaige, 1935, R. Thomas, 1966b, A. Schwartz & R.W. Henderson, 1991, H.M. Smith & David, 1999 and Dominguez & Díaz, 2011b.
Remarks: Original description based partly upon *Amphisbena subargentea* P. Browne (1756: 460, pl. 44, fig. 1) and partly upon *Serpens Caecilia ex. Mauritaniâ* Seba (1934: 137, pl. 86, fig. 2).

51. *Typhlops jerdoni* Boulenger, 1890a. Fauna Brit. India, Rept. Batr.: 238, pl. 34.

T

Synonym: *Typhlops diversiceps* Annandale, 1912.
Types: Syntypes (3), BMNH 1946.1.10.66–68, longest syntype 229 mm (T.C. Jerdon, 1836–1852).
Type locality: "Khási Hills" [= Meghalaya State, NE India, ca. 25º35'N, 91º38E].
Distribution: Southern Asia. Northeastern India (Arunachal Pradesh, Assam, Meghalaya, Nagaland, Sikkim, N West Bengal), E Nepal (Ilam), S Bhutan (Sarpang) and N Myanmar (Bago, Shan), 150–2125 m.
Sources: Boulenger, 1893a, Wall, 1923a, Dowling & Jenner, 1988, Bauer & Günther, 1992, Wallach, 1993b, Das & Palden, 2000, Schleich & Kästle, 2002, R. Sharma, 2003, 2007, Ao et al., 2004 and I. Das, 2010, 2012.

52. *Typhlops klemmeri* E.H. Taylor, 1962. Univ. Kansas Sci. Bull. 43(7): 253–254.

Type: Holotype, FMNH 178238 (formerly EHT-HMS M176 & EHT-CC 2307), a 151 mm specimen (E.H. Taylor).
Type locality: "Koh Phai, near Kuala Lumpur, Malaya" [= Koh Phai, Selangor State, West Malaysia, ca. 03º08'N, 101º40'E, elevation 75 m].
Distribution: West Malaysia (Kuala Lumpur), 75 m. Known only from type locality.
Source: Wallach, 2001.

53. *Typhlops koekkoeki* Brongersma, 1934. Zool. Meded. 17(3–4): 186–187, figs. 13–15.

Type: Holotype, RMNH 11077, a 445 mm specimen (U. Driebergen, 1924).
Type locality: "Boenjoe Id., N Borneo," [= Bunju Is., E Kalimantan, Indonesia, 03º31'N, 117º49'E, elevation NSL].
Distribution: Borneo. East Malaysia (Sarawak [FMNH 71579]) and Indonesia (E Kalimantan: Bunju Is.), NSL–230 m.
Sources: Stuebing, 1991 and Stuebing & Inger, 1999.

54. *Typhlops koshunensis* Oshima, 1916a. Zool. Mag., Tokyo 28(328): 85. (*nomen substitutum*)

Synonyms: *Typhlops leucoproctus* Oshima, 1910 *(nomen praeoccupatum),* and *Typhlops koshunnensis* – Hahn, 1980a *(nomen incorrectum).*
Type: Lectotype, ISM 4 (M. Oshima, 29 May 1909), designated by Hahn (1980a: 61), lost *fide* Ota (1991: 69).
Type locality: "Kosun, Formosa" [= Kuraru (= Kueitzuchiao), Koshun (= Hengchun County), Pingtung Township, ext. S Taiwan *fide* Zhao & Adler, 1993: 219].
Distribution: Southern Taiwan (Kaohsiung, Pingtung), 10–1000 m.
Sources: Oshima, 1910, Takahashi, 1930, Maki, 1931, 1933, Hu et al., 1980, 1989, Zhao & Adler, 1993, Wallach, 2001, 2004, Zhao, 2006 and Xiang & Li, 2009.
Remarks: Original description in Oshima (1910: 187).

55. *Typhlops kraalii* G. Doria, 1875. Ann. Mus. Civ. Stor. Nat. Genova (1874) 6: 347, pl. 12, fig. f.

Type: Holotype, MSNG CE 29962, a 250 mm specimen (O. Beccari, 1873), lost *fide* McDowell (1974b: 12).
Type locality: "Isole Kei" [= Great Kei Is., Maluku Prov., E Indonesia].
Distribution: Eastern Indonesia (Maluku: Kei, Seram), 915 m.
Sources: Rooij, 1917, E.H. Taylor, 1922, Brongersma, 1934, Haas, 1950 and McDowell, 1974b.

56. *Typhlops lankaensis* E.H. Taylor, 1947b. Univ. Kansas Sci. Bull. 31(13): 287–289, fig. 1.

Type: Holotype, FMNH 100066 (formerly EHT-HMS 30062 & EHT-CC C90) (E.H. Taylor, 13 Sept. 1944).
Type locality: "12 miles north of Trincomalee, Ceylon, 3–5 m" [= near Nilaveli, 18 km N Trincomalee, N Eastern Prov., NE Sri Lanka, ca. 8°43'N, 81°11'E, elevation NSL *fide* Bauer & Silva, 2007: 5].
Distribution: Northeastern Sri Lanka (N Eastern), NSL. Known only from type locality.
Sources: P. Silva, 1980a, A. Silva, 1990, Wallach, 1993b, 2009 and Somaweera, 2006.

57. *Typhlops lazelli* Wallach & Pauwels, 2002. Breviora (512): 4–8, fig. 1.

Type: Holotype, MCZ 173290 (formerly JDL 362.66), a 158 mm female (S. Brown, 27 May 1988).
Type locality: "High West, Pokfulan, Hong Kong Island, Hong Kong Territory, China, ca. 22°15'30"N, 114°08'30"E" [elevation 160 m].
Distribution: China (Hong Kong), 160 m. Known only from type locality.
Source: Zhao, 2006.

58. *Typhlops lehneri* Roux, 1926. Rev. Suisse Zool. 33(4): 298–299.

Type: Holotype, NMBA 9020, a 115–185 mm specimen (E. Lehner).
Type locality: "El Pozon, district de Falcón, Venézuéla" [= El Pozon, Falcón State, N Venezuela, 12º06'N, 70º00'W, elevation 10 m].
Distribution: Northern Venezuela (N Falcón), NSL–10 m.
Sources: Roux, 1927, Roze, 1966a, R. Thomas, 1974b, Dixon & Hendricks, 1979, Lancini & Kornacker, 1989, Mijares-Urrutia & Arends, 2000 and Navarrete et al., 2009.

59. *Typhlops leucocephalus* H.W. Parker, 1930d. Ann. Mag. Nat. Hist. (10) 6(35): 605.

Type: Holotype, BMNH 1946.1.11.96 (formerly BMNH 1930.5.9.11), a 212 mm specimen (R.H.R. Taylor, 1925–1930).
Type locality: "Las Anod (8º 28'N. x 47º 21'E.), 2400 ft., British Somaliland" [= Laascaanood, Nogal Valley, Nugaal Region, NE Somalia, 8°29'N, 47°22'E, elevation 730 m].
Distribution: Northern Somalia (SW Nugaal), 730 m. Known only from type locality.
Sources: Parker, 1932, 1949, Roux-Estève, 1974 and Lanza, 1983a, 1990b.
Remarks: Transferred to *Rhinotyphlops fide* Roux-Estève (1974: 183). Probably occurs in E Ethiopia *fide* Largen & Rasmussen (1993: 320).

60. *Typhlops leucomelas* Boulenger, 1890a. Fauna Brit. India, Rept. Batr.: 237–238.

Type: Holotype, BMNH 1946.1.10.46 (formerly BMNH 1874.4.29.223), a 127 mm specimen (R.H. Beddome, 1857–1882).
Type locality: "Haycock Mountain (2000 ft.) in Ceylon, 40 miles from Point de Galle" [= Haycock, 40 mi. NNE of Galle, Southern Prov., Sri Lanka, 06º20'N, 80º18'E, elevation 610 m].
Distribution: Southern Sri Lanka (Central, Sabaragamuwa, Southern), 610–1360 m.
Sources: Boulenger, 1893a, Wall, 1921, E.H. Taylor, 1947b and P. Silva, 1980a, R. Sharma, 2003, 2007, Das & Silva, 2005 and Somaweera, 2006.

61. *Typhlops longissimus* (A.M.C. Dumeril & Bibron, 1844). Erp. Gén. 6: 263–265. (*Ophthalmidion longissimum*)

Type: Holotype, MNHN 1061, a 346–353 mm specimen (F.L.N.C.L. de Castelnau, 1837–1843)
Type locality: "Amérique septentrionale" [= North America] (in error).
Distribution: Unknown, probably Asia.
Sources: Jan & Sordelli, 1864 *in* 1860–1866, Boulenger, 1893a and Loveridge, 1957.
Remarks: Listed as *incertae sedis* by Hahn (1980a: 77) and McDiarmid et al. (1999: 126). Possibly congeneric with and a senior synonym of *Typhlops tenuicollis* Peters, 1864a (Wallach, unpublished data).

62. *Typhlops loveridgei* Constable, 1949. Bull. Mus. Comp. Zool. 103(2): 110–111.

Type: Holotype, MCZ 2283, a 203 mm specimen (M.M. Carleton, 1873).
Type locality: "probably from North India" [probably Ambala, Haryana State, 30º21'N, 76º50'E, elevation 275 m, or Kulu, Himachal Pradesh State, 31º58N, 77º66E, elevation 1215 m, N India].
Distribution: Probably N India (Haryana or Himachal Pradesh). Known only from holotype.
Source: M.S. Khan, 1999b.
Remarks: Carleton collected material in 1873 from Ambala, Ambaia District and Kulu (Valley), Kangra District, in the Punjab (now Haryana and Himachal Pradesh states) but the type was donated with a specimen of *Typhlops diardii* with the same questionable locality data *fide* Constable (1949: 110, 113).

63. *Typhlops lumbricalis* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 228. (*Anguis lumbricalis*)

Synonym: *Anguis Surinamensis* Gravenhorst, 1807.
Type: Neotype, KU 273756 (R. Thomas, 7 Oct. 1965), designated by Dominguez & Diaz (2011b: 3).
Type locality: "4 miles N and 0.5 miles E of Rock Sound (76º11'02"N, 24º58'02"W, 20 m elevation, datum WGS

84), Elenthera Island, Bahama Islands" via neotype selection.

Distribution: Bahamas (Little Bahama & Great Bahama Banks: Andros, Cat, Eleuthera, Great Abaco, Great Exuma, Great Harbour Cay, Great Ragged, Little Abaco, Little Exuma, Little Ragged, Long Island, New Providence, Pipe Cay, South Bimini, Staniel Cay, Water Cay), NSL–20 m.

Sources: R. Thomas, 1974b, 1989 and Domínguez & Diaz, 2011a–b.

64. *Typhlops luzonensis* E.H. Taylor, 1919. Philippine J. Sci. (1918) 14D(1): 105–106.

Type: Holotype, CM 2653 (formerly EHT 109), a 260 mm specimen (E.H. Taylor, 12 May 1915).

Type locality: "Mount Maquiling, Laguna, Luzon, Philippine Islands" [= Mt. Makiling, Laguna Prov., Luzon Is., N Philippines, 14º08'N, 121º12'E].

Distribution: Philippines (Luzon, Negros, Marinduque), 250–300 m.

Sources: Savage, 1950, McDowell, 1974b, Alcala, 1986, Wynn & Leviton, 1993 and Brown et al., 2000.

65. *Typhlops madagascariensis* Boettger, 1877. Abh. Senck. Naturf. Ges. 11(1): 3–5, pl. 1, figs. 1a–f.

Type: Holotype, SMF 16604 (formerly SMF-B 7025, 1a), a 410 mm specimen (K. Ebenau, 1875).

Type locality: "Nossi-bé, bei Madagascar" [= Nosy Be Is., W Antsiranana Prov., N Madagascar, bet. 13°12'–25'S and 48°10'–22'E].

Distribution: Northern Madagascar (Antsiranana). Known only from type locality.

Source: Glaw & Vences, 1994.

66. *Typhlops madgemintonae* M.S. Khan, 1999b. Russ. J. Herp. 6(3): 233–236, figs. 1–2. (*nomen corrigendum*)

Synonyms: *Typhlops madgemintoni* M.S. Khan, 1999a *(nomen nudum), Typhlops ahsanai* M.S. Khan, 1999b *(nomen incorrigendum), Typhlops ahsanuli* – M.S. Khan, 1999b *(nomen corrigendum), Typhlops madgemintonai* M.S. Khan, 1999b *(nomen incorrigendum), Typhlops madgemintoni shermanai* M.S. Khan, 1999b *(nomen incorrigendum), and Typhlops madgemintonae shermani* – M.S. Khan, 1999b *(nomen corrigendum).*

Type: Holotype, AMNH 144213 (formerly MSK 904.93), a 200 mm male (M.S. Khan, 17 July 1993).

Type locality: "near house of Master Muhammad Sadiq, Goi Madan, District Kotli, Azad Kashmir, 33°30'N and 74°00'E, elevation 1315 m."

Distribution: Pakistan (Jammu & Kashmir), 1315–1495 m.

Sources: Wallach, 2000b, 2004 and M.S. Khan, 2002, 2006.

Remarks: *Typhlops madgemintonae* and *T. ahsanuli* both *incertae sedis fide* Wallach (2000b: 140).

67. *Typhlops malcolmi* E.H. Taylor, 1947b. Univ. Kansas Sci. Bull. 31(13): 291–292.

Type: Holotype, EHT-HMS 30072 (formerly EHT-CC 912), a 107 mm specimen (E.H. Taylor, Nov. 1944), lost *fide* Hahn (1980a: 64).

Type locality: "12 miles north of Trincomalee, Eastern Province, Ceylon" [= near Nilaveli, 18 km N Trincomalee, N Eastern Prov., NE Sri Lanka, ca. 8°43'N, 81°11'E, elevation NSL *fide* Bauer & Silva, 2007: 5].

Distribution: Northeastern Sri Lanka (N Eastern), NSL. Known only from type locality.

Sources: P. Silva, 1980a, A. Silva, 1990, Wallach, 1993b, 2009 and Somaweera, 2006..

68. *Typhlops manilae* E.H. Taylor, 1919. Philippine J. Sci. (1918) 14D(1): 106–108.

Type: Holotype, STUM (unnumbered), a 280 mm specimen.

Type locality: "Filipinas" [= Philippines].

Distribution: Philippines (? Luzon). Known only from holotype.

Remarks: Type locality probably Luzon, Philippines *fide* E.H. Taylor (1922a: 56).

69. *Typhlops meszoelyi* Wallach, 1999a. Herpetologica 55(2): 185–187, fig. 1a–b.

Type: Holotype, FMNH 191889 (formerly BBS 18 & ZM 18), a 162 mm male (B.B. Sinha, 5 Oct. 1971).

Type locality: "Darjeeling, 27°02'N, 88°16'E, 2285 m, West Bengal Province, India."

Distribution: Northeastern India (West Bengal), 2285 m. Known only from type locality.

Source: M.S. Khan, 1999b.

70. *Typhlops microcephalus* F. Werner, 1909d. Jahr. Vereins Vaterl. Naturkd. Württemberg 65: 60.

Type: Holotype, SMNS 6720 (formerly SMNS 4233), a 235 mm female (H. Rolle, 1905).

Type locality: "Madagaskar" [= Madagascar]. Restricted herein to Amber Mountain, NW Antsiranana Prov., N Madagascar, 12º37'S, 49º09'E, elevation 1100 m.

Distribution: Northern Madagascar (Antsiranana), 650–1200 m.

Sources: Glaw & Vences, 2007, Wallach, 2009 and Wallach & Glaw, 2009.

Remarks: A valid species *fide* Wallach *in* McDiarmid et al. (1999: 60). Previously considered a synonym of *Ramphotyphlops braminus* by Loveridge (1957: 244), Hahn (1980a: 39) and Brygoo (1987: 23).

71. *Typhlops microstomus* Cope, 1866. Proc. Acad. Nat. Sci. Philadelphia 18(2): 125–126.

Type: Holotype, USNM 61064 (formerly SIM 716), a 275 mm specimen (A.C.V. Schott, 1865–1866).

Type locality: "Yucatan" [Mexico].

Distribution: Yucatán Peninsula. Southeastern Mexico (S Campeche, Quintana Roo, Veracruz, Yucatán), Belize (Belize, Cayo, Corozal, Orange Walk) and N Guatemala (Petén), NSL–200 m.

Sources: K.P. Schmidt, 1936, Dixon & Hendricks, 1979, Villa et al., 1988, Meerman, 1992, Garel & Matola, 1995, J.C. Lee, 1996, 2000, J.A. Campbell, 1998b, Pérez-Higareda & Smith, 1999 and Townsend et al., 2008.

72. *Typhlops minuisquamus* Dixon & Hendricks, 1979. Zool. Verh. (173): 21–23, figs. 1b, 2b.

Type: Holotype, TCWC 39130, a 230 mm female (P. Soini, 17 March 1972).

Type locality: "Mishana, Loreto, Peru" [03°57'S, 73°37'W, elevation 125 m].

Distribution: Amazonia. Southeastern Colombia (Meta, Vaupés), Venezuela (Amazonas), Guyana (Cuyuni-Mazruni, Essequibo Islands-West Demerara, Mazaruni-Potaro, Upper Demerara-Berbice), Brazil (Amazonas) and NE Peru (N Loreto), NSL–200 m.

Sources: Lancini & Kornacker, 1989, Caicedo-Portilla, 2011 and C.J. Cole et al., 2013.

73. *Typhlops monastus* R. Thomas, 1966a. Proc. Biol. Soc. Washington 79: 257–260, figs. 1–2.

Type: Holotype, MCZ 81112, a 184 mm male (R. Thomas, 5 Aug. 1965).

Type locality: "between Lawyers River and Cassava Ghaut, St. Peter's Parish, Montserrat, British West Indies" [ca. 16°45'N, 62°13'W, elevation 75–100 m].

Distribution: Lesser Antilles. Montserrat (St. Anthony, St. Peter), NSL–400 m.

Source: A. Schwartz & R.W. Henderson, 1991.

Remarks: Fossil record from Holocene of Antigua *fide* Pregill et al. (1988: 14).

74. *Typhlops monensis* K.P. Schmidt, 1926a. Field Mus. Nat. Hist. (Zool.) 12(12): 157–158, fig. 1.

Type: Holotype, ZMH 1582, a 182 mm specimen, destroyed in July 1943 during World War II.

Type locality: "Mona Island, West Indies" [= Puerto Rico, 18°05'N, 67°54'W, elevation NSL–60 m].

Distribution: Puerto Rico (Mona Is.), NSL–60 m.

Sources: A. Schwartz & R.W. Henderson, 1991 and Rivero, 1998.

75. *Typhlops mucronatus* Boettger, 1880a. Zool. Anz. 3(57): 279.

Type: Lectotype, SMF 16626 (formerly SMF-B 7037, 2a), a 378 mm specimen (C. Ebenau & A. Stumpff, 1880), designated by Mertens (1922: 178).

Type locality: "Loucoubé auf Nossibé" [= Lokobe, Nosy Be Is., N Antsiranana Prov., N Madagascar, ca. 13°22'S, 48°19'E] via lectotype selection.

Distribution: Northern Madagascar (N Antsiranana, Nosy Be Is.), NSL–650 m.

Sources: Boettger, 1881d, Glaw & Vences, 2007 and Wallach & Glaw, 2009.

76. *Typhlops muelleri* Schlegel, 1839 *in* 1837–1844. Abbild. Amph.: 39, pl. 32, figs. 25–28. (*nomen corrigendum*)

Synonyms: *Typhlops mülleri* Schlegel, 1839 *in* 1837–1844 *(nomen incorrigendum), Typhlops nigro-albus* A.-M.-C. Duméril & Bibron, 1844 *(nomen incorrigendum), Typhlops nigroalbus* – Jan, 1863b *(nomen corrigendum), Argyrophis bicolor* Gray, 1845, *Pilidion dimidiatum* Bleeker, 1860b, *Typhlops schneideri* Jan, 1863b (*nomen nudum*), *Typhlops schneideri* Jan, 1864, *Typhlops muelleri* – Boulenger, 1893a *(nomen corrigendum),* and *Typhlops fusconotus* Brongersma, 1934.

Type: Holotype, RMNH 3718, a 321 mm specimen (S. Müller, June 1833–Dec. 1835).

Type locality: "Padang auf Sumatra" [= Padang, Sumatra, W Indonesia, 00°57'S, 100°21'E, elevation 20 m].

Distribution: Southeast Asia. Southern Myanmar, Thailand (Bangkok, Chanthaburi, Chumphon, Nakhon Ratchasima, Nakhon Si Thammarat, Pathum Thani, Pattani, Phang Nga, Phattalung, Surat Thani, Yala), Cambodia (Kampot, Kompong Speu, Pursat), Laos, S Vietnam (Dong Nai, Gia Lai, Lam Dong, Quang Nam, Tay Ninh), West Malaysia (Kuala Lumpur, Pinang, Perlis, Selangor), Singapore and Indonesia (Bangka, Kalimantan, Nias, Padang, Sumatra, Weh, Webb), 20–1675 m.

Sources: E.H. Taylor, 1965, David & Vogel, 1996, Saint Girons, 1972, M.J. Cox et al., 1998, Nabhitabhata, 2000, Wallach, 2001, Pauwels et al., 2002, Pauwels & Sumontha, 2003, Nabhitabhata & Chan-ard, 2005, B.L. Stuart & Emmett, 2006, and V.S. Nguyen et al., 2009.

Remarks: Original color sketches of holotype of *Argyrophis bicolor* by Harwicke (1756–1823) (1: figs. 119–120) in BMNH. Record for E Indonesia (Papua) needs confirmation (McDowell, 1974a).

77. *Typhlops naugus* R. Thomas, 1966b. Rev. Biol. Trop. (1965) 13(2): 192, fig. 4e. (*Typhlops richardi naugus*)

Type: Holotype, MCZ 77221, a 243 mm male (D.C. Leber, 11 Aug. 1964).

Type locality: "on the island of Virgin Gorda, British Virgin Islands, on the hillside above Pond Bay" [= 18º28'N, 64º25'W].

Distribution: British Virgin Islands (Virgin Gorda), NSL–245 m.

78. *Typhlops notorachius* R. Thomas & Hedges, 2007. Zootaxa (1400): 21, figs. 8h, 9d–e.

Type: Holotype, MNHNCU 4551 (formerly USNM-FN 191322), a 282–301 mm male (S. B. Hedges, R. Thomas & D. McCallister, 1 July 1990).

Type locality: "9.4 km W Imias, Guantánamo Province, Cuba, 5 meters" [= 20º04'N, 74º37'W].

Distribution: Extreme E Cuba (Guantánamo), NSL.

Source: Domínguez & Moreno, 2009.

79. *Typhlops oatesii* Boulenger, 1890a. Fauna Brit. India, Rept. Batr.: 238.

Types: Syntypes (2), BMNH 1946.1.10.51–52 (formerly BMNH 1889.4.24.13–14), longest syntype 200 mm (E.W. Oates).

Type locality: "Table Island, Cocos Group" [= Myanmar, Bay of Bengal, 14º12'N, 93º22'E, elevation NSL].

Distribution: Eastern India (Andaman & Nicobars: Middle Andaman Is.) and S Myanmar (Cocos: Table Is.), NSL–15 m.

Sources: Boulenger, 1893a, Murthy & Chakrapany, 1983 and Wallach, 2001.

Remarks: Three syntypes listed *fide* Boulenger (1893a: 238).

80. *Typhlops ocularis* H.W. Parker, 1927b. Ann. Mag. Nat. Hist. (9) 19(111): 379–380, 2 figs.

Type: Holotype, BMNH 1946.1.11.25 (formerly BMNH 1926.8.18.3), a 342 mm female.

Type locality: "Antongil Forest, Maroantsetra, N.E. Madagascar" [= Maroantsetra Forest, Antongil Bay, N Toamasina Prov., Madagascar, 15º26'S, 49º44'E, elevation ca. 10 m].

Distribution: Eastern Madagascar (Antsiranana, ext. N Toamasina, ext. SE Toliara, Nosy Be Is.), NSL–400 m.

Sources: Guibé, 1958, Glaw & Vences, 2007 and Wallach and Glaw, 2009.

T

81. *Typhlops oxyrhinus* Domínguez & Diaz, 2011. Herpetologica 67(2): 204–205, figs. 1b, 2b.

Type: Holotype, CTR 2230 (formerly IES), a 244 mm female (L. Lobaina, mid–1900s).

Type locality: "Bayate (75º21'47"N, 20º20'07"W, 338 m elevation), El Salvador Municipality, Guantánamo Province, Cuba."

Distribution: Extreme E Cuba (Guantánamo), NSL–400 m.

82. *Typhlops pachyrhinus* Domínguez & Diaz, 2011. Herpetologica 67(2): 206–207, figs. 1c, 2c.

Type: Holotype, CZACC 4.11933, a 211 mm male (E. Elso, June 1966).

Type locality: "'El Liberal' coffee plantation (coordinates not known). Cabañas Municipality, Sierra del Rosario, Pinar del Río Province, Cuba" [= ca. 22º48'N, 83º15'W, elevation ca. 400 m].

Distribution: Western Cuba (Pinar del Río), 400 m. Known only from type locality.

83. *Typhlops pammeces* A.C.L.G. Günther, 1864a. Rept. Brit. India:176, pl. 16, fig. c. (*nomen susbstitutum*)

Synonyms: *Typhlops tenuis* A.C.L.G. Günther, 1864a (*nomen praeoccupatum*), *Typhlops psammophilus* Annandale, 1906, and *Typhlops psammeces* M.A. Smith, 1943 *(nomen emendatum)*.

Type: Holotype, BMNH 1946.1.11.34, a 127 mm specimen (T.C. Jerdon, 1836–1852).

Type locality: "Madras, British India" [= Chennai, Tamil Nadu State, E India, ca. 13º00'N, 80º12'E, elevation 15 m].

Distribution: Eastern India (Tamil Nadu, Uttar Pradesh), NSL–650 m.

Sources: Wallach, 1993b, 2009 and R. Sharma, 2003, 2007.

84. *Typhlops paradoxus* R. Thomas, 1968. Copeia 1968(4): 715, fig. 2b (paratype). (*Typhlops biminiensis paradoxus*)

Type: Holotype, MCZ 92993, a 245 mm specimen (R. Forbes via T. Laska, 10 Feb. 1967).

Type locality: "7.5 miles N of Mathew Town, Great Inagua, southeastern Bahamas" [= 21º02'N, 73º39'W, elevation NSL].

Distribution: Bahamas (Great Inagua Is.), NSL.

Remarks: A valid species *fide* Thomas & Hedges, 2007.

85. *Typhlops paucisquamus* Dixon & Hendricks, 1979. Zool. Verh. (173): 23–25, figs. 1a, 2a.

Type: Holotype, MCZ 147336 (formerly MCZ 1444b), a 133 mm specimen (B. Burnet, don. 21 Dec. 1863).

Type locality: "state of Pernambuco, Brasil" [= Brazil].

Distribution: Northeastern Brazil (Pernambuco), 10 m.

86. *Typhlops perimychus* R. Thomas & Hedges, 2007. Zootaxa (1400): 15–18, figs. 8e, 9a.

Type: Holotype, USNM 564800 (formerly USNM-FN 161982), a 130–280 mm specimen (S.B. Hedges & C.A. Hass, 22 March 1987).

Type locality: "Blue Beach, U. S. Naval Base Guantánamo Bay, Cuba, five meters elevation" [= 19º54'N, 75º08'W].

Distribution: Extreme E Cuba (Guantánamo), NSL. Known only from type locality.
Source: Domínguez & Moreno, 2009.

87. *Typhlops platycephalus* A.-M.-C. Duméril & Bibron, 1844. Erpét. Gén. 6: 293–295.

Synonyms: *Typhlops platycephala* R. Thomas, 1966b, and *Typhlops brachycephalus* Slowinski & Lawson, 2002 (*nomen nudum*).
Type: Holotype, MNHN 1066, a 295 mm specimen (A. Plée, 1823–1825).
Type locality: "Martinique," (in error). Corrected to Puerto Rico *fide* Stejneger (1904: 557). Restricted to eastern, southern or interior Puerto Rico *fide* Hedges and Thomas (1991: 457).
Distribution: Puerto Rico (Arecibo, Carolina, Dorado, Guánica, Río Grande, San Germán, Palominos and Vieques Is.), NSL–650 m
Sources: K. Schmidt, 1928, R. Thomas, 1989, Hedges & Thomas, 1991, A. Schwartz & R.W. Henderson, 1991, Rivero, 1998 and Torres et al., 2000.

88. *Typhlops platyrhynchus* Sternfeld, 1910c. Mitt. Zool. Mus. Berlin 5(1): 69.

Types: Syntypes (4), ZMB 20729, a 245 mm specimen, ZMB 63442–43 (formerly ZMB 20729b–c), a 218 mm and 195 mm specimen, and MCZ 39798 (formerly ZMB 20729d), a 270–273 mm specimen (Martienssen).
Type locality: "Tanga, Deutsch-Ostafrika" [= Tanga, E Tanga Prov., NE Tanzania].
Distribution: Northeastern Tanzania (Tanga). Known only from type locality.
Sources: Roux-Estève, 1974 and Bauer et al., 2002..

89. *Typhlops porrectus* Stoliczka, 1871. J. Asiat. Soc. Bengal 40(2): 426–428, pl. 25, figs. 1–4.

Synonyms: *Typhlops mackinnoni* Wall, 1910b, *Typhlops venningi* Wall, 1913e, *Typhlops porrecta* Constable, 1949, and *Typhlops ductuliformes* M.S. Khan, 1999a.
Types: Syntypes (8), NMW 15357.1–2 and NMW 15358.1–2, 150–285 mm specimens (F. Stoliczka, 1862–1871), other syntypes lost *fide* M.A. Smith (1943: 46).
Type locality: "Hurdwár" [= Haridwar, Uttarakhand State, 29°57'N, 78°10'E, elevation 285 m], "in the neighbourhood of Calcutta" [= Kolkata, West Bengal State, 22°34N, 88°22E, elevation 10 m], "at the foot of the Parisnáth hill (in western Bengal)" [= 23°58'N, 86°08'E, elevation 275 m], "the base of the Rangnu valley below Darjíling" [= 27°02'N, 88°15'E, elevation 2125], and "south of Agra" [= Uttar Pradesh State, 27°10'N, 78°00'E, elevation 170 m].
Distribution: Southern Asia. Pakistan (Khyber Pakhtunkhwa, Punjab. Sindh), India (Bihar, Gujarat, Haryana, Himachal Pradesh, Karnataka, Kerala, Maharashtra, Orissa, Rajasthan, Tamil Nadu, Uttarakhand, Uttar Pradesh, West Bengal), E Nepal (Morang), Sri Lanka (Central, North Central, Uva), Bangladesh, Nepal (Kosi), N Myanmar, Thailand (Chiang Mai) and Singapore, NSL–2300 m.
Sources: Wall, 1911i, 1923c, M.A. Smith, 1943, Mertens 1969a, P. Silva, 1980a, Murphy, 1986, A Silva, 1990, I. Das, 1994, M.J. Cox & Nabhitabhata, 1997, M.S. Khan, 1999a–b, 2002, 2006, Wallach, 2000b, 2001, 2004, Shrestha, 2001, Schleich & Kästle, 2002, R. Sharma, 2003, 2007, Tiwari & Shah, 2004, Somaweera, 2006 and Baig et al., 2008.
Remarks: Hahn (1980: 67) and McDiarmid et al. (1999: 114) listed "Roorkee" [Uttarakhand State, 29°52'N, 77°54'E, elevation 270] as the locality for NMW 15357. *Typhlops venningi* Wall and *T. mackinnoni* Wall are possibly valid species *fide* A.H. Wynn *in* Wallach (1999: 185).

90. *Typhlops proancylops* R. Thomas & Hedges, 2007. Zootaxa (1400): 7–9, fig. 3b.

Type: Holotype, KU 272267, a 127–243 mm male (native, 13 July 1979).
Type locality: "Soliette, 5 km airline NW Fond Verettes, 363 m, Dépt. du Sud-Est, Haiti" [= 18°24'N, 71°51'W].
Distribution: Southeastern Haiti (Ouest, Sud-Est) and SW Dominican Republic (Independencia), 385–800 m.

91. *Typhlops pusillus* T. Barbour, 1914a. Mem. Mus. Comp. Zool. 44(2): 323, 2 figs.

Synonym: *Typhlops pusilla* R. Thomas, 1966a.
Type: Holotype, MCZ 8719, a 127 mm specimen (W.M. Mann, Mar.–Nov. 1913).
Type locality: "Cape Haitien, Haiti" [= Cap Haitien, Nord Dept., N Haiti, 19°45'N, 72°12'W, elevation NSL].
Distribution: Hispaniola. Haiti (Artibonite, Centre, Grand'Anse, Nord, Nord-Est, Nord-Ouest, Ouest, Sud, Sud-Est: Gonave, Grande Cayemite and Grande Tortue Is.) and Dominican Republic (Azua, Barahona, Dajabón, Distrito Nacional, Duarte, Elías Piña, Espaillat, Hato Mayor, Independencia, La Altagracial, La Ramona, La Vega, Monseñor Nouel, Monte Cristi, Peravia, Puerto Plata, Salcedo, Samaná, Sánchez Ramirez, San Cristóbal, San Juan, Santiago, Santiago Rodríguez, Valverde, Catalina and Saona Is.), NSL–730 m.
Sources: Richmond, 1964, R. Thomas, 1974b, A. Schwartz & R.W. Henderson, 1991, R. Thomas & Powell, 1994a and Domínguez & Diaz, 2011a.

92. *Typhlops rajeryi* Renoult & Raselimanana, 2009. Zootaxa (2290): 65–67, fig. 1.

Type: Holotype, ZSM 1589/2008 (formerly FGZC 3165), a 269 mm specimen (J.P. Renoult, 27 Dec. 2007).

Type locality: “Madagascar: Vatovavy Fitovinany Region, the main entrance of Ranomafana National Park, 21°15.388’S, 47°25.308’E, alt.: 918 m.”
Distribution: Southeastern Madagascar (N Fianarantsoa), 920 m. Known only from type locality.

93. *Typhlops reticulatus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 228. (*Anguis reticulata*)

Synonyms: *Anguis rostralis* Weigel, 1782, *Anguis nasutus* Gmelin, 1789, *Anguis rostratus* Latreille in Sonnini & Latreille, 1801 *(nomen emendatum), Anguis crocotatus* J.G. Schneider, 1801 (*nomen substitutum), Typhlops leucogaster* Wied-Neuwied, 1825, *Ophthalmidion crassum* Duméril *in* A.-M.-C. Duméril & Duméril, 1851, *Onychocephalus troscheli* Jan, 1861b *(nomen nudum), Typhlops reticulatus troscheli* Jan, 1863b (*nomen nudum*), *Typhlops reticulatus nigrolactea* Jan, 1864 *in* Jan & Sordelli, 1860–1866, *Typhlops reticulatus troscheli* Jan, 1864 *in* Jan & Sordelli, 1860–1866, *Typhlopus retisculatus* – Nakamura, 1938 *(nomen incorrectum),* and *Altmantyphlops reticulates wellsi* Hoser, 2012am *(nomen illegitimum).*
Type: Lectotype, specimen illustrated in Scheuchzer (1735: pl. 747, fig. 4), designated by Bauer (2012: 68).
Type locality: “America” via lectotype selection.
Distribution: Amazonia. Colombia (Amazonas, Antioquia, Ayauca, Casanare, Cauca, Coquetá, Córdoba, Guaviare, Meta, Putumayo, Santander, Vaupés), E Ecuador (Esmeraldas, Napo, Sucumbios), Venezuela (Amazonas, Barinas, Bolívar, Carabobo, District Federal, Falcón, Monagas, Portuguesa, Yaracuy, Zulia), Guyana (Barima-Waini, Cuyuni-Mazaruni, Essequibo Islands-West Demerara, Potaro-Siparuni, Upper Demerara-Berbice, Santa Rosa Is.), Suriname (Marowijne, Paramaribo, Saramacca), French Guiana (Cayenne, Saint-Laurent-du-Maroni), N Brazil (Acre, Amapa, Amazonas, Mato Grosso, Pará, Paraiba, Rondônia, Marajo Is.), Peru (Loreto, Madre de Dios) and Bolivia (Beni, La Paz, Santa Cruz), NSL–750 m.
Sources: Roze, 1966, Cunha & Nascimento, 1978, 1993, Dixon & Hendricks, 1979, Lema, 1980, Starace, 1998, Mijares-Urrutia & Arends, 2000, Rivas-Fuenmayor, 2001, Rivas-Fuenmayor et al., 2001, Doan & Arizábal, 2002, Carvajal-Cogollo, 2006, Börschig, 2007, Rojas-Runjaic et al., 2007, Navarrete et al., 2009, Caicedo-Portilla, 2011, Bauer, 2012 and C.J. Cole et al., 2013.

T

94. *Typhlops reuteri* Boettger, 1881c. Zool. Anz. 4(99): 650.

Synonym: *Typhlops lenzi* Boettger, 1882.
Type: Holotype, SMF 16589 (formerly SMF-B 7021 a), a 95 mm specimen (A. Stumpff, 1881).
Type locality: “insula Nossi-Bé, Madagascariensis,” Emended to Lukube auf Nossibe [= Lokobe, Nosy Be Is., N Antsiranana, N Madagascar, ca. 13°22’S, 48°19’E] *fide* Boettger (1898: 2).
Distribution: Northern Madagascar (N Antsiranana, Nosy Be Is.), NSL–360 m.
Sources: Guibé, 1958, Glaw & Vences, 1994 and Wallach, 2009.
Remarks: Original description cited C. Reuter as collector; corrected to A. Stumpff *fide* Boettger (1898: 2) and SMF specimen label.

95. *Typhlops richardii* A.-M.-C. Duméril & Bibron, 1844. Erpét. Gén. 6: 290–293.

Types: Syntypes (2), MNHN 3220 und RMNH 3713, longest syntype 258 mm (L.C.M. Richard, 1786).
Type locality: “île Saint-Thomas, l’une des petites Antilles” [= St Thomas, U.S. Virgin Islands, ca. 18°20’N, 64°56’W].
Distribution: Puerto Rico bank (Cayo Diablo, Cayo Icacos, Cayo Norte, Culebra, Surprise Cay), U.S. Virgin Islands (St. Croix, St. John, St. Thomas) and British Virgin Islands (Guana, Tortola).
Sources: R. Thomas, 1966a, Hedges & Thomas, 1991 and Rivero, 1998.

96. *Typhlops rostellatus* Stejneger, 1904. Rep. U.S. Natl. Mus. 1902: 686, figs. 145–147.

Synonym: *Typhlops rostellata* R. Thomas, 1966a.
Type: Holotype, USNM 25463, a 200 mm specimen (A.B. Baker, 26 Jan. 1899).
Type locality: “Lares, Porto Rico, West Indies” [= Lares, Lares Prov., N Puerto Rico, 18°18’N, 66°53’W, elevation 325 m].
Distribution: Northern Puerto Rico (Arecibo, Bayamón, Caguas, Isabela, Rio Grande, San Juan, Utuado, Vega Baja), NSL–325 m.
Sources: K.P. Schmidt, 1928, A. Schwartz & R.W. Henderson, 1991 and Rivero, 1998.

97. *Typhlops roxaneae* Wallach, 2001. Raffles Bull. Zool. 49(1): 40–42, fig. 1.

Type: Holotype, MCZ 177984 (formerly TNRC 523-549), a 231 mm female (native, 2 Oct. 1963).
Type locality: “Thailand: Phra Nakhon Si Ayutthaya Province: Bangkok, Bangkok International School, 14°20’N, 100°20’E, elevation 1–2 m,” (in error). Corrected herein to Bangkok International School, Nonthaburi Prov., S Thailand, 13°54’N, 100°32’E, elevation 10 m.
Distribution: Southern Thailand (Nonthaburi), NSL–10 m. Known only from type locality.

98. *Typhlops ruber* Boettger, 1897. Zool. Anz. 20(531): 164.

Synonym: *Typhlops rubra* Savage, 1950.

Type: Holotype, SMF 16616 (SMF-B 7031, 1a), a 225 mm specimen (O.F. von Moellendorff & O. Koch, 1897).
Type locality: "Insel Samar, Philippinen" [= Samar Island, cen. Philippines].
Distribution: Philippines (Camotes: Pacijan; Cebu, Luzon, Marinduque, Mindanao, Mindoro, Negros, Samar).
Sources: McDowell, 1974a, Alcala, 1986 and Wynn & Leviton, 1993.

99. *Typhlops ruficaudus* (Gray, 1845). Cat. Lizards Brit. Mus.: 136. (*Anilios ruficauda*)

Synonyms: *Typhlops jagorii* W.C.H. Peters, 1861c, *Typhlops dichromatus* Jan, 1863b (*nomen nudum*), *Typhlops dichromatus* Jan, 1864 *in* Jan & Sordelli, 1860–1866, and *Typhlops petersii* Steindachner, 1867d.
Types: Syntypes (3), BMNH 1946.1.11.4–6, longest syntype 250 mm (H. Cuming, Jan. 1836–June 1840).
Type locality: "Philippine Islands."
Distribution: Philippines (Luzon, Marinduque, Negros, Romblon, Sibuyan, Tablas), NSL–1065 m.
Sources: McDowell, 1974b, Alcala, 1986, A.H. Wynn & Leviton, 1993 and R. Brown et al., 1996. Sulawesi record doubtful *fide* Lang & Vogel (2005: 263).

100. *Typhlops satelles* R. Thomas & Hedges, 2007. Zootaxa (1400): 23–24, fig. 8k.

Type: Holotype, SMF 61303, a 303–350 mm specimen (Z. Vogel, 22 April 1966).
Type locality: "a public beach (0 m elevation) east of inlet to the Bahia de Cienfuegos, about 12 km airline S Cienfuegos, Cienfuegos Province, in south-central Cuba" [= 22º02'N, 80º25'W].
Distribution: Central Cuba (Cienfuegos), NSL. Known only from type locality.
Source: Domínguez & Moreno, 2009.

101. *Typhlops schmutzi* Auffenberg, 1980. Bull. Florida St. Mus. (Biol. Sci.) 25(2): 114–115, fig. 36 (left).

Type: Holotype, UF 29507, a 127 mm female (W. Auffenberg & field crew, Jan. 1970).
Type locality: "Loho Lavi, Komodo, 12 m" [= Loho Lavi, E Komodo, Lesser Sundas, SE Indonesia, 08º36'S, 119º27'E].
Distribution: Southern Indonesia (N Flores, Komodo, Sumbawa), NSL–50 m.
Sources: Wallach, 2004 and McKay & Lilley, 2012.

102. *Typhlops schwartzi* R. Thomas *in* Woods, 1989. Biogeog. West Indies: 412–414, fig. 1a.

Type: Holotype, KU 208752, a 265 mm female (natives, 11 Aug. 1973).
Type locality: "1.5 km W Jayaco, La Vega Province, República Dominicana, 244 m."
Distribution: Eastern Dominican Republic (Azua, Duarte, La Altagracia, La Vega, Puerto Plata, Samaná, San Pedro de Macoris), 30–275 m.
Sources: A. Schwartz & R.W. Henderson, 1991 and R. Thomas & Powell, 1994b.

103. *Typhlops siamensis* A.C.L.G. Günther, 1864a. Rept. Brit. India: 175, pl. 16, fig. d.

Type: Holotype, BMNH 1946.1.11.69 (formerly BMNH 1859.7.1.17), a 216 mm specimen (H. Mouhot, 1858–1860).
Type locality: "Siam" [= Thailand]. Restricted to E Thailand *fide* M.A. Smith (1923: 53).
Distribution: Indo-China. Eastern Thailand (Ko Llao Is.), Cambodia (Trapeang Chan), Laos and S Vietnam (Binh Duong, Dong Nai, Nam Bo), NSL–105 m.
Sources: E.H. Taylor, 1965, Saint Girons, 1972a, Wallach, 2001, V.S. Nguyen, 2007, V.S. Nguyen et al., 2009 and Geissler et al., 2011.

104. *Typhlops silus* Legler, 1959a. Herpetologica 15(2): 105–107, fig. 1.

Type: Holotype, KU 47469, a 126 mm specimen (C. Grant, April 1956).
Type locality: "Banes, Oriente Province, Cuba" [= Banes, Holguín Prov., E Cuba, 75º43'N, 20º58'W, elevation 53 m].
Distribution: Eastern Cuba (Granma, Guantánamo, Holguín, Santiago de Cuba), 20–570 m.
Remarks: A valid species (previously a synonym of *T. lumbricalis) fide* Dominguez & Diaz (2010a: 11).

105. *Typhlops socotranus* Boulenger, 1889b. Ann. Mag. Nat. Hist. (6) 4(23): 362.

Types: Syntypes (2), BMNH 1946.1.11.72–73 (formerly BMNH 1881.3.30.16–17), longest syntype 200 mm (I.B. Balfour, 1879–1880).
Type locality: "Socotra" [Yemen].
Distribution: Yemen (Socotra Is.), 170–550 m.
Sources: Boulenger, 1893a, Steindachner, 1903, Roux-Estève, 1974, Schätti & Desvoignes, 1999, Rösler & Wranik, 2004 and Razzetti et al., 2011.

106. *Typhlops stadelmani* K.P. Schmidt, 1936d. Proc. Biol. Soc. Washington 49: 48.

Type: Holotype, MCZ 38701, a 112 mm specimen (R.E. Stadelman, 26 Jan. 1833).
Type locality: "Subirana Valley, 2800 feet altitude, Yoro, Honduras" [ca. 15º11'N, 87º28'W, elevation 855 m].
Distribution: Northwestern Honduras (Atlántida, NW Copán, Cortés, SW Yoro), 320–1370 m.

Sources: McCranie & Wilson, 2001a, McCranie & Castañeda, 2005, Townsend et al., 2008 and McCranie, 2011a.
Remarks: A valid species (previously a synonym of *T. tenuis* Salvin) *fide* McCranie & Wilson, 2001a.

107. *Typhlops sulcatus* Cope, 1868c. Proc. Acad. Nat. Sci. Philadelphia 20(2): 128.

Synonyms: *Typhlops haitiensis* Richmond, 1964, and *Typhlops sulcata* R. Thomas, 1966a.
Type: Holotype, USNM 12371, a 168 mm specimen (W.J. Rasin).
Type locality: "Navassa Island, southwest from St. Domingo" [West Indies, 18º24'N, 75º01'W].
Distribution: Hispaniola. Southern Haiti (Ouest, Sud, Gonáve and Grande Cayemite Is.), SW Dominican Republic (Baharona, Independencia, Pedernales, Peravea and Alto Velo Is.) and Navassa Is., NSL–25 m.
Sources: Richmond, 1964, R. Thomas, 1966c, A. Schwartz & R.W. Henderson, 1991, R. Thomas & Powell, 1994c and Powell, 1999.

108. *Typhlops sylleptor* R. Thomas & Hedges, 2007. Zootaxa (1400): 10–12, fig. 3d.

Type: Holotype, USNM 564804 (formerly USNM-FN 192317), a 118–214 mm specimen (M. Leal & R. Thomas, 7 June 1991).
Type locality: "8.0 km WSW Baradères, Dépt. de la Grande Anse, Haiti, 420 m" [= 18º30'N, 73º39'W].
Distribution: Extreme SW Haiti (Grand'Anse), 375–420 m.

109. *Typhlops syntherus* R. Thomas, 1965b. Copeia 1965(4): 436–437, figs. 1, 2b.

Type: Holotype, MCZ 77215, a 200 mm specimen (D.C. Leber & R. Thomas, 25 June 1964).
Type locality: "5 km north of Pedernales, Pedernales Province, Dominican Republic" [= 18º05'N, 71º44'W, elevation 90 m].
Distribution: Southwestern Dominican Republic (Pedernales), 15–90 m.
Sources: R. Thomas, 1974b, A. Schwartz & R.W. Henderson, 1991 and L. White et al., 1992.

110. *Typhlops tasymicris* R. Thomas, 1974b. Occ. Pap. Mus. Zool., Louisiana St. Univ. (46): 1–2, fig. 1a.

Type: Holotype, UF 21547, a 181 mm female (F.G. Thompson, 9 May 1968).
Type locality: "1 mi. E Vincennes, St. David Parish, Grenada, Lesser Antilles" [= 12º03'N, 61º41'W, elevation 170 m].
Distribution: Lesser Antilles (Grenada: St David) and St. Vincent and Grenadines (Union), 15–180 m.
Sources: Wallach, 2000a, Yorks et al., 2003 and Rivera-Roriguez et al., 2011.

111. *Typhlops tenebrarum* E.H. Taylor, 1947b. Univ. Kansas Sci. Bull. 31(13): 292–294, fig. 2.

Type: Holotype, EHT-HMS 30063 (formerly EHT-CC C186), a 111 mm specimen (E.H. Taylor, 5 Oct. 1944), lost *fide* Hahn (1980a: 73).
Type locality: "12 miles north of Trincomalee, Ceylon" [= near Nilaveli, 18 km N Trincomalee, N Eastern Prov., NE Sri Lanka, ca. 8°43'N, 81°11'E, elevation NSL *fide* Bauer & Silva, 2007: 5].
Distribution: Sri Lanka (N Eastern, Western), NSL.
Sources: P. Silva, 1980a, A. Silva, 1990, Wallach, 1993b, 2009 and Somaweera, 2006.

112. *Typhlops tenuicollis* (W.C.H. Peters, 1864a). Mber. Kønigl. Akad. Wiss. Berlin 1864(4): 272–273, pl., figs. 2, 2a–c. (*Onychocephalus tenuicollis*)

Synonym: *Typhlops theobaldanus* Stoliczka, 1871.
Type: Holotype, ZMB 5042, a 365 mm specimen.
Type locality: "Himalaya" [= mountains in Nepal, India or Bhutan].
Distribution: Northeastern India.
Sources: M.A. Smith, 1943 and Bauer et al., 2002.

113. *Typhlops tenuis* Salvin, 1860. Proc. Zool. Soc. London 28(1): 454.

Synonyms: *Typhlops basimaculatus* Cope, 1867b, *Typhlops perditus* W.C.H. Peters, 1869, *Typhlops praelongus* F. Müller, 1885, and *Typhlops praelongis* E.H. Taylor, 1940b *(nomen emendatum)*.
Type: Holotype, BMNH 1946.1.11.71 (formerly BMNH 1864.1.26.47), a 305 mm specimen (native).
Type locality: "Coban in Guatemala" [= Cobán, Alta Verapaz Dept., N Guatemala, 15º28'N, 90º22'W, elevation 1330 m].
Distribution: Southern Mexico (Puebla, Tabasco, cen. Veracruz) and Guatamala (Alta Verapaz, Baja Verapaz), 95–1520 m.
Sources: E.H. Taylor, 1940b, Stuart, 1963, Dixon & Hendricks, 1979, L.D. Wilson & Meyer, 1985, Villa et al., 1988, McCranie & Wilson, 2001a, Townsend et al., 2008 and García-Vázquez et al., 2009.

114. *Typhlops tetrathyreus* R. Thomas *in* Woods, 1989. Biogeog. West Indies: 414–415, fig. 1b.

Type: Holotype, KU 208793, a 240 mm male (native, 28 Nov. 1970).
Type locality: "3 mi. (4.8 km) N Pétionville, Dépt. de l'Ouest, Haiti" [= 18º33'N, 72º17'W, elevation ca. 100 m].
Distribution: Southern Haiti (Centre, Ouest), NSL–545 m.

Sources: A. Schwartz & R.W. Henderson, 1991, R. Thomas & Powell, 1994d and Domínguez & Diaz, 2011a.

115. *Typhlops thurstoni* Boettger, 1890b. Ber. Senck. Naturf. Ges. 1890: 297–298.

Synonyms: *Typhlops walli* Procter, 1924, and *Typhlops hurstonii* – Bourret, 1936 *(nomen incorrectum)*.
Type: Holotype, BMNH (formerly MGM), a 240 mm specimen (F. Thurston).
Type locality: "Nilgiri Hills, Brit. Ostindien" [= Nilgiri Hills, cen. Westsrn Ghats, W Tamil Nadu/SE Kerala States, SW India].
Distribution: Southwestern India (Western Ghats of Kerala, Tamil Nadu), NSL–1300 m.
Sources: Procter, 1924, Murthy, 1990 and R. Sharma, 2003, 2007
Remarks: Holotype erroneously listed in SMF *fide* R. Sharma (2007: 39).

116. *Typhlops titanops* R. Thomas *in* Woods, 1989. Biogeog. West Indies: 415–417, fig. 1c.

Type: Holotype, KU 208812, a 166 mm female (R. Thomas, 5 Aug. 1975).
Type locality: "El Mulito on Río El Mulito, 18 km N Pedernales, Pedernales Province, República Dominicana, 500 feet (152 m)."
Distribution: Hispaniola. Southeastern Haiti (Ouest) and SW Dominican Republic (Pedernales), 150–730 m.
Sources: A. Schwartz & R.W. Henderson, 1991, R. Thomas & Powell, 1995c and Domínguez & Diaz, 2011a.

117. *Typhlops trangensis* E.H. Taylor, 1962. Univ. Kansas Sci. Bull. 43(7): 251–253, fig. 14.

Type: Holotype, FMNH 178238 (formerly EHT-HMS 35754), a 155 mm specimen (E.H. Taylor, 20 May 1958).
Type locality: "Khao Chong Forest Experimental Station, Trang province, Thailand" [= ca. 07°33'N, 99°47'E].
Distribution: Peninsular Thailand (Trang). Known only from type locality.
Sources: E.H. Taylor, 1965 and Wallach, 2001.
Remarks: Taxonomic status uncertain *fide* Wallach (2001: 46).

118. *Typhlops trinitatus* Richmond, 1965. Proc. Biol. Soc. Washington 78: 121–123, fig. 1.

Type: Holotype, AMNH 89820, a 240 mm specimen (J.A. Oliver & J. Tee-Van, 1 April 1956).
Type locality: "Trinidad, in log beside Arima Road, 3 miles above Simla" [= William Beebe Tropical Research Station, Trinidad & Tobago, 10°41'N, 61°17'W, elevation 240 m].
Distribution: Trinidad & Tobago (Tobago, Trinidad), 30–240 m.
Sources: R. Thomas, 1974b, Emsley, 1977, Dixon & Hendricks, 1979, J.C. Murphy, 1997 and Boos, 2001.

119. *Typhlops tycherus* Townsend, Wilson, Ketzler & Luque-Montes, 2008. Zootaxa (1932): 20–23, figs. 2–3.

Type: Holotype, UF 151797 (formerly JHT 2376), a 371 mm female (L.E. Chakerian & L. P. Ketzler, 3 Feb. 2008).
Type locality: "on road between San José de Los Andes and El Cedral (14°54.241'N. 88°05.489'W), 1550 m elevation, western slope of Montaña de Santa Bárbara, Parque Nacional Montaña, Depto. Santa Bárbara, Honduras," (partly in error). Corrected to eastern slope of Montaña de Santa Bárbara *fide* McCranie (2011: 58).
Distribution: Western Honduras (Santa Bárbara), 1550 m.
Source: McCranie, 2011a.

120. *Typhlops unilineatus* (A.-M.-C. Duméril & Bibron, 1844). Erp. Gén. 6: 278–278. (*Onychocephalus unilineatus*)

Type: Holotype, MNHN 1064, a 310 mm specimen (Ms. Richard via Rivoire).
Type locality: "Cayenne" [= French Guiana, 04°55'N, 52°20'W, elevation 10 m].
Distribution: Northern French Guiana (N Cayenne), NSL.
Sources: Jan, 1864 *in* Jan & Sordelli, 1860–1866, Boulenger, 1893a, Peters & Orejas-Miranda, 1970 and Dixon & Hendricks, 1979.
Remarks: Suriname record needs confirmation *fide* A.H. Wynn *in* McDiarmid et al. (1999: 123).

121. *Typhlops veddae* E.H. Taylor, 1947b. Univ. Kansas Sci. Bull. 31(13): 294–295, fig. 3.

Type: Holotype, FMNH 100033 (formerly EHT-HMS 30089 & EHT-CC 50), a 91 mm specimen (E.H. Taylor, 29 Sept. 1944).
Type locality: "12 mi. north of Trincomalee, Ceylon" [= near Nilaveli, 18 km N Trincomalee, N Eastern Prov., NE Sri Lanka, ca. 8°43'N, 81°11'E, elevation NSL *fide* Bauer & Silva, 2007: 5].
Distribution: Northeastern Sri Lanka (N Eastern), NSL. Known only from type locality.
Sources: P. Silva, 1980a, A. Silva, 1990, Wallach, 1993b, 2009 and Somaweera, 2006.

122. *Typhlops vermicularis* Merrem, 1820. Tent. Syst. Amph.: 158.

Synonyms: *Anguis lumbricalis* Daudin, 1803d, *Typhlops flavescens* Bibron & Bory de Saint-Vincent *in* Bory de Saint-Vincent, 1833, *Typhlops syriacus* Jan, 1863b, *Typhlops reticulatus flavescens* Jan 1864 *in* Jan &

Sordelli, 1860–1866, *Typhlops persicus* Blanford, 1874, and *Typhlops vermicalis* – Brehm, 1878 *(nomen incorrectum)*.

Type: Holotype, not designated, lost *fide* Hahn (1980: 76).

Type locality: "Archipelago, Asia." Restricted to Greek Islands *fide* Mertens & Müller (1928: 49).

Distribution: Southeastern Europe, SW Asia and Egypt. Croatia (Dugi Otok Is.), S Serbia, SW Montenegro, SE Kosovo, W Albania, SE Macedonia, S Bulgaria (Blagoevgrad, Burgas, Haskovo, Kardzhali, Pazardzhij, Sveti Ivan Is.), Greece (Aitolia Kai Akarnania, Akhaia, Argolis, Arkadhia, Attiki, Dráma, Évros, Grevená, Ilía, Imathia, Ioánnina, Korinthía, Lakonia, Lárisa, Magnisia, Messinia, Préveza, Thessaloniki, Voiotia, Andros, Chios, Epidavros, Euboea, Kalymnos, Kérkyra, Kithira, Korfu, Kos, Kreta, Lefkas, Leros, Lésvos, Megisti, Náxos, Nidri, Patmos, Rhodos, Salamis, Samos, Skiros and Thásos Is.), Cyprus, SW Turkey (Adana, Adiyaman, Antalya, Aydin, Canakkale, Denizli, Diyarbakir, Gaziantep, Hakkari, Isparta, Izmir, Kilis, Konya, Manisa, Mardin, Mersin, Mugla, Sanliurfa, Siirt, Sirnak, Urfa, Bozcaada, Ciplak, Dereköy, Fener, Gazipasa, Gökçeada, Hekim, Kalem, Karantina, Kekova, Koyun, Marmara, Orak, Pasalimani, Silvan, Sirnak, and Yilan Is.), SW Russia (E Dagestan), SE Georgia, S Armenia, Azerbaijan, W Uzbekistan, SW Turkmenistan, SW Tajikastan, Syria (Damascus, Halab), Jordan (Ajloun, Amman, Balqa, Irbid, Jarash, Mafraq, Tafilah), W Lebanon (Beirut, S Beqaa, Mont- Liban, Nabatiye), Israel (Central, Gaza Strip, Golan Heights, Haifa, Jerusalem, Northern, Tel Aviv, West Bank), NE Egypt (Beheira, Cairo, Faiyum, North Sinai), W Saudi Arabia (Jazan), Iraq (Baghdad, Dhi Qar), Iran (Central, East Azarbaijan, Fars, Golestan, Ilam, Kerman, Kermanshah, Khuzestan, Lorestan, Markazi, Mazandaran, Razavi Khorasan, Tehran, West Azarbaijan, Kaboudan Is.) and NW Afghanistan (Herat), NSL–1900 m.

T

Remarks: Records from Crete, Kazakhstan and Pakistan need confirmation *fide* Bruno & Maugeri (2001: 77). *Typhlops syriacus* Jan a valid species *fide* Kornilios et al. (2012: 867).

123. *Typhlops violaceus* E.H. Taylor, 1947b. Univ. Kansas Sci. Bull. 31(13): 289–290.

Type: Holotype, FMNH 100068 (formerly EHT-HMS 30091 & EHT-CC C170), a 111 mm specimen (E.H. Taylor, 5 Oct. 1944).

Type locality: "12 miles north of Trincomalee, Ceylon" [= near Nilaveli, 18 km N Trincomalee, N Eastern Prov., NE Sri Lanka, ca. 8°43'N, 81°11'E, elevation NSL *fide* Bauer & Silva, 2007: 5].

Distribution: Northeastern Sri Lanka (N Eastern), NSL. Known only from type locality.

Sources: P. Silva, 1980a, A. Silva, 1990, Wallach, 1993b, 2009 and Somaweera, 2006.

124. *Typhlops wilsoni* Wall, 1908i. J. Bombay Nat. Hist. Soc. (1907–1908) 18(4): 796.

Type: Holotype, formerly BMNH, a 343 mm specimen (A.T. Wilson), lost *fide* Hahn (1980: 76).

Type locality: "Maidan Mihaftan, 30 m. E. of Shushtar in S.W. Persia" [= Khuzestan, Iran, 32º02'N, 49º23'E, elevation ca. 300 m].

Distribution: Southwestern Iran (Khuzestan), ca. 300 m. Known only from type locality.

125. *Typhlops yonenagae* Rodrigues, 1991. Pap. Avul. Zool. 37(22): 343–345, figs. 1–2.

Type: Holotype, MZUSP 10086, a 101 mm specimen (M.T. Rodrigues, 7 Feb. 1989).

Type locality: "Brasil: Bahia: Santo Ignácio (11°06'S, 42° 44'W)" [= Santo Inácio, elevation 530 m].

Distribution: Eastern Brazil (Bahia), 530 m. Known only from type locality.

126. *Typhlops zenkeri* Sternfeld, 1908a. Sitz. Ges. Naturf. Freunde Berlin 1908(4): 92.

Synonym: *Typhlops vermis* Boulenger, 1914c.

Type: Holotype, ZMB 11091, a 135 mm specimen (Morgan).

Type locality: "Kribi (Kamerun)" [= Kribi, ext. W Sud Prov., SW Cameroon, 02º56'N, 09º55'E, elevation 20 m].

Distribution: Southern Cameroon (Sud), 20–620 m.

Sources: Wallach, 1993b and Chirio & LeBreton, 2007.

U

UMBRIVAGA Roze, 1964 (Xenodontidae)

Synonym: *Umbravaga* – Dixon & Soini, 1986 *(nomen incorrectum).*
Type species: *Umbrivaga mertensi* Roze, 1964.
Distribution: Northern South America.
Sources: J.A. Peters & Orejas-Miranda, 1970, Markezich & Dixon, 1979, Zaher et al., 2009 and Vidal et al., 2010.
Remarks: A synonym of *Erythrolamprus fide* Grazziotin et al., 2012.

1. *Umbrivaga mertensi* Roze, 1964. Senck. Biol. 45(3–5): 536–539, figs. 1–5.

Type: Holotype, MBUCV 3046, a 345 mm male (L. Aristeguieta, April 1953).
Type locality: "Parque Nacional Henri Pittier (Rancho Grande), estado Aragua, Venezuela, in a cloud forest, approximately 1000 meters above sea level."
Distribution: Northern Venezuela (Aragua, Distrito Federal), 1000 m.
Sources: Roze, 1966a and Navarrete et al., 2009.

2. *Umbrivaga pyburni* Markezich & Dixon, 1979. Copeia 1979(4): 698–700, figs. 1, 2 (upper).

Synonym: ? *Liophis leucogaster* Jan, 1863a.
Type: Holotype, UTA 3861, a 304 mm male (J.K. Salser, 20 Oct. 1973).
Type locality: "Loma Linda, Departmento de Meta, Colombia" [= Loma Linda, cen. Meta Dept., Colombia, 3°18'N, 73°22'W, elevation 285 m].
Distribution: Central Colombia (Meta), 285 m. Known only from type locality.
Source: Pérez-Santos & Moreno, 1988.

3. *Umbrivaga pygmaea* (Cope, 1868b). Proc. Acad. Nat. Sci. Philadelphia 20(2): 103. (*Liophis pygmaeus*)

Synonym: ? *Liophis leucogaster* Jan, 1863a [fide Dixon, 1980: 10, 20].
Type: Holotype, ANSP 6668, a 176 mm specimen (J. Orton, winter 1867–1868).
Type locality: "Napo, or neighboring pt. of Maranon" [Peru].
Distribution: Amazonia. Colombia, French Guiana, N Brazil (Amazonas, Pará), Ecuador (Napo, Pastaza) and E Peru (Loreto), 50–100 m.
Sources: Dixon, 1980, Pérez-Santos & Moreno, 1988, 1991, Duellman & Mendelson III, 1995, Martins & Oliveira, 1998, Fernandes et al., 1999, Vigle, 2008 and Kawashita-Ribeiro et al., 2011.
Remarks: Transferred to *Umbrivaga fide* Markezich & Dixon, 1979.

UNGALIOPHIS F. Müller, 1880 (Ungaliophiidae)

Synonyms: *Peropodum* F. Müller, 1878b *(nomen illegitimum), Peropodum* Bocourt, 1882 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909, *Ungualiophis* Cope, 1887c *(nomen emendatum),* and *Muzaliophis* – Briceño-Rossi, 1934 *(nomen incorrectum).*
Type species: *Ungaliophis continentalis* F. Müller, 1880.
Distribution: Mesoamerica and Colombia.
Sources: L.C. Stuart, 1954b, Bogert, 1968a, Stimson, 1969, Villa & Wilson, 1990, Zaher, 1994, Walls, 1998a, McDiarmid et al., 1999, M.S.Y. Lee et al., 2007 and G. Köhler, 2008.

1. *Ungaliophis continentalis* F. Müller, 1880. Verh. Naturf. Ges. Basel (1882) 7(1): 142.

Synonym: *Peropodum guatemalensis* Bocourt, 1882 *in* A.H.A. Duméril, Bocourt & Mocquard, 1870–1909.
Type: Holotype, NMBA 427, a 760 mm female (G. Bernoulli, 1877).
Type locality: "Guatemala." Specified as Retaluléu, costa grande v. Guatémala *fide* F. Müller (1878: 59 & 652) [= Retalhuleu, Retalhuleu Dept., SW Guatemala, 14°22'N, 91°45'W, elevation 65 m].
Distribution: Mesoamerica. Southeastern Mexico (E Chiapas), SW Guatemala (Retalhuleu), Honduras (Atlántida, Francisco Morazán) and Nicaragua (Matagalpa), 65–2300 m.
Sources: Conant, 1966, Kramer, 1978, L.D. Wilson & Meyer, 1985, R.M. Burger, 1995, McCranie, 1996, 2011 and G. Köhler, 1997.
Remarks: Original description in F. Müller (1878: 591, 652–654, pl. 1, figs. a, a1–a3). Holotype erroneously listed as NMBA 426 *fide* L. Stuart (1963: 85).

2. *Ungaliophis panamensis* K.P. Schmidt, 1933a. Smithson. Misc. Coll. 89(1): 12–13.

Synonym: *Ungaliophis danieli* Prado, 1941e.
Type: Holotype, USNM 54059, a 500 mm specimen (E.A. Goldman [Smithsonian Biol. Surv.], 6 June 1911).
Type locality: "Cerro Brujo, Panama, altitude 2,000 feet."

Distribution: Lower Central America and Colombia. Southern Nicaragua (Atlántico Sur), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama (Colón) and W Colombia (Antioquia), NSL–2100 m.

Sources: M.J. Corn, 1974, G. Köhler, 1999b, Savage, 2002 and J.C. Murphy & Schlager, 2003.

URAEUS Wagler, 1830 (Elapidae)

Synonyms: *Uracus* – J. Müller, 1832 *(nomen incorrectum), Otracma* – A.-M.-C. Duméril & Bibron, 1844 *(lapsus calami),* and *Wellsus* Hoser, 2009c *(nomen illegitimum).*

Type species: *Coluber haje* Linnaeus, 1758.

Distribution: Africa and Arabia.

Sources: F. Werner, 1923b, Bogert, 1943, Klemmer, 1968, Broadley, 1968c, 1974, Minton et al., 1970, Golay, 1985, Szyndlar & Rage, 1990, Ulber, 1995, Golay et al., 1993, Keogh, 1998, David & Ineich, 1999, Slowinski & Keogh, 2000, Dobiey & Vogel, 2007, Wüster et al., 2007, Hoser, 2009c, 2012a, e, Wallach et al., 2009 and Zaher et al., 2009, 2012.

1. *Uraeus anchietae* (Bocage, 1879). J. Sci. Math. Phys. Nat., Lisboa (1879–1882) 7(26): 89–90. (*Naja anchietae*)

Synonyms: *Naia anchietae barotseensis* Angel, 1921a, and *Naja anchieta* – Bethencourt-Ferreira, 1930 *(nomen incorrectum).*

Type: Lectotype, MBL 1987, designated by Broadley & Wüster (2004: 111), destroyed by fire 18 March 1978.

Type locality: "Caconda, Angola" [= Caconda, Huíla Distr., NW Angola, 13°44'S, 15°04'E, elevation 1700 m].

Distribution: Southern Africa. Angola (Bie, Cuando Cubango, Cuanza Norte, Huambo, Huíla, Lunda, Namibe), SE Democratic Republic of the Congo (Katanga), W Zambia (Central, Luapula, Southern, Western, Chilubi Is.), N Namibia (Caprivi, Kunene, Ohangwena, Okavango, Omaheke, Omusati, Oshana, Oshikoto, Otjozondjupa), N Botswana (Central, Ghanzi, North West) and NW Zimbabwe (Matabeleland North), NSL–2045 m.

Sources: Mertens, 1955, 1971, Laurent, 1964a, Buys & Buys, 1983, Auerbach, 1985, 1987, Broadley, 1995a, Broadley et al., 2003, M. Griffins, 2003, Broadley & Wüster, 2004, J.-F. Trape et al., 2009 and Broadley & Blaylock, 2013.

2. *Uraeus annuliferus* (W.C.H. Peters, 1854). Mber. Königl. Akad. Wiss. Berlin 1854(11): 624–625. (*Naja haje annulifera*)

Type: Holotype, ZMB 2813, a 1650 mm specimen (W.C.H. Peters, June 1843–Aug. 1847).

Type locality: "Tette" [= Tete, Tete Prov., Mozambique, 16°10'S, 33°36'E, elevation 125 m].

Distribution: Southeastern Africa. Zambia (Northern, Southern, Western), S Malawi (Southern), Mozambique (Gaza, Inhambane, Manica, Safala, Tete, Zambézia), Zimbabwe (Bulawayo, Manicaland, Mashonaland Central, Mashonaland East, Mashonaland West, Masvingo, Matabeleland North, Matabeleland South, Midlands), SE Botswana (Central, Gaborone, Kgalagadi, Kgatleng, North East, Southern), Swaziland and NE South Africa (Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, North West), NSL–1375 m.

Sources: Auerbach, 1985, 1987, Broadley & Cock, 1975, Broadley, 1995a, Clauss & Clauss, 2002, Broadley et al., 2003, Broadley & Wüster, 2004, J.-F. Trape et al., 2009 and Broadley & Blaylock, 2013.

Remarks: Original description reprinted in W.C.H. Peters (1855: 54).

3. *Uraeus arabicus* (Scortecci, 1932a). Atti Soc. Ital. Sci. Nat. 71: 47–49. (*Naja haie arabica*)

Types: Syntypes (5), ISMF, a 1620 mm male, 1535 mm, 1095 mm, and 900 mm females, and a 685 mm juvenile (E. Dubbiosi, Aug. 1928–July 1929).

Type locality: "dintorni di Sana, Yemen, a circa 2400 metri sul livello del mare" [= vicinity of Sana'a, Amanat Al Asimah Govern., W Yemen, 15°21'N, 44°12'E, elevation ca. 2400 m].

Distribution: Southwestern Arabia. Southwestern Saudi Arabia (Asir, Bahah, Jazan, Madinah, Makkah, Qizan), W Oman (Dhofar) and Yemen (Abyan, Ad Dali', Al Bayda, Dhamar, Lahij, Sana'a, Shabwah), NSL–2400 m.

Sources: Gasperetti, 1988 and J.-F. Trape et al., 2009.

Remarks: Gasperetti (1974: 57 & 1988: 427) listed a holotype (without number) among the type series. A highland species that is washed down to lowlands during floods *fide* Gasperetti (1988: 293). A valid species *fide* J.-F. Trape et al., 2009.

4. *Uraeus haje* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 225. (*Coluber haje*)

Synonyms: *Cerastes candidus* Laurenti, 1768, *Coluber candidissimus* Lacépède, 1789 (*nomen rejiciendum*), *Naja haje viridis* W.C.H. Peters, 1873b, *Naja haje nigra* F. Müller, 1885, *Naja haie* Boulenger, 1896a *(nomen emendatum), Naja haje negra* Bethencourt-Ferreira, 1930 *(nomen emendatum),* and *Naja haje legionis* Valverde, 1989b.

Type: Holotype, NHR (formerly MAFR), a 2000 mm specimen, lost *fide* Kramer & Schnurrenburger (1963: 536).

Type locality: "Aegypto inferiore" [= Lower Egypt].

Distribution: Africa. Western Sahara (N Rio de Oro, Saguia El Hamra), S Morocco (Agadir, Essaouira, Figuig, Kaar es Souk, Marrakech,

Oujda, Ouarzazate, Safi, Tan Tan, Tiznit), N Algeria (Béchar, El Oued, Naama), S Tunisia (Bizerte, Gabès, Gafsa, Kairouan, Kasserine, Medenine, Sfax, Sidi Bou Zou, Sousse, Tebessa), N Libya (Al Jabal Al Akhdar, Al Khums, Al Murqub, Banghazi, Darnah, Jabal al-Akhdar, Tripoli), Egypt (Alexandria, Assiut, Aswan, Beheira, Beni Suef, Cairo, Faiyum, Giza, Kafr El-Shaikh, Menufia, N Matrouh, Minya, Qena, Sohag), Senegal (Dakar, Fatick, Kédougou, Louga, Tambacounda, Thiès), Guinea-Bissau (Bolama Is.), Guinea, SW Mali (Kayes, Koulikoro, Mopti, Ségou, Sikasso, S Tomboucto), Burkina Faso (Centre, Centre-Nord, Centre-Ouest, Est, Haute-Bassins, Sahel, Sud-Ouest, Volta-Noire), N Ghana (Upper West), Niger (W Agadez, Dosso, Maradi, Tahoua, Zinder), Nigeria (Borno, Kaduna, Kwara), N Cameroon (Extreme-Nord, Nord), SW Chad (Mayo-Kebbi), N Central African Republic (Vakaga), NE Democratic Republic of the Congo (Orientale), Sudan (Al Jazirah, Al Khartum, An Nil Al Azraq, Ash Shaqiyah, Janub Kurdufan, Nahr An Nil, Sennar), SE South Sudan (Eastern Equatoria), Eritrea (Anseba, Cenral, Gash-Barka, Northern Red Sea, Southern), Ethiopia (Arussi, Gemu Gofa, Hararge, Shoa, Sidamo), N Somalia (Awdal, Bari, Sanaag, Sool, Togdheer, Woqooyi Galbeed), Kenya (Central, S Coast, S Eastern, Nairobi, S Rift Valley, Western), N Uganda (N Eastern, Northern, N Western) and N Tanzania (Arusha, Dodoma, Morogoro, Shinyanga, Singida, Tanga, Zanzibar Is.), NSL–2000 m.

Sources: J. Anderson, 1898, Doumergue, 1901, Mayet, 1903, Loveridge, 1923, 1928, 1953, 1957a, Scortecci, 1928, 1939a–b, Zavattari, 1930a, Flower, 1933, Corkill, 1935, Foley & Parrot, 1935, Bogert, 1940, 1943, Villiers, 1950a–b, 1953, 1975, Chpakowsky & Chnéour, 1954, Mertens, 1955a, 1971, Laurent, 1956a, Saint-Girons, 1956, Condamin, 1958, Domergue, 1959a–b, Sweeney, 1961, Witte, 1962, Kramer & Schnurrenberger, 1963, Roussel & Villiers, 1965, Corkill & Cochrane, 1965, Bons, 1967, 1972, Broadley, 1968c, Marx, 1968, Hughes & Barry, 1969, Papenfuss, 1969, Roman, 1969, 1973b, 1976, 1980, Visser, 1972, V.F.M. 5. *Uraeus niveus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 223. (*Coluber niveus*)

Synonyms: *Vipera flava* Merrem, 1820, *Naja gutturalis* A. Smith, 1838, *Naja intermixta* A.-M.-C. Duméril, Bibron & Duméril, 1854b, and *Naja haje capensis* Jan, 1863b (*nomen nudum*).

Type: Holotype, NHR Lin-91 (formerly MDG), a 975 mm male.

Type locality: "Africa." Restricted to Cape of Good Hope, South Africa *fide* V.F.M. FitzSimons (1962a: 297).

Distribution: Southwestern Africa. Southern Namibia (Erongo, Hardap, Karas, Khomas, Omaheke), SW Botswana (Central, Ghanzi, Kgalagadi), W Lesotho and W South Africa (Eastern Cape, W Free State, Northern Cape, North West, Western Cape), NSL–600 m.

Sources: Mertens, 1955, 1971, V.F.M. FitzSimons, 1962, 1974, Visser, 1972, De Waal, 1978, Visser & Chapman, 1978, Broadley, 1983, 1990, Buys & Buys, 1983, Auerbach, 1987, Patterson, 1987, Branch, 1988, Spawls & Branch, 1995, Bauer & Branch, 2001, and Clauss & Clauss, 2002,

Broadley & Wüster, 200 and Broadley & Blaylock, 20134.

6. *Uraeus senegalensis* (Trape, Chirio & Wüster *in* J.F. Trape, Chirio, Broadley & Wüster, 2009). Zootaxa (2236): 12–18, figs. 4–6. (*Naja senegalensis*)

Type: Holotype, MNHN 2008.74 (formerly IRD S-8549), a 1430 mm male (B. N'Dao, Sept. 2008).

Type locality: "near Dielmo (13º43'N, 16º25'W), West Africa" [= vicinity of Dielmo, Fatick Region, SW Senegal, 13º43'N, 16º25'W, elevation 30 m].

Distribution: West Africa. Senegal (Dakar, Fatick, Kaolack, Kédougou, Tambacounda, Thiès), NE Guinea (Kankan), SW Mali (Kayes, Koulikoro, Mopti, Ségou, Sikasso), Burkina Faso (Centre, Centre-Nord, Centre-Ouest, Est, Hauts-Bassins, Sahel, Sud-Ouest, Volta-Noire), N Ghana (Upper West), N Benin (Alibori), Niger (S Niamey, Maradi) and Nigeria (Kwara, North-Eastern), NSL–370 m.

Sources: Chirio, 2009, J.-F. Trape et al., 2009, Wallach et al., 2009, and Hughes, 2013.

UROMACER A.-M.-C. Duméril, Bibron & Duméril, 1854a (Xenodontidae)

Synonyms: *Megalocercus* A.H.A. Duméril, 1859, *Uromacre* – Marschall, 1873 *(nomen incorrectum), Uromaces* – Palacky, 1898 *(nomen incorrectum),* and *Neomacer* – Cope, 1900 *(nomen incorrectum).*

Type species: *Dendrophis catesbyi* Schlegel, 1837.

Distribution: Hispaniola.

Sources: H.S. Horn, 1969, A. Schwartz & R.W. Henderson, 1984a, 1988, 1991, Rodríguez-Robles & Greene, 1996, R.W. Henderson & Powell, 2009 and Zaher et al., 2009.

1. *Uromacer catesbyi* (Schlegel, 1837). Essai Phys. Serp. 1: 156–157, 2: 226–227. (*Dendrophis catesbyi*)

Synonyms: *Uromacre castesbyi* – A.-M.-C. Duméril, Bibron & Duméril, 1854b *(nomen incorrectum), Uromacer scandax* Dunn, 1920a, *Uromacer catesbyi cereolineatus* A. Schwartz, 1970a, *Uromacer catesbyi frondicolor* A. Schwartz, 1970a, *Uromacer catesbyi hariolatus* A. Schwartz, 1970a, *Uromacer catesbyi inchausteguii* A. Schwartz, 1970a, *Uromacer catesbyi insulaevaccarum* A. Schwartz, 1970a, and *Uromacer catesbyi pampineus* A. Schwartz, 1970a.
Types: Syntypes (2), MNHN 8670–71, an 1165 mm specimen and a 1095 mm specimen lacking a skull (A. Ricord, 1826–1834).
Type locality: "île de St. Domingue" [= Dominican Republic, Hispaniola].
Distribution: Haiti (Artibonite, Nord, Nord-Ouest, Ouest, Sud, Gonâve, Petite Cayemite, Grande Cayemite, Tortuga and Vache Is.) and Dominican Republic (Baoruco, Barahona, Dajabón, Distrito Nacional, Elías Piña, El Seibo, Espillat, Hato Mayor, Independencia, La Altagracia, La Estrelleta, La Romana, La Vega, María Trinidad Sánchez, Monte Christi, Pedernales, Peravia, Puerto Plata, Salcedo, Samaná, San Cristóbal, San Pedro de Macorís, Santiago, Catalina and Saona Is.), NSL–1525 m.
Sources: A. Schwartz, 1970a and A. Schwartz & R.W. Henderson, 1984b.

2. *Uromacer frenatus* (A.C.L.G. Günther, 1865). Ann. Mag. Nat. Hist. (3) 15(86): 94–95, pl. 2, fig. b. (*Ahaetulla frenata*)

Synonyms: *Uromacer inornatus* S.W. Garman, 1887b, *Uromacer dorsalis* Dunn, 1920a, *Uromacer wetmorei* Cochran, 1931, and *Uromacer frenatus chlorauges* Schwartz, 1976.
Type: Holotype, BMNH 1946.1.6.70, a 1320 mm male.
Type locality: Unknown. Designated as Haiti *fide* Cochran (1941: 335).
Distribution: Southwestern Haiti (Grand'Anse, Ouest, Sud, Sud-Est, Gônave, Grande Cayemite, Grosse Caye and Vache Is.) and SW Dominican Republic (Barahona, Independencia, Pedernales, Beata Is.), NSL–915 m.
Sources: Horn, 1969, A. Schwartz, 1976, 1979a and R.W. Henderson & Schwartz, 1984b.

U

3. *Uromacer oxyrhynchus* A.-M.-C. Duméril, Bibron & Duméril, 1854a. Erpét. Gén. 7(1): 722–724, pl. 83, fig. 1.

Type: Holotype, MNHN 8672, a 1228 mm specimen.
Type locality: "Senegal," (in error).
Distribution: Haiti (Nord, Nord-Est, Nord-Ouest, Ouest, Sud-Est, Tortue Is.) and Dominican Republic (Azua, Dajabón, Distrito Nacional, Duarte, El Seibo, Espillat, Hato Mayor, La Altagracia, La Estrelleta, La Romana, La Vega, María Trinidad Sánchez, Monseñor Nouel, Monte Christi, Pedernales, Peravia, Puerto Plata, Salcedo, Samaná, San Cristóbal, San Juan, San Pedro de Macorís, Santiago, Santiago Rodriguez, Valverde, Catalina and Saona Is.), NSL–1220 m.
Source: A. Schwartz & R.W. Henderson, 1984c.

UROMACERINA Amaral, 1930d (Xenodontidae)

Type species: *Uromacer ricardinii* Peracca, 1897d.
Distribution: Brazil.
Sources: Hoge, 1959c, Lema, 1973, P. Müller & Ritter, 1978, Cunha & Nascimento, 1982b, 1993, Zamprogno, 1997, Argôlo, 2001, Barcelos-Ribeiro et al., 2004 and Zaher et al., 2009.

1. *Uromacerina ricardinii* (Peracca, 1897d). Boll. Mus. Zool. Anat. Comp. Univ. Torino 12(282): 1–2, 2 figs. (*Uromacer ricardinii*)

Type: Holotype, MZUT 1769 (formerly MZUT 2057), a 720 mm specimen (Ricardini).
Type locality: "S. Paulo (Brasile)" [= São Paulo, E São Paulo State, SE Brazil, 23°33'S, 46°38'W, elevation 800 m].
Distribution: Brazil (Bahia, Espírito Santo, Minas Gerais, Pará, Paraná, Rio de Janeiro, Rio Grande do Sul, Santa Catarina, São Paulo), 600–850 m.

UROPELTIS Cuvier, 1829 (Uropeltidae)

Synonyms: *Uropeltes* – J. Müller, 1832 *(nomen incorrectum), Urapeltis* – Swainson, 1839 *(nomen incorrectum), Siluboura* Gray, 1845 *(nomen emendatum), Coloburus* A.H.A. Duméril *in* A.-M.-C. Duméril & Bibron, 1851c, *Uropelta* Hoeven, 1852 *(nomen emendatum), Crealia* Gray, 1858c, *Silybura* W.C.H. Peters, 1861d *(nomen emendatum), Euroleptis* – Hoffmann, 1890 *(nomen incorrectum), Sylybura* – Briceño-Rossi, 1934 *(nomen incorrectum), Silubura* – Deraniyagala, 1955 *(nomen incorrectum), Uroaeltis* – Murthy, 1990d *(nomen incorrectum), Uroeltisp* – Murthy, 1990d *(nomen incorrectum),* and *Uropeltls* – Murthy, 1990d *(nomen incorrectum).*
Type species: *Uropeltis ceylanicus* Cuvier, 1829.
Distribution: India and Sri Lanka.
Sources: Jan, 1865b, M.A. Smith, 1943, Gans, 1966, Murthy, 1981c, 1982b, Mahendra, 1984, Rajendran, 1985, Cadle et al., 1990, McDiarmid et al., 1999, Gower et al., 2005, 2008 and Aengals, 2009.
Remarks: Gender of *Uropeltis* is feminine *fide* Lanza & Boscherini (2000: 328).

1. *Uropeltis arcticeps* (A.C.L.G. Günther, 1875). Proc. Zool. Soc. London 43(1): 229, fig. 1. (*Silybura arcticeps*)

Synonyms: *Silybura madurensis* Beddome, 1878c, and *Silybura nilgherriensis picta* Beddome, 1886.
Types: Syntypes (2), BMNH 1946.1.16.11–12, a 194 mm and 148 mm specimen.
Type locality: "Tinnevelly" [= Tinnevelly Hills, N Tirunelveli Distr., S Tamil Nadu State, SE India, 1200–1800 m].
Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), NSL–1830 m.
Source: Chandramouli & Ganesh, 2010.

2. *Uropeltis beddomii* (A.C.L.G. Günther, 1862a). Ann. Mag. Nat. Hist. (3) 9(50): 56–57. (*Silybura beddomii*)

Synonym: *Silybura beddomei* Beddome, 1886 *(nomen emendatum).*
Types: Syntypes (4), BMNH 1946.1.16.13–15, three 250–279 mm specimens, and MNHN 1895.90 (formerly BMNH) (R.H. Beddome, 1857–1861).
Type locality: "Anamallay Hills" [= Anamalai Hills, S Western Ghats, E Kerala /W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E].
Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu).
Source: Whitaker & Captain, 2004.

3. *Uropeltis bicatenata* (A.C.L.G. Günther, 1864a). Rept. Brit. India: 191, pl. 17, figs. h, h'. (*Silybura bicatenata*)

Synonym: *Silybura bicatenata* A.C.L.G. Günther, 1863c (*nomen nudum*).
Type: Holotype, BMNH 1946.1.16.8 (formerly BMNH 1860.3.19.1277), a 248 mm male (W.H. Sykes, 1824–1831).
Type locality: "Deccan, British India" [= Deccan Plateau, India].
Distribution: Western India (Western Ghats of W Maharashtra), 740–1140 m.
Sources: Beddome, 1886 and Gower et al., 2008.
Remarks: Illustrations of holotype in Gower et al. (2008: figs. 2–3). A valid species (previously a synonym of *Uropeltis ceylanica) fide* Gower et al. (2008: 67). McDiarmid et al. (1999: 144) questioned type locality but Sykes worked in the Deccan as a statistical reporter for many years. Type locality restriction of Wynad, Malabar, S India, 1065 m *fide* Gans (1966: 18) invalid.

4. *Uropeltis broughami* (Beddome, 1878c). Proc. Zool. Soc. London 46(1): 800–801. (*Silybura broughami*)

Synonym: *Silybura levingii* Beddome, 1878c.
Types: Syntypes (2), BMNH 1946.1.16.29 (formerly BMNH 1883.1.12.23), a female, and MNHN 1895.89 (formerly BMNH) (R.H. Beddome).
Type locality: "Sirumullay hills (Madura district), 5500 feet elevation" [= Tirumalai Hills, Madura Distr., Eastern Ghats, N Tamil Nadu State, SE India, elevation 1675 m].
Distribution: Southern India (Western and Eastern Ghats of SE Kerala, Tamil Nadu), 1230–1680 m.

5. *Uropeltis ceylanica* Cuvier, 1829. Règne Anim., ed. 2, 2: 76, pl. 7, fig. 2. (*Uropeltis ceylanicus*)

Synonyms: *Uropeltis ceylonica* Wagler, 1830 *(nomen emendatum), Pseudo-typhlops ceylanicus* Schlegel, 1839 *in* 1837–1844 *(nomen illegitimum),* ? *Uropeltis affinis* Jerdon, 1854, *Silybura brevis* A.C.L.G. Günther, 1862a, *Silybura shorttii* Beddome, 1863a, *Silybura nilgherriensis* Beddome, 1863a, and *Silybura nilgherriensis annulata* Beddome, 1886.
Type: Lectotype, MNHN 39, a 161 mm specimen (L. de Lateur, July 1822), designated by Gans (1966a: 18).
Type locality: "Ceylan" [= Sri Lanka] (in error *fide* Constable, 1949: 119) via lectotype selection.
Distribution: Southwestern India (Western Ghats of W Karnataka, E Kerala, SW Tamil Nadu), 500–1500 m.
Sources: Cocteau, 1833, Murthy, 1990, Malhotra & Davis, 1991 and Pradhan, 2008.

6. *Uropeltis dindigalensis* (Beddome, 1877a). Proc. Zool. Soc. London 45(1): 167. (*Silybura dindigalensis*)

Types: Syntypes (4), BMNH 1946.1.16.2 (formerly BMNH 1883.1.12.5), BMNH 1946.1.16.4 (formerly BMNH 1883.1.12.7), BMNH 1946.1.16.37 (formerly BMNH 1877.8.10.3), and MNHN 1895.88 (formerly BMNH), 305–381 mm specimens (R.H. Beddome, 1875–1877).
Type locality: "Sirumullay hills, near Dindigul, at 4000–5000 feet elevation, Southern India" [= Tirumalai Hills, near Dindigul (10°22'N, 77°59'E), Eastern Ghats, N Tamil Nadu State, SE India, elevation 1200–1525 m].
Distribution: Southeastern India (Eastern Ghats of Tamil Nadu), 1200–1700 m.
Source: Chandramouli & Ganesh, 2010.

U

7. *Uropeltis ellioti* (Gray, 1858c). Proc. Zool. Soc. London 26(1): 262, fig. 1. (*Siloboura ellioti*)

Synonyms: *Silybura elliotti* A.C.L.G. Günther, 1864a *(nomen emendatum),* and *Silybura punctata* A.C.L.G. Günther, 1875.
Type: Holotype, BMNH 1946.1.16.6 (W. Elliot, 1845–1858).
Type locality: "Madras" [= Chennai, NE Tamil Nadu State, SE India].
Distribution: Southern India (Western and Eastern Ghats of Andhra Pradesh, Goa, S Gujarat, W Karnataka, E Kerala, Orissa, Tamil Nadu), 100–1800 m.

Source: Rajendran, 1985, Sanyal, 1993, Sanyal et al., 1993, R.C. Sharma, 2000, Whitaker & Captain, 2004, N. Khaire, 2006 and Pradhan, 2008.

Remarks: Original description reprinted in Gray (1858f: 377–378).

8. *Uropeltis liura* (A.C.L.G. Günther, 1875). Proc. Zool. Soc. London 43(1): 228, pl. 31, fig. b. (*Silybura liura*)

Type: Holotype, BMNH 1946.1.16.7 (formerly BMNH 1874.4.29.1206), a male (R.H. Beddome, 1857–1875).

Type locality: "Malabar" [= N Kerala State, SW India]. Specified as Madura and Tinnevelly Hills *fide* BMNH catalogue and M.A. Smith (1943: 84).

Distribution: Southern India (Eastern Ghats of Tamil Nadu), 920–1520 m.

Sources: Rajendran, 1985 and Whitaker & Captain, 2004.

9. *Uropeltis macrolepis* (W.C.H. Peters, 1861d). Mber. Königl. Akad. Wiss. Berlin 1861(10): 904–905. (*Silybura macrolepis*)

Synonym: *Uropeltis macrolepis mahableshwarensis* Chari, 1955.

Type: Holotype, BMNH 1946.1.15.99 (formerly BMNH 1888.4.20.4), a 265 mm specimen.

Type locality: "Ceylon?" (in error). Unknown *fide* BMNH catalogue *fide* M.A. Smith (1943: 79). Designated as Bombay Hills between lats. 18° 7' and 19° 7' N, British India *fide* M.A. Smith (1943: 80).

Distribution: Western India (Western Ghats of Goa, S Gujarat, W Maharashtra, Salsette Is.), NSL–1370 m.

Sources: Beddome, 1886, Chari, 1955, R.C. Sharma, 2000, Whitaker & Captain, 2004, N. Khaire, 2006 and Pradhan, 2008.

10. *Uropeltis macrorhyncha* (Beddome, 1877a). Proc. Zool. Soc. London 45(1): 167–168. (*Silybura macrorhyncha*)

Synonym: *Silybura macrorhynchus* Boulenger, 1893a *(nomen emendatum).*

Type: Holotype, BMNH 1946.9.7.45 (formerly BMNH 1883.1.12.24), a female (R.H. Beddome, 1857–1877).

Type locality: "Anamullay Mountains, 4000 feet elevation, southern India" [= Anamalai Hills, S Western Ghats, E Kerala/W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E, elevation 1220 m].

Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 100–1335 m.

U

11. *Uropeltis maculata* (Beddome, 1878a). Proc. Zool. Soc. London 46(1): 154–155. (*Silybura maculata*)

Synonym: *Uropeltis maculatus* M.A. Smith, 1943.

Types: Syntypes (8), BMNH 1946.1.16.63–65, BMNH 1946.1.16.83–84, MNHN 1895.81 (formerly BMNH), and NMW 21598.1–2 (formerly BMNH) (R.H. Beddome, 1857–1878, via G. Edwards & F. Steindachner, 1883).

Type locality: "Southern India." Specified as Anamallays, higher ranges 6000 to 7000 feet elevation *fide* Beddome (1886: 22).

Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 1065–2400 m.

Sources: Rajendran, 1985, Pradhan, 2002 and Hutton & David, 2009.

12. *Uropeltis melanogaster* (Gray, 1858c). Proc. Zool. Soc. London 26(1): 264–265, fig. 5. (*Mytilia melanogaster*)

Synonym: *Plectrurus ceylonicus* W.C.H. Peters, 1859c.

Types: Syntypes (4), BMNH 1946.1.16.94–97 (G.H.K. Thwaites, 1854).

Type locality: "Ceylon" [= Sri Lanka]. Specified as Meniakanda Group, Mousakanda Estate and Gammaduwa, in the East Matale Hills, Sri Lanka *fide* A. Silva (2009: 38).

Distribution: Central Sri Lanka (Central, Uva), 700–1300 m.

Sources: Wall, 1921, P. Silva, 1980, A. Silva, 1990, 2009, A. Silva et al., 2005, Somaweera, 2006 and Olori & Bell, 2012.

Remarks: Original description reprinted in Gray (1858f: 380). Only two syntypes mentioned by Gray (1858c: 265).

13. *Uropeltis myhendrae* (Beddome, 1886). Ann. Mag. Nat. Hist. (5) 17(97): 15–16. (*Silybura nilgherriensis myhendrae*)

Types: Syntypes (2), BMNH 1946.1.16.9 (formerly BMNH 1883.1.12.49), a 334 mm specimen (R.H. Beddome, 1857–1882), and MNHN 1895.95 (formerly BMNH) (R.H. Beddome, 1857–1882).

Type locality: "South Travancore, on the Myhendra Mountain" [= Mahendragiri, ext. S Tamil Nadu State, S India, 8°23'N, 77°31'E, elevation 1200 m].

Distribution: Southwestern India (Western Ghats Goa, E Kerala, SW Tamil Nadu), 600–1200 m.

Sources: Rajendran, 1985 and Pradhan, 2008.

Remarks: MNHN 1897.255 considered a possible type *fide* Das *in* McDiarmid et al. (19999: 147) but only two syntypes are mentioned *fide* Beddome (1886: 16) and MNHN 1897.255 is from Punga Hills, India.

14. *Uropeltis nitida* (Beddome, 1878a). Proc. Zool. Soc. London 46(1): 154. (*Silybura nitida*)

Synonym: *Uropeltis nitidus* M.A. Smith, 1943.

Types: Syntypes (7), BMNH 1946.1.16.30–31, BMNH 1946.1.13.95–97, MNHN 1895.87a–b (formerly BMNH) (R.H. Beddome, 1857–1878), and NMW

21597 (R.H. Beddome, 1857–1878, via G. Edwards & F. Steindachner, 1883).

Type locality: "Anamallays, 4000 to 5000 ft., Southern India" [= Anamalai Hills, S Western Ghats, SE Kerala State, SW India]. Specified as Anamallays, about the Nelliampady estates on the Cochin side [= vicinity of W Nelliyampathy Hills, Palghat Distr., Kerala State, S India, ca. 10°32'N, 76°42'E, 1200–1525 m] *fide* Beddome (1886: 19).

Distribution: Southwestern India (Western Ghats of SE Kerala), 1335–1700 m.

Source: Murthy, 1990d.

15. *Uropeltis ocellata* (Beddome, 1863a). Madras Quart. J. Med. Sci. 6: 46, pl. 1, fig. 4. (*Silybura ocellata*)

Synonyms: *Silybura dupeni* Beddome, 1878a, *Silybura ochracea* Beddome, 1878a, and *Uropeltis ocellatus* M.A. Smith, 1943.

Type: Lectotype, BMNH 1946.1.15.59 (R.H. Beddome, 1857–1863), designated by Gans (1966a: 21).

Type locality: "Walaghat on the Western slopes of the Neilgherries in the dense forests at an elevation of 3,500 feet, ['in the dense moist forests'], India" via lectotype selection.

Distribution: Southwestern India (Western Ghats of W Karnataka, E Kerala, Madhya Pradesh, SW Tamil Nadu), 610–1980 m.

Sources: Wall, 1918c, Constable, 1949, Rajendran, 1985, Murthy, 1990d, Radhakrishna & Palot, 2007, Sur et al., 2007, Chandra, 2009 and Hutton & David, 2009.

Remarks: See McDiarmid et al. (1999: 148) for discussion of types. Original description reprinted in Beddome (1853b: 226). Longest syntype 368 mm.

16. *Uropeltis petersi* (Beddome, 1878a). Proc. Zool. Soc. London 46(1): 154. (*Silybura petersi*)

Types: Syntypes (6), BMNH 1946.1.1.7–9 and BMNH 1946.1.16.75 (formerly BMNH 1878.1.11.3a–d), and MNHN 1895.80a–b (formerly BMNH) (R.H. Beddome, 1857–1878).

Type locality: "Anamallays, 4000 ft." [= Anamalai Hills, S Western Ghats, E Kerala/W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E, elevation 1220 m]. Restricted to forests above Ponache, India *fide* Beddome (1886: 22).

Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 1220–1700 m.

Remarks: McDiarmid et al. (1999: 149) listed only four syntypes.

17. *Uropeltis phillipsi* (G. Nicholls, 1929b). Ceylon J. Sci. 15B: 153–155, pl. 32, figs. 1–4, 7. (*Silybura phillipsi*)

Type: Holotype, BMNH 1946.1.17.2 (formerly BMNH 1929.2.5.1), a 222 mm specimen (W.W.A. Phillips).

Type locality: "Meniakanda Group, Gammaduwa, in the East Matale Hills, Ceylon" [= Sri Lanka].

Distribution: Central Sri Lanka (Central), 360–1115 m.

Sources: A. Silva, 1990, A Silbva et al., 2005 and Somaweera, 2006.

18. *Uropeltis phipsonii* (G.E. Mason, 1888). Ann. Mag. Nat. Hist. (6) 1(3): 184–185. (*Silybura phipsonii*)

Types: Syntypes (2), BMNH 1946.1.16.33–34 (formerly BMNH 1897.7.19.2–3), a 277 mm and 218 mm specimen (H.M. Phipson, 1883–1888).

Type locality: "Bombay ghats, Bombay Presidency" [= N Western Ghats, Maharashtra State, W India].

Distribution: Southwestern India (Western Ghats of Goa, W Karnataka, E Kerala, W Maharashtra, SW Tamil Nadu), NSL–500 m.

Sources: Tiwari & Sharma, 1970, Rajendran, 1985, J.C. Murphy & Schlager, 2003, Whitaker & Captain, 2004, N. Khaire, 2006, Radhakrishna & Palot, 2007 and Pradhan, 2008.

Remarks: Previously a synonym of *U. rubrolineatus.*

19. *Uropeltis pulneyensis* (Beddome, 1863b). Proc. Zool. Soc. London 31(1): 228, pl. 25, fig. 2. (*Plectrurus pulneyensis*)

Synonym: *Silybura guentheri* Beddome, 1878a.

Types: Syntypes (9), BMNH 1946.1.17.6, MNHN 1895.78, and ZSI 4381 [unknown], ZSI 6948 [Palni], ZSI 6950 [unknown], and ZSI 6972–75 [Madras] (R.H. Beddome, 1857–1863).

Type locality: "Pulney Hills, 7000 to 8000 feet, Southern India" [= Palani Hills, W Tamil Nadu State, S India, 2135–2440 m].

Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 915–2440 m.

Sources: Rajendran, 1985 and Pradhan, 2002.

Remarks: I. Das et al. (1998: 145) listed seven syntypes from ZSI.

U

20. *Uropeltis rubrolineata* (A.C.L.G. Günther, 1875). Proc. Zool. Soc. London 43(1): 228. (*Silybura rubrolineata*)

Synonym: *Uropeltis rubrolineatus* M.A. Smith, 1943.

Type: Lectotype, BMNH 1946.1.15.53 (formerly BMNH 1874.4.29.804), a 177 m specimen (R.H. Beddome, 1857–1875), designated by Beddome (1886: 14).

Type locality: "Tranvancore hills" [= Tirunelveli Hills, SW Tamil Nadu State, S India] via lectotype selection.
Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), NSL–835 m.
Sources: Rajendran, 1985 and Murthy, 1990.
Remarks: See McDiarmid et al. (1999: 150) for details on types.

21. *Uropeltis rubromaculata* (Beddome, 1867). Madras Quart. J. Med. Sci. 11: 15, pl. 2, fig. 3. (*Silybura rubromaculata*) (*nomen corrigendum*)

Synonyms: *Silybura rubro-maculata* Beddome, 1867 *(nomen incorrigendum), Silybura rubromaculata* – A.C.L.G. Günther, 1875 *(nomen corrigendum),* and *Uropeltis rubromaculatus* M.A. Smith, 1943.
Types: Syntypes (6), BMNH 1946.1.15.51–52, a 365 mm and 368 mm specimen, BMNH 1946.1.15.82–84, a 343 mm, 349 mm and 256 mm specimen, MNHN 1895.97 (formerly BMNH) (R.H. Beddome, 1857–1867), and NMW 18932 (R.H. Beddome, 1857–1867, via G. Edwards & F. Steindachner, 1883).
Type locality: "Anamallay forests; 4,000 feet elevation, Madras Presidency" [= Anamalai Hills, S Western Ghats, E Kerala/W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E, elevation 1220 m].
Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 1065–1820 m.
Sources: Rajendran, 1985, Murthy, 1990 and Hutton & David, 2009.
Remarks: Plate in original description erroneously listed as pl. 1 *fide* Beddome (1867: 15).

22. *Uropeltis ruhunae* Deraniyagala, 1954. Proc. Tenth Ann. Ceylon Assoc. Advan. Sci. (1): 24.

Synonym: *Uropeltis ruhanae* Gans, 1966 *(nomen emendatum).*
Type: Holotype, CMS RS 552, a 250–268 mm specimen (P. Abrahams).
Type locality: "Galle, Ceylon" [= Galle, Southern Prov., S Sri Lanka].
Distribution: Southern Sri Lanka (Southern). Known only from holotype.
Sources: Deraniyagala, 1955, P. Silva, 1980, A. Silva, 1990 and Somaweera, 2006.
Remarks: Taxonomic status doubtful *fide* A. Silva (2001: 64).

U

23. *Uropeltis smithi* Gans, 1966. Das Tierreich (84): 22–24. (*nomen substitutum*)

Synonym: *Rhinophis grandis* Beddome, 1867 *(nomen praeoccupatum).*
Types: Syntypes (2), BMNH 1946.1.16.82 and MNHN 1895.79.
Type locality: "Anamallay forests in moist woods at 4,000 feet elevation, Madras Presidency" [= Anamalai Hills, S Western Ghats, E Kerala/W Tamil Nadu States, SW India, ca. 10°22'N, 77°08'E].
Distribution: Southern India (Western Ghats of SE Kerala, SW Tamil Nadu), 1220–2155 m.
Remarks: Original description in Beddome (1867: 15, pl. 2, fig. 4).

24. *Uropeltis woodmasoni* (Theobald, 1876). Cat. Rept. Brit. India: 135. (*Silybura woodmasoni*) (*nomen corrigendum*)

Synonyms: *Silybura wood-masoni* Theobald, 1876 *(nomen incorrigendum), Silybura melanogaster* A.C.L.G. Günther, 1875 *(nomen praeoccupatum), Silybura nigra* Beddome, 1878a, and *Silybura woodmasoni* – Sclater, 1891 *(nomen corrigendum).*
Type: Lectotype, ZSI 8760, a 204 mm specimen.
Type locality: "Palney Hills, British India" [= Palani Hills, W Tamil Nadu State, S India] via lectotype selection.
Distribution: Southern India (Western and Eastern Ghats of SE Kerala, Tamil Nadu), 1860–2100 m.
Sources: Constable, 1949 and Rajendran, 1985.

UROTHECA Bibron, 1843 *in* Ramón de la Sagra, 1838–1843 (Dipsadidae)

Synonym: *Uroteca* Gundlach, 1867 *(nomen emendatum).*
Type species: *Calamaria dumerilii* Bibron, 1840 *in* Ramón de la Sagra, 1838–1843.
Distribution: Central America and N South America.
Sources: J.A. Peters & Orejas-Miranda, 1970, C.W. Myers, 1974, Villa et al., 1988, Savage & Crother, 1989, Savage & Lahanas, 1989 and Zaher et al., 2009.
Remarks: *Pliocercus* recognized as distinct from *Urotheca fide* C.W. Myers & Cadle (1999) but Savage & Crother, 1989, allocated *Pliocercus* and seven species formerly in *Rhadinaea* to *Urotheca*.

1. *Urotheca decipiens* (A.C.L.G. Günther, 1893 *in* 1885–1902). Biol. Cen.-Amer., Rept. Batr.: 105, pl. 37, fig a. (*Ablabes decipiens*)

Synonym: *Rhadinaea albiceps* Amaral, 1924b.
Types: Syntypes (3), BMNH 1946.1.3.95–97, longest syntype 457 mm (H. Rogers via F.D. Godman, 1861–1889).
Type locality: "Costa Rica, Irazu" [= Volcán Irazú, N Cartago or E San José Prov., Costa Rica, ca. 9°59'N, 83°51'W]
Distribution: Lower Central America and NW South America. Honduras (Gracias a Dios), S Nicaragua (Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), W Panama, Colombia (Valle de Cauca), Ecuador (Esmeraldas), NSL–1800 m.

Sources: Pérez-Santos & Moreno, 1988, Savage, 2002, McCranie et al., 2003, 2006, Solórzano, 2004, Castro-Herrera & Vargas-Salinas, 2007, McCranie, 2011a and Salazar & Barquero, 2012.

Remarks: Record for Medellin, Colombia needs confirmation *fide* C.W. Myers (1974: 176). Ecuador record is tentatively identified as *U. decipiens fide* Ortega-Andrade et al., 2010.

2. *Urotheca dumerilii* (Bibron, 1840 *in* Ramón de la Sagra, 1838–1843). Hist. Fís. Polít. Nat. Cuba 2(2): pl. 26, figs. 1–5. (*Calamaria dumerilii*)

Type: Holotype, MNHN 733, a 344 mm male (D. Ramón de la Sagra, 1824–1835).

Type locality: "Cuba," (in error). Corrected to Colombia *fide* C.W. Myers (1974: 176).

Distribution: Northwestern Colombia (Antioquia, Chocó), 150–1540 m.

Sources: Maglio, 1970 and Pérez-Santos & Moreno, 1988.

Remarks: Plate 26 of Bibron (1840) was labelled *Calamaria dumerilii,* but the text (1843) employed *Urotheca dumerilii*. Supplemental original description in Bibron, 1843 *in* Ramón de la Sagra (1838–1843: 131–132). Original description reprinted in Bibron, 1843 *in* Ramón de la Sagra (1841–1843: 218, pl. 26, figs. 1–5).

3. *Urotheca fulviceps* (Cope, 1886b). Proc. Amer. Philos. Soc. (1885) 23(122): 279–280. (*Rhadinaea fulviceps*)

Type: Holotype, USNM 61187 (formerly SIM 14118), a 341–347 mm female (G.W. Nelson, 1880–1885).

Type locality: "Panama, tropical America" [= Panama city, Panama Dept., cen. Panama, 9°00'N, 79°31'W, elevation 15 m].

Distribution: Lower Central America and NW South America. Southwestern Costa Rica (Puntarenas, San José), Panama, NW Ecuador (Esmeraldas, Pichincha), cen. Colombia (Caldas, Cundinamarca, Santander) and W Venezuela (Zulia), NSL–700 m.

Sources: Pérez-Santos & Moreno, 1988, 1991, Manzanilla et al., 1998, Rojas-Runjaic et al., 2008 and Navarrete et al., 2009.

Remarks: High elevation records of 800–2000 m doubtful *fide* C.W. Myers (1974: 180).

4. *Urotheca guentheri* (Dunn, 1938b). Copeia 1938(4): 198. (*Rhadinaea guentheri*) (*nomen substitutum*)

Synonyms: *Tachymenis decipiens* A.C.L.G. Günther, 1895 *in* 1895–1902 *(nomen praeoccupatum), Rhadinaea persimilis* Dunn, 1938b *(nomen praeoccupatum), Rhadinaea güntheri* Dunn, 1938b *(nomen incorrigendum)* and *Rhadinaea guentheri* – J.A. Peters & Orejas-Miranda, 1970 *(nomen corrigendum).*

Type: Lectotype, BMNH 1946.1.8.15, adult female (H. Rogers), designated by C.W. Myers (1974: 182). Longest syntype 483 mm (svl).

Type locality: "Irazu, Costa Rica" [= Volcán Irazú, N Cartago or E San José Prov., Costa Rica, ca. 9°59'N, 83°51'W] via lectotype selection.

Distribution: Central America. Eastern Honduras (Colón, Gracias a Dios), E Nicaragua (Atlántico Norte, Chontales, Jinotega), N Costa Rica (Alajuela, Cartago, Heredia, Guanacaste, Limón, Puntarenas, San José) and W Panama (Bocas del Toro, Coclé, Panamá, Veraguas), NSL–2100 m.

Sources: G. Köhler, 1999, 2001, 2008, McCranie et al., 2001, 2006, Lotzkat et al., 2010, McCranie, 2011a, Bartuano & Ibañez, 2012 and Salazar & Barquero, 2012.

Remarks: Original description in A.C.L.G. Günther (1895 *in* 1895–1902: 163, pl. 53, fig. a).

5. *Urotheca lateristriga* (Berthold, 1859). Nachr. Georg.-Augusts-Univ. Königl. Ges. Wiss. Göttingen (17): 180–181. (*Liophis lateristriga*)

Synonyms: *Dromicus temporalis* Cope, 1861a, *Dromicus frenatus* W.C.H. Peters, 1863a, *Dromicus nuntius* Jan, 1863b, *Urotheca coronata* Steindachner, 1901, *Erythrolamprus labialis* F. Werner, 1909b, and *Liothis lateristriga* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type: Holotype, not designated, (formerly ZMUG) (C. Degenhardt, 1839–1845), lost *fide* Medem (1965: 304).

Type locality: "Nova-Granada" [= Colombia]. Specified as Popayan, New Granada [= W Colombia, probably on the Pacific versant *fide* C.W. Myers & Böhme, 1996: 17] *fide* Jan, 1866 *in* 1866–1870, 2(18): pl. 5, fig 2.

Distribution: Northwestern South America. Colombia (Antioquia, Magdalena, Santander), W Ecuador (Guayas, Los Rios, Pichincha) and Peru, NSL–2000 m.

Sources: Pérez-Santos & Moreno, 1988, 1991 and C.W. Myers & Böhme, 1996.

Remarks: Type locality designation of near Popayán, Cauca Dept., Colombia, 2°27'N, 76°37'W, elevation 1800 m *fide* Dunn & Stuart (1951: 56) in error *fide* C.W. Myers & Böhme (1996: 17).

6. *Urotheca multilineata* (W.C.H. Peters, 1863c). Mber. Königl. Akad. Wiss. Berlin 1863(6): 279–280. (*Dromicus multilineatus*)

Type: Lectotype, ZMB 2108, a 315 mm specimen (Appun), designated by C.W. Myers (1974: 190).

Type locality: "Puerto Cabello und Caracas, Venezuela" via lectotype selection. Restricted to Caracas, Venezuela *fide* Dunn (1944f: 479).

Distribution: Venezuela (Aragua, Carabobo, Distrito Federal, Falcón, Lara, Miranda), 800–2000 m.

Sources: Mijares-Urrutia, 2000 and Navarrete et al., 2009.

Remarks: Lectotype is specimen referred to as variety "A" by W.C.H. Peters (1863c: 280). C.W. Myers (1974: 190) reported the lectotype (ZMB 2108) to be lost but Bauer et al. (1995: 71) discovered three syntypes, including ZMB 2108.

7. *Urotheca myersi* Savage & Lahanas, 1989. Copeia 1989(4): 892–894, fig. 1 (paratype).

Type: Holotype, LACM 137604 (formerly CRE 1036), a 305 mm male (J. Hernandez-Camacho, 11 June 1961).

Type locality: "Cordillera de Talamanca, near Finca de Jardin (2255 m), approx. 9.6 km south by road of Villa Mills, just south of Division, on the Carretera Interamericana (Ruta 2), Canton Perez-Zeledon, Provincia de San Jose, Costa Rica."

Distribution: Central Costa Rica (Puntarenas, San José), 1500–2255 m.

Sources: Lips, 1993b, Savage, 2002 and Solórzano, 2004.

8. *Urotheca pachyura* (Cope, 1875a). J. Acad. Nat. Sci. Philadelphia (1876) (2) 8(2): 145–146. (*Contia pachyura*)

Synonym: *Rhadinaea decipiens rubricollis* E.H. Taylor, 1954.

Type: Holotype, USNM 30618, a 335 mm male (W.M. Gabb, 1873–1875).

Type locality: "Sipurio, Costa Rica" [= Sipurio, near Suretka (9°34'N, 82°56'W, elevation 50 m), S Limón Prov., E Costa Rica].

Distribution: Lower Central America. Extreme S Nicaragua (W Río San Juan), E Costa Rica (Alajuela, Cartago, Heredia, Limón) and W Panamá, NSL–1360 m.

Sources: Savage, 2002, Solórzano, 2004 and Salazar & Barquero, 2012.

V

†*VECTOPHIS* Rage & Ford, 1980 (Alethinophidia *incertae sedis*)

Type species: †*Vectophis wardi* Rage & Ford, 1980.
Distribution: Upper Eocene of United Kingdom.
Source: Rage & Ford, 1980.
Remarks: Alethinophidia, *incertae sedis fide* Rage (1984b: 58).

1. †*Vectophis wardi* Rage & Ford, 1980. Tertiary Res. 3(2): 54–56, fig. 4, pl. 1, figs. 14–17.

Type: Holotype, MNHN CGB 27, one middle trunk vertebra.
Type locality: "Totland Bay, Isle of Wight, (Great Britain)" [United Kingdom, lower Headon Beds, Middle Headonian (= upper Bartonian), upper Eocene].
Distribution: Upper Eocene (Priabonian, MP 17–20: 33.9–37.2 mya) of United Kingdom (England).

VERMICELLA Gray *in* A.C.L.G. Günther, 1858 (Elapidae)

Synonyms: *Homaloselaps* Jan, 1858b, *Vermicalla* – A.C.L.G. Günther, 1858, and *Neelaps* A.C.L.G. Günther, 1863a.
Type species: *Calamaria annulata* Gray *in* Grey, 1841b.
Distribution: Australia.
Sources: F. McCoy, 1881, Storr, 1968, 1979, Cogger et al., 1983a, Storr, 1985, S.K. Wilson & Knowles, 1988, Hoser, 1989, 2012e, Hutchinson, 1990, Cogger, 1992, Keogh & Smith, 1996, Keogh, 1998, Keogh et al., 1998, Storr et al., 2002, Scanlon & Lee, 2004, Sanders et al., 2008 and Zaher et al., 2009.
Remarks: *Neelaps* a synonym *fide* Wallach, 1985 and Zaher et al., 2012.

1. *Vermicella annulata* (Gray *in* Grey, 1841b). J. Two Exped. Australia 2: 443–444. (*Calamaria annulata*)

Synonyms: *Elaps occipitalis* A.-M.-C. Duméril, Bibron & Duméril, 1854b, *Vermicella lunulata* Krefft, 1869b, and *Rhynchelaps latizonatus* De Vis, 1905.
Type: Holotype, BMNH 1946.1.19.21 (Lewis).
Type locality: "New Holland" [= Australia]. Specified as Swan River, Australia *fide* BMNH catalogue.
Distribution: Eastern Australia (Australian Capital Territory, New South Wales, Northern Territory, Queensland, SE South Australia, N Victoria), NSL–1325 m.
Sources: J. White, 1790, Shine, 1980a and Longmore, 1986.

2. *Vermicella calonotus* (A.-M.-C. Duméril, Bibron & Duméril, 1854b). Erpét. Gén. 7(2): 1241–1242, pl. 75 bis. (*Furina calonotus*) (*nomen corrigendum*)

Synonyms: *Furina calonotos* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Furina calonotos* A.-M.-C. Duméril, Bibron & Duméril, 1854c *(nomen incorrigendum), Furina calonotus* – A.-M.-C. Duméril, Bibron & Duméril, 1854c *(nomen corrigendum), Neelaps caledonicus* Hoffmann, 1890 *(lapsus calami)*, *Neelaps neocaledonicus* Palacky, 1898 *(lapsus calami)*, and *Furina calonota* – Boulenger, 1896a.
Type: Lectotype, MNHN 3943a, the larger of the two syntypes (J.P. Verreaux, 1844), designated by Wells & Wellington (1985: 46),
Type locality: "Tasmanie" [= Tasmania, Australia] (in error). Corrected to Nouvelle-Hollande [= Australia] *fide* Duméril (1853: 517).
Distribution: Extreme SW Australia (ext. SW Western Australia), NSL–35 m.
Source: Bush et al., 1995.
Remarks: A.C.L.G. Günther (1863a: 24) emended the specific epithet to *calonotus,* which was considered valid *fide* Cogger et al. (1983: 228).

3. *Vermicella intermedia* Keogh & Smith, 1996. J. Zool., London 240(4): 688–691, pl. 1, fig. a.

Type: Holotype, NTM 17196, a 360 mm female (G. Gow, 1985).
Type locality: "Humpty Doo District of the Northern Territory (12°38'S, 131°15'E)," Australia.
Distribution: Northern Australia (N Northern Territory, N Western Australia), NSL–320 m.

4. *Vermicella multifasciata* (Longman, 1915). Mem. Queensland Mus. 3: 30. (*Furina multifasciata*)

Type: Holotype, QM J2019 (formerly QM J14/2019), a 362–365 mm specimen (G.F. Hill).
Type locality: "Port Darwin, Northern Territory" [= Port Darwin, Darwin, ext. N Northern Territory, N Australia, 12°28'S, 130°51'E, elevation NSL].
Distribution: Northern Australia (ext. N Western Australia, NW Northern Territory, Melville Is.), 15–300 m.

Source: Clarke & How, 1995.

5. *Vermicella snelli* Storr, 1968. J. Roy. Soc. West. Australia (1967) 50(2): 82. (*Vermicella annulata snelli*)

Type: Holotype, WAM 19203, a 271–504 mm female, (C. Snell, early 1963).
Type locality: "Mundiwindi, Western Australia, in 23° 51' S, 120° 09' E," Australia.
Distribution: Western Australia (NW Western Australia), 45–755 m.

6. *Vermicella vermiformis* Keogh & Smith, 1996. J. Zool., London 240(4): 695–696, pl. 1, fig. e.

Type: Holotype, NTM 34484, a 494 mm male (6 June 1972).
Type locality: "Alice Springs, Northern Territory (23°42'S, 133°53'E)," Australia.
Distribution: Central Australia (Northern Territory), 550–725 m.
Remarks: Holotype listed as NTM 34485 *fide* Keogh & Smith (1996: 691).

VIPERA Laurenti, 1768 (Viperidae)

Synonyms: *Echidna* Link, 1806 *(nomen praeoccupatum), Chersea* Fleming, 1822, *Ammodytes* Bonaparte, 1831b (*nomen rejiciendum*), *Rhinaspis* Bonaparte, 1834 *(nomen nudum), Rhinechis* Fitzinger, 1843 *(nomen praeoccupatum), Rinechis* – Vandoni, 1914 *(nomen incorrectum), Rhinochis* – Caziot, 1922 *(nomen incorrectum), Mesovipera* A.F.T. Reuss, 1927a, *Teleovipera* A.F.T. Reuss, 1927a *(nomen illegitimum), Latastea* A.F.T. Reuss, 1929a, *Latasteopara* A.F.T. Reuss, 1935a, *Rhinophis* – Guillon, 1936 *(lapsus calami)* and *Latasteopara* A.F.T. Reuss, 1937 *(nomen praeoccupatum).*
Type species: *Coluber aspis* Linnaeus, 1758.
Distribution: Europe and N Africa.
Fossil records: Lower Miocene to upper Pleistocene of Europe. Fossils unassigned to species include lower Miocene (Agenian, MN 1–2: 20.0–23.0 mya) of France, lower Miocene (Orleanian, MN 3–5: 13.7–20.0 mya) of Austria, France and Spain, middle Miocene (Astaracian, MN 6–8: 11.1–13.7 mya) of Germany, Poland and Slovakia, upper Miocene (Vallesian, MN 9: 9.7–11.1 mya) of Austria, Hungary and Ukraine, upper Miocene (Turolian, MN 11–13: 4.9–8.7 mya) of Spain, lower Pliocene (Ruscinian, MN 14: 4.2–4.9 mya) of Poland and Ukraine, middle Pliocene (Ruscinian, MN 15: 3.2–4.2 mya) of Russia and Ukraine, middle/upper Pliocene (Ruscinian/Villanyian, MN 15–16: 2.6–4.2 mya) of Spain, upper Pliocene (Villanyian, MN 16–17: 1.8–3.2 mya) of Austria, France, Greece and Ukraine, lower Pleistocene (Calabrian: 0.8–1.8 mya) of France and Greece, middle Pleistocene (Ionian: 0.13–0.78 mya) of Croatia, and upper Pleistocene (Tarantian: 0.01–0.13 mya) of Bulgaria, France and Ukraine.

Salvador, 1998, Szyndlar & Rage, 1999, Amat, 2004, Malkmus, 2005, Brito et al., 2006 and Smedt, 2006.

Fossil records: Middle to upper Pleistocene (Ionian-Tarantian: 0.01–0.78 mya) of Spain.

Remarks: Original description reprinted in Boscá (1879: 85–86, pl. 4). Type locality restriction of Valencia *fide* Mertens (1925: 105) and Valencia del Cid *fide* Mertens & Müller (1928: 52) invalid.

6. †*Vipera meotica* Zerova *in* Szyndlar & Zerova, 1992. Neues Jb. Geol. Paläont. Abh. 184(1): 94–96, figs. 19–21.

Type: Holotype, ZIKP 45-5023, one basisphenoid.

Type locality: "lower layer of Cherevichnoie (Ukraine, USSR), located on the left bank of the estuarine lake Khadzibeyskiy, between villages Morozovka and Cherevichnoie (Belyaevka district in Odessa oblast'), approximately 20 km north from Odessa; upper Miocene, early Meotian, i.e., middle Turolian or MN 12."
Distribution: Upper Miocene (Turolian, MN 12: 7.3–7.8 mya) of Ukraine. Known only from type series.
Source: Nilson & Andrén, 1997.

7. *Vipera monticola* Saint-Girons, 1954. Bull. Soc. Zool. France 78(5–6): 475. (*Vipera latastei monticola*) (*nomen susbstitutum*)

Synonym: *Vipera latastei montana* Saint-Girons, 1953 *(nomen praeoccupaum).*
Types: Syntypes (10), MHNG 1353.7 (F. Proust, 1951), MNHN 8410, MNHN 8958–59, MNHN 1973.79–80, SMF 42001, ZMA 11154, MHNR 492 R, and ISCM (H. Saint-Girons, 1952), latter lost *fide* Golay et al. (1993: 287).
Type locality: "Haut-Atlas (Massif du Toubkal), Maroc, 2.500–3.100 m" [= Toubkal Massif, High Atlas Mtns., E Marrakech and W Ouarzazate Prov., cen. Morocco, elevation 2500–3100 m].
Distribution: Central Morocco (Azilal, Beni Mellal, Fès, Marrakech, Meknes, Ouarzazate), 1200–3100 (3900) m.
Sources: Beerli et al., 1986, Pillet, 1994, Spawls & Branch, 1995, Bons & Geniez, 1996, Schleich et al., 1996 and Brito et al., 2006.
Remarks: Original description in H. Saint-Girons (1953: 24–27). Proust collected three syntypes, Saint-Girons the other seven. A valid species *fide* Beerli et al., 1986.

8. †*Vipera natiensis* Bailon, García-Porta & Quintana-Cardona, 2002. C. R. Palevol. 1: 228, 230–231, figs. 1a–h.

Type: Holotype, IMCS Nati-12 no. 1362, one trunk vertebra.
Type locality: "Punta Nati 12, northwestern Minorca (Balearic Islands, Spain), probably Pliocene."
Distribution: Pliocene (1.8–4.9 mya) of Spain. Known only from type locality.

VIRGINIA Baird & Girard, 1853 (Natricidae)

Synonyms: *Potamophis* Fitzinger, 1843 *(nomen praeoccupatum), Haldea* Baird & Girard, 1853, *Conocephalus* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Falcóneria* Theobald, 1868b, *Amphiardis* Cope, 1889a, *Virginea* Hoffmann, 1890 *(nomen incorrectum), Amphardis* Cope, 1895c *(nomen emendatum),* and *Haldae* – Gehlbach, 1965a *(nomen incorrectum).*
Type species: *Virginia valeriae* Baird & Girard, 1853.
Distribution: Southeastern USA.
Fossil records: Upper Pleistocene of E USA.
Sources: Zillig, 1958, D. Clark, 1964, Pisani, 1972, Pisani & Collins, 1972, Ernst & Barbour, 1989, Conant & Collins, 1991, Rossman & Wallach, 1991, Holman, 1995a, 2000a, Palmer & Braswell, 1995, Tennant, 1997, Werler & Dixon, 2000, Alfaro & Arnold, 2001, Ernst & Ernst, 2003 and Zaher et al., 2009.

1. *Virginia striatula* (Linnaeus, 1766). Syst. Nat., ed. 12, 1: 375–376. (*Coluber striatulus*)

Synonyms: *Falcóneria bengalensis* Theobald, 1868b, and *Virginia inornata* S.W. Garman, 1884.
Type: Holotype, not designated (A. Garden, 1760–1761), location unknown.
Type locality: "Carolina" [USA]. Restricted to the vicinity of Charleston, South Carolina *fide* Klauber (1948: 6).
Distribution: Southeastern USA (S Alabama, Arkansas, N Florida, Georgia, SE Kansas, Louisiana, Mississippi, S Missouri, North Carolina, E Oklahoma, South Carolina, SW Tennessee, Texas, SE Virginia), NSL–350 m.
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Georgia, Texas, Virginia).
Source: Powell et al., 1994.

2. *Virginia valeriae* Baird & Girard, 1853. Cat. No. Amer. Rept., Serp. 1: 127–128.

Synonyms: *Carphophis harperti* A.-M.-C. Duméril, Bibron & Duméril, 1854a, *Virginia elegans* Kennicott, 1859a, and *Haldea valeriae pulchra* Richmond, 1954.
Type: Holotype, USNM 1962, a 238 mm specimen (V. Blaney, 1847).
Type locality: "Kent Co., Md" [= Kent Co., Maryland, USA].
Distribution: Eastern USA (Alabama, Arkansas, Delaware, District of Colombia, N Florida, Georgia, E Kansas, Kentucky, S Illinois, S Indiana, S Iowa, Louisiana, Maryland, Missouri, Mississippi, New Jersey, North Carolina, S Ohio, E Oklahoma, Pennsylvania, South Carolina, Tennessee, E Texas, Virginia, West Virginia), NSL–885 m.
Fossil records: Upper Pleistocene (Rancholabrean II) of USA (Georgia, Pennsylvania, Tennessee, Virginia).
Sources: Powell et al., 1992, B. Miller, 1995 and Fitch, 1999.

VIRIDOVIPERA Malhotra & Thorpe, 2004c (Viperidae)

Type species: *Trimeresurus stejnegeri* K.P. Schmidt, 1925a.
Distribution: Southeastern Asia.

Sources: Maki, 1931, 1931b, Maslin, 1942, M.A Smith, 1943, Maslin, 1945, Klemmer, 1963, Leviton, 1964d, W. Burger, 1971, Kramer, 1977, Hoge & Romano-Hoge, 1981a, Maes, 1989, Malhotra & Davis, 1991, Golay et al., 1993, Zhao & Adler, 1993, Kraus et al., 1996, David & Vogel, 1998, David & Ineich, 1999, McDiarmid et al., 1999, Parkinson, 1999, Malhotra & Thorpe, 1997, 2000, 2004c, Ziegler et al., 2001, Giannasi et al., 2001a, G. Peng & Fuji, 2001, David et al., 2002, 2009, 2011, Gumprecht et al., 2004c, Castoe & Parkinson, 2006, Grismer et al., 2006a, 2008b, Sanders et al., 2006, Dawson et al., 2008, Ganesh et al., 2008, Orlov et al., 2008, 2009, I. Das, 2010, 2012, David et al., 2011c, P. Guo & Wang, 2011, Sumontha et al., 2011 and Hoser, 2012d, o.

1. *Viridovipera gumprechti* (David, Vogel, Pawels & Vidal, 2002). Nat. Hist. J. Chulalongkorn Univ. 2(1): 7–10, figs. 4–8. (*Trimeresurus gumprechti*)

Type: Holotype, MNHN 1999.9072, a 726 mm male (T. Chan-ard, May 1996).

Type locality: "Phu Luang Wildlife Research Station, about 15 km northwest from the city of Phu Luang and 45 km southwest from the city of Loei, Loei Province, Thailand."

Distribution: Southeast Asia. Northeastern India (Assam, Meghalaya West Bengal), S China, Myanmar, N Thailand (Loei, Phitsanulok), Laos and Vietnam (Lai Chau, Lao Cai), 800–1200 m.

Sources: Malhotra & Thorpe, 2004b, David & Mathew, 2005, V.S. Nguyen et al., 2009 and I. Das, 2012.

Remarks: Holotype born in captivity May 1996 and died May 1998. Probably occurs in W Laos.

2. *Viridovipera medoensis* (Zhao *in* Zhao & Jiang, 1977). Acta Zool. Sinica 23(1): 66–67, 71, pl. 2, figs. 9.1–9.5. (*Trimeresurus medoensis*)

Type: Holotype, SBRI 73-II-5208, an adult male (E.-M. Zhao & Y-A. Gao, 3 Aug. 1973).

Type locality: "near A-nie Bridge, Medo Xian, Xizang, alt. 1,200 m., China."

Distribution: Northern India (Arunachal Pradesh), SW China (Xizang) and N Myanmar (Kachin), (150) 1000–1400 m.

Sources: Zhao & Adler, 1993, David & Tong, 1997, G. Peng & Fuji, 2001, Leviton et al., 2003, David et al., 2002, Whitaker & Captain, 2004, David & Mathew, 2005, Zhao, 2006, I. Das, 2012 and Li et al., 2010.

3. *Viridovipera stejnegeri* (K.P. Schmidt, 1925a). Amer. Mus. Novit. (157): 4. (*Trimeresurus stejnegeri*)

Synonyms: *Trimeresurus gramineus formosensis* Maki, 1931–b, *Trimeresurus gramineus kodairai* Maki, 1931–b, *Trimeresurus stejnegeri makii* Klemmer, 1963, and *Trimeresurus stejnegeri chenbihuii* Zhao, 1995.

Type: Holotype, AMNH 21054, a 688 mm male (R.C. Andrews & E. Heller [Third AMNH Cen. Asiatic Exped.], summer 1916).

Type locality: "Shaowu, Fukien Province, China" [= Shaowu, N Fujian Prov., SE China, 27°20'N, 117°30'E, elevation 245 m].

Distribution: Indo-China. Southeastern China (Chekiang, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hainan, Jiangxi, Jilin, Sichuan, Yunnan, Zhejiang), Taiwan, Laos and Vietnam (Bac Thai, Cao Bang, Da Nang, Gia Lai, Ha Giang, Ha Tinh, Hoa Binh, Lao Cai, Nghe An, Quang Nang, Vinh Phu), 90–2845 m.

Sources: C.H. Pope & Pope, 1933, C.H. Pope, 1935, Mao, 1962, Kuntz, 1963, E.H. Taylor, 1965, Fleming & Fleming, 1973, Zhao & Yan, 1979, Regenass & Kramer, 1981, Jiang, 1983, Zhang & Zhao, 1990, Zhao & Adler, 1993, Castellano et al., 1994, Zhao, 1995, David & Tong, 1997, Malhotra & Thorpe, 1997, 2004b, Orlov, 1997, M.J. Cox et al., 1998, David & Vogel, 1998, Xie et al., 1998, Orlov et al., 2000, Creer et al., 2001, David et al., 2001, G. Peng & Fuji, 2001, Tsai & Tu, 2001, Ziegler, 2002, P. Guo et al., 2006a, V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010, 2012 and Yao, 2012.

Remarks: Supplemental original description in K.P. Schmidt (1927: 546–547, fig. 22). Nepalese records are *T. tibetanus fide* Schleich & Kästle, 2002. Occurs in Cambodia and Laos *fide* Ziegler (2002: 257).

4. *Viridovipera truongsonensis* (Orlov, Ryabov, Bui & Ho, 2004). Russ. J. Herp. 11(2): 140–144, col. figs. 1–6. (*Trimeresurus truongsonensis*)

Type: Holotype, ZISP 22931 (formerly NLO 3995), a 595 mm male (T.C. Ho, N.L. Orlov, S.A. Ryabov & N.T. Bui, Sept. 2003).

Type locality "Phong Nha-Ke Bang National Park, Quang Binh province, Vietnam, elevation 600 m."

Distribution: Central Vietnam (Quang Binh, Quang Tri), 500–600 m. Known only from vicinity of type locality.

Sources: Ziegler et al., 2006, Dawson et al., 2008, Grismer et al., 2008b, V.S. Nguyen et al., 2009 and I. Das, 2010, 2012.

Remarks: This population was originally reported as *Trimeresurus* (= *Cryptelytrops*) *kanburiensis*.

5. *Viridovipera vogeli* (David, Vidal & Pauwels, 2001). Russ. J. Herp. 8(3): 206–211, figs. 1–5, 7. (*Trimeresurus vogeli*)

Synonym: *Trimeresurus koratensis* H.J. Peters, 1997 (*nomen nudum*).

Type: Holotype, MNHN 1999.9036, an 819 mm male (A. Gumprecht, K.-D. Schulz & A. Wlodarczyk, Aug. 1996).

Type locality: "Headquarters area, Khao Yai National Park (ca 14°21'N, 101°31'E), Nakhon Ratchasima Province, Thailand."

Distribution: Indo-China. Thailand (Chanthaburi, Krabi, Nakhon Ratchasima, Prachin Buri, Trat), SW Cambodia (Kampot, Koh Kong, Monulkiri, Pursat), Laos (Champasak) and Vietnam (Dak Lak, Da Nang, Gia Lai, Ha Tinh, Kon Tum, Quang Binh, Quang Nam, Thua Thien-Hue), 55–1200 m.

Sources: Orlov et al., 2003, Malholtra & Thorpe, 2004b, B.L. Stuart & Emmett, 2006, B.L. Stuart et al., 2006, Bain et al., 2007 and V.S. Nguyen et al., 2009.

Remarks: Probably occurs in Chon Buri and Suraburi, Thailand *fide* Orlov et al. (2003: 237).

6. *Viridovipera yunnanensis* (K.P. Schmidt, 1925a). Amer. Mus. Novit. (157): 4–5. (*Trimeresurus yunnanensis*)

Type: Holotype, AMNH 21058, a 701–707 mm male (R.C. Andrews & E.H. Heller [Third AMNH Cen. Asiatic Exped.], 18 May 1917).

Type locality: "Tengyueh, Yunnan Province, China" [= Tengchong, W Yunnan Prov., SW China, 25°01'N, 98°29'E, elevation 1810 m].

Distribution: Northeastern India (Arunachal Pradesh, Meghalaya, Nagaland, Sikkim, West Bengal), Nepal (Kathmandu, Sindhupalchok), China (Anhui, Fujian, Gansu, Guangdong, Guangxi, Guizhou, Hubei, Hunan, Jiangsu, Jiangxi, Jilin, Sichuan, Yunnan, Zhejiang), Myanmar (Chin, Kachin, Mandalay) and ? Laos, 1205–2845 m.

Sources: Regenass & Kramer, 1981, Zhao & Adler, 1993, Zhao, 1995, 2006, Leviton et al., 2003, Ao et al., 2004, Malhotra & Thorpe, 2004b, Tiwari & Shah, 2004, P. Guo et al., 2006a and Yang, 2008.

Remarks: Supplemental original description in K.P. Schmidt (1927: 547–548). David & Ineich, 1999, agreed with Zhao, 1999, in the elevation to specific status. Not listed by V.S. Nguyen et al., 2009 for Vietnam.

W

†*WAINCOPHIS* Albino, 1987a (Boidae)

Type species: †*Waincophis australis* Albino, 1987a.
Distribution: Lower Eocene of Argentina, and middle Paleocene of Brazil.
Sources: Albino, 1987a, 1996 and Rage, 2001.

1. †*Waincophis australis* Albino, 1987a. Ameghiniana 24(1–2): 62–63, fig. 1.

Type: Holotype, MACN CH 1008, one trunk vertebra.
Type locality: "Rocas Gemelas, Ea. El Sol, Cañadón Hondo, Provincia del Chubut, Argentina." Formacion Cañadón Hondo. Edad mamifero Casa mayorense (Eoceno temprano).
Distribution: Lower Eocene (48.0–54.0 mya) of Argentina.
Source: Albino, 1996a.

2. †*Waincophis cameratus* Rage, 2001. Palaeovertebrata 30(3–4): 130–132, fig. 11.

Type: Holotype, DGM 1343-R, one middle trunk vertebra.
Type locality: "São José de Itaboraí, State of Rio de Janeiro, Brazil; middle Palaeocene."
Distribution: Middle Paleocene (Itaboraian: 57.0–59.0 mya) of Brazil.
Source: Rage, 2011.

3. †*Waincophis pressulus* Rage, 2001. Palaeovertebrata 30(3–4): 126–129, fig. 8.

Type: Holotype, DGM 1337-R, one middle trunk vertebra.
Type locality: "São José de Itaboraí, State of Rio de Janeiro, Brazil; middle Paleocene."
Distribution: Middle Paleocene (Itaboraian: 57.0–59.0 mya) of Brazil .
Source: Rage, 2011.

Remarks: Illustration of holotype in J. Anderson (1898: pl. 46).

2. *Walterinnesia morgani* (Mocquard, 1905a). Bull. Mus. Hist. Nat., Paris 11(2): 78–79. (*Naja morgani*)

Synonym: *Atractaspis wilsoni* Wall, 1908L.
Types: Syntypes (5), MNHN 1904.562–66, three males and two females, longest male 902 mm (Morgan).

Type locality: "Perse (Arabistan)" [= Kuzestan Prov., W Iran].
Distribution: Arabia and SW Asia. Southeastern Turkey (Urfa), Iraq (Al Anbar, Al Basrah, Baghdad, Diyalá, Kirkuk, Ninawa), W Iran (Fars, Kermanshah, Khuzestan, Kurdistan, Mazandaran), E Saudi Arabia (Eastern, Najran, Riyadh), Kuwait and United Arab Emirates, NSL–2000 m.
Sources: J.C. Thompson, 1913c, Marx, 1953a, Raï, 1970, Gasperetti, 1976a, 1988, Joger, 1984, Latifi, 1991, Leviton et al., 1992, Spawls & Branch, 1995, Baran et al., 2006 and Nilson & Rastegar-Pouyani, 2007.
Remarks: A valid species *fide* Nilson & Rastegar-Pouyani (2007: 11).

†*WONAMBI* M.J. Smith, 1976 (†Madtsoiidae)

Type species: †*Wonambi naracoortensis* M.J. Smith, 1976.
Distribution: Oligocene to Pleistocene of Australia.
Sources: Rage, 1984b, Barrie, 1990, Scanlon, 1992, 1997, 2003, 2006, Scanlon & Lee, 2002, La Duke et al., 2010 and J.A. Wilson et al., 2010.

1. †*Wonambi barriei* Scanlon *in* Scanlon & Lee, 2000. Nature 403(6768): 417, fig. 2e.

Type: Holotype, QMF F23038, one middle trunk vertebra.
Type locality: "WW Site, Riversleigh (northwest Queensland, Australia); Late Oligocene to Early Miocene of Riversleigh, northwest Queensland."
Distribution: Upper Oligocene to lower Miocene (16.3–25.0 mya) of Australia.

2. †*Wonambi naracoortensis* M.J. Smith, 1976. Trans. Roy. Soc. So. Australia 100(1): 41–43, figs. 2a–e, 3a–c.

Type: Holotype, SAMA P16168, one trunk vertebra (J. Barre).
Type locality: "Fossil Chamber, Victoria Cave, Naracoorte, S. Aust." [= South Australia, Australia].
Distribution: Pliocene and Pleistocene (0.01–4.5 mya) of Australia.
Sources: M.J. Smith, 1985 and Scanlon, 1995.

†*WOUTERSOPHIS* Rage, 1980 (†Nigerophiidae)

Type species: †*Woutersophis novus* Rage, 1980.
Distribution: Middle Eocene of Belgium.
Sources: Rage, 1980, 1983b, 1984b and LaDuke et al., 2010.

1. †*Woutersophis novus* Rage, 1980. C.R. Acad. Sci., Paris 291D(5): 469–471, figs. a–b.

Type: Holotype, MNHN CBL 1, one middle trunk vertebra (G. Wouters).
Type locality: "sablière Van Pachtenbeke, à la limite de Wolu Weh-Saint-Étienne et Wodu Weh-Saint-Lambert (Est de Bruxelles), Belgique; Bruxellien (= Lutétien inférieur), Éocène moyen."
Distribution: Middle Eocene (Lutetian, MP 11–15: 40.4–48.6 mya) of Belgium. Known only from type locality.

X

XENELAPHIS A.C.L.G. Günther, 1864a (Colubridae)

Synonyms: *Henelaphis* – Higgins, 1873 *(nomen incorrectum), Xenalaphis* – Nutaphand, 1991b *(nomen incorrectum),* and *Senelapsis* – Nutaphand, 2001 *(nomen incorrectum).*
Type species: *Coluber hexagonotus* Cantor, 1847.
Distribution: Southeast Asia and Indonesia.
Sources: Rooij, 1917, M.A. Smith, 1943, C. Haas, 1950, Tweedie, 1983, Welch, 1988, David & Vogel, 1996, Iskandar & Colijn, 2001 and I. Das, 2010, 2012.

1. *Xenelaphis ellipsifer* Boulenger, 1900f. Proc. Zool. Soc. London 69(2): 184, pl. 16.

Type: Holotype, BMNH 1946.1.7.38 (formerly SMK), a 2000 mm male.
Type locality: "Head-waters of Sarawak River, Borneo" [= Sarawak, East Malaysia].
Distribution: West Malaysia (Perak, Selangor), East Malaysia (Sabah, Sarawak) and W Indonesia (Sumatra), (150) 800–1100 m.
Sources: Rooij, 1917, Malkmus et al., 2002, Auliya & Shepard, 2009 and Grismer et al., 2010.
Remarks: Record from Mt. Kinabalu needs confirmation *fide* Stuebing & Inger (1999: 79).

2. *Xenelaphis hexagonotus* (Cantor, 1847). J. Asiat. Soc. Bengal 16(182): 921–922. (*Coluber hexagonotus*) (*nomen corrigendum*)

Synonyms: *Coluber sublutescens* H. Boie *in* Schlegel, 1826a *(nomen nudum), Coluber sublutescens* Schlegel, 1826b *(nomen nudum), Coluber hexahonotus* Cantor, 1847 *(nomen incorrigendum), Coluber hexagonotus* Cantor, 1847 *(nomen corrigendum), Coluber sublutescens* A.-M.-C. Duméril, 1853 (*nomen nudum*), *Coryphodon sub-lutescens* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen incorrigendum), Dendrophis dumerilii* Bleeker, 1858a (*nomen nudum*), *Coryphodon hexanotus* – A.C.L.G. Günther, 1858 *(nomen incorrectum),* and *Coryphodon sublutescens* – Boulenger, 1894a *(nomen corrigendum).*
Type: Holotype, BMNH 1946.1.14.86, a 387 mm specimen (W. Norris via T. Cantor).
Type locality: "Great Hill of Pinang, Prince of Wales Island (Pulo Pinang), 5° 25' N. L. 100° 19'E." [= Great Hill, Penang Is., Pinang State, NW West Malaysia, 5°25'N, 100°17'E].
Distribution: Southeast Asia and Indonesia. S Myanmar, S Vietnam (Ho Chi Minh City), S Thailand (Narathiwat, Phattalung, Surat Thani), West Malaysia (Perlis, Pinang, Penang Is.), Singapore, East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Bangka, Belitung, Java, Kalimantan, Riau Arch., Sumatra), NSL–1200 m.
Sources: K.F.L. Lim & Lee, 1989, K.K.P. Lim & Lim, 1992, Manthey & Grossmann, 1997, Chan-ard et al., 1999, B.L. Lim et al., 2002, Auliya, 2006, I. Das, 2007b, V.S. Nguyen et al., 2009 and Onn et al., 2009.
Remarks: Possibly occurs in Cambodia *fide* Manthey & Grossmann (1997: 396). Myanmar record doubtful *fide* Dowling & Jenner (1988: 11).

XENOCALAMUS A.C.L.G. Günther, 1868 (Atractaspididae)

Synonym: *Micaela* F. Werner *in* Michaelsen, 1915.
Type species: *Xenocalamus bicolor* A.C.L.G. Günther, 1868.
Distribution: Southern Africa.
Sources: Witte & Laurent, 1947, Broadley, 1971c, 1983, V.F.M. FitzSimons, 1974, Branch, 1988, Wallach, 1991, Underwood & Kochva, 1993, Nagy et al., 2005, Kelly et al., 2009 and Zaher et al., 2009.

1. *Xenocalamus bicolor* A.C.L.G. Günther, 1868. Ann. Mag. Nat. Hist. (4) 1(6): 415, pl. 19, fig. a.

Synonyms: *Micaela pernasuta* F. Werner *in* Michaelsen, 1915, *Xenocalamus bicolor maculatus* V.F.M. FitzSimons, 1932, *Xenocalamus bicolor concavorostralis* A. Hoffman, 1940, *Xenocalamus bicolor australis* V.F.M. FitzSimons, 1946b, and *Xenocalamus bicolor machadoi* Laurent, 1954a.
Type: Holotype, BMNH 1946.1.2.89 (formerly SAM), a 430–432 mm female (? J. Chapman, 1861–1863).
Type locality: "on the Zambeze" [= Zambezi River, Mozambique] (in error). Corrected to Damaraland, NW Namibia *fide* Broadley (1971c: 679).
Distribution: Southern Africa. Southeastern Democratic Republic of the Congo (Katanga), Angola (Benguela, Bié, Lunda Norte), Zimbabwe (Mashonaland Central, Mashonaland West, Masvingo, Matebeleland North), S Mozambique (Gaza, Inhambane, Maputo, Sofala), Namibia (Erongo, Khomas, Okavango, Omaheke, Otjozondjupa), Botswana (Gaborone, Ghanzi, Kgalagadi, Kweneng, North West) and NE South Africa (Free State, KwaZulu-Natal, Limpopo, Mpumalanga, North-West), 30–1700 m.

Sources: Laurent, 1954, Mertens, 1955, 1971, Broadley, 1959, Witte, 1962, Broadley & Cock, 1975, Auerbach, 1987, Bates, 1991, Clauss & Clauss, 2002, M. Griffin, 2003, J.C. Murphy & Schlager, 2003, Marais, 2004, Alexander & Marais, 2007 and Broadley & Blaylock, 2013.

Remarks: Original description attributes collector to J. Chapman on the Zambezi River (and Broadley has shown that Chapman did not go down the Zambezi and that type locality is in Namibia); however, A.C.L.G. Günther (1868: 413–414) also listed Cape Town Mus. as source so it is more likely that the type came from SAM rather than Chapman.

2. *Xenocalamus lineatus* Roux, 1907a. Rev. Suisse Zool. 15(1): 79–80. (*Xenocalamus bicolor lineatus*)

Type: Holotype, MHNN 16 (formerly MZN 66), a 220 mm specimen (H.A. Junod).

Type locality: "Rikatla, colline sablonneuse, située dans le pays de Mozambique, au nord de Lourenço-Marquès à 50 mètres d'altitude et à 5 à 6 kilom. de la mer" [= Ricatla, Maputo Prov., S Mozambique, 25°26'S, 32°31'E, elevation 50 m].

Distribution: Southern Mozambique (Gaza, Maputo) and ext. S Zimbabwe (S Masvingo, S Matebeleland South), 50–460 m.

Remarks: A valid species *fide* Broadley & Blaylock (2013: 252).

3. *Xenocalamus mechowii* W.C.H. Peters, 1881e. Sitz. Ges. Naturf. Freunde Berlin 1881(9): 147–148.

Synonym: *Xenocalamus mechowii inornatus* Witte & Laurent, 1947.

Type: Holotype, ZMB 10044, female (M.-F.W.A. von Mechow, 1873–1881).

Type locality: "Malange, West-Afrika" [= Malanje, Malanje Prov., cen. Angola, 9°33'S, 16°21'E, elevation 1130 m].

Distribution: Southern Africa. Southern Congo (Brazzaville, Pool), S Democratic Republic of the Congo (Bandundu, Bas-Congo, Kasai Occidental, Kasai Oriental, Katanga, Kinshasa), E Angola (Cuando Cubango, Lunda Norte, Malanje), W Zambia (North-Western, Southern, Western), W Zimbabwe (Matebeleland North), N Namibia (Caprivi, Okavango, Oshikoto) and Botswana (Kweneng, North West), 285–1245 m.

X

4. *Xenocalamus michelli* L. Müller, 1911. Zool. Anz. 38(14–15): 359–360.

Type: Holotype, ZSM 524/1911, a 540 mm specimen (Michell), lost *fide* Franzen & Glaw (2007: 247).

Type locality: "Kituri, Katangadistrikt, Kongostaat" [= Lukaga, Katanga Prov., SE Democratic Republic of the Congo].

Distribution: Southeastern Democratic Republic of the Congo (E Katanga), 685–730 m.

5. *Xenocalamus sabiensis* Broadley, 1971c. Occ. Pap. Natl. Mus. Rhodesia 4B(33): 673–675, fig. 17.

Type: Holotype, NMZB 1448 (formerly UM 1448), a 424+ mm male (D. Bredenkamp, Nov. 1961).

Type locality: "Birchenough Bridge, Sabi River, Rhodesia, at an altitude of 450 metres" [= Birchenough Bridge, Zimbabwe, 19°58'S, 32°21'E, elevation 490 m].

Distribution: Southeastern Zimbabwe (S Manicaland, Masvingo) and S Mozambique (Manica), 240–1100 m.

Sources: Broadley & Cock, 1975 and Broadley & Blaylock, 2013.

6. *Xenocalamus transvaalensis* Methuen, 1919. Proc. Zool. Soc. London 89(3–4): 350–351, fig. 1b.

Type: Holotype, TMP 10121 (formerly TM 1689), a 414 mm specimen (Noomé & Roberts, Sept. 1913).

Type locality: "north of the Zoutpansbergen, Northern Transvaal, near the Ingelel River, within 25 miles of the Limipopo" [= N of Soutpansberg (23°02'S, 29°48'E, elevation 965 m), near Nzhelele River, N Limpopo Prov., NE South Africa *fide* Broadley, 1983: 205].

Distribution: Southern Africa. Eastern Botswana (E Central), NE South Africa (NE KwaZulu-Natal, N Limpopo) and ext. S Mozambique (Maputo, Bazaruto Is.), NSL–965 m.

Sources: Auerbach, 1987, Broadley, 1990b, Marais, 2004 and Alexander & Marais, 2007.

XENOCHROPHIS A.C.L.G. Günther, 1864a (Natricidae)

Synonyms: *Fowlea* Theobald, 1868b, *Diplophallus* Cope, 1893a, *Diplophatulus* – Cope, 1900 *(nomen incorrectum), Fowleya* – Král, 1969 *(nomen incorrectum), Xenochropis* – Negi, 1992 *(nomen incorrectum),* and *Rentonus,* Hoser, 2012ab *(nomen illegitimum).*

Type species: *Psammophis cerasogaster* Cantor, 1839b.

Distribution: Southern Asia and Indonesia.

Sources: M.A. Smith, 1943, Malnate, 1960a, McDowell, 1961, Kramer, 1977, Welch, 1988, Wallach, 1998, Zaher et al., 2009, I. Das, 2010, 2012, Cadle, 2011 and Hoser, 2012ab.

Remarks: An undescribed species occurs in Sri Lanka *fide* Vogel & David (2006: 245 & 2012: 50–52).

1. *Xenochrophis asperrimus* (Boulenger, 1891a). Ann. Mag. Nat. Hist. (6) 7(39): 281–282. (*Tropidonotus asperrimus*)

Synonym: *Tropidonotus quincunciatus unicular* F. Müller, 1887.
Types: Syntypes (12), BMNH 1946.1.7.60–61, BMNH 1946.1.12.43, BMNH 1946.1.12.74–75, BMNH 1946.1.12.85, BMNH 1946.1.13.33–34, BMNH 1946.1.15.17, BMNH 1946.1.15.22–23, and BMNH 1946.1.15.30, longest syntype 820 mm.
Type locality: "Ceylon" [= Sri Lanka].
Distribution: Sri Lanka (Central, Eastern, North-Central, Northern, North-Western, Sabaragamuwa, Southern, Uva, Western), NSL–1220 m.
Sources: Wall, 1910k, E.H. Taylor, 1950b, Deraniyagala, 1954, P. Silva, 1969, A. Silva, 1990, I. Das, 2005 and Vogel & David, 2006, 2007, 2012.
Remarks: A valid species *fide* Silva (1990: 98). A sympatric undescribed species also on Sri Lanka *fide* Vogel & David (2006: 243).

2. *Xenochrophis bellulus* (Stoliczka, 1871). J. Asiat. Soc. Bengal 40(2): 432–434, pl. 26, figs. 2–2b. (*Tropidonotus bellulus*)

Type: Holotype, a 419 mm specimen (S. Kurz), lost *fide* M.A. Smith (1943: 298).
Type locality: "between Prome and Tonghoo, in N. Western Pegu, Burma" [= between Pyay (18°49'N, 95°13'E, elevation 40 m), and Toungoo (18°56'N, 96°26'E, elevation 55 m), N Bago Div., S Myanmar].
Distribution: Southern Myanmar (Bago, Yangon), 30–300 m.
Sources: Theobald, 1876, Boulenger, 1890a, Wall, 1926b, M.A. Smith, 1943, Dowling & Jenner, 1988, Malnate & Underwood, 1988, D.-Q. Rao & Yang, 1998 and Pauwels et al., 2001.

3. *Xenochrophis cerasogaster* (Cantor, 1839b). Proc. Zool. Soc. London 7(1): 52–53. (*Psammophis cerasogaster*)

Synonyms: *Amphiesma schistaceum* Jan, 1864a, and *Xenochrophis cirasogaster* – R.C. Sharma, 2003 *(nomen incorrectum)*.
Type: Lectotype, specimen illustrated in colored sketch of T.E. Cantor (1834–1837: no. 30) in RSL, designated by M.A. Smith (1943: 317).
Type locality: "near Calcutta (22°34'N, 88°22'E, elevation 10 m), S West Bengal State, NE India" via lectotype selection.
Distribution: South Asia. Southeastern Pakistan (Sindh), NE India (Assam, Uttar Pradesh, West Bengal), Bangladesh (Barisol), and Nepal (Rupandehi), NSL–200 m.
Sources: A.C.L.G. Günther, 1864a, Malnate & Minton, 1965, Kramer, 1977, M.S. Khan, 2002, 2006, Schleich & Kästle, 2002, Tiwari & Shah, 2004, Ahsan et al., 2009, Grismer et al., 2010 and Sourav & Purkayastha, 2011.
Remarks: Holotype lost *fide* Malnate & Minton (1965: 24). Penang, Malaysia record rejected *fide* Tweedie (1935: 126).

4. *Xenochrophis flavipunctatus* (Hallowell, 1861). Proc. Acad. Nat. Sci. Philadelphia (1860) 12(11): 503–504. (*Amphiesma flavipunctatum*)

Synonym: *Tropidonotus piscator ornata* Wall, 1907c.
Type: Neotype, USNM 7387, a 398 mm male (J.M. Brooke [No. Pacific Explor. Exped.], May 1854), designated by Zug et al. (2006: 165) and Vogel & David (2012: 17).
Type locality: "Island of Hong Kong, China" via lectotype/neotype selection.
Distribution: Southeastern Asia. Eastern India, Nepal (Lumbini), SE China (Anhui, Fujian, Guizhou, Guangxi, Guangdong, Hainan, Hong Kong, Hubei, Hunan, Jiangsu, Jiangxi, Shaanxi, Yunnan, Xizang, Zhejiang), Taiwan, Myanmar (Ayeyarwady, Bago, S Kachin, Sagaing, Yangon), Thailand (Bangkok, Chaiyaphum, Chanthaburi, Chiang Mai, Chiang Rai, Chomphun, Chon Buri, Kanchanaburi, Khan Kaen, Lampang, Nakhon Ratchasima, Nakhon Si Thammarat, Phatthalung, Prachuap Khiri Khan, Lop Buri, Phang Nga, Phetchabun, Phuket, Prachuap Khirikhan, Satun, Si Sa Ket, Surat Thani, Tak, Ubon Ratchathani, Udon Thani, Uthai Thani), Cambodia (Banteay Meanchey, Battambang, Kampong Cham, Kampong Chhang, Kampong Speu, Kampong Thom, Kampot, Kandal, Kep, Koh Kong, Kratié, Mondulkiri, Oddar Meancheay, Pailin, Phnom Penh, Preah Vihear, Prey Veng, Pursat, Ratanakiri, Siem Reap, Sihanoukville, Stung Treng, Svay Rieng, Takéo), Laos (Attapu, Borikhan, Champasak, Houaphan, Khammouan, Louangphrabang, Phongsali, Salavan, Savannakhet, Vientiane, Xaignabouli, Xekong, Xiangkhouang), Vietnam (An Giang, Bac Giang, Bac Kan, Bac Lieu, Bac Ninh, Ba Ria-Vung Tau, Ben Tre, Binh Dinh, Binh Duong, Binh Phuoc, Binh Thuan, Ca Mau, Can Tho, Cao Bang, Dak Lak, Dak Nong, Da Nang, Dien Bien, Dong Nai, Dong Thap, Gia Lai, Ha Giang, Hai Duong, Hai Pohng, Ha Nam, Hanoi, Ha Tay, Ha Tinh, Hau Giang, Hoa Binh, Ho Chi Minh City, Hung Yen, Khanh Hoa, Kien Giang, Kon Tum, Lai Chau, Lam Dong, Lang Son, Lao Cai, Long An, Nam Dinh, Nghe An, Ninh Binh, Ninh Thuan, Phu Tho, Phu Yen, Quang Binh, Quang Nam, Quang Ngai, Quang Ninh, Quang Tri, Soc Trang, Son La, Tai Ninh, Thai Binh, Thai Nguyen, Thanh Hoa, Thua Thien-Hue, Tien Giang, Tra Vinh, Tuyen Quang, Vinh Phuc, Vinh Long, Yen Bai, Con Dao Is.), West Malaysia (Johore, Kedah, Kelantan, Melaka, Negeri Sembilan, Pahang, Perak, Perlis, Pinang, Selangor, Terengganu) and Singapore, NSL–1200 m.
Sources: K.P. Schmidt, 1927, H. Saint-Girons, 1972, Zhao & Adler, 1993, Darevsky, 1999, Schleich & Kästle, 2002, Vogel & David, 2006, 2012, Zug et al., 2006,

V.S. Nguyen et al., 2009, Xiang & Li, 2009, I. Das, 2010, Cadle, 2011 and T. Hartmann et al., 2013.

Remarks: A valid species *fide* Zug et al. (2006: 164) and Vogel & David (2006: 244). Photographs of neotype in Vogel & David (2012: figs. 9–11). Original description based on ANSP 6616 (Canton River, China, 553 mm female, Ruschenberger coll.) *fide* Vogel & David (2012: 17), lost *fide* Zug et al. (2006: 164). Hallowell (1861: 504) clearly had two syntypes and, although basing the description on ANSP specimen, he listed type locality, date and collector of other syntype. Cochran (1961: 158) erroneously listed USNM 7387 as holotype. Nias Is., Indonesia record doubtful *fide* Vogel & David (2012: 30).

5. *Xenochrophis maculatus* (Edeling, 1864a). Nat. Tijds. Ned. Indïe (6) 26(1): 488–489. (*Tropidonotus maculatus*)

Synonyms: *Tropidonotus sundanensis* Bleeker, 1857a *(nomen nudum), Amphiesma substolatum* Jan, 1863b (*nomen nudum*), *Amphiesma substolatum* Jan, 1865c, *Tropidonotus sundanensis* A.C.L.G. Günther, 1865 *(nomen praeoccupatum),* and *Tropidonotus sarawacensis* J.G. Fischer, 1885a.

Type: Holotype, not designated, a 685 mm specimen (Benjamins), lost *fide* Iskandar & Colijn (2001: 109).

Type locality: "Martapoera, près de Bandjermasin" [= Martapura, near Bandjermasin, S Kalimantan, cen. Indonesia, 3°25'S, 114°51'E, elevation 10 m].

Distribution: Malay Peninsula and Indonesia. West Malaysia (Johore, Kedah, Kelantan, Pahang, Perak, Selangor, Terengganu), Singapore, East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Bangka, Belitung, Kalimantan, Natuna Arch., Riau Arch., Sumatra), 10 m.

Sources: Tweedie, 1983 and David & Vogel, 1996, Stuebing & Inger, 1999, Malkmus et al., 2002, Auliya, 2006 and I. Das, 2006, 2007b.

Remarks: Original description reprinted in Edeling (1865: 203–204).

6. *Xenochrophis melanzostus* (Gravenhorst, 1807). Vergleich. Linne. Zool. Syst.: 402. (*Coluber melanzostus*)

Synonyms: *Tropidonotus melanozostus* F. Boie, 1827 *(nomen emendatum), Coluber lippus* A. Reuss, 1834, and *Tropidonotus striolatus* Blyth *in* Blanford, 1863b. [or 1868]

Type: Neotype, MNHN 60, an 805 mm female (Méder), designated by Vogel & David (2012: 10).

Type locality: "'Batavia', now Jakarta, Java Island, Indonesia" [= 6°13'S, 106°51'E, elevation 15 m] via neotype selection.

Distribution: Southern Indonesia (Bali, Java, Sumatra), NSL–15 m.

Sources: David & Vogel, 1996 and Vogel & David, 2006, 2012.

Remarks: A valid species *fide* Das (1996: 59). Syntypes (3+) in BM destroyed [9 Sept. 1944 during World War II] *fide* M. Rybecky *in* Vogel & David (2012: 10). Photographs of neotype in Vogel & David (2012: 10, figs. 2–4). Holotype erroneously listed in RMNH *fide* Iskandar & Colijn (2001: 109). Possibly introduced in Bali *fide* Kusuma et al., 2010. Sulawesi records doubtful *fide* Lang & Vogel (2005: 258).

7. *Xenochrophis piscator* (J.G. Schneider, 1799). Hist. Amph. 1: 247–248. (*Hydrus piscator*)

Synonyms: *Hydrus palustris* J. Schreider, 1799, *Coluber anastomosatus* Daudin, 1803d, *Coluber braminus* Daudin, 1803d, *Coluber dora* Daudin, 1803d, *Coluber mortuarius* Daudin, 1803d, *Coluber umbratus* Daudin, 1803d, *Natrix sagittata* Wagler, 1825 (*nomen ineditum*), *Coluber funebris* F. Boie, 1827 (*nomen nudum*), *Coluber bengalensis* Gray, 1834, *Coluber rectangulus* Gray, 1834, *Tropidonotus quincunciatus* Schlegel, 1837, *Coluber sinuatus* Schlegel, 1837 (*nomen nudum*), *Tropidonotus piscator lateralis* Wall, 1907c, *Tropidonotus piscator obscurus* Wall, 1907c, *Tropidonotus piscator punctatus* Wall, 1907c, and *Tropidonotus piscator unicolor* Wall, 1907c.

Type: Holotype, BMNH 1904.7.24.32, skin no. 32 of a female (P. Russell,

Type locality: "Indiae orientalis" [= E India]. Restricted to Coast of Coromandel, N Andhra Pradesh State, E India *fide* Vogel & David (2012: 6).

Distribution: Southern and SE Asia. Pakistan (E Balochistan, Gilgit-Baltistan, Jammu and Kashmir, Khyber Pakhtunkhwa, Punjab, Sindh), India (Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Kerala, Karnataka, Madhya Pradesh, Maharashtra, Manipur, Meghalaya, Mizoram, Nagaland, Orissa, Pondicherry, Punjab, Rajasthan, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh, West Bengal), Bangladesh, Nepal (Bara, Bardiya, Chitwan, Dhanusa, Doti, Jhapa, Kanchanpur, Kaski, Kathmandu, Mahottari, Morang, Parsa, Rupandehi, Saptari, Sunsari, Udayapur), Bhutan, S China (Guangxi, Yunnan), Myanmar (Ayeyarwaddy, Bago, Chin, Kachin, Kayah, Kayin, Magwe, Mandalay, Mon, Rakhine, Sagaing, Shan, Yangon), Thailand (Chiang Mai, Loei, Udon Thani) and Laos (Louangphrabang, Vientiane, Xaignabouri), 150–2100 m.

Sources: Wall, 1907c, Bergman, 1958b, Deuve, 1963a, c, Kuntz, 1963, Kramer, 1977, Tweedie, 1983, Inger et al., 1984, M.S, Khan, 1984a, 2002, Nanhoe & Ouboter, 1987, K.F.L. Lim & Lee, 1989, A. Silva, 1990, Zhao & Adler, 1993, I. Das, 1994, David & Vogel, 1996, M.J. Cox et al., 1998, Chan-ard et al., 1999, Farkas & Fritz, 1999d, Xie et al., 1998, Hallermann et al., 2001, Ao et al., 2004, Tiwari & Shah, 2004, Whitaker & Captain,

2004, N. Khaire, 2006, M.F. Ahmed et al., 2009, Vyas, 2011 and Vogel & David, 2012.

Remarks: Original description based on P. Russell (1796: 38, pl. 33). Photograph of holotype in Vogel & David (2012: fig. 1). See Kramer (1977: 750) for discussion of type. Probably occurs in Nepal *fide* Schleich & Kästle, 2002.

8. *Xenochrophis punctulatus* (A.C.L.G. Günther, 1858). Cat. Colub. Snakes Brit. Mus.: 247–248. (*Tropidonotus punctulatus*)

Synonym: *Fowlea peguensis* Theobald, 1868.

Type: Holotype, BMNH 1946.1.13.59, a 559 mm female (Zool. Soc. London).

Type locality: Unknown.

Distribution: Southeast Asia. Southern Myanmar (Bago, Mon, Taninthayi, Yangon) and Thailand (Mae Hong Son, Ranong), NSL–30 m.

Sources: Pauwels et al., 2001, 2004.

Remarks: A valid species *fide* Pauwels et al. (2001: 247). Manipur, India record doubtful *fide* Pauwels et al. (2001: 250).

9. *Xenochrophis sanctijohannis* (Boulenger, 1890a). Fauna Brit. India, Rept. Batr.: 350. (*Tropidonotus sanctijohannis*) (*nomen corrigendum*)

Synonyms: *Tropidonotus sancti-johannis* Boulenger, 1890a *(nomen incorrigendum),* and *Xenochrophis piscator sanctijohannis* – Kramer, 1977 *(nomen corrigendum).*

Type: Holotype, BMNH 1946.1.13.61 (formerly BMNH 1889.11.8.1), a 406 mm specimen (O.B. St. John).

Type locality: "Kashmir" [= Azad Kashmir Prov., NE Pakistan or Jammu & Kashmir Prov., NW India].

Distribution: South Asia. Extreme E Afghanistan, NE Pakistan (Jammu & Kashmir, S Punjab), N India (Arunachal Pradesh, Himachal Pradesh, Jammu & Kashmir, West Bengal), and Nepal, 405–1400 (2200) m.

Sources: M.S. Khan, 2002, Tiwari & Shah, 2004, Whitaker & Captain, 2004, Masroor, 2012 and Vogel & David, 2012.

Remarks: A valid species *fide* Tiwari & Shah (2004: 200) or separate *X. piscator* morph *fide* Vogel & David (2012: 45).

10. *Xenochrophis schnurrenbergeri* Kramer, 1977. Rev. Suisse Zool. 84(3): 750, figs. 16–17. (*Xenochrophis flavipunctatus schnurrenbergeri*)

Type: Holotype, MHNG 1377.44, a 480 mm male (H. Schnurrenberger, Oct. 1962).

Type locality: "Nepal. 83° 28'/27° 30'/150 m" [= vicinity of Bhairahawa, Lumbini Zone, Rupandehi Prov., cen. Nepal, 27°30'N, 83°28'E, elevation 150 m].

Distribution: South Asia. Southeastern Pakistan (Sindh), S Nepal (Mahottari, Rupandehi) and N India (Assam, Orissa, Uttar Pradesh, West Bengal), NSL–150 m.

Sources: Tiwari & Shah, 2004, Vogel & David, 2006, 2012 and Mohapatra et al., 2010b.

Remarks: A valid species *fide* Vogel & David (2006: 244). Photographs of holotype in Vogel & David (2012: figs. 17–18). Sympatric with *X. piscator* in northern Distribution and parapatric with *X. flavipunctatus fide* Vogel & David (2006: 244).

11. *Xenochrophis trianguligerus* (F. Boie, 1827). Isis von Oken 20(6): 535. (*Tropidonotus trianguligerus*)

Synonyms: *Tropidonotus trianguligerus* H. Boie *in* Schlegel, 1826a *(nomen nudum), Tropidonotus trianguligerus* Schlegel, 1826b *(nomen nudum), Tropidonotus umbratus* Cantor, 1847 *(nomen praeoccupatum),* and *Tropidonotus trianguligerus annularis* J.G. Fischer, 1885a.

Type: Lectotype, RMNH 1102 (H. Boie & H.C. Macklot, 1825–1832), designated by R.F. Inger *in* Koch (2012: 284).

Type locality: "Java" [W Indonesia] via lectotype selection. Restricted to region of Mt. Pangerango and Mt. Salak, West Java, Indonesia *fide* Brongersma (1948b: 14). Emended to Tjihandjawar, at the foot of Mt. Pangerango, W. Java [= Cihanyawar, Nagrak, Jawa Barat, W Java, SW Indonesia, 07°03'S, 108°40'E] *fide* Brongersma (1950: 1499).

Distribution: Southeast Asia and Borneo. Eastern India (Andamans & Nicobars: Great Nicobar and Little Nicobar Is.), Myanmar, Thailand (Nakhon Si Thammarat, Pattani, Phang Nga, Phatthalung, Phuket, Ranong, Satan), SW Cambodia (Kampot, Koh Kong), Laos, Vietnam (Quang Nam, Vinh Phuc), West Malaysia (Melaka, Perlis), Singapore, East Malaysia (Sabah, Sarawak), Brunei and Indonesia (Bali, Bangka, Belitung, Buton, Java, Kabaena, Kalimantan, Mentawai Arch., Nias, Riau Arch., Sangihe Arch., Sulawesi, Sumatra, Ternate), NSL–1370 m.

Sources: Bergman, 1959, E.H. Taylor, 1965, Tweedie, 1983, M.J. Cox, 1991b, I. Das, 1994, 2006, 2007, David & Vogel, 1996, Inger & Tan Fui Lian, 1996, Manthey & Grossmann, 1997, M.J. Cox et al., 1998, Rao & Yang, 1998, Malkmus et al., 2002, Whitaker & Captain, 2004, Lang & Vogel, 2005, B.L. Stuart & Emmett, 2006, Vijayakuman & David, 2006, Auliya, 2006, V.S. Nguyen et al., 2009 and Koch, 2012.

Remarks: Original description based on Boie's MS (1823–1825) so although F. Boie credited authorship to Reinwardt, he cannot be the author. Type locality listed as Bogor, West Java, Indonesia *fide* Iskandar & Colijn (2001: 110).

12. *Xenochrophis tytleri* (Blyth, 1863). Proc. Asiat. Soc. Bengal 32(1): 88–89. (*Tropidonotus tytleri*) (*nomen corrigendum*)

Synonyms: *Tripidonotus tytleri* Blyth, 1863 *(nomen incorrigendum), Tropidonotus tytleri* – Theobald, 1876 *(nomen corrigendum),* and *Tropidonotus striolatus* Theobald, 1868a *(nomen substitutum).*

Type: Holotype, ZSI 7402 (formerly ASB 46a), an 876 mm male (R.C. Tytler, April 1862–1863).

Type locality: "Port Blair" [= South Andaman Is., Andaman & Nicobars, E India, Bay of Bengal].

Distribution: Eastern India (Andaman & Nicobars: Baratang, Long, North Andaman, Ross and South Andaman Is.).

Sources: Biswas & Sanyal, 1980, Talukdar et al., 1989, I. Das et al., 1998, Whitaker & Captain, 2004, Vogel & David, 2006, 2012 and Harikrishnan et al., 2012.

Remarks: Holotype illustrated in Vogel & David (2012: 19–20, figs. 12–13). Possibly occurs in the Nicobars, India *fide* Whitaker & Captain (2004: 226) although doubtful *fide* Vogel & David (2012: 31).

XENODERMUS J.C.H. Reinhardt, 1836 (Xenodermatidae)

Synonyms: *Gonionotus* Gray, 1846a, *Xenoderma* Lichtenstein & Martens, 1856 *(nomen emendatum),* and *Xenordermus* – Lim & Sharef bin Kanarudin, 1975 *(nomen incorrectum).*

Type species: *Xenodermus javanicus* J.C.H. Reinhardt, 1836.

Distribution: Southeastern Asia and Greater Sundas.

Sources: Duméril, Bibron & Duméril, 1854c, Rooij, 1917, Kopstein, 1926, 1930, 1938a–b, 1941, E.H. Taylor, 1965, Tweedie, 1983, M.J. Cox, 1991, J.C. Murphy et al., 1994, David & Vogel, 1996, J.B. Rasmussen & Hughes, 1997, Keller, 2008, I. Das, 2006, 2010 and Zaher et al., 2009.

1. *Xenodermus javanicus* J.C.H. Reinhardt, 1836. Over. Kon. Dansk Vidensk. Selsk. Forhand. (1836–1837) 3: 6–7.

Synonyms: *Gonionotus plumbeus* Gray, 1846, and *Xenoderma gonyonotus* Lichtenstein & Martens, 1856.

Type: Holotype, ZMUC 5481, a 637 mm specimen (E. Lange, 1834).

Type locality: "Java" [SW Indonesia]

Distribution: Malay Peninsula and Greater Sundas. Myanmar, ext. S Thailand (Yala), West Malaysia (Johor), and Indonesia (Java, Kalimantan, Sumatra), NSL–1300 m.

XENODON H. Boie *in* Fitzinger, 1826a (Xenodontidae)

Synonyms: *Ophis* Wagler *in* Spix, 1824, *Xenodon* H. Boie *in* Schlegel, 1826, *Acanthophallus* Cope, 1893a, *Procteria* F. Werner, 1924 *(nomen praeoccupatum), Zenodon* Swainson, 1839 *(nomen praeoccupatum), Xenedon* – Brazil, 1914 *(nomen incorrectum), Lenodon* – Phisalix, 1917a *(nomen incorrectum), Senodon* – Briceño-Rossi, 1934 *(nomen incorrectum), Waglerophis* Romano & Hoge, 1973, *Xenoon* – Cunha & Nascimento, 1978 *(nomen incorrectum),* and *Thalesius* Ferreira-Yuki, 1993.

Type species: *Coluber severus* Linnaeus, 1758.

Distribution: Latin America.

Sources: Wucherer, 1861b, J.A. Peters & Orejas-Miranda, 1970, Amaral, 1978, Cadle 1984a, 1984c, Villa et al., 1988, Ferreira-Yuki, 1993, Lúcia-Ferreira, 1997, Wallach, 1998, Vidal et al., 2000, Gravlund, 2001, M.S.Y. Lee et al., 2007, Zaher et al., 2009 and Vidal et al., 2010.

Remarks: *Waglerophis* a synonym of *Xenodon fide* Zaher et al. (2009: 146) and Grazziotin et al., 2012.

1. *Xenodon guentheri* Boulenger, 1894a. Cat. Snakes Brit. Mus. 2: 147–148, pl. 7, fig. 1.

Type: Holotype, BMNH 1946.1.5.93, a 430 mm male (Michaëlis).

Type locality: "Lagos, Sta. Catharina, southern Brazil."

Distribution: Southern Brazil (Paraná, Santa Catarina).

Source: Amaral, 1978.

2. *Xenodon merremii* (Wagler *in* Spix, 1824). Serp. Brasil. Sp. Nov.: 47–48, pl. 17. (*Ophis merremii*)

Synonyms: *Xenodon aeneus* H. Boie *in* Schlegel, 1826a *(nomen nudum), Xenodon ocellatus* H. Boie *in* Schlegel, 1826a *(nomen nudum), Xenodon aeneus* Schlegel, 1826b *(nomen nudum), Xenodon ocellatus* Schlegel, 1826b *(nomen nudum), Xenodon aeneus* F. Boie *in* H. Boie, 1827, *Xenodon ocellatus* F. Boie *in* H. Boie, 1827, *Xenodon irregularis* A.C.L.G. Günther, 1863c, *Trigonocephalus alternatus binocularis* Bacque, 1906, and *Trigonocephalus flavescens* Bacque, 1906.

Type: Holotype, a 737 mm specimen (J.B. von Spix & K.F.P. von Martius, 10 Nov.–10 Dec. 1818), lost before 1859 *fide* Hoogmoed & Gruber (1983: 334).

Type locality: "urbem Bahiae, Brésil" [= Salvador, Bahia State, Brazil, 12°58'S, 38°31'W, elevation 40 m].

Distribution: South America. Southeastern Venezuela (Bolívar), Guyana (Cuyuni-Mazaruni), Suriname (Sipaliwini), French Guiana (Cayenne, Saint-Laurent-du-Maroni), Brazil (Bahia, Brasilia, Ceará, Goias, Mato Grosso, Pará, Paraiba, Parana, Pernambuco, Rondônia, São Paulo, Tocantins, Santo Amaro Is.), E Bolivia (Cochabamba, Santa Cruz, Tarija), Paraguay (Alto Paraguay, Alto Paraná, Amambay, Asunción, Boquerón, Caaguazú, Caazapá, Canindeyú, Central, Concepción, Cordillera, Guairá, Itapúa, Misiones,

Neembucú, Paraguarí, Presidente Hayes, San Pedro), N Uruguay (Artigas) and N Argentina (Buenos Aires, Catamarca, Chaco, Córdoba, Corrientes, Entre Ríos, Formosa, Jujuy, Li Rioja, Misiones, Salta, San Juan, San Luis, Santa Fe, Santiago del Estero, Tucumán), NSL–600 m.

Sources: G. Schreiber, 1950, Anthony & Serra, 1951, Amaral, 1978, Vanzolini et al., 1980, Hoogmoed, 1985, Abuys, 1986d, Chippaux, 1987, D.R. Norman, 1994, Reati, 1996, Vuoto, 1996, Lúcia-Ferreira, 1997, Starace, 1998, Fugler et al., 1995, Freitas, 1999, Leynaud & Bucher, 1999, Moura-Leite & Bernarde, 1999, Giraudo, 2001, Giraudo & Scrocchi, 2002, Abuys, 2003, Carreira-Vidal et al., 2005, Cicchi et al., 2007, Cacciali, 2008, Navarrete et al., 2009, Zaher et al., 2009 and C.J. Cole et al., 2013.

3. *Xenodon neuwiedii* A.C.L.G. Günther, 1863c. Ann. Mag. Nat. Hist. (3) 12(71): 354–355, pl. 5, fig. c.

Synonyms: *Xenodon neovidii* Cope, 1868c *(nomen emendatum),* and *Xenodon hemileucurus* Lutz & Mello, 1922a.

Types: Syntypes (16 ?), BMNH 1946.1.4.29, BMNH 1946 .1.4.37–40, BMNH 1946.1.4.45, and BMNH 1946.1.5.94–96 (A. Fry), location of other sytypes unknown.

Type locality: "Rio Janeiro" [= Rio de Janeiro, S Rio de Janeiro State, SE Brazil, 22°54'S, 43°13'W, elevation 15 m].

Distribution: Southeastern Brazil (Bahia, Paraná, Rio de Janeiro, Santa Catarina, São Paulo, Cananéia, Cardoso, Grande, Santo Amaro and São Sebastião Is.), Paraguay and ext. NE Argentina (Misiones), 15–800 m.

Sources: Argólo, 1999, Freitas, 1999, Giraudo, 2001, Giraudo & Scrocchi, 2002, Duarte-Rocha & Van Sluys, 2006 and Cicchi et al., 2007.

Remarks: Record from Corrientes, Argentina doubtful *fide* Giraudo & Scrocchi (2002: 40).

4. *Xenodon rabdocephalus* (Wied-Neuwied, 1824). Isis von Oken 14(6): 668. (*Coluber rabdocephalus*)

Synonyms: *Vipera xaxalhua* Gravenhorst, 1807 (*nomen oblitum), Coluber rhapdocephalus* – Wied-Neuwied, 1828 *(nomen incorrectum), Xenodon rhabdocephalus* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen emendatum), Xenodon colubrinus* A.C.L.G. Günther, 1858, *Ophis maximiliani* Fitzinger, 1861, *Xenodon bertholdi* Jan, 1863a, *Xenodon angustirostris* W.C.H. Peters, 1864b, *Xenodon suspectus* Cope, 1868c, *Xenodon bipraeocularis* Cope, 1886a, and *Xenodon mexicanus* H.M. Smith, 1940.

Type: Holotype, AMNH 3609 (A.P.M. zu Wied-Neuwied, Sept. 1815–May 1817), lost *fide* J.A. Peters (1960a: 541).

Type locality: "Brasiliens" [= Brazil]. Specified as Sertâo von Bahia, Brazil *fide* Wied-Neuwied (1825c: 351).

Distribution: Latin America. Mexico (Chiapas, Guerrero, Oaxaca, Quintana Roo, Veracruz, Yucatán), Belize (Belize, Cayo, Orange Walk, Stann Creek), Guatemala (Alta Verapaz, Petén), Honduras (Atlántida, Colón, Cortés, El Paraiso, Gracias a Dios, Olancho), Nicaragua (Atlántico Norte, Atlántico Sur, Jinotega, Matagalpa, Río San Juan), Costa Rica (Alajuela, Cartago, Guanacaste, Heredia, Limón, Puntarenas, San José), Panama, Colombia (Cundinamarca), Venezuela (Amazonas, Barinas, Bolívar, Zulia), Guyana (Essequibo Islands-West Demerara), N Suriname (Wanica), French Guiana (Cayenne, Saint-Laurent-du-Maroni), N Brazil (Amazonia, Bahia, Pará, Rondônia), Ecuador (Carchi, Cotopaxi, Esmeraldas, Los Rios, Manabi, Morona-Santiago, Napo, Pastaza, Pichincha), E Peru (Madre de Dios, Pasco) and E Bolivia (Beni, Santa Cruz), NSL–1900 m.

Sources: Dixon, 1983c, L.D. Wilson & Meyer, 1985, Abuys, 1986d, 2003, Chippaux, 1987, Pérez-Santos & Moreno, 1988, Cunha & Nascimento, 1993, Casas-Andreu et al., 1996, J.C. Lee, 1996, Chippaux, 1987, J.A. Campbell, 1998b, Gorzula & Señaris, 1998, Starace, 1998, Freitas, 1999, G. Köhler, 1999b, Lehr, 2001, Doan & Arizábal, 2002, Savage, 2002, Abuys, 2003, McCranie et al., 2006, Rojas-Runjaic et al., 2007, Jansen, 2008, Navarrete et al., 2009, McCranie, 2011a and C.J. Cole et al., 2013.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Coluber rabdocephalus* Wied-Neuwied is designated a *nomen protectum* and *Vipera xaxalhua* Gravenhorst a *nomen oblitum*.

5. *Xenodon severus* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 219. (*Coluber severus*)

Synonyms: *Coluber guineensis* Bonnaterre, 1790, *Coluber exalbidus* Suckow, 1797, *Coluber breviceps* G. Shaw, 1802, *Coluber versicolor* Merrem, 1820, *Coluber saurocephalus* Wied-Neuwied, 1824, and *Senodon severus* – Briceño-Rossi, 1934 *(nomen incorrectum).*

Type: Holotype, NHR Lin-48 (formerly MAFR), a 280 mm specimen (Mus. Drottn.).

Type locality: "Asia," (in error). Corrected to South America *fide* A.C.L.G. Günther (1863c: 353).

Distribution: Amazonia. Colombia (Amazonas), Venezuela (Amazonas, Aragua, Bolívar, Carabobo, Cojedes, Delta Amacuro, Falcón, Guárico, Lara, Miranda, Monagas, Zulia), Guyana (Barima-Waini, Cuyuni-Mazaruni, Demerara-Mahaica, Essequibo Islands-West Demerara, Pomeroon-Supenaam, Upper Demerara-Berbice, Santa Rosa Is.), Suriname, French Guiana (Cayenne, Saint-Laurent-du-Maroni), Ecuador (Carchi, Imbabura, Loja, Morona-Santiago, Napo, Pastaza), Peru (Madre de Dios, Pasco), N Brazil (Pará) and E Bolivia (Santa Cruz), NSL–2000 m.

Sources: Roze, 1966a, Lancini, 1986, Pérez-Santos & Moreno, 1988, 1991, Duellman & Salas, 1991, Cunha & Nascimento, 1993, Gorzula & Señaris, 1998, Starace, 1998, Mijares-Urrutia & Arends, 1999, 2000, Lehr, 2001, Duellman, 2005, Rivas-Fuenemayer &

Barrio-Amorgós, 2005, Navarrete et al., 2009 and C.J. Cole et al., 2013.

6. *Xenodon werneri* Eiselt, 1963. Ann. Naturhist. Mus. Wien 66: 280–281, fig. 1. (*nomen substitutum*)

Synonym: *Procteria viridis* F. Werner, 1924 (*nomen praeoccupatum*).

Type: Holotype, RMNH 17119, a 605 mm female (F.H. Rolle, 1910).

Type locality: "Tsumeb, Deutsch-Südwestafrika" [= Tsumeb, Namibia] (in error *fide* Bogert, 1940: 13, and Mertens, 1955: 12).

Distribution: Suriname (Marowijne, Nickerie) and French Guiana (Cayenne, Saint-Laurent-du-Maroni), 35–200 m.

Sources: F. Werner, 1924a, Gasc & Rodrigues, 1980, Hoogm 2oed, 1985, Ferreira-Yuki, 1993, Starace, 1998, Zaher, 1999, Abuys, 2003 and Sajdak, 2010.

Remarks: Original and supplemental description in F. Werner (1924a: 1 & 1924b: 48, figs. 1a–b). Redescription and illustrations of holotype in Eiselt (1963: 280–281, figs. 1a–h). F.H. Rolle was a natural history dealer from Institut Kosmos, Berlin, so it is not surprising that locality data for *Procteria viridis* were incorrect. Possibly occurs in Brazil *fide* Starace (1998: 261).

XENOPELTIS F. Boie, 1827 (Xenopeltidae)

Synonyms: *Xenopeltis* F. Boie, 1826 *(nomen nudum), Xenopeltis* Schlegel, 1826a *(nomen nudum), Zenopeltis* Swainson, 1839 *(nomen emendatum), Zenopeltes* – Theobald, 1868a *(nomen incorrectum),* and *Xenopeltus* – Porter, 1972 *(nomen incorrectum).*

Type species: *Xenopeltis unicolor* F. Boie, 1827.

Distribution: Southeastern Asia and East Indies.

Sources: Mahendra, 1938, M.A. Smith, 1943, G. Haas, 1955, McDowell, 1975a, Underwood, 1976b, B. Hu et al., 1980, Leviton, 1983, Zhao & Adler, 1993, Walls, 1998b, McDiarmid et al., 1999, Orlov, 2000, V.S. Nguyen et al., 2009, I. Das, 2010, 2012 and Rage, 2011.

1. *Xenopeltis hainanensis* S.-Q. Hu & Zhao *in* Zhao, 1972. Mater. Herpetol. Res. 1(1): 36.

Synonym: *Xenopeltis hainanensis jidamingae* Zhao, 1995.

Type: Holotype, CIB 64-III-6016, a 628 mm male (native, 15 June 1964).

Type locality: "Dali of Diaulo Shan, Hainan, altitude 200 m," China.

Distribution: Southeastern China (Fujian, Guangdong, Guangxi, Hainan, Hunan, Jiangxi, Zhejiang) and N Vietnam (Cao Bang, Hai Dung, Ha Tinh, Lang Son, Quang Binh, Vinh Phu, Yen Bai), 200–2000 m.

Sources: Hu et al., 1975, Zhong, 1981, Jiang, 1987, M.-H. Huang, 1990, Zhao, 1995, 1997b, 2006, Zhao & Adler, 1993, Orlov et al., 2000, Kizirian et al., 2003, D.-T. Yang, 2008, Y.-X. Zhang, 2009, Li, 2011 and Shi, 2011.

Remarks: English translation of original description by Koshikawa (1982: 4, 9); holotype erroneously listed as SBRI 66-III-6016 on p. 9. Possibly occurs in Hong Kong, China *fide* Karsen et al. (1998: 162).

2. *Xenopeltis unicolor* F. Boie, 1827. Isis von Oken 20(6): 564.

Synonyms: *Coluber alvearius* Oppel *in* F. Boie, 1826 (*nomen nudum*), *Xenopeltis concolor* F. Boie, 1827, *Xenopeltis leucocephala* F. Boie, 1827, and *Tortrix xenopeltis* Schlegel, 1837 *(nomen substitutum).*

Type: Holotype, not designated, formerly MNHN (L.T. Leschenault, 1805), lost *fide* Koch (2012: 304).

Type locality: "Java" [SW Indonesia].

Distribution: Southeastern Asia and East Indies. Eastern India (Andaman & Nicobars: Nicobar Is.), S China (Guangdong, Guangxi, Yunnan), Myanmar, Thailand (Bangkok, Chaiyaphum, Chiang Mai, Chiang Rai, Chon Buri, Krabi, Lampang, Loei, Nakhon Ratchasima, Phang Nga, Phitsanulok, Phrae, Phuket, Prachuap Khiri Khan, Ranong, Saraburi, Surin), Cambodia (Kampong Chhnang, Koh Kong, Preah Vihear, Stung Treng), Laos (Champasak), Vietnam (Binh Phuoc, Ca Mau, Can Tho, Da Nang, Dong Nai, Hai Duong, Hanoi, Ha Tinh, Hoa Binh, Ho Chi Minh City, Kien Giang, Kon Tum, Lam Dong, Lang Son, Nghe An, Ninh Binh, Ninh Thuan, Quang Binh, Quang Nam, Quang Ninh, Quang Tri, Son La, Tay Ninh, Thai Nguyen, Thanh Hoa, Tien Giang, Vinh Phuc, Yen Bai), Singapore, West Malaysia (Pahang, Ubin Is.), East Malaysia (Sabah, Sarawak), Brunei, Indonesia (Banka, Belitung, Java, Kalimantan, Mentawai Arch., Natuna Besar, Nias, Riau Arch., Siberut, Simeulue, Sipura, Sulawesi, Sumatra, We) and SW Philippines (Balabac, Bongao, Jolo, Palawan, Sanga Sanga), NSL–2000 m.

Sources: Wall, 1909c, E.H. Taylor, 1922, 1965, Bourret, 1936a–b, Mertens, 1943, Bergman, 1955e, Hoesel, 1959, Deuve, 1962a, Hoge, 1964b, Leviton, 1963b, 1983, Dowling & Gibson, 1970b, Biswas & Sanyal, 1980, Tweedie, 1983, Mahendra, 1984, K.F.L. Lim & Lee, 1989, M. Tiwari, 1992, I. Das, 1994, Gaulke, 1994b, David & Vogel,1996, Wallach & Jones, 1997, M.J. Cox et al., 1998, Zug et al., 1998, Chan-ard et al., 1999, I. Das, 1999, 2010, Stuebing & Inger, 1999, Orlov et al., 2000, Malkmus et al., 2002, J.C. Murphy & Schlager, 2003, Whitaker & Captain, 2004, B.L. Stuart & Emmett, 2006, D.-T. Yang, 2008, Koch, 2012 and Hartmann et al., 2013.

Remarks: Original description based on Boie's MS (1823–1825) so although F. Boie credited authorship to Reinwardt, he cannot be the author. Holotype in MNHN *fide* McDiarmid et al. (1999: 159) or RMNH *fide* C.P.J. Haas (1950: 527) and V.S. Nguyen et al. (2009: 286).

X

XENOPHIDION R. Günther & Manthey, 1995 (Xenophidiidae)

Type species: *Xenophidion acanthognathus* R. Günther & Manthey, 1995.
Distribution: Malaysia.
Sources: Wallach & Günther, 1998, R. Lawson et al., 2004 and I. Das, 2010, 2012.

1. *Xenophidion acanthognathus* R. Günther & Manthey, 1995. Amphibia-Reptilia 16(3): 231–233, fig. 1.

Type: Holotype, FMNH 235170, a 337 mm female (R.F. Inger, 20 Nov. 1987).
Type locality: "Sipitang Dist., Mendolong, Sabah (Borneo)" [East Malaysia].
Distribution: East Malaysia (Sabah). Known only from holotype.

2. *Xenophidion schaeferi* R. Günther & Manthey, 1995. Amphibia-Reptilia 16(3): 234–238, figs. 2–7.

Type: Holotype, ZMB 50534, a 263 mm male (C. Schäfer, 5 Nov. 1989).
Type locality: "Primary rain forest ca. 20 km north of Kuala Lumpur on the border of Templer Park, Province Selangor, Malay Peninsula" [West Malaysia].
Distribution: West Malaysia (Selangor).
Source: Chan-ard et al., 1999.

XENOPHOLIS W.C.H. Peters, 1869 (Dipsadidae)

Synonyms: *Gerrhosteus* Cope, 1874b, *Genhosteus* – Cope, 1874b *(nomen incorrectum), Paroxyrhopus* Schenkel, 1901, *Sympeltophis* F. Werner, 1925, *Paraoxyrhopus* – Dunn, 1928b *(nomen incorrectum), Gerrosteus* – T. Barbour & Loveridge, 1929 *(nomen incorrectum), Paraxirhopus* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Xenophis* – Elter, 1981 *(nomen incorrectum).*
Type species: *Elapomorphus scalaris* Wucherer, 1861c.
Distribution: Amazonia.
Sources: Bogert, 1964, J.A. Peters & Orejas-Miranda, 1970, Hoge & Federsoni, 1975, Sheil & Grant, 2001, Jansen et al., 2009, Zaher et al., 2009 and Vidal et al., 2010.

1. *Xenopholis scalaris* (Wucherer, 1861c). Proc. Zool. Soc. London 29(1): 325–326. (*Elapomorphus scalaris*)

Synonyms: *Xenopholis braconnieri* W.C.H. Peters, 1869, *Gerrhosteus prosopis* Cope, 1874b, and *Sympeltophis ungalioides* F. Werner, 1925.
Types: Syntypes (2), BMNH 1946.1.8.60, a 250 mm specimen, and OEHW, a 320 mm damaged specimen (M.C. Gayleard).
Type locality: "Cañavieras, Matta de S. João, a few leagues south from the city of Bahia, Brazil" [= Canavieiras, SE Bahia State, E Brazil, 15°37'S, 38°55'W, elevation NSL (or Mata de São João, E Bahia State, 12°40'S, 38°17'E, elevation 40 m)].
Distribution: Amazonia. Southern Colombia, S Guyana (Upper Takutu-Upper Essequibo), NW French Guiana (N Saint-Laurent-du-Maroni), E Ecuador (Napo, Pastaza), E Peru (Amazonas, Loreto, Madre de Dios, Pasco), Bolivia (Beni, La Paz, Pastaza, Santa Cruz) and Brazil (Bahia, Maranhão, Pará, Rondônia), NSL–1500 m.
Sources: M.A. Smith, 1928b, Cunha & Nascimento, 1978, 1993, Pérez-Santos & Moreno, 1988, 1991, Duellman & Salas, 1991, Duellman & Mendelson III, 1995, Starace, 1995, 1998, Freitas, 1999, Lehr, 2001, Duellman, 2005 and C.J. Cole et al., 2013.
Remarks: Original description reprinted in Wucherer (1862: 318–319). Type locality appears as two different locations with Canavieiras to the south of Bahia (= Salvador) and Mata de São João to the north.

2. *Xenopholis undulatus* (A.S. Jensen, 1900). Vidensk. Medd. Naturhist. Foren. Kjöbenhaven 1900: 106–107, fig. 2. (*Oxyrhopus undulatus*)

Synonyms: *Paroxyrhopus reticulatus* Schenkel, 1901, *Oxyrhopus latifrontalis* F. Werner, 1913, and *Paroxyrhopus atropurpureus* Amaral, 1923 & 1926a.
Types: Syntypes (2), ZMUC, longest specimen 465 mm (J.T. Reinhardt, 1854–1856 and E. Warming, 1863–1866).
Type locality: "Lagoa Santa er en lille Landsby, der ligger i den brasilianske Stat Minas geraës under 19°40' S. B., altsaa godt 3 Breddegrader nordligere end Rio de Janeiro og N. t.V. for denne By. Højden over Havet er ca. 835 Metre" [= Logoa Santa, Minas Gerais Sate, Brazil, ca. 19°38'S, 43°53'W, elevation 835 m].
Distribution: Brazil (Ceará, Distrito Federal, Goiás, Mato Grosso, Maranhão, Mato Grosso do Sul, Minas Gerais, Pará, Paraná, Pernambuco, Rondônia, São Paulo, Tocantins) and Paraguay, 115–895 m.
Sources: Hoge & Federsoni, 1975, Nogueira, 2001, Cacciali & Wüest, 2009, Loebmann, 2009a and Ribeiro et al., 2011.
Remarks: Photographs of holotype of *Paroxyrhopus reticulatus* Schenkel in M. Jansen et al. (2009: figs. 9a–b). The *P. reticulatus* type locality of Bermalcue (= *lapsus calami* for Bernal Cué) is now Cerrito, Paraguay *fide* Cacciali & Wüest (2009: 383).

3. *Xenopholis werdingorum* M. Jansen, Álvarez & G. Köhler, 2009. Zootaxa (2222): 33–38, figs. 2–4.

Type: Holotype, MNKR 4700, a 390 mm female (M. Jansen & A. Schulze, 25 Oct. 2006).
Type locality: "Hacienda San Sebastián (S 16º21.676', W 62º00.017', 550 m), Province of Ñuflo de Chávez, Department of Santa Cruz, Bolivia."
Distribution: Eastern Bolivia (Santa Cruz), 550 m.

Remarks: Probably occurs in Mato Grosso, Brazil *fide* M. Jansen et al. (2009: 41).

XENOTYPHLOPS Wallach & Ineich, 1996 (Xenotyphlopidae)

Type species: *Typhlops grandidieri* Mocquard, 1905b.
Distribution: Madagascar.
Sources: Wallach, 1993c, Glaw & Vences, 1994, Wallach & Ineich, 1996, McDiarmid et al., 1999, Wallach et al., 2007, Wallach & Glaw, 2009 and Wegener et al., in press.

1. *Xenotyphlops grandidieri* (Mocquard, 1905b). Bull. Mus. Hist. Nat., Paris 11(5): 287. (*Typhlops grandidieri*)

Synonym: *Xenotyphlops mocquardi* Wallach, Mercurio & Andreone, 2007.
Type: Lectotype, MNHN 1905.271, a 257 mm female (M. de Rothschild, 1904–1905), designated by Wallach & Ineich (1996: 368).
Type locality: "Madagascar," via lectotype selection. Restricted to Baie de Sakalava, N Antsiranana Prov., ext. N Madagascar *fide* Wegener et al. (in press, p. 11).
Distribution: Northern Madagascar (N Antsiranana), NSL–40 m.

XYELODONTOPHIS Broadley & Wallach, 2002 (Colubridae)

Type species: *Xyelodontophis uluguruensis* Broadley & Wallach, 2002.
Distribution: Southeast Africa.
Source: Broadley & Wallach, 2002.

1. *Xyelodontophis uluguruensis* Broadley & Wallach, 2002. Bull. Nat. Hist. Mus. (Zool.) 68(2): 66–69, figs. 1f, 2a, 4a.

Type: Holotype, NMZB 7443 (formerly KMH 2636), an 1147 mm female (J. Lovett, Nov. 1983)
Type locality: "Lupanga Peak, Uluguru Mountains, Tanzania (06°52'S: 37°43'E)" [= Lupanga Peak, Uluguru Mtns., Morogoro Prov., NE Tanzania, 6°52'S, 37°43'E, max. elevation 2150 m].
Distribution: Northeastern Tanzania (Morogoro), 1650–2000 m.

XYLOPHIS Beddome, 1878b (Elapoidea *incertae sedis*)

Synonyms: *Platypteryx* A.-M.-C. Duméril, 1853, *Platypterix* A.-M.-C. Duméril, Bibron & Duméril, 1854a *(nomen emendatum), Sylophis* – A.S. Romer, 1956 *(nomen incorrectum), Xilophis* – Briceño-Rossi, 1934 *(nomen incorrectum),* and *Xylphis* – B.D. Sharma *in* B.D. Sharma & Kumari, 1998a *(nomen incorrectum).*
Type species: *Geophis stenorhynchus* A.C.L.G. Günther, 1875.
Distribution: Southern India.
Sources: M.A. Smith, 1943, Mahendra, 1984, Whitaker & Captain, 2004 and Zaher et al., 2009.

1. *Xylophis captaini* Gower & Winkler, 2007. Hamadryad 31(2): 316–322, figs. 1–3, 4 (paratype), 5.

Type: Holotype, BNHS 3375, a 137 mm male (O.V. Oommen and field crew, 8 Aug. 2000).
Type locality: "Kannam, Kottayam District, in the state of Kerala at approximately 9º 32' N, 76º 41' E and 110 m a.s.l., India."
Distribution: Southwestern India (S Kerala, Tamil Nadu), 50–300 m.
Source: Ganesh et al*.,* 2012a.

2. *Xylophis perrotetii* (A.-M.-C. Duméril, 1853). Mém. Acad. Sci. Inst. France, Paris 23: 468. (*Platypteryx perrotetii*)

Synonym: *Rabdosoma microcephalum* A.C.L.G. Günther, 1858.
Type: Holotype MNHN 7300, a 488 mm specimen (G.S. Perrotet, 1834–1853).
Type locality: "monts Nilgherry" [= Nilgiri Hills, cen. Western Ghats, SE Kerala/W Tamil Nadu States, SW India].
Distribution: Southwestern India (Western Ghats of E Kerala, W Tamil Nadu), NSL–2000 m.
Sources: Wall, 1919b, 1923a and Whitaker & Whitaker, 1977.
Remarks: *Platypteryx perrotetii* A.-M.-C. Duméril, 1853 is not a *nomen nudum* (*sensu* Williams & Wallach, 1989: 116) but a valid name as the monotypic genus *Platypteryx* was described in 1853 with *P. perrotetii* as its only species.

3. *Xylophis stenorhynchus* (A.C.L.G. Günther, 1875). Proc. Zool. Soc. London 43(1): 230–231. (*Geophis stenorhynchus*)

Synonyms: *Xylophis indicus* Beddome, 1878b, and *Xylophis stenorynchus* Wall, 1923a *(nomen emendatum).*
Types: Syntypes (3), BMNH 1946.1.14.13, a 159 mm male, BMNH 1946.1.14.14, a 165 mm male, and BMNH 1946.1.14.15, a 185–191 mm female (R.H. Beddome, 1857–1875).
Type locality: "Travancore, Southern India" [= S Kerala and SW Tamil Nadu States, SW India].
Distribution: Southern India (Western and Eastern Ghats of S Kerala, S Tamil Nadu), 1075–1525 m.
Source: Inger et al., 1984.

Y

†*YURLUNGGUR* Scanlon, 1992 (†Madtsoiidae)

Type species: †*Yurlunggur camfieldensis* Scanlon, 1992.
Distribution: Upper Oligocene to Pleistocene of Australia.
Sources: Scanlon, 1997, 2003b, 2006, Scanlon & Lee, 2002, La Duke et al., 2010 and J.A. Wilson et al., 2010.

1. †*Yurlunggur camfieldensis* Scanlon, 1992. The Beagle 9(1): 50–55, figs. 1a–f.

Type: Holotype, NTM P894-5, -3, -5, -21, -22, -23, -24, -25, -27, -28, -245; P8692-28; P8695-23, -25, -127, -128, -169, -243, -244, -245, -246, -247, -260, -261, -262, -263, -264; P901-1, -2, -4; P87103-22, -23, -24; P8792-23, -24; P87108-17, -18, -19, -20, -21; P87115-1, a partial skeleton of 29 trunk vertebrae and 11 rib fragments (P. Murray, D. Megirian & K. Roth).
Type locality: "'Blast Site', Bullock Creek Local Fauna, Camfield Beds, north central Northern Territory, Australia; middle Miocene, approx. 12 MYBP."
Distribution: Upper Oligocene to Pleistocene (0.01–25.0 mya) of Australia.

Z

ZAMENIS Wagler, 1830 (Colubridae)

Synonyms: *Rhinechis* Michahelles *in* Wagler, 1833, *Calopeltis* Fitzinger, 1834 *(nomen nudum), Callopeltis* Fitzinger *in* Bonaparte 1834, *Calopeltis* Fitzinger, 1843 *(nomen emendatum), Callipelta* Agassiz, 1847 *(nomen emendatum), Lamenis* – Tristram, 1860 *(nomen incorrectum), Tysia* – Carus & Engelmann, 1861 *(nomen incorrectum), Tyria* Cope, 1862c *(nomen praeoccupatum), Zameuis* – Rochebrune, 1885 *(nomen incorrectum), Famenis* – F. Werner, 1924c *(nomen incorrectum), Zamensis* – Roddy, 1928 *(nomen incorrectum), Zeamnis* – Roddy, 1928 *(nomen incorrectum), Zamonis* – Maass-Berlin, 1933 *(nomen incorrectum), Caolepellis* – Briceño-Rossi, 1934 *(nomen incorrectum), Tryria* – Briceño-Rossi, 1934 *(nomen incorrectum), Rhinophis* Guillon, 1936 *(nomen praeoccupatum), Aamenis* – Sundersingh, 1960 *(nomen incorrectum), Lamenius* – Yakovleva, 1964 *(nomen incorrectum), Zameni* – Wu, Li & & Liu, 1985 *(nomen incorrectum),* and *Richardwellsus* Hoser, 2012m *(nomen illegitimum).*

Type species: *Natrix longissima* Laurenti, 1768.

Distribution: Eurasia.

Fossil records: Lower Miocene to upper Pleistocene of Europe.

Sources: Schulz, 1996, Lenk et al., 2001a, Utiger et al., 2002, 2005, and Burbrink & Lawson, 2007.

1. †*Zamenis algorensis* (Szyndlar, 1985a). Estud. Geol. 41(5–6): 448–451, figs. 2.1–2.3. (*Elaphe algorensis*)

Type: Holotype, MNCN Alg. I-3, one basiparasphenoid (B. Sanchíz).

Type locality: "Fossil Karstic breccia from Algora (province of Guadalajara, Spain); Uppermost Miocene (European Continental biozone NM 13)."

Distribution: Upper Miocene (Turolian, MN 13: 4.9–7.3 mya) of Spain. Known only from type locality.

Source: Szyndlar, 2012.

Remarks: Similar to †*Z. kohfidischi* and *Z. longissima fide* Szyndlar, 1985a.

2. *Zamenis hohenackeri* (Strauch, 1873). Mém. Acad. Imp. Sci. St.-Pétersbourg (7) 21(4): 69–73, pl. 2, figs. a–b. (*Coluber hohenackeri*)

Synonyms: *Coluber rubriventer* Dwigubsky, 1832 *(nomen oblitum),* and *Coluber tauricus* F. Werner, 1898a.

Type: Lectotype, ZISP 1642 (formerly AIS) (R.F. Hohenacker, 1838), designated by Bischoff *in* W. Böhme (1993: 322).

Type locality: "Kolonie Helenendorf = Chanlar/Aserbaidzan" [= Goygol, Azerbaijan, 40°34'N, 46°21'E, elevation 700 m] via lectotype selection.

Distribution: Middle East and Asia Minor. Southern Turkey (Adana, Agri, Amasya, Antalya, Icel, Konya, Siirt, Trabzon), SW Syria (Damascus), Lebanon (Beqaa, Liban-Nord, Mont-Liban, Nabatiye), ext. N Israel (N Golan Heights), SW Russia (Dagestan), Georgia, Armenia, Azerbaijan, NE Iraq (Erbil, Sulaymaniyah) and NW Iran (East Azarbaijan, Isfahan, West Azarbaijan), 180–3000 m.

Sources: Nikolsky, 1916, Baran, 1976a, Bannikov et al., 1977, Basoglu & Baran, 1980, Nilson & Andrén, 1984b, Schätti & Baran, 1988, Bischoff, 1993, Hraoui-Bloquet et al., 2002, Franzen et al., 2008, Tuniyev et al., 2009, Afrasiab & Mohamad, 2011 and Bar & Haimovitch, 2011.

Remarks: In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Coluber hohenackeri* Strauch is designated a *nomen protectum* and *Coluber rubriventer* Dwigubsky a *nomen oblitum.*

3. †*Zamenis kohfidischi* (Bachmayer & Szyndlar, 1985). Ann. Naturhist. Mus. Wien 87A: 80–81, figs. 1.1–1.5, pl. 1, figs. 1–3. (†*Elaphe kohfidischi*)

Type: Holotype, NMWGP 1984/96, one middle trunk vertebra.

Type locality: "Kohfidisch fissures, Burgenland, Austria; Late Pannonian (= Pontian S. Str.) (MN 11); Early Pliocene or Upper Miocene."

Distribution: Lower Miocene (Orleanian, MN 5: 13.7–16.0 mya) of Austria, and upper Miocene (Turolian, MN 11–12: 7.3–8.7 mya) of Austria and Ukraine.

Sources: Bachmayer & Szyndlar, 1987, Szyndlar, 1991a, 2012 and Szyndlar & Zerova, 1992.

4. †*Zamenis kormosi* (Bolkay, 1913). Mitt. Jb. Kgl. Ungar. Geol. Reichsanst. 21(7): 224, pl. 12, figs. 4–8. (†*Coluber kormosi*)

Types: Syntypes (14), HGIM Ob-4465/Vt. 75: Ob-4465/a, a basioccipital, Ob-4465/b, a right quadrate, Ob-4465/c, a left ectopterygoid, Ob-4465/d, a parabasisphenoid, Ob-4465/e, plus a premaxilla, a palatine, a second ectopterygoid, a second and third quadrate, and five maxillary fragments (T. Kormos).

Type locality: "Polgárdi, Hungary; Pannonian, intermixed with the remains of Hipparion fauna, Praeglacial (Interglacial ?) periode."

Distribution: Upper Miocene to lower Pliocene (Turolian, MN 12–14: 4.2–7.8 mya) of Hungary.

Sources: Rage, 1984b, Szyndlar, 1991a, 2012 and Venczel, 1994.

Remarks: A valid species *fide* Mlynarski (1961: 26). Publication date listed as 1913/1915 *fide* Mlynarski (1961: 41).

5. *Zamenis lineatus* (Camerano, 1891a). Mem. Reale Accad. Sci. (Fis. Mat. Nat.), Torino (2) 41: 458. (*Callopeltis longissimus lineata*)

Type: Holotype, MSNM 942 (formerly MZUT 434), an 1140 mm male.

Type locality: "contorni di Napoli, Italia" [= vicinity of Naples, Napoli Prov., Campania Region, S Italy, 40°51'N, 14°16'E, elevation 20 m].

Distribution: Southern Italy (Basilicata, Calabria, Campania, Sardegna, Sicilia), NSL–900 m.

Source: Lenk & Wüster, 1999.

Remarks: Original description is reprinted in Camerano (1891b: 58–59).

6. †*Zamenis lobsingensis* (Heller, 1960). Erlanger Geol. Abh. (34): 27–28, pl. 3, fig. 14. (†*Coluber lobsingensis*)

Type: Holotype, SPLUE H Lo 58–59, one parietal and articulated parabasisphenoid (F.X. Schnittmann, Jan. 1956).

Type locality: "Dolomitsteinbruch Lobsing bei Neustadt/Donau; Gerinne-Verfüllungen jungpleistozänen Alters (letztes Interglazial)" [= dolomites of Lobsing near Neustadt on the Danube River, Bayern Prov., S Germany; Pleistocene, Riss-Würm interglacial *fide* Rage, 1984b: 46].

Distribution: Pleistocene (0.01–1.9 mya) of Germany. Known only from type series.

Sources: Mlynarski, 1961 and Rage, 1984b.

7. *Zamenis longissimus* (Laurenti, 1768). Synop. Rept.: 74. (*Natrix longissima*)

Synonyms: *Coluber aesculapii* Lacépède, 1789 (*nomen rejiciendum*), *Coluber flavescens* Gmelin, 1789, *Coluber asclepiadeus* Donndorff, 1798, *Coluber leprosus* Donndorff, 1798, *Coluber pannonicus* Donndorff, 1798, *Coluber sellmanni* Donndorff, 1798, *Coluber romanus* Suckow, 1798, *Coluber leprosus* Bechstein, 1802, *Natrix scopolii* Merrem, 1820, *Coluber aesculapii niger* Fitzinger, 1826a, *Coluber fugax* Eichwald, 1831, *Coluber elegantulus* Bonaparte, 1840 *(nomen nudum), Coluber isabellinus* Freyer, 1842, *Coluber flavescens nigrescens* Massalongo, 1853, *Zamenis aesculapii nigra* Fitzinger, 1853 *(nomen nudum), Coluber flavescens nigrescens* Massalongo, 1854, *Coluber atratus* Costa, 1871 *(nomen nudum), Coluber flavescens carbonarius* Pirona, 1871 *(partim), Callopeltis longissma lineata* Camerano, 1891, *Coluber longissimus deubeli* Dürigen, 1897 *(nomen nudum), Coluber aesculapii niger* Dürigen, 1897, *Coluber aesculapii ventrimaculatus* Dürigen, 1897 *(nomen substitutum), Coluber aesculapii virgatus* Dürigen, 1897d *(nomen substitutum), Coluber longissimus subgrisea* F. Werner, 1897, *Elaphe rechingeri* F. Werner, 1932, and *Coluber longissimus lineata* Balli, 1944 *(nomen praeoccupatum)*.

Type: Holotype, not designated, location unknown.

Type locality: "Austria." Restricted to Vienna, Austria *fide* Mertens & Müller (1928: 47).

Distribution: Southern Europe and SW Asia. Northern Spain (Barcelona, Gerona, Guipúzcoa, Huesca, Lérida, Navarra, W Santander, Vizcaya), France (Ain, Allier, Alpes-Maritimes, Ardèche, Ariège, Aude, Aveyron, Basses-Alpes, Basses-Pyrénées, Bouchés-du-Rhône, Cantal, Cher, Charente, Charente-Maritime, Corrèze, Corsica, Côte-d'Or, Creuse, Deux-Sèvres, Dordogne, Drôme, Essonne, Eure-et-Loir, Finistère, Gard, Gers, Gironde, Haut-Rhin, Haute-Garonne, Haute-Loire, Haute-Marne, Haute-Saône, Haute-Savoie, Haute-Vienne, Hautes-Alpes, Hautes-Pyrénées, Hérault, Ille-et-Vilaine, Indre-et-Loire, Isère, Jura, Landes, Loire, Loire-Atlantique, Loiret, Loir-et-Cher, Lot, Lot-et-Garonne, Lozère, Maine-et-Loire, Manche, Mayenne, Morbihan, Nièvre, Orne, Puy-de-Dôme, Pyrénées-Orientales, Rhône, Saône-et-Loire, Sarthe, Savoie, Seine-et-Marne, Tarn, Tarn-et-Garonne, Val-d'Oise, Var, Vaucluse, Vendée, Vienne, Yonne, Yvelines), S Germany (E N Baden-Württemberg, Bavaria, S Hesse), SW Poland (Lubelskie, Malopolskie, Podkarpackie, Slaskie), Czech Republic (Jihomoravsky, Zapadocesky), Slovakia, Switzerland (Bern, Genève, Graubunden, St. Gallen, Ticino, Valais, Vaud), Austria (Burgenland, Carinthia, Lower Austria, Salzburg, Styria, Tyrol, Upper Austria, Vienna), Hungary, Italy (Abruzzi, Basilicata, Calabria, Campania, Emilia-Romagna, Friuli-Venezia Giulia, Lazio, Liguria, Lombardia, Marche, Molise, Piemonte, Puglia, Toscana, Trentino-Alto Adige, Umbria, Valle d'Aosta, Veneto, Sardinia and Sicily Is.), S Romania, SW Ukraine, Moldavia, Slovenia, Croatia, Bosnia-Herzegovina, Montenegro, Serbia, Macedonia, Albania, Bulgaria (Blagoevgrad, Burgas, Dobrich, Gabrovo, Grand Sofiya, Haskovo, Kardzhali, Lovech, Kyustendil, Montana, Pazardzhik, Pernik, Pleven, Plovdiv, Razgrad, Rousse, Shumen, Silistra, Sliven, Smolyan, Sofiya, Stara Zagora, Targovishte, Varna, Veliko Tarnovo, Vidin, Vratsa, Yambol), Greece (Aitolia and Akarnania, Arkadhia, Akhaia, Argolis, Arta, Attica, Drama, Evritania, Evros, Evvoia, Florina, Fokis, Fthiotis, Grevena, Ilia, Imathia, Ioannina, Kardhitsa, Kastoria, Kefallinia, Kerkira, Khalkidhiki, Kilkis, Korinthia, Kozani, Lakonia, Larisa, Levkas, Magnisia, Messinia, Pella, Pieria, Preveza, Rodhopi,

Serrai, Thesprotia, Thessaloniki, Trikala, Voiotia, Xanthi, Zakinthos), N Turkey (Giresun, Istanbul, Trabzon, Corfu, Paxos), W Georgia, SW Azerbaijan, SW Russia (Dagestan), and N Iran (East Azarbaijan, Hamadan, West Azarbaijan), NSL–1700 (2000) m.

Fossil records: Lower Pliocene (Ruscinian, MN 14: 4.2–4.9 mya) of Bosnia & Herzegovina and Hungary, middle Pliocene (Ruscinian, MN 15: 3.2–4.2 mya) of Moldavia and Slovakia, upper Pliocene (Villanyian, MN 16: 2.6–3.2 mya) of Austria, France, Hungary and Moldavia, lower Pleistocene (lower, Calabrian: 0.8–1.8 mya) of Austria, Czech Republic, Poland and Romania, middle Pleistocene (Ionian: 0.13–0.78 mya) of Austria, France, Germany, Greece, Romania and United Kingdom, and upper Pleistocene (Tarantian: 0.01–0.13 mya) of Croatia, France, Germany, Greece, Poland and Serbia.

Sources: Schreiber, 1875, Steinheil, 1914, Roillant, 1934, Mertens & Wermuth, 1960, Fuhn & Vancea, 1961, Capocaccia, 1964, 1965, Steward, 1971, Lotze, 1975, Bannikov et al., 1977, Bruno, 1977, 1984, Basoglu & Baran, 1980, Nilson & Adrén, 1984b, Szyndlar, 1984c, Wütschert, 1984, König, 1985, Bailon, 1989, Gillette, 1990, Latifi, 1991, Szyndlar, 1991a, 2012, W. Remarks: *Zamenis romani* possibly a valid species related to *Z. persica fide* Lenk & Joger (1994: 371) but later a synonym of *Z. longissima fide* Lenk & Wüster, 1999.

8. †*Zamenis paralongissimus* (Szyndlar, 1984a). Acta Zool. Cracov. 28(1): 67–71, figs. 26.1–26.5. (†*Elaphe paralongissima*)

Type: Holotype, IZPAN R III/11, one middle trunk vertebra.

Type locality: "Weze II (W II) at Zelce Hill near Dzialoszyn (Northern Kraków—Wielun Upland in central Southern Poland); Upper Pliocene, MN biozone presumably 16."

Distribution: Upper Pliocene (Villanyian MN 16: 2.6–3.2 mya) of Poland, and lower Pleistocene (Calabrian: 0.8–1.8 mya) of Austria and Czech Republic.

Sources: Mlynarski et al., 1984, Szyndlar, 1991a and Ivanov, 2007.

9. *Zamenis persicus* (F. Werner, 1913). Mitt. Naturhist. Mus. Hamburg (1912) 30: 23–24. (*Coluber longissimus persica*) (*nomen protectum*)

Synonyms: *Zamenis persicus* Jan, 1863b (*nomen nudum*), *Zamenis persicus* Jan, 1867 *in* Jan & Sordelli, 1866–1870 (*nomen oblitum*), and *Coluber longissimus nigra* Nikolsky, 1907 *(nomen praeoccupatum).*

Type: Holotype, ZMH, a 640 mm male (F. Bruns, 20–26 July 1909), destroyed in July 1943 during World War II.

Type locality: "Barferusch, Provinz Mazanderan, Persien" [= Babol, Mazandaran Prov., N Iran, 36°33'N, 52°41'E, elevation 10 m].

Distribution: Southeastern Azerbaijan and N Iran (Azarbayjan Khavari, Gilan, Mazandaran), 25 m BSL–1565 (4000) m.

Sources: Nilson & Andren, 1984b, Tuniyev et al., 2009 and Schätti et al., 2010a.

10. †*Zamenis praelongissima* (Venczel, 1994). Acta Zool. Cracov. 37(1): 12–16, figs. 6a–c. (†*Elaphe praelongissima*)

Type: Holotype, HGIM V.19004/Vt.149, one basiparasphenoid (1984–1994).

Type locality: "Polgárdi 4 'Lower' limestone quarry of the Somló-Hill and Koszár-Hill, located near the village of Polgárdi in western Hungary; Uppermost Miocene, Pontian or Upper Turolian (MN 13)."

Distribution: Upper Miocene to lower Pliocene (Turolian-Ruscinian, MN 13–14: 4.2–7.3 mya) of Hungary.

Source: Venczel, 1998 and Szyndlar, 2012.

11. *Zamenis scalaris* (Schinz *in* Cuvier, 1822). Das Thierreich 2: 123. (*Coluber scalaris*)

Synonyms: *Coluber marmoratus* Gravenhorst, 1807 (*nomen oblitum), Rhinechis agassizii* Michahelles *in* Wagler, 1833, *Coluber bilineatus* Schinz, 1833, *Xenodon michahelles* Schlegel, 1837, *Coluber bitaeniatus* Duméril *in* Bonaparte, 1840 *(nomen nudum), Coluber dorsalis* Bonaparte, 1840 *(nomen nudum), Coluber meiffreni* Bonaparte, 1840 *(nomen nudum), Coluber meifreni* Schinz, 1840, *Simus danmanni* Schinz, 1840, *Coluber hermannii* Lesson, 1841, *Simus baumanni* Fitzinger, 1867, and *Coluber agassirii* – Westphal-Castelnau, 1870 *(nomen incorrectum).*

Type: Holotype, not designated, location unknown.

Type locality: "Südlichen Frankreich" [= S France].

Distribution: Southwestern Europe. Portugal (Aveiro, Beja, Braga, Bragansa, Castelo Branco, Coimbra, Évora, Faro, Guarda, Leiria, Lisboa, Portalegre, Porto, Santarém, Sertubal, Viana de Castelo, Vila Real, Viseu), Spain (Álava, Alicante, Almería, Andorra, Aragon, Ávila, Badajoz, Burgos, Cáceres, Cádiz, Castellón, Catalonia, Ciudad Real, Córdoba, Cuenca, Gerona, Granada, Guadalajara, Guipúzcoa, Huelva, Huesca, Jaén, La Coruña, Léon, Lérida, Logroño, Lugo, Madrid, Málaga, Murcia, Navarra, Orense,

Oviedo, Palencia, Pontevedra, Salamanca, Segovia, Seville, Soria, Tarragona, Teruel, Toledo, Valencia, Valladolid, Zamora, Zaragossa, Minorca Is.), S France (Alpes-Maritimes, Ardèche, Aude, Basses-Alpes, Bouchés-du-Rhône, Drôme, Gard, Hérault, Pyrénées-Orientales, Vaucluse, Var, Hyères Is.), NSL–2100 m.

Fossil records: Lower Pleistocene (Calabrian: 0.8–1.8 mya) of Spain, and middle Pleistocene (Ionian: 0.13–0.78 mya) of France and Spain.

Sources: Mertens & Wermuth, 1960, Rage & Truc, 1970, Sanz & Sanchíz, 1980, Bruno, 1984, Salvador, 1985, Calmonte & Ferri, 1987, Cheylan & Guillaume, 1993 and Blázquez, 1994, Schulz, 1996, Gasc et al., 1997, Holman, 1998a, Szyndlar, 1999, Hilfenberger, 2001, Lenk et al., 2001a, Utiger et al., 2002, 2005, Burbrink & Lawson, 2007, Feriche et al., 2008 and Vacher & Geniez, 2010.

Remarks: A synonym of *Zamenis fide* Zaher et al., 2012. In accordance with Art. 23.9.2 of the Code (ICZN, 1999), *Coluber scalaris* Schinz is designated a *nomen protectum* and *Coluber marmoratus* Gravenhorst a *nomen oblitum*.

12. *Zamenis situla* (Linnaeus, 1758). Syst. Nat., ed. 10, 1: 223. (*Coluber situla*)

Synonyms: *Coluber quadrilineatus* Pallas, 1814 *(nomen praeoccupatum), Coluber trilineatus* Metaxa, 1823, *Coluber leopardinus* Bonaparte, 1840 *in* 1832–1841, *Coluber metaxa* Bonaparte, 1837 *in* 1832–1841 (*nomen substitutum*), *Coluber cruentatus* Steveni, 1835, *Callopeltis leopardinus metaxa* Bonaparte, 1834 *in* 1832–1841, *Coluber leopardinus striata* Dehne, 1856, *Coronella quadrilineata punctulata* Jan, 1863, *Coelopeltis leopardinus otthianus* Gistel, 1868, *Coluber quadrilineatus pallasii* Bedriaga, 1881 *in* 1881–1882, and *Coluber leopardinus sparsus* Schreiber, 1912.

Type: Holotype, NHR Lin-32, an 890 mm specimen (F. Hasselquist, 1749–1752, via Mus. Drottn.).

Type locality: "Aegypto" [= Egypt] (in error, possibly for Asia Minor *fide* Flower, 1933: 815). Corrected to ruins of Ephesus, 3 km SW Selçuk, Izmir Prov., W Turkey *fide* Bruno (1992: 116) and to Izmir, Izmir Prov., Turkey *fide* Obst et al. (1993: 443).

Distribution: Southeastern Europe and Asia Minor. Extreme S Italy (Basilicata, Puglia, E Sicily Is.), Malta, Bosnia-Herzegovina, Montenegero, Croatia, Ada, Cres, Korcula, Krk, Lissa, Losinj, Mljet, Sipan and Vis Is., Macedonia, Albania, S Bulgaria (Blagoevgrad, Burgas, Pazardzhik), ext. S Ukraine, Greece (Aitolia and Akarnania, Arkadhia, Akhaia, Argolis, Arta, Attica, Drama, Evritania, Evros, Evvoia, Florina, Fokis, Fthiotis, Grevena, Ilia, Imathia, Ioannina, Kardhitsa, Kastoria, Kefallinia, Kerkira, Khalkidhiki, Kilkis, Korinthia, Kozani, Lakonia, Larisa, Lesvos, Levkas, Magnisia, Messinia, Pella, Pieria, Poros, Preveza, Rodhopi, Serrai, Thesprotia, Thessaloniki, Trikala, Voiotia, Xanthi, Zakinthos, Aegina, Andros, Argos, Chios, Ermione, Epidavros, Euboea, Kea, Kefaloniá, Kérkira, Kíthnos, Kríti, Konitsa, Lésvos, Mílos, Páros, Ródos, Salamis, Sámos, Sérifos, Skíros, Skópelos, Sífnos, Síros, Spetasi, Thíra and Tínos Is.) and Turkey (Aydin, Balikesir, Denizli, Istanbul, Izmir, Kocaeli, Trabzon), NSL–1600 m.

Fossil records: Lower Pleistocene (Calabrian: 0.8–1.8 mya) of Austria and Czech Republic, and middle Pleistocene to upper Pleistocene (Ionian-Tarantian: 0.01–0.78 mya) of Bulgaria and Greece.

Sources: F. Werner, 1938a, Buchholz, 1955, Pozzi, 1966, Clark, 1968, Bruno, 1969, 1977, 1984, Baran, 1976, Bannikov et al., 1977, Goran, 1986, Bruno & Maugeri, 1990, Szyndlar, 1991a, Obst et al., 1993, Holman, 1998a, Farkas & Toth, 1999, Petkovski et al., 2000, Ratnikov, 2004, Valakos et al., 2004, Sindaco et al., 2006, Ivanov, 2007, Naumov & Tomovic, 2007, Trapp, 2007, Franzen et al., 2008, Valakos et al., 2008, Tuniyev et al., 2009 and Stojanov et al., 2011.

Remarks: Type locality restriction to Misir, Egypt *fide* Baran (1976: 82) invalid.

13. †*Zamenis szyndlari* (Venczel, 1998). Acta Zool. Cracov. 41(1): 12–14, figs. 8a–c. (†*Elaphe szyndlari*)

Type: Holotype, HGIM V.20628, one basiparasphenoid.

Type locality: "Polgárdi 4 'Lower' limestone quarries of Somló-Hill and Koszár-Hill, near the village of Polgárdi (W-Hungary); Pontian or Upper Turolian (mammalian biozone MN 13), Late Miocene."

Distribution: Upper Miocene (Turolian, MN 13: 4.9–7.3 mya) of Hungary. Known only from type locality.

Source: Szyndlar, 2012.

†*ZELCEOPHIS* Szyndlar, 1984a (Colubridae)

Type species: †*Zelceophis xenos* Szyndlar, 1984a.

Distribution: Upper Miocene of Poland.

Source: Szyndlar, 1984a.

1. †*Zelceophis xenos* Szyndlar, 1984a. Acta Zool. Cracov. 28(1): 38–39, figs. 12a, d., l, p, v.

Type: Holotype, ZPW IZ-6/R/1, one trunk vertebra.

Type locality: "Mala Cava (MA) at Zelce Hill near Dzialoszyn (Northern Kraków—Wielún Upland in central Southern Poland); Upper Miocene (Turolian/Pontian), layer 7+8 (= Early/Middle Pliocene)."

Distribution: Upper Miocene (Turolian, MN 11–13: 4.9–9.7 mya) of Poland.

ZHAOERMIA Gumprecht & Tillack, 2004 (*nomen substitutum*) (Viperidae)

Synonym: *Ermia* F.-J. Zhang *in* Zhao et al., 1993. *(nomen praeoccupatum)*

Type species: *Trimeresurus mangshanensis* Zhao *in* Zhao & Chen, 1990.
Distribution: China.
Sources: F.-J. Zhang, 1993, David & Tong, 1997, P. Guo et al., 1999, Gumprecht & Tillack, 2004, Gumprecht et al., 2004 and Zaher et al., 2012.

1. *Zhaoermia mangshanensis* (Zhao *in* Zhao & Chen, 1990). Sichuan J. Zool. 9(1): 11–12. (*Trimeresurus mangshanensis*)

Type: Holotype, CIB 8901 (formerly ZS 8901), a 447 mm female (G.-H. Chen & Y.L. Tao, 15–30 Sept. 1989).
Type locality: "Pingkeng District, Mt. Mang (Mangshan), Yizhang County, Hunan Province, altitude 700–900 m" [China].
Distribution: Southern China (Hunan), 700–900 m. Known only from type locality.
Source: Guo et al., 2012.
Remarks: Holotype listed as male in original description. Holotype "considerably damaged" with skull removed *fide* P. Guo et al. (2012: 340).
Type: Neotype designation of CIB 98485 (a 370 mm male from Pingkeng in Mt. Mang, Yizhang, Hunan, China) by P. Guo et al. (2012: 340–341, figs. 1–2) invalid as an extracted skull and poor preservation are insufficient reasons for a neotype designation.

Genera and Species Inquirenda (*incertae sedis, nomina dubia, nomina nuda, nomina inedita and nomina rejicienda*)

GENERA

1. *ACRODERUS* Haworth, 1825. Philos. Mag. J. 65: 372 (*nomen nudum*).

Type species: Not designated.

2. *ATRYPTODON* Agassiz, 1844. Nomencl. Zool.: 5 (*nomen nudum*).

Synonym: *Athryptodon* Agassiz, 1847 *(nomen emendatum).*
Type species: Not designated.

3. *BORANUS* Rafinesque-Schmaltz, 1815. Anal. Nat. Tabl.: 77 (*nomen nudum*).

Type species: Not designated.

4. †*BOTROPHIS* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 280.

Synonyms: †*Bothrophis* Zittel, 1889 *(nomen praeoccupatum),* and †*Borthrophis* – Huene, 1956 *(nomen incorrectum).*
Type species: †*Botrophis gaudryi* Rochebrune, 1880.
Distribution: Lower Miocene of France.
Remarks: Boidae or Viperidae *fide* Rage (1984b: 33).

5. *CERCOPSIS* A.-M.-C. Duméril & Bibron, 1844. Erpét. Gén. 6: 63 (*nomen nudum*).

Type species: Not designated.

6. *CHALINOPHORUS* Jan, 1857. Cenni Mus. Civ. Milano: 50 (*nomen nudum*).

Type species: *Chalinophorus semidoliatus* Jan, 1857.
Type locality: “Giava” [= Java, W Indonesia].

7. *CORALLIOPHIS* Fitzinger, 1843. Syst. Rept.: 25 (*nomen nudum*).

Synonym: *Corralliophis* Fitzinger *in* A.-M.-C. Duméruil, Bibron & Duméril, 1854b *(nomen emendatum).*
Type species: *Coronella spixii* Fitzinger, 1826a.

8. *DOCHIS* Jan, 1857. Cenni Mus. Civ. Milano: 44 (*nomen nudum*).

Type species: *Dochis strigata* Jan, 1857.

9. *DRACONISCUS* Philippi, 1899. Anal. Univ. Chile 104: 720 (*nomen nudum*).

Type species: Not designated.

10. *EUPELTIS* Fitzinger, 1843. Syst. Rept.: 25 (*nomen nudum*).

Type species: *Eupeltis pulchra* Fitzinger, 1843.

11. *EUPREPES* Philippi, 1899. Anal. Univ. Chile 104: 720 (*nomen nudum*).

Type species: Not designated.
Remarks: Possibly *Dromicus (= Liophis) fide* Donoso-Barros & Cardenas (1964: 232).

12. *GONYOGASTER* A.-M.-C. Duméril & Bibron, 1844. Erpét. Gén. 6: 64 (*nomen nudum*).

Type species: Not designated.

13. †*HETEROPYTHON* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 290. (Boidae)

Synonyms: †*Heterophyton* – Hoffmann, 1890 *(nomen incorrectum),* †*Heteropyton* – Huene, 1959 *(nomen incorrectum),* and †*Heterophyton* – P.H.D.H. Silva, 1980 *(nomen incorrectum).*
Type species: †*Python euboeicus* Roemer, 1870.
Distribution: Southern France.
Remarks: A *nomen dubium fide* Rage (1984b: 33).

14. †*HOMEOTYPHLUS* Palacky, 1898. Mém. Soc. Zool. France 11: 104 (*nomen nudum*).

Type species: Not designated.

15. *HYDRECHIS* Ritgen, 1828. Nova Acta Acad. Caesar Leop.-Carol. 14: 262 (*nomen nudum*).

Type species: Not designated.

16. *HYPNALE* Rafinesque-Schmaltz, 1815. Anal. Nat. Tabl.: 77 (*nomen nudum*).

Type species: Not designated.

17. *IPHISA* Rafinesque-Schmaltz, 1815: Anal. Nat. Tabl.: 77 (*nomen nudum*).

Type species: Not designated.

18. *LAMANDA* Oken, 1816. Lehrbuch Naturg.: 274 (*nomen nudum*).

Type species: Not designated.

19. †*LAOPHIS* Owen, 1857. Quart. J. Geol. Soc. London 13: 196. (? Viperidae)

Type species: †*Laophis crotaloides* Owen, 1857.
Distribution: Upper Miocene or lower Pliocene of Greece.
Sources: Kuhn, 1939a, 1963, Hoffstetter, 1955 and Golay et al., 1993.
Remarks: A *nomen dubium fide* Rage (1984b: 58).

20. *LEPIDON* Swainson, 1839. Cabinet Cyclo. Nat. Hist. 2: 345 (*nomen nudum*).

Type species: Not designated.
Remarks: Possibly *Elapsoidea* or *Pseudohaje fide* K.L. Williams & Wallach (1989: 83).

21. *LEPTASPIS* Fitzinger, 1861. Sitz. Akad. Wiss. Wiss., Wien Math-Natur. Klass (1860) 42(25): 410 (*nomen nudum*).

Type species: *Leptaspis inornata* Fitzinger, 1861.
Remarks: Probably an Australian elapid.

22. †*LESTOPHIS* Marsh, 1885. Amer. J. Sci. (3) 29(170): 169. (*nomen substitutum*).

Synonyms: †*Limnophis* Marsh, 1871 *(nomen praeoccupatum),* and *Paleoboa* K.P. Schmidt, 1927c *(nomen substitutum).*
Type species: †*Limnophis crassus* Marsh, 1871.
Remarks: Not a snake but an amphisbaenid *fide* Estes (1983: 202).

23. *LIOSTEIRA* Fitzinger, 1843. Syst. Rept.: 26 (*nomen nudum*).

Synonym: *Liostira* Agassiz, 1847 *(nomen emendatum).*
Type species: *Tropidonotus meleagris* Wiegmann.

24. *MACROBOTHRIUM* Fitzinger, 1843. Syst. Rept.: 26 (*nomen nudum*).

Type species: *Coronella narica* Fitzinger, 1826a.

25. *MEGACEPHALUS* Fitzinger, 1843. Syst. Rept.: 27 (*nomen nudum*).

Type species: *Coluber similis* Fitzinger, 1843.

26. †*OPHIDION* Pomel, 1853. Cat. Méth. Vert. Fossil.: 128 (*nomen nudum*). (Boidae)

Synonyms: †*Ophiodon* – Mlynarski, 1961 *(nomen incorrectum),* and †*Ophidioniscus* Kuhn *in* Westphal, 1963 *(nomen substitutum).*
Type species: *Ophidion antiquus* Pomel, 1853.
Remarks: Official Rejected Name *fide* Direction 56 (ICZN, 1956d).

27. †*OPHIDIONISCUS* Kuhn *in* Westphal, 1963. Fossil. Cat., Animalia 1: 35 (*nomen substitutum*). (Boidae)

Type species: †*Ophidion antiquus* Pomel, 1853.
Remarks: A *nomen dubium fide* Rage (1984b 32).

28. †*OPHIDIUM* Burmeister, 1885: Anal. Mus. Nac. Buenos Aires 3(2): 152.

Type species: †*Ophidium incertum* Burmeister, 1885.
Distribution: Upper Miocene or Pliocene of Argentina.
Source: Rage, 1984b.
Remarks: A *nomen dubium fide* Rage, 1984b.

29. *OPHIS* Goldfuss, 1831. Nova Acta Phys.-Med. Caesar. Leop.-Carol. Nat. Cur. 15: 127 (*nomen nudum*).

Type species: *Ophis dubius* Goldfuss, 1831.
Remarks: A *nomen nudum fide* Rage (1984b: 61).

30. *OPHRIAS* Rafinesque-Schmaltz, 1815. Anal. Nat. Tabl.: 77 (*nomen nudum*).

Type species: Not designated.

31. *OPHTHALMOPHIS* Fitzinger, 1843. Syst. Rept.: 27 (*nomen nudum*).

Type species: *Coluber partschii* Fitzinger, 1826a.

32. †*PALAELAPHIS* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 156. (Boidae)

Synonym: †*Paleoelaphis* – Palacky, 1898 *(nomen incorrectum).*
Type species: †*Palaelaphis antiquus* Rochebrune, 1884.
Distribution: Upper Eocene or Oligocene of France.
Remarks: A *nomen dubium fide* Rage (1984b: 32).

33. *PETROLUS* Rafinesque-Schmaltz, 1815. Anal. Nat. Tabl.: 77 (*nomen nudum*).

Type species: Not designated.

34. *PHENACOPHIS* Fitzinger, 1861. Sitz. Akad. Wiss. Wien, Math-Natur. Kl. (1860) 42(25): 407 (*nomen nudum*).

Type species: *Phenacophis zelebori* Fitzinger, 1861.

35. *PRODIPLUS* Rafinesque-Schmaltz, 1819a. J. Phys. Chim. Hist. Nat. Arts., Paris 88: 418 (*nomen nudum*).

Type species: Not designated.

36. †*PROTROPIDONOTUS* Schlosser, 1916. Abh. Bayer. Akad. Wiss. Math.-Phys. Kl. 28(6): 34. (Colubridae)

Type species: †*Protropidonotus neglectus* Schlosser, 1916.
Distribution: Middle Miocene of Germany.
Source: Rage, 1984b.
Remarks: A *nomen dubium fide* Szyndlar & Böhme (1993: 388–389).

37. †*PROVIPERA* Kinkelin, 1892. Zool. Anz. 15(385): 94. (Viperidae)

Type species: †*Provipera boettgeri* Kinkelin, 1892.
Type: Holotype, SMF R 4186, one fang.
Type locality: "Hessler, Hessen Prov., Germany; Agenian (= Aquitanian), Lower Miocene" *fide* Rage (1984b: 58).
Distribution: Lower Miocene of Germany.
Remarks: A *nomen dubium fide* Rage (1984b: 58).

38. *PSAMMOPHIDION* Fitzinger, 1861. Sitz. Akad. Wiss. Wien, Math.-Natur. Kl. (1860) 42(25): 407 (*nomen nudum*).

Type species: *Psammophidion smithii* Fitzinger, 1861.

39. *PYTHONISCUS* Philippi, 1899. Anal. Univ. Chile 104: 720 (*nomen nudum*).

Type species: Not designated.
Remarks: Probably an Argentinian Xenodontidae *fide* Donoso-Barros & Cardenas (1964: 232).

40. †*RAGEOPHIS* Wallach, 1986. J. Herp. 20(3): 448. (*nomen substitutum*). (Boidae)

Synonyms: †*Scytalophis* Rochebrune, 1880 *(nomen praeoccupatum),* and †*Scytalopus* – Hoffmann, 1890 *(nomen incorrectum).*
Type species: †*Coluber lafonti* Filhol, 1877.
Distribution: Upper Eocene or Oligocene of France.
Sources: Rage, 1974, 1984b, 1988a and Wallach, 1986.
Remarks: A *nomen dubium fide* Rage (1984b: 32).

41. *RHINOCLEIS* Jan, 1857. Cenni Mus. Civ. Milano: 46 (*nomen nudum*).

Type species: *Rhinocleis gradatus* Jan, 1857.

42. *RHINODIPSAS* Fitzinger, 1843. Syst. Rept.: 27 (*nomen nudum*).

Type species: *Dipsas maculata* Wiegmann.
Remarks: A New World colubrid.

43. *RHINOPELTIS* Wagler *in* Agassiz, 1844. Nomen. Zool.: 39 (*nomen nudum*).

Type species: Not designated.
Remarks: Colubridae *fide* Agassiz (1844: 39). A valid genus *fide* Schulze et al. (1954 *in* 1936–1954: 3034).

44. †*SAUROPHIS* Brunner, 1957. Neues Jb. Geol. Paläont. 1957(7–8): 376–377, fig. 15. (Natricidae)

Type species: †*Saurophis crassus* Brunner, 1957.
Distribution: Upper Pleistocene of Germany (Bavaria).
Remarks: A *nomen dubium fide* Estes (1983: 211).

45. †*SCAPTOPHIS* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 279. (? Colubridae)

Synonyms: †*Scaptophus* – Hoffmann, 1890 *(nomen incorrectum),* and †*Scatophis* – Williston, 1925 *(nomen incorrectum).*
Type species: †*Scaptophis miocenicus* Rochebrune, 1880.
Distribution: Southern France.
Remarks: A *nomen dubium fide* Rage (1981: 541) and Augé & Rage *in* Ginsburg (2000: 301).

46. *STENODEIROS* Philippi, 1899. Anal. Univ. Chile 104: 722 (*nomen nudum*).

Type Species: Not designated.

47. †*SUFFOSIO* Standhardt, 1986. Vert. Paleont. Cretaceous/Tertiary Texas: 124 (*nomen ineditum*). (Anomalepididae)

Type species: †*Suffosio praedatrix* Standhardt, 1986. *(nomen ineditum)*
Remarks: A *nomen dubium fide* Rage (pers. comm.).

48. †*TACHYOPHIS* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 159. (Boidae)

Synonym: †*Tachiophis* – Palacky, 1898 *(nomen incorrectum).*
Type species: †*Tachyophis nitidus* Rochebrune, 1884.

Distribution: Upper Eocene or Oligocene of France.
Sources: Hoffstetter, 1955 and Rage, 1974, 1984b.
Remarks: A *nomen dubium fide* Rage (1984b: 33).

49. *TAMACUILLA* Brüggemann & Wigand, 1838. Naturg. Abbild. Besch. Amph. 1: 98 (*nomen nudum*).

Type species: *Tamacuilla huilia* Brüggemann & Wigand, 1838.

50. †*THORACOPHIS* Trochel, 1854. Verh. Naturhist. Ver. Pruess. Rheinlande Westfalens 11(1): xix.

Type species: †*Thoracophis rugosus* Trochel, 1854 *(nomen dubium).*
Distribution: Upper Oligocene of Germany.
Remarks: A *nomen dubium fide Rage (1984b*: 61). Not a snake but an anguid lizard *fide* Szyndlar & Böhme (1993: 390).

51. *TRACHELOGERRHON* Fitzinger, 1843. Syst. Rept.: 27 (*nomen nudum*).

Synonyms: *Trachelogerron* A.-M.-C. Duméril & Bibron, 1844. Erpét. Gén. 6: 64 *(nomen nudum),* and *Trachelogerrhum* Agassiz, 1847 *(nomen emendatum).*
Type species: *Dipsas trachelogerrhos* Hemprich *in* Fitzinger, 1843.

52. *TRIMACULATUS* Higgins, 1873. Ophidians: 80 (*nomen nudum*).

Type species: *Trimaculatus ceylonensis* Higgins, 1873.

53. *TROPIDOPELTIS* Fitzinger, 1843. Syst. Rept.: 25 (*nomen nudum*).

Synonym: *Tropidopellis* Gervais, 1848 *(nomen incorrectum).*
Type species: *Pseudoeryx strigiventris* Fitzinger, 1826.
Type locality: "? Asia." Emended to Brazil *fide* Jan (1857: 47).

SPECIES

1. *Ablabes annulata* A.-M.-C. Duméril, 1853. Mém. Acad. Sci. Inst. France 23: 454 (*nomen nudum*).

Type: Holotype, MNHN, not designated.
Type locality: "Vera-Paz, Guatemala."

2. *Ablabes punctatus impunctata* Jan, 1857. Cenni Mus. Civico Milano: 46 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "America sett." [= North America].

3. *Ablabes raimondii* Jan, 1863a. Arch. Zool. Anat. Fis. 2(2): 72–73 (*nomen nudum*).

Type: Holotype, MSNM (Raimondi), destroyed in 1943 during World War II.
Type locality: "Lima" [Peru.].

4. *Ablabes sexlineata* A.-M.-C. Duméril, 1853. Mém. Acad. Sci. Inst. France 23: 454 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

5. *Alecto wiebeli* Jan, 1863b. Elenco Sist. Ofidi: 117 (*nomen nudum*).

Type: Holotype, ZMB, not designated.
Type locality: "Australia."

6. *Amphiesma schistaceum* Jan, 1863b. Elenco Sist. Ofidi: 73 (*nomen nudum*).

Type: Holotype, MZN, not designated.
Type locality: "Indie orientali" [= E India].

7. *Anguis brachyura* Hermann, 1804. Observ. Zool.: 288.

Type: Holotype, not designated, location unknown.
Type locality: "Ramsayanis."
Remarks: A *nomen dubium.*

8. *Anguis brunneus* Seetzen, 1795. Intelligenz. Allgel. Lit.-Zeitung: 320.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

9. *Anguis cinereus* J.G. Schneider, 1801. Hist. Amph. 2: 341.

Type: Holotype, ZMB, not designated.
Type locality: Unknown. Emended to "Brésil et les Antilles" [Brazil and the Antilles] *fide* Guérin-Méneville (1838: 13).
Remarks: *Incertae sedis fide* McDiarmid et al. (1999: 125) but possibly a synonym of *Typhlops richardii fide* A.-M.-C. Duméril & Bibron (1844: 293) or *T. dominicanus fide* Hahn (1980a: 57). MNHN 3219 listed as holotype *fide* Hahn (1980a: 57) but this is probably the specimen reported by Cuvier, 1829, and illustrated by Guérin-Méneville, 1838 *in* 1829–1844.

10. *Anguis gronovianus* Schneider, 1801. Hist. Amphib.: 338.

Type: Holotype, not designated, location unknown.
Type locality: "Guineam" [= West Africa].
Remarks: A *nomen dubium*.

11. *Anguis miguel* Lacépède, 1789. Hist. Nat. Serp. 2: 134, 445 (*nomen rejiciendum*).

Type: Holotype, MNHN, not designated (King of France's cabinet).
Type locality: "Paraguay."
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

12. *Anguis sagitta* Lacépède, 1789. Hist. Nat. Serp. 2: 134 (*nomen rejiciendum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

13. *Boa flavicans* Bonnaterre, 1790: Tabl. Ency. Méth., Ophiol.: 8–9.

Type: Holotype, not designated, location unknown.
Type locality: "Guinée" [= West Africa].
Remarks: A *nomen dubium*.

14. *Boa isobequensis* Bonnaterre, 1790: Tabl. Ency. Méth., Ophiol.: 9.

Type: Holotype, not designated, location unknown.
Type locality: "Amérique septentrionale" [= North America].
Remarks: A *nomen dubium*.

15. *Boa merremii* Seetzen, 1796. Meyer's Zool. Arch. 2: 53.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium fide* McDiarmid et al. (1999: 193).

16. *Boa moluroidem* Schneider, 1801. Hist. Amph. 1: 279–280.

Type: Holotype, MJU, not designated.
Type locality: Unknown.
Remarks: A *nomen dubium fide* J.C. Murphy et al. (2012a: 15).

17. †*Botrophis gaudryi* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 280–281, pl. 12, figs. 8a–c.

Type: Holotype, MNHN FP 3112, one poorly preserved trunk vertebra.
Type locality: "Faluns de Pont-Levoy (Loir-et-Cher)" [= Pontlevoy, Loir-et-Cher Prov., France, lower Miocene (Orleanian) *fide* Rage, 1984b: 33].
Distribution: Lower Miocene (Orleanian MN 4: 16.0–16.9 mya) of France (Loir-et-Cher). Known only from type locality.
Remarks: A *nomen dubium fide* Rage (1984b: 33).

18. *Brachyorrhos torquatus* F. Boie, 1827. Isis von Oken 20(6): 540 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "indischen Archipelagus" [= East Indies].

19. *Brachyruton plumbeum maculatum* Jan, 1863b. Elenco Sist. Ofidi: 92 (*nomen nudum*).

Type: Holotype, SMF, not designated.
Type locality: "Buenos Ayres" [Argentina].

20. *Bungarus ferrum-equinum* Fitzinger, 1826a. Neue Class. Rept.: 61 (*nomen nudum*).

Type: Holotype, not designated (H. Kuhl), location unknown.
Type locality: "Asia, Insula Java" [= Java, W Indonesia].

21. *Bungarus filum* Oppel *in* Schlegel, 1837. Essai Phys. Serp. 2: 231 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: Probably *Dendrelaphis pictus* or *D. tristis.*

22. *Bungarus venosus* Oppel, 1811a. Ann. Mus. Hist. Nat. (1810) 16: 392 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

23. *Calamaria occipitalis* Jan, 1862b. Arch. Zool. Anat. Fis. 2(1): 9–10 (*nomen nudum*).

Types: Syntypes (2), formerly MSNM, a 500 mm and 490 mm specimen, destroyed in 1943 during World War II.
Type locality: "Giava" [= Java, Indonesia].
Remarks: A *nomen dubium fide* Inger & Marx (1965: 240): *cf. Calamaria lumbricoidea* but with a divided anal shield.
Sources: Jan & Sordelli, 1865 *in* 1860–1866, Rooij, 1917, Haas, 1950 and Inger & Marx, 1965.

24. *Callophis pectolineatus* Beddome *in* F. Müller, 1887: 276 (*nomen nudum*).

Type: Holotype, NMBA, not designated (F. Müller).
Type locality: "Malabar" [SW India].

25. *Chalinophorus semidoliatus* Jan, 1857. Cenni Mus. Civico Milano: 50 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Giava" [= Java, W Indonesia].

26. *Chilolepis domestica* Fitzinger, 1853. Sitz. Akad. Wiss. Wien, Math.-Natur. Klass. 10(4): 658 (*nomen dubium*).

Types: Syntypes (7), NMW (formerly HNC) (Lautner, 1851 [6 spec., Egypt] and Kotschy, 1839 [1 spec., Tripoli]), probably destroyed 6 Nov. 1944 during World War II.
Type locality: "Ägypten, Tripolis" [= Egypt and Tripoli].

27. *Chionactis palarostris seri* Blake, 1970. Distr. and var. *C. palarostris*. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

28. *Chironius leuckarti* Fitzinger, 1826a. Neue Class. Rept.: 60 (*nomen nudum*).

Type: Holotype, not designated (Leuckart), location unknown.
Type locality: Unknown.

29. *Coelopeltis productus* Jan, 1863b. Elenco Sist. Ofidi: 89 (*nomen nudum*).

Type: Holotype, formerly MSNM, destroyed in 1943 during World War II.
Type locality: "Algeri" [= Algeria].

30. *Coluber 5-lineatus* Raddi, 1820. Mem. Mat. Fis. Soc. Ital. Sci., Modena 18: 339–340*)* (*nomen dubium*).

Type: Holotype, not designated (G. Raddi, 1817–1818), location unknown.
Type locality: "contorni di Rio-Janeiro, Brasile" [= vicinity of Rio de Janeiro, Rio de Janeiro State, SE Brazil].
Remarks: Possibly an *Apostolepis, Elapomorphus* or *Phalotris.*

31. *Coluber acantia* Rystedt, 1823. Fauna Amer. Merid.: 3 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Amer. Merid." [= South America].

32. *Coluber africanus* Bonnaterre, 1790. Tabl. Ency. Meth., Ophiol.: 49.

Type: Holotype, not designated, location unknown.
Type locality: "Afrique" [= Africa].
Remarks: A *nomen dubium.*

33. *Coluber angustulus* Hermann, 1804. Observ. Zool.: 286.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

34. *Coluber argentea* Rafinesque-Schmaltz, 1818a. Amer. Month. Mag. Critical Rev. 3(1): 416.

Type: Holotype, not designated, location unknown.
Type locality: "Western region of the United States."
Remarks: A *nomen dubium.* Possibly a *Rena.*

35. *Coluber asiaticus* Lacépède, 1789. Hist. Nat. Serp. 2: 94, 249 (*nomen rejiciendum*).

Type: Holotype, MNHN, not designated (King of France's cabinet).
Type locality: "isle de Ceylan" [= Sri Lanka].
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

36. *Coluber asiaticus* Latreille *in* Sonnini & Latreille, 1801b. Hist. Nat. Rept. 4: 118–119.

Type: Holotype, ? MNHN, not designated.
Type locality: Unknown.
Remarks: A *nomen dubium.*

37. *Coluber atro-reticulata* Bonnaterre, 1790. Tabl. Ency. Meth., Ophiol.: 29.

Type: Holotype, not designated, location unknown.
Type locality: "Guinée" [= West Africa].
Remarks: A *nomen dubium.*

38. *Coluber azureus* Merrem, 1820. Tent. Syst. Amph.: 129.

Type: Holotype, MNHN, not designated.
Type locality: "Promontorio viridi" [= Cape Verde].
Remarks: A *nomen dubium.*

39. *Coluber baetaen* Forskal *in* Niebuhr, 1775. Descr. Anim.: 15.

Type: Holotype, not designated (P.S. Forskal, Dec. 1762–July 1763), location unknown.
Type locality: "Arab."
Remarks: A *nomen dubium.*

40. *Coluber bechsteinii* Merrem, 1820. Tent. Syst. Amph.: 110–111.

Type Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

41. †*Coluber beggiatoi* Zigno, 1890. Atti Mem. Accad. Sci. Lett. Arti Padova (1889–1890) (2) 6: 112–113, pl. figs. 1–8.

Type: Holotype, cranial bones and axial skeleton (F. Beggiato), destroyed *fide* Rage (1984b 52).
Type locality: "colle di Lonigo, Veneto; terreni Terziari" [= Colle di Lonigo, Veneto Prov., NE Italy; upper Eocene (in error *fide* Rage, 1984a: 52].
Distribution: Italy (Veneto).
Remarks: A *nomen dubium fide* Rage (1984b 52) but probably a Recent colubrid.

42. *Coluber bilis* Ekstrand, 1823: Fauna Brasliensis: 6 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Brasiliensis" [= Brazil].

43. *Coluber bimaculatum* Lacépède, 1789. Hist. Nat. Serp. 2: 78, 222 (*nomen rejiciendum*).

Type: Holotype, MNHN, not designated (King of France's cabinet).
Type locality: Unknown.
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

44. *Coluber blochii* Merrem, 1820. Tent. Syst. Amph.: 107.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

45. *Coluber boa* Duvernoy, 1832. Ann. Sci. Nat. (Zool.): 128 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

46. *Coluber braminus* Raddi, 1823. Mem. Mat. Fis. Soc. Ital. Sci., Modena 19: 64–65 (*nomen dubium*).

Type: Holotype, not designated (G. Raddi. 1817–1818), location unknown.
Type locality: "Rio-janeiro, Brasile" [= Rio de Janeiro, Rio de Janeiro State, SE Brazil].
Remarks: Possibly a *Helicops.*

47. *Coluber capitatus* Lacépède, 1789. Hist. Nat. Serp. 2: 90, 280, pl. 14, fig. 1 (*nomen rejiciendum*).

Type: Holotype, MNHN, not designated (King of France's cabinet).
Type locality: "Amérique" [= America].
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

48. *Coluber cenchrus* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 22, pl. 41, fig. 2.

Type: Holotype, MNHN, not designated (Cabinot du Roi).
Type locality: "Asie" [= Asia].
Remarks: A *nomen dubium.*

49. *Coluber cineraceus* Lacépède, 1789. Hist. Nat. Serp. 2: 94 (*nomen rejiciendum*).

Type: Holotype, MNHN, not designated (d'Aubenton).
Type locality: "les Indes" [= East Indies].
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

50. *Coluber conspersus* Gravenhorst, 1807. Linn. Zool. Syst.: 406.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

51. *Coluber cyanoleucus* Gravenhorst, 1807. Linn. Zool. Syst.: 401–402.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

Remarks: A *nomen dubium*.

52. *Coluber edentulus* Gravenhorst, 1807. Linn. Zool. Syst.: 409.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

53. *Coluber enzelii* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Type: Holotype, not designated (Enzel), location unknown.
Type locality: "America septentionali" [= North America].

54. *Coluber ephippium* Seetzen, 1796a. Meyer's Zool. Archiv 2: 54.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

55. *Coluber flagellarius* Hermann, 1894. Observ. Zool.: 286.

Type: Holotype, MZUS (formerly MH), destroyed in 1943–1944 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium*.

56. *Coluber flexosus* Fischer von Waldheim, 1832. Bull. Soc. Impér. Nat. Moscou 4(3): 575

Type: Holotype, not designated, location unknown.
Type locality: "Caucasus" [SW Asia].
Remarks: A *nomen dubium*. Data given are zigzag yellow lateral stripe, keeled scales, 177 ventrals and 75 subcaudals, length 4 feet.

57. *Coluber frenatus* Gravenhorst, 1807. Linn. Zool. Syst.: 403.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

58. *Coluber funestus* Fitzinger, 1826a. Neue Class. Rept.: 58 (*nomen nudum*).

Type: Holotype, MV, not designated.
Type locality: "America."

59. *Coluber fuscescens* Fitzinger, 1826a. Neue Class. Rept.: 57 (*nomen nudum*).

Type: Holotype, not designated (Bräunlicher), location unknown.
Type locality: Unknown.

60. *Coluber gesneri* Merrem, 1820. Tent. Syst. Amph.: 120.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

61. *Coluber gliricapa* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 29.

Type: Holotype, not designated, location unknown.
Type locality: "Surinam, Ceylan" [= Suriname and Sri Lanka].
Remarks: A *nomen dubium*. Possibly a *Psammophis*.

62. *Coluber gracilis* Gravenhorst, 1807. Linn. Zool. Syst.: 410.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

63. *Coluber hermanni* Merrem, 1820. Tent. Syst. Amph.: 94.

Type: Holotype, not designated, location unknown.
Type locality: "Tranquebaria" [= Tharangambadi, Tamil Nadu State, SE India].
Remarks: A *nomen dubium*.

64. *Coluber hoelleik* Forskal *in* Niebuhr, 1775. Descr. Anim.: 15.

Type: Holotype, not designated (P.S. Forskal, Dec. 1762–July 1763), location unknown.
Type locality: "Arab." [= Arabia].
Remarks: A *nomen dubium*.

65. *Coluber jaspideus* Hermann, 1804. Observ. Zool.: 275.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

66. *Coluber jenisonii* Gistel, 1850. Handbuch Naturg. Reiche: 328 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

67. †*Coluber kargii* H. Meyer, 1845. Fauna Vorwelt Fossil.: 41, pl. 6, fig. 2. (? Viperidae)

Type: Holotype, MNHN BML 905, one right maxilla; or syntypes (2), PIMUZ A/III 163 and A/III 164, an embedded complete skeleton on opposing slabs.

Type locality: "Molasse-Mergel Steinbrüche von Öningen" [= Oeningen, Baden-Württemberg State, SW Germany; Astaracian, middle Miocene].
Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of Germany. Known only from holotype.
Sources: Szyndlar, 1992, 1997.
Remarks: A *nomen dubium fide* Szyndlar, 1992, and Szyndlar & Böhme, 1993.

68. *Coluber lateralis* Gravenhorst, 1807. Linn. Zool. Syst.: 403.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

69. *Coluber laticapitantus* Lacépède, 1789. Hist. Nat. Serp. 2: 84, 336–337 (*nomen rejiciendum*).

Type: Holotype, MNHN, not designated (King of France's cabinet).
Type locality: "Amérique méridionale" [= South America].
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

70. *Coluber laticapitatus* Merrem, 1820. Tent. Syst. Amph.: 99.

Type: Holotype, not designated, location unknown.
Type locality: "America meridionali" [= South America].
Remarks: A *nomen dubium.*

71. *Coluber latreillei* Merrem, 1820. Tent. Syst. Amph.: 112.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

72. *Coluber leucomelas* Gmelin, 1789. Syst. Nat., ed. 13, 1(3): 1090–1091.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

73. *Coluber longicauda* Fitzinger *in* Ritter, 1823b. Archiv. Ges. Stat. Lit. Kunst (84–85): 440 (*nomen nudum*).

Type: Holotype, NMW, not designated (C. Ritter, 1819–1821).
Type locality: "St. Domingo" [= Santo Domingo, Dominican Republic].

74. *Coluber lumbricosa* Lesson, 1828. Ann. Sci. Nat. (Zool.) 13: 372 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: Type locality Brazil *fide* Lesson (1830: 4).

75. *Coluber lunulatus* Hermann, 1804. Observ. Zool.: 274–275.

Types: Syntypes (2), MZUS (formerly MH), destroyed in 1943–1944 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium.*

76. *Coluber margaritiferus* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 56, pl. 41, fig. 1.

Type: Holotype, MNHN, not designated (Cabint du Roi).
Type locality: Unknown.
Remarks: A *nomen dubium*. Possibly a *Psammophis.*

77. *Coluber melanogramus* Fitzinger *in* Ritter, 1823b. Archiv. Ges. Stat. Lit. Kunst (84–85): 440 (*nomen nudum*).

Type: Holotype, NMW, not designated (C. Ritter, 1819–1821).
Type locality: "St. Domingo" [= Santo Domingo, Dominican Republic].

78. *Coluber melanoleucos* Donndorff, 1798. Zool. Beyträge 3: 209.

Type: Holotype, not designated, a male, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

79. *Coluber monochromis* F. Boie, 1827. Isis von Oken 20(6): 538.

Type: Holotype, not designated, location unknown.
Type locality: "Africa."
Remarks: A *nomen dubium.*

80. *Coluber naevius* Gmelin, 1789. Syst. Nat., ed. 13, 1(3): 1095.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

81. *Coluber nasica* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 36.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium.*

82. *Coluber neumayeri* Fitzinger, 1826a. Neue Class. Rept.: 57 (*nomen nudum*).

Type: Holotype, not designated (Neumayer), location unknown.
Type locality: "Europa, Dalmatia" [= Croatia].

83. *Coluber nicandri* Merrem, 1820. Tent. Syst. Amph.: 97.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

84. *Coluber nigerrimus* Hermann, 1804. Observ. Zool.: 287.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

85. *Coluber nocturnes* Donndorff, 1798. Zool. Beyträge 3: 209.

Type: Holotype not designated, a male, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

86. *Coluber nuchimacula* Fitzinger, 1826a. Neue Class. Rept.: 58 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

87. †*Coluber ombonii* Zigno, 1890. Atti Mem. Accad. Sci. Lett. Arti Padova (1889–1890) (2) 6: 113, fig. 9.

Type: Holotype, IGP 8360, a 55 mm imprint of posterior body and tail section.
Type locality: "marne superiori di M. Bolca, Veneto; terreni Terziari" [= Pesciara, Monte Bolca, Veneto Prov., NE Italy; Ypresian, lower Eocene *fide* Rage, 1984a: 58].
Distribution: Lower Eocene (Ypresian) of Italy. Known only from the holotype.
Remarks: *Incertae sedis fide* Rage (1984b: 58).

88. *Coluber oppelii* Fitzinger, 1826a. Neue Class. Rept.: 57 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "America septentrionali" [= North America].

89. *Coluber ovivorus* Linnaeus, 1758. Syst. Nat., ed. 10, 1: 223.

Type: Holotype, not designated, location unknown.
Type locality: "America."
Remarks: A *nomen dubium*. Possibly *Coluber constrictor* or *Pantherophis vulpinus*.

90. †*Coluber owenii* H. Meyer, 1844a. Neues Jb. Min. Geog. Geol. Petrefak.-Kunde 12: 330–331. (Colubridae)

Type: Holotype, LNK TE/58, an incomplete axial skeleton (ca. 900 mm with 202 vertebrae) embedded in the matrix (H. Seyfried).
Type locality: "Molasse-Mergel Steinbrüche von Öningen" [= Oeningen, Baden-Württemberg State, SW Germany; Astaracian, middle Miocene].
Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of Germany. Known only from holotype.
Sources: Rage, 1984b, Szyndlar & Böhme, 1993 and Szyndlar, 2012.
Remarks: Supplemental original description in H. Meyer (1845: 40–41, pl. 7, fig. 1). Identification below family level impossible *fide* Szyndlar & Böhme (1993: 389).

91. *Coluber pallasii* Merrem, 1820. Tent. Syst. Amph.: 109.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

92. *Coluber panamensis* Gmelin, 1789. Syst. Nat., ed. 13, 1(3): 1095.

Type: Holotype, not designated, location unknown.
Type locality: "Panama."
Remarks: A *nomen dubium*.

93. *Coluber papyraceus* Troschel, 1854. Verh. Naturhist. Ver. Preuß. Rheinl. Westfaalens 11(1): xix (*nomen nudum*).

Type: Holotype, lost *fide Rage (1984b*: 60).
Type locality: "Braunkohle von Rott."
Distribution: Upper Oligocene of W Germany (Rott).
Remarks: A *nomen nudum fide* Rage (1984b: 60).

94. *Coluber partschii* Fitzinger, 1826a. Neue Class. Rept.: 57 (*nomen nudum*).

Type: Holotype, not designated (Partsch), location unknown.
Type locality: Unknown.

95. *Coluber phorbeia* Gravenhorst, 1807. Linn. Zool. Syst.: 410.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

96. *Coluber planiventer* Seetzen, 1796. Meyer's Zool. Archiv 2: 56.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

97. †*Coluber plioagellus* R.L. Wilson, 1968. Contri. Mus. Paleont. Univ. Michigan 22(7): 102–103, figs. 10f–h. (Colubridae)

Type: Holotype, UMMP V 55711, one trunk vertebra.
Type locality: "UM-K6-59, Ogallala Formation, Lower Pliocene, Wakeeney local fauna, Lowell Hillman Ranch, northwest of Ogallah, Trego County, Kansas, elevation 2255 feet," Clarendonian, upper Miocene.
Distribution: USA (Kansas). Known only from type locality.
Sources: Holman, 1975 and Rage, 1984b.
Remarks: A *nomen dubium fide* Rage (1984b: 52) but *Coluber* or *Masticophis fide* Holman (1975: 63).

98. †*Coluber podolicus* H. Meyer, 1844b. Nueues Jb. Min. Geog. Geol. Petrefak.-Kunde 12: 565. (? Natricidae)

Type: Holotype, one trunk vertebra, lost *fide* Rage (1984b: 52).
Type locality: "Holuzubiniec" *fide* Pusch (1837: 168) or "Hotozubince" *fide* Pusch (1842: 179) and Szyndlar (1991b: 265).
Distribution: Ukraine (Khmel'nyts'ka). Known only from holotype.
Remarks: Rage (1984b: 52) listed Bolurubince, near Kamenets Podo'sky, Ukrainian S.S.R., USSR, age unknown. A *nomen dubium fide* Rage (1984b: 52) but a *Natrix fide* Szyndlar (1997: 213–214).

99. *Coluber polyzimias* Donndorff, 1798. Zool. Beyträge 3: 202.

Type: Holotype, not designated, a 325 mm specimen (King of France's cabinet).
Type locality: Unknown.
Remarks: A *nomen dubium*.

100. *Coluber porosus* Fitzinger *in* Ritter, 1823b. Archiv. Ges. Stat. Lit. Kunst (84–85): 440 (*nomen nudum*).

Type: Holotype, NMW, not designated (C. Ritter, 1819–1821).
Type locality: "St. Domingo" [= Santo Domingo, Dominican Republic].

101. *Coluber praetexata* Gravenhorst, 1807. Linn. Zool. Syst.: 414.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

102. *Coluber precatorius* Donndorff, 1798. Zool. Beyträge 3: 205.

Type: Holotype, not designated, a 473 mm specimen (King of France's cabinet), based on Lacépède (1789: pl. 12, fig 1).
Distribution: Unknown.
Remarks: A *nomen dubium*. Possibly a *Psammophis*.

103. *Coluber pseudechidna* Hermann, 1804. Observ. Zool.: 276–278.

Types: Syntypes (7), not designated (D. Hecht, 1791), location unknown.
Type locality: "Pontarlier, Aliae minores ex Salins" [= Pontarlier and Salins-les-Bains, France].
Remarks: A *nomen dubium*.

104. *Coluber pulchellus* Hermann, 1804. Observ. Zool.: 286.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

105. *Coluber pulcher* Raddi, 1820. Mem. Mat. Fis. Soc. Ital. Sci., Modena 18: 337–338.

Type: Holotype, not designated (G. Raddi, 1817–1818), location unknown.
Type locality: "vicinanze di Rio-Janeiro, Brasile" [= vicinity of Rio de Janeiro, Rio de Janeiro State, SE Brazil].
Remarks: A *nomen dubium*. Possibly an *Apostolepis, Elapomorphus* or *Phalotris*.

106. *Coluber pusillus* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 61–62.

Type: Holotype, not designated, location unknown.
Type locality: "Inde" [= India].
Remarks: A *nomen dubium*.

107. *Coluber quinquefasciatus* Fitzinger, 1826a. Neue Class. Rept.: 58.

Type: Holotype, not designated (C.G.C. Reinwardt), location unknown.
Type locality: "Asia, Insula Java" [= Java, W Indonesia].
Remarks: A *nomen dubium*.

108. *Coluber rufofuscus* Fitzinger *in* Ritter, 1823b. Archiv. Ges. Stat. Lit. Kunst (84–85): 440 (*nomen nudum*).

Type: Holotype, NMW, not designated (C. Ritter, 1819–1821).
Type locality: "St. Domingo" [= Santo Domingo, Dominican Republic].

109. *Coluber schneideri* Merrem, 1820. Tent. Syst. Amph.: 96.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

110. *Coluber schytha* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 15.

Type: Holotype, not designated (P.S. Pallas, 1768–1774).
Type locality: "Sibérie" [= N Russia].
Remarks: A *nomen dubium*.

111. *Coluber seetzenii* Merrem, 1820. Tent. Syst. Amph.: 97 (*nomen nudum*).

Type: Holotype, RMNH, not designated.
Type locality: "Africa."

112. *Coluber seriatus* Hermann, 1804. Observ. Zool.: 273.

Type: Holotype, MZUS (formerly MH), destroyed in 1943–1944 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium*.

113. *Coluber similis* Fitzinger, 1843. Syst. Rept.: 27 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "As. Am." [= Asia, America].

114. *Coluber sitala* Latreille *in* Sonnini & Latreille, 1801b. Hist. Nat. Rept. 4: 162.

Type: Holotype, not designated, location unknown.
Type locality: "Egypte" [= Egypt].
Remarks: A *nomen dubium*.

115. *Coluber splendidus* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 14–15.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

116. *Coluber subcaerulous* Lacépède, 1789. Hist. Nat. Serp. 2: 104, 288 (*nomen rejiciendum*).

Type: Holotype, not designated, location unknown.
Type locality: "Amérique" [= America].
Remarks: Official Rejected Name *fide* Opinion 1463 (ICZN, 1987).

117. *Coluber subulatus* Gravenhorst, 1807. Linn. Zool. Syst.: 404.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

118. *Coluber thoracicus* Hermann, 1804. Observ. Zool.: 276.

Type: Holotype, MZUS (formerly MH), destroyed in 1943–1944 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium*.

119. *Coluber tiedemanni* Merrem, 1820. Tent. Syst. Amph.: 126.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

120. *Coluber toxicon* Bonnaterre, 1790. Tabl. Ency. Méth. Ophiol.: 62.

Type: Holotype, not designated, location unknown.
Type locality: "Inde" [= India].
Remarks: A *nomen dubium*.

121. *Coluber trifasciatus* Shaw, 1802. Gen. Zool. 3(2): 542.

Type: Holotype, WHM, not designated.
Type locality: Unknown.
Remarks: A *nomen dubium*.

122. *Coluber urens* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 62.

Type: Holotype, not designated, location unknown.
Type locality: "Inde" [= India].

123. *Coluber variegatus* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 39.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

124. *Coluber virgata* Bonnaterre, 1790. Tabl. Ency. Méth. Ophiol.: 49–50.

Type: Holotype, not designated, location unknown.
Type locality: "Surinam."
Remarks: A *nomen dubium*.

125. *Coluber weigelii* Seetzen, 1796. Meyer's Zool. Archiv 2: 57.

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*.

126. *Coluber xequipeles* Bonnaterre, 1790. Tabl. Ency. Méth., Ophiol.: 52.

Type: Holotype, not designated, location unknown.
Type locality: "Surinam, l'Amerique" [= Surinam, South America].
Remarks: A *nomen dubium*.

127. *Coronella agnellii* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Type: Holotype, not designated (Agnello), location unknown.
Type locality: "Africa."

128. *Coronella anguiformis* Laurenti, 1768. Synop. Rept.: 85.

Type: Holotype, Museo Turriano (? MZUT).
Type locality: Unknown.
Remarks: A *nomen dubium*.

1292. *Coronella cerastoides* Laurenti, 1768. Synop. Rept.: 86.

Type: Holotype, Museo Turriano (? MZUT).
Type locality: Unknown.
Remarks: A *nomen dubium*.

130. *Coronella geoffroana* Fitzinger, 1826a. Neue Class. Rept.: 59. (*nomen nudum*).

Type: Holotype, not designated (Geoffroy), location unknown.
Type locality: Unknown.

131. *Coronella latirostra* Laurenti, 1768. Synop. Rept.: 86.

Type: Holotype, Museo Turriano (? MZUT).
Type locality: Unknown.
Remarks: A *nomen dubium*.

132. *Coronella lichtensteinii* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Type: Holotype, not designated (Lichtenstein), location unknown.
Type locality: Unknown.

133. *Coronella lineolata* Fitzinger, 1826a. Neue Class. Rept.: 59. (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

134. *Coronella macroura* Fitzinger, 1826a. Neue Class. Rept.: 59. (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

135. *Coronella narica* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Type: Holotype, MV, not designated.
Type locality: "America, Brasilia" [= Brazil, South America].

136. *Coronella notata* Blyth, 1859. J. Asiat. Soc. Bengal 28(3): 297. (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

137. *Coronella pohlii* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Type: Holotype, not designated (Pohl), location unknown.
Type locality: "America, Brasilia" [= Brazil, South America].

138. *Coronella russellii* Blyth, 1854a. J. Asiat. Soc. Bengal 23(3): 293 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

139. *Coronella scherei* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Type: Holotype, not designated (Scherer), location unknown.
Type locality: Unknown.

140. *Coronella spixii* Fitzinger, 1826a. Neue Class. Rept.: 59 (*nomen nudum*).

Synonym: *Coralliophis spixii* Fitzinger, 1843.
Type: Holotype, MV, not designated.
Type locality: "America, Brasilia" [= Brazil, South America].

141. *Coronella treuensteinii* Fitzinger, 1826a. Neue Class. Rept.: 59. (*nomen nudum*).

Type: Holotype, MV, not designated.
Type locality: "America, Brasilia" [= Brazil, South America].

142. †*Crotalus potterensis* Brattstrom, 1953. Copeia 1953(3): 175–176, fig. 1. (Viperidae)

Type: Holotype, UCMP 3129, two middle trunk vertebrae, part of a pterygoid, rib fragments and three bone fragments.
Type locality: "Potter Creek Cave, Shasta County, California, Late Pleistocene."
Distribution: Upper Pleistocene of USA (California). Known only from type locality.
Remarks: A *nomen dubium fide* Rage (1984b: 56).

143. C*rotalus tesselatus* Hermann, 1804. Observ. Zool.: 271. (Viperidae)

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Sources: Klauber, 1936 and McDiarmid et al., 1999.
Remarks: Resembles *Crotalus durrisus* and *C. adamanteus* in size and pattern and *C. triseriatus* in scutellation *fide* Klauber (1936: 197). A *nomen dubium*.

144. *Cylindrophis macroscelis* Jerdon, 1853. J. Asiat. Soc. Bengal 22(6): 527. (Cylidrophiidae)

Type: Holotype, not designated, location unknown.
Type locality: "India."
Remarks: A *nomen dubium*. Probably referable to *Cylindrophis*.

145. *Dendrophis fuscus* Jan, 1863b. Elenco Sist. Ofidi: 86 (*nomen nudum*).

Types: Syntypes (3), MCZ, MNHN, and ZMH, not designated.
Type locality: "Australia" and "Sydney" [Australia].

146. *Dipsas bertholdi* Jan, 1863b. Elenco Sist. Ofidi: 103 (*nomen nudum*).

Type: Holotype, ZMG, not designated.
Type locality: Unknown.

47. *Dipsas infrenalis* Rosén, 1905. Ann. Mag. Nat. Hist. (7) 15(86): 150. (Dipsadidae)

Type: Holotype, ZMUL, a 300 mm specimen.
Type locality: Unknown.
Remarks: *Incertae sedis fide* J.A. Peters (1960: 214).

148. *Dipsas interruptus* Duvernoy, 1831. J. Roy. Inst. Great Britain (5): 158 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

149. *Dipsas lineatus* A.-M.-C. Duméril, 1853. Mém. Acad. Sci. Inst. France 23: 508 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

150. *Dipsas valdiviensis* Jan, 1857. Cenni Mus. Civico Milano: 49 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Valdivia" [Chile].

151. *Dipsas trachelogerrhos* Hemprich *in* Fitzinger, 1843. Syst. Rept.: 27 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "As.?" [= Asia].

152. *Dochis strigata* Jan, 1857. Cenni Mus. Civico Milano: 44 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Venezuela."

153. *Dromicus capensis* Jan, 1863b. Elenco Sist. Ofidi: 66 (*nomen nudum*).

Type: Holotype, formerly MSNM, destroyed in 1943 during World War II.
Type locality: "Capo di B. Sp.'" [= Cape of Good Hope, South Africa].

154. *Dromicus infrenatus* Jan, 1857. Cenni Mus. Civico Milano: 46 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.

155. *Dromicus modestus* Jan, 1863b. Elenco Sist. Ofidi: 66 (*nomen nudum*).

Type: Holotype, MNHN, not designated.
Type locality: "Brasile" [= Brazil].

156. *Dryophis lophorhynchus* Fitzinger, 1826a. Neue Class. Rept.: 61 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

157. *Duberria amoena* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

158. *Duberria badia* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

159. *Duberria bivittata* Fitzinger, 1826a. Neue Class. Rept.: 56 (*nomen nudum*).

Type: Holotype, MV, not designated.
Type locality: "America, Brasilia" [= Brazil, South America].

160. *Duberria boiei* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated (Boie), location unknown.
Type locality: Unknown.

161. *Duberria cinerascens* Fitzinger, 1826a. Neue Class. Rept.: 56 (*nomen nudum*).

Type: Holotype, MV, not designated.
Type locality: "America, Brasilia" [= Brazil, South America].

162. *Duberria dumerilii* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated (Duméril), location unknown.
Type locality: Unknown.

163. *Duberria hemprichii* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated (Hemprich), location unknown.
Type locality: "America septentrionali" [= North America].

164. *Duberria maximiliani* Fitzinger, 1826a. Neue Class. Rept.:56 (*nomen nudum*).

Type: Holotype, not designated (Maximilian), location unknown.
Type locality: "America septentrionali" [= North America].

165. †*Elaphis boulei* De Stefano, 1905. Bol. Soc. Geol. Ital. 24: 41–42, pl. 4, figs. 3–6. (Boidae)

Types: Syntypes (?), MNHN, several vertebrae and one dentary (1893), lost *fide* Rage (1984b: 33).
Type locality: "Quercy" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene to Oligocene].
Distribution: Upper Eocene or Oligocene of France. Known only from syntypes.
Remarks: A *nomen dubium fide* Rage (1984b 33).

166. *Elaphis poecilurus* Jan, 1863b. Elenco Sist. Ofidi: 61 (*nomen nudum*).

Type: Holotype, formerly MSNM, destroyed in 1943 during World War II.
Type locality: Unknown.

167. *Elaps anulatus* Schneider, 1801. Hist. Amph.: 305.

Type: Holotype, MB, not designated.
Type locality: Unknown.
Remarks: A *nomen dubium*.

168. *Elaps corallinus gastrostictus* Jan, 1863b. Elenco Sist. Ofidi: 113 (*nomen nudum*).

Type: Holotype, NMW, not designated.
Type locality: "Colombia."

169. *Elaps obtusicaudus* Wagler, 1825. Amphibia: xii. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

170. *Elaps obtusirostris* Wagler, 1825. Amphibia: xii. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: "Brasilia" [= Brazil].

171. *Elaps schneideri* Jan, 1863b. Elenco Sist. Ofidi: 113 (*nomen nudum*).

Type: Holotype, formerly MSNM, destroyed in 1943 during World War II.
Type locality: "Amer. merid." [= South America].

172. *Enicognathus sagittifer* Berthold, 1859. Nach. Ges. Wiss. Georg-Augustus-Univ. Göttingen (17): 180.

Type: Holotype, not designated, ZMG.
Type locality: "Surinamo" [= Surinam].
Remarks: A *nomen dubium*.

173. *Erythrolamprus mentalis* F. Werner, 1909b. Mitt. Naturhist. Mus. Hamburg 26: 238. (Xenodontidae)

Type: Holotype, ZMH, destroyed in July 1943 during World War II.
Type locality: "Guatemala."
Remarks: A *nomen dubium*. Possibly referable to *Rhadinaea*.

174. *Eupeltis pulchra* Fitzinger, 1843. Syst. Rept.: 25 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Af.?" [= Africa].

175. *Euprepes multilineatus* Philippi *in* Quijada, 1916. Anal. Univ. Chile 104: 46 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

176. *Eutaenia angustirostris* Kennicott, 1860. Proc. Acad. Nat. Sci. Philadelphia 12(8): 332–333. (Natricidae)

Type: Lectotype, USNM 959 (D.N. Couch, 1846–1854), designated by F.G. Thompson (1957: 6).
Type locality: "Parras, Coahuila, Mexico."
Distribution: Northern Mexico (Coahuila).
Source: F.G. Thompson, 1957.
Remarks: A *nomen dubium fide* Rossman et al. (1996: 245).

177. *Furina bilineata* Jan, 1859a. Rev. Mag. Zool. (2) 11: 123, 125–126. (Elapidae)

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Nouvelle-Holland?" [= Australia].
Remarks: Supplemental original description in Jan (1859c: pl. 9, fig. 5). A *nomen dubium*.

178. *Herpetodryas irregularis* Jan, 1863b. Elenco Sist. Ofidi: 81. (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Surinam."

179. *Herpetodryas lineolatus* Jan, 1863b. Elenco Sist. Ofidi: 81. (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.

180. *Herpetodryas poiteaui* Jan, 1857. Cenni Mus. Civico Milano: 45 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Cayenne" [French Guiana].

181. *Herpetodryas xanthogaster* Jan, 1863a. Elenco Sist. Ofidi: 80.

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Brasile" [= Brazil].
Remarks: A *nomen dubium*.

182. *Heterodon vipera* Fitzinger, 1826a. Neue Class. Rept.: 56. (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "America septentrionali" [= North America].

183. *Homalopsis 5-vittata* A.-M.-C. Duméril, 1853. Mém. Acad. Sci. Inst. France 23: 499 (*nomen nudum*).

Type: Holotype, ? MNHN, not designated (Morelet).
Type locality: "Brésil ? de Peten."
Remarks: Possibly a *Helicops*.

184. *Homalopsis python* Fitzinger, 1826a. Neue Class. Rept.: 55.(*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

185. *Homalopsis robustus* Jan, 1863b. Elenco Sist. Ofidi: 77 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Brasile" [= Brazil].

186. *Homalopsis rufotaeniatus* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

187. *Hydrus atricapillus* F. Boie, 1827. Isis von Oken 20(6): 554 (*nomen nudum*).

Type: Holotype, not designated (C.G.C. Reinwardt), location unknown.
Type locality: "moluckischen Inseln" [= Maluku, Indonesia].

188. *Imantodes ancoatl* Sumichrast, 1873. Arch. Sci. Phys. Nat. 46: 246 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Etat de Vera-Cruz, Mexique" [= Veracruz State, Mexico].
Distribution: Southern Mexico (Veracruz), 1000–1200 m.

189. *Lachesis wettsteini* F. Werner, 1923a. Ann. Naturhist. Mus. Wien 36: 166. (Viperidae)

Type: Holotype, NMW 23398 *fide* Tiedemann & Häupl (1980: 56).
Type locality: Unknown.
Remarks: A *nomen dubium*. Probably referable to *Trimeresurus*.

190. †*Laophis crotaloides* Owen, 1857. Quart. J. Geol. Soc. London 13: 196–198, pl. 4, figs. 2–3. (Viperidae)

Types: Syntypes (13), 13 vertebrae (Spratt), lost *fide* Rage (1984b: 58).
Type locality: "near the Promontory of Karabournou, on the eastern coast of the Gulf of Salonica" [= Macedonia, Greece]. Miocene *fide* Rochebrune (1880: 292).
Distribution: Upper Miocene or lower Pliocene of Greece. Known only from type series.
Remarks: A *nomen dubium*.

191. *Leptaspes atacamensis* Philippi *in* Quijada, 1916. Cat. Sist. Rept. Chil.: 23 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: Probably a *Chironius fide* Donoso-Barros & Cardenas (1964: 230).

192. *Leptaspis inornata* Fitzinger, 1861. Sitz. Akad. Wiss. Wien Math.-Natur. Kl. (1860) 42(25): 410 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Neu-Holland" [= Australia].

193. *Leptophis chenonii heuglini* Jan, 1857. Cenni Museo Civico di Milano: 45 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Sennar" [Sudan].

194. *Leptophis nilagiricus* Jerdon, 1853. J. Asiat. Soc. Bengal 22(6): 529. (Colubridae)

Type: Holotype, not designated, location unknown.
Type locality: "grassy hills of the Neelgherries" [SW India].
Source: Ganesh & Chalndramouli, 2011.
Remarks: A *nomen dubium*. Possibly a synonym of *Ahaetulla perroteti*.

195. *Leptophis tatacua* Briceõ-Rossi, 1934. Bol. Min. Salub. Agric. Cria, Caracas 2(14): 1130, 1 fig (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: Possibly an Amphisbaenia.

196. *Liopeltis brevicauda* Jan, 1863b. Elenco Sist. Ofidi: 82.

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium*.

197. *Liophis poecilogyrus californica* Jan, 1863a. Arch. Zool. Anat. Fis. 2(2): 292.

Types: Syntypes (2), MNHN, (Freyburg [California]).
Type locality: "California, Brasile" [California, USA and Brazil].
Remarks: A *nomen dubium*.

198. *Liophis poecilogyrus doliata* Jan, 1863a. Arch. Zool. Anat. Fis. 2(2): 292.

Type: Holotype, MZN, not designated.
Type locality: "Brasile" [= Brazil].
Remarks: A *nomen dubium*.

199. *Lycodon assimilis* Jerdon, 1853. J. Asiat. Soc. Bengal 22(6): 528–529. (Colubridae)

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: A *nomen dubium*. Probably referable to *Lycodon*.

200. *Lycodon aulicum subfasciatum* Jan, 1863b. Elenco Sist. Ofidi: 96 (*nomen nudum*).

Type: Holotype, ZMG, not designated.
Type locality: Unknown.

201. *Lycodon aulicum transversalis* Jan, 1863b. Elenco Sist. Ofidi: 96 (*nomen nudum*).

Type: Holotype, MHNG, not designated.
Type locality: Unknown.

202. *Lycodon bicolor* Jan, 1863b. Elenco Sist. Ofidi: 97 (*nomen nudum*).

Type: Holotype, MM, not designated.
Type locality: Unknown.

203. *Lycodon linckii* F. Boie, 1827. Isis von Oken 20(6): 528 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

204. *Lycodon mordax* F. Boie, 1827. Isis von Oken 20(6): 534 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

205. †*Naja sauvagei* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 293, pl. 12, figs. 14a–c.

Type: Holotype, MNHN MCF 5, one trunk vertebra.
Type locality: "Brèches de Coudes, près Issoire, terrain Récent" [= Coudes, Pay-de-Dôme Dept., cen. France; Pleistocene].
Distribution: Middle Pleistocene of France. Known only from type specimen.
Remarks: A Recent juvenile colubrid (perhaps *Natrix*) *fide* Rage (1984b: 54).

206. †*Naja suevica* (Fraas, 1870). Jahresh. Ver. Vaterl. Naturk. Württemberg 26: 291. (Colubridae)

Type: Lectotype, SMNS 51026a, one trunk vertebra, designated by Rage (1984b: 45).
Type locality: Steinheim, Baden-Württemberg, Germany; Astaracian, middle Miocene.
Distribution: Middle Miocene (Astaracian: MN6–8: 11.1–12.8 mya) of Germany and Czech Republic.
Sources: Rage, 1984b and Ivanov, 2002.
Remarks: *Coluber incertae sedis fide* Rage (1984b: 45).

207. *Naja vera* Fitzinger, 1826a. Neue Class. Rept.: 61 (*nomen nudum*).

Type: Holotype, not designated (Hemprich), location unknown.
Type locality: "Asia, India."

208. *Natrix argus* Laurenti, 1768. Synop. Rept.: 78.

Type: Holotype, Museo Turriano (? MZUT).
Type locality: Unknown.
Remarks: A *nomen dubium*.

209. *Natrix callocephala* Wagler, 1825. Amphibia: lvi. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: "Java" [= Java, W Indonesia].

210. *Natrix cinnamomeus* Wagler *in* Spix, 1824. Serp. Brasil. Sp. Nov.:20–21, pl. 6, fig. 1. (Colubridae)

Synonyms: *Chironius cinnamomeus* – J.A. Peters & Orejas-Miranda, 1970, and *Pseustes cinnamomoeus* – Claessen, 2003a.
Type: Holotype, formerly ZSM, a 1480 mm specimen (J.B. von Spix, 21 Aug. 1819–3 Feb. 1820), lost *fide* Hoogmoed & Gruber (1983: 328).
Type locality: "sylvis flumini Amazonum confinibus, l'intérieur du Brésil" [= rainforest of Amazion River, Pará or Amazonas State, N Brazil].
Distribution: Northern South America. Colombia, N Venezuela (Monagas), Brazil (Amazonas) and Suriname.
Sources: F. Werner, 1898, Hoge, 1964d, J.A. Peters & Orejas-Miranda, 1970, Lancini & Kornacker, 1989 and Claessen, 2003a.
Remarks: Holotype is ZSM 1679/0 *fide* F. Werner (1897a: 207). A *nomen dubium fide* Hoogmoed & Gruber (1983: 328).

211. *Natrix humana* Laurenti, 1768. Synop. Rept.: 80.

Types: Syntypes (2), not designated, ? RMNH (formerly MG).
Type locality: "Amboina & Mexico" [= Ambon, Indonesia and Mexico].
Remarks: A *nomen dubium*.

212. *Natrix maculiventris* Wagler, 1825. Amphibia: xlvii. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: "Brasilia" [= Brazil].

213. *Natrix moniliformis* Wagler, 1825. Amphibia: xlvii. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: "Brasilia" [= Brazil].

214. *Natrix ourdia* Wagler, 1825. Amphibia: liv–lv (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: "India orientalis" [= E India].

215. *Natrix punctata* Laurenti, 1768. Synop. Rept.: 80.

Synonyms: *Coluber puntulatus* Gmelin, 1789, and *Coluber farinosus* Bonneterre, 1790.
Type: Holotype, ? RMNH (formerly MG), not designated.
Type locality: Unknown.
Remarks: A *nomen dubium*.

216. *Natrix rhomboigera* Wagler, 1825. Amphibia: xlvii. (*nomen ineditum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.
Remarks: Type locality "Brasilia" [= Brazil]. Possibly either *Xenodon rabdocephalus* or *Waglerophis merremii*.

217. †*Natrix rusticus* G. Brunner, 1957. Neues Jb. Geol. Paläont., Stuttgart 1957(7–8): 377, fig. 16.5.

Type: Holotype, BSM 1982 X, one dentary (H. Brand).
Type locality: "middle Pleistocene of Breitenberghöhle near Gössweinstein" [= Breitenberghöhle ca. 1 km E Gößweinstein, Bavaria, W Germany; middle Pleistocene].
Distribution: Middle Pleistocene of Germany. Known only from the holotype.
Remarks: A *nomen dubium fide* Rage (1984b 52) and Szyndlar & Böhme (1993: 390). Possibly a Recent species *fide* Rage (1984b 52).

218. †*Ogmophis kansasensis* R.L. Wilson, 1968. Contr. Mus. Paleont., Univ. Michigan 22(7): 99–100, 9a–c. (Colubridae)

Type: Holotype, UMMZP V55687, one precaudal vertebra.
Type locality: "UM-K6-59. Ogallala Formation, Lower Pliocene, Trego County, Kansas" [USA].
Distribution: Lower Pliocene of USA (Kansas). Known only from type locality.
Remarks: A *nomen dubium* fide Rage (1984b 28) and Holman (2000a: 79), who referred it to the Colubridae.

219. †*Ogmophis parvus* K.L. Rogers, 1976. Publ. Mus. Michigan St. Univ. (Paleont.) 1(5): 186–188, figs. 16a–c. (Colubridae)

Type: Holotype, MSUVP 9284, one middle trunk vertebra (W.W. Dalquest, 1967–1972).
Type locality: "on the property of Mr. Jimmie Beck, 17 kilometers E. Snyder, SW corner of NE quarter of NE quarter, Sec. 62, HTC Survey, Scurry County, Texas, at an elevation of 518 meters; Beck Ranch local fauna, Blancan age, Upper Pliocene."
Distribution: Upper Pliocene (Blancan: 1.9–4.9 mya) of Texas. Known only from type locality.
Remarks: A *nomen dubium fide* Holman (2000a: 254).

220. †*Ogmophis pauperrimus* Vanzolini, 1952. J. Paleont. 26(3): 453–454, pl. 55, figs. 1–5.

Type: Holotype, MCZVP 1976, one trunk vertebra.
Type locality: "Thomas Farm, Gilchrist County, Florida; Arikareean, lower Miocene."
Distribution: Lower Miocene (Hemingfordian) of Florida. Known only from type locality.
Source: Auffenberg, 1963.
Remarks: A *nomen dubium fide* Holman (2000a: 79).

221. *Oligodon dorsale* Berthold, 1859. Nach. Ges. Wiss. Georg-Augustus-Univ. Göttingen (17): 179.

Synonym: *Oligodon bertholdi* F. Werner, 1929a *(nomen substitutum).*
Type: Holotype, not designated, ZMG.
Type locality: "Bengala" [= Bengal, India].
Remarks: A *nomen dubium*.

222. †*Ophidion antiquus* Pomel, 1853. Cat. Méth. Vert. Foss.: 128 (*nomen rejiciendum*). (Boidae)

Type: Holotype, not designated, location unknown.
Type locality: "Terrain tertiare à Langy, le basin hydrographique supérieur de la Loire" [France].
Distribution: Miocene of France.
Remarks: A *nomen dubium fide* Rage (1984b: 32). Official Rejected Name no. 806 *fide* Direction 56 (ICZN, 1956e).

223. †*Ophidium incertum* Burmeister, 1885. Anal. Mus. Nac. Buenos Aires 3(2): 152.

Type: Holotype, MACN, one fragmentary quadrate (D.J. José de Urquiza, 18 Oct. 1855), lost *fide* Rage (1984b: 60).
Type locality: "los terrenas marinos Terciarios, de las cercanías del Paraná... la base de la meseta sobre la cual se levanta la ciudad del Paraná, capital de la Confederacion Argentina, á una altura media de 35 metros sobre el nivel ordinario de las aguas del rio; la Formacion Terciaria, el Terreno Mioceno" [= Proximity of Paraná, W Entre Rios Prov., NE Argentina; Tertiary, Miocene].
Distribution: Upper Miocene or Pliocene of Argentina. Known only from holotype.
Remarks: A *nomen dubium fide* Rage (1984b: 60).

224. †*Ophis dubius* Goldfuss, 1831. Nova Acta Acad. Phys.-Med. Caesar. Leop.-Carol. Nat. Cur. 15: 127–128, pl. 13, fig. 8 (*nomen dubium*).

Type: Holotype, GPIBO Goldfuss 1345, an imprint of skin, lost *fide* Szyndlar & Böhme (1993: 388).
Type locality: "Braunkhle des Siebengebirges" [= Rott, Nordhein-Westfalen Prov., W Germany; Arvenian, upper Oligocene *fide* Rage (1984b: 61)].
Distribution: Upper Oligocene (Arvernian, MP 30) of Germany. Known only from holotype.
Remarks: A *nomen dubium fide* Rage (1984b: 61) and Szyndlar & Böhme (1993: 388).

225. *Oxybelis punctulatus* A.-M.-C. Duméril, 1853. Mém. Acad. Sci. Inst. France 23: 487 (*nomen nudum*).

Type: Holotype, ? MNHN, not designated.
Type locality: Unknown.

226. *Oxybelis venulatus* Jan, 1863b. Elenco Sist. Ofidi: 88.

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium*.

227. *Oxyrhopus doliatus problematicus* Jan, 1863b. Elenco Sist. Ofidi: 93 (*nomen nudum*).

Type: Holotype, ZMH, not designated.
Type locality: "Brasile" [= Brazil].

228. *Oxyrhopus petolarius versatilis* Jan, 1863b. Elenco Sist. Ofidi: 94 (*nomen nudum*).

Type: Holotype, MNHN, not designated.
Type locality: "Corrientes" [Argentina].

229. *Oxyrhopus petolarius amoenus* Jan, 1863b. Elenco Sist. Ofidi: 94 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Venezuela."

230. †*Palaelaphis antiquus* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 156–157, pl. 1, figs. 3a, 3b, pl. 2, figs. 7–7c. (Boidae)

Type: Lectotype, MNHN QU 16339, one anterior trunk vertebra, designated by Rage (1984b: 32).
Type locality: "Phosphorites du Quercy, Eocène" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene to Oligocene] via lectotype selection.
Distribution: Upper Eocene or Oligocene of France. Known only from type series.
Remarks: A *nomen dubium fide* Rage (1984b: 32).

231. †*Palaelaphis robustus* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 157, pl. 2, fig. 8.

Type: Holotype, MNHN QU 16341, one dentary.
Type locality: "Phosphorites du Quercy, Eocène" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene to Oligocene].
Distribution: Upper Eocene or Oligocene of France. Known only from holotype.
Remarks: A *nomen dubium fide* Rage (1984b: 32).

232. †*Palaeophis giganteus* Pomel *in* Graves, 1847. Essai Topogr. Géog. Oise: 586 (*nomen nudum*).

Type: Holotype, several vertebrae (Lévesque), lost *fide Rage (1984b*: 60).
Type locality: "Sables glauconieux moyens: Cuise-Lamotte" [France].
Distribution: Lower Eocene (Ypresian) of France (Cuise-la-Motte).
Remarks: A *nomen nudum fide* Rage (1984b: 60).

233. †*Palaeophis halidanus* Cope, 1869a. Proc. Acad. Nat. Sci. Philadelphia (1868) 20(4): 234–235.

Type: Holotype, YPM 2763, one fragmentary vertebra (O.B. Kinney).
Type locality: "Squankum, Monmouth Co., N.J., a few miles south of Shark River. The horizon is Eocene." Emended to Manasquan Marl, 3 miles S of Farmingdale, New Jersey *fide* Gilmore (1938: 50) and Ypresian, lower Eocene *fide* Rage (1984b: 34).
Distribution: Lower Eocene (Ypresian) of USA (New Jersey). Known only from holotype.
Source: Cope, 1869d.
Remarks: A *nomen dubium fide* Rage (1984b: 36).

234. †*Palaeophis longus* Owen, 1850. Palaeontogr. Soc. Monogr. (1849) 3(2): 66, pl. 14, figs. 35–37, 45–46.

Types: Syntypes (?), BMNH, several vertebrae (Colchester), lost *fide* Rage (1984b: 36).
Type locality: "Eocene formation underlying the Red Crag at Kyson or Kingston in Suffolk" [= Kingston, Suffolk, England, UK; Suffolk Pebble Beds, Sparnacian, lower Eocene *fide* Rage, 1984b: 36].
Distribution: Lower Eocene (Ypresian) of UK (England). Known only from type specimens.
Remarks: A *nomen dubium fide* Rage (1983b: 226 & 1984b: 36).

235. †*Paleryx cayluxi* De Stefano, 1905. Boll. Soc. Geol. Ital. 24: 48–49, pl. 4, figs. 9–10, pl. 5, figs. 1–2.

Types: Syntypes, MNHN QU 16327, one dentary, MNHN QU 16328, one pterygoid, and two articulated trunk vertebrae, the latter lost *fide* Rage (1984b: 22).
Type locality: "Phosphorites du Quercy" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene to Oligocene].
Distribution: Upper Eocene or Oligocene of France. Known only from type locality.

Remarks: Similar to *Paraepicrates fide* Rage (1984b: 22) but without vertebrae impossible to assign to genus.

236. *Phenacophis zelebori* Fitzinger, 1861. Sitz. Akad. Wiss. Wien, Math.-Natur. Kl. (1860) 42(25): 407 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Chile."

237. *Philodendros agnellii* Fitzinger, 1853. Sitz. Akad. Wiss. Wien, Math-Natur. Klasse 10(4): 658.

Types: Syntypes (4), NMW (formerly HNC) (Lautner, 1851), probably destroyed 6 Nov. 1944 during World War II.
Type locality: "Ägypten" [= Egypt].
Remarks: A *nomen dubium*.

238. *Pilidion montanum* Jerdon, 1853. J. Asiat. Soc. Bengal 22(6): 527. (? Uropeltidae)

Type: Holotype, not designated, location unknown.
Type locality: "Neelgherries" [= Nilgiri Hills, cen. Western Ghats, W Tamil Nadu/SE Kerala States, SW India].
Remarks: A *nomen dubium*.

239. †*Protropidonotus steinheimensis* (Fraas, 1870). Jahresh.Ver. Vaterländ Naturk. Württemberg 26(2–3): 291. (†*Coluber steinheimensis*)

Synonym: †*Protropidonotus neglectus* Schlosser, 1916.
Type: Lectotype, SMNS 51027a, one posterior trunk vertebra, designated by Rage (1984b: 51).
Type locality: "Steinheim, bei Heidenheim, eine tertiäre Oase des Steinheimer Beckens; miocänen, tertiären Localitäten namentlich nicht mit Bohnerzlocalitäten" [= Steinheim am Albuch, NE Baden-Württemberg State, SW Germany; Miocene, Bohnerz locality].
Distribution: Middle Miocene (Astaracian, MN 7–8: 11.1–12.8 mya) of Germany.
Sources: Rage, 1984b and Szyndlar, 2012.
Remarks: A *nomen dubium fide* Szyndlar & Böhme (1993: 388–389).

240. *Psammophidion smithii* Fitzinger, 1861. Sitz. Akad. Wiss. Wien, Math.-Natur. Kl (1860) 42(25): 407 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Cap" [= Cape of Good Hope, South Africa].

241. *Psammophis oblitus* Jan, 1863b. Elenco Sist. Ofidi: 90 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.

242. *Psammophis sibilans amoena* Jan, 1863b. Elenco Sist. Ofidi: 90. (Psammophiidae)

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Capo" [= Cape of Good Hope, South Africa].
Remarks: A *nomen dubium*. Probably a *Psammophis*.

243. *Pseudoboa sapa* Briceño-Rossi, 1934. Bol. Min. Salub. Agric. Cria, Caracas 2(15)25–29, 1 fig. (Xenodontidae)

Type: Holotype, not designated, a 1200 mm specimen, location unknown.
Type locality: "Rio de Oro y Catatumbo, Venezuela" [= Rio de Oro, Sucre State, and Catatumbo, Zulia State, N Venezuela].
Distribution: Northern Venezuela (Sucre, Zulia).
Remarks: A black opisthoglyph with 23 smooth scale rows, divided anal, 42 subcaudals, 8 (4-5) supralabials, 2 preoculars, 2 postoculars and asubocular.

244. *Pseudoelaps cingulatus* Fitzinger, 1826a. Neue Class. Rept.: 56 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

245. *Pseudoeryx pyrrhogrammus* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

246. *Pseudoeryx strigiventris* Fitzinger, 1826a. Neue Class. Rept.: 55 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

247. †*Pterosphenus muruntau* Averianov, 1997. Russ. J. Herp. 4(2): 138, figs. 7a–h.

Type: Holotype, ZISP PC 1/34, one anterior trunk vertebra (A.O. Averianov, L.A. Nessov, or A.V. Panteleev, 1987 or 1989).
Type locality: "Dzheroi 2, white quartz sands in a large hollow near the eastern Muruntau-Tamdy road, Central Kyzylkum Desert, Bukhara Viloyat, Uzbekistan."
Distribution: Middle Eocene (Bartonian) of Uzbekistan. Known only from type locality.
Remarks: A *nomen dubium fide* Rage et al. (2003: 701).

248. †*Pylmophis gracilis* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 158, pl. 1, figs. 4–4a, pl. 2, figs. 9, 9a–c.

Type: Lectotype, MNHN QU 16335, two articulated posterior trunk vertebrae, designated by Rage (1984a: 32).
Type locality: "Phosphorites du Quercy" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene-Oligocene] via lectotype selection.
Distribution: Upper Eocene or Oligocene of SW France. Known only from the type series.
Remarks: A *nomen dubium fide* Rage (1984a: 32).

249. †*Python euboeicus* Roemer, 1870. Zeits. Deutsch. Geol. Ges. 22(13): 582, pl. 13, 3 figs.

Type: Holotype, ZPWM, ca. 25 trunk vertebrae, ribs and one dentary (Beinert, 1852), lost *fide* Rage (1984b: 33).
Type locality: "eines Braunkohlenlagers von Kumi auf der Insel Euboea... in tertïaren Schichten Griechenlands" [= Kími, E Évvoia Is., E Greece; lower Miocene].
Distribution: Lower Miocene of Greece. Known only from type locality.
Sources: Rochebrune, 1880, Kuhn, 1939b, 1963, Rage, 1984b, Szyndlar, 1991a and Szyndlar & Rage, 2003.
Remarks: A *nomen dubium fide* Rage (1984b: 33).

250. †*Rageophis lafonti* (Filhol, 1877). Ann. Sci. Géol. 8(1): 558, pl. 25, figs. 413–418. (†*Coluber lafonti*)

Type: Lectotype, QU 16342, mummified skin with attached vertebrae and ribs (H. Filhol, 1865–1876), designated by Rage (1988a: 460).
Type locality: "Les Phosphorites du Quercy, sur le plateau du Quercy, sur divers points des départements du Lot, du Tarn-et-Garonne, et de l'Aveyron" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene to Oligocene] via lectotype selection.
Distribution: Upper Eocene or Oligocene of France. Known only from type series.
Remarks: A *nomen dubium fide* Rage (1984a: 32).

251. *Rhadinaea steinbachi* Boulenger, 1905b. Ann. Mag. Nat. Hist. (7) 15(89): 454–455.

Synonym: *Aporophis melanocephalus* L.E. Griffin, 1916.
Types: Syntypes (2), BMNH, a 540 mm female, and NMW 23106, a juvenile male (J. Steinbach, 1904–1905).
Type locality: "Province Sara, Department Santa Cruz de la Sierra" [= Ñuflo de Chávez Prov., Santa Cruz Dept., SE Bolivia, 16°50'S, 63°55'W].
Distribution: Eastern Bolivia (Santa Cruz), 250 m. Known only from syntypes.
Remarks: *Incertae sedis fide* C.W. Myers (1974: 22) and Dixon (1980: 15).

252. *Rhinocleis gradatus* Jan, 1857. Cenni Mus. Civico Milano: 46. (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.

253. *Rhinostoma rufo-fusca* Fitzinger, 1826a. Neue Class. Rept.: 56 (*nomen nudum*).

Type: Holotype, MV, not designated.
Type locality: "America, Insula St. Dominici" [= Dominican Republic].

254. †*Saurophis crassus* Brunner, 1957. Neues Jb. Geol. Paläont. 1957(7–8): 376–377, fig. 15. (Natricidae)

Type: Holotype, PCBN, one left dentary, lost *fide* Estes (1983: 211).
Type locality: "Die Breitenberghöhle bei Gössweinstein (Ofr.)." [= Breitenberghöhle ca. 1 km E Gößweinstein, Bavaria, W Germany; middle Pleistocene].
Distribution: Upper Pleistocene of Germany (Bavaria).
Remarks: A *nomen dubium fide* Estes (1983: 211).

255. †*Scaptophis miocenicus* Rochebrune, 1880. Nouv. Arch. Mus. Hist. Nat. (2) 3: 279–280, pl. 12, figs. 7a–c. (Colubridae)

Type: Holotype, MNHN SA 9880, one trunk vertebra.
Type locality: "Colline de Sansan. Miocène," (partly in error). Corrected to Sansan, Gers Dept., S France, Recent *fide* Hoffstetter (1955: 657), Mlynarski (1961: 29), and Rage (1981: 541).
Distribution: Recent of France (Gers). Known only from holotype.
Sources: Hoffstetter, 1955, Mlynarski, 1961 and Rage, 1981, 1984b.
Remarks: A *nomen dubium fide* Rage (1981: 541) and Augé & Rage *in* Ginsburg (2000: 301).

256. *Scolecophis cingulata* Fitzinger *in* Jan, 1857. Cenni Mus. Civico Milano: 44 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

257. *Sepedon brongniardii* Fitzinger, 1826a. Neue Class. Rept.: 62 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

258. *Simotes aspersus* A.-M.-C. Duméril, 1853. Mém. Acad. Sci. Inst. France 23: 472 (*nomen nudum*).

Type: Holotype, ? MNHN, not designated.
Type locality: "Indes orientales" [= East Indies].
Remarks: Probably an *Oligodon*.

259. †*Suffosio praedatrix* Standhart, 1986. Vert. Paleont. Cretaceous/Tertiary Texas: 124–127, figs. 36a–f. (Anomalepididae) (*nomen ineditum*)

Type: Holotype, LSUMG V-797, one vertebra.
Type locality: "Dogie (VL-108), Upper Javelina Member, Tornillo Formation, Big Bend National Park, Texas. Puercan (early Paleocene)."
Distribution: Lower Paleocene of USA (Texas).
Remarks: A *nomen dubium fide* Rage (pers. comm.).

260. †*Tachyophis nitidus* Rochebrune, 1884. Mém. Soc. Sci. Nat. Saone-et-Loire 5: 159–160, pl. 1, figs. 5–5a, pl. 2, figs. 10–10b.

Type: Lectotype, MNHN QU 16331, four articulated trunk vertebrae, designated by Rage (1984b: 32).
Type locality: "Phosphorites du Quercy, France; l'epoque de l'Eocène supérieur" [= Phosphorites of Quercy, on the Quercy Plateau, from the departments of Lot, Tarne-et-Garonne, and Aveyron in SW France; upper Eocene] via lectotype selection.
Distribution: Upper Eocene of France. Known only from type specimens.
Remarks: A *nomen dubium fide* Rage (1984b: 33).

261. *Tamacuilla huilia* Brüggemann & Wigand, 1838. Naturg. Abbild. Besch. Amph. 1: 98 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

262. *Thamnophis sumichrasti cerebrosus* H.M. Smith, 1942g. Zoologica 27(3–4): 99.

Type: Holotype, USNM 12734, a female specimen (H.J. Stuart).
Type locality: "Escuintla, Guatemala."
Distribution: Guatemala (Escuintla).
Source: Rossman, 1991.
Remarks: *Incertae sedis fide* Rossman et al. (1996: 160).

263. *Thamnosophis delesserti* Jan, 1863b. Elenco Sist. Ofidi: 82.

Type: Holotype, MNHN, not designated.
Type locality: Unknown.
Remarks: A *nomen dubium*.

264. *Thanatophis patoquilla* Posada Arango, 1889. Anal. Acad. Med. Medellin 2: 47.

Type: Holotype, not designated, lost *fide* Niceforo María (1938: 417).
Type locality: "las regiones bajas y cálidas del Departamento especialmente hacia el nordeste" [= Medellín, Colombia].
Distribution: Colombia. Known only from holotype.
Source: McDiarmid et al., 1999.
Remarks: A synonym of *Porthidium lansbergi fide* Daniels (1949: 329) but *incertae sedis fide* J.A. Peters and Orejas-Miranda (1970: 329) and McDiarmid et al. (1999: 324).

265. †*Thoracophis rugosus* Trochel, 1854. Verh. Naturhist. Ver. Pruess. Rheinlande Westfalens 11(1): xix (*nomen dubium*).

Type: Holotype, lost *fide* Rage (1984a: 61).
Type locality: "Braunkohle von Rott" [Germany].
Distribution: Upper Oligocene of Germany.
Remarks: A *nomen dubium fide* Rage (1984a: 61). Not a snake but an anguid lizard *fide* Szyndlar & Böhme (1993: 390).

266. *Tortrix australis* Gray *in* Grey, 1841b. J. Two Exped. Australia 2: 444.

Type: Holotype, not designated, location unknown.
Type locality: "Australia."
Remarks: A *nomen dubium fide* Cogger et al. (1983a: 264).

267. *Trimaculatus ceylonensis* Higgins, 1873. Ophidians: 80 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Ceylon" [= Sri Lanka].

268. *Trimeresurus colubrinus* Fitzinger, 1826a. Neue Class. Rept.: 61 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

269. *Tropidolaemus bivittatus* Kröyer *in* J.T. Reinhardt, 1861a. Vidensk. Medd. Naturhist. Foren. Kjöbenhavn (1860) 22: 228 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

270. *Tropidolaemus mystax* Kröyer *in* J.T. Reinhardt, 1861a. Vidensk. Medd. Naturhist. Foren. Kjöbenhavn (1860) 22: 228 (*nomen nudum*).

Type: not designated, location unknown.
Type locality: Unknown.
Remarks: Collector was Hombron and type locality Philippines.

271. †*Tropidonotus atavus* H. Meyer, 1855. Neues Jahrb. Min. Geog. Geol. Petrefak. 23: 337. (Colubridae)

Type: Holotype, IPUB 9, skull and incomplete axial skeleton embedded in matrix.
Type locality: "Grube Romerikenberg" [= Romeriken-Berge Quarry, Rott, Bavaria Distr., W Germany; Arvernian, upper Oligocene *fide* Rage, 1984b: 44].
Distribution: Upper Oligocene (Arvenian) and lower Miocene of Germany (Bavaria).
Remarks: A *nomen dubium fide* Rage (1984b:44).

272. *Tropidonotus catenulatus* Jan, 1857. Cenni Mus. Civico Milano: 45 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Messico" [= Mexico].

273. †*Tropidonotus elongatus* Troschel, 1854. Verh. Naturhist. Ver. Pruess. Rheinlande Westfalens 11(1): xix (*nomen nudum*).

Type: Holotype, lost *fide* Rage (1984b: 60).
Type locality: "Braunkohle von Rott." [Germany].
Distribution: Upper Oligocene of W Germany (Rott).
Remarks: A *nomen nudum fide* Rage (1984b: 60). Not a snake but an anguid lizard *fide* Szyndlar & Böhme (1993: 390)

274. *Tropidonotus glaphyros* Jan, 1865c. Arch. Zool. Anat. Fis. 3(2): 214.

Synonym: *Tropidophis glaphyros* Jan, 1863b *(nomen nudum).*
Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Amer. settentr." [= North America].
Remarks: A *nomen dubium.*

275. *Tropidonotus incertus* Jan, 1863b. Elenco Sist. Ofidi: 72 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.

276. *Tropidonotus intermedius* Jan, 1863b. Elenco Sist. Ofidi: 69 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Indie orientali ?" [= E India].

277. *Tropidonotus meleagris* Wiegmann *in* Fitzinger, 1843. Syst. Rept.: 26 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "Am." [= America].

278. *Tropidophis distinctus* Jan, 1863b. Elenco Sist. Ofidi: 22 (*nomen nudum*).

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: "Charlestown" [= Charleston, South Carolina, USA].

279. *Typhlops cubae* Bibron, 1838/39 *in* Ramon de la Sagra, 1838–1843. Hist. Fis. Pol. Nat. Isla Cuba 2(2): 122–123, pl. 22, figs. 1–5.

Types: Syntypes (2), MNHN 3218, a 215 mm specimen, and MNHN 1999.8218 (formerly MNHN 3218a), a 197 mm specimen (D. Ramón de la Sagra, 1824–1835).
Type locality: "Cuba."
Source: Domínguez & Diaz, 2011a.

Remarks: Previously a synonym of *Typhlops lumbricalis*. A *nomen nudum fide* R. Thomas (1968: 714).

280. *Typhlops disparilis* Jan, 1860 *in* Jan & Sordelli, 1860–1866. Icon. Gen. Ophid. 1(1): 1, pls. 5, fig. 6, pl. 6, fig. 6.

Type: Holotype, MSNM, not designated, a 300 mm specimen, destroyed in 1943 during World War II.
Type locality: Unknown.
Sources: W.C.H. Peters, 1881 and Boulenger, 1893a.
Remarks: Listed as *incertae sedis* by Hahn (1980a: 76).

281. *Typhlops inconspicuus* Jan, 1863b. Elenco Sist. Ofidi: 11 (*nomen nudum*).

Type: Holotype, MNHN, not designated.
Type locality: "Madagascar."

282. *Typhlops tenuis* Jan, 1863b. Elenco Sist. Ofidi: 10.

Type: Holotype, MSNM, not designated, destroyed in 1943 during World War II.
Type locality: Unknown.
Remarks: A *nomen dubium*.

283. *Typhlops textilis* Jan, 1863b. Elenco Sist. Ofidi: 11 (*nomen nudum*).

Type: Holotype, MNHN, not designated.
Type locality: Unknown.

284. *Typhlops troscheli* Jan, 1863b. Elenco Sist. Ofidi: 11 (*nomen nudum*).

Type: Syntypes, MNHN and MSNM, not designated, the latter destroyed in 1943 during World War II.
Type locality: Unknown.

285. *Tyria cloquetii* Fitzinger, 1826a. Neue Class. Rept.: 60 (*nomen nudum*).

Type: Holotype, not designated (Cloquet), location unknown.
Type locality: Unknown.

286. *Tyria kollari* Fitzinger, 1826a. Neue Class. Rept.: 60 (*nomen nudum*).

Type: Holotype, not designated (Kollar), location unknown.
Type locality: Unknown.

287. *Tyria schreibersii* Fitzinger, 1826a. Neue Class. Rept.: 60 (*nomen nudum*).

Type: Holotype, not designated (Schreibers), location unknown.
Type locality: Unknown.

288. *Vipera cobra* Laurenti, 1768. Synop. Rept.: 103.

Type: Holotype, Museo Turriano (? MZUT).
Type locality: Unknown.
Remarks: A *nomen dubium*.

289. *Vipera lanceolata* Raddi, 1823. Mem. Mat. Fis. Soc. Ital. Sci., Modena 19: 63–64. (Viperidae)

Type: Holotype, not designated (G. Raddi, 1817–1818), location unknown.
Type locality: "provincia di Rio-janeiro" [= Rio de Janeiro State, SE Brazil].
Remarks: A *nomen dubium*. Probably a crotaline like *Bothrops*.

290. †*Vipera sansaniensis* Lartet, 1851. Notice Colline Sansan: ?? (*nomen nudum*).

Type: Holotype, tubular fangs, lost *fide* Rage (1984b: 60).
Type locality: "Sansan, du terrain tertiare Miocène dans le Bassin Sous-Pyrènéen" [= Gers Prov., France].
Distribution: Upper Miocene of France.
Remarks: A *nomen nudum fide* Rage (1984b: 60).

291. *Vipera urens* F. Boie, 1827. Isis von Oken 20(6): 559 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: Unknown.

292. *Xenodon reinhardtii* Kröyer *in* J.T. Reinhardt, 1861a. Vidensk. Medd. Naturhist. Foren. Kjöbenhavn (1860) 22: 222 (*nomen nudum & nomen corrigendum*).

Synonym: *Xenodon einhardii* Kröyer *in* J.T. Reinhardt, 1861a (*nomen incorrigendum*).
Type: Holotype, not designated, location unknown.
Type locality: Unknown.

293. *Xenodon treuensteini* Jan, 1857. Cenni Mus. Civico Milano: 46 (*nomen nudum*).

Type: Holotype, NMW, not designated.
Type locality: "Brasile" [= Brazil].

294. *Xenodon uniporus* Fitzinger, 1826a. Neue Class. Rept.: 57 (*nomen nudum*).

Type: Holotype, not designated, location unknown.
Type locality: "America, Brasilia" [= Brazil].

295. *Xenopeltis trivirgatus* Jerdon, 1853. J. Asiat. Soc. Bengal 22 (6): 527.

Type: Holotype, not designated, location unknown.

Type locality: "Neelgherries" [= Nilgiri Hills, cen. Western Ghats, W Tamil Nadu/SE Kerala States, SW India].

Remarks: A *nomen dubium*. Possibly referable to *Calamaria*.

296. *Zamenis argentinus* Brèthes, 1917. Physis 3: 92–94, 2 figs.

Type: Holotype, not designated, location unknown.

Type locality: "Argentina."

Remarks: *Incertae sedis fide* J.A. Peters & Orejas-Miranda (1970: 129). Referable to *Philodryas fide* F. Werner (1924a: 34).
